And Raulbai is like that. She is a very simple woman, very simple woman and she lives like a very simple person. She has a sense of permeation. And now there are so many Sahaja Yogis, yesterday who came; and I am sure that they will take up Sahaja Yoga very well. There are lots of Sahaja Yogis from Dhulia now. And I am sure there are going to be more people. I hope you have met all of them. Make friends with all of them. Try to know them who they are. They may not know English. You get somebody to translate. Talk to them and be nice to them. Be friendly with them. I wanted you to meet them for permeation. You should know who are the people here, who are in Nasik. Because somehow we never meet the Sahaja Yogis, you see, who are in that particular place. And when we go back we have only one or two addresses. It is not a good idea. Try to see how many people there are. Ask questions about them.

And all that.

This permeation is only possible when your ego starts permeating all around. And this is the way to overcome

the problems of the right side and that is how to worship Saraswatī. Because Saraswatī has a Vīnā in Her hand and that Vīnā is the primordial instrument which She plays like music and music penetrates into the heart. You don't know how it goes into you and how it works out. That is how a person who is Sahaja Yogi should permeate, like music. There are so many qualities as I told you which cannot be described in one lecture.

But one of the greatest quality of Hers is that She ends up into subtler things like the Mother Earth will end up into fragrance. Music will end up into melody like that whatever She creates ends up into something greater. Matter, whatever She produces ends up into aesthetics. If matter does not have aesthetics then it is gross, like that everything. Now you will say what is water. Water becomes the river Ganges! These are the subtler things.

So the matter gets into subtler thing because it has to permeate, it has to permeate.

So everything whatever it is. And the best of all is the air. That air becomes the vibrations! So you can see how whatever has come out from this matter, from these five elements, becomes that subtler thing. Of course, the left and right side both work it out. Because the love has to work on this and when love acts on matter it becomes that and that is how one has to look at your own life, to make it a beautiful combination of love and matter.

May God bless you!

Contents: 1983-01-18 **Śhrī Gaṇeśha Pūjā, Nasik, Maharashtra, India**

Please be seated...

Sahaja Yogi: [Marathi.]

Shri Mataji: Ha?

Sahaja Yogi: [Marathi.]

Shri Mataji: Oh, ya.

Sahaja Yogi [adjusting the microphone]: *[UNCLEAR* Is it comfortable, Mother?]

Shri Mataji: It's all right...

[Marathi.] Sahaja Yogini [in Marathi to Sahaja Yogi]: Please offer this water to Mother.

Shri Mataji [in Marathi]: What is the day today according to Indian calendar? Have you seen?

Sahaja Yogi: Today is Gaṇeśh Chaturthi.

Shri Mataji: Trutiya [third day]?

Sahaja Yogini: Vinayaki Chaturthi.

Sahaja Yogi: Today is Vinayaki Chaturthi.

Shri Mataji: Ha, Chaturthi, Sankashti, very good! Sahaja Yogi and

Sahaja Yogini: Shri Mataji, today at 12:00 birth of Śhrī Gaṇeśha.

Shri Mataji: Really? Very nice. See, automatically today is Pūjā, such timing! I thought... it must be something, because today [there are] tremendous vibrations!

Sahaja Yogi: It was Your desire only to establish Śhrī Gaṇeśha. How great that we got this day for Pūjā, Śhrī Gaṇeśha's day! We are so fortunate!

Shri Mataji: That's what I was thinking! [That's] why so much vibrations today! [In English:] It is such a fortunate day today that we should come on the birth of Śhrī Gaṇeśha, today is Vinayak Chaturthi, today, that we

should celebrate this Pūjā. Also, it is so fortunate to have people like Doctor Sangwe, his wife and his son, his daughter-in-law, who are so much dedicated to Sahaja Yoga.

In 1972 I had visited Pune, Nasik and we had a big session here. People from all over came; we got a lot of Sahaja Yogis here. Raulbai is one of them. But the people of Nasik did not come forward much to do Sahaja Yoga and sort of we didn't find any footing place here, so we gave up coming to Nasik. And today after so many days, now I'm back here and it's so surprising how we have been able to manage.

So many people yesterday, about, they are saying about ten thousand people were present. And at least I would say that ninety percent people got realisation, at least.

Now, I have to say that the quality of people is very important and in Maharashtra you must understand that there's a quality. These people have a special quality of purity, I think, that invariably I've seen the amount of working it takes place in Maharashtra, doesn't take place in other place. Perhaps the people are very much aware of the three and a half Pīṭhas they have here. Now for, they are Jains and have been following Jainism but still they always worshipped the Goddess, the Devī.

So, we can understand that what is an impact of those three and a half Pīṭhas is and you have visited the great shrine of Chaturshrungi.

Sahaja Yogi: Shri Mataji... Saptashrungi?

Shri Mataji: I'm sorry, Saptashrungi. Today [Marathi]... Today being Gaṇeśha's day, only it is going to come chatura [four] in My mouth! All right.

So this Saptashrungi is the one who has got seven Chakras, means the limbic area and she's the Sahasrāra, representing the Sahasrāra. That's why she's the ardha matra. And her face and body and all that you can see is so beautifully made that it emits vibrations for miles together. Those who are sensitive can feel it. And you have been so lucky to go there and see that miraculous place that this have come out of Mother Earth and since ancient times it has been there; nobody knows when it appeared.

So we are in a very holy place, because as you know Sītā lived here for so many years and Śhrī Rāma was also with Her and also Śhrī Lakshmana.

So it is obvious that this is a big come of, we can say a, quite a big meeting place of various holy things that happened during the different periods of Maharashtra.

And the River Godavari also flows and the, also the [Marathi] source, source of this river is also very near.

Actually they wanted to take you down there, but it's another high climb and I thought you will be all exhausted, so I told her better not take them. But normally those people who come to Nasik always go there.

And there is one sad incident was that there's a Trimbakeshwar where is, there is one of the Jyotirlingas.

There are twelve Jyotirlingas. Actually we should say they are fourteen because two of them are half, so... There are twelve Jyotirlingas and the complete are ten. Out of them, one of them is here. But the gentleman was quite funny and he said that those who are not Hindus we cannot admit there.

So it's again all nonsense going on which will all stop one day, I'm sure, because they have no sense how to recognize the saints, you see. And once they start recognizing the saints, they will know that they are the first who should go inside, than those who are not realised. Moreover, for Shiva doesn't matter whether they are even bhoots, doesn't matter to Him. His temple need not be so guarded. Any other temple I can understand, but Shiva's I can't understand why there is so much guarding is needed. But I think it's a money-making proposition.

Whatever it is, it brings to My notice all these nonsensical things that are going on in this country.

And then one starts realizing that how much people have to open out themselves and give up fear from people who are coming from other countries. They suffer, all of them, not only, not only the people who are religious but also people who are political, social; they are all frightened of foreigners coming in now in the country and they always start doubting. And you can understand that's why they doubt, but still they should also understand that in these advanced stages if there are saints, they should be able to recognize and this is what's lacking in them. And I was sad on that point, but doesn't matter. I think next time I'll put him right, this gentleman.

So on the whole our whole stay was, I think was very interesting and nice and this evening we are going to have a very beautiful musical program, variety entertainment and classical music by children, which you, I'm sure you'll all enjoy very much. That we'll have here.

So on the whole we should be thankful to Mr. Sangwe and to Mr. Mehtani for organizing this stay in Nasik so well and with such comfort to all of us and such elevating experiences which has brought you to something higher and the experience of your own depth.

So may God bless you all.

They have to first ask for forgiveness of all of you and they are asking My forgiveness also.

[Shri Mataji translates:] “And if we have done any mistakes, please forgive us and our whole family." First you have to worship yourself. Otherwise... that's why she has to worship herself, that she should make herself, cleanse herself and she should worship herself, she should have respect for herself and she's worshipping Me. If you are not a respectable person you are not supposed to worship Me.

We have to, now they'll be saying the... mantras. [Marathi.] Can you please take this one? [Marathi.] There are ten, ten guards of the ten directions...

They have invited all the ten devas of the, who are the guards of the ten directions, to come and settle down and guard this great occasion, when she's worshipping the God.

[Marathi.]

Sahaja Yogi: This is known as sugarcane juice. Abhishek of sugarcane juice.

Shri Mataji: This is... the ghee.

Sahaja Yogi: This is abhishek of milk.

[Marathi.] There should be peace and for the peace there's a shanti mantra. Is important that the peace has

to be within and without. First it has to be established within. You must feel your peace within yourself.

For that, this is a special mantra.

[Marathi.] Should just be a simple thing.

[Marathi.] Now the Pūjā of Saraswatī and Mahālakṣhmī.

This is our offer to the Devī so that the disease of hunger should be eradicated.

This is the worship of the dīpa suggesting that “Oh Mother, we need not, we should not forget the spirit, the light of spirit within us and we worship You with this light, so that our attention should be on that light which is the spirit within us. And then they are pray, saying that “Remove the great darkness of mohar." `Mohar' is attachment. We remove it. And `mohar' means attachment. Ahaṁkār. Attachment, attachment.

[Marathi.] Now by doing Karmas, our brains have muddled up.

So Goddess, we offer You this dhūpa so that You remove the enemy of Karma in our head, removal of the Karmas from our head so that we are clarified, we give to... It's so interesting that what they are suggesting is dhūpa, is the dīpam is given to Śhrī Kṛiṣhṇa, who is the one who gives us the witness state.

So how it is connected. Dīpam is the spirit, so you see how it is connected. The whole thing is so connected. [Marathi] Now, it is so significant that a coconut is offered for moksha. Now you know a coconut has a limbic area inside it. It has the three shells, just like your brain has and inside is the limbic area. It represents the limbic area and that's why for moksha you have to go into the limbic

area and that's why a, is called as `shrīphala'. Holy Ghost, you see, the pala of the Holy Ghost, you see, the fruit that is liked, or representing Her: this is your limbic area and that's why it is given to the Mother. How significant and how absolutely appropriate it is. God has also created this just to suggest that.

[Marathi.] Now this is a, this is, she has to offer Me a spanda, which is the Gaṇeśha Tattwa and that is Agama Shāstras: means the Shāstras which have come out of that.

So “make me a virtuous personality." All has come from Śhrī Gaṇeśha and Śhrī Gaṇeśha makes you auspicious and also virtuous.

So the one from where all the Shāstras have come out.

So this is the Śhrī Gaṇeśha Tattwa which we offer You, so that You also make us virtuous and auspicious, by Your powers. [Marathi.] Happily for you, the Gaṇeśha, see it has an effect on the Mūlādhāra. If you are suffering from diarrhea this helps you.

So this is for you people, the Gaṇeśha and for these country people this is the Gaṇeśha.

So God has given everything according to the need. [Marathi] Seven times. You have to say seven times the first mantra of Mahākālī, Mahālakṣhmī, Mahāsaraswatī, seven times with her.

Kabīr, why have you dropped `Shri Mataji?' You should put `Shri Mataji' essentially because there's the first name of the Sahasrānama, all right? Should be there, `Shri Mataji', hah? When you are standardizing the thing, who has done this?, you must ask Me; because that's the

biggest part is that I am the Mother, isn't it? And that is actually the name given by the modern people, so it must be accepted. Is an additional thing.

So when you are standardizing the things, you must ask Me, all of you. I don't know who has done it, but whosoever it is.

[Marathi.] Now we can do a hundred and eight names of Devī. [Marathi.] This one is all written in Marathi but so well done. I wish you could all remember by heart, so that it's a very nice way of getting rid of our six types of enemies. We also don't know what to ask for. We're always asking for something which is not important. Our priorities are all wrong.

So this is a very good way of knowing exactly what a Sahaja Yogi should ask. [Marathi.] Ah. Mr. Sangwe said that he would not accept any money from the people for Pūjā. I said, “But they must all join in." So with great difficulty they agreed that we should collect eleven rupees from all of you for the Pūjā and somebody should do it. You have done? You have done twenty-one? All right.

Whatever it is. [Marathi.] Remove that, a little bit. [Marathi.] Now all the people from Nasik are going to do this, so little bit you have to move out. Those who are from Nasik. [Marathi.] If you can move out, these people will sit that side. You must spread something for them. Get up for one minute, all right?... Alexander, you also move out a little, because others have to sit there. All right? That's a good idea.

It's so auspicious, they have got all the auspicious trees here. [Marathi.] You know how much we did last time,

how many names? Two thousand and... two thousand, onehundred and eight. Thousand of Saraswatī and thousand of Renuka Devī and a hundred and eight of the Mahākālī. [Marathi.] Those who want to take photograph of My feet, come now. [Marathi.] This is the first time you'll have a photograph without My Rudras. Did you follow Me? `Without Rudras' means I have not put up My hands. [Marathi.] [Aside:] Just make a little ghee.

[Marathi.]... thousand names of the Devī? You haven't got? How many? Hundred-and-eight. All right. Do the hundred-eight. [Marathi] Lalitā Sahasrānama... Sahasrānama... This is a very nice one about...

[Marathi.] So will somebody be able to read it? See, that you didn't have Devī's thousand names today, Gaṇeśha's we have to do it.

They are saying, “You are doing everything." I said, “I'm just sitting here, I am doing nothing."

Contents: 1983-01-21 **Śhrī Devī Pūjā, Assess Yourself, Vaitarna, Maharashtra, India**

So now we are coming to the end of our first half tour. Now we have to look back upon ourselves and try to find out what have we achieved out of this. We must understand that Sahaja Yoga is not done through brain activities. Like many people think that if you just tell yourself, `You have to be like this,' it will work out.

If you have to all the time inform yourself that, `Oh, you must get rid of a particular problem,' you'll be all right. Or some people think that if they tell somebody, that “This is wrong with you and you should get well” it will be all right. It is not so. Because Sahaja Yoga does not work

on mental level. It works on spiritual level which is a much higher level than the mental level.

So what you have to do is to understand how to correct your Chakras. And you must understand how to work out your machines. Perhaps people [feel the...] on mental level and try to solve problems on mental level. And that's why all the problems start coming out. Now, if you have a problem with any Chakras or there is anything catching or you find that there's something wrong with you, no use working it out on any other level but spiritual level.

Some people believe that if they have dressed up like something or if they outwardly behave like something, they become that. That is not true. Like we have hippies in the West and they think that they have become primitive. You do not become primitive by believing it. Because you are so over-developed, that you cannot become primitive.

So by just doing something mentally you do not become. Now, this mental level can go even further in a subtler way into people.

Some of you might feel that by knowing some of the Ār.tis and things by heart you will achieve great, is not true, also. Because that is also just words.

But, if that is an awakened thing within you, then they become a mantra. And then you can work it out.

But first of all you must achieve a certain standard to have that power to create the mantras. Also, when you say some Ār.ti, it's not necessarily possible that it will work out. Let us face the things as they are and not to be conditioned by anything else. You have to achieve a

certain depth within yourself to even to enlighten the mantras. First of all you should have clear-cut vibrations, minimum of minimum. If you have certain Chakras catching, then try to improve your Chakras with the photograph. With all due respect to the photograph. It's only the photograph which is going to work it out. Nothing else. Or if I am there.

But once you have achieved a certain state of enlightenment, then you can use mantras otherwise also, it will help you. But first of all your heart must be clear. I found out, in general, there are two Chakras overwhelmingly not working all right in most of the Western people. First is the heart. That means heart is not clear, that heart is not clean, that in the heart you still are a small person, in the heart you have not placed your Mother. You have to purify your heart by looking at the photograph and putting all loving feelings about your Mother, understanding Her work and putting Her into your heart. If the heart is not clear, then everything has no meaning because it is a `dark heart' which is doing all these things. The heart has to be clean, absolutely surrendered and must try to put Me before everything else. I can tell you because you are all Sahaja Yogis, I cannot say this to people who are not Sahaja Yogis. Now, we always try to relate Sahaja Yoga from our own terms, not from the terms that belong to God. God is what He is, He cannot change Himself. You have to change.

So whatever we think about God we want to put on that.

For example, if someone thinks that he tries to be nice or good to Me, or if he is close to Me, so-called and if he thinks he is organizing better or he's doing this work or

that work or anything else like that, where he feels that he is important because he is doing this job or that job, then one must know that all this is mental. Actually, you are doing nothing. Whenever you try to do something, you really confuse yourself and confuse Me also. You have seen yesterday's example. I was sure that they had to go next day. But nobody would listen to Me and they rushed away and they found that the tickets *[UNCLEAR* were] for the next day. This knowledge comes to you if you are clear-hearted.

As yesterday I said, “You better not come." I didn't know what was the situation there, I just said, “Don't come", finished. Because I knew what was going to happen there.

So this clear-cut idea comes to you when your heart is clear. But first of all, people do not understand that you have to work it through your heart and not through your brain. When we have to work out things through our brain, we try to develop our brain, isn't it? By memorizing, by practicing something, teaching our brain how to think, how to go this way that way... We try to train our brain. Now, we have to train our heart in Sahaja Yoga.

And to train our heart in Sahaja Yoga one has to know, first of all, that it is enveloped either by ego or by superego. The limbic area actually represents the heart. And if there is ego, heart will always be so-called, it will not be the real heart that will be working, but it's only mental, mental projection. And you will feel that I'm doing it from my heart. *[UNCLEAR* but it's] not true. Now then, supposing, what should we do if we have ego? You

might say you should try to sort of tell yourself that that's not good and [this and...] this and that and all kinds of mental suggestions or autosuggestions or this... the way psychiatrists know that give you suggestions. That's again mental.

So that's not the way it is going to work out. We must understand that for that what we have to do is to raise the left side and put it to the right side.

There's no other way out. You have to just work it out with your hands, your hands are working it out and not your brain.

So use your hands and the methods of Sahaja Yoga.

Now, everyone must have a regular sitting in the water every day, that's important. Every morning you must do your meditation. Because on mental level we feel we have been with Mother, all right, this exposure is all right. You came you saw how Indians are and how they are light on their feet and how they are good for Sahaja Yoga. But after seeing all that you have to know that Sahaja Yoga is to be worked out, is not to be thought out. You just cannot think about it. Whatever you may try to do through your thought, you cannot achieve any results in Sahaja Yoga. You have to use your hands, you have to use your feet, you have to soak your feet in the water because water is the ocean... All these five Chakras or, say, six Chakras which are, I say five because the... one is the Mūlādhāra Chakra, which is the seventh and the topmost is the brain.

So in between five Chakras which are there, are to be handled fully with the idea that they are basically made

of matter. And these five elements constitute the body of these Chakras.

Now, these Chakras, if they are to be corrected, we have to correct them by taking out all the problems of these Chakras into the elements from which they *[UNCLEAR* come in]. For example, a person who is a very right-sided person.

So he has to give a balance by the left side. Of course, raising with the hand is all right, but what about the element? Right-sided person has all the elements which give heat: we can say, the light, we can say, the fire.

So for people who are right-sided the light is not going to help much. Like if you put the light before the photograph and those who are ego-oriented people, if you just use the light, it's not going to work out.

So what is going to work out is the Mother Earth and the water element, which is cooling. Even ice is very helpful to people who are right-sided.

So all cooling effects should be used for correcting your right-sidedness, so that you cool it down.

Same about food. In food, those who are right-sided people should take to foods which are left-sided, that is carbohydrates, means they should become partly vegetarians, or quite a lot of vegetarians and should eat things at the most like chicken, but not fishes, not seafoods because they are all hot. That's how you treat your material side of your Chakras. Now, the left-sided people should use, again, the dīpam, is the light, or the fire to correct their left side. Also in food such people should take more to nitrogenous, means protein and foods like that. They should take more proteins. Now, as

far as Sahaja Yoga is concerned, the basic thing is Kuṇḍalinī. And the Kuṇḍalinī, as I have told you, is the pure desire. Again, listen to it carefully: pure desire. That means all other desires are impure. There's only one pure desire.

And that is to be one with the Divine. One with the Brahma, one with God, that's the only pure desire.

All other desires are impure.

So train you mind gradually to achieve that desire as the main thing. If you train your mind in that fashion, then you can develop pure desire, so all other desires will *[UNCLEAR* negate], gradually. All right. Now, this desire to be one with the Divine is the purest and the highest.

And to achieve that what have you to do? To achieve that you have to keep your Mother pleased. Very simple. Ādi Shañkarāchārya has said that you don't bother about it, just keep your Mother pleased. You have to be simple person, not try to be cunning with Me or clever with Me, I know everyone very well.

Try to tell yourself that `I should say things, I should behave in a manner that will please my Mother.' Supposing you are in Sahaja Yoga and you are doing wrong things. It is not going to please Me at all.

So how to please Mother, that you should try to see for yourself, what kind of a thing pleases Me the best.

I am also a very simple person.

So I want a simple-hearted person who is simple-acting. For example, a person who tries to show off to much, try to be always the first or try to be always the...

Sort of a cinema star, I don't like such people. You have to be very quiet and extremely shy about showing off yourself.

Do I show off that I am Ādi Shakti? I do not. I live like you, absolutely like you, do I try to show off? Then why should you try to show off to Me? So that kind of a person is no good. Secondly, you should not be tense with Me, there is no need to be tense. If I find something wrong with you, if I scold you also, it's for your good. If I say a good word, it is for your good. My Sahaja Yoga works this way. I have no malice against anyone in the whole world, no malice at all and no anger for anyone in this world. I have nothing but compassion, but in compassion sometimes I have to scold and in the same compassion I have to speak in a very compassionate manner.

So both ways it helps you, it helps you both ways.

So thank God that you have somebody who will correct you at the right time, for your good, because you are saints.

And you have come on this Earth to establish God's Kingdom. That's what you have to do. And if you are the people who are not respected, who are not sensible, who haven't got the dignity, who behave in a cheapish way, how can people accept you.

So this Heart Chakra is to be first looked after. That with your heart, desire that you'll keep your Mother pleased. Even if I'm angry with you, don't feel bad about it.

That's one of the *[UNCLEAR* signs] that Sahaja Yoga has not yet developed. If I scold you, it is because there's something in you which has to go away *[UNCLEAR* and which] I must scold you, it will go.

So accept it just as a correcting point that is good for you, some sort of a thorn is within you which has to be taken out by another thorn and Mother has taken it out. Once you start understanding the compassion of your Mother, you will not mind. My saying anything to you, My correcting you or My telling you that this is wrong.

Because I have to do that. Now, those people who do not have a good heart, clean heart, cannot understand this. They cannot understand this. Very difficult.

So you keep your heart clean towards your Mother. Whatever I do for you is just a blessing, always a blessing for you. Whatever I do for you is a blessing, remember that. Now, another Chakra which is horribly caught up with most of you is your Nābhī Chakra, suggesting that you are still very very materialistic. In small small things also we are materialistic, it becomes subtler and subtler and subtler...

So try to understand that matter is not so important. Matter is just there to please each other. Specially to please your Mother. It has no other value whatsoever.

So you should not try to be materialistic, in the sense that, you see, for a little thing you have to do this, for a little thing you have to do that. Nothing is important. If it works out, well and good and if it doesn't work out, well and good.

So, you see, Nābhī Chakra is very individualistic, very individualistic.

It is everybody's personal thing. If your desire is only up to Lakṣhmī power, *[UNCLEAR* point] that you want to have more money or you care for little things here and there, without any spiritual value to it, then your Lakṣhmī

Tattwa at the most might be awakened. But this Lakṣhmī Tattwa has to become Mahālakṣhmī Tattwa. That is for your ascent. And just to get it to that Mahālakṣhmī Tattwa what you have to do is to use all your material things and your material being in such a way that you please Me.

That is very important.

So you should not do something that will not please Me. That's very important, everybody must understand. I want you to understand that, when you dress up, also, certain things I don't like, at all, like disheveled hair... At all. That might be of fashion, *[UNCLEAR* whatever you do], but I don't like it. Always must be properly combed, properly done hair. These modern things you should give up, of disheveled hair, because this is a sign of *[UNCLEAR* pakka] bhoots coming into you. If you have disheveled hair, the bhoots recognize the person and they get into such a person who has disheveled hair.

So try to make your hair in a proper, see now Indians how they make their hair. Look at them: they all make their hair properly. Because, I have nothing to do with your hair, I'm not a hairstyling person or *[UNCLEAR* anything], but, if you do not have your hair properly combed and done, then definitely you are in for trouble.

So take heed to these things. Then, some people have a habit of being untidily dressed, that's also not a good thing. You have to be tidily dressed, clean and tidily dressed. Not because it is material, but is very important that if it is not so, that kind of a material will attract all the badhas into you. You must keep yourself clean and neat because these badhas should not enter. All these

ideas that have come to the West have come from some Satanic force. It doesn't look beautiful, in any way it doesn't look good for any spiritual person. We have to change our styles that will be appealing to the Divine and not to the bhoots. We don't want any bhoots to come on us.

If you understand this simple fact, then you will start dressing up in a way that may not be modern, may not be ancient, whatever it is, is neat, clean, spick-and-span. Otherwise, also, if you see to the matter point more and more, no use accumulating thousand and one thing which are plastic in temperament and nature. You should have few things which have the spiritual value. Not all extraordinary things that we try to have, because they have no spiritual value.

So try not to accumulate all these nonsensical things to you. Gradually you will find you'll reduce, you go on reducing. You'll have simpler lives, better things and spiritual things. Whatever you buy, see the vibrations and then buy, otherwise just don't buy. Because all kinds of nonsensical bhoots will be in your house and you will be in trouble.

So whatever you want to buy you must see on vibratory awareness. If you cannot understand, ask somebody else a Sahaja Yogi to help you out. But don't go on buying things just because you think they are cheap, or they are nice, or good.

So try to buy things which are, vibration-wise are all right. And if it is not so, finished, it's nothing important. “I must buy this, I have to go to Bombay [Mumbai] to buy this", that's a wrong idea. Now, attention has to be

inward all the time. I've seen that our attention is outward. Because of that, what we see outside is not good for vibrations. But if your attention is inside, you will not buy anything that is not good for vibrations. Or you will not own some things, you'll just throw away. But the attention is outside and because of that you just don't know how to judge it. Nābhī Chakra has to be attended to.

For that you don't have to think, you have to work it out, see which side of Nābhī is catching. If the right side is catching, for you sugar is the best. Sugar represents many things. Sugar means your, also, tongue should be sweet, you should talk sweetly. People think that if you talk sweetly to someone, then people will start thinking that you are good for nothing or you are absolutely a meek person. We have to be meek. We have to be meek and humble, we must learn how to talk sweetly to each other. And you do not understand how to speak, then take more sugar, vibrated sugar. That will make your tongue sweeter and sweeter and your ideas will be sweeter about another person than harsh and criticising.

So for the right-sided people sugar is suggested. For the left-sided people, salt. Left-sided people should take salt more and with salt they can solve many problems because salt gives them a personality, a composer by which they can express themselves in a way which is dignified *[UNCLEAR* and so] not very lethargic.

So the speed of your talks or behaviour or everything should be in the center. It should not be lethargic, not should be too quick and fast and hectic.

So you will understand Sahaja Yoga is the central point of everything. Everything in *[UNCLEAR* that] center one should try to *[UNCLEAR* bring it]. Not one extreme to another extreme, if you talk too much and jabber too much and if you are fast, try to reduce your speed by alertly looking at it. You have to be alert.

See, “My speed is going up, there's no need for me to talk. Let me stop." But those who do not talk at all also not good.

So those who talk or those who do not talk have to understand only one thing, that whatever we talk we talk in the center. Once you understand that, your responses to things would be absolutely central, balanced and beautiful. Now, this is all for, *[UNCLEAR* we], I can say at this time because the time is short also for us, we have all enjoyed our stay all over, I think, so you all have been happy all over and we have worked it out very well. And it has been quite a lesson to all of us and also a very great experience of enjoyment.

So, not to feel guilty about anything because feeling guilty you do not get over it. Feeling guilty is an escape, you must face it. You must face it and see, correct yourself and be one with it. That is a much better way than to just to go on feeling guilty or aggressive. That's not the way, because I said it's not mental.

So if you understand these few points on these two Chakras, is Nābhī and your Heart, if you understand these two points clearly that you must keep it clear and the expression of that will show in your behaviour, in your dress, in your walk, gait, talking and everything outside but you cannot go from outside inside.

Supposing somebody says that *[UNCLEAR]*, “Mother, I've combed my hair very well, so I'm all right." It's not so. *[UNCLEAR* Not necessarily]. Even if you have combed your head, you might be possessed by bhoot. But at least less chances.

So one has to understand it, that it has to be worked out. I think, this must be really screwed into your head that Sahaja Yoga is to be worked out. You cannot just tell yourself, `Oh, I'm very happy,' because it pampers your ego, or `very unhappy,' because it is troubling through your superego. `I'm not very happy,' `I'm not very...', `I'm very happy' or `I'm very unhappy.' That's not the way. You have to be in joy. And these things can work out. You should have patience with yourself, love for yourself and dignity, that you are Sahaja Yogis. Every individual has to work it out for himself, so the whole can be all right. There could be some people who are only worried about others. Worry about yourself and see the good points of others, not the bad points but good points of others. And, also, if somebody has to tell you that you must organize, go fast and all that, not to feel bad, we have to be like that. We have to be very quick, we have to do so much work in this world, we have no time to waste. We have no time to waste. *[UNCLEAR]* to be very quick and we have to be very prompt and healthy about it.

As you know that, in this trip you have seen that, how much work I've been doing compared to you people. And I am so much older compared to you people. All right, you can say that “Mother, You are Ādi Shakti” it's all right, but I'm your ideal. In any case, if somebody's your

ideal, try to become like that person, try to imbibe those qualities in you.

So, now I may have to bid farewell to most of you who are going away. I hope I'll be able to see you but, as you know, I have programs and programs and programs, I don't know where I'm going to stay and where I will be, in any case, I'll try to be there.

So the program is today, I have a program which I have to *[UNCLEAR* go to] for, you don't have to go. Now you are going to Kalwa where you'll have your lunch, I would be there. In a village, in a village way they are cooking something for you. And then I will be busy with some other programs Myself, so I *[UNCLEAR* go] direct to Bombay [Mumbai]. Then tomorrow morning I... I have a program, you don't have a program.

So, I don't know, some of you might have to come, I don't know what the situation is, in any case, if you have to go out shopping, you can go and do some shopping in Bombay [Mumbai] and get things for yourself if you want to do it, those who are going back. And evening time there's a wedding of...

[Aside:] *[UNCLEAR]*.

... Kamakshi and Malcolm.

And whatever you want to give collectively, a present to them, whatever you have to do, you can do it tomorrow morning. And then the after tomorrow morning...

[Aside:] *[UNCLEAR]*.

... 23rd morning you... most of you have to go to Delhi. But there are some who are not going to Delhi. Now raise your hands who are not going to Delhi on the 23rd.

Warren? Warren? Warren isn't going? Warren, what is it, you are not going? All right.

So...

Sahaja Yogi: The rest of the group, fifty three people are going.

Shri Mataji: All right.

So you all are going. Those who are not going, out of them who... those who are going to Delhi, not 23rd but later on, raise your hands. London and Europe people.

So this is the second group. Now those who are going to Delhi afterwards please see that you book your seats. You shouldn't give Me headache about this, you see, so you book your seats properly. All of you may not get your reservations, some of you are going by train. And inform the people in Delhi, yourself, organize it.

You see? You can have Perekar and also somebody else, Jayvant, to help you out. That those who are going, these two persons, Perekar and Jayvant will look after you, you book your seats.

[Aside:] *[UNCLEAR]*.

So you book your seats. Then also somebody must talk to Delhi people and find out, because they want to have you there for about seven days, with them. Now, 26 January you all should be there, I hope you are all going to be there. 26th morning they want to take you around to see the parade, I may not be there, 26th evening I may be there, I don't know. 27th they are starting the program.

So till the 26th whatever you have to do you can finish and 27th I am starting My program, but still you will be

staying with them, I think. They have got these ats from the 28th.

So they have a wrong conception about you, they think you all want bathrooms and things attached, so they got the ats. And I told them that don't get the ats, is firstly they are rather expensive and also they don't want it, they want to *[UNCLEAR]* in a bungalow. But I don't know, they also have got conceptions, they think you are too attached to bathrooms, so... Which is true also.

So they think they are obliging us by giving us bathroom attached rooms, you see.

So that is why it has happened, now, whatever has happened has happened. Now, for the marriages. We have decided on marriages on this days. *[UNCLEAR* Now] who has got the list? Who has got the list?

Sahaja Yogi: England mistakenly is *[UNCLEAR]* to *[UNCLEAR]*, she should not be there, she is from Switzerland, *[UNCLEAR]*. Apart from that, that is the full list. Her marriage is already *[UNCLEAR]*?

Shri Mataji: So, I don't know, but it's about eighty percent *[UNCLEAR]*.

So... Now, this you have given Me, but now what I am trying to say, that who has chosen whom, that's not yet known.

So pass on this list and by the time we are in Delhi you tell Me. The marriages are going to be on the 6th.

So there's still time for us to sort it out. On the 6th.

Sahaja Yogi: I think most of them are relying upon You to make certain suggestions.

Shri Mataji: No no, I won't. I'm sorry, sir. Not Me, sir. You know the joke? There was a fellow sitting on the fence and another gentleman went and going in a car he asked him, “How do you go to such a place?" So he just looked at him, he said, “Not me, sorry, I'm not going to tell you." He said, “Why?" He said, “The one I told before has punched my nose. Not me, sorry." Will you please decide for yourself because decision making is so much there in the ego.

So you do it in a proper way. Make your own decisions, you'll stick onto it better. Still that exists. Exists, what can we do about it. It exists, still.

So better, this is the list, you go through it, make your selections and choices and don't force on anyone.

Because again the same question, “No, sorry." It's absurd the way we do things, absurd, absolutely absurd.

Marriage is not so important that way. Not so important. But this ego comes back and, “I have decided and now I have not” and then this and, all nonsense it is *[UNCLEAR* there].

So with that idea that once you are married you are married forever take a decision properly.

So I bless all of you, all the brides and the bridegrooms. But *[UNCLEAR* I'd seen] there are more bridegrooms than the brides.

Sahaja Yogi: Yes, that's true, Mother.

Shri Mataji: So I'll have to find out some brides.

Sahaja Yogi: The *[UNCLEAR* couple] two of them particularly have asked to *[UNCLEAR* take and] marry Indian ladies and some... Not necessarily this time, Mother.

Shri Mataji: There's one from Australia... two from Australia, I think. Good idea.

Sahaja Yogi: They'd like to marry Maharashtrian girls. The one that was *[UNCLEAR* yest...] *[UNCLEAR]* telling about, about he's about 39 or something.

Sahaja Yogi: Yes, he's... he's one of them. And... For him I found a girl but she's not yet been divorced, you see. She's not yet been divorced.

Shri Mataji: So, any other questions you have, please ask Me before we start the Pūjā. Good idea.

Any other question? If you have really some question, ask, otherwise we have to finish the Pūjā, faster we have to go away.

Sahaja Yogini: Perhaps some of us don't know who the men are *[UNCLEAR]* still there are tickets for Delhi, I don't... I'm not *[UNCLEAR]*, I don't know people *[UNCLEAR]* someone I can ask to be introduced, so we know... we know *[UNCLEAR]* tickets for Delhi, I don't know *[UNCLEAR]*.

Shri Mataji: I have to go to America to really understand what did you say. *[UNCLEAR]* what did she say?

Sahaja Yogi: She's about tickets, Shri Mataji.

Shri Mataji: *[UNCLEAR]* to see Warren. Warren, you should see Warren. All right. Brian. Brian and Warren. All right. Now I have forgotten again American English. I'm sorry. In America I understand and I forget it, you see. English has so many versions. Australian English is different... Every English is different, so I'm sorry I've forgotten the American English. I'll get to it very soon. All right, done. Now...

[Aside:] *[UNCLEAR]*.

Only the people from Vaitarna. Come along those who have not... *[UNCLEAR]* [how much]. Only they will have the chance, all right? Only people from Vaitarna and from Bhatsa or from Chhapur. First of all Gaṇeśha Stuti. Do you know the meaning of it?

Sahaja Yogi: Yes, I do.

Shri Mataji: You just tell them the meaning. *[UNCLEAR]* the Nābhī Chakra. There's a knot between Nābhī Chakra and Swādhiṣhṭhān Chakra, that's the first knot. That is to be broken, otherwise the Kuṇḍalinī doesn't rise out of it, this is *[UNCLEAR]*. This is so-called Rāja Yoga which works out inside you. The Mother breaks all that *[UNCLEAR* and brings up] the Kuṇḍalinī. *[UNCLEAR]* Kuṇḍalinī *[UNCLEAR* bring. You're not seeing the thing]. The devotion. Devotion comes only from heart, clean heart. Devotion is not what you are showing off or anything, devotion is within your heart. Because She is the support of everything, that's the absolute point. The absolute point does not mean the another absolute. Pataka means the *[UNCLEAR* sin]. Because, that's why people ask you that we have to do cleansing, this thing, that thing, but there's somebody who's a destroyer of sins. You don't have to worry anything like that, that person *[UNCLEAR* can destroy your] sins.

Who cannot be compared. *[UNCLEAR* Full] of compassion. *[UNCLEAR]* who cannot be thought of, who cannot be understood. *[UNCLEAR]* rākshas, Chanda, Munda, all of them. Mahatmye? Of great importance. Auspicious work. Shubhakari [UNCLEAR... She works out], She makes you auspicious.

She creates auspiciousness. Paramanu. Paramanu means the, what you call the atom or the molecule.

Paramanu. In Sanskrit language *[UNCLEAR]*: `parama' then `anu'. Parama means the last [UNCLEAR...,... molecule]. Atom, anu is atom. *[UNCLEAR* Kshipra]? Kshipra... kshipra *[UNCLEAR]*, auspiciousness. The one who is the giver of auspiciousness. *[UNCLEAR]* who is a... *[UNCLEAR]* means who is the one who *[UNCLEAR* gets] your *[UNCLEAR]*. *[UNCLEAR]* kshipra is the [UNCLEAR... are blessing] of the Yoga. Kshipra is *[UNCLEAR* the brahman... the brahman]. She is a giver of *[UNCLEAR* brahman]. What *[UNCLEAR]*? [UNCLEAR... I mean] through Her *[UNCLEAR]*.

Through Her grace you achieve your Moksha, *[UNCLEAR* that is wisdom]. Kshipra is the grace that bestows the bliss of Moksha. The grace. By bhoots. Samarchit, balanced, balanced attention. Generous, *[UNCLEAR]* is the one who is generous. Swa-dha, swa is yourself, dha is established.

So, established in *[UNCLEAR* Herself...] Enjoy[ment]. *[UNCLEAR]* We have one more, Mahā Yoga Dāyinī. En masse *[UNCLEAR]* Yoga. See, en masse *[UNCLEAR* Yoga]. Kuteti? Kilak. *[UNCLEAR]* the meaning *[UNCLEAR]*. Now, those who want to make photograph please, come now, [UNCLEAR... happy].

[UNCLEAR]. They enjoy the people *[UNCLEAR]* into your property *[UNCLEAR]*. *[UNCLEAR]*.

[UNCLEAR They can go].

Contents: 1983-0000 **Two Quotes on How to Call the Husband (year not sure)**

Quote 1: Meenakshi Murdoch: [asks Shri Mataji what she should call her husband].

Shri Mataji: Oh, call him `darling' because everybody calls husbands `darling'.

Avdhut Pai [the brother of Meenakshi prompts her:] I think you should call Malcolm `highness'.

Quote 2: Shri Mataji [later on to Gavin Brown:] I think now he [Malcolm Murdoch] should be called [by Meenakshi] `eminence' and not `highness'.

***Contents: 1983-01-27*, Public Program, God Realisation Aim of Human Life, New Delhi, India**

I bow to all the seekers of Truth.

Today, the Sahaja Yogis from Delhi have given Me a particular subject on which they want Me to speak and the subject is: `God Realisation is the aim of human life'. It amuses Me to think of a subject which is so obvious to Me, that what other goals human beings are having, has no meaning at all, in My own opinion. But today in these modern times, I feel that God Realisation is not a far-fetched aim or a later aim, but imminent, immediate aim of human beings.

Some people might say, “Now we are young, so we can do this later on. Just now we are quite happy people." Some of you may say that “We are doing a good work. We are not bad people. We are not dishonest.

So what is the need to have this Self-realisation or this God Realisation?" Moreover there's a big market of many Babajis and all kinds of false fake Gurus, who have disillusioned specially the Indian seekers about God, about spiritual life and about a Guru. But to make the

things worse is this: that so many seekers are born in this precarious time, first of all and the situation of human existence itself is a thing of question.

Under these circumstances, we have to get to the problem of finding out the solution; knowing why, despite all the effort of human beings to bring peace and joy to humanity has failed completely, how is it that we find all kinds of horrible negative people are in charge of all the nations, of all the organizations, of all the researchers and of all the so-called knowledge seekers? How is it the people who are doing wrong things have become so successful, if there is God? So the existence of God itself is in question today. I do not know whether you really want God Realisation or not. Now I'm here to plea for God and plea for His existence. It is not a difficult thing at all, because He exists, He has existed, He will exist. He works out everything, while we in our ignorance think that we are doing things. We do not do anything whatsoever, take it from Me. What we do is a dead thing like, a tree is dead, we make a furniture, we think we have done a great achievement. We cannot make one flower, a living flower. There are so many you see here, beautifully done. Leave alone that, we cannot convert one flower into fruit, we cannot do any living work whatsoever.

Also in religion what we have done is nothing but harm to God and harm to His cause. We have just created shabdajalam, the net of words. Here is a Guru who gives a big lecture. He talks big about God.

He says, “Oh, this will happen, that will happen, you should come to God, you will get this, you will get that."

Even up to the point, then they say that, “You will get your horses win, your elections win” all sorts of things. With our own concept of God, we have brought Him down to such a level that the whole human mind refuses to accept the existence of God. But it's all your doing. He is what He is. He will be what He was... will be and what He was, He would have been. You cannot change Him with your own concept and ideas.

So then the second question comes in: “Why should we seek God?" We are happy in this country.

Whatever may be happening to us, we are happy people.

Somehow Indians have... know how to make themselves happy.

So why should Mother talk of giving you Self-realisation and all that? We are not such seekers as they are in the West, because they have reached a stage, they have developed to that stage of affluence, the material wealth, that now they know they are just going to jump into the hell of destruction.

They realise it. They can see it, because they are fully developed now to see that. You have to be a developed country to see that. Every one of them is talking about it, though they may not think about it, they may not go about it, but they are seeing that “There's something definitely wrong that has happened to us and where are we going?" But here we have branded ourselves as `developing country', one of the `developing countries'. I don't know what we need to be developed! So while running after that so-called `development', we don't see the pit in which they are going to fall, we are just trying to follow them. And we don't realise that there is any

sense in seeking God. All these developed countries are realizing, absolutely they are aware, because they see horrible things around them which is so shocking and surprising to any thinking man whatsoever.

They see that in a place like London, not England but London, every week two children are killed by their parents, legal children. They don't bother about legality and illegality at all, that point is over.

They're actually proud of it. But we Indians should know how they have developed themselves; that in that so-called `great' city of London, this is what is happening. It is shocking to us. I may tell you, this will happen to us also. They look like bhoots to us, worse than animals to us, but we are going that way if we just blindly follow the developing pattern of the developed countries. What is gone wrong with them, we should really see clearly. They are like the tree that is growing without the roots. Any tree that grows without looking after the roots has to collapse. It has to collapse. If there is a big tree, it must have a deep root. If it does not have a deep root, then it has to collapse. And this is the great country of Yoga which has the knowledge of the roots. But we are trying to learn the knowledge of the tree, because we see the tree and don't want to know anything about the roots that exists here, that nourishes this tree.

That is why it is important to know the knowledge of the roots. If you don't know the knowledge of the roots, the outside knowledge is of no use, it has limitation, it goes to a point and just drops down.

The knowledge of the roots is only possible when you become subtler than human being. You live at a gross

level as a human being, I would say; as we are born as human beings, it's all right. But why are we human beings? That question, if you ask yourself, why we are created from amoeba to this stage as a human being, then you will realise that there must be some purpose in getting this kind of a body, this kind of a face, this kind of a mind, an ego and superego. There must be some reason behind why God has created us as human beings. And as you start thinking about it, it's a serious thing. We do not know why we are on this earth. We have no idea as to why God has created us. We do not know what is the meaning of our life. We do not know what is the fulfilment of our life. We are just floating in the air, without knowing our roots.

Now the problem is, if you have to have the knowledge of the roots, if you have to have, you cannot force it. Of course we are forced also, in a way. Like, if you are sick and the doctors say you are incurable, then you start thinking, “Oh, God, please cure me." But by saying that, why should God cure you? You are not even connected with God, so that He should hear you and when He cannot cure you, you start blaming Him, that “See now, I was praying to God, I took His name so many times, I read the Scriptures so many times and I can't get to Him." But don't you think there must be something wrong in the technique? Supposing this is not connected. That should I blame this or should I blame that there is no connection, so please put the connection on? And that is why, when many Western people have questioned Me, that, “Mother, You say that Your country is great and is a Yoga Bhūmi, then how is it that You have so many

problems in Your country? Why there are so many problems, of poverty, of so many types, in Your great country of Yoga where according to You, Gods reside?" Because the human beings are not interested in God. They're not at all interested. They are interested either in money or in power, or in some emotional attachment, “My child, my baby, my house, my, my, my." Whenever you say: “My, my, my” you are not `I.' You are saying “my" this, “my" that, “my" that; where is the `I'? So the interest of Indians, on the whole, has diverted, has been shifted to something that has no value at all, as far as the sustenance of life is concerned. But to us, to our attention which has become so wobbly, all these glamorous outside developments of the West are so appealing that we think that we must achieve all this nonsense, must fall into the pit and then we'll think of God. But without your Spirit, without your Ātmā, if you develop yourself, then you will become like those people who kill their children, cruel like them, because you'll just become like machines. If the machines are developed without the light of Spirit is there to guide your way, you will become absolute machines and there will be no feelings in you.

In the beginning, so many who come and see Me, they say, “Mother, what's wrong?" The things in India still we think as horrible, they say: “What's wrong?"; and a person like Freud who was nothing but a Satanic force, absolute Satanic: Indians don't know what he preached, they have no idea as to what he taught. Otherwise you would not even allow Me to take his name. Such a horrible inauspicious personality he was: they accepted

him fully. They had three `unholy trinities'. One of them worked on their architecture, this, that; another one like this; and third one on their music; and ruined them completely and they're not aware of it. It's a very serious thing.

So when we are headlong going towards that development and thinking that we are on the right path, as long as we do not do anything wrong, as long as we are paying our income tax, we are very great people, you are sadly mistaken.

Spiritual life is to be achieved by every human being, because that is why he was made a human being.

Those who do not achieve it have problems, but they are not aware that they have these problems, because they have not achieved spiritual life. The first problem they face it, is that they are physically handicapped.

All physical problems can be solved, if you achieve your Spirit. All so-called incurable diseases can be cured if you get the power of your Spirit. That doesn't mean that you should find out all the sick people of Delhi and bring them to Me! That's very common. There must be some at least people who are physically better off. But that's not so important. To some people it is a very great *[UNCLEAR* `prolobal'], it's a very big attraction, that you should do this just to achieve physical well-being. It's a very, I should say, a very low aim in life. I have seen many big wrestlers who come to Me and say, “Mother, give us peace.

There's problem in my family; I have no peace of my heart. Please give me peace." So it proves that only health doesn't help human beings. Today even we may

say that... [MISSING] were not heard of, about twenty-five years back. We had never heard of so many diseases about fifty years back, but twenty-five years back also, many diseases were not known which are suddenly coming up to the minds of human beings.

I wanted to start a Sahaja Yoga center in a village, so I asked one gentleman to make a complete table of how many people are sick near this village, around this village and those who have no problems. And he made one big circle of about these fourteen villages, made a survey of it. And there was just a streak of white line in the whole of that circle, which showed that there are so many normal people living in those fourteen villages. Either they are physically off or mentally off, or materially absolutely down below.

Nobody was a satisfied soul except for a streak, which happened to be Sahaja Yogis in that area.

The physical problem arises from imbalances within us, which cannot be understood without the light of the Spirit, about which I'm going to speak tomorrow. Then, the mental problems: that is the biggest problem today in the West. Sixty-five per cent people in the West are supposed to be schizophrenic, so be careful about them. They are very inconsistent in their life. They are moving in one line and suddenly you don't know how they shoot off. Why these things have happened to them if they are supposed to be the ideal people, when we have to rise, why it has happened to them? There is no peace in their heart. Poor things have lost that blissful existence as a human being; on the contrary, they are like frying themselves on a frying-pan of this modern civilization.

The best thing to know about it is to go there and see for yourself. Though I must say there are great seekers, very great seekers born in those countries; not in our country, not in India. In India it is not so. Here we have great saints and the rest is like what you can say, the pankajahar, they have come up, out of the mud, these great saints have come up. They stand there with their fragrance, while we are there just singing their songs. The seeking is not there. The trouble is, how to create the seeking? You can take horse to a river to drink the water. You can force him. But if he's not thirsty he will not drink. How to make him thirsty is a big problem. Even if you pour water into his mouth, he's not going to drink it. If you do not feel thirsty for God, it is only because you have not known what it means without the blessings of God, what happens. And a day may come that you'll be so thirsty and there will be no-one to give you water.

So it is better that you better ask for that water of eternal life and establish yourself into that. The more you are complicated in the cities, the more you are busy with all superficial things of life and artificialities of life, you just forget what you are facing. Where you are going to land? You have no idea at all. Morning till evening you are getting up, running, jumping, for some sort of a nonsensical achievement and aim in life, which is not the aim of your life at all. The aim of your life is to seek your Spirit.

Scientists may challenge Sahaja Yoga. They have, many a times. But how can you talk to the scientists, who do not have any knowledge of the roots? Whatever you see obviously and you analyze it, it is of no value to people

because they, everybody can see it. But what about becoming subtler to go to that deeper knowledge of your being, which is within yourself, to understand and assimilate that blissful existence, which has been promised by all the saints, all the prophets, in all the religions. It's most *[UNCLEAR* samit], surprising how people are fighting in the name of religion. The other day I gave realisation to one of the political leaders, which is a difficult thing I know, but I did it. And he was to speak to a group of people and he called Me there. And one of the solutions he gave to human, to them was that, “In India we have too much of jatipati, too much of caste system.

So to get rid of it we should not talk about it.

We should not mention that everything has been tried. We are so consistent about these things that we'll never give up, whatever you may try. If any of you hear the name of someone whom you know to be of your caste, immediately the face will change, as if that person is going to give you the heavens." So people really bombarded him with some questions. He said: “You all have tried all these tricks. Nothing has worked out and it is all absurd. Now you said: `Bring the Harijans, bring this.' All has created problems and nothing has come out of it." So what is the solution? To get rid of this artificial thing called as `jati'. The best thing for it is to give you a second birth.

So the first birth is wiped out. You have your *[UNCLEAR* `Purajana']. By that your first birth is completely wiped out, there is no trace of it left and you become nothing but a Yogi.

Yogijana. You become the Yogijana. And when you become the Yogijana, you'll be the understanding that your priorities have changed completely, upside down. Then you do not see a person in the outward way, but you see the roots of the person and you really enjoy that person. First time you start enjoying another person, when you yourself become a Yogi. And if you meet another Yogi, then you just enjoy that person. On the contrary, I have seen people of the same profession otherwise, bark at each other as dogs do. You meet somebody who is doing, say, a housewife. A housewife will always be barking at another housewife. A politician will be always barking at another politician. A musician will be always at the throat of another musician. Here, once you are realised, once you become the Spirit, what you enjoy is the bliss of your Spirit, in the other person. Just now the lady sang a music to you. She is a Sahaja Yogini.

To the people who have come for the first time, it's just a music. To the people who have been realised, who are settled in realisation, to them it was the awakening of the Kuṇḍalinī; they felt the vibrations, the blissful flow of the Chaitanya Lahari. To them she was the giver of that song which gave this tremendous joy.

So except for gratitude, what other attitude they can have towards her? If everything becomes joy-giving, then how can you hate each other and how can you be jealous? We have never used the power of Love. That's why I said, the time has come now, to become one with that power which is all-pervading, which is doing all this living work, the All-pervading Power of Ādi Shakti, the

Cool Breeze of the Holy Ghost, the Rūh of the Koran. Just feel it for the first time and make your life worth something. If you don't do it, what will happen? I don't want to shock you with horrible things, but all the horrible things are happening today to any person or to community, to caste, to any samaj or any society or any countries because there is no spiritual life in them. You can blame everything for one reason, that they have not got their Ātmā awakened within them. One central bindu, the central point, controls the whole periphery, the whole; the totality is controlled by your Ātmā. But you don't allow your Ātmā to come in your attention. Your attention is not enlightened. Unless and until your attention is not enlightened by the Spirit, you do not know what is the absolute truth. You live with relative world.

And relativity gives you confusions, problems, wars and destruction. We may think that “Despite that, Mother, we have achieved a lot in science." There are many people who have been saying that to Me. All right, I accept it. But what you have achieved is nothing but all the means to spread the message of the Holy Ghost, the message of the Ādi Shakti, the message of this All-pervading Power.

Now this one, you'll be amazed, is also catching Chaitanya Lahari into it, on the television! I stood once on the television in Hong Kong and the people who saw Me standing, I asked them to put their hands towards Me, because the one who did My program was the owner of that television and was a realised Soul; and so many people wrote to Me that they felt the Cool Breeze in the hand and that they are feeling much better.

Some people also got cured on that.

So whatever you have created through your science, if it is used for its own purpose, it has some meaning, otherwise if you see in totality, science has created nothing but all the ways of destruction. These little patchworks you don't think, but in totality, see the total effect of science is destruction, if it is not used for exposing, manifesting and spreading the work of God, it's all going to lead you into terrible mess.

But we still are sleeping. In India we are sleeping as far as spiritual life is concerned, I must confess.

We will wait till our children become hippies, they take to drugs, they beat the parents, parents kill the children; and then they may think of coming to Sahaja Yoga. That time there may not be any possibility.

And this is the time to awaken to this occasion. For all of you, whatever may be your position: you may be a big man, small man, I don't understand anything out of it. Your only responsibility is to know your Spirit, which God has given you as your right; as the right of a son whom God Almighty, the Father who is the Love, wants to have this great power that lies within him to manifest. I know, I admit, I confess that in the name of God people have done all kinds of wrong things, I accept. But that doesn't mean that something is wrong with God. On the contrary it proves that God must be something so great that people have tried to hide their bad things behind such a great thing. Like supposing the table is not very good, we cover it with a very good tablecloth. In the same way people have tried to cover all their bad deeds with the tablecloth like that. But mostly people in India are not

aware as to the duty they have towards themselves, towards their society, towards their country. And as a country of Yoga, it is very important that Indians must come up, to show to the world.

I went to Japan and the Japanese said: “There's no-one from India we met so far, those who have come from your secretariat, not one person we have met who knows about Self-realisation." It's a shameful thing for us, because we are the people where so many saints have worked, day and night. Perhaps we are not aware what the Nature has done for us. Say, in Maharashtra it is said that there are three and a half Pīṭhas. What are these three and a half Pīṭhas? We have never bothered to find out. To us, “Ah, all this nonsense!" These three and a half Pīṭhas are what? What do they mean? Have they any relevance to truth or they are just talking big, or they are just taking money out of it? And what are these Pīṭhas, we do not know. In, of course in Punjab, we may know about the dollars, but not about our country.

We are not bothered. What are these three and a half Pīṭhas we have got in Maharashtra? What are the Ashtavinayakas which are there? These three and a half Pīṭhas show that in our country, in Maharashtra, lies the Kuṇḍalinī of the Universe. Are you aware of it? Greeks are better than us, I can tell you this much. Though they have lost all their sense of proportion, they have brought all their gods to worldly forms, at least they're aware that there is something like serenity, there is something like godliness which must be sought. I went to Greece and they showed Me a place. They said, “Do you know, this is the Navel of the Universe?" I said, “I know that." “How?" I

said, “I know. I said this much before, that the Navel of the Earth is in Greece and that Europe is the, all the visceras, the Void of the Universe." But do you know how many great people have given their spiritual wealth to this place, Delhi itself? We have no idea as to what we have. We have no idea as to what precious things we have with us. And we are living with something so artificial, plastic, good for nothing things. I mean, I felt amused when they told Me I have to speak on this subject to Indian audience, that the aim of life is God Realisation. I mean, the basis of Indian culture is nothing but Ātmāsākṣhātkar.

When My granddaughter was born, they sent her kundalee to be made by a, our family astrologer and he sent a telegram saying, “It's a great thing that this girl is Ātmāsākṣhātkari, a born-realised and her Guru is in the family." To us it's the most important thing that we get a Sat Guru and get our Ātmāsākṣhātkar; to Indians it's the most important thing, that's the basis of our culture; not these dancings and things like that. These come later, because our music, dance, everything comes from Omkāra, from Ātmā.

But we have erected big, big concrete jungles out of our religions; big, big buildings, Saṅghas, this, that, nonsense. Ātmāsākṣhātkar is the point. But we believe in shabdajalam. This person is great, that person is great because they have a big property, because they have got a big ashram where you can go and find somebody sitting quietly, talking nothing. All abnormal ideas we accept in religion and because of that we have declined from our real path of Self-realisation. First and foremost

idea is that all the yogis have to be Sannyāsīs. Absolutely wrong idea we have. Who was a Sannyāsī? Rāma or Kṛiṣhṇa? Guru Nanaka and Kabīra? Santa Tukārām, or Gñyāneśhwara? Who was a Sannyāsī among them? On the contrary, those who proclaim Sannyāsa are something very hypocritical. What is there to proclaim sannyāsa? Sannyāsa is a temperament, is the personality of a person who is a Sannyāsī. He may live like Rāja Janaka. We know all these things very well. We know the story of Rāja Janaka, I need not tell you. I know some of you can recite the whole of Gītā before Me, but as far as the Self-realisation is concerned, there is no trace of it. Only talking about God, showing off the knowledge, doesn't give you Self-realisation. Self-realisation is a happening that must take place within you and you have to feel this Chaitanya Laharis, this Soundarya Laharis in your hand. You have to feel this All-pervading Power. As Mister Subramaniam has told you, that this is just the beginning. It's the awakening of the Kuṇḍalinī and breaking the Sahasrāra, just the beginning. Yes, it's true, just like a seed is sprouted by the touch of Mother Earth, you are receiving your Self-realisation, your second birth and you feel beautiful after that; but then you get lost, you just get lost and then I think of the parable of Christ that some seed fell here, some seed fell there and most of them were lost.

So the second part of it, that as human beings you have to know what you are, you must evaluate yourself. You must know you have not come on this earth to gather some money and die and leave some for your children to get spoilt. But you are here to get that eternal Life. For

that you have to work the whole thing out, understand about yourself, understand about your roots, what you are. I say human beings are the greatest creation of God, the highest `kriti' of God. But only thing is, he is in ignorance. When the light comes in, his glory, his greatness shines before him and he sees himself as a glorious personality. And then he sees others also with that glorious personality. It's a very different thing that happens to him.

They are called as `Dvijaḥs', in the real sense of the word. Brahmins are not born; they are reborn things.

Those who call themselves Brahmins are not Brahmins according to Sahaja Yoga. Not at all. Those who have known the Brahma are the only Brahmins. Once you know that, you will not form any cults and any such things which demarcates human beings from each other. You are all part and parcel of one Virāta, of one Akbar. Only thing, you have to awaken yourself into that greatness. But if you do not do it, as I said, I don't want to shock you. But anything can happen to an individual and to the society of such sleeping citizens and to the nation of such sleeping citizens and to all their progeny that has to come.

So I want to warn you, the time has come. Awaken yourself! Don't waste your time on nonsensical things. Awaken yourself. Once you have awakened yourself, you will realise that most of your time you have wasted so far. Now only you've come in the real timeless atmosphere of complete enjoyment of your being and of others. But this is not just talking or lecture. It is not. It is

the happening, the actualisation, so you must have respect for yourself. You are the temples of God.

So do not feel in any way guilty or anything; you are all temples of God. As I said, you are the most beautiful thing God has created and with such care, with such beauty, that you'll be amazed when I tell you one by one tomorrow, how God has created so beautifully and how this instrument is placed within you to play the melody of God's love.

You'll be amazed! I'll end up My lecture today by telling you a sweet story of Śhrī Rādhā, that one day She felt jealous of the flute that Śhrī Kṛiṣhṇa was carrying on His lips and She asked Śhrī Kṛiṣhṇa, “What is so special about this flute, that she is always at Your lips?" Śhrī Kṛiṣhṇa smiled and said, “Why don't You go and ask the flute itself?" So She went to the flute and asked, “What is your speciality, that you are always at the lips of my Lord, the Lord of the Universe?" She said, “Śhrī Rādhā, don't You know that I have no speciality? I have no ego left in me. I am a hollow personality. Only thing I know, that the Lord is playing the melody and I listen to it and I'm amused at people when they say that the flute is being played." May God bless you.

***Contents: 1983-01-28*, Public Program, The Shaktis Within Us, Possessiveness, FICCI Auditorium, Tansen Marg, New Delhi, India**

It's such a great Sahaj Yogi, that he must have really blasted you all, with so many expositions, which normally, we resist, very much.

So, I have to say one thing, that, this work is, of Mother's Love and Mother can never demand anything from you, least of all the reverence, that is, due to a mother, only thing she can do, is to love you, care for you, to guide you, to proper understanding.

Sometimes suppose she has to take the cane in the hand, for a very short time, but this overpowering love cannot demand anything from you.

Actually, sometimes I wonder, why should they at all think of giving anything to Me, because they do not know I'm so helpless, that I really cannot take anything, at all, it re bounce back, and, it is a very different phenomena with Me which have faced, sometimes with people when I tell them, that Love can only be returned in one way, that is only by assimilating it within yourself. Just by sucking it into your being, just by fulfilling yourself with it, to be, absolutely satisfied, to be transformed into a new being of joy and happiness.

To be the Lotus of your being, to be the fragrant personality of this earth. If that happens to a Mother, is the biggest thing, She may be the most powerful or whatever you may call her by, her only joy is in seeing what she has, to be given completely, fully to the children Sampūrna. Because anything that she tries to retain, doesn't make her happy, so everything has to be imparted, given to you.

But sometimes as, Yogi has said that people are not hungry, till a mother can't bear her children starving, so she too create also the hunger, in her heart, in the heart of her children. A mood has to be set in and thus today we had a very nice program, describing the different

deities, awakening them within ourselves, setting you for your transformation. I am very much thankful to Shrimati Urmila Devi Vardhan for giving such a beautiful exposition of bharatanatyam and also to all her accompanying artist. They have been very kind to us. Thank you very much.

Now, today as I told you, I have to talk to you about the Shaktis, the powers that already exist within us and manifest within us and when we start misusing them, how we fall a prey, to some sort of maladjustment and as a result, we become sick or, we become, imbalanced, full of tension, temper and all sorts of abnormal behaviours come into our being.

This subject is to be understood better, if you had the book you can, you must have done some homework I am sure today, that within us lies, the power of Shiva, the power of our Ātmā in our heart.

And this power of Ātmā, is the witness, which watches, the, clay of the power, of the Holy Ghost. The Ātmā is the reflection of the God Almighty and His power, is this All-pervading Power of God, which is the Ādi Kuṇḍalinī, which is manifested within us as Kuṇḍalinī. This, Kuṇḍalinī, resides in the triangular bone. Reflection of God Almighty, Param'ātmā the Ātmā, watches the play, of the power, of Love, Love of God, power of Ādi Shakti, his own power of Love which is immeasurable. Which is Ānand, which is, in destructive, which does everything in this world, which is called as Brahma Shakti. That's the truth, the rest of it is not, but still we are sleeping, still we are not aware of that power, that is all-pervading, we

have heard about it, in all the scriptures that there is the All-pervading Power.

Yesterday I told you that this power, is being all the living work, despite all this, we cannot feel that power and we do not know, whether we should believe in this great power that is surrounding us, whether such a power really exists or not. The reason is we are still, as a human being, we are in a transition. We are not yet become that for which we were made. I would say that this instrument which is here being made is not put to the mains, is of no use. Unless and until it is put to the mains it doesn't work out.

Whatever it works out so caused supposing somebody pushes it down and out maybe also speaking on this or doing anything is not being the real think is just false, it's just artificial.

So whatever we have been so far, without, the connection with the, all-pervading, connection, with the God Almighty, is all absolutely artificial. It's just mental thing that we are doing, so this Yoga must be established. Yoga means the union with God Almighty for all understand, but it just doesn't mean that you take a plug and put to God Almighty, it doesn't mean that way, but it means that within ourselves, the whole instrument is made and built-in in such a way, that only a Guru or an enlightened soul, knows how to connect this instrument with God Almighty, so that you become an instrument of God's love.

Now this happening is called as Yoga, but Yoga also has another meaning, Yoga Kaushalyum, yukti what the word yukti comes from that Yoga, means, with deafness how

to handle this instrument. Is not sufficient for anyone to get an instrument. Supposing you are given a car and the machinery is opened up, still if you don't know how to drive the car. You cannot drive it, it is useless for you. And if try to do anything, you may spoil the car. Before starting the car, if you start turning the parts like the tires or something like that or the wheels the car won't move. In the same way, without having the Yoga if you try to do anything in the name of God, you are doing it artificially.

So the yukti, the Kaushalyum to handle this instrument, is also to be learnt.

So first part, this is the Yoga, is the sprouting of the Kuṇḍalinī, the awakening of it and breaking of the Sahasrāra, I should say is the job of a Sahaj Yogi or your Divine Mother, but afterwards to learn, the yukti, the Kaushalyum, the kushalta, the deftness, how to develop this awareness, into that stillness and this awareness into that higher awareness which you call it vibratory awareness. How to station it there is the job of an awakened soul.

So we have two different functions to do, first is to awaken the Kuṇḍalinī. That I know sometimes can be difficult, can be easy depending on the sādhaka, on the seeker, but the other part of it becomes much easier for a person who is awakened, if he has real Bhakti for himself, real understanding that he is a person of some value. He has come on this earth, not to just waste his precious human life and fritter it away, but for a very, very special purpose. All such people will dedicate themselves completely to master the art of Yoga.

Now many people ask a question that what is the difference between Sahaja Yoga and other Yogas.

There is no difference at all, because if you see the Yogas which are described, say Hathya Yoga is. Hathya Yoga was practiced in our country when we had a very different of society. The children from about five years to about twenty five years at the most, would go and live with their Gurus who were all realised Souls. In those days we didn't have such Gurus as we are having these days, all kinds of funny things.

They were realised Souls, absolutely detached, of course married, living with their wives and looking after the children who went there for their education and at that time this kind of Hathya Yoga was practiced, where people lead a complete Brahmachari's life. Today such a situation doesn't exist at all, so much so that the Gotra was nothing but the University. Say supposing my Gotra is Shandilya Gotra. The university where the children studied could not marry each other not in one generation, ten generation, but till today.

So the Gotra which are started that is Brahmachari's must be kept absolutely pure. But modern times are such that even if you want to know your Gotra I think perhaps that very few people really know what is their Gotra is.

So when this is the situation of today's society where the purity of life is so much challenged every moment where there is no sense of Brahmachari among the children to practice that kind of Haṭha Yoga is going to be rather difficult where you have to spend all your life in a school under a realised Soul who is a Guru these days you see the quality of Gurus and the quality of students, but in

that also the first change is that change is not only, making yourself thin or making yourself of making yourself like an actress it was not only a viyama systems it was a ashtangas out of ashtallas the first and foremost was Īshwara Pranidhan means first is the Realisation establishment of God within yourself and absolutely it is logical and sensible to understand this why Īshwara was to be established first because unless and until Kuṇḍalinī starts moving you will not know what is your problem is.

For example with your naked eyes you can see the Kuṇḍalinī pulsating in many people if you come to our regular programs you will be surprised it pulses just like the heart in the triangular bone when it goes upward you can see its pulsation passing if you put your stethoscope you can see the pulsation moving up to the head where on to the top of your head in the Fontanel bone area you can feel the throbbing clearly which Kabīra has described as shunyeshikarapara AnāHaṭhabaji and AnāHaṭha is that sound of the heart lub du, lub du you can clearly hear on top of your head and when it breaks that sound then you start getting that Cool Breeze of the Holy Ghost the Chaitanya Lahari coming out of your head. Now this is what one has to understand is the beginning of Yoga. This is where the awakening has taken place and Brahmarandhra has been broken, but still it is to be fully established.

This is the second part of Yoga which is [coushallop]. No in those days when Īshwara Pranidhana was so important these days those people who are teaching Yoga don't even talk of Īshwara. They lead a horrible life there is no question of Brahmachari and all that and then what

diseases such people can develop, if I tell you you'll be shocked. Those people who do such asanas and such things which are only physical develop their physical being. Such people can be very hot tempered, extremely dry, without any sense of innocence and of purity and auspiciousness. Such people can be extremely cruel and can even beat their wives, beat their children and can be so dry that if a Sahaj Yogi tries to raise the Kuṇḍalinī of such a person they might get blisters on their hands. These people may end up with so many diseases which may not be cured by the Viyamas they do. These people become very right-sided ego-oriented people and they think no end of themselves. At the most if they go beyond the limits they can become so cruel that they can easily achieve the personality of Hitler. I would say Hitler is one of the examples of the extremes to which a man who is working out his right side as we call it the physical side the right side, the Piñgalā Nāḍī, can reach. Hitler should really warn you all off such a great attachment to your body development.

You are not only your body. Many people who come to Me I have seen come for sickness and want Me to cure them. But one has to know that God has common sense, He is the source of all the common senses. Those people who want to get cured if they are not the ones who are going to carry the light of God then why should God cure them? The light that we have in our house which is just a lamp and cannot be useful for producing light as such, are we going to repair it? If we cannot repair it, the great economist who is God is he going to do such a thing as to cure a person who has nothing to do with God who is not

going to work out anything who is a ball case. Know at the very outset if you read Gītā you will find that Śhrī Kṛiṣhṇa has clearly said, “They are already dead people." He asked also Arjuna that you have to kill your relations even people like Bhishma pitamaha and his Guru also watch, because they are already dead. That means whatever is dead is always dead and whatever is living is always living as He Himself has said that nanium chidantish shastrani nanium dhathipahavaka. That spirit that Ātmā within you cannot be destroyed.

So such people if they have a body which is absolutely incapacitated, or they have a mind which does not want to receive anything about God then the Gods forces recede back and such people may not be cured. But a time has come where I feel God Himself in His all graciousness and sweetness is so gracious, He is so kind. I have seen in Sahaj Yoga that people who are supposed to be just directly going to hell are getting Realisation. It's amazing! I am amazed at Sahaja Yoga! That's why I call it a Mahā Yoga. People told Me about man, that he is the one who has done all kind of bad things. Even his wife has committed suicide. He is a man who drinks and who plays this and does that and he has done all sorts of things and now he is absolutely finished and fagged out he has no money left and he came to Me and of course with great difficulty he got his Realisation. They didn't tell Me beforehand but the way he was difficult I was wondering what sort of a person is this. He had no diseases as such very healthy person extremely ego-oriented but he got his Realisation and when he got his Realisation he was a transformed man. All his

shedrupules had fallen down he was a different man his face was different. He was so beautiful and so much stunningly changed that even his own wife could not believe that it is the same gentleman because he had one wife had committed suicide he had another wife who was absolutely pestered and was about to commit suicide and she herself said that, “Look at this man, how has he changed what has happened?" So that it is proved that God has really become extremely gracious, extremely kind and that is why yesterday I asked you to say again and again that, `Mother, I am not guilty,' not to feel guilty really don't feel guilty at all because whatever you have done whatever may be your mistake against God whatever anti God things you have done to others or to yourself, forget it, it is time for you to get Realisation and all of you are going to get it.

Another Yogas are Rāj Yoga and other Yogas are there. Now Rāja Yoga is another thing which means that you have to do kumbaka means holding up and that you have to do kaycherrie and all those things.

Actually it is brought out in such a funny way that you'll be amazed that the way people follow it is something like before starting the car you start moving the wheel the, the, what you call, the steering wheel and you start pulling the choke in the same we follow Raga Yoga these days. There was a gentleman who use to cut the tongue in America who use to cut the tongue of people and used to push them back here mechanically to call it a kaycherrie. Kabīra is his exposition has clearly absolutely condemned it and he said this kind of nonsense is not going to take you to God. Also like shaving your head or

wearing a kashiya vastra and all that kind of a show, is not going to take you to Got, he said it that, “If shaving your head is going to take you to God, then what do you think about the sheep that is shaved every year, twice. It must go to God first." So all these nonsensical ideas about Yoga are to be canceled because Raga Yoga is the thing that actually happens within us when the Kuṇḍalinī rises, it's a tremendous happening and there are so many activities that come into going to play that is impossible to describe in one lecture what all happens, but imagine an energy going up and all the centers going into motion and commotion fixing up the Kuṇḍalinī in its proper place supporting it, they have to do so many things simultaneously as we cannot describe even a simple thing like digestion of food which is so autonomous, we cannot describe that happening which is so subtle and so quick and so alert. But by putting your tongue in your throat and wagging it all your life you are not going to go near God at all. On the contrary God is going to be very angry with you for being cruel to yourself for nothing at all.

This concept comes from I don't know from where that you can do all the Yogas without really being the Yoga. The real Yoga is spontaneous is living process. Is a process which is the Sahaja, Saha means `with', ja means `born', is born with you. We never think how we digest our food do we? We don't know how we see things, it's the most wonderful intricate camera that God has build in our sockets. Now do we ever understand that this complicated body was created by some energy within us and that energy is still there which has to give

us this last jump into the new awareness of Self-realisation. Why should we not think that whatever we have got so far has been absolutely free. You didn't become human being by paying anything to the monkeys did you? How did you become human beings, spontaneously! How did this evolution come up, spontaneously! You did do anything about it, did you stand on your head to become a human being? Did you go to any school or to any University to read about it? All that is [white] for human beings is absolutely free and has to be free. Not only free from money but also from breathing and all those things like breathing now. Supposing if you have to breathe. First you have to go to school and find out how to read, how [many] will exist even for a second. Reading has nothing to do with God! Please remember this. Reading books doesn't take you to God at all, only thing is that if you read something you may reach a logical conclusion like when you come here and you see an advertisement you see that there is a program of Mātājī Nirmalā Devī. If you think that by reading that advertisement you have got your Self-realisation then what should I call you. In the same way if you just read books and think, “Oh I have read Gītā, I have read this and I have read that and now I have become Viyasa” you are sadly mistaken.

Even to understand Gītā or to understand Bible or to understand Koran you have to have your Selfrealisation otherwise you can never understand these books also.

So you cannot do it by reading on the contrary sometimes too much reading can create a big problem what Ādi Shañkarāchārya has called it as a sabdhachala.

The right-sided man who works with his Iḍā Nāḍī on the right side on the right sympathetic nervous system is the one who works his physical side more and his mental side he uses his kriya Shakti.

Especially in Delhi the kriya Shakti is overworked, everybody is planning. Planning what God only knows.

With all this planning if this is going to be the situation it is better that they stop the planning. Planning for the future! Future doesn't exist, so why should you plan? Now anybody would say, “Mother, supposing you have to go day after tomorrow then you must book your, ticket." Yes then go and book it! Why are you planning? You will plan up to the point let the car come in let this would happen then somebody will open the door up to that point and you find your car is punctured. Today the same thing happen, I started from My house and the president was passing through and every car was stopped. Why do you plan everything, make it so timely you see that you should be absolutely timely, after all in living processes there is no time.

Supposing somebody ask Me how much time will it take for a Kuṇḍalinī to be awakened, actually it only takes the split of the moment. Split of the moment! Really! [Shadhn]! Is less than a shadhn. Just a wee piece of at time is needed. And it shoots up and it just breaks through in some people. But in some people it comes up, goes down, comes up, goes down, in some people it takes time even to wake.

So under these circumstances you cannot just say exactly what time a, a flower is going to become a fruit, can you say that? Any living process you cannot time it.

Only dead things you can time it all right. If I was supposing a dead person and everybody was dead then there would have been no problem of My arriving here on a dead car because nobody would have acted, objected or there would have been no problem but as human beings are living as everything is living there can be a problem in anyway no use planning for the future. That is how we have faith in our planning.

God has all plans for us! He has made all plans which you can see within yourself. Beautifully He has planned all this and this time also He has planned very well. The time has come! This is the time of resurrection which was announced by such a great rishi like Bhrigu who was living thousands of years back he wrote a book called NĀdi Granth he has clearly stated about Sahaja Yoga what will happen and how people will be cured and how the Kuṇḍalinī will be awakened. Not only that but when about three hundred years this was one gentleman called as Bhujander, he, he tried to bring it to the modern language he said that this will start in 1970 exactly Sahaja Yoga started in 1970.

So it is all planned in God's own ways He has planned it and in that planning we have to see how we fit in, how many can be saved that is very important, this is the time when we call it the time of judgement.

The time of judgement has come, this is the time you are all going to be judged. Now many people will say that, “Mother we don't think this is the way we are going to be judged” if I ask them what is your concept of your judgement? I would say Michelangelo has done a very great painting in Sistine Chapel where you can see very

clearly how he has shown the whole Kuṇḍalinī and in Mahāviṣhṇu standing at Christ here, throwing the people at Āgñyā Chakra on left and right, they are coming down from left and right and how those who are saved are going above with the help of the Angels. It is so clearly how he saw the vision he was a great thrastha and he saw it.

Afterwards we can see in England, which is a place you would not believe of rishis or munis a great saint and a great poet who is not very well know to us Indians called William Blake, was born about a hundred years back and he has written, so clearly, so clearly, that it is amazing to see how these Saints knew all these things so clearly about Sahaja Yoga to come that even where I will be staying in Surrey Hills first, first because responsibilities are here, then the foundations will be laid in Lambethville, actually all these things were discovered when the things have been done, so the, our Ashram is in Lambethville where we have put the foundation and there it is written clearly even the house that I am occupying now is on the Triban Brook and is all clearly written to the last word where the such and such person will be living, can you believe it. And an Englishman saying that Jerusalem the place where people should go for their pilgrimage will be London I been after knowing the English as they have been it is impossible for Indians to believe that a such a day will come that Yogis will be settled in London but they are. There are great Yogis in London today. Now all these thing have happened to us. God has organized everything.

God has managed everything. Inside yourselves also He has managed everything very well.

So beautifully that it is only to be seen after Realisation how things are beautifully done within ourselves.

But is it the human ignorance and freedom put together because animals are pashus there are impartial of God but human beings with their freedom and ignorance have created some mistakes, doesn't matter, doesn't matter, as long as you are seeking God, you will get your Realisation you are beautifully made inside. There is a beautiful picture which we will show you tomorrow as to what the Chakras there are and how the Kuṇḍalinī resting in the triangular bone rises gradually and passes through these Chakras and crosses over and breaks this Sahasrāra.

It was said since long, because even Indra was given Realisation so you can imagine how old is this custom of giving Realisation. At the time of Janaka who was the father-in-law of Śhrī Rāma it is mentioned that Nachiketa got Realisation, one person. Now that time one person all right on the tree of life there are few flowers at the beginning but as the blossom time comes there are so many flowers and all these flowers are to become the fruits. But if the flowers turn their face away from the sun, you can't help it because these flowers are not like ordinary flowers. They have freedom to choose either the God's Kingdom or the Satanic Kingdom. It is their choice and ardent desire to be in the Kingdom of God which is going to work it out.

So it is left to us to decide within our heart to know that everything is done beautifully within yourselves.

We have three powers already manifesting within us. The first power as I told you yesterday when we were doing the action of raising the Kuṇḍalinī is the left side power of desire. Desire. But all of our desires are weak root, are perverted, because whatever desire we have does not give you full satisfaction disaffection. Now the principle of economics that once in general is not they are not satiable, in particular there for example if I want to have a little house, you will have the house but you are not satisfied the house does not satisfy so will you want to buy carpets so want buy the carpets, then you try to furnish the house still your are not satisfied, now you want to have a car and get a car, then you want to start a factory, still you are not satisfied, means none of these things give you satisfaction these material things which you have changed from one to another.

So it is proved by economics itself that material goals are not satiable in general so why run after such a thing which is never satiable like mad. If it is said by economics itself let us turn to something else and the else is nothing but, is sent, the controlling power of all the natures and of all the beings within this creation and that is God himself. That God resides within us as spirit so we have to turn to Him, as I said we have to go to the roots and know the knowledge of the roots which is absolutely different, absolutely different, from what knowledge you have had so far, absolutely different but you have to see for yourself with open mind.

So we have three powers, the left side power is the power of desire and as I said all the desires that we know

of are weak rooted because they do not give you the satisfaction of the desires.

So there has to be something shuddha desire there has to be some pure desire and what is this Kuṇḍalinī and this Kuṇḍalinī is the one which is waiting for that day when as a Mother she will give you your Realisation.

She is your Mother and she is the one who has been with you all your lives and she is the one who wants all the time that My child should get the Realisation and now this Mother is an individual Mother she has no other child, you are the only child. She is very tender kind and extremely knowledgeable she knows all about you she knows all the mistakes you have committed she knows that you have done wrong to yourself but still she is so powerful that she know that if she is awakened she will throw away all other desires and will come up and will make you meet your ultimate own which is your spirit.

So we have the Shuddha Icchā. The Shuddha Icchā is your Kuṇḍalinī. Now the other side we have another power, which is the power of action. This power of action we put into wrong thing. Always our action lead us into troubles as I told you about science you take any action you take first of all you are not sure as to what you are doing, now take to the ultimate which we think as the most noble thing human being do, is to help others. Now, this at least you would think, “Why should Mother challenge?" This action also comes to you out of complete ignorance, complete ignorance. I would say who is the other? Who is the other? If you are the part and parcel of the whole, who is the other? Whom are you helping if this finger is feeling the pain and if I am trying

to soothe it am I obliging the finger? Am I doing anything for the finger? It comes out of ignorance and ego that we are trying to help others, actually you are helping yourself. Perhaps also you are doing it to pamper your ego, I have seen people who have got big awards for being very helpful to the poor. I have seen the temperament such hot tempered horrid absolutely thin like sticks horribly place about their own position. Such people what good can they do even their own personality is abhorrent I mean people when they see such a person are really frightened and are overawed, what a matron this lady is as she is supposed to be helping people in some sort of a nonsensical thing.

Like somebody says you take hundred rupees, I'll give you hundred rupees I'll help you. All right you have helped the man by a hundred rupees, Forget it! What is a hundred rupees? Forget it! Just you have not helped, just given it. I would quote My father in this because My father was a another great realised Soul which we really, can be legendary, I know that he was an extremely generous man, extremely generous man and he gave everything that he had for the struggle of India. But his generosity was so great that every Sunday he used to distribute some blankets and things like that sitting outside in My house just passing over like that and his head always bent like that.

So one day a friend a gentleman said, “Sir, what are you dong?" You are giving two blankets to one person and some people are running away with three blankets, he said [sela] “I am not giving. If you think I am giving you are sadly mistaken. I am just an instrument I am sitting

here and I am just passing it. Now if somebody wants to take more, let the organizer see it, I have nothing to do, I am just passing it. That's not my job. My job is just to stand here and give it to people who want it. I don't see who is rich or poor, who wants it or not, that is not my job. That is the job of the organizer who wants to do this." That kind of a thing it was.

So what is that you have give a hundred or a Lakh of rupees may be you might have done it just for your names sake? It has no value intrinsically of any Puṇyas. You have won no Puṇyas at all. The Puṇyas are only won when you just do it without looking at it. But it is very difficult, very difficult, only a realised Soul can do it. Who gives away without even knowing he has given away. Only a realised Soul is like that. You will be amazed that I don't know how many people I must have cured I have no idea at all.

But one day I was sitting next to a gentleman in a dance like this and he touched My feet. I said, “Who are you?" He said, “Mother, don't you know you have saved your life." I said, “Saved your life! All right forget it forget it." I said, “Sit down let's see the dance." And I was trying to remember when did I meet this fellow, I just could not remember. “But” I said” You were never sick?" “How can you be sick?" he said, “No I got my Realisation and now I am all right." His face was changed he was so transformed, I just could not place him, I could not understand who he was.

So you can imagine, what a change a person can achieve through Realisation and a person who is supposed to be kind and obliging just is flabbergasted and ashamed and

embarrassed that the kind of a memory one has because you just don't remember all this. It is not important to be remembered. It is not important at all to remember these things and such a person has no value for things that are so important. I tell you can live much better if you don't worry about so many things that you have to do.

So with this right power of action we try to do things which are really anti God activities. First of all that we buy something and we think, “This is mine." If you say anything is mine that means it is not I as I told you yesterday, but this feeling that this is mine, this is my possession, this is my thing, I must look after it, is absurd I just don't understand that you all know, you have seen that everyone dies. Anyone who does not know this, I have not known anyone like that. Now when you die, you don't take anything with you, this you have known also, or have you not. No one takes anything. What you take is the kindness, the fragrance you have spread on this earth.

Even the people today who think I am such and such, I am a king, I am this, when they die people say, “Oh God, thank God he died, horrible king." It is better that he died; we prayed for his death thank God he is gone and finished, he was good for nothing. All these selfish things we do with the idea that, by that people will have respect for us.

Somebody told Me that I accumulate money because without money nobody has respect for us. I said “Really!" I did not know people respect anyone for money's sake if they do you shouldn't care for such respect because money is outside you. You leave the money tomorrow;

supposing you loose the money you loose the respect, so why do you have such added mud on your body of which people are giving you respect and such artificial respect, why should you be so proud, “Throw away!" People should respect you because you are you not because you have money, because you are today a big man and tomorrow a small man. But that you are you is your spirit. The problem is unless and until you know the spirit you may divulge or get in, attached to possessions which are attachments most artificial, most artificial.

Putting her finger on that I hope it is not spoilt. But we worry it should not be lost before Mother disappears I must get hold of this ting but I am just enjoying it without possessing it I am enjoying it.

So what's this of possessing, better give the headache to someone and enjoy it, other peoples things is the best.

Actually I do that, to be very frank, I do not possess even a single thing in life. I have told My husband please do not put anything in My name because just I can't possess. I mean if you want to put it, put it but I have no understanding of it. And those who possess I know such headaches they have of possession that they can never enjoy it, they can never enjoy it, the point is as soon as the idea comes into your head that it's a possession you cannot enjoy it. This thought itself is a disturbing thing which takes you away from the joy of that beautiful thing.

So what is the thing that you have to see in matter is the joy of [esthetity]. First of all the joy of esthetity which we do not at all think that aesthetics are possible without possessing it. We cannot think that anything can have

aesthetics until and unless and until you possess it. You cannot enjoy the aesthetics unless and until you possess it. Thank God there are now museums, most of the aesthetic things have gone into the museums and headache is over for many, But still people want to smuggle these things, to buy these things, to possess these things, to have such a big headache, what's that need. There is no need to waste your energy in possessing things which are headaches, if they are not headache it's all right, but we don't possess them let them be there. I tell you if you don't worry about it they will be there and they will give something more than what is expected of material things.

[MISSING.] Of the material, a thing, the value of that, is the joy of giving material things to others. That's the only thing I feel any matter has. There is no other value in things which we can possess, so must be the value in giving the headache to somebody else. I tell you nothing like it. Try it! Try to give away all the headache to others and you will feel so relieved you sleep standing while you are horse, as you say, “Holy base to solve!" In the same way, if you try to pay attention to somebody because he is rich, say he has diamonds or he has, I don't know some big car “Oh what a car it is this” England is very good for that. If you wear real silver, real, real pearls, they start call you Madam and if you wear artificial ones, they just bark at you. They know, all of them know, but you see I am wearing it not you. But when if you call Me Madam or even the Queen Elizabeth I am not going to give you.

So why should you call? The whole system is so artificial and so stupid, it's so stupid that for a person like Me, I

just don't understand why should we waste our energy after people who are not going to shell out even this much, even if you give them the respect for these possessions of theirs.

Once you start giving no respect for possessions, those people who believe in possessions will rise above and will try to imbibe something higher. I have had lots of, complains about people taking bribes, making big money, this that, having, this big thing and all, for themselves. Now the reason is, people are impressed by that! People are only impressed by those things so people try to acquire whatever you are impressed by, people try to do that.

I'll give you a concrete example when My husband got transferred in Bombay [Mumbai]. We were all simple ladies from all over, educated and we were all decently dressed Indian style, we used to live in a very decent way, good wives and all the way that we had come from say good families.

So we tried to keep the corner of a family. But then one lady came and she was quite, according to be a strange woman, you see and most surprising was the way she dressed. Strangely and funnily all men started getting impressed by her. I mean this woman would not even look at them, she would talk to them rudely she was such a funny woman, but all men were attracted to her, something must be possessed. I don't know what was the reason, but the ladies who were so good and nice started changing just like that. And they said if their husbands are interested in such a particular type of a dress why not I do it and they all started changing themselves so

fast that suddenly I found Myself surrounded by all this and they thought I am a stupid woman.

The trouble is, unless and until you the Sahaja Yogis of course you'll do, but the people who are not even Sahaj Yogis, must know that after coming to Sahaj Yoga, your priorities are so changed, that you do not care for all other things which are called to be positioned, or big personalities, or you can call it, big educated man, or some rich rajah and all that but it cares for the Kuṇḍalinī itself.

The Kuṇḍalinī will judge you. We have one very ordinary boy, who is a poor boy, his name is Morisho.

Of course, by the help of Kuṇḍalinī, of course, your Lakṣhmī Tattwa is improved, so he has improved in his Lakṣhmī Tattwa also. But he is a very great Sahaj Yogi. I mean he is really very great soul and he is respected much more, than any big man coming, because we understand the intrinsic value of a person is how far he is a realised Soul.

So the whole system that we have built here, which is responsible today for a shock for us is going to change and all the priorities are going to change, our idealism is going to come up and we are going to look at people for their intrinsic value and not for their outside value.

I don't know how many of you have met Mahatma Gandhi. I've lived with him in My childhood and though he was a very dry person, extremely dry and he made us like scouts you see and he took us to task because it's so necessary, but the thing I learnt from him was, that the way, I mean he was particular on correcting himself

every moment and saying things which will correct yours. This was the beauty of his leadership.

We had a program something in Molanazas all of them when I was a little girl and we were giving water and this supplying to them prank and then Gandhiji said, “Better not go for lunch, you better have lunch here." They said, “All right, whatever you say” very obedient people.

So he got out he had the keys with him because the bar, his wife, had gone out, so he took out the keys, opened the thing and took out, all rice, wheat, what you call the atta, everything, according to the people there were measured them, put them, took about fifteen minutes. When he came back to, everybody was very embarrassed and, I think it was Colonassad said “Bapu, we did not know you had to go to this extent?" Ah “for us I mean! It's too much!" “What too much! Do you know, this is the blood of my countrymen." “I'm just a trustee.

I cannot allow even a drop of that blood to flow out." Can you imagine! That's why he is a marvel. He has detachment, was so great that it impressed people everybody was literally frightened of him I had seen, except for Me, because I was his favourite I think and he used to call Me Nepali. And when I told him one day, that ah “Bapu you are very strict with everyone." “I can get up at four o'clock because I used to get up. I can do anything with My body it is very good, but everybody is not like that” he said, “You are the old mother! I am not! I am a father! I am going to put them right!" And in a very strict way he also used to treat children also, but the best part of it is this, that his people at that time when he created that atmosphere, he created people without

Realisation I must say with his own character with his own sublimity. He created characted characters who respected people because of their quality and not because of their falsehood. But in Sahaj Yoga you don't have to give any lectures, you don't have to be strict like Gandhiji, nothing has to be done. You are just given awakening and it happens. You are just a changed person, you get that transformation automatically. Nobody has to do anything about it; all your actions become directed towards Sahaja Yoga.

Now when a Sahaja Yogi meets Me, he is always talking to Me, “Mother that day I saw such and such thing and my Sahasrāra opened out. And then I went to a shop and what happened I saw something and it emitted such vibrations, that I felt tremendous love for that artist." The whole shop the whole system, the whole thing changes and he talks like an, a, karmic, because he does not do any Karma the whole thing flows, he becomes a third person. He talks like a Sākshī; he talks like a third person. He doesn't say, `I have cured somebody.' He says, “Sahaja Yoga has cured that person." So he becomes separated from Sahaja Yoga, he is not Sahaj Yoga is the sense that Sahaja Yoga is doing its job I, the one, the ego is separate.

The Sahaja Yoga is doing this. Sahaja Yoga has worked out this way. Sahaja Yoga where does it exist. It exist it in the Sahaja Yogis. In the hearts of Sahaja Yogis, in the hands of Sahaj Yogis, in their Kuṇḍalinī, it exists within them, in their spirits and from that spirit the Sahaj Yoga is working out.

So when they say that Sahaja Yoga is working it out, they are actually saying, the spirit is working out, a spirit is detached, so they never say, `I have done so, I have arranged. Mother, Sahaja is so great that as soon as we went there the Sahaja worked it out.' Now where is this Sahaja standing outside? It is within your heart this Ātmā works it out.

After Realisation you become really dynamic, believe Me you become absolutely dynamic.

So far we have never known God's real miracles, His real way of dealing with human beings.

Some Sahaj Yogis who cannot receive the message that I have come dream about it in the night. Because they are collectively conscious, not only when the Realisation comes through they can feel your Chakras on their fingers they can feel it, properly what Chakras are catching, where is the problem, they decode it and cure it in collective consciousness which is an actualisation in, is an actualisation it is not a mental thing, that we are our brothers and sisters. Nobody is other.

They can feel what is wrong with others, they can know what is wrong with them because the light has come within them and when that happens, then, you cannot help it. You see, sometimes I am late for a program, so people say Mother why are you late. Now somebody I see who is a great person who has come to Me may be poor or rich I don't know, but he deserves attention, so My attention starts going towards him like water, it till he settle down, it goes on working. And when it works out, when it works out, then only I leave the place. Time,

everything is for whom, for us, not for use to be slaves of time but we have to master the time.

Even in Sahaj Yoga there are so many ways we can see how we master the time. Like one day we were going to have a Pūjā at about ten o'clock in the morning, but I could not take My bath till eleven and everybody said, “Mother better go for a bath now it's eleven o'clock." I said, “Still the time till then." At eleven o'clock I went for a bath and arrive at about twelve o'clock.

So I said please open the punchak see when Amāvāsyā finishes they said at twelve, all right.

So I am here at the right time, during Amāvāsyā you do not do any Pūjā.

So the whole planning, the whole system of all telecommunication everything, of the Brahma you achieve it and you master it and you know how to handle it, Sitting down here, you can know the vibrations of the president of America, sitting down here, you can communicate with a friend of yours who is across thousand of miles.

But this is not so important, what you can do is the communication of Sahaja system through this all-pervading ether that is there, so that you can work out so many things that, it cannot be explained on the ordinary human level. Now I will tell you one of them which you cannot explain and I cannot explain to you because of difference in our understanding.

I was giving a lecture in Bedford to at least double the number of people that are here and when I was talking to them about eight o'clock, or so, the lecture finished about ten o'clock, a boy fell down about three four miles

away, from that place, from a bridge. Fell very deep and people saw him falling down so they sent for a ambulance which came, but this boy when they lifted him up, took him to the hospital, found was all hale and heart.

So they asked him what happened. Nothing happened to you nothing broken, nothing hurt, what's the problem. He said, “A Lady wearing a white sarī, came down from a white car” I have a white car, “and touched me all over the places I was hurt and I got cured by Her and She a little place She has left and She told me that You come for this to me. And then She went away and afterwards the ambulance came." When he saw My photograph after two days, he told this, because this was out in the newspapers, first of all this was given in the news that something miraculous has happened, this man has seen a Lady, who is this Lady? After two days, this, they thought is was still some actual Lady who must have come there. He saw My photograph in the newspaper and he said." This is the Lady who had come." So the gentleman was quite worried and he telephoned to the organizer Mr. Gavin Brown, to find out about Me.

So Gavin Brown wrote an article, say, he said yes it is so Havia word many such cases in India also but to, to us to Indians we are more modern in this, we don't believe, but it has happened here also, so he wrote a complete article as to what things have happened in India also and they published it and they were amazed.

So you can imagine what things God can do and how He helps you and why should you worry about anything when He is the one who is going to protect you look after

you and do everything under the sun to make you happy. This belief in God is now vanishing in the thin air, but believe Me that once you get your Realisation all His angels and Ganas are looking [after you after you]. Ah, anybody who tries to trouble the Sahaja Yogis, have a bad time and now the Sahaj Yogis have to hold Me, “Mother please forgive them because they have so much of bad time that we ourselves will, that it is too much." I said, “Well I am not doing anything these are the Ganas. They won't spare these people now any more if they try to trouble you because no more anybody is going to trouble the Saints; they have done it with too much of it now the time has come where no Saint can be troubled." Of course all the people who are fake, who are anti God people they'll be destroyed and their images will be ruined but no Saint who so ever he me [might] be can be harassed by any bad power, all of them will be punished severely and this can be proved by many experiences of the Sahaja Yogis who will tell you about it, so all the protection is there.

So many incidences that we are thinking of publishing a regular book of the incidents that took place and you all can verify if you are rather doubtful about it. This is the blessing of getting Sahaja Yoga on the right hand side when you believe in God. He does everything actually He does everything as I told you that all living things has does. But in our ignorance we feel that we are doing it.

As I told many a time that some villagers were asked to go by plane and they felt that if they have to take less luggage better put it on their heads.

So they put all their luggage on their heads and they were believing that they are reducing the weight of the aeroplane in the same way we believe that we are reducing the weight that God has to carry. It is He who has created you, it is He who has made you human being, it is He who has to give you Realisation, it is He who has to give the joy and it is He who has to give you the citizenship of His great Kingdom. Is all a desire of a Father, who loves, loves and loves his children. He adores his children, he adores creation and that's what he has tried to create, an atmosphere today where people will have to take to Sahaj Yoga if they are not little bit frightened they won't come to Sahaja Yoga so don't be worried all these are just a fake frightening things they will all disappear. There is nothing to worry about it, as you call in Hindi language a bandar Bhakti hai. We just don't worry, this is just a fake warning for all the people so that they can come to Sahaj Yoga, get their Realisation and settle down with in accessory.

Now! Yesterday I was little on a very serious mood and I warned you all people of Delhi, because what I find that Delhi is the weakest center we have. The weakest of all. Ah people come to Sahaja Yoga just for treatment and even if they come for Sahaja Yoga they just come and take it very easy as if they have been to some, one of the groups or ashrams or things like that. Sahaj Yoga is a person, is a, is a thing for very serious workers. It's not meant for useless, horrible unstable peoples and I don't think that in Delhi you have many people who are really steady to do it, I have en experience like that.

I have tried everything, I have been coming here for last eleven years but the amount of great people I have got in the villages of Maharashtra, or in Bombay [Mumbai], or in Poona, or in Sholapur and Kolhapur and all that I tell you, the, this is not even one hundredth of that, that we could achieve in Delhi. Of some of the Sahaj Yogis are very great, but very few and the rest often are just absolutely mediocre do not take it up seriously that this is the only way you can solve the problems, of this country and of the whole universe.

For us, the Western ideas are very enamouring, especially, I don't know why in Delhi. And this kind of behaviour is leading them to frivolous understanding of their own being. The whole thing is that Delhi is the Dehlich of God's kingdom or of hell. It is for you to decide now what you want to create, hell for your children or Heaven for them. It is a very sad thing that Delhi people of course come in thousands. In one of My lectures we had such a big crowd that I could not get out of this place, but it was just a crowd, a mob, it had nothing, no quality of any kind, I was amazed that all the muck of the world has gathered in this Delhi crowd. It was so shocking that they are not bothered at all, they talk big about politics, they talk this is happening, that is happening, but how many of them really take up seriously that there is a solution and let us all take to the roots, let us cure ourselves it's our responsibilities. Tomorrow, the residents of Delhi will be blamed the most of all.

Sometimes I feel like cancelling all the, North India, because this is the Dehlich of North India and if this is the

case of the people living on threshold of the North [India], what is going to happen to the rest of it, God only knows.

So I today I'm again warning you as I warned you again, yesterday, that we have so many beautiful projects, are starting in the Maharashtra area, you can come and see for yourself with your own eyes, which is so tremendous. Even the scientist then so many philosophers, doctors, they have approached, I have visited, of course all your institutions not that I have refused to do that, I have also spoken, to the, Doctors, association, in this your institute, but what they came out was so funny that they have you got a file on how many people you have cured.

Imagine, I told them, do you understand this is Love and you don't get, keep files of Love. First of all you become realised, why do you ask Me such a question, am I asking any money, what is there to doubt Me so much? You are asking Me as if I am a criminal. If you want to have Realisation, please have your Realisation and help your people.

So, I have to tell you that be careful. The beginning and the end is going to start from this particular Delhi and that's why this name is given to this so the people, who are on this borderline, must know that you have to come up. You have to come up to the expectation of God, who has brought such great things for you on this earth. Who has created this Mahā Yoga first? Please remember that you will be held responsible later on and you should not reject it. I hope you will make it a point tomorrow to come. As a mother I can only request you from My heart that My children try to be chivalrous, great as so many

have been in this country and stand up to it and get to it. Know it is you who are the foundation of this great work, of God's work, so spare no effort to get to this great tremendous blissful work of God. I am always at your disposal. Those who have come to Me have gained in help. Today I say a lady, you won't believe that woman was nothing in bone when I had seen her, when I saw her, how she has changed and she is such a Sahaja Yogini today. She said, "Mother now I have got a new birth now forgotten my religion, I have forgotten so-called religion, I have forgotten my country everything. I'm beyond it. Use me whatever way you like." And the whole ideology is in all that are so beautifully changed and such a love giving thing it is.

So I have to again humbly request you to understand that the Ganges is flowing at your lotus feet just take a dip and know that your Ghagar your pitcher has to be empty to fill it the Ganges.

Thank you very much! [Applause.] Tomorrow I will be telling you about the Chakras and now we can have a little session of Realisation for about ten minutes and tomorrow again we will have another session.

So far nobody has given any questions to Me so I would expect you to give Me questions this evening so I will answer them tomorrow.

Just put the chair there.

***Contents: 1983-01-29*, Public Program, False Gurus and Conditionings, FICCI Auditorium, Tansen Marg, New Delhi, India**

I bow to all the seekers of Truth. At the very outset, I would like to thank the great artist Savita Devī who has given us the pleasure of listening to her beautiful exposition of God's blessings and the desire of a seeker like Surdas. I am really thankful to her for setting a mood this program and bringing it to that melodious concord.

What Doctor Warren has told you is very true, that susamskāras can be confused with kusamskāras.

Actually anything that is done in extremes is against God. For example, before realisation there is no ascent, there is no evolution of your being, of your awareness. In your human awareness whatever you have achieved is expressed in your central nervous system. As you know, an animal does not know, what is dirt, filth or beauty is. But a human being is aware of that. But the human being has to ascend into a new awareness, into new chetna.

So, whatever has to happen has to happen in our awareness. The simple thing people do not understand. And that is why the reason why people go to extremes in everything is indulgence. For example, supposing somebody has said that better take Rāma's name, simple thing like that in our Indian Culture. That means you do not take bad names, do not say bad words, say a good word like Śhrī Rāma. But when it comes to taking his name, one has to know that is the holiest of holy.

This name is not to be taken frivolously at any time at any length. Just once sitting down from your heart, you have to say Śhrī Rām, it is sufficient. But if you go on like that, it becomes mechanical, has no meaning. That means you show no value to that point. Thus you go to your left side hankering `Oh Rāma oh Rāma when will

you meet me?' I met one Muslim gentleman in Maharashtra and he told Me that while doing Namaz he thought why only five times I can do even ten times. If I have to go to God I must work hard.

So he started doing it ten times and his knees were completely battered.

So he thought this is not the way to go to God.

So he read Gītā instead of Quran and all our Indian scriptures. Studied Sanskrit and started giving big lectures about Gītā. And he felt that he has started a quarrel, a kind of a feeling that he himself is Vyāsa. He said this is no good. This is all falsehood. I should give it up. He was an honest man. He said it is better to take to Bhakti .

So he took those tāl and went to, in Maharashtra, you know that we have a Viṭṭhala's mandir in Pandharpur. Where people go for a month walking on the street singing the song of Viṭṭhala, Viṭṭhala, Viṭṭhala, Viṭṭhala, so he went with that and he found out they all were taking lot of tobacco, tambacoo on their way. And they were all in that you see transcendental state going on with Viṭṭhala, Viṭṭhala, Viṭṭhala, Viṭṭhala.

He showed Me his fingers. He said, “Look at my nails, all broken, I didn't find God, I didn't find God there either in Pandharpur." He said, “I was so disappointed." I said, `What is this?" “All these methods lead you nowhere. I got so sick after that so many times I went there, every time I went there I was so sick. Those people who went with Me were all mad people. I talked to them, they never talked coherently.

They were all mad, possessed. I didn't understand what sort of a nonsense going on.

So Mother, where was my mistake?" I said, “Who asked you to say Viṭṭhala, Viṭṭhala like this?" He said, “Gñyāneśhwara." I said, “He never said so. As far as I know, He never said so. Gñyāneśhwara never said that you take this tāl and go to Pandharpur, He never said so. What made you think that He said that you go on doing all these things?" But He said that “I didn't read Gyāneshwari to that extent. Whatever I read, people said, `Oh you have to read that it is said in Gyāneshwari.' " I said, “You have done so much of reading, you just see clearly, how can they tell you such a nonsensical thing? Anybody who is sensible won't go on telling on like this." And when we were having our own program one day in a Gyāneshwar temple, which they have erected in Bombay [Mumbai], they said, “You can't do meditation." In Marathi they say `*[UNCLEAR* tumi jinya zhala]' means `you do that Viṭṭhala Viṭṭhala business.' I said, “What? Did Gñyāneśhwara do like that?" “No, but He was Gñyāneśhwara, so to become that we have to do it." What an inspiration.

“But did He do it Himself?" “No, but He was born like that. But to achieve Him we have to do like that." I said, “Have you seen anybody who has got anything out of that kind of a working? Have you seen anybody getting any realisation or anything by doing Viṭṭhala, Viṭṭhala, Viṭṭhala and this madness?" They said, “None." I said, “You bring somebody who has got it. Then if nobody has got it, nobody has done it, Gñyāneśhwara has not done it, then why are you doing it?" It's a kind of a manoranjan

[entertainment] or you can say an escape. Instead of taking wine you are taking the tambacoo and you are just going into a trance and escaping life. But the other side of it is the intellectualism. This is one side of Bhakti . The other side is that if you read something then you suddenly become Dharmic. Anybody can read anything. By reading some thing if you can become Dharmic, then it is a very simple thing. There is no need for anybody to do any meditation or anything just start reading any book and you become absolutely on top of the world. It is all mental projection; we all can do it, what is so special? This is all mental projection and this mental projection works to such an extent that whatever we do or what ever we think or whatever we conceive is nothing but mental projection. Take our politics, is all our mental projection. What is your capitalism without any properties in you? Do you have any powers? Nothing. What powers you have got? Only destructive powers, atom bombs, this that. What powers have you got? Can you convert one flower into a fruit? No, you cannot. You have no living powers. This is capitalism. What about your communism? When you have nothing what will you distribute? As you can say if I have all the powers, I am the greatest capitalist. But I can't live with it alone, I have to share it, so I am the greatest communist. But My communism or capitalism is not a mental projection. It is there, it works, it is manifesting. In Sanskrit, karyanvit.

So this is what it is.

The other side is just mental.

So one creates the ego another creates the superego. Both conditionings done to an extreme create problems

in human beings, because the movement of your attention is either on the left or on the right. And the more you start moving to the left, you first go to the subconscious area, then to the subconscious of this life, then the subconscious of your last lives, then the subconscious of the whole, that is collective subconscious. Right side, if you move, you go into your supra conscious, that is future, then you go into your collective supra conscious.

Actually, the past is finished. Future doesn't exist. Now what is the center is the present. Now even if you say mentally, `Oh, I am in the present Mother, I have got it,' that's not the truth. Accept it. That's not the truth. That is just the mental acceptance, `I am such and such.' By just accepting, `I am such and such' doesn't prove that you are there. Because it is important that we should accept as we are, instead of escaping into ego or superego. Is very important, if you have to ascend you must know how far you are.

For example, a plane has to ascend we see how much petrol it has got. Whether its machinery is all right or not. In the same way, just find out where are you. As I told you in the first lecture of Mine, that God is what He is, whether you believe it or not. And you cannot conceive Him with your own imagination, with your own mental projections and your own ego you cannot conceive Him.

So best thing is to see for yourself with an open mind what He is. This is first step towards little bit deconditioning. Once you realise that, you must know that no amount of lecturing, reading or any kind of intellectual exposition or listening to these things are

going to take you to your ascent, only it will give you a pampered ego. A ego that will blind you, not only that, that will make it impossible for your Kuṇḍalinī to rise.

Now let us see what is the arrangement God has made for us. If I say something, you need not believe Me, but keep yourself open-minded. God has made a beautiful arrangement within us that when the Kuṇḍalinī rises, She crosses over this center we have, where I have a red spot. This is the window of that center which is placed in the center of Optic Chiasma, where it crosses. It's a very subtle center, which controls from the parasympathetic angle, the pituitary and the pineal body who later on control the ego and the superego. I should say pituitary controls the ego and the pineal body the superego. Now the one side of the superego is what we call our Karma so-called. Is what we think, `Oh God, we have made bad Karmas good Karmas, Puṇyas', all these ideas. On the other side of the ego is those people who have accumulated by saying that “I have done this good I have done that good I have been so great I have been the lord of the whole world." All these two big balloons in the head of ego and superego are just covering this part of the head and this is being calcified. You develop your separate `I'-ness and you become Mister X, Mister Y, Mister Z.

Now what does the Kuṇḍalinī do? As soon as She crosses over this center, She awakens a Deity there.

Here where the people falter, because in the concept of an intellectual there is nothing like a deity, because he is the deity of deities. How can he think about a deity about

him? It's too much, because he does everything, he can do everything.

So there is a Deity who is settled down there who gets awakened and that is a special Deity that sucks it, these two institutions within you. By that suction here a hollow fontanelle bone area or brahmarandhra is created. Once that is done the Kuṇḍalinī shoots off. First of course it enters into the limbic area in the brain and then it is sucked in, it opens out and Kuṇḍalinī shoots off and you can feel the Cool Breeze of the Holy Ghost coming out of your head. This is an actualisation, which you can see with your eyes as I told you. But what happens to your awareness is the point. As I have already told you that Realisation means your human awareness gets transformed into a new awareness.

Now what is that new awareness we are waiting for? What is the new awareness we have to have? The new awareness, you jump into is collectively enlightened awareness or we can say collective consciousness.

This awareness is not a lecture or a branding or any kind of a superficial idea but is what happens actually to your awareness. As you can see this light as you can see these flowers, clearly, factually like that. You start feeling others within yourself. That means you become conscious of others, of their Chakras and centers and you become conscious of your Chakras also. That's what Mohammad Sahib has said that at the time of resurrection your hands will speak. Now these hands start speaking and when they start speaking only you need a decoding, somebody to tell you. That's how I am here.

Many people have raised lot of objection about Me also, saying that “Why You Mother?" I said, “Better be your self, I am very happy to retire. And if you can lead I will be very thankful." This is absurd, absurd. Because I only know one job is the awakening of the Kuṇḍalinī and I know, what, how to decode it. You know so many things.

So what is there to be so much upset about it? I must say it's a very intricate job, very difficult job. And sometimes I feel I am raising mountains. But I know it how to do it.

So that's how I am here just to tell you how to decode these feelings on your hands.

So the first thing that happens to you is that you start feeling the Cool Breeze on your hand, when the Kuṇḍalinī awakens. Now, this you cannot do by any chance. Now somebody says that you make your clothes of say some colour then you will meet God. I mean it is very easy. In India specially, you pay little money you can get it covered. Why? Why to announce that? Secondly, some people might say, if you jump fast then you will get to God. I mean you can always do it. What is so great? I met a gentleman who was putting his both the feet towards Me while sitting on the ground and people said, “You can't sit like this towards Mother You must have some respect." He said, “No no, I want to show respect. But what to do, if I sit cross leg I start jumping like a frog." So I called him, I said, “What is it? What's the problem?" He said, “Mother, I start jumping like a frog." But I said, “Why?" He said, “Because my Kuṇḍalinī is awakened and my Guru says that whence you get it, your Kuṇḍalinī is awakened then you start jumping like a frog." And he showed Me a book in which it was like that. And he is a

Guru of a very well known Guru who lives, he is now dead I think, who has made lots of money, people don't know what to do with the diamonds he has collected.

So also we do not understand that how can you become a frog now or an earth worm? You have to become a Mahamanav in which you should feel that nobody is the other. You should be able to feel others within yourself. And if this does not happen, how do you take to these artificial things so easily, even when it comes to your ascent in evolution? Now, for example you take a fish who swims and you take a tortoise, it crawls. There is a difference between the two and also in awareness, there is a difference. Because that can feel the water this can feel the earth. But here what happens to your awareness? You start feeling this All-pervading Power of love.

Now one can say that this can be autohypnosis. Can say I mean people can say anything but how can this be autohypnosis because if it is autohypnosis then how is it, that you can cure a person who is in coma, his cancer or any such disease and bring him to normal? How can it be autohypnosis? Warren will tell you that there was a lady, who was lying in coma in Australia before My going and one of the Sahaja Yoginis who was a homeopath and ultimately they turned to her and she said “I have only one way, I will put Mother's photograph under her pillow." And they have decided that this lady is going to die. She is no way of coming out of it. Next day she woke up. And even when she woke up and started little bit mumbling the doctor said that her brain will be damaged. She will be a damaged personality because already her brain was

damaged according to them. But nothing, she got all right and today she is working for Sahaja Yoga.

So, the miraculous part of it doesn't exist for Me, but it exists for you because you haven't seen it. You have not known it. You have seen everyday so many miraculous things, but you are not surprised.

Imagine, we are made from amoeba to this stage how? How? How carefully, beautifully, God has created us, we never even felt the pinch, we became human beings. How did we manage to become human beings? We never even think about it, take it for granted. But what must be the tremendous force that has created you into a human being? That's how we come to logical conclusion to understand that, in evolution you have to ascend in to your awareness and you develop a new awareness. This happens when this Brahmarandhra opens out and the Sahasrāra which is the limbic area completely opens and allows the Kuṇḍalinī to come. Now, somebody asked Me one more question that why this happening is needed? Why not God created us just like this? And why is it necessary for Kuṇḍalinī to be awakened? The reason is the human attention, first of all, you have to evolve slowly, slowly, slowly. When you evolve from amoeba to this stage from carbon to amoeba, amoeba to this stage we have got within ourselves, they haven't brought the chart but you have got it in the book, different centers which denote our milestones along our progress.

The last is now the Sahasrāra, at this point the human beings have got all other centers properly developed. Even the Sahasrāra is developed and what you have to do is to just make the connection with the Divine. Now

the connecting line also is there, the Kuṇḍalinī in three and half coil settled in the triangular bone. This connection has to be brought out of your head which breaks through and you start feeling this new awareness of collective consciousness. This is how the process takes place. It's a very simple process of like just like sprouting the seed. But as you cannot sprout a seed by just dancing about it or singing about it or reading books about it, it has to go to the Mother Earth. In the same way somebody who has the capacity, who has that love, who has that understanding of the Kuṇḍalinī has to do the job.

And once it is done, it's like one light enlightens another light. The another light has to steady itself first of all, know how to enlighten another light and start doing it. That's how the work is going to move in the new direction of new awareness, which we call as Chaitanyamaya chetna or enlightened awareness or vibratory awareness.

So these vibrations start flowing through you. Now what is that? You can feel it above, you can feel it now, which you have never felt before. Now this is the collective consciousness into which you have jumped. Your awareness, your being has jumped into a new awareness. This has to happen to most of the human beings just like it has happened to fishes it has happened to tortoise it has happened to pigs. In the same way this has to happen to most of the human beings. But I think human beings are the most difficult. Because of these two problems as told before that the conditionings about surrendering or you can say the *[UNCLEAR]* and secondly

the sadist or you can say the ego-oriented or the superego-oriented.

Now if somebody wants to control his ego he goes to superego. Like you see when we are very egooriented, we get so frightened of ourselves that we take to drugs or to wines and horrible alcohol. Because we just cannot face ourselves. We have to escape it. We can't sleep. We find it impossible, so we have to take to these things. Now those who are superego people like I will say people who have not yet developed according to the modern ideas then they become ego-oriented. But the movement is either to the right or to the left and this thing goes on like this. But the ascent is this way. And this ascent can be only achieved through the living process of Kuṇḍalinī awakening. About this Kuṇḍalinī you might have heard and read a lot.

Actually it shocked Me at a very young age. I read some of the books on Kuṇḍalinī and said, “Oh God, now how am I to tell these people?" Because one thing I decided that I will not write any book till they reach a certain stage of understanding.

So I said, now how to neutralise these people, who have written such big, big books on Kuṇḍalinī without even knowing, where it is. Whether it is in the nose or in the stomach or in the heart. Absolutely ignorant people have written, as you will be amazed. Because if anybody else in any technique or anything writes you can get rid of that person. You can pull him to the courts. But as far as God is concerned, right from Napoleon to Hitler, everybody can write. Anybody can talk of God. I mean those most of these fake Gurus who talk of God and

higher consciousness and all this are all nothing but criminals, anti God, anti Christ people. But who is going to tell them? Of course they suffer later on, their disciples suffer, everyone suffers, that's the different point. But they never connect it with that. To such an extent that some of the people who suffer, I know of a lady who is a Guru. All her disciples have suffered from kidney trouble, from heart trouble, from high blood pressures. I mean a Guru if you have, at least he should keep your health alright. And you dare not tell them that this lady was a hocus-pocus. Not only but she was a very mysteriously funny woman. If you tell them, they will really shoot *[UNCLEAR]*. And they have all these problems within themselves, their families are broken, everything has gone off, but Guru is a Guru. Whatever he does he is our Guru we can't leave him at any cost. He might give you one mala to wear they can't give up that mala they are sticking on to it. They have achieved nothing they have not felt their own powers. At least see for your self, those who have been to those Gurus what have they achieved? We just go so enamoured about these things so much because of the circus they are carrying or the amount of money they have collected that they can project themselves through this medias and all that.

The amount of befooling they do is still much more than the stupidity we have, perhaps so they are still carrying on. They hanker after money first of all. And we think by giving them money we are purchasing God.

So many people believe that God can get money. God doesn't understand, you must know that He doesn't understand money. He has never seen money all his life.

If you ask Me I don't know how to sign a check. You can ask all these trustees how bad I am. I don't know how to sign a check. My Husband bas been teaching Me how to sign a check I don't know. I can't. My brain doesn't work there. Just goes off. Tried and tried to learn I can't, I can't do it.

Somebody has to write for Me and then I can sign. But I do not know how to write a check, because the interest is not there. Such a person, how can He have interest in your purse or in your women or in your properties how can He have? And this is one thing one of the worse conditioning we have that we can pay for God. I can understand ignorant people do that. In the villages, when I go there, ladies will bring 5p for Me. One lady brought a 5p. I said ‘See I don't take any money’.

So she said, ‘All right, should I give you 10p?’ Because they are so simple, they are so conditioned, that they don't understand. But in their simplicity they get their realisation. But even the complicated and the intellectuals you must see the way they get after these horrible Gurus who teach them everything that is anti God, anti Christ. Absolutely, obviously, it is anti Christ. But when they suffer when they have problems, we have a lady here who was a very rich lady. She lost all her money. Her husband became a bankrupt. Her children became mad. She became epileptic, her husband got epilepsy.

And when they were absolutely destitute, she took away all the properties everything, she came to Sahaja Yoga, she is all right now. But her husband becoming insolvent had to leave London. And the gentleman now has six

thousand crores of rupees in cash. But nobody thinks about it from where does this money come.

One has to understand that as seekers we should not sell off our brains. The seekers are all right, but your brains should be intact. And you should not give up your brain to understand the whole thing, logically you must bring to proper understanding. This is one point very much against all these things that are holy, auspicious. But this is on and on; for thousands of years, people have been doing this on a smaller scale, now we have real culprits who are doing in a bigger scale. But nobody is objecting them, nobody is saying anything about them, nobody wants to write about them, because they can pay money.

But the seekers must be alert as to understand, what do I want? I want my spirit or this kind of a nonsensical ego pampering that I can purchase my Guru. Secondly in our awareness, we should reach another very, very important, extremely important point that something has to happen to us, so that our power must be manifested. Not to depend on the powers of the Guru. I mean they may say something about Me, all right they may say anything whatever they like. But why should you believe in it till you get that power within yourself. Specially, we Indians have a very bad habit of touching everybody's feet.

He might be a bad man, a very inauspicious man. He might be the worst possible personality to think of.

Just because he is putting up a show why should you touch his feet? To be very frank, I really don't like everybody to touch My feet. Because everybody touches My feet, may be some people are so bad that I get

blisters on My feet. But in the villages if you tell them don't touch Mother's feet, then that is the biggest insult to them. Everybody's feet must you touch, for what? Why to bow this forehead before these horrible people? Once you have not known about them, once you have found out that they are not Gurus, still you go on touching their feet. But before you have not found out, there is no rhyme and reason why should you touch their feet.

I will give you an example of a lama. These lamas also are another headaches. One of them went to Sweden and he wrote to them. I mean in the West, people are very much enamoured if somebody comes as a Sannyāsī, even in India, though Sītājī has written very clearly that a Sannyāsī should not enter into the house of the grihastha. He should stay outside in the forest away from the village. You may send him some food that's all. But he is not to talk to any women of the house. And nobody should give any money to a Sannyāsī. You better read the Valmiki Rāmāyaṇa. Where poor thing, I should say those who have suffered so much, those who have really suffered inside out all these villagers. They are to be told, this is being already explained that Sannyāsī has to stay outside the city. What do we have to do with the Sannyāsīs who are grihasthas? And this is what we have to learn that all these people who talk of religion, think of religion and also give us ideas about religion, what is their own lifestyle? How do they live? Are they parasites? They are the worst parasites. I must tell you. Like this lama the great who wrote that you must get marble flooring for me otherwise I won't come to that place. Now imagine in Sweden to have marble flooring. Poor thing

starved themselves all these boys and made a marble flooring for this lamaji to come. Now they were parasites in Tibet and now they are here. And we are paying them for what? What good they have done to us? Parasites of the first waters. If they are parasitic how can they be Gurus? I started the right topic for the right persons to go away. I am very happy. He wants to know about the Kuṇḍalinī. But for knowing about the Kuṇḍalinī you must know what you are. If you are coming from these wrong Gurus and you are still with them, I cannot do any good to you. I must tell you very frankly, I am your Mother and I am not going to tell you something that is not true whether you like it or not. If you don't want to hear about them, then you better go away. I have nothing to say. But those who are wrong are wrong and those people must be given up which I must prepare you for such a thing.

Because tomorrow, today your vibrations will rise I know because of My work, I should say. But it will fall down again. You'll lose your vibrations completely if you are following a wrong. Now think of a Guru who has made lots of money out of torturing other people and you are still going at his feet. Are you going to receive any blessings of your Mother? You have to give up everything that is falsehood. That is the point I am coming to. You have a Guru. Why are you so much attached to him? What have you got? You have only paid money to him and because you have paid money you feel hurt when I say you cannot pay money to a Guru, doesn't matter. Even if you have paid doesn't matter. It doesn't matter at all.

Whatever mistakes you have committed, it's all right for Me. But you must know if this is a mistake you are not to have any more now of these conditionings on you. This is an important point which all of you should know. You cannot go on with anti Gods and with God, can you? You cannot serve two masters can you? So first and foremost thing for every person who is a seeker one must know logically that I am my own master and I am my own Guru and I am not going to bow to anyone who doesn't give me my own powers. This is how we have to understand Sahaja Yoga. Sahaja Yoga is going to give you the truth and not something that is hocus-pocus something that you can not manage, that you cannot understand.

Everything you will know logically.

Those who are not seekers of truth and seekers of this concept and subservience to some people, I cannot give them realisation. You should be only subservient to God Almighty and to nobody else. I agree that a Guru is needed. A Guru is needed, but he has to be a Sat Guru. There are many Sat Gurus also. I must say many Sat Gurus. I know of so many in Maharashtra itself. And they come and tell Me, “Mother, all right, You go ahead. They will never like people who are telling them the truth. They like people who tell them lies, falsehood, who befool them, that kind of people they like." All come with complaints and they tell Me that, “We have nothing to do with these seekers so far as you are working. But after some years, maybe we may come down." I sent one person to America like that and I told him, “You work it out." He is a very dynamic man, no doubt. He came back after three days. After three days he came back from

America he said, “Oh! You think the seekers are seeking God? No. They are seeking a Guru who will be bought by dollars." He was amazed. He said, “These are not seekers at all." And he ran away from America from New York, flight boarding the first plane he got after three days.

Now this is one of the biggest things that you all should know if you are being wrong Guru and if you are living with a wrong Guru, we have to tell you and we should not lie to you. Yesterday only I had two ladies and one child. And the lady had a problem. The other lady had a problem. And the child couldn't speak her throat was choked. And when you are testing another person you can make it out. Any Sahaja Yogi will make out the same thing, when you are catching on the left Swādhiṣhṭhāna and left Āgñyā.

When the left Swādhiṣhṭhāna and left Āgñyā starts pulsating or burning then you should know the person has been to an unauthorized Guru. We call it anadhikar cheshta [unauthorized effort]. They have no business to be Gurus. And if such a Guru has been their Guru, then the Kuṇḍalinī doesn't move. It doesn't move. It just settles down there. And even if it moves, it is again sucked back. Again sucked back to the same point. Now you want your Guru or your Realisation, is the main point. What's the use of quarreling with Me? I can't give you realisation, simple thing as that, for which you are not to pay anything, nothing of the kind. I am not going to gain anything out of you, take it for granted. Perhaps as they will tell you that My Husband has shelled out lot of money from his purse to do this job.

So I am not going to gain anything out of you. Only for your gain, for your good I am telling you that if you are still connected with that, your Kuṇḍalinī won't rise.

So that is the left Swādhiṣhṭhāna and the left Āgñyā.

But you would not know till you become mad till something will go wrong with you absolutely. You will be schizophrenic, you will not know, you will be ego-oriented, you will not know. How will you know? Because you haven't got your Realisation. Unless and until you have got your Realisation you cannot feel others. You cannot feel yourself. There is no light. And when there is no light whatever you believe into, or whatever you think, if it is not correct, I have to tell you what is the reason is. And one of the biggest reason is following a wrong Guru take it from Me. The gentleman has gone. I wish I had warned him, what can happen by following wrong Gurus. Cancer is the disease, which always occurs with going to the wrong Gurus. One of the diseases. All psychosomatic *[UNCLEAR]*.

[GAP for 3 minutes. What follows almost feels like a new lecture.]... is the Deity which is the incarnation of Śhrī Gaṇeśha. At this point, He came as Mahāviṣhṇu, who is Lord Jesus Christ. You can see Mahāviṣhṇu's descriptions, which we never read, tallies exactly with that of Christ. And it is His power, which sucks in. We say He died for our sins. He sucks in our ego and superego and that's how we are cleared out. He has suffered sufficiently for us. We don't have to suffer any more. He has said that, “I suffer for them." No more sufferings are needed if you get your Christ awakened. But the Christianity as it exists today, they believe again in another kind of artificiality as

we believe, that, if you just put, somebody artificially puts the hand on the head of a person and says, “You are baptized” you are baptized. If you pay few rupees to the church, you are baptized now.

Baptism is nothing but the raising of the Kuṇḍalinī and breaking of your Sahasrāra. And when that Deity is awakened within you, it sucks in and that Deity is the Deity who has suffered. We will see further in the history that the Jews never accepted Christ. They wouldn't accept, because they can't believe that He suffered *[UNCLEAR* for them]. They didn't want to believe.

So they said we must suffer.

So they suffered and suffered and suffered.

So Mister Hitler came down to make them really suffer. And now they are so changed that, now they have become the aggressive people. Why don't they suffer now? Has Christ come or has their saviour has come that they have changed their ways? So those people who ask for sufferings will get sufferings. There is no need for you to suffer at all, I assure you.

We have another very funny custom is to go on fasting in India. As it is, because of this desire, many people in this country are fasting automatically.

So everybody says we must fast in the name of God.

I just don't understand. What is the need to fast in the name of God? You can fast if you want to, that's a different thing. For example, we had one gentleman called Mister Agnihotri. He was a very well known gentleman from Pune. His name actually is Rajware but they have given him *[UNCLEAR* Ahitaniagnihotri] because

they used to have lots of these Yagyas and that's how this gentleman became very well known. Then he came to Sahaja Yoga. And one day he came to see Me in Bombay [Mumbai]. He was a great Gaṇeśha bhakta and he said, “Mother, doctors are saying I have got prostrate gland trouble and I don't know what to do. Should I operate?" I said, “You have got prostrate gland, I can't understand, because it is looked after by Śhrī Gaṇeśha.

And you are such a Śhrī Gaṇeśha bhakta, I can't understand. All right, you better have My prasad and I give chana as the Prasad." So he looked at the chana and he said, “Today I can't and another fellow said today is Sankashti, is the birth date of Śhrī Gaṇeśha." I said, “You fast on Śhrī Gaṇeśha's Birthday?" He said, “Yes." I said, “Will you fast when you have a child, on the birth date of your child? Why should you fast on the date when He is born, the great son of Shiva? What is the logic behind it?" He said, “They have been doing." “You have been doing something wrong. But use the logic. Why should you fast on such a date? You may *[UNCLEAR* rightfully] find out." I told him, “Today is My order, you eat this chana." He being My very obedient son, he ate it. He is about, I think eighty-four or so.

When he went back to Pune, the Doctors said, “Your prostrate is cured." The Gaṇeśha got prasanna [happy]. Imagine how many times we are trying to disturb, even to displease the Ganas and the Gods and the Deities within ourselves.

Same way on Guruwar [Thursday] to fast or Mangalwar [Tuesday] to fast about, for Śhrī Gaṇeśha or for Hanumāna. Imagine that day to fast when he was born

on that day. Hanumāna will be so angry with you that you don't know what sorts of problems you will face. As Hanumāna is one of the very karak [strict] ones. And be careful about it. Don't start doing things because some Brahmin has told you to fast.

They want you to fast and give all the money to them. Fasting also has a big science. Mantra has a big science. Everything has a science, which you must see, when the vibrations are flowing and see for yourself what is good and what is bad. Just don't accept because somebody tells you. All such conditionings are with us. I just don't understand how people accept them blindfolded. This blindness has really been a big barrier for us in Sahaja Yoga.

They send kind of gandas you see Kashi ka Ganda. All the villages will be *[UNCLEAR* tying] kashi ka ganda, which spoils their Viśhuddhi Chakra. And that has to be thrown away. If you tell anybody, they will start shouting. This is the center of Sūrya, where they will put black. Are you supposed to blacken the Sūrya? They have no idea as to what they are doing to their deities, different Deities are there, how to please them, how to keep them all right, what's the problem. And all this ignorance has given them such a funny situation that people ask Me that, “You say that India is a Yog Bhūmi, people are very religious, very Dharmic. Then why are they so poor? Why they have this problem?" Now anybody who goes to Tāntrikas, has to be a poor man afterwards you take from Me. Bengal full of Tāntrika, Bihar full of Tāntrikas, it can never improve. The poverty comes from this indulgence

with the Tāntrikas who really control dead spirits. If you go to any Tāntrika, you are in for trouble, take it from Me.

Because, if they are trying to do something for you very loukeeka, very gross, they also put some sort of a nonsense into you. Don't indulge into all such things. You will know about the Deities and everything from the book. You will learn all about that. There is no problem about learning about that. But what you have to avoid is this kind of indulgences into things like going to a person for asking a Tāntrika, “When will my father die?" Or, “Which horse is going to win the race?" All these things will give you into such a big problem that as I said that all this anadhikar cheshta leads you to things like cancer and all diseases, which are supposed to be incurable in the medical science.

Because medical science doesn't understand this. I have Myself studied medical science. They have no idea as to the attack of these people. It is a fact, you try for yourself. And see for yourself how by avoiding all these things you keep a very good health. Now there are so many Sahaja Yogis here, at least fifty percent people are here. All of them have gone through it. And they know they have to drop out all these things and to come to a purer sense of understanding of the truth. And honestly to accept the truth and not to just say all right we will do this whatever Mother says. You just try with your open mind, try. Why these things are happening? I used to wonder, when I went to Trivandrum, what is the reason for this kind of a misery in that place.

And I was amazed to find that they bury their dead in their houses. They do not bury it in the Shmashāna.

I was amazed when I saw all the Catholics becoming so funny in their old age. They go absolutely strange in their old age, Catholic people.

The reason is that in the Catholic Churches, they have all the dead bodies buried under their feet.

Indian philosophers, we can say, the Drashtas or the Munis of India were so intelligent to tell us that keep these dead outside. They have done all this research and every thing for us. But we don't read them.

Most of go to a Brahmin, if he says something, all right. He is not a Brahmin, because he doesn't know the Brahma. The one, who has not known the Brahma, is not Brahmin. By birth, you cannot become a Brahmin.

Somebody stood up and said that in the Gītā it is written that you are a Brahmin if you are born in Brahmin. Of course, it is not so written. But just imagine, Vyāsa the son of a fisher woman can write such a thing like that. See the logic behind the whole thing. It's so logically understood that how people have construed the whole thing for their own purposes and we are playing into their hands. And we are very happy if Mother says, “Don't do it, My child, it's not good for you." It's going to harm you, your family and even seven generations can be ruined if you are a Tāntrika. I have seen one family, seven generations ruined. Of course any Tāntrika's even grandson comes to Me I know, he has it.

Somebody in his family, Tāntrika. They themselves don't know what are they up to. But they are so much attached to money that they don't want to think what is going to happen to their progeny? These things are to be told to you because you have got your Realisation now because

you will be facing the truth. You have to know that you have to face the truth as it is, if you are going to continue with it you cannot retain your Kuṇḍalinī all right. Because your left Swādhiṣhṭhāna will pull out all the forces I have put up, the Kuṇḍalinī that I have raised, everything will be sucked in and you will be in a problem. Is a very major thing and that's why I have to tell you, going before the fake Gurus you have done one of the major mistakes.

So forget it. Forgive yourself and take to reality. There is no need for you to curse yourself or to say that why should you have done it. Because I am your Mother and I am willing to work day in and day out to correct all these things for you.

The other conditioning we have which Indians have, I mean I must tell you all the conditionings we have before we start working out our Sahaja Yoga system. Of course the Gurus that are wrong must be given up. Those who are good Gurus we will tell you that they are good and they have done so much good and that's the good point about that. And we all pray to so many Gurus also within ourselves. And who are these Gurus that you should find out yourself.

But the another conditioning we have is that we cannot connect one to another. For us Mohammad Sahib is different, for us, Janaka is different, Nanaka is different. For Sahaja Yogis they are the manifestation of one principal Guru Tattwa and you can prove it. That's the beauty of Sahaja Yoga that whatever I say can be proved. The example of this is this that we had one gentleman from Iran. He was a doctor.

He came to Me. He had cancer of the stomach, so I asked him.

I said, “Do you believe that Mohammad Sahib was the last prophet and that He was the only prophet and He is the only person?" He said, “Yes." I said, “Then I can't cure you. Because of your fanaticism, you have got this stomach trouble that you will know where the Guru Tattwa is. Because you have been doing this kind of a malpractice, you are caught up. But now if you are willing to accept that Dattātreya is the one, the principle of Guru, was the same as Mohammad Sahib and as Guru Nanaka, I am willing to treat you." He said, “No, no nothing of the kind." I said, “Then, better go away. I have nothing to do. I am sorry. I would like to save you." So he went back. This happened in 1975 with his wife. But in the hospital they said, “We can't cure you, you are gone case." Then his wife said, “Let's again go to Mātājī. Because if She has cured." I had gone to Iran in seventy-three and I had cured some people of cancer, so that's how they came to Me.

So I said, “All right, are you accepting it?" “Yes, I accept it now, Mother, what You say I will accept it." You will be amazed, he got cured.

You are displeasing Mohammed Sahib himself. You are displeasing Guru Nanaka himself. In Guru Nanaka's life it is shown. One day Guru Nanaka was sleeping like this. They said, “You are talking of Makka. Then what about this, your feet are towards Makka." “All right, I will turn this side now." The Makka is this side. What more proof you want of this that He was the same as Mohammed Sahib. Did He disrespect in any way Mohammed Sahib?

Did He say so? Then why should we develop this kind of a hatred against Him? All right you can hate Muslims and Muslims can hate you. But what's the use of this hatred nonsense going on. Once you are awakened in your essences, you will be amazed to see the truth lie somewhere else and we are just fighting among ourselves. Like Christ has said, “Those who are not against Me, are with Me." Poor Christ, I should say also was given only three and half years just to say all these things. Who are the ones who are with him? He has very clearly said, “Those who are not against Me, are with Me." Who are those? Christians never will. You see, they will just avoid these points. If you talk to them, they will say, “Oh! no no, no that's not so." And this is the reason why in every religion we have had problems. Hindu religion now we can take what even Ādi Shañkarāchārya has said that Na Yogena Sānkhyena. It's only through Mother's grace you can get your Realisation. Everybody intellectuals and all that fought with Him and were arguing with Me. Like there was a Sharma fellow that quite argued. And He got so fed up with all those arguments and shabdajalam that He said, He wrote the last was Soundarya Lahari praising the Mother. Describing all the ways of the different types of Shaktis that flow from Her and how they take their forms. And every couplet that He has written is a Mantra. But who knows about it? Everybody who were supposed to be intellectuals in those days said, “Oh what are you doing? Here you are writing like Viveka Chūḍāmaṇi and all that and today you are writing like this? What is the need to write about this?" So He said, “This is the way it is going

to work out. This is the way it is. Not by all these arguments, Shabda jalam, by talking about it but by happening of the Kuṇḍalin[ī]." He is the one who first time opened this knowledge of Kuṇḍalinī in his books. Of course it was stopped long time back 14,000 years back by Mārkandeya. But we Indians are so modern that we don't know who is Mārkandeya is. I don't know if people who are not Sahaja Yogis have even heard the name of Mārkandeya, who is the basis of Sahaja Yoga.

So this work of giving Realisation has started thousand of years back by one, two, three, four like that.

Today it has come to the mass. That's why it is the Mahā Yoga. Even Gñyāneśhwara has described it as Pasayadan. He says, “A day will come when the whole Brahma ekatwa, the oneness with the Brahma one will feel. People will become happy, all their problems will go away." And the wankati Khranchi Sando, Wankti means the crookedness of the Kharas, means the ill doing people, of them khal will sando, will be finished. Everybody has talked about this. And it is time for you to take it. Take it up seriously and work it out with all sincerity to yourself and honesty to yourself.

I wanted to talk to you about Chakras and this and that but that subject is already available in the books. You can read it and understand it. And you have to understand one more point that this is the work of collectivity. Now one individual getting the Realisation has no meaning at all. It's not that I can give Realisation to one person, I can. No doubt. But one person's Realisation is of no use. It has happened in everything like even science, supposing, this electricity was created by one man. He

had to give it to all the rest of the people. If it is not given to every bahujana sarvajana, if it can't be given to all of them it has no value. People will never understand it. They will say that this God is not existent. And that this is all a kind of a wrong information that there is God.

So it has to be given to all the people who are desirous of it, bahujanaya.

Then also it works in collectivity. Now we have many people whom I have given Realisation to many to chief justices, justices, governors, big ministers, politicians, doctors all of them. But they go up to a point, because they are still conscious that they are very great. You have to come to masses. Settle down with them. Become one with them. Meditate with them. In this way, I will say, Mohammed Sahib was very modern when He said that in Namaz, everybody before God is one. You all have to come down to centers, settle with it, understand Sahaja Yoga. You can find that only in collectivity you will grow. But if you are separated, you will not grow. And this is one thing is what Śhrī Kṛiṣhṇa played the Rās.

To understand Śhrī Kṛiṣhṇa, one has to have Realisation too. All His sweetness and all His greatness can only be understood if you understand that he was Virāta, Akbar and Śhrī Kṛiṣhṇa when he played Rās, what is Rās? Rā is energy Sa means sahit. He used to hold the hands. Rādhāji is the energy, is the Mahālakṣhmī and all of them used to hold the hands. Even now if you hold My hand you will get the pulsation passing through.

So Rās, with the energy. And that's what He played. In those days, there were no [UNCLEAR... halls]. There were

no people like you, who would sit down and listen to lectures.

Because now we are becoming very lecture minded. That time people were in Leelā, in just joyous way.

So He used to hold the hands of people and put the Kuṇḍalinī through. When He made the people climb up to do the Gopala Kala then also the same thing, that from their Sahasrāra He made the energy to flow down. When He broke the pitcher of the Gopis, what He did was to pour the vibrated water on their back, so that their Kuṇḍalinī could be awakened. All in His Leelā, see how His Leelā is, that is the way He played Leelā. When He was a little boy of four years, He climbed upon a tree and hid their clothes, then they had to say, hands to Him, “Give me my clothes, Śhrī Kṛishn." These are the vibrations. Just see how beautifully He did, those people very few, that time I should say, compared to today got Realisation. And that's how He could establish Realisation of many people at that time and He did the Kṛishi means He sowed the seed of Realisation.

Today we are here to reap it. And this is the time of reaping, in this reaping time, I hope you people of Delhi will take a very big lead and will come up to the expectations of all these incarnations on this earth to evolve you to this stage to give you this specific position. Even coming to Delhi and staying here has a meaning. You must understand why God brought you to India, why you are an Indian, why you are in Delhi, why you have come today to this hall, just think about it. You are definitely important. And that importance unless and

until you recognize within yourselves, is not going to help.

So don't bow to anyone who has not done anything for you, who has done no good for you logically, which doesn't come into your head. See it clearly, don't be shocked. That's a fact, there's nothing to be shocked, to be seen that how people have been belittling you. Do not identify yourself to falsehood. And I am sure a day will come in this Delhi, we'll have a great kingdom of God manifested.

May God bless you.

Nobody asked Me questions before yesterday and today also. I am sorry nobody wrote any paper or anything for Me. Nobody gave Me any questions.

So now I don't want to waste anymore time because I had told you that if you have any questions, you should have given it to Me. But perhaps there are some.

Question: Sidhi Yoga and Sadhan Yoga are the same things?

Shri Mataji: I mean these names have no meaning. Sidhi Yoga and sadhan Yoga. What is all this? It has no meaning. It is just shabdajalam. What is sidhi Yoga? What is sadhan Yoga? You see to be sidha means to be proved. And how are you to be proved? By Self-realisation. Make it simple, don't complicate it. You see have read too much. You complicate it. Just don't worry about these words. Just you have to become a realised Soul Atamsākṣhātkari and that's how you are proved.

So you are a sidha. But the sidha that people are talking about horrible, they are using these words sidha. You

become a sidha means what you are flying in the air. That's not the way you become a sidha. Why not ask the Guru to become a sidha to fly from somewhere. Put him on that. Leaning tower of Pisa. Let him fly.

Question: *[UNCLEAR* I am under the] influence of some evil people power for the last six years *[UNCLEAR]*.

No permanent solution has come out? And that's National level sports man also. *[UNCLEAR]* and help me to solve this problem.

Shri Mataji: Somebody who is under the influence of the evil power can be easily easily cured. There is no problem we have cured many people. Like there are so many people here who are sitting who had this problem. You should come to our centers and see to it that you get rid of it, all right? It's very simple, there is no need to worry about that.

Question: Divine vibrations will cure a sick person who does not accept Shri Mataji as incarnation? *[UNCLEAR]* the patient is related to Sahaja Yogi?

Shri Mataji: He has asked that “If you give me Divine vibrations to a person who doesn't accept Mātājī as a Divine Power, will he be cured?" Yes he can be. See Mother is very gracious. She knows they are ignorant.

So doesn't matter he may be cured. But what's the use of curing such a person? Just tell Me. He is like another pahalwan will be there. What is the use? Because he is your relation, you are curing. Better to cure him in such a way that he gets his Realisation. That's My ultimate *[UNCLEAR]*.

You must get what is Param. What is the use of just curing a person doing this, doing that? It's very low-level understanding. If you have to give to somebody, give him the Param, the highest. Why give these lower things? And once he gets his Realisation, he is cured permanently. He may be cured today again, he will get sick another time. What's the use? It's complete integrated treatment that you get once you get your Realisation.

Question: Respected Mātājī namas-kār. I am patient of high blood pressure from the last ten years.

Now I am *[UNCLEAR* ready] to take the medicine, no problem for me. My daughter is not coming to see me since long period, that is, after marriage due to bad *[UNCLEAR]* of in-laws. Now, please take me into your meditation to get rid of all these problems.

Shri Mataji: The other problem that has come today is that somebody is suffering from high blood pressure is very easy to cure high blood pressure. How you are to be cured and all that is very simple. The basic idea is that you are in imbalance, that your Piñgalā Nāḍī is working too much.

So what you have to do is to take My photograph and put your left hand, put it to the right 108 times. And you can put your feet in the water with little salt and throw the water, ush it out. It's very simple. Left side is to be raised and right side you have to get the grace. Right side like this, the grace by which you nourish your right side, which is being too much used. All those people who are right-sided get high blood pressure, who are left-sided, get low blood pressure. There are two types of people

left and right type. One are lethargic organs they have, others have very active. I told this in the beginning.

Any other question please? Please write it down. Most of you people who are supposed to be in charge of Delhi government or the Government of India, you are all like Govardhan dharis, you see, standing with one finger, you think, `If I remove the finger, the whole government is going to topple down.' All such people are right-sided.

So what you have to do, all of you have to take the left side and put it to the right, 108 times, then reduce it to fifty-one times, then to twenty-one times, then to seven times. And you will find your blood pressure everything will go away. But you must come to center. The main thing is you must come to center, because your blood pressure will go away, but you may have some other troubles.

So better come to the center. Master it. You have to become the pravīṇa.

I give an example of a car. Supposing, there is a car you have to learn.

So what you do? You try the accelerator and the brake. First you try this, again you try that. You make mistakes. Then you start balancing it. Then you know where to use what. When you start doing that, you become thoughtlessly aware, you become thoughtless. In the sense that you don't have to think about it, automatically work out. Then you become a driver. But still the master is sitting behind you. When you get Self-realised in the sense that you become absolutely powerful and absolutely confident, then you become the master.

When you become the master you start seeing. Master means the pravīṇa, the one who is an expert. As soon as you become the expert, you start seeing the driver in you, you can see the accelerator in you and you can see the brake.

So you become a Sākshī and you start seeing the whole thing. That is what is called as Nirvikalpa. At that stage we call ourselves a Sahaja Yogi. For that you must come to the center.

Do not do patchwork, for yourself, for your life, for your children, but do the whole thing.

So once for all you have no problems. Your family has no problem, your society has no problem, your country has no problem and the whole world has no problem, all right? Now any other question you have. We are still going to have programs after this, where I am going to be. And you all are cordially invited to all these programs.

Some are in a temple, some are in a open space and all those. Please note about that. These ten days you should dedicatedly come to these different programs and try to imbibe all that is Divine within your self. And after that we have centers in Delhi where you can go and understand Sahaja Yoga. But as I have told you beforehand, that these are the few conditionings, which we have to give up. One side, the ego part of it, we should know that now we are a Sahaja Yogi, we have no caste, community nothing. We are above everything. And that we may be anything in life, here we are just children of one Mother. And on the other side, all the other conditionings, which I have told you for which, I am so

very anxious that you should not feel bad of it. I didn't want to hurt you in any way but I have to take out this thorn and operation has to be done. And I never wanted to hurt you. But it hurts people, doesn't matter, you will be all right.

May God bless you.

[MISSING 5 minutes in Hindi.] You have to understand that this Country is a Yoga Bhūmi. Is a land of great saints, great incarnations.

Is a specially made for you. Has got the climate where you don't have to *[UNCLEAR]* and it is very saintly. It has got so many beautiful fragrant flowers and fragrant trees like *[UNCLEAR* Chandana]. No amount of description can describe the auspiciousness of this great country.

The country is like a Mother who is *[UNCLEAR* holding] and it has that motherliness in itself. Now this country has a power to suck our *[UNCLEAR* faults]. That's why *[UNCLEAR]* all the Sahaja Yogis *[UNCLEAR]* to tell the motherland and pray to Her that you take our problems.

Now put your hands towards Me like this *[UNCLEAR]* discuss it *[UNCLEAR]* and vibrations start flowing. Keep your eyes open specially hands to clear out. Right hand has to go back like that backwards, backwards and left hand towards Me. If you have a left hand problem, anybody who has emotional problem should try this on the photograph.

First of all put your left hand *[UNCLEAR]*. Work it out. Keep your eyes open, just keep your eyes open, so that I tell you how to do it.

[Again Shri Mataji speaks in Hindi one or two sentences.]

***Contents: 1983-01-31*, Public Program, The Nābhī Chakra, N.D.M.C.**

Park, Hanumān Road, New Delhi, India

The music was very fine and elevating to all of you. The effect of music in Sahaja Yoga is tremendous and if a Sahaja Yogi sings the song it's so great that it acts like a mantra upon My being.

So I'm very thankful to Mrs. Venugopalan for singing such a beautiful song today. It stirred Me completely. Then Gavin Brown was very sweet. He's an Englishman, very gentle and a very steady Sahaja Yogi. He's one of the first Western Sahaja Yogis I met.

Today I will tell you about the Nābhī Chakra which deals with this honesty of seeking. Nābhī Chakra is the center which controls or manifests outside in the gross as Solar Plexus. Nābhī Chakra has two sides: one is the left, another the right and one in the center.

So on the left hand side is the Gṛuhalakṣhmī, on the right hand side is the Rājalakṣhmī or Gaja Lakṣhmī and in the center is the Lakṣhmī which ascends into Mahālakṣhmī.

When the seeking starts, a human being first starts seeking food. Food is very important for all the animals. If they have no food then they cannot exist.

So the seeking starts with food and when the shelter is sought, they try to find the water.

So this center is made of water and in this center resides the Deity of Śhrī Viṣhṇu or Nārāyaṇa; and His power, as I told you, is Lakṣhmī and then Mahālakṣhmī. You will find out in Sahaja Yoga that gradually you start developing one power and then the other.

Everyone who comes to Sahaja Yoga, if they are truthful and not involved with any wrong things, then definitely they are helped in Lakṣhmī Tattwa, means their well-being is looked after. As Kṛiṣhṇa has said, “Yogakshemam vahāmyaham." So He looks after the kshema part of it. Everyone who has been to Sahaja Yoga has been helped miraculously also in the Lakṣhmī Tattwa, that means materially. In so many ways they are helped, that one has to just see for themselves how these miracles take place.

An example is of a villager who had a small little holding of land and he was living hand to mouth every day. When he came to Me, after some time I found he would bring one garland, big garland, for Me every evening. And he was away in the village every day he would attend My program. I was quite surprised that how could he afford it and I asked him, “How can you afford a garland for Me every day? You shouldn't bring it, it's not proper." So he said, “Mother, You know everything." I said, “Why, what happened?" He said, “I have a plot of land next to mine which we never used because it was absolutely a barren land, little bit, not much big land, but a small land, piece of land. And after Realisation I used to always go walk over it bare feet to plough this little piece of land that I had. After some time when I was coming here after that, one gentleman came to see Me and he said that “This piece of land that you have is very precious." He said, “What's the problem?" He said that “I have a kiln of bricks and I have seen that even by chance, Sahaja, we mixed a little clay from this soil, from this part of the land that you have and we found that our bricks have become

so good and so strong that we would like to purchase this clay from you at the price of seers." And that's how he started getting money sufficient for him and he became much better off.

But in Sahaja Yoga one has to remember you don't go to extremes, in any principle. That is one thing people should know, that you don't go to extremes. You don't become extremely rich. I've seen those people who are extremely rich, when they come to Sahaja Yoga, they are a big headache, very big headache.

If they are sick, if you cure them of their heart trouble, then they try to possess you. They will get all the heart patients, they will get all kinds of patients to you, you go on tolerating it, they try to possess you. They immediately start talking about their cures to everyone, they publish in papers, this thing, that thing, it's impossible. And they just try to overpower you. Without any appointment they'll arrive and they would expect you to attend to them immediately, it's terrible. And then they'll send all their relations for cure and you have to show all patience, all their friends, they become like agents. All their patients, all their relations, all their friends, they want to oblige them and spare no love, no affection, nothing further.

The Sahaja Yogis, if they try to say that “No, you shouldn't do like that and all that” they feel insulted. And they all try curing much faster than anybody else does. They themselves are weak, they are sick people themselves, heart patient, this patient, that, but if you tell them, “Don't cure” they'll feel bad. If you don't tell them, they'll get sick and you'll have another problem.

They never try to understand Sahaja Yoga in it's big way. They just want to see it according to their own way of ego that they have accumulated with their money and they never know how they go on hurting everyone by overpowering Me all the time.

It's very amazing, whenever I cure a rich man, I've been wanting to run away from that person. I would never go to their house, I would not like to eat in their house. It's a very bad thing.

So too much of riches is also not OK because it gives you a tremendous ego that you don't see yourself and anybody tries to say anything protect oneself, then such a person feels insulted or humiliated. Not only that, but they try to hold Me and hold the whole thing according to their business ways which is impossible.

See, they have to gain money, they have another attitude because they are miserly. I don't have to earn money or anything. If I am doing anything, I'm, really, in a way, I'm obliging. Isn't it? But they will force on Me all their rules and regulations, everything, without having their own discipline.

So very rich people in Sahaja Yoga so far have been extremely troublesome, I should say, to Me and to the whole organization. They are very narrow-minded. They cannot see the big vision that I have before Me.

Whatever little ideas they have about themselves and about their own thinking, reading, they will try to push onto Sahaja Yoga. It's not My experience once, but many a times. Then somehow or other it so happens that they drop out.

So, too much richness gives you a tremendous ego, worse than even, I would say, a bulldog. It's impossible for a rich man to see that all these riches are outside him. They are not inside him. He has to be rich in heart to understand compassion. Compassion doesn't mean that you give alms to others, or if you give money to others, it's not that. On the contrary, you just have beggars by doing that. Compassion is that works, compassion is that flows, compassion is that manifests. It is not in compassion where you can make it materialise it, “All right, come along I'll give you a hundred rupees." On the contrary, giving somebody a hundred rupees is the worst thing. I have tried this with some Sahaja Yogis who were with Me. I tried to give them some money some time as they were very poor. They became horrid.

Some of them started drinking, some of them took to some other ways and they became sort of addicted to money.

It was impossible. And they tried to spoil as many Sahaj Yogis as they could.

So such people if they come, it's impossible to manage them. They are not Sahaja Yogis because they are aSahaja. They are still sticking to the idea that they have so much money, that they are so rich and they can overpower everyone with money. Not Me, I'm sorry. But only thing I feel sorry for them that they cannot get to God. There is no honesty of seeking in them, there is no honesty of seeking. The elite people whom I have addressed so many places like this, because some people whom I have cured wanted Me to address the elite, so-called. I think they are elated, to Me what they

are. They don't want to be in Sahaja Yoga. They are already eliminated, I sometimes feel. Thousands of them I've addressed, I've wasted My time with them. They are good for nothing, absolutely empty people. They are very happy because they have a few cars, some houses or something like that. I too have all these things, I would say so-called riches. I have always seen from My father's side and from My husband's side. I don't understand what is there to be proud of this emptiness. But human beings are such, a empty vessel makes a big sound, in the same way, an empty rich man makes a very big sound.

Not that the very poor are also good, because those who are extremely poor are busy with their food problems. They have little, little problems and their values are still have to come up to a point. It's only in the middle you can work out Sahaja Yoga better. Those who are extremely rich and proud cannot come to Sahaja Yoga easily. Those who are very poor also cannot come to Sahaja Yoga.

But when this middle part of the river is enriched and starts flowing, then it spreads on the sides and then it can engulf. But you cannot start it the other way round. I have tried.

I have tried both ways and I have told you what happened. Whom I gave money, whom I tried to help through giving money became wayward, useless, frivolous people, got lost to Sahaja Yoga.

And those whom I thought were moneyed and satisfied people had another role to play is to possess Me all the

time, to use Me all the time whenever they wanted, for whatever purpose they wanted to use Me.

And they must know, you cannot possess Me, you cannot possess Me, but this kind of an ignorance still in their minds is that they can possess God, they can possess everything. For such people there are no reasons to come to Sahaja Yoga, to be very frank. And even if they come to Sahaja Yoga they have to know that for Mother richness of heart, understanding of Sahaja Yoga, humility, non-possessiveness are very important.

In this ascent of yours, money is not important at all. Even if you are poor or rich, you get your Realisation. For example, I went to Maharashtra, most of them are, I would say, very poor people in the sense that they are not middle class at all. They are not educated, they are sometimes factory workers or they have small holdings. Not very rich. But they are very good Sahaja Yogis, excellent Sahaja Yogis.

They have such beautiful eyes and such beautiful feeling and such compassion that Lakṣhmī Tattwa is absolutely balanced in them. You know that Lakṣhmī is shown to be a lady and lady who is a mother.

Mother doesn't care whether you are rich or poor. If her one son is rich and another is poor, she'll pay more attention to the poor and ask the rich to give his money to the poor also. She is not bothered. If somebody is in need, she will be the first to help the person who needs.

Now this is a spiritual thing in the spiritual life. The person who is a real seeker, who is a truthful seeker, the Mother will go out of the way to be with that person. And those who are not honest about it, Mother will try

somehow or other cut them short. The problem that lies with human beings is that they do not know what they want. They think they want first of all money. But those who have money, they think they must have power. If they have too much money, they think that they must go into politics because they have had no power. Then they fail in politics, or say they become too much in politics, whatever it is, then they want love from their children which they can't get, because they are too busy or something like that.

So they don't know what they want. Those who believe that by having money will be better off, should listen to all these people who have come from affluent countries and they will tell you how things have gone wrong there, how people are ruined, what's going wrong with them, absolutely they are in a bad shape. You cannot call them human beings because they are so cruel, they kill even their own children and that society tolerates such people.

In India if you hear somebody killing a child, I have never heard so far in the sixty years of My life, but supposing you hear someone has killed his daughter or son, nobody will ever look at that person.

He will not be allowed in the society, nobody will even give any girl in the marriage to his daughter or a son. He'll be absolutely barred from the society. No one can think of such a relationship between children and parents.

And then there are funny relationships also, it's something so absurd, on both the sides on cruelty and on morality, they are so absurd, it's impossible to understand.

So money has given this ego and they say, “What's wrong? What's wrong?" It's absolutely malignant attitude. When you say, “What's wrong?" that means you do not want to keep your relationship with the whole. You do not want to keep your relationship with the Primordial One, the One who has you, everyone within Himself. You are part and parcel of the whole and how can you say, “What's wrong? I do what I like." You just become like a malignant cell.

So at the Nābhī Chakra one has to know that one should not hanker after money too much. Now those who hanker too much after money, may develop their right side better, they may have money, no doubt.

But they miss their left side. Left side is Gṛuhalakṣhmī, they have no Gṛuhalakṣhmī in their house. They are very hectic people, they run about, they run the rat race, they get heart attacks, if not heart attacks, they will get leukemia, they'll get diabetes, liver, all such things, because their attention is on money and not on God.

So either you are on the right or on the left. Those who are very emotional people, extremely emotional, more worried about their family; for them family is everything, the relations are everything, they are like that, they may not have so much of Lakṣhmī because they distribute all the Lakṣhmī. But still they are better people. But sometimes such people who sacrifice so much for others, give up everything that they have, can become crazy because they'll find people do not reciprocate, they do not return their love, they do not understand what they have done.

So going to the extreme of helping others can cause trouble to the person who does this job and also trouble to people who have taken free money from him, because if you distribute free money to people what will happen? I'll give you a simple example of America helping India. When Americans helped India, they thought they were doing a great favour to India, which was a wrong thing. Because whatever they did was lost in the wilderness. Nobody tried to maintain it, it was free. But by giving that they showed the contempt and when they gave some wheat and rice to India there was no grace about it, because they put some sort of a seed in it which created two horrible things in the villages. One was called as congress grass because it came from America. And another was called as a mad acacia. Babool, as we call it, mad babool. These trees have grown so much in the villages that they don't know what to do with them. They have such big, big thorns that anyone who is stung by them can even die. They are very poisonous and if the children get it, they get such poisonous problems that they cannot be cured. This is how American government has helped us. Now who's going to tell them what you have done so ungraciously? It was better to starve than to get any help from anyone. Long time back I had said that it is better to starve in this country than to get any help from these wretched, horrible Western countries who think no end of themselves.

You just pamper their ego for nothing at all. What have they got? They have just plastic affluence.

But this ego out of money makes them so stupid that they don't know what's happening in their own country.

How their country's going down in every way. How their people are going down. Either they are in fear or they are abandoned. Otherwise they are communist or they are so-called capitalist where they are just abandoned. If you go and see that country, I mean you can't sit like this anywhere and talk in the outside, somebody might come and murder somebody. If you walk in the dark you can be murdered.

In America, so-called advanced country of America, in New York City.

So this kind of riches we are trying to aspire, especially people in Delhi are very anxious to aspire lot of money. I don't know why Punjabis, Gujaratis and Mārwadis have taken to this. Mārwadis are another style. How the Punjabis and the Gujaratis are trying to acquire the money. And when I see them abroad I just don't know if they are anywhere near India. Horrid people. They have no culture left in them that is Indian. They are absolutely outward. They think no end of themselves, they think they have reached the heavens.

If you see their Nābhī Chakra, you'll be amazed, all of them suffer from horrible livers, high blood pressure, diabetes, heart attacks and they drink like fish, especially Sardarjis.

I was surprised who are supposed to be in the name of God, they drink like fish. They are very particular about wearing a Puggadi and a Dhari, but while drinking they don't mind. Every Sardarji you go to has a big bar in his house, where even a lord does not have because it is regarded as very vulgar in England.

Without learning any aesthetics of that country, they have become just like agriculture, there is no culture. Is a fact. This is what money has done to them, they have no respect for themselves.

So this Lakṣhmī Tattwa is to be balanced. Same about these Gujaratis who have gone. Another kind lives here, the Mārwadis. Less said the better about these horrible Mārwadis. I don't think anyone of them will ever get Realisation or a place in the Kingdom of God.

They are blood suckers. They are not human beings. For money's sake, they'll suck the blood like juice, suck the blood and now they had a nice time.

This is not a world for you to seek money. You have come on this earth as a human being to seek God, to seek your Spirit, to be one with your Self, to be in that peaceful place which is the Kingdom of God, which is the Kingdom of Heaven and not to jump into a mire which looks very beautiful but is not really beautiful. It's agonizing, it's terrorizing.

People can't sleep if they have too much money, because they don't know what to do with that. Here also all those who have got money, they don't know when the income tax will come on them. I have solved My income tax problem by having no income at all. I have no income, no income tax, so I'm not worried about the Income Tax Commissioner. He cannot control Me. Best is not to have more income that is to be taxed, otherwise you'll have to have another income tax lawyer like My brother is.

I told him, “I don't need you at all, all My life, thank you very much." You get so absolutely free, on top of the

world if you have no income. Like if you want to solve your car problem, never learn driving.

Somebody drives you down or nothing, you can walk with your feet.

The accumulation of all these nonsensical things have caused us all this tension, so-called: “How much we have to pay, what is the income tax, tomorrow the police is going to come in my house?" If they come to Me I'll say, “All right, have everything that you can. Nothing there, certain bills which I have not paid, that's all." Just let them pay. One has to live with complete freedom in this world. And to achieve that freedom, one has to know that the priorities should be all right. If money is your priority, you have it.

No, not Me. If you want to give Me money, “No Sir” I won't at any cost. You can give Me flowers, this, that, all right, but no money at all. I don't want to know about money at all, it's a headache.

In the same way, we do not realise that having relationships, brother, sister or son, this and that, is another big headache. That doesn't mean that you should start beating them, but people can sell their country for the sake of their children. It's a very dangerous thing, horrible, that kind of an attachment, the mamatva [sense of ownership].

This is my son, finished. If he's your son then you can murder anyone you feel like, you can do what you like because he is your son. He is not somebody's son whom you are murdering? This mamatva that comes, “My husband." Specially our Indian women. “My husband" immediately starts problem.

All this comes out of ignorance. Of course, love has to be there. But love never gives you attachment, because it is wise, it is wisdom. Supposing in a tree the sap of the tree goes and gets fixed in one fruit because it loves. “It's mine." Then what happens to the rest of the tree? It dies and that fruit also dies.

So this mamatva has to go out. But by telling it will not go, by just advising it will not go. Even if you suffer, I have seen so many people coming to Me, “My own father deceived me. My own son deceived me." I said, “Which one is your own? The one who deceived you is not your own." “My husband." There are some ladies who eat My head out of their husbands. “My husband did this, my husband did this, my husband did this." Baba, why don't you hit him hard and finish with it? But it's so much accepted, this mamatva, this attachment. Attachment to money, attachment to people, attachment to this is nothing but a hook which hooks you to baser levels. You have to rise above and then you really enjoy the beauty of richness. As I told you the other day, I see all beautiful things. It's nice I don't possess them. See now these carpets are spread here. If they were Mine, I should worry, “Oh God, now I hope they are not going to be spoilt. I hope nobody sits on them. I hope they are insured, so nobody runs away with that." But when they don't belong to Me, I'm enjoying them better. Other people's things is a better idea.

This myth carries us to such an extent of stupidity that sometimes I feel whether these human beings are human beings, or they are their possessions. Their Spirit is lost, everything is lost, they're not bothered.

But if their little position is lost, they weep and wail, as if they are dead, their forefathers are dead hundred times.

But people like Me are just batchas, emperors. They are not bothered. To them comfort cannot capture, they don't need any comfort. If you have comfort it crawls upon you, it makes you a slave, too.

If you seek comfort you are in for enslavement, take it from Me. Any kind of comfort. It's only human beings who can become really so crazy. No animal can become.

There is another type of a comfort, is that a mental idea that everybody must appreciate and that you should be able to overpower others. This also comes I think from Nābhī Chakra. Is a kind of a feeling that you should be able to overpower many people, they should look at you.

These days in London there are women who are suffering from a funny disease called anorexia, where they just don't eat. Women just don't eat because they should be thin and skinny. For what? For what you should be thin and skinny? Because you look attractive, but for what? I don't think skinny people look attractive by any chance. Horrible they are. They create only pity and you feel repulsive about the whole stuff.

Once a beauty queen came to see Me. I thought she was a TB patient. And I said, “You look all right but it seems you are a TB patient." She said, “No Mother, I've got a beauty prize." “Yes? Who were the people? Doctors must have given it because they want some patients there." This is the trouble, we go out of the way to trouble our Nābhī, not to eat your food, fasting. If you want to fast this life, next life you will not have any food. Thank you very much. No food. Fasting? All right, you'll have a

permanent fasting. What do you say? You don't have to do any fasting. Why do you want to fast? And even if you want to fast because you want to change the timing or maybe for your health's sake, it's all right. But why in the name of God you want to malign Me? You have got everything to eat and you don't want to eat. Those who have got food to eat, they don't want to eat. Next life they become poor and then they blame the rich.

But in last life you'd been wanted to fast, so this life you are not given any food, because you asked for it.

And that is how also the Nābhī Chakra gets you twisted, when you fast like mad. There is no need to fast in the name of God. God has given you all the wealth, all the beauty, all the love. Actually in Sahaja Yoga if you fast in My name, I think it's horrible because if you want to trouble your Mother or to make Her uneasy, or to take a revenge on Her, then you say, “Mother, I'm not going to eat my food." Then Mother is finished. That's the best way to conquer Her. To say, “Mother I'm not going to eat my food." So this kind of a mad fasting is also very bad for your Nābhī and when you do that then you have a problem because you are invaded by your left-sided, what you call, beyond the Iḍā Nāḍī, you have the collective subconscious; and you are invaded by them. And you are in for trouble, physically, mentally, emotionally.

And mostly those people who fast are very hot tempered. The day they are fasting day is there, never go near them. Because they are already planning what they are going to eat. And in the morning they plan and they don't get it, so they are very angry for that part.

All these aSahaja things are not going to help you. You have to be normal people. You don't have to put up into tension yourself for Sahaja Yoga, nothing. Be normal. Be nice people. Don't torture yourself.

That is one point on the Nābhī on the left hand side and on the right hand side: don't get into indulgences.

Don't pamper yourself.

Both things are the same for Sahaja Yoga. Whether you starve or you overeat, is the same. There is no difference between the two, because if you are not on the seat, whether you are on the left falling on the right, does it make any difference? So to be on the seat is to be in the blessings of Śhrī Lakṣhmī. And I have described to you how Śhrī Lakṣhmī is a lady and in Her left hand She has got two lotuses and the right, one lotus and right hand another lotus on top, which shows a person who is balancing. She's balancing on a lotus. Imagine. She's standing on a lotus. That means She is balancing. And She's balancing, She's standing there and She is holding two lotuses in Her hand showing that She's like a lotus.

A person who is a rich man, Lakṣhmī Pati, has to be like a lotus, warm, pink, warm. And even a horrible thing, like wasp-like thing. I don't know what you call it in English, you don't have that black thing. We have a very black wasp, you see, which is hard, hard like nut and has angular thorny legs. That black thing comes in and is good for nothing, but it comes in for the residence, for the ashraya, the lotus keeps it on top of it's corolla, which is a very, very soft thing, with all love. And in the night it closes down so that the poor insect who is just like a nut should not get any trouble from the outside weather. Like

a mother who takes the child in the armchair, that love should be there for a Lakṣhmī Pati. How many are Lakṣhmī Pati's like that? Have you seen any? If they see somebody who is coming with money propositions, then they may open their doors. Otherwise, they have no love for anybody. For those who come for their ashrayas, for their help, they are not there.

On the other side are the people who are so repulsive. They are not like lotus. There is no fragrance.

They are such miserly people that they stink of miserliness. While the lotus gives its fragrance through that mud, to that horrible thing that even the little worms which crawl upon those lotus petals smell of this beautiful fragrance. This is what it has to be. It has to give. It has to be beautiful. It has to be cosy.

It has to be welcoming.

Then another hand is giving. The Lakṣhmī is always giving. She doesn't receive; She just gives. If you are really a Lakṣhmī Pati you don't want to have anything from anyone. You don't receive. If you are really rich, who can enrich you more? What can you give to a person who is fully rich? There is no way of entering into it now it's all up to the brim. He's rich up to the brim. Then what do you give? You cannot give anything. But where you have to give means that he's a beggar, he's still a beggar. All of these so-called rich people who still are hankering money are still beggars, they are not rich. They may think themselves. Empty vessels, but they are not rich because they are still expecting money.

So, it is important that we should understand, the money is not the way. Money takes us away from Dharma. It

takes us away from God. It takes us away from reality. It covers our eyes. We don't think that we have to follow a path of righteousness and of virtue because we think we are rich, God is going to be afraid of us. We can even purchase Him and can manage Him by giving some bribes. That's not so.

You must face yourself. You have to face yourself. That it's not the money that's going to give you that elation, that higher life, but it is the love of God, the honesty of seeking, honesty.

That is the quality of this Chakra is the Satya, Viṣhṇu, is the Satya. He's the Nārāyaṇa. Nārāyaṇa means Satya.

So there cannot be Satya Nārāyaṇ, isn't it? Nārāyan.

is Satya, then how can there be Satya Nārāyaṇ? But we have many Satya Nārāyaṇa Pūjās. For all these Satya Nārāyaṇas, Sahaja Yogis are not supposed to go. They can only go to Nārāyaṇa Pūjā because Satya Nārāyaṇa is that path which is added to it for camouaging, is meant for these horrible Brahmins who make you pay. For what? Sahaja Yogis are not allowed to go to Satya Nārāyaṇa Pūjā. They can have Nārāyaṇa Pūjā. And what is Nārāyaṇa ultimately becomes? In the Nābhī Chakra Nārāyaṇa existed since He was created by the Devī.

And It looks after the seeking, the nourishing of the seeking like a father and then It incarnates again and again and again to help our seeking to a higher position and a higher position till it reaches a point where you start seeking God Almighty.

Then you jump into the Shakti of Mahālakṣhmī. Then you are in the hands of Mahālakṣhmī Shakti.

Means Lakṣhmī evolves into Mahālakṣhmī principle.

Now this Mahālakṣhmī principle resides in the central path of Suṣhumnā. And this central path of Suṣhumnā is to be established fully and awakened when the Kuṇḍalinī rises. When the Kuṇḍalinī does not rise, this path is kept absolutely black. It is absolutely black, there is nothing in it except for the deities who are lying without any light. When the Kuṇḍalinī rises, then only these deities get awakened and when they get awakened this Suṣhumnā path, this central path of Mahālakṣhmī starts acting as the balancing power, to begin with at the Nābhī Chakra.

So Nābhī Chakra is surrounded by ten Gurus, the Prophets who give you the balance, who come on this earth again and again to give you balance in life. They tell you, “Don't do this, don't do that." But we don't listen, we don't accept it.

We may say that we follow such Guru, such Guru. Like, you know Muslims are. They say, “We follow Mohammed Sahib." Now if Mohammed Sahib has said anything it is that don't drink, is the thing he said.

But I've yet to come across a Muslim who doesn't drink. They may not drink in Riyadh because they'll be killed there. But if they come to London, they drink. Actually, when My husband went to Saudi Arabia they said, “You are the only Muslim we have ever come across." It's true. Whatever is said to them, they do just the opposite of that. At that time there were no cigarettes, no tobaccos, so He didn't say about that so they have found a loophole. Muslims smoke, doesn't matter, because Mohammed Sahib never said.

Mohammed Sahib had to take another birth to come as Guru Nanaka to tell them, “Oh, God. Now you are smoking this horrible thing has come, now you don't smoke." But who will accept that Nanaka and Mohammed Sahib were the same people? No difference. Same thing it was. We can prove it in Sahaja Yoga. We can prove it, how important it is that we should know that they were all the same and that they stood for the same thing, but at a period.

Now today you have got ganja, I don't know the names also of all these things what you drink and smoke, God knows what. Human beings are really clever to get everything that can destroy you. It's like, call a bull, `Come and hit me.' It's like that. If there's not a bull then you'll like ask a buffalo, `Come and hit me.' Now there's no buffalo, all right, you ask an elephant, `Come and stampede me.' It's like that.

Human beings are so stupid.

So now supposing, I say if I write down a list of all the thing you drink and smoke, I don't know how many things there are in this world, then you'll find out the third thing when I die, that “Mātājī didn't say this one." So we should do it. Very intelligent. All the time destroying your central path and nicely managing through that. Is this the way are you going to go to God by any chance? Is this the way are you following the great incarnations who came on this earth? So the balancing comes through Nābhī and Nābhī looks after you and teaches you how to behave. For example, now your left Nābhī is Gṛuhalakṣhmī. GṛuhaLakṣhmī is the Deity of the household.

But if you have too much outward type, you're running a madness.

So early in the morning you get up, read the newspapers. Is against Sahaja Yoga again. Not to read newspapers in the morning time. You can read it in the night, but not in the morning. Because if you read it in the morning, you'll get upset.

And poor this spleen has to pour in more red blood corpuscles and it becomes mad and fails you.

On the contrary, in the morning talk to your wife, talk to your children, look after your Gṛuhalakṣhmī Tattwa. The wife also has to be a Gṛuhalakṣhmī as I told you.

Then you have your food properly. Sit down and eat properly. But no, just after that, upsetting that Nābhī, you jump into your car, taking your breakfast in your hand, eating on the way, honking at people, getting angry with them, the wife is calling, “Come along you have your breakfast!" Nothing doing. You are on your way on a special work, you end up with leukemia at least, minimum of minimum, if not with heart attack.

Leukemia comes from left Nābhī, when your Gṛuhalakṣhmī is ruined. The Deity of Gṛuhalakṣhmī is Fātimabai, the daughter of Mohammed Sahib, while the sister of Nanak Sahib is on the left Viśhuddhi.

You'll see that. Nanaki.

Now this aspect of life we never think about. When you get leukemia, then you'll come to Mother, “Please cure me." And if you are rich, you will see to it that I cure that person. If I don't cure you will sit on My head. You'll be in tempers on My head unless and until I cure your

leukemia. But if I tell you, “My son, you take it easy, life is not for getting wretchedness out of you. What have you gained out of all this running about? Nothing. But this horrible left Nābhī by which you are suffering, your family people are suffering. Only person who has gained is the doctor or the doctors or the hospitals." They won't listen.

And you know leukemia is such a fast developing disease of cancer that one can pass out within one month, doctors will tell you, at the most you'll live for one month, that's all. They'll take all the money to give this certificate, very nicely. But why have that? Be patient with yourself. Be kind to your Nābhī, look after your Gṛuhalakṣhmī.

All kinds of diseases of the stomach come from this imbalance this way or that. All these great Gurus came on this earth to give us balance, to teach us balance and tell us, “Don't do this and don't do that." All the Ten Commandments. But to us these Ten Commandment have no meaning.

Now I'll touch a point which is very important today for you people to understand about nonvegetarianism and vegetarianism. Because this subject I wanted to handle, because if they are vegetarians they can't bear to see that Mother says it doesn't matter if you are a non-vegetarian, because it doesn't go against your awareness. It does not. But drinking does. Drinking does go against your awareness. But not eating meat or not eating meat. But one has to understand. Now somebody told Me that in Gītā it is written that those who eat meat are Tamo Guṇis. I am surprised at Gītā itself. Because

Śhrī Kṛiṣhṇa Himself in the very beginning, has told Arjuna that you should go all out to kill all these people, even your relations, kill, actually kill human beings. Your relations and your Guru also is to be killed, because I have already killed. Nothing is going to be killed by you because they are already killed. And He gives so many explanations that it should not be done, but He said, “No, I tell you, you have to go and kill. Surrender yourself to Me and I'll take care of them." So how did He preach this, I just don't understand, in Gītā. Now this seems to be a new introduction that the people who eat [meat] are Tamo Guṇis. They are not, they are never. They are Rajo Guṇis.

If you eat meat you become Rajo Guṇis not Tamo Guṇis. Tamo Guṇis are the people who eat carbohydrates, we have seen it in Sahaja Yoga.

We have two types of diseases, one is lethargic organs and one is active organs.

So those who are lethargic having too much carbohydrates and those who are overactive are having too much proteins in them. I mean if you take proteins, in the science, scientifically, will you become lethargic? I mean ask any doctor.

And then the doctor says Gītā is all humbug because it doesn't understand what it is saying. And while you say like this that “We must follow Gītā." I think somebody has gone wrong there and has written something wrong in Gītā as they have written in Bible, they have written in every book.

I'll tell you what they have written wrong in Bible later on when it comes to Christ. I think just some people have put it there for oppose.

If you eat too much meat you get Raj Guṇis and Raj Guṇis become as I have told you right-sided people, become very aggressive and they become ahaṁkāris and they can harm.

But the people who just eat grass can become lethargic, absolutely lethargic.

They will have lethargic heart if not active one, they will also get heart attack. They will have lethargic intestines by which they will get tremendous all the time passing out of the stools, they'll never be able to digest any food, they'll be very weak people.

So those people who have a lethargic heart or a lethargic liver or lethargic intestines should take to proteins. I'm not saying meats, but proteins. But a vegetarian doesn't take so much proteins. It's easier to take meat, there's no harm. But those who are active people should take more to vegetables. It's sensible. Guru Nanaka ate all the meats, was he a bad man? These Mārwadis who are supposed to be absolutely abstaining from even from lahasoon [garlic] and pyaj [onion].

Was He worse than them by any chance? What about Buddha, Himself? He ate meat because He died of eating raw meat, Himself.

Only thing you should not eat the meat of animals which are bigger than you and not of a cow which is an Indian cow. Specially Indian cow. Also bigger cows are not good because they give you a problem on the teeth. But smaller animals, even with Jainism they said that you

must save the bullocks, the cows and you must save other animals, but they never said you must save goats and you must save chickens.

Because Mahāvīra knew we cannot give Realisation to chickens. What is the use of saving chickens and mosquitoes and also bugs? Of course they are doing like that.

Some Jain people save bugs and put it on a human being and they take the blood of those human beings and they are paid for it. It's absurd but they do it. For them bugs are more important than human beings. Billions and billions of bugs cannot make a human being.

All these absurd ideas we have in this country.

So when I say you are not to be a vegetarian or non-vegetarian, you have to see what you need and eat that.

But all the time your attention is in food itself is wrong.

So there is no good in you people getting into these problems of vegetarianism and non-vegetarianism. Of course in the Western countries people should take to vegetarian food, not absolutely, but more than what they have, while the people who are in India who are vegetarians will have to later on take to meat. Otherwise they will have lethargic heart. I'll cure them once again they will have problem, then they will have to go for a bypass. Save money there? You cannot.

You will have lethargic intestines, then you will have lethargic liver. You will have all kinds of cirrhosis, or maybe on the hand you might get all kinds of rashes and things like that, allergies, all these problems will come.

And then ultimately such people look so peaceful because you see, they are like cabbages.

Yes. If somebody is like a cabbage then how do you give him Realisation? You can't give Realisation to cabbages can you? We have to have here chivalrous people, brave people, warriors. You have to fight the evil forces and what can these people who are cabbages going to do for it? One has to understand the heart, the reality and not put your conception. Because you are born in a Jain family and that's why you want everybody to eat grass, is wrong. The one who has to eat protein must eat protein.

Now what is the food for Sattvik people? You can't live with it.

So what I eat? Channa. Can you live with channa? Is fruit. Channa, or you can eat meat. But not very heavy meats, lean meats and ghee and what I eat the most is honey. That's My food. Honey I eat, you know that, honey I drink. But you can't live with that can you? So you have to eat little carbohydrates. Doesn't matter, but you balance yourself in Nābhī Chakra.

But there should be no attention on food at all. Actually if you ask Me what I ate in the morning, I won't be able to tell you. Really I'm very bad because I have no attention on it. Whatever one gets, eat it and you don't feel like eating, don't eat.

What's so important is to enjoy every moment of your life. If a person is finicky about food, specially Indians are, is very dangerous for Nābhī Chakra.

Because those who are mad after food and about Nābhī Chakra are extremely hot-tempered, I think. I don't know what the word in English is but in Hindi we call it

chichode, irritable and these chichode will make their wives' lives miserable. They will come and tell, “In that house I ate very good curry nuts." So that poor lady is running after the curry nuts.

We Indians are so much food-minded. You can't imagine, they won't believe we are supposed to be starving people.

But we are so food-minded that once there was for these Bengalis, supposed to be Mukha Bengalis, I must tell you about them. They had raw fish which they get it from the Central India and people couldn't get fish so they were starving.

So Bombay [Mumbai] people very graciously sent one shipload, because I know that, I was part of it, to them as a gracious act that let the Bengalis eat the fish.

They said, “What? We are not going to eat sea fish, we are Bangladeshis." Threw all the fishes in the sea. It all become sardana [rotten] and it was thrown into the sea. Can you imagine? Nobody will believe in the West, this is how we are fasting and that is how we are poor people.

Can poor people afford to throw away one shipload of fish in the sea because they want *[UNCLEAR* raw/roe] fish? We are so food-minded that our Nābhīs are always like this. And our women are to be blamed because they know to control their husbands, they are spoilt.

The job of a woman is to be a Gṛuhalakṣhmī. To have ideals before the family, ideals before husband, ideals before the children. The house should be ideal, should be a warm house where everybody's welcome.

The wife's job is to keep her Nābhī all right, the Nābhī of the children all right and the Nābhī of the husband and Nābhī of all the people who come to her house. She has to lead a life of auspiciousness, of kindliness, of religious nature. She has to be a soft-natured woman. But this is all missing, only thing she is worried with, how to please the husbands. Because that's one of the big jobs for her.

So to keep our Nābhī all right we have to understand as Sahaja Yogis that we have not to pay so much attention to food. That doesn't mean you eat all dirty food. But it definitely means that when you eat your food, you must see the vibrations of the food. You must always give vibrations to the food. Eat the food which is vibrated.

Certain foods, now supposing if I have to go and eat in any one of these big five star hotels, next moment I vomit, I always vomit. If somebody invites Me in a hotel, I start thinking, “Baba, now what an ordeal." Because it is not cooked with love.

That's what it says [Marathi], “He likes the little berries of Shabari." [Marathi.] That means the love that is expressed in that food is what we should care for and not for the lavishness, not for the show of it and not at all for your own taste, but the taste of food should be that it should carry love. Let your tongue feel the love. That is the best taste and whatever is cooked with love always tastes very well.

So when you cook, cook with love. When you eat, eat with love. With kind words to the person who has cooked with love and above all, count your blessings, count your blessings and think of others who may not have had food today.

This is the Lakṣhmī Tattwa, is where the hand is like this, where it gives and there's a hand where it gives protection to people who need money. But not in a way we do it, the way Americans do or Russians do it. We do the way Lakṣhmī does, that this protection does not get out of hand. You give it without telling anyone. Just because you have to give you give and actually you do that. If you have given, as My father said, one rupee to someone, run away from that person as soon as possible with the speed of one mile, he said. But if you have given five rupees, run away from him at the speed of 500 miles. It's very practical. That is how we have to give.

This is the Lakṣhmī Tattwa, is the Nābhī Chakra about which I have told you. It's a very important Chakra, because today you are here because in your Chakra, Mahālakṣhmī Tattwa was awakened because you wanted to seek God. Because you wanted to come to God. You have not come here for money. You have not come here for anything else but God. Your seeking is in God. You want to know the truth about God and you want to have God. You don't want to put your ideas on to this, but you want to see how Mother wants us to receive the blessings of God.

So become that as we seek the love of God, the grace of God.

The Lakṣhmī has to be gracious and the Mahālakṣhmī is the One who is the gracious lady, is the graciousness in you. The grace that must come evolved into your personality. Within that grace he feels the hankering of the Father. The Father, the Nārāyaṇa. He wants to have His blessings and that is how the first, the truth, the

seeking of the truth rises in you and that is how the honesty of seeking is blessed when the Kuṇḍalinī rises. She first gives you, first thing that you get is the truth, by enlightening your brain.

When I will tell you about Sahasrāra and about Āgñyā, I will tell you how this brain becomes a receptor of the ultimate truth, how truth is spread, you start receiving the knowledge of absolute truth. How this brain when enlightened gives you the power to know what is truth and what is not truth and there are no alternatives.

This I'll tell you later on when the Kuṇḍalinī I'll describe at the brain level. But for today I think Nābhī Chakra is very good.

For all of us, for India specially, our Nābhī Chakra is very important, that we should know that God Almighty, the Nārāyaṇa, the Viṣhṇu, is the One who gives the kshema after Yoga. He says, “Yogakshemam vahāmyaham” He gives the kshema.

And we are sinning against the God when we don't believe that honest and virtuous and righteous life will give us the kshema as promised by God Almighty. You are sinning against our Father, while in the West they are sinning against the Mother on the left hand side, because they have forgotten that immoral life is an insult to the Mother Power of God.

So both things are important, whether in the West or East, is important that we should not sin against the Father and sin against the Mother.

I hope I've tried to tell you everything in such a way that you do not feel hurt. Because all of you come from different, different types of lives; different, different

conceptions; different, different Gurus and you can get confused about it.

So, in Sahaja Yoga you should allow this to work out. Allow the light to come in and don't get confused, don't get upset. Here you are to seek God and not to sit on what you have known so far, or which you have heard so far, or whatever you have found. Because that has not given you anything whatsoever. Like one of My disciples who's a big officer and one day he told Me, “Mother, I don't know about Gītā, I don't know about Rāma, Kṛiṣhṇa, anyone. I know You, because You are the One who has given me Realisation." Of course after knowing Me you will know all of them. But it is better you know Me now, because Those are no more here. It is I Who is sitting here, so better know Me first and then you will know Them better than what you have known Them before.

So let us compromise in this point: that try to understand it through Sahaja Yoga. Everything can be proved. Whatever I have said is absolute truth, nothing but the truth. But you allow yourself not to be bound by any previous ideas and previous conceptions. But let it be open mind to see what I've said, it's just a hypothesis, let it become a law.

When you see it yourself, when it becomes in your heart, on the vibrations, when you see and judge what I've said, you'll be amazed that Nābhī Chakra which you feel on these fingers, even the children can tell.

May God bless you all! Thank you.

Tomorrow I'll tell you about other Chakra called the Chakra of the Devī, Herself. If there are any questions, I've told you, you better write it down. It's always worked

out very well. I think now we should go in for meditation and try to get your Realisation.

Will you please put your hands towards Me, like this, just in humble way. Because you have not known so far and you will know it when you will know it: So you put your hands towards Me like this and as I've told you these are five Chakras, sixth and seventh Chakra is here is on our hands. I must tell you today I met some Kashmiri Muslims, that's a good idea. Suddenly they did feel for Me something. I don't know how. And they said, `Are You the Mother?" I said, “Yes, I am." They came to Me and then said that “You must tell us about Rūh, about spiritual life, about Spirit." They came to Me. I said, “All right, you put your hands towards Me like this." They put their hands towards Me and they felt the Cool Breeze. And they said, “This is what it is.

Mohammed has said that your hands will speak. This is it. That's the truth." I said, “Yes, when you have your second birth, you'll be rid of all the nonsense of these so-called religions which are separating you. They were never meant to be separated, they were meant to integrate you. But you have done it, doesn't matter. Now by God's grace Sahaja Yoga has come, you'll have second birth.

So all the things that are attached to your birth will be finished and you'll be a new person having a new life in which you forget all that is attacking you, is attached to you, which is dragging you, which is making you think, think, think but not ascend." I'm very happy, these simple Muslims who met Me, they were in a shop selling something and they were so sweet and so beautiful. They

didn't say that `You are not Mohammed.' Nothing of the kind.

They said, “This is what Mohammed has said, that `At the time of the Resurrection, your hands will speak,' and what are these people fighting for?" You see. This is what it is.

May God bless you all! Let us have now both the hands towards Me and just close your eyes.

[Shri Mataji gives Realisation.]

***Contents: 1983-02-01*, Public Program, Heart: the Chakra of the Goddess, N.D.M.C. Park, Hanumān Road, New Delhi, India**

Today again I must thank Mister Swanowaphala for singing such a beautiful song about the Devī. I was very much impressed the way Patrick told you that they are confident that they can solve any problem.

That's what it has to be. That's the sign of a Sahaja Yogi who has reached a very great height in his understanding about himself and about others.

The Chakra of the Goddess lies behind the sternum bone in the spinal cord. This Chakra is placed above the Bhava-sāgara, above the Void, as we call it in Sahaja Yoga. And the bridge that has to be crossed by the bhaktas, by the seekers, is guarded by. She's the one, She helps Her children to come through that passage when there are negative forces trying to attack on a seeker.

This Chakra is placed at the back of the sternum bone as I told you. In childhood, the antibodies are formed in the sternum bone. They are the warriors or the Sainikas of

the Devī. Until the age of twelve years they grow and multiply and ultimately they all get distributed all over the body and a human being is made able to face any outside invasion on him. These antibodies know how to fight. They are extremely confident and they know who are their enemies. They've all these messages built in themselves.

So when the anti-God element enters into the being through any process, say, through food, through words, through action, through devilish people, or black magic, these antibodies combine together, collectively fight the invaders.

Those who do not have their central Heart properly developed suffer from tremendous insecurity all their lives. When they are children, you try to control them by frightening. These children later on become extremely insecure. They are afraid of darkness, they are afraid of night.

Some of them are afraid of everything. Because the antibodies that are built in the body are not sufficient in number and being this center so weak, the person feels extremely insecure. Later on in life when the child goes to the school or he tries to work out something for the future, then also his confidence can be shaken by parents, teachers and outside people.

So it is very important to understand children who are growing.

In the West they analyze everything and try to put human beings into compartments. First the child, is a child according to them, child has no innocence and he's extremely selfish. Second part is adolescence, which they

think is a very arbitrary, moody stuff. In India, we do not know that there is something like adolescence. Now these adolescent people form a group and they start criticising or making fun of all the elders. At a very young age it starts. First they make fun of the teachers, then of the parents, then of all the people who are senior to them. They start becoming extremely active in their brains because they see too many televisions and things like that and then they start behaving at a very young age in such violent ways that one cannot imagine.

I used to live about twenty-five miles away from London. And every time I would go to London, I would find some children doing some sort of a mischief, somewhere. One day some of them entered into My compartment and they started pulling out all the covers, thrusting their knives into the seats, opening out all the upholstery. I was just sitting and watching.

So I said, “Now are you tired? Please sit down. What's the problem?" They said, “We are all very angry." I said, “For what? Why are you angry?" Said, “We are just angry." I said, “But you have to be angry for something." They were children going to good schools definitely, wearing very good clothes. And then I had to, when the train stopped, I called the ticket collector and told him that these boys have been doing all this hooliganic, hooliganism in the compartment and you better look at it. And he came in and he said, “this is a common thing" and then somehow or other he took them out.

But the only thing I felt about them is, that all of them had their Center Heart catching. On the Kuṇḍalinī, they were catching their center Heart. But when they saw Me,

they sat down. They were quiet, they listened to Me. I settled their center Heart. And most of them said, “We are angry with our mother." “Why?" “Because our brothers are angry." “But why your brothers are angry?" Then I discovered that Freud has given these funny ideas against the mother. Mother itself, can you imagine! What a anti-God activity it is.

To an Indian, Mother is the primal thing, any Indian. Because his sense of security lies in the mother.

Even if the father is hot-tempered, is angry, still they depend on the mother. Because mother knows when to get angry and when not to get angry. She has the discrimination. And she is the one who protects them.

The idea of Mother is completely blasted in the West and this is the reason why the children of that country feel so insecure and when they grow, they are extremely insecure. You won't believe that all the time they are polishing their brass, cleaning their house, but not even a rat enters their houses. And if they have to talk to someone, they'll make a person stand outside and talk from inside, specially in London, because they are literally frightened. Nobody will believe, the British who ruled us, are such frightened people. But they are. They are frightened of each other, they are frightened of themselves. The reason is, the Center Heart is absolutely weak.

I've told you the first reason, the family insecurities. The child does not know when he comes back from school, whether his mother would be there or she would be gone. They don't have mothers who can bear a lot from the husbands and smile and show no signs of their agony

to their children. But the mothers in that country, I've seen, always try to use their children from all kinds of emotional blackmail, you can call it. They try to torture the child by telling all the things the husband is doing to them and whatever is the problem they are facing with the husbands.

So the child is not secured by the mother, but, on the contrary, child starts giving security to mother there. At a very young age it starts and the child becomes extremely negative and left-sided. He feels that he's born in a place full of hatred, insecurity and fear.

When the bhaktas are born in those countries, they are also the same way. Because they think if they have to go to a Guru, the Guru, as known so far, tortures them or extracts all the money, takes their pareekshā [tests] and he sometimes leaves them high and dry on the streets.

But in our country the Goddess has taken Incarnation many a times. Thousands time She has taken here Her birth, whenever the bhaktas called Her, when they are pestered by the negative force, She came on this Earth to save them. These things used to be just accepted by people, but never were really accepted in their hearts. People thought these are some sorts of mythological stories that the Goddess came on this Earth and She tried to save the people. They could not believe that there could be a Shakti who could be born, who could fight these horrible Rākshasas and kill them and save Her children, Her bhaktas, from agony. It was too much.

But today in Sahaja Yoga, you have seen that when Kuṇḍalinī rises and stops at the center Nābhī [Heart], you have to say the mantra of `Jagadambā' and the Kuṇḍalinī

rises. That means, She resides in the Center Heart and when She is being worshipped, the Kuṇḍalinī rises. This center has got twelve petals. But the Goddess has thousand hands and thousand eyes. She has 16,000 Nāḍīs to work out Her different aspects of enlightenment. But the first thing She has to do, through Her generosity and kindness and compassion and patience, She has to suck in the sins, the Pāpavimochini. The sins of human beings.

One of the sentences in Bible was, “Wages of fear is sin." Or you can put it the other way round, “The wages of sin is fear." If you have fear, you are committing a sin against your Self and against God. Because, if Mother is Almighty and She can solve all your problems, you are under Her protection, then why should you have any fear? That means you do not believe that She's that powerful. When a person is frightened, this center start breathing fast, giving rhythmic instructions to all the antibodies. With that you feel you are getting a palpitation in the heart. This palpitation is nothing but a signal to all the antibodies to fight the emergency of an attack.

But when somebody builds up insecurity later on in life, it becomes a physical problem. If they have insecurities earlier, it is an emotional problem. But later on in life, when one develops a insecurity, any kind, like a wife is insecure about her husband; husband is a loafer or a bad man and carrying on with other women, so the motherhood of the wife is challenged. And when her motherhood is challenged, she may get the weakening of

this center, by which she may suffer quite a lot and may have even breast cancer.

These insecurities can be also self-made, imaginary. People can just think about it and build up some sort of insecurities, which are of no actual existence.

But such fears are very much more in the West. Because the life in the West has no mooring, has no explanation. Whatever you ask them, they'll say, “What's wrong?" A husband will say, “What's wrong?" in having a keep. And the wife will also say, “All right, if he wants to have a keep, let him have it." In India, no woman would tolerate such a situation. She would starve, she would do everything, but she will never touch a man who has a keep.

So the basis of the strength of Indian women is their sense of chastity. The sense of chastity in the Indian women is so great that nothing can deter them as long as they are chaste. But if they are not chaste, then fear settles in them very fast. Chastity is the strength of women. And that's why those women who have fear, mostly, have a problem of their chastity being challenged. A woman who is frightened that her chastity may be disturbed, also can develop a problem with the Heart Chakra. Such women can develop breast cancers, breathing troubles and other kind of frightening diseases on the emotional level also.

This Chakra is ruined in women when they lose their only child; because their motherhood is finished, they feel. And that is the worst thing that can happen to a woman, if she's a woman. But if she's not a woman, she doesn't feel much and she just behaves in a very manly way. And

that's what I've seen in the West, that women really don't much care when their children die. But it is because they are not women. If you are a woman you definitely feel for your children and their death. But after some time, such a woman comes back again and she accepts the life as it is, for the sake of her husband, or may be if she has more relations or other children. She becomes extremely powerful as a reaction to what has happened to her.

That's only possible if your center of Heart is all right. Such women do not grudge, do not complain, are extremely serene and can bear up lots of things. They are extremely tolerant and can go to any extent to help their children, but they are never spoiling their children. They never spoil their children, because they understand spoiling is much worse than beating the child. They never spoil the children, nor ever pamper them and never get dominated by their children. They know, “I have to guide the child and have to look after the child." So they look after all the ideals and righteousness and the virtues of the child.

And if he tries to get out of it, they go all out to win him over back to virtue and to better life. But those people, those women, who do not care for actual growth of the child, may just avoid it and escape it.

In the men, this Chakra is caught up if they have lost their mother very early, or if their mother by chance is a very cruel woman. Also this Chakra can be caught up by men, if they have been to wars and if they have seen frightful things in the war. Such people could be extremely emotional and could be easily befooled by people who try to win over their emotions.

What is to be done to improve this Chakra? In Sahaja Yoga we have many techniques by which we can improve this Chakra and get your confidence back. As Patrick has said, that he never used to speak.

And I have seen many actors who act very well and when they came to My program, they said, “Mother please don't ask us to speak because we just don't know how to speak. We can act, but we cannot speak to people." They tried once or twice and they ended up with two-three sentences, mumbled down and sat down. I found out all of them had this Chakra very badly damaged. Perhaps they lacked the love of their mothers, perhaps they did not love their mothers, or perhaps, may be that they did not understand the value of virginity in women.

So those men, who try to look at every woman who passes by, those men who try to have lusty eyes, can also develop this center very badly. And lots of problems can come through this center.

One of the problems that comes through this could be lung cancer. But I've seen this center is very badly affected also by certain negligence in life. Like some people have a habit of having a very hot bath and then coming out of that hot bath and enter into some cool place. Such people will catch this center very badly and they will have a problem. Then there's another thing, which is looks very simple, but many people have a habit in, specially summers, to wear a one single kurta or a single shirt and not the undershirt. This is also not proper. A man must always have something under his shirt, otherwise when it starts perspiring, he can get trouble into this Heart center.

This Heart center is caught up by various emotional problems in human beings. Husband and wife, if they all the time quarrel, there's always quarreling in the house, specially if the mother is very dominating, the child develops this center. And if the father is very dominating, the child develops this, the Heart itself.

So it is very important that husband and wife should never quarrel in the presence of their children.

Now there resides in this center, the incarnation of the Goddess, who came on this Earth thousands of time and She resides there for your protection. But first of all you have to be worthy of Her protection.

When She came on this Earth many a times, you know, Her body was made by various forces, as if She was like a bubble and the bubble was covered by so many things added on to that. And that's how She got lots of things from various Gods. Like Her hair She got from Yama, the God of death; Her nose She got from ah the God of wealth, Kubera; and Her ear She got from the Pavana, that is air. Like that, Her body was made specially by the essences of these great Deities, who donated their essences to the Goddess, to be equipped to do these multifarious activities.

Now the first activity, as I told you, of the Goddess is to save Her children from the negative forces.

So She looks extremely mild, sweet but She can be extremely violent, in the sense, She can kill or crush anyone who tries to overpower Her children. Atisaumya-Atiraudra, these two temperaments exist only in the Goddess, because She is the Mother; and at any cost She wants to save Her child. Also towards Her child when he

goes beyond a point of understanding, when he shows no sense of discipline, then also Goddess can pull him down by certain methods that She adopts.

Now first of all is that She gives all that is needed to remove the fear from the mind of sādhakas.

Secondly, She cures this center by giving birth to additional antibodies in the body. And, by vibrating the tired antibodies to act in a way that they can fight back again.

Even in day-to-day life, She may establish Her existence by showing lots of miracles to Her children.

We had a lady coming to see Me and she was rather late. And when she came back I asked her what was the problem, she said, “No, there was no problem, but my bus fell down about 20-30 feet down and the thing rolled down and fell on the ground with all the four legs intact. And all of us in the bus were saved.

But the driver got upset and he ran away.

So somebody who was ah in the car, who knew how to drive, came down and he start, switched on the car and the car started moving. And we came back then to Bombay [Mumbai]." So, on the way they started asking, “There must be some saint sitting here, otherwise how can we be protected? Only a saint can protect us like this." And she was wearing My ring. “Oh!", they said, “This is Mātājī's disciple." They all started falling at her feet, saying, “Oh! You have saved us, you have saved us." So, there are many miracles that take place in your life. When you see an accident taking place, suddenly you find the accident is over. There was one fellow, was a journalist called Marathe. He and his friend, another

journalist, were coming from Lonavala down and it's a very big sloppy road, ghat and their brakes failed. And the driver said, “Now the brakes have failed and you take God's name." And they started remembering their Mother. And suddenly they saw a big truck coming ahead. They were about to bang onto that, they closed their eyes. And God knows what happened, they opened the eyes and saw the truck was going upward and they were moving forward without any difficulties. And they were amazed how it has happened, as if somebody has lifted their car and put before the truck and they been saved.

And the driver also closed his eyes and took the name of the Mother. It is possible! It has happened with so many people that they do not know how it works out.

So one has to believe that we have the Mother within ourselves, in our heart and if She's awakened, She is going to look after us. She is going to give all the protection that is needed. And there's nothing to be frightened of anything.

But you can imagine, as Patrick has said clearly, that they were quite frightened and I know they are.

Even English language is like that. All the time they'll say, “I am afraid..." “I am afraid I have to go." What is there to be afraid, if you have to go? You better go. “I am afraid, if I am doing", they are all the time jittery like that. And so jittery and when they talk, you know, they are so frightened that sometimes you feel nervous with them, that you you do not know how to approach them, the way they are nervous.

And one of the reasons why they are nervous is that, because they plan too much, think too much, analyze too much and then ego settles down into their brains and ultimately covers the heart. Because their ego covers their heart, they get a fright. Actually it so happens that if you become ego-oriented you start seeing yourself through. Because when you are at a level, you can even see your ego very clearly and then you get frightened of other people, because you think they too also must be having the same type of an ego and you are really frightened of it.

It is very common also, in the East. Now in India, I should say, that supposing you have to go to a government office, be careful. Ah, anybody, even a chaprāsi can shout at you for nothing at all. They develop a system of barking all the time, just go on barking. The reason is they bark at you because they themselves are insecure. A chaprāsi is insecure of his boss, his boss is insecure of his boss, his boss is insecure of his boss, ultimately the minister is afraid of the voters and the voters are afraid of the minister.

It's such a vicious circle.

So the whole system works out into such a terrible insecurity [laughing] that you don't understand what is there to bark at? What is there to shout at? And then a kind of a identification with the falsehood is built up so much that you are no more a human being; you are either a secretary or you are an under secretary or a joint secretary, I do not know who is higher who is lower. And then you have a some other secretaries and then you

have clerks and this and that and that. And you are that, you are nothing else but that.

So because you are that, you must have these horns and you must shout at people, otherwise nobody is going to believe that you are something.

So it is such an identification that develops into human beings, that too, because of this Heart not being developed properly. Because if your Heart is developed properly, then you are a human being. Because you know your Mother has given you the birth and you are a human being. It is there's no need to have any fear from another human being who is also a child of your Mother.

So there has to be no fear about it.

But the trouble is that when human beings ah start wearing anything; supposing they wear a suit, immediately they'll start speaking in English. As soon as they wear pajamas, they start speaking in Hindi language, or, say, dhoti, Hindi language and pajamas, they might start giving gālis [abusing].

So it is a kind of a very superficial identification human beings develop, because there is no depth in the heart. If they had that depth, that mooring in the heart, then they would not develop these superficial things. And as a result of that, they are frightened. Because they know they are superficial, others are superficial, they have got beard, we have got beard.

So they'll quarrel, if I am going to pull his beard, he might pull my beard as well. Such a fear exist among human beings. And then, another thing, another steps come into the minds of the people, that, why not pull his legs to go up? This is the third category of debasement.

If you are the child of the same Mother, how can you go higher than anybody else? You will remain always the child of the Mother. How can you go higher than any other child, in the eyes of Mother? You cannot. On the contrary, if you try to do such tricks, the Mother will punish you.

And this is the second thing that Mother does, is to punish Her children. Yes, She punishes. In very sweet ways first of all. For example, if the child is not eating and troubling, She said, “All right, you don't want to eat, all right, don't eat." That's a very simple way of punishing children. But then She says, “All right you want to have the way you want to have, go ahead." Like I tell them not to do such and such thing, it's not good. For example, I told them that don't ah change the ats just from the beginning and let the all the Sahaja Yogis stay with other Sahaja Yogis.

But the organizers thought, it's better to take the ats, whatever may be the reason. Because [smiling] they are very wise organizers. But, you see, Mother says something very simple, but it has a meaning, one must know. And they arranged it that way.

So, half of the people just protested that, “No, we are going to see stay with some Sahaja Yogis, we want to be with them." So they were accommodating. The others were, British, you know, nowadays are on the other side of the mood. They are very, very tolerant.

And they said, “All right, if we are not arranged, we'll stay in the ats." So they stayed in the ats. But what happened? It rained and rained and rained and rained

and they could not arrange their food even under the ah roof they had built.

So they had to shift, all of them, to other places and all of them had to stay with other Sahaja Yogis, as told by Mother. If they had listened to the Mother, they would have saved some money, as well as they would have saved some trouble and there would have been no problem at all. That's how little tricks here and there are played by Mother just to convince the children that you have been stupid.

Now, there are so many things like that which Mother can play and Her playfulness is very important in life. Because if She is severe with the children, they'll run away. If She's like any other Gurus, the Gurus, the Sat Gurus also, they used to beat their disciples! They used to hang them by a string! You don't know how the Gurus treat their disciples! Some of them take lots of money from their disciples and some of them take lots of ā things from their disciple. They want complete surrendering and they make them subservient. They really torture the lives of their children, of their disciples, we should say! But the Mother doesn't want to do that.

So she plays little tricks here and there and tries to correct the children.

Now I'll give you an example of a Guru, whom I met about five-six years back. He came from Amarnath to a small village, small district place near Bombay [Mumbai], where a Sahaja Yogini was staying. And he sent his disciple, who was staying in that place, to see that Sahaja Yogini. And she he went in and told that, “You see, my Guru is coming and he wants to see Mātājī. And

he has told me that only Ādi Shakti will clear out my Āgñyā Chakra." So she couldn't understand, she said, “What is your Guru doing?" “Oh, God! Don't talk about him” he held his ears. “Don't take his name. Oh! You can't know how, what sort of a person he is" he said. “But why doesn't he open your Āgñyā Chakra? Mother will be coming but, of course, why shouldn't you do that?" He said, “No, no, no, no! He said only She should open, nobody else should open it. And he sent me to this place about five years back, saying that in the sixth year Ādi Shakti will be coming and She'll open your Āgñyā Chakra." Now can you believe it! Poor fellow suffering from that horrid Āgñyā Chakra, was suffering when this Guru had come.

So he came to see Me and he told Me, “Mother, my Guru has come and he wants to see You." So I went to see him. And this Guru was sitting down there with a big temper, you see, the nose were all bloating.

Of course, when I went there he touched My feet and everything and then he called one very bad name to this thing, “Did he go, did he touch Your feet? Was he all right? Was he behaving all right?" I said, “He was all right, but I can't understand why did you not open his Āgñyā Chakra!" He said, “Let him go to hell now! I am not going to open his Āgñyā Chakra, who opened my Āgñyā Chakra? Why should I open his Āgñyā Chakra?" So I said, “This is not good. I should open." “Yes, yes, you will, because you are a Mother. I am not a Mother." So he went inside, ah and the disciple told Me, “Mother! He hanged me by legs on top of this well! For three days I was hanging there." I said, “For what? Why did he hang

you there?" You said you said she said, “Don't ask any one." Then he came in, “Yes, yes, I hanged you! Yes, I will, again!" So I said, “Why did you hang him?" “He was smoking. Because he was smoking, I hanged him there. I said, `Now smoke,' and I was putting him down, up and down, I said, `I am smoking you.' " And he tortured him like this. I said, “But why should you do such a horrible thing?" He says, “Otherwise how will you discipline? I am not a Mother. I don't know how to discipline. This is the only way I can discipline him." And he said, “You go on spoiling him, but I am going to discipline him like that." “All right”, I said, “you shut up now, just now don't talk, or by let Me put his Āgñyā right." And I took about two minutes to put his Āgñyā right. I said, “His Āgñyā is all right now." Ah. Then he said, “Did he promise You that he will not smoke?" I said, “He did not." So he said, “You better ask him to promise, otherwise I will not allow him to eat his food for three days." I said, “Ba-ba! This is a horrible Guru! God save this disciple from this Guru." [Laughs.] But, you see, what he was meaning that there should be a discipline in a disciple. There has to be a complete understanding that he is the Guru. But he said, “Look at these people. How are they? They take liberties with You, they trouble You so much, eh they try to be funny with You. Still You don't say anything to them." I said, “I don't have to say. I know how to correct them." So this is the quality of the Mother, who can correct people. She knows who doubts them, She knows who thinks āh who thinks wrong about Her. She knows who thinks rightly about Her. She knows everything. If She knows everything, She doesn't have to worry. She is

completely secure about it and She doesn't have the insecurity of the Guru, that one day the disciple will misbehave or anything, because She knows how to correct.

The other day I met one gentleman, a Sahaja Yogi and he came to Me and he started explaining to Me, “Mother, You don't know, this happened..." I said, “Now, I don't know anything, isn't it? You think I don't know anything?" He said, “Yes Mother, how will You know?" I said I said, “I'll tell you one thing, that you pay play lot of cricket in your childhood until you came to Sahaja Yoga." “Yes, that's true. How do You know?" I said, “That's how I knew." So I know on, then you know. Then he accepted, “All right, You know Mother all about me, I don't know how You know." But She's Avalokiteshwari. She's the one who sees everything. She knows, somehow or the other, She knows. How She knows, that cannot be explained at this stage. But She knows each and everything what you are doing, if She wants to.

And the third quality of a Mother is, that She's a Mahāmāyā. She talks like you, sits like you, ah She'll behave like you, ah everything will be just like you. And you won't be able to make out the depth of this woman, who is a Mahāmāyā because She plays such tricks on you and such thing in such a beautiful way that you cannot make it out. You think that you're all right. You go to a person and you tell anything you feel like about Mother, you try to do anything and ultimately you discover that everything She knows.

And when you discover that, gradually you start understanding that, “When She knows everything about

me, I better be all right." And how does She know? Because She resides in your center Heart. She knows everything what you have been doing, what you are doing, what you're thinking of doing.

So She what does She do? Sankalpa vikalpa karowati, whatever sankalpas you are making, She'll make it fall. If you say, “Now, I have decided, Mother, to do this and I'm going to do it" it will fail. You have to judge yourself as a real son of your Mother.

As in Bombay [Mumbai] or any place we tried to get some land, nobody could get it. “We tried, tried, tried, you see. This is black market money, bribery, corruption." I said, “Nothing doing, I'm not going to do any of those things." So then said, “Then Mother, how are we to achieve it?" I said, “You will achieve it, don't you worry." Then they started saying, “She's not practical, She's this, She's that." And everybody, who said, turned out to be very impractical. “Ultimately”, I said, “When you will be ready for Sahaja Yoga, then you'll get the land and the Ashram." Because once you start an Ashram and have some money there, you'll find all kinds of bhoots will join together and will make fun with the money that has been collected, there won't be any proper arrangement, no proper discipline.

And that is why the time has to be given for children to learn through making errors, through making mistakes and understanding what mistakes we are making and how we have to correct it. Once they start understanding it, then it is very easy, very easy to communicate to them what they are supposed to do, what they have done is wrong and how to correct it. But as long as they

think they are like very wise, as long as they think they are extremely nice people and that they are on their own, Mother says, “All right, go ahead, doesn't matter." Now you must know that Mother has saved people from that Bhava-sāgara with such great difficulty.

It's not easy to do that, it's a tremendous task.

Sometimes to raise the Kuṇḍalinī of thousands of people, I feel like ah a big mountain I have to raise. It's terrible. But people on the whole, who are not yet corrected, think they are obliging Me by taking Realisation. This is a very common feeling with human beings. And I feel like laughing at the stupidity of the ego, that they are obliging Me by taking this ooh Realisation. And the way they talk is all on this terminology, “I came, I was sitting there for three days, I never got Realisation." As if I've done some criminal act.

So the whole attitude of a person gradually changes towards the Mother and he starts thinking that, “She is here for my well being. And my well being is Her only concern about me.

Somehow She'll achieve my Realisation. She's working very hard and I must cooperate. I must learn to cooperate, it is for my heeta, for my good, She's doing it. And I should try to understand that it is for my good." When such an attitude is developed, it is much easier to establish a disciple.

But this disciple is different from a son or a daughter. Because Mother is a Guru, no doubt, Mother is a Guru from the very beginning you are born. But for a Mother, it is very difficult to be as harsh as these Guru are. Not at all, nowhere near them. One cannot beat them in the

harshness. But it is for you, in your own wisdom, to understand how to behave, how to ask for Realisation, how to change your attitude. Because if you think too much of yourself and you try to show off, She'll say, “Yes, yes, you are very great, really you are very, very great, you know” till you suddenly discover that you have developed two big horns your head and now you are good for nothing. Then She will say, “All right, now come along, you have developed this disease, I'll put you right." So better not do all those things.

On one side She is willing to go all out to save you from all troubles. Like, supposing you have some heart trouble, if you have some any other trouble, She'll go all out to save you. It's not easy to cure anybody's heart. People think that Mother has cured us, so it is all right, take it for granted. It's not so.

When you get Sahaja Yoga, you'll be surprised that when you try to cure one person, you'll fall sick for three days. Is not easy to cure. And those people, who cure, sometimes do it through bhoots, also. Those who have bhoots can also cure. Because they themselves are bhoots, what can happen to the bhoots? They cure people but put one bhoot into the patient in such a way that that patient becomes a slave. And such bhootish people can be curer, or faith healers, or anything, like supraconscious, all sorts of people, but when they cure any person, be sure they are putting another serious, more serious problem into. They do not cure you really. They actually are putting some diseases into you, or into the patients, it's a very risky game.

But a Sahaja Yogi, if he tries to cure somebody, because he cannot put somebody else in the vacuum, he gets a problem himself. He's sucked in.

So, My advice is always for every Sahaja Yogi that you should not cure anyone. There is no need for you to cure by touching. You should use My photograph, you can distribute My photograph, tell people how to cure themselves. But don't cure anybody because you will have problems, because you are not a bhoot. And your will be hit hard.

So be careful about it, don't try to cure anyone, only use the photograph. By using the photograph the Śhraddhā will be there, the person will be steady and you'll be all right.

Ah, like yesterday we had some patient here. And some people felt the compassion, you know, for that.

And they all caught up. There was no need to feel compassion. Have you got more compassion than I have? What was the need to bring the patient here? There was no need. But they both got caught up.

So there is no need to bring any patients to Me. That's not the way to behave. Never bring any patient. If there's a patient, leave them alone. Tell them, “Mother will look after you. We have nothing to say. You.

There's a photograph, you must use the photograph, get your treatment done with the photograph and you get cured." Otherwise, first thing that will happen to you, that you'll catch on your center Heart. Because that's not your job. You are not to do that. If you try to do it, actually it is your ego sometimes that makes you think that you should cure a person, sometimes. And when you try to do

through your ego, you get into trouble. Not that you cannot cure. You can. But you have to be of that level, when you try to cure a person you do not become a supraconscious personality, means you do not become ego-oriented. But they do, ultimately, all of them. Those who have tried to cure others and do like that, they have gone out of Sahaja Yoga completely, becoming just mediums. They have become mediums, horrible people. When they talk on the phone, I feel somebody's pouring poison into My ears. They are so horrid, that you can't imagine.

So, it is important for people who get Realisation not to indulge into any curing because they will develop this Center Heart very much.

Center Heart can be developed in countries where there's all fear, people are frightened. It can be developed by other things by which people are frightened. Reading books of bad Gurus and reading the books about shocking things, like many people who read the Kuṇḍalinī's book have got Center Heart [laughing], because they are so frightened about the Kuṇḍalinī! Anything that frightens you if you read can make your heart very, very weak and dangerous.

Now we have two other sides to this center Heart, is the Mother's Heart, is Her own brother, is Viṣhṇu, takes incarnation as Śhrī Rāma on the right Heart. Who, we think is the Father [Mother] who is looking after His children.

So that is the Father and this is the Mother. Though here the Father and the Mother are in two aspects, that the Mother is the ah Sister of the Father. And Father is the

Mama of the disciple of the sādhakas. The Mama is a greater father than a father, as you all know. And so this Uncle who is the incarnation of Śhrī Nārāyana, looks after the protected āh disciples of the Mother. He gives that Father's understanding to the children. Because at this stage, this Father, God Almighty, is not known, who is Shiva.

So this Uncle looks after the children till they are grown up enough to meet their Father. And that is how we can say that Pārvatī, or Umā, or Devī, She comes to Her Mother's place, Māykā and resides in this center Heart. And there Her brother protects Her children. When She gives Realisation to children, or gives them second birth, then this Mama looks after the Sister's children and helps them to build up the security of a father.

So the right side of every human being represents the fatherhood, the Fatherhood. And the Fatherhood of a man is very important. If this center is spoilt, or if there's something wrong with it, then you get asthma as a disease. Asthma is only caused by this center being spoilt or some other combinations with this center. Asthma is very common among girls and boys. And the relationship with the father, or the understanding of the father, or your own fatherhood is not all right, you get this trouble of asthma and for that one has to ask the questions to the sādhakas, what sort of a father you have. As one gentleman came and asked Me, “Why everybody's asking me, what sort of a father you have? What sort of a, everybody asked me, what about your father, what about your father? What has my father to do with me?" Actually everybody feels the right Heart and they have to

ask about the father. Because father resides in the right Heart and the principle of fatherhood, if it is spoilt, if there is a problem with the principle of fatherhood, then you get this problem and many other problems ah which I do not want to discuss now at length.

But you can understand a person who has no father, how diffident he is and how he behaves and also such people, those who have not known a father, can become very wayward, licentious or permissive, or could be very much secretly licentious. The people who lose their father do not have that lacking, a lacking, they lack in that discipline that the father gives them. Or could be, such ah people could take to a very remorse and unhappy life. Or they could be very hard on their children, or could be extremely kind and spoil the children. It could be any way.

So it has of both the reactions, ah either ah too much of love-giving or too much of strictness. It can be anything. Or a person could be ah of this kind, may be very strict in childhood and could be extremely lavish in old age. It's a, it is a very imbalanced personality.

So the person who has no father has to know that his father is Śhrī Rāma. He should not worry about anything. He is the One, with one ah arrow He can kill any number of people.

So he should have no fear, at all, about his father not being there or father being dead or something happening like that. On the contrary, if the father is dead, it's better to tell him not to worry about ah you and that you are all right, so that you leave your father in peace and ask him to take his birth, than to bind him to this earth.

This is the right Heart and the left Heart is the mother, actually your own mother, whosoever it is.

That is the motherhood, in the sense, that if your mother has been extremely unkind and extremely funny, or your relationship with mother is bad, then know that there's something wrong on the left Heart ah which is indicated in you.

So these two points are very important in human beings. If a Sahaja Yogi just decides that, “I have a Father and a Mother; God Almighty is my Father and my Mother" then these problems can be easily solved. But in Sahaja Yoga, it is not what you think that works out, it does not. Like in the car if you sit down and think that, “I am going to Connaught Place” you won't move. You have to move your hands.

In the same way in Sahaja Yoga you have to move your hands. Clear you Chakras, move them higher and put them up. It's not what you think is important in Sahaja Yoga. Not at all. You may think ah that, “I'm doing very well in Sahaja Yoga, I'm very good” but it's not so. It is what you actually achieve, your ascent is the point.

So, as in the car, as I told you, you cannot just sit down and think and do the job. In the same way, you have to run this machine and you have to see that you get all this movement. There should be ghati in you. Otherwise, there is no sense in just talking about Sahaja Yoga, thinking about Sahaja Yoga and eh convincing yourself that you are a great Sahaja Yogi. It is how you manifest it is the point, which very few people understand. Very, very few people understand that it has to be manifesting,

it has to be kāryānvit. It is not just talk, talk, talk, talk, talk, talk morning till evening.

Even when I'm talking, now I'm opening your heart, Heart center. I'm working it. Even I'm talking, also I'm opening. It's working. You will see your Heart Chakra is open by the time I finish My lecture. It is so, because I know how to do it. When I talk I'm just watching where the Chakras are catching, what's happening and I'm catching all these points and touching it and trying to open it.

And that's how it should be, that even when you talk it should be kāryānvit. Even when you are quiet and raising hands it should be kāryānvit. Whatever you do, you should be kāryānvit. Even if you glance at anyone it should be kāryānvit, it should not be just a eh kind of a jabbering that we do sometimes about Sahaja Yoga.

The greatest fear human beings have that they think they have done lots of mistakes and these mistakes are too many and they can never get Realisation, they'll be doomed, they'll be going to hell. This is not true, at all true. Nobody is going to go hell, if they you do not want to. If you want to stop it, you can stop it. The time has come. You are going to be blessed and `blessed for ever.' So may God bless you! Today's lecture I've given you ah in a way that you should understand importance of confidence, but not by saying, `I am confident.' Because when you say outwardly you are actually egoistical. But when you say in your vibrations, then you are confident.

May God bless you all! Today I'm sorry I have to go for a dinner tonight and I won't be able to spend much time today for touching Feet, because yesterday My brother came home for dinner and I reached 11 o'clock, so he

went away without eating food. Again today he's coming so I hope today you'll excuse Me for My brother because, after all I must look after your Mama also sometimes [laughter].

May God bless you! Tomorrow I'll talk to you about Viśhuddhi Chakra, ah which I will start exactly at 6:30. I hope you make it convenient to Me and exactly at 6:30 we start our program tomorrow exactly at 6:30.

[Hindi.] Those who do not obey suffer. You should not. Once I've said it, what is there? Obedience, why is it difficult? Why is it difficult to obey? It is just try and obey and you'll find it, obedience gives you the real confidence, is obedience, just obedience. Just try. Just try to obey. It's very simple. And said today no touching a Feet is all right. For Indians it is difficult, but if in English, if I say, “You touch My Feet" they will not, they say, “Who are You?" [Laughs.] You laugh at them and they laugh at you. That's what it is.

So today you become Englishmen.

Thank you very much.

***Contents: 1983-02-02*, Public Program, The Viśhuddhi Chakra, N.D.M.C.**

Park, Hanumān Road, New Delhi, India

The prophets are born and create a ripple in our consciousness, a new dimension to our understanding to religion, Dharma; which has to be assimilated and has to be understood that, whatever the previous prophets have said, has to be culminated into something else.

So as we can say Mohammed Sahib has said that all these prophets who have come on this earth have

created a new ripple and also has sustained human beings with a newer evolution, a newer foliage opening into them. The idea of human beings of newness is that we have to give up all that is old and we have to become new. Or [perhaps] they think that newness means absolutely a juxtaposition condition in which one has to rise: and this is the cause of the folly of many people in the West as well as in the East.

Whenever a new theme started... like, we can say that, first of all a great saint came on this earth and he found that the people are following the idol worship in a very wrong way. Because it is said in The Bible that: whatever is created by Mother Earth should not be reproduced and worshipped.

So they created another extreme religion out of it saying that nothing should be worshipped! But it is said, “Whatever is reproduced by the Mother Earth." So there are so many such things all over the world which are created by the Mother Earth.

So they should not be worshipped by reproducing them and making images out of them. When such a prophet died saying that, “This should not be done, one should not worship images” the other side of it started, the extreme! Going to the extreme that there should be no worship even if the Mother Earth has created.

So, all the human beings were divided into [different] extreme conditions. One situation comes in where one has to say that, “This should not be done” so people take up that theme and just start building up onto that and saying that, “This should not be done as told by the prophet." Of course, [only] after the death of the

prophet! When the prophet is living nobody listens to him! They all torture him, bother him, do all kinds of things and ultimately they may even kill him.

Then another point is: every prophet is born at a different period of time.

So, depending on the time when he is born, he talks of a particular problem. Say, when Mohammed was born. Mohammed Sahib said very clearly that, “You should not drink." So people said that, “Alright, we will not drink, but we can smoke!" So he had to rectify himself. He'd said, “I am the last who has come” but He found that it is not so.

So He came back again as Nanaka to tell people that, do not smoke also! Like that, the persons, or the group of persons, who follow one incarnation, go to another extreme and try to push down all the traditions [of] all that has come so far, built up. Like cutting the whole tree and [then to] start their own tree, which is artificial. Then the quarrel started when Mohammed Sahib was driven to another level and then Nanaka's disciples were driven to another level where they just thought they have no relationship with each other, which is not Truth.

Afterwards also, you know, so many such things have happened in this world. We can see that [when] any revival starts, people go to the extreme of it and get completely ruined. In Christianity you will find the same thing happened. When Christ came in, whatever problems He faced He talked about them. But the main thing He had to talk about [was] the resurrection, about the ascent. And He talked about the ascent. He talked about the Spirit and in His resurrection He showed that He ascended. But people did not stick to that point. They

never thought that you have to ascend in Christianity. Nobody bothered that you have to ascend. They took small little things from somewhere. Also a person came later on called `Saint' Paul who was not at all with Christ or anything. He started a religion of Christianity which was all absurd, against Christ, anti-Christ.

None of these prophets have discarded any prophet who came before them. Now the problem came in that one has to integrate and Mohammed Sahib knew that a day will come when this integration problem will start and he talked a lot about Sahaja Yoga in the sense he said when the resurrection time will come.

He talked more about resurrection than about doom time, most surprising thing is. About Qiyamah He spoke very little. He spoke really about the resurrection time, because that was the problem. The problem that they face they talk about. I've told you how Buddha talked only about Ātmā sākṣhātkar [Self-realisation] and not about God. Because those people who went to God, or thought of God, or just studied God thought they will be gods themselves! So he said, “You must get your Self-realisation." Then Mahāvīra who talked about the hell where people can go, because that was his job, the part of it and the part of it and the part of it and the part of it. These are the different aspects of human beings which they had to awaken; different aspects.

When Mohammed Sahib started teaching people to do namaz people used to laugh at him. “What is he doing? Why does he want us to put hands like this? Why does he want us to sit down or put our hands on the knees?" Now you understand as Sahaja Yogis what it means: that he

wanted us to improve our Nābhīs first, our Dharma first. All this movement was to jerk out the Kuṇḍalinī. But without Realisation being there namaz would not work out, you may break your knees you may do what you like! But the extremes people catch hold of it and not the reality. And they make a fuss out of it and they make create a big organizations and things and that's how it is spoiled.

So when he said that Allah ho Akbar is to be said with your fingers in your ears, you all say that isn't it? All the Sahaja Yogis say with this finger in their ears, `Allah ho Akbar!' Because you know this is the finger that represents the Viśhuddhi and the Viśhuddhi Chakra's deity, Śhrī Kṛiṣhṇa, becomes the Virāta with Akbar.

So, when you say about Akbar, you have to put your fingers into your ears and you have to say, `Allah ho Akbar!' [The] whole relationship and everything was never understood. For Indians Śhrī Kṛiṣhṇa was their Omkāra, for Western people Christ was their Omkāra, for other people of Arabistan, Mohammed was their Omkāra. How can that be? They are all related to each other.

So, how to relate to each other is a problem of Sahaja Yoga. When they come from different communities and different fixed ideas it's impossible to stir them and tell them that: you are all one! We talk of Hindu Muslim unity for example.

Mohammed Sahib didn't know there were problems like that, but [Guru] Nanaka did say we have come to do Hindu Muslim unity. But in the outside if you do the Hindu Muslim unity or any unity, it doesn't work out. It doesn't work out in the outside relationship. Even your brother

may not be your own brother, if it is working outside. But if the Spirit is awakened within you, then Spirit is the one which is the connection with the Whole, with the Virāta, with the Akbar. When Akbar is to be felt you have to have your Realisation, otherwise you are just talking in the air; you don't know Who is this Akbar. You have to get connected to that Virāta and that Virāta is the Primordial Being.

We are actually not integrated at all because we have different incarnations. Even if you are not absolutely atheist, even if you don't say that you do not believe in God, or believe in something else which is anti-God, even if you believe in God, you believe in God in fragmentations, in His different aspects, but you don't see Him in collectivity. You have to see that He is one God. Everybody says He is one God.

Of course He is one God. I am one person but I am also a housewife, I have to do some work for My household, I am also a sister of somebody, I am also your Mother and mother of My own children and also a grandmother.

So I have so many various aspects of My work which I do. One person has to do it.

When we talk of God as One, we think He is [like the] Rock of Gibraltar, just one piece. Even Rock of Gibraltar, if you go and see it, is not one piece. Anything in this world you cannot say is one piece. It has to be a compound or a mixture of something. Then how can God be just one piece hanging in the air like one? “God is One, so we'll not have any other aspect of God." God has many aspects, which one has to understand.

So there are two concepts which work out in this world I feel: one is that they believe that there is only one God and there cannot be many aspects of God, which is wrong. Christ has said, “Those who are not against Me are with Me." So this kind of a mental conception about God, that He is just like Rock of Gibraltar. See now this pandal [Indian marquee with open sides to shade from the Sun] you have done it: There are so many lights. They are all giving one light to all of us. They are not giving separate lights are they? How are they fighting with each other? What is the fight going on? They are adding to the same light. This is one pandal but we have so many lights. We cannot do with one light.

At different periods a person has to be born. Every period a person had to be born to enlighten one aspect of human awareness and consciousness. Variety has to be there because human beings are varied.

And the variety is that, supposing you are supporting somebody's right-sidedness, then there should be somebody who will come and support the left-sidedness. And it is all done so well within us. But it is only human beings in their obstinacy and in their ignorance cannot see it. We all are made the same way if you see in the whole world. Of course there is variety in appearances. Maybe an Indian looks like an Indian and... but in India only you can see Indians have so many different faces. You can find all colours and all kinds of things on their faces. In India is the only place where you find all kinds of people. You can have people like Russians, you can have people like Japanese, Chinese. You can have people like Africans.

All kinds of people are in this country to show that all people can be called as one race, as Indians.

Now it is not always ignorance that makes people forget that we are all one. Every human being laughs the same way. Does he laugh in a different way? If he has to eat the food he masticates the same way.

He cries the same way. When he cries his crying is the same. His actions are the same way. If a woman is angry with her husband... yesterday I saw *[UNCLEAR]* program with My brother and I was amazed how universal we are in our expressions. He was showing how a woman gets angry with the husband and how she behaves. If you see those actions which are depicted you'll be amazed that they are done by all the women all over the world. And the reaction of man if you want to see, all the men act in the same way. My husband was secretary to Shastriji [Prime Minister of India 1964-66]. You know that and he went with Lal Bahadur Shastri to Tashkent at his last time. But also he went once to Yugoslavia and there... [Aside:] Who was General Tito was where? Yugoslav.

... and General Tito's wife, you see, got very friendly with Mrs. Shastri. Both were very friendly.

So Shastriji warned his wife, “See now! You are great friends and now don't start crying like an Indian woman when you leave." So, poor thing was controlling her tears all the time. But she told Me, “I was controlling but it is she who started crying and such a lot! And then she started crying loudly, hugging Me.

So I just could not control Myself. I also gave in. I also started crying." And both the husbands started looking at the ground! So basically all the women, all the men, in

the whole world, react the same way to a situation. And you can see their reactions very clearly when it comes to children. They all act in the same way, act in the same manner. Supposing they hear that two children are caught up in the air somewhere, or something is happening to them, the whole world will be worried about how they are going to be saved. “Something must be done to save them." The whole world will be praying to God, “Oh God please save these two children are caught up there somehow or other." Everybody will be worried as if their own child is there. Even when it comes to death I have seen that. When there was a air space, the space craft [Apollo 13] was going to land and people were worried that they may be lost. I know in every masjid [mosque], in every temple, in every church and everywhere... they were Americans [but] nobody thought of Americans, what religion, anything. To them it was a part of human beings, you see. The human bondage started acting. That time they never thought what country they were, what Americans have done to Indians, nothing of the kind! They just thought, “Oh God! These people are... oh God please save them." Everybody prayed to God and prayed for them that they should be saved. [At] that time, what had happened to us? How did we forget? We touched to the Reality at that time and that is what it is. Anybody who tries... these Jews when they were troubled by Hitler, everybody's sympathies were with them. But when these Jews started troubling the Muslims there everybody's sympathies were with Muslims. Then why don't you think all religions? Even the Jews had sympathies with Muslims.

Then we don't think what differences we have with them. None of them, none of the people I heard, said, “Alright, they are punished” or, “It's alright." Not even Jews! So the part that is within us, which is human, becomes absolutely troubled when we see some other human being is tortured. Of course, by with these horrible ideas of fanaticism or maybe fear or maybe aggressiveness or whatever it is, we may try to be cruel. If you ask the people of Germany, “How do they feel about the massacre?" they just put down their heads. They said, “We don't know. We were not ourselves. How we did it we don't know. How it happened we just don't know how it worked out." So when the violence is over you just start feeling, “Oh God, I am a human being, they were human beings." So this oneness comes in. The feeling the awareness comes in. It is not so in the animals so much. If they have to work, if they are to be active, they will be together but if something dies they are not bothered.

Even if a child, say, of a monkey is sick, the mother will be worried. She'll be screaming, shouting; but if the thing is dead she will just throw away the child on one side and get up. It's only the human beings who can feel that oneness.

So our awareness... this was given to us by Śhrī Kṛiṣhṇa's advent. He gave us this awareness of human, or He keeps that awareness within us. We have to accept Him as a Person who gives us this awareness of human relationship. And whenever there has been problem like somebody told Me that in Somnath people believe that Śhrī Kṛiṣhṇa came as to give lessons.

So many Hindus believe it was Śhrī Kṛiṣhṇa who came as Mohammed Ghazni to give a lesson to these horrible brahmins who were making money out of that temple.

So many Hindus believe that, that to punish these horrible brahmins who were making money, he had to come as Mohammed Ghazni to break that idol which was giving them so much money and they were making all kinds of, you can say, extractions, from the poor devotees who were devoted to that temple. It was only He could do it.

So we have to understand that when we are not integrated, we cannot feel the integration of our being.

We are not integrated, that we have to realise. Our mind works in one way, our heart works in another way, our liver works in another way. As I told you I am quite surprised that when they have told that, “Don't drink” those people who follow these religions still go on drinking. But apart from that, religion forget it, [if] they see a man going into a pub and falling and faltering coming out, still they enter into the same to get to the same situation! Why? Because the mind tells them not to do it; mind says, `Don't go!' the brain says, `Don't go!' but their heart is weak, they cannot. The habits, all the habits come through this kind of disintegration.

We are so disintegrated within ourselves that if a person wants to do something he just does the opposite of it! And that is the reason why we accept this kind of juxtapositions in life [like with] what was told by Him about music and about everything. Music has come out of God's love to us. Anything that is not for God's love is not music. I will give you an example. There was a lady

who used to do some sort of a Qawwali and I was on the censor board. I censored her Qawwalis and I said, “This is not a Qawwali." She said, “Why?" I said, “This is called as mujarat. This is horribly sensuous and horrible thing. It's an insult of God. You can't sing like that." So she said, “No, this is Qawwali." I said, “Do you know Qawwali was never sung by women and was never done in this dirty fashion the way like a prostitute you are singing this Qawwali? It's always all the music was in the praise of God. And that's why Mohammed Sahib said that all the music should be in the praise of God and should not be..." So we had other things like Ras and all that. But you find even at the time of Śhrī Kṛiṣhṇa all the music was to be just done for Ras. Ra, `Ra' is `energy'. Sa means `with'. With Rādhā they were playing together, playing Rasa and that's how they were doing the circulation of the energy to integrate themselves and singing the music. It is for that but you find that people don't understand. They use music for sensuousness: is anti-God. This music force has come to us to praise God, that's all, for nothing else, [not] for doing all kinds of dirty things and singing all kinds of funny things. Imagine! And the reaction is built in so much. When He said that all the music should be in the name of God, we have a person like Aurangzeb who would not take to any music! He was such a staunchy fellow and the other Muslims who came in would not sing anything that is Qawwali or anything, would sing horrible ghazals which are just describing the separation of a woman and a man and all kinds of dirty things! With this disintegrated temperaments people

took to anything that came to them just to please themselves.

When the advent of this thing like Omar Khayam. Who is he? He's anti-God absolutely anti-God man. Horrible! But people appreciate him very much, Omar Khayam what a poetry it is. They appreciate, why? Because the disintegrated part of their heart likes Omar Khayam when he sings, “Oh we should drink here. What is there in this life? We don't know what is going to be there." Because Mohammed Sahib has said not to drink, he must sing such a song. This is the poetry of Mr. Omar Khayam, who is being very much respected everywhere. And he's very much regarded as a great poet in Iraq where today Khomeini is one great horrible man is born and he still respects this Omar Khayam; I don't know how can he respect him. What a contrast it is, just see, what a contrast this Omar Khayam singing dirty songs.

They are not in praise of God. Music which is not in the praise of God is not music. Is ashleed. Is filth.

Is dirt. Our classical music in India was based on Om. Even at Kuṇḍalinī when it reaches here at the Viśhuddhi Chakra it makes all the sounds, `am, ām, em, eem, um, oom, rim, reem, lrim, lreem, aye, ayee, ao, aou, ang, ah'. All these sixteen vowels are coming from the sixteen Chakras or the sub-Chakras or the petals of this Viśhuddhi Chakra. These are Bīja mantras of the Viśhuddhi Chakra. All the vowels come from here and when we sing dirty songs we spoil this Chakra Viśhuddhi.

That's why all the people who sing these dirty songs have to take to drinking, because I think they can't bear, or

they can't do it, they can't sing these bad songs unless and until they take to some sort of an escape from God.

So music and drinking started going hand in hand. In the West the music broke all its traditions because they had no sense left in them to recognize that music is meant only for God. Only for hymns to be sung in the praise of God. All music should be in the praise of God. All ragas should be in the praise of God. [In India] we had no namaz system of different times, but we have a system of music in different times. At different time, a certain music should be played where you describe a mood. And all the moods that are described have to relate themselves to God. There is no other mood that is enjoyable to the Spirit that does not relate to God. There's no mood which one can enjoy. Even bibhatsa, the mood of bibhatsa is grotesque; even that mood one enjoyed, one can listen to when they see the filth and dirt, the left side.

It's so scientific; our music system is extremely scientific because it was taken in the form of this music with actually the Kuṇḍalinī moving into different these sapta swaras [seven notes]. These seven swaras are built in our seven Chakras: It start with sa, then, re, ga, ma, Mother, pa, dha, ni. My name also starts with ni. These seven swaras are built in with seven notes and there are vrikrutis, vrikrut swaras, which are the other, what you call, Chakras [so] that we have to make about twelve swaras. But nobody understood the real meaning of music.

Sharada the Goddess of Saraswatī is the one who carries the message of Virāta within and tells us how to sing.

She tells us what is appealing to God. How these ragas were made also? Just think of it.

Because first they chose the notes the aroha and avrohas, the going up and down [ascending melody and descending melody], which was appealing to God.

So the melodies were created. Melodies are fixed. You cannot change the melodies the notes because they found out that, at this point, the Spirit awakened; on the vibrations they found out. They found out that, when they sang this way it worked out. The Vīnā [primordial instrument of Śhrī Saraswatī] they played and they found out the exact swaras. Exact swaras which would really make you feel nice. Now, you know that, those people have come from the West, don't understand any Indian music on the mental level but they understand at the Spiritual level because their Spirits get filled with joy and the vibrations starts flowing.

The sense of music, this depiction of music was done by Śhrī Kṛiṣhṇa. It is He the One who taught tāla. Of course we can say that Shiva is the One who dances the tāla, but the One who depicted it for human beings who gave the message to the world how the tāla should be is Śhrī Kṛiṣhṇa, through His dancing movements. He kept the tāla all the time. Like the way He stands itself suggests how He kept the tāla. And He played the Mur.lī [flute] also, to suggest that music is what God's love is. His music is suggesting of God's love, that soothes you, that clears you, that makes you happy, that gives you joy. And that's what He suggested through His singing, through His music. He never wrote any poetry did He? He

never wrote any poetry as such but when He spoke, when He spoke in gudria in the prose it became Gītā.

Just when He spoke it became Gītā. Of course, people have tried to spoil quite a lot of it, the rhythm, which I feel sometimes when people recite it. But still we must say when He really created it, it was for human beings to create poetry out of prose. Out of prose He made it communicable. Because people could, first, only understand the music, the rhythm of the music. They didn't understand much words and things. But He made it possible.

Even in Koran, if you read, the few words before starting every chapter nobody understands. They are all nothing but mantra bījas. But they put it there. They knew people won't understand, but He put it there because people would understand. All these things you may not understand. You may not understand Me either, possibly, but whatever they did was for your hitha [benevolence]. This is what happened, at the time of Śhrī Kṛiṣhṇa that He established the concept of hitha; because it was said that you must speak the Truth and you must speak the thing that is sweet, priya [“Satyam vade, priyam vade"].

It was the message of Śhrī Kṛiṣhṇa that you must speak sweetly. Those people who have got a proper Viśhuddhi Chakra speak very sweetly. Their voice has that enchanting method of capturing the hearts of people and not debasing them, but elevating them.

So He said you must do it sweetly. That was His main theme. Everything He did so sweetly that He created a leelā out of His doings. It was a leelā that he made. He said this world is not a place where you should be

serious, you should be sharp, you should be tense, but it's a leelā. Just see the leelā, the drama. The whole is a drama.

So the whole thing is very sweet. If you see the whole world as a drama it becomes a sweet thing.

The sweetness of it, even if you see a person trying to be funny, you get a joy out of it. If you know it's a drama you don't get worried if somebody comes and murders somebody and you know it's all fake, it's a drama. It's a drama going on and that's what He told people that the whole thing is a leelā.

So that people should not get into serious moods and actually start acting in the drama in the real way. Like, you see, you appoint somebody as, say, Shivaji Mahārāj and there is somebody coming from the other side and he takes a sword and he really hits the fellow there! And you say this Shivaji Mahārāj actor is no good; he gets absolutely involved into the thing and hits the other person.

So it's a drama and He made it into a leelā, leelā, because it's a drama no doubt.

But when, when you get realised you start seeing the drama and the play and the whole thing is, you must have seen that most of the Sahaja Yogis are always laughing, because they see the way things are happening. Even when they see a Guru misbehaving or something they just feel like laughing, how absurd it is. Like somebody came today to talk to Me and he told Me, “Mother, I have been to all kinds of nonsensical things." And he was just laughing. He said, “I laugh at them now what I did." He said, “I went to one Guru who is going to,

who used to give name to people; say this nāma [name or mantra], that nām. I made such efforts, I went to people, recommended my case." Because he was not so rich, you see, so he was never bought the name and he was saying, “Give me the name. I must have the name." And the Guru was saying; “No, no, no, no. You have to wait three..." He said, “I poured so much money in his savapati and which were large savapatis were put. I did everything, but he would not give me a name and ultimately when it came to that he said, `Alright I'll give you a name,' and he gave me a name which I started taking. I really became mad after that. I started getting headaches, this, that! Then he said; `Alright you have to suffer! If you don't suffer you must go through it. Yes you must. You asked for the name so you have it.' " And when he came to Me, he was looking like nothing on Earth, I tell you.

In a very funny shape he came to Me. But now he's completely cured. I could not even recognize him the other day I just saw him. I said, “Oh God are you the same person?" So he said, “Mother now I laugh at all these things and I just see that how people are stupid to go to these false people, follow false ideas and false conceptions and how they are missing the point." And he asked Me a question, “Have they to go to that limit of destruction to come to You?" I said, “I don't know about them what they have decided." But it is true that people are so stupid that they take to all these ideas and all these negative things much more easily than to the positive things, because of the Viśhuddhi Chakra being spoilt.

If your Viśhuddhi Chakra is not spoilt, your hands are working better. Many people who get Realisation do not feel vibrations in the hands, because their Viśhuddhi Chakras are not alright. Now what does that mean that your Viśhuddhi Chakra is not alright? First of all by temperament you are not a collective person, by temperament. You are not a person who enjoys collectivity much. Like people who are fussy.

“I want this. I want that. I want to sleep on a proper bed. I must have this. I must do that." This kind of an `I'; those who have too much `I' in them because both the ego and superego start from this Viśhuddhi Chakra. You see a man who is an egoistical person is not able to see the collectivity at all, because he is separated with the rest of them. His ahaṁkāra [ego] covers his being so much that he cannot enjoy the collectivity.

Now you see Śhrī Kṛiṣhṇa lived with whom? With Gopis who were little, little boys. He went and used to look after His cows; just looking after the cows. None of these incarnations you will find were interested in rich people or anything. He went and stayed with people who were very ordinary from the worldly point of view and there He played and there He did all these tricks of sweetness. He used to steal the butter.

He used to steal the butter and many people who are criticising Him always say, “Oh He was a thief.

Yes He was a thief. He was the thief of the thieves." And so on. He used to steal the butter because this butter was taken to Mathura by these ladies to get some money. And that was giving more help to all these horrible Rākshasas who were in Mathura, so He didn't

want this to go there and give them this good health. The best thing was to steal the butter so they don't get it and they starve on their... they have their defficiencies of the vitamin A and D, you can call it. And that they suffer from bad throat and they have no strength in their hands when they pick up their swords.

So this was the way to hit them so that they could not fight the forces of good.

So, in that, He proved that a higher goal is to be achieved by giving up smaller, silly, stupid goals. The hitha, hitha is the main thing, because when He said that, “You don't speak the truth, otherwise people will be hurt." Alright, so what should you do? You hurt the people so you don't speak the truth, or you speak the truth you hurt the people.

So both cannot go together. Like if I tell somebody, “Oh you are so bad." That person gets hurt. Now if I don't tell that person, that person is lost.

So what to do? He found out the solution so He said, He put, the word in between as `hitha'. The word `hitha' means, good to your Spirit, whatever is good for your Spirit. Hitha word means, good for your Spirit. It has nothing to do with material things. It means for your Spirit. For example, if I tell somebody that, “You should not do that” he may feel bad today, but if he recognizes that, “Mother is telling me for my good” he will do it and he will gain by that in his hitha. Or else if he does not do it, later on, supposing I don't tell him and if he doesn't know about it, or even if I tell him [and] he does not do it, he is going to feel bad.

So it is not priya [pleasing] to his Spirit. It is not priya to him.

So if you do something that is the hitha of a person, sometimes you have to tell a person, sometimes it may look very, very painful. The other day I told somebody that, “You don't cure anybody because you're not strong enough to cure." He felt very hurt.

So then I'll say, “Alright go ahead. You better cure others, but don't come back to Me." Then he'll land up in a lunatic asylum. But when he'll land up in the lunatic asylum then what will he say? Was that for his hitha that I said? Will he be then angry? So ultimately if you say the hitha, say. Saying is the point. Not doing, saying. You say the hitha with your Viśhuddhi Chakra then ultimately it becomes priya [pleasing]. Means it is light.

So you say a thing which is good for the Spirit, otherwise you just don't say. But people just say to others to correct them because they are aggressive. It should be done in love. Hitha means: done something in love. If you want to say something to someone in love and you feel it is necessary and the third condition you must have adhikar [authority]: you must have the right to say it to the person. If you don't have the right you just keep quiet. Let God look after. You are not in charge of anyone. But if you have to say to someone in love and if you have an adhikara [authority] then you have to say it. If you don't have the adhikar [authority] you should not say anything to anyone unless and until it is absolutely priya to that person involving his hitha. This is what He put, that you should not do any anadhikar cheshta

[unauthorized effort]. Means you should not do something unauthorized.

Like I would say somebody comes to Me and says that, “Where is that person whom I want to murder?" Then what is the truth? Should I tell him, “Alright this is the truth. You go and kill that person"? According to the strict government law it may be. I don't know if it is. I don't understand the government laws at all, or the human laws. But it is not. Then what do you have to tell him? You just keep quiet. He has no adhikar [authority], he has no right, to ask you or to get this information from you. You just keep quiet. I do. Then he may beat you, do anything. You just say, “I don't know." It is anadhikar cheshta. It is done many a times. People who are, say, great nationalists who fight for their country and people want to extract information from them. They suffer. Suffer. But they will not give the information. Not out of fear, but out of love of their fellow men who are fighting for the freedom of their country. This has been done in our country many a times.

So you don't speak something which is not the adhikara [authorization] of another. He has no right to ask this question. Like that, one has to be very discreet and that is what Śhrī Kṛiṣhṇa has given us, His discretion.

Many people ask Me, “Mother, then in this situation, what should I do? In that situation what should I do?" That means the person has not developed a Viśhuddhi Chakra to be discreet: he has not evolved, he is not mature enough, he is still asking Me questions. In the Nirvikalpa state you don't ask Me any questions, you know exactly what is to be done: when to shout at somebody, when to

be quiet, when to be silent, when to say something and how far to go. All these qualities develop through proper Viśhuddhi Chakra, because you are doing it for the hitha of another person.

Sometimes it pays much more to keep quiet. This is what He has taught us. Not only taught us but He has put it within us the discretion part in our Viśhuddhi Chakra. He has put within us the power to witness the drama, to be detached. He was Yogeshwara. He was Yogeshwara. He was the Īshwara of Yoga. He was the One who was the giver of Yoga, naturally, because Shiva is the One to be achieved. But the One who helps us is Him, Is Akbar, is the Mahālakṣhmī Tattwa, is the central path which takes you to Shiva.

So He is the One who takes us there.

It is He who is supported by all the prophets. He works out this for you, this great work of evolution.

So, one can understand very clearly that, if our Viśhuddhi Chakra is put right, we develop exactly how to be discreet in Sahaja Yoga. We devise a method by which we talk so much that makes people feel priya that they appreciate, they like it, priya. It's loving and also it does their hitha. Even sometimes you have to say something which is harsh or maybe your silence may make them feel a little harsh, doesn't matter.

It will give them ultimately their hitha.

So the ultimate goal is hitha. That's what Kṛiṣhṇa had in His mind, to do the hitha.

So, His Samhara Shakti also which He had, the killing, many people criticise Him for that. Like the Jains you see.

At the time of Śhrī Kṛiṣhṇa He had a cousin called Neminath; and Neminath was not Śhrī Kṛiṣhṇa, he was just an ordinary human being who had achieved certain heights in evolution. He just got filled up with a kind of a feeling of a repulsion about killing animals. Of course, killing animals is not a very good thing, but he was not killing and it was to be done for his marriage.

So he developed such a strong feeling about it that he started a different thing called Jainism.

Some sort of another path, in which he said that there should be no killing of animals. It so became so ridiculously funny, that it reached a stage where bugs became more important than human beings, even mosquitoes were more important! You see those people walking with this thing covered on their faces and on the street. Everything taken to the last nonsense! So Śhrī Kṛiṣhṇa gives you discretion and this was very, very, very, very, very important because all our problems of disintegration disappear when we have discretion. But mostly people don't have their Viśhuddhi alright. On the one side there's a right Viśhuddhi which gives us aggressiveness: With our talk we aggress others. Most of the politicians have that kind of a capacity. But if they get mediums into them like supraconscious, like Hitler had... He learnt it from some Tibetan lamas who taught them these all dirty tricks of overpowering people. He managed to put such Spirits into them that they killed thousands and thousands and thousands and thousands of human beings. The left Viśhuddhi is another problem.

Such people also don't have a collectivity sense because they are frightened of others. They are so negative they

always see the negative side of another person. I have seen people who come and tell Me about every Sahaja Yogi, “That's wrong with that Sahaja Yogi. This is wrong with that Sahaja Yogi. That's wrong with..." No positive points at all! They only see the negative point.

So they have no collectivity.

They always have fear. All the time they are frightened of others because there's something in them that frightens them.

So they have their left Viśhuddhi very badly caught up because they are guilty, specially in the West, you will be surprised: who are supposed to be such aggressive people! They have terrible left Viśhuddhi, because they, by their doing, build up a very big guilt within themselves. They see how they have been behaving, their community has been behaving, their country has been behaving [so] they develop a big guilt in their mind. Moreover, as Brian has told you, that it is cut, the roots are cut and you start behaving in an anti-God manner, even without realizing that it's absolutely wrong. It's true.

The left Viśhuddhi comes up because they feel guilty, despite their doing wrong things with the knowledge that they are doing the right thing. They feel guilty because in the subconscious the conscience of a person works it out and that guilt is accumulating howsoever you may deny it, but the left side goes on catching and they have a left Viśhuddhi [catch].

So, one has to say that, `Mother, I am not guilty.' It's another side of ego where the ego's reaction hides itself into left Viśhuddhi. And with that they start feeling guilty, “I should not have done that. I should not have done

that." Both attitudes are wrong. When you are on the left side you aggress yourself and torture yourself and when you are on the right side you torture others and aggress them.

So to be in the center is only possible if your Viśhuddhi Chakra is alright, otherwise you cannot. You have seen many people when they get Realisation they don't feel vibrations on both the hands equally. The reason is they have no balance: it shows on the hands [that] they have no balance. Now hands are a very important part of human beings after Sahaja Yoga. If your hands do not have equal, equal vibrations, then something wrong with you. Whatever side you do not have vibrations, say, if you don't have vibrations right side or you feel that right side is heavy, or is hot, then definitely you are right-sided person. In such cases maybe left side is absolutely numb. Those people [who] have numb left side, means also they are right-sided. But in the left hand if you have more vibrations and on the right hand you don't have any, then also it means that you are right-sided, not that you are left-sided. But on the other side if you have the other way round then you are a left-sided person. That means the balance is not there. Your hand says that there should be balance.

So you must know that only by thinking, you are not going to get rid of your troubles in Sahaja Yoga, you have to work with your hands. As I told you that just by thinking you can't drive your car, you have to use your hands. You have to use your hands with full knowledge as to where you are, what you are and what would these vibrations mean. You have to use your hands.

Now when you start using your hands for all practical purposes other people might start thinking, “These people have gone mad! They are using their hands." But the same way they thought when Mohammed Sahib taught them to use their hands. They all laughed at Him! But now nobody is ashamed of it, nobody laughs at it, but they are doing all mechanically, not the way He has said.

So first of all use these hands for your own purpose, for yourself. These same hands can help you. Now the Kuṇḍalinī has awakened; so it is passing through all the centers in a very thin way maybe, but it is there.

So first raise it more and more. You can do it with your hands. It's a [virtuous] circle, when your hands raise it, it starts flowing more in your hands. Only your hands can raise it. It starts flowing in your hands. Giving yourself a bandhan or raise yourself, raise your Kuṇḍalinī. Learn all these methods carefully. Your hands are very important. If your hands are not working you be careful on that. You have to get your vibrations in your hands to begin with.

Some people who have had problems with their hands, because of previous life or some sort of a thing, they feel their Chakras in the, their own places.

Then after sometime, you'll start feeling your Chakras in your brain, doesn't matter. You will never feel anything uncomfortable with it. You will be able to manage. After that you need not feel the Chakras at all. You don't feel anything. You just say, “This is it." Finished! They just know. That also `knowing' comes through your Viśhuddhi and you just say it, again say it.

The most important function of the Viśhuddhi Chakra is that it should be pure and clean because if you have to

say mantras your Viśhuddhi has to be clean. All the mantras have to have the help of Viśhuddhi.

When a Guru gives a mantra, first thing you'll find he will have a left Viśhuddhi catch and any other Chakra whatever the Chakra the Guru has attacked. But first will be on the left Viśhuddhi, so for that we use the mantra of mantrasiddhi. The mantrasiddhi comes on a person when his left Viśhuddhi is alright, otherwise he cannot be mantrasiddhi. Whatever mantras they say is all mechanical. Your left Viśhuddhi should be alright if you have to say the mantras in a proper way to be effective to have enlightened mantras. Even `Allah ho Akbar' has no meaning if your left Viśhuddhi is not alright.

So you will see how, in Sahaja Yoga, left Viśhuddhi is important and right Viśhuddhi is important for vibrations.

So Viśhuddhi Chakra plays a tremendous part, role in, in Sahaja Yoga because it connects you to the Virāt, to the Whole.

So you come to the point where you know that it is through Viśhuddhi Chakra [that] you know the Whole, the Akbar; you get connected with Him. The rapport is established through Viśhuddhi Chakra and you can feel it; it's communicated. The rapport may be, supposing the hands are cut, still you might get your Realisation. Many get it. But if you do not have your hands intact, then the communication is poor. Then maybe on your Chakras you will start developing the communication later on. But this is the easiest way to feel the communication in your hands, if your hands are sensitive.

So what should we do to keep the Viśhuddhi Chakra [clean] is the problem. I have been told that I should

finish My lecture soon and go away soon! But I think I should finish this today about Viśhuddhi Chakra.

What should we do to keep our Viśhuddhi Chakra alright? Steal the butter and eat it. You must eat butter because it has vitamin A and D. Vitamin D especially, I am sorry, vitamin D.

So that calcium grows in your body.

So you'll become a strong person. If you just take calcium without butter then there's a problem.

So try to take butter whenever you have Viśhuddhi Chakra problem, for physical side; I'm just telling about this. You can take some butter in water, hot water; spread it on and take it. Viśhuddhi Chakra looks after the cooling side, cooling side, because the liver, when it gives heat, the body becomes heated up. Then the one that really cools it down is the Viśhuddhi Chakra and when you have a problem on the, on the drying of the epithelial cells inside, the lining, then best thing is to take some butter in the water, or eat some butter during summertime. But no carbohydrates with it, no carbohydrates. Then you won't put on weight. You eat as much as you like, butter. You will not put on weight. If you can give up carbohydrates completely you will have Sattvikahara [balanced diet] absolutely. You should not touch carbohydrates and you will be amazed that you will have Sattvikahara. Take butter and proteins. Take all fats, cream, everything. Nothing will go wrong with you. You can take for proteins all dried fruits, everything and just take this honey for sweet. No carbohydrates. Or also these days honey is made out of sugar as you know.

So if you can avoid carbohydrates and just take these things your health will be alright.

But we have [different] patients; we have all kinds of imbalances. That's why I say, “Alright, if you have a liver, take sugar." But if you just give up sugar it is not going to help. You have to first correct your liver and then you can give up sugar very easily. No problem. But not before that, like all the doctors in general say, “Don't take sugar." The fat goes out of the body just giving the lining of the body, the softness and goes out of the body. It doesn't stay because, if there are no carbohydrates, it cannot be retained in the body. You can see at home. You put some butter on your hand. Alright? And wash it. It won't wash. It will just stick there. It will have no effect, nothing, but it will be just sticking out there.

It cannot be consumed. But if you put some carbohydrate say put some atta [our] or something you can take it out; it dissolves. It cannot be dissolved if you do not take carbohydrates.

But this is for people who do not have any imbalances in the body, who are perfectly alright; they can do it. I can do it but nobody allows Me. Everybody uses Me for feeding as if I am a wastepaper basket. If I don't eat... you see you are supposed to give Mother something like an ayurveda this much. But I have seen people when they want to give Me they'll give Me so much and if I eat a little they'll feel that, “Oh what Mother is..." I don't need it actually! People should understand My nature.

So when they serve Me, they'll serve so much that I cannot eat. I just eat little. I can manage. There is no need for Me to eat carbohydrates at all, at all. I need not

have carbohydrates. But, “Mother I have made this. Please have it. Mother I have made these ladoos [ball sweets]. Please have it. Mother I have..." So I say, “Alright Baba!" Now I have to suffer to please you people, for priya. This is what is very simple to understand that you should not force Me to eat, at all. There's no need to force Me. Don't force anyone to eat. Though I do force people to eat because I know they need it but you cannot do it; you have no discretion. When you have discretion, whom to force, whom not to force, then it's alright. Also when you force you must know that the food has to be vibrated. If it is not vibrated food, if you force the person, he'll have trouble.

Now for all of you to understand the importance of Viśhuddhi Chakra is first and foremost thing is that when you speak you must speak about Sahaja Yoga and nothing else. If you have to give speech, I have known many Sahaja Yogis, you see, who are still member of this organization, member of that organization, member of this thing; of horrible organizations which are anti God. Say now, for example, we'll see `Hare Rāma Hare Kṛiṣhṇa' organization is anti-Christ, anti. It is of course anti-Christ openly and in the real sense is anti-Kṛiṣhṇa, absolutely [anti] Kṛiṣhṇa. Every person who goes there and begs in the name of God has a horrible Viśhuddhi and they all suffer ultimately from Viśhuddhi troubles, cancer, this, that and they die. And the face of a person who has a good Viśhuddhi is blooming, is wide, is full of... full like a full moon. And if you have a face which is all shut down that means your Viśhuddhi is not alright. If the Viśhuddhi is functioning when there has to be glow on

the face; the face should be full and nourished and sparkling and eyes should be sparkling because Viśhuddhi Chakra also looks after the eyes. It looks after the neck. It looks after the ears. It looks after the nose. If your Viśhuddhi Chakras are spoiled you have problems with all E.N.T. [Ear Nose Throat] things.

So the people who are like that; like this you see we can say the man who was the leader of that organization. They think they are doing `Hare Rāma Hare Kṛiṣhṇa': actually they are doing absolutely anti-Kṛiṣhṇa activities, absolutely! You have no business to call Kṛiṣhṇa's name like this, like mad! Standing before all the people, wearing these horrible dresses of these dhoti and kurtas; and which they are absolutely done in a very funny way. They don't know how to wear it; the women wearing their sarīs and men buying those bhodis and putting them on their head and shaving their heads. Did Kṛiṣhṇa shave His head? Did He ever shave His head? Head, the hair, are actually the part of Kṛiṣhṇa's gift. On the contrary He, His hair are always described, always described in the poetry.

There is a story about a great Urdu poet who was an Indian; who was a Hindu, but Urdu poet. And some fanatics, you see, challenged him.

So this... they put one couplet and they said, “You better complete this." So he said, “..." So he completed it like this, “..." His hair are described in every poetry are used.

Here they are shaving their heads, putting these bhodies on their heads and walking about. When did Kṛiṣhṇa have [a] bald head? Did He have a bald head? He is Yogeshwara with sixteen thousand wives; means sixteen

thousand powers. He didn't have Sahaja Yogis to work out so He got them as wives. They were all yoginis within. He created all this drama and He got them as wives because a man, if he has any women as disciples, then naturally he is blamed and as a man he has to have powers in the women.

Women are always the power, the Shakti.

So they came as His wives and He became the husband of sixteen thousand wives and the five ranis [queens] He had were the five elements within Him. He played all the tricks. He created... you you how will you know about Him? How far can you go [in] understanding Him? So these people who are trying to call Śhrī Kṛiṣhṇa every moment, every minute, standing on the streets and begging in His name. All over the places begging like beggars. Kṛiṣhṇa couldn't stand begging at all, never. He believed in having a right. He would [rather] steal than to beg. All these beggars being created in the name of God: I think it's one of the greatest sins to beg in the name of God. I have seen this happening before the temples and all that and I used to think, “Before the temple in front of God to stand and beg. To be a fakir means to beg? What is this?" Is this the sign of a basha. Śhrī Kṛiṣhṇa was a batshawa, Yogeshwara and these beggars, they are the followers of Śhrī Kṛiṣhṇa? Horrible things. They look so miserable and they are absolutely like cabbages and many people believe that they are in peace.

Naturally if you are living in a Shmashāna [Hindu cremation ground] you are in peace; in a dead condition.

And our country, which is a poor country, supporting all these beggars here! All our rich people have given them

money and lands. Is this the way we are going to support these lamas who come down from there and these horrible people coming down from the West? All the people who cannot work? Very nice! Come here, say, `Hare Rāma Hare Kṛiṣhṇa' and read Gītā and say some few words by heart and then you earn your living here! Nicely living. Every village there is one or two sitting there and begging. Can you believe it? And our government is not bothered about it; to find out who are these people, why are they here, in the name of God why are they begging like this. And we have so many poor people who are begging in the name of God. Why not collect them and help them instead of helping these horrible people? Like this, you see, people have anti God activities and anti Kṛiṣhṇa activities. When you take the name of God in vain, Viśhuddhi catches. I have known people sitting “warGuru warGuru warGuru." Is it so [that] Nanak Sahib is so cheap that we should go on taking His name, “WarGuru warGuru warGuru?" They'll go on having the mala in the hand all the time. What is this going on? What do you think God to be? Is He in your pocket? Is He so cheaply available that you just go on doing all these things? Why? You spoil your Viśhuddhi completely. One must understand. When... you see, you are surprised at... It is said that, “..." Still people start doing it. Karaka means what? Viśhuddhi Chakra. That's how you spoil your Viśhuddhi Chakra. That's how you spoil your main Chakra of attaining Realisation.

So if you have to become one with the whole, please try to keep your Viśhuddhi Chakra clear. Getting into colds because these days India especially... any, everywhere

even in... women have a special tendency not to cover their body because they think they are not looking very fashionable or whatever it is. Is a very modern stuff has started that they want to wear scanty dresses. This is all anti God in both ways. Firstly it is nonsensical to show off your body. That's why Mohammed Sahib said, you see He has worked so much on Viśhuddhi Chakra, that women should cover their body. Is a very good thing I sometimes think. This nonsense of fashion has gone to such a limit that after some time you'll find all these mosquitoes walking around without any clothes. That's the ultimate. You see is a sign of people who are, who are neither `he' nor `she'. The `it' people do that way. Yes always. `It' are the people who have qualities. That's why Rajneesh, when people go to them, they become `it'. Because that is their capacity: no shame at all left in them. And that is what it is, one has to understand that you should be careful about your throats.

The fashions and all these things are not so important. What is important is your health. If you spoil your Viśhuddhi it's a very wrong thing and one should try to look after Viśhuddhi all the time and all of you should try to look after each other's Viśhuddhi. Because I didn't like the idea of having this pandal here and I told the organizers this was a wrong thing.

So they said; “You said it should be in the open." I said, “Now, I'm not saying you go to Himālayas." You must use discretion, that's the part missing. You must have discretion. To give people a thing in the mid-winter, such a place I mean, I must say you people are great seekers to be here, this is not proper thing to do.

So the organizers, the people who are dealing with the collectivity must know that they should do something to protect the throat of people, to protect the Viśhuddhi Chakra. It's very important, very important. And you all know how I care for your Viśhuddhi Chakras, everybody's Viśhuddhi Chakra, because I know how important it is. Because it will make you absolutely disintegrated and it will spoil all the work of Kuṇḍalinī and poor Kuṇḍalinī will suffer also.

So we have to take it upon ourselves that we'll keep our Viśhuddhi Chakra clean, we'll clean ourselves properly and we'll clean our throats every morning and we'll take gargling and everything and look after our Viśhuddhi Chakra. It looks very mundane but for a Mother mundane things are as important as higher things are, because if there is no Viśhuddhi Chakra what's the use of coming to Sahaja Yoga with a bad Viśhuddhi Chakra? So please try to look after your Viśhuddhi Chakra. Try to put Yogeshwara there. Try to raise Śhrī Kṛiṣhṇa there, try to be like Him. Keep your understanding that you are here to witness the drama of God and to be the Mur.lī of Śhrī Kṛiṣhṇa to watch the beautiful melody flowing through you. May God bless you all. Now what is today also they don't want anyone to touch My feet. I hope today you will obey without any exception. Yesterday we tried but there were exceptions so today there should be no apowadas. Let us see. One day we should not touch Mother's feet. Doesn't matter. You all can touch from there and there is a way of collectively touching Mother's feet is the way we do always. You can all do it just now but we need not actually touch, but you are actually touching. Even

touching the Mother Earth you are touching. Just touch the Mother Earth and you are there. Just touch the Mother Earth; you will find the Kuṇḍalinī rising. You haven't given Me any questions whatsoever and those who have questions should write questions and give it to Me, because once I'll go away then you will say, “Mother never allowed us to ask any questions." I did say there are...

[Explanation then follows in Hindi. MISSING of more than 6 minutes in Hindi.] Question [in Hindi]: Should women do vrat [fasting] of karvachauth?

Shri Mataji: Do not do any kind of fasting [vrat]. Should women do fasting of karvachauth. I have seen women doing this kind of fasting. They get too much problems with that, do not do it. If you can do it without problem, then it is ok. If some karvachauth is to be done, no need to put God in trouble.

No need to do it after Realisation, all their husbands' remains healthy. If husband is a Sahaja Yogi then there is no problem, then no need to do that. Everyone says Pārvatī Ji did karvachauth, but she did it before marriage, not after marriage. What is the need to do it after marriage? Biggest method of doing karvachauth is to understand your husband as your husband, do their care, understand them what are they. They are like children's, many a times their behaviour is like children's. They will get angry with something. Their ego breaks very fast, your should see it. Be with them with love, talk sweetly with them.

Give them happiness, this is karvachauth. Not this that you abuse them 1,000 times in karvachauth. Then again

it is a matter of discretion. Normally women who do karvachauth, I have not seen them doing it properly. If they do karvachauth they will see when moon will come, when moon will come and will eat everyone's head for that. They are so hungry. What is the use for such people to do karvachauth. This should be done by unmarried girls to get husband like Śhrī Shiva, but first are you like Śhrī Pārvatī? First make yourself like Śhrī Pārvatī, then desire for Śhrī Shiva. It is not easy to handle husband like Śhrī Shiva who sits on bull. Śhrī Shiva cannot be anyone's husband, other than Pārvatī. She can only manage him.

He is a difficult person and to desire for such person is mistake. When you cannot handle such difficult person then why do you desire for him.

[MISSING.] Sahaja Yogi [in English]: Last is.....

Shri Mataji: In what?

Sahaja Yogi: Nidra. Insomnia.....

Shri Mataji: The question is ah... ah about the insomnia and what are the deities involved as far as the nidra [sleep] is concerned. “Ya Devī Sarva Bhuteshu Nidra Rupena Samsthita." She is the One who gives you sleep. Is the left side, is the Mahākālī, that One gives you the sleep. And to get to Her you must raise your Mahākālī Tattwa.

So all those people who are insomnia business should raise the left side and put it to the right. Try about 108 times first of all. Then you have to do some deep breathing. In deep breathing you go to your left side more. And with deep breathing you relax and then you put your attention to Sahasrāra and sleep off. But

insomnia is absolutely curable in Sahaja Yoga if you know how to put left to the right. After that.....

[MISSING for about 22 minutes.] [Hindi.] Question [in English]:... and here is the daughter, who's having hearing problem.

Shri Mataji: Hearing problem can be cured, very easy it is and we'll tell them how to do it, but they have to go to the center. All these people have to go to the center, settle down in Sahaja Yoga, become Sahaja Yogis and every problem can be solved. I can tell you, you reach a good health and now this Bran who was speaking here, he used to have crutches. He could not walk one step. Can you believe he's climbing and talking.

So all the problems are cured, all the emotional problems are settled, everything is promised, but first you get your Yoga, you must get your Yoga, then every thing can be done.

This is the first condition of Sahaja Yoga, for which you don't have to pay, for which you don't have to do anything, stand on your head or anything, nothing of the kind, but give some time to yourself, take to Yoga, go to your centers every week, which we have in every house...

[Shri Mataji speaks in Hindi.]

***Contents: 1983-02-03*, Public Program (English+Hindi+English), The Āgñyā Chakra, N.D.M.C. Park, Hanumān Road, New Delhi, India**

[Shri Mataji talks in English:] Today we are going to understand the center of Āgñyā. Āgñyā Chakra, which is placed on the crossing of the `Optic Chiasma.' The

nerves that supply the eyes go backwards in the opposite direction and wherever they cross, this subtle center is situated. It has a continuous connection with the other centers through the `medulla oblongata.' This center has got two petals. And this subtle center on one side acts through the eyes and at the back of the head where you have some protrusion. This is the physical side of this center is. Now the people who talk of the third eye, this is the third eye.

So that we have two eyes with which we see and there is a third eye which is a subtler eye through which we can see. If you see this eye, that means you are away from it. For example, if you can see your eyes that means you are seeing your reaction, not the reality. If you see anything that means you are looking at it.

So those people who say they see an eye for example people who take LSD and all such things, they start seeing another eye. They just see this eye and they think their third eye has opened.

Actually you are very much away from the eye, that is why you can see it. You go to a supraconscious level on the right side and on the left side to the subconscious level, you can see the eye. But in Sahaja Yoga you have to see `through' that eye. Like a window, you can look at the window, but if you see through the window you cannot look at the window.

So this illusion that people have that we can see third eye and that is why our Kuṇḍalinī is awakened, they are sadly mistaken.

This is a very narrow passage, through which attention cannot pass normally, it is impossible thing. It is a narrow

passage, where the ego and superego fit on to each other and cross each other. And there is no gap in between for the Kuṇḍalinī to pass through. This superego and ego go back, go downward and come to the Viśhuddhi Chakra and circle round it and go in the same direction.

So you find that they come up to this place, they start from this place, go up to the Āgñyā Chakra and then they cross, over. But here they are in the same direction as they went, at Āgñyā here they crossover.

So when you have a problem on the left hand side, you get the affects of that on the right hand side. But right hand starts from here up to this side and the left hand starts from here. But the left hand actually acts on the right hand side.

So this third eye is to be penetrated through or we have to enter into the third eye, through Kuṇḍalinī awakening. But it is such a closed passage which is the door to the limbic area, which is the kingdom of God, that anybody who tries to push their attention through this closed door, either goes to the left or to the right. And this is the beginning of the trouble of the people when they don't understand that whatever is unknown is not God, is not Divine.

So, when they move on the right side, they go to the supraconscious area. And they start seeing hallucinations. Actually these are not hallucinations but actual things because they exist on the right hand side.

So they start seeing things of the right hand side. They may see colours and the formation of colours and they

may see also people who are dead, who have been very egoistical.

They can see Gāndharvas and Kinnaras, because they go to the `Gāndharvalok', to the right side and start seeing those things in the unknown awareness of supraconsciousness. But that movement is very dangerous.

Because if anybody catches you there, then you get an added personality sitting on your head and you get possessed by ego and you become on your own and you actually become malignant. Hitler is one of the examples of that. He learnt this from the Tibetan lamas, how to go to the supraconscious. And when he learnt it from them, he used it and made many people supraconscious, ego-oriented. You must have heard about the lama system, which was another big problem. They knew the future part, who is going to be the next lama. Where you will find him? Where you will get him? All the future things they knew and people thought this was Divine! To know future is not Divine. It is an area which we should never go to. Because it is an imbalance. We are human beings and we have to know the `present' and `not' the `future'. Once you go through the present stage then you reach a height from where you can see the past, the present and the future. Supposing on the Mother Earth, if you have a means of going higher and hang yourself there, then you can see whatever has passed through and you can also see what is going to come; and wherever you are, you are in the present. In the same way, when a person ascends in reality, in the present, he goes at this point in the supraconsciousness from where he sees the

supraconscious right side and also he can see the subconscious; but he has no interest.

He wants to rise in the present. And, this is what actually the Kuṇḍalinī awakening is.

So all those people who say that Kuṇḍalinī, in the awakening of the Kuṇḍalinī, it is very difficult and it is harmful, are the people who have no right to awaken the Kuṇḍalinī.

So when they try to play tricks, actually their sympathetic nervous system goes into great agitation. And this sympathetic system on the left and right side starts extracting more energy from the central path.

So, much so, that it gets exhausted and such a person becomes actually a mental wreck.

So many people who said, we are raising your Kuṇḍalinī by this method or that method, wreck the life of the Sādhakas. Ultimately they are left high and dry without achieving anything. Nobody knows what to achieve and what to receive.

So they are misled.

But logically one must understand, that at least your health should be all right. Mentally you should be better of. Your temperament has to improve; minimum of minimum. But if you are losing all your money to the Guru, you are losing all your health for this nonsensical experiences and you have no control over yourself, then you must know that this is not in anyway the reality. Reality is where you are in control. If you are in the control of something else, then you are a lost case. For example, some people start jumping and they say

“Mother I start jumping automatically." That is a serious affair. That means you have no control over yourself. You are just jumping because somebody is making you jump. `You' are not jumping: that means your own `chetanā' your own attention, your own awareness is under the control of somebody else; you cannot control yourself.

So all these experience in which people think, they are flying in the air or they are having extraterrestrial movements and people are going in the air and seeing things, all these are very dangerous things. Such a person may ultimately become a lunatic. Absolutely. Because he loses complete control over himself. These are called as parapsychological experiments, in America, to give it a big name `parapsychology'.

Of course, it is a para because it is beyond the psyche of a person; but is very dangerous. You are not supposed to get into these muddles where the spirits capture you and you start behaving in a manner that you cannot explain. Once, about I think five six years back or may be more, no about twelve years back, a group of Americans came to see Me and they told Me that “you must teach us how to fly in the air." I said “Why? Aren't you flying?" They said, “No we want to have that space travel." I said “why?" “Because Russians are doing experiments in parapsychology and we want to do the same." I said they will all get possessed and they will finish off. I do not want to do the same thing as Russians are doing. If they come to Me I will tell them the same thing.

So they said, “No, no we must learn." I said if I tell you that you become slaves of those spirits and of your own and you start shaking your body all the time. Despite

that they said “yes, we must do it." And when they told Me that because Russians are doing it, we want to do it, I said “who sent you here?" So they told Me the name of a gentleman, who is a journalist in Bombay [Mumbai]. I said “this fellow used to `suffer' from this trouble. He used to leave his body, go into another world, see this and see that, who suffered so much and he was losing complete control over himself and I `cured' him.

So does he think I can put back the disease in you? I cured him of this disease and why do you want to get into this disease?" But they were quite sure that they wanted it and I discovered later on they are having parapsychological business in America which is an `extremely' dangerous thing.

So this is the movement not crossing the Āgñyā but moving, floating on the left or the right, whether you go to subconscious or to the supraconscious. Effects may be different but is the same thing to Sahaja Yoga. The people who go to the subconscious area may start seeing Me also in different forms, like the people who take LSD they cannot see Me, they just see lights coming out of Me. And those who go to the subconscious area they start seeing forms and things in such a manner that they think, they have reached heavens. But they are seeing past of evolution, past of everything.

So this supraconscious business, is very dangerous, no doubt, but also the subconscious is very dangerous. Because all incurable diseases like cancer, malaitis, all that come from the movement of the attention to the left side.

So one should be very careful before going to any one of these Tāntrikas. Or to these people who are trying to control you or trying to tell you something about the future or the past. There is no need to know about the future or the past. What is the need? How does it help? Actually if I start telling you how I came all the way from there and how I was held by the jam or anything, will you be interested? How do you get interested in your past glory or past life, which was of no value at all today? But it is a human weakness that he wants to add to his personality something that is extremely artificial, non-existent and of no value. And then he says that I did this, I did this, I happened to do this, I never got it.

In India people normally go more to the left side with this Āgñyā. Because they say, worship God. Now if they have to worship God, they have no connection with God. See I had no connection to microphone, I could not speak to you.

So without connection to God, they start worshipping God. Then they will sing all kinds of Ār.tis, fasting, this, torturing their own lives. This is left-sided people. And singing the praise, all these things. Going to the extremes, 24 hours they are like that.

So somebody sucks them into the left side. If they go on saying, Rāma Rāma Rāma..... like that. You might say that Valmiki was told to say. But who told him? It was Nārada. Nārada is an incarnation, Nārada. You are not Nārada.

So how can you tell yourself or anybody can tell you, take this name? You take any name, you cannot go to God.

So where do you go? You go somewhere. There may be a servant called Rāma, he might capture you. And people start behaving in such a funny manner that they look like mad, insipid people.

Same thing about supraconscious. People who are very ambitious, they too can get into such a mad condition where they do not think of the collectivity of the whole, but they just start thinking about themselves. And when such a situation comes in, it is impossible to convince them that they are wrong till they reach their waterloo and finish off.

So this Āgñyā Chakra is a gate, is the door of heaven and everyone has to pass through it. Now on this Chakra resides the great incarnation of our Lord, Jesus Christ. In our Indian Shāstras, he is called as Mahāviṣhṇu, the son of Rādhāji. And His essences are made of eleven Rudras, means eleven destroying powers. But the governing essence the main essence, is that of Śhrī Gaṇeśha means innocence.

So he is the embodiment of innocence. Innocence means complete purity. And His body was not made out of Mother Earth, in the sense that He never had a body that was perishable. It is Omkāra.

So when He died, He ascended. That is the fact, He ascended. And because He was a person made of Omkāra. Now as He is the son of Rādhāji, you can see the relationship between Him and the relationship between other deities very easily. About Mahāviṣhṇu, it is written in the Devī Bhagavat.

But who reads Devī Bhagavat? Nobody has time to read these books. Mostly what trash things they read, there

you cannot find explanation of all these incarnations who have come on this earth.

So to understand Jesus Christ, you must read Devī Bhagavat. But if you say this to Christians, they would not like to listen to you. Because for them, Bible is the last word. How can it be? Because Christ's life is depicted there only for four years. And He must have reference in other books also; and we have to open our eyes to those books and see for ourselves what is the truth. Because if we want to have an organized religion, you have to say `this is the thing,' there is nothing else. Because if there is anything else, then your organization falls apart. But it is not true.

Because Christ has been described `very clearly' in Devī Bhagavat. And we can prove it in the Kuṇḍalinī, that when the Kuṇḍalinī rises and stops here, at the Āgñyā, here, you have to say Lord's prayer, otherwise.

It would not open. To awaken Jesus Christ, if you do not awaken Him, it would not open. You have to take His name otherwise it would not open, proves it was Christ who was ruling. Or even if you take the name of Mahāviṣhṇu, it opens.

So Mahāviṣhṇu and Jesus Christ are the same.

So you must see the `proof' of it. And just because you want to believe that Christ is your own and discard everybody else as heathens, you are sadly mistaken. Absolutely you are sadly mistaken.

In every scripture people have entered from the back door. Every, scripture. I told you about Gītā, what wrong things they have written about the food which is scientifically not true. To say that Tamo Guṇis are the

people who eat meat, is not true, because they eat protein and they have to be Rajo Guṇis, automatically.

So how they have tried to change it, just to suit their thing at that part. But in the beginning they could not, because they said, Kṛiṣhṇa said that “You kill these people. I have already killed them. Whom are you killing?" So just to bring this, you see. Brahmanic stamp, they did this.

In the Bible the mistake came when Saint Paul, who never knew Christ, he had nothing to do with Christ, just entered into the Bible. I don't know, why he is there! He was not a realised Soul. He was just supraconscious Roman soldier. Roman, very bad soldier, who used to kill so many Christians. And suddenly they entered this Mister Saint Paul into it and he is accepted in the Bible all over the world. But you read him and you will know he is not a realised Soul at all. He talks in a supraconscious way. He is an organizing machine and he is good for nothing.

There he describes, in the acts you see, which he has written, many people may not be knowing that acts has been written by Mister Paul himself and this Mister Paul tries to describe the disciples of Christ as supraconscious bhoots, absolutely like supraconscious people and they behaved in such a funny manner that everybody started feeling that they are mad. Can you imagine, Christ's disciples behaving like that! But you have to gulp it down and devour everything, if you are a Christian. Because it is in the Bible. And you start questioning if you are a born-realised person, that what is this nonsense, who is

this Mister Paul? From where does he come in? Because he does not talk like Christ.

So the time has come for all of us to understand that all religions are one. They are part and parcel of one life stream and that all incarnations are supporting each other, nourishing each other and caring for each other. There is `complete' concord between them. There is `no way', you will see they will oppose each other, `never'.

So this point is to be proved also and that can be only proved `if' you know how to raise the Kuṇḍalinī. If you are a realised Soul and if you can raise the Kuṇḍalinī you will be amazed to see that all these deities are placed on various Chakras and they are to be raised.

Now sometimes you see, I am blamed in India that I am preaching about Christ, so I am spreading Christianity and if I go to England, they say I am preaching about Kṛiṣhṇa, so I am spreading Hinduism.

Now if I have to tell you that Rādhāji has created Christ and if you see Christ, his fingers are like this. Try to understand. Two fingers like this. One of Kṛiṣhṇa and one of Viṣhṇu. And he says “the Father." And who is the Father of Christ, then? Is Śhrī Viṣhṇu: Śhrī Kṛiṣhṇa. Because in Mahāviṣhṇu's description, it is, Śhrī Kṛiṣhṇa Himself worshipped His son and said “you will be the support of the Universe and whosoever will ever worship Me, the fruits of that will go to you” and He placed Him even higher than Himself.

And that you can see that above the Viśhuddhi Chakra, stands Mahāviṣhṇu. And He is the gate through which everybody has to pass. He `actually' blessed Him special and He said “you will be the support of the universe."

See now you have known that Śhrī Gaṇeśha stays at Mūlādhāra Chakra. Mūlādhāra Chakra means the support of the Moola, support of the roots. But Christ is placed at the support of the fruit.

So the same thing evolves at that point, that you become aware of Christ only when your Āgñyā Chakra opens.

Now this Āgñyā Chakra can be opened when the Kuṇḍalinī goes up and opens it up. But supposing if you are too much ego-oriented, then you have turned it so tight say, the two ropes have turned it so tight that nothing can pass through. Or if you are too much of a superego and a frightened personality and dominated one, then also it is twisted so badly that Āgñyā Chakra cannot open up.

So what we have to do, is to give a balance through the Āgñyā Chakra by moving left to the right or right to the left according to the need, which you will understand in the technique of Sahaja Yoga, after realisation, not now. Now when the balance is established then the Chakras, the Āgñyā Chakra becomes little also better off, because there is no twist on it. And then only, when the Kuṇḍalinī rises, She can push through. If you are normal person, if you are not a ego and superego type, then there is no problem to raise your Kuṇḍalinī through your Āgñyā. But say in Delhi, since I have come, I have been working on the Āgñyā morning till evening.

People are `extremely' ego-oriented. They all think that they are the administrator of the whole World.

Delhi is full of this Āgñyā. Such proud and such vain people are here that they always think that they are ruling the whole World. They are the people who are the

administrators and the great people belonging to politics, this that. All ego-oriented.

And such people cannot be given realisation easily; first their ego has to be brought down and they have to accept God as the Supreme Being, as the Lord, as the Real King of the World. Then only it works out. Now when some people also try to spoil this Āgñyā like moving the eyes, the roving eyes. Christ,imagine!, specially mentioned that “They say `thou shall not commit adultery'; I say thou shall not have adulterous eyes." Just imagine! He talked of the eyes. Because He is controlling the eyes at that point.

But in the West, it is hard to find any man or a woman who does not have adulterous eyes, those who are the followers of Christ have such horrible eyes that you don't know what they are doing, they will go mad.

They cannot keep their eyes straight. All the times their eyes turning, this side that side, this side, that side. They have lusty eyes or they are looking at things or something else, but it is all joyless there is no joy! They are just looking at people for no fun at all.

[Shri Mataji talks in Hindi:] I will tell you in Hindi about an acquaintance [gentleman] that came to London. His wife was a simple innocent woman. When she came to London she saw that everyone's eyes were moving around.

So she asked Me “What is this?" I told her that this is called flirting. She asked Me “Why people do this [irting]?" So I told her, these people do things like this. Now what can I say why people do this [irting], I don't

know why they do this. One person likes someone else's wife and another likes someone else's husband.

Things like this keep going on. She asked Me “This keeps going on even after marriage?" So I said this even goes on till their death.

So she got very surprised and said “I do not understand this thing [irting].

What's yours belongs to you and what is someone else's belongs to them. What is the fun in all this?" I said ask these people and not just one, all of them are like this. Even our Indians who go there [London] become like them.

The situation here in Delhi in this matter [irting] is also bad. Among Punjabis [natives of Punjab state] there is a special thing (problem) but not in the Maharashtra State. Among Punjabis, they will turn their head to look [stare] at every women and until they will not break their neck they will not stop it, it's such a special thing (problem). I found out about this when I got married in Delhi [there is a big Punjabi population in New Delhi].

I used to study in Lahore and situation there was even more wonderful [even worse]. But this problem came because the parda [veil covering the face of a Muslim woman] was started. Now even that Parda [veil] is removed but still this problem is going on. Respect for women [treating them like sisters/mothers] is very less and that's why Christ said: [Shri Mataji talks again in English:] “Thou shall not have adulterous eyes." But this was all said as an order by Christ. Of course nobody obeyed it. On the contrary like I told you the Muslims were, it was said not to drink, they started having poems

written by Omar Khayam to challenge Mohammad Sahib. But among Christians they started challenging Christ, all anti-Christ activities, by which innocence of the people should be destroyed, by which their eyes would be destroyed and all the purity of mind will be destroyed.

And the another extreme started, which was `not at all' preached by Christ, I don't know how it came into Christian religion, is a thing called nunnery and making people Brahmacharinis and Brahmacharis.

You cannot make anyone Brahmachari or Brahmacharini. It is a state, avastha, where a person has to rise, like Yogeshwara, like Śhrī Kṛiṣhṇa. Despite all that he was a Brahmachari. It is a state of mind where you are not involved. It is a different thing, that you just load somebody with an idea that You should become, absolutely a Brahmachari or a Brahmacharini or you should lead a celibate life, forcing them. Christ never said so. He could not become a married man because He was here on this earth to do one great job, `Is to make this ascent through this Āgñyā Chakra,' that is why He was crucified. By doing this he was to create a space in the Āgñyā Chakra and that is what He did, at the command of His Father and His Mother. And He did it.

So the people who are doing all this nonsense of celibacy, which is not.

Which is not, because from the mind there is no celibacy. Celibacy must come from within, the purity must come from within. And that has created problem in Catholicism and also they started another big stuff like going and confessing to the priest. Now this is also another funny thing is to go to a priest. Priest is never a realised Soul I

have seen it. Because if he is a realised Soul he will run away from priesthood.

So they would go and confess it to the priest and the poor priest would become mad and the confessor would have a left Viśhuddhi, feeling the guilt. That was the wrong side absolutely of God. To feel guilty is not necessary. Then, after Christ there were people who would not accept Christ, like Jews.

So they said that we will not accept Christ and “we must suffer because we must suffer for God." Even now Christians believe nonsensically that we should suffer. Now, I would say Indians also believe that we have to suffer, but they also know that Mahāviṣhṇu is going to come and when He comes, He will have power to suck our Karmas and we don't have to suffer. Actually that is what happens when Christ is awakened within you, He sucks your Karmas, he sucks your ego and super ego. He sucks your Karmas, your Pāpas [sins], your conditioning and that is how you become free.

This is a very important point which people must know. That, that was the great job He did: was to establish Himself at the Āgñyā Chakra to suck these two things. And when He sucks these two, when He sucks these, then we are above our Karmas, our sins and our Pāpas.

So we don't have to worry about sins, Pāpas and all that. But these people we should say, those who came to this earth, as missionaries, who came down to India to preach Christianity, had no idea of Mahāviṣhṇu nor they had any idea of Christ.

They came with a gun in one hand and Bible in the other. And we stupid Indians also did not know any value of our

heritage and we just said “all right, let us become Christians so that they give us good jobs." And that is how all the job oriented, all sorts of people became Christians. But actually, they should have told that Mahāviṣhn.u is born. If they had read anything of the Devī Bhagavat and had told that Mahāviṣhṇu is born, then people would have given up this idea that you have to suffer for your Karmas.

So Indians are still thinking that we have to still suffer for our Karmas, we should fast, we should walk and we should hang ourselves by the nearest tree all the time. This is not needed. What you have to do, is to just wait for the moment when the Āgñyā Chakra will be opened. Keep in the center. As Buddha has said keep in the center. And then when the Kuṇḍalinī rises all this whatever is accumulated, will be sucked in and you can get your Moksha. This was the simple thing to be done. Instead of that we Indians believe we must suffer, we must go into fast.

Now in Sahaja Yoga you are not allowed to fast in the name of God. You may fast otherwise because if you have no money you can fast, you have to fast in any case. But not in the name of God or your Karmas. Then secondly, the Jews refused to accept Christ, as a result the Jews said that: we are not going to accept Christ, we have to suffer.

So, alright, they suffered and suffered and suffered.

So they got Mister Hitler to put them right; their sufferings. After getting Mister Hitler, now they are becoming Hitlers.

So you can imagine how wrong ideas can take you to such a limit, that as a result of this thing, `that we have to suffer'; that Hitler was born to support their wishes that they must suffer.

Nobody has to suffer any more now. You have to work out your Kuṇḍalinī awakening. And you have to establish yourself very well in Sahaja Yoga. All your sufferings are going to be taken away. One of the names of the Devī is Papa Vimochini. She removes all your Pāpas. `Sankat Vimochan' we call it `Śhrī Gaṇeśha'. He is the One who removes all the hurdles of life. And you really, when blessed, you can see that God has so many ways of blessing the people. It is miraculous. Absolutely it is a miracle.

So many people who are in Sahaja Yoga now, say that miracle has lost its meaning in Sahaja Yoga. It is a fact.

So, one has to understand that God exists. Not only He exists. He acts. He loves and that we are supposed to know Him. Whatever you may have done, wherever may be the mistakes, you have to become One with God. Because He is your loving Father. He is the Father who is the Ocean of love. And only thing you have to do, is to just ask for it and when the Kuṇḍalinī rises you become One with Him and He wants to bestow all His Kingdom, all His powers upon His children, whom He has created.

So all these funny ideas about religion that you have to suffer, that you must do penance, that you should become Brahmacharis, all these absurd ideas, should be given up. You have to be absolutely a normal happy person. God has done so much for you He has created so much for you. But even then if you want to be miserable,

what can one do? As far as Mother is concerned if you want to punish your Mother sometimes, or say, you want to just make her unhappy, then you say; “... otherwise I will not eat my food." So fasting is not allowed in Sahaja Yoga. But if you have to fast for food, other things, it is all right. But otherwise there is no need to fast except for one or two days, you have to fast.

And thus we understand that Āgñyā Chakra which is the most important door through which `every body' has to pass, everybody has to pass and that has to be properly worshipped and kept clean. For that You must keep your attention very clean. Your attention has to be clean. If your attention is soiled then your Āgñyā Chakra will not be alright. Then you will have hallucinations, you will have wrong ideas and you will think of wrong things.

So if you really want to find the meaning of your being, if you really want awakening of the Kuṇḍalinī, then know that whatever you have known so far about God or everything has to be revised, has to be again seen for yourself, what it is like. Unless and until you pass through this you `cannot' be baptized.

The people who talk of Baptism, like John the Baptist, he was really a realised Soul and when he raised the Kuṇḍalinī and put the water on the head, he really gave them realisation. That is `baptism'.

Christian means a baptized person, but not any Dick, Tom and Harry can put his hand on your head and say you are realised. On the contrary William Blake says, “the priest cursed on my head." It is true. For a realised Soul, if you put the hand of a priest who is not a realised Soul and who is not properly entitled to do it, children get

into problems. We have seen many children who are realised Souls, who got into problems, their eyes became squinty, they become funny, their brains went off and we have to cure them.

So it is a very dangerous thing to make everyone put their hands on this pulsating Fontanelle bone area which we call as Tālu. Tālu is the Brahmarandhra and is the `most' important part of a human being, so everybody should be `very' careful before they touch this. You have to be a realised Soul and you have to know how to do it, means you have to be a Sahaja Yogi.

So for your children when they are born you have to be careful. If they are realised Soul; more so. Because if they are not realised Souls, then their reaction is not so violent. But if they are realised Soul, they scream and shout and they cannot bear it.

So one must understand, though it looks like very traditional or anything like that, one must see that those things which are harmful to human beings must be given up. The time has come for all of us to give up those things which are not good for our health, which are not good for our spiritual being. The time has come. If you do not accept this, then only thing I can say as a Mother that “I am concerned about you." But it is much more than that. It is a dangerous time you are in.

And Āgñyā Chakra, if it is spoilt at the back, that means you are definitely possessed. At the back if the Āgñyā Chakra is caught then one develops blindness with the eyes open. Now, in India it is very common. The reason is we have very funny ideas about the Devī or the God coming into the body of human beings. How can that be?

It is again the same thing, supraconscious business. A maid servant who is all the time using bad words, who has no sense of cleanliness, who has no sense of holiness, suddenly becomes agitated, “Ho Ho Ho..." she goes on. And all the women, in Maharashtra it is very common, they will go and fall at her feet. “The devī has come, the devī has come" and now they fall at her feet.

And then ultimately they are caught up. Because they get the possession by a spirit. We had one very bad case recently where a man, he came to Me and he told Me that he cannot help, he has to touch the feet of his sister-in-law because she is a Devī. I said “Why?" “Because she gets into this agitation." So I told that if you think that she is a Devī and if you want to touch her feet you don't come to Me again.

But he became blind, absolutely blind! And when he became `absolutely' blind then he came to Me and then we had to put the Āgñyā Chakra alright.

Now how do you do it in Sahaja Yoga. As you have the photograph you may use it. Put a light before the photograph. Light is the way you cure your Āgñyā Chakra. Always. Light or the sun. Because Christ resides in the sun.

So what you do, is to put a light in front. Take another light behind and give an Ār.ti to your Āgñyā Chakra at the back. It is resided by Mahāgaṇapati and Mahābhairava.

So you just give it an Ār.ti and Āgñyā Chakra will open. But how do you open this? Very simple thing is that, any thought comes to you, you should say `I forgive.' This is the greatest weapon Christ has given us. You just say `I

forgive, I forgive,' and you can overcome your ego. This is the mantra for this Chakra in the front, where you just say `I forgive, I forgive, I forgive' and you will find your Āgñyā Chakra will open out and you will find your ego will go away. Forgiveness is one of the `biggest' weapons human beings have got. But they are so stupid if I tell them “Forgive. Now what is there not to forgive?" They say it is very difficult to forgive. I say what is so difficult? What are you doing? Are you doing something when you are saying, I am forgiving. Do you do something? Nothing. On the contrary when you do not forgive, then what is happening is, the person whom you do not forgive, is actually torturing you, while you are not torturing that person.

So this is the mantra of the Āgñyā Chakra in front and at the back, as I told you, you have to move the Light. Now somebody will, you see, one day they will do, two days they will do, that is not how the Sahaja Yoga is to be worked out. You have to really go all out to do it and I have seen people who had eyes which were all bent like this, they could never raise their eyes, are now, have open eyes, proper eyes with this working. It is `very' simple to be done. There is one more thing that happens to our eyes. When the Swādhiṣhṭhāna Chakra goes out of order. It is represented here at the back, which is `around' this back Āgñyā.

So when you have diabetes or anything like that, people start becoming blind. Because this Swādhiṣhṭhāna Chakra which is around, goes on pressing it and that is how, that part which is surrounding this center, oppresses and augments that center, so that the eyes

cannot see; there is no light. There is darkness and people have eyes open. You have seen many diabetic people get this blindness.

So first of all cure your diabetes through curing your Swādhiṣhṭhāna. And also you can use an ice around your Swādhiṣhṭhāna at the back. But first of all if you improve your Swādhiṣhṭhāna you will feel very much better.

So the treatment of the front side is with the light. And the treatment of the back is with the water. But the best is also to use the light or the water whichever way you like. Because if it is Swādhiṣhṭhāna you have to use the water but if it is `just' the possession, then you have to use, without diabetes, if it is a possession, then you have to just use the light. That is how we cure our Āgñyā Chakra.

Even Christ said I am the Light, I am the Path. Because He is the Omkāra. He is the path. And He is the door, He is the gate. And everybody will have to pass through His gate. He never told lies. But they crucified him. They just crucified him. One thing good we have, we are fortunate in this country, we don't have any organized religion. Thank your stars for that. If you had any organized religion, you could never have taken to Sahaja Yoga. Because according to organized religion you have to believe in one person and as if he has no connection with anyone, he is a lone person hanging in the air, he has nothing to do anybody else.

So `thank' God for this that it has not happened in this country. And that is how we have people who are more suited for Sahaja Yoga than we have in `any' other country because they are so conditioned. And it is a very

great blessing. For example now, Sāi Nāth who was the last incarnation of the Guru Principle. He was a Muslim. But all His disciples are Hindus. They are not Muslims. Muslims don't accept him even as God. Not only that, but there is one place called Hazimallang, where a Saint died who was a Muslim. But he told that “only the Brahmins” means the realised Souls, “must worship me." And so they had to appoint some Brahmin, which they did not understand, the word `Brahmins'.

They are Hindus who are worshipping a Muslim peer.

So the idea, that once you become the peer, once you become a realised Soul, then he has no religion. He is beyond religion, He `becomes' the religion. Then there is no binding for him, because a drop has gone to the ocean. Now he has become the ocean.

So for the ocean, there is no limitation. And because he has crossed his limitations, he is `above' all these things.

And that is what we believe in. That if he is a peer. If he is a realised Soul, then he is a realised Soul.

Once I went to a small village, called Miān Ki Tākdi *[UNCLEAR]* as soon as I stepped into the village, I felt `tremendous' vibrations. And I said “Who was the great saint who lived here?" So they said there was one Muslim peer *[UNCLEAR]*. I said “Whatever it is, he was a Saint." And when I was sitting and giving lecture, you will see the photographs, the lights came on My head seven times. And the seventh time then I put My hand like this. But nobody saw it, only I knew. And I knew that it was there, I was laughing with it. And then the people, you see, when they took the photographs, they could picture it.

So these realised Souls are all over and they are helping. They never enter into anybody, they never trouble you, they guide you, to the proper lines. They bring their Angels and they help you to come to the right path, to the right conclusions. And they never try to possess you, they never try to hypnotize you, or take you to the wrong side of life.

So when you are realised also, you must know that you have to know `completely' what is the reality. Go on understanding, trying to assimilate it, not to discard it because you are attached to another organization. There is `no' organization in Sahaja Yoga, you know very well. There is no grouping in Sahaja Yoga. There is no membership in Sahaja Yoga. `But' it is a living organization. It is a living organization.

So anything happens here, the whole body knows. We don't have to have organization written for this body. In the same way Sahaja Yoga works out.

But still I must say, as we have in our body different type of sensory system, we too have in Sahaja Yoga, people who just come in, just the beginners. They are not exposed to the truths which they cannot bear.

Then if they pass a certain line of understanding then they are taken as we say Nirvichar-Samādhi people, who are given certain facilities to enter into certain new dimensions and ideas. But the inner circle people are the ones who are in Nirvikalpa. Such people are only taken into consideration for teaching Sahaja Yoga. Anybody who tries to teach Sahaja Yoga, talk about Sahaja Yoga at the second stage just is thrown out, because there is a centrifugal and a centripetal, both the forces working. By

one you come in and by another you are thrown like a tangent. Nobody is anxious to have a very big group or anything. If it is big, well and good, one wants to save as many as possible. But nobody is going to force you, nobody is going to have any cheap sort of a circus for it. It is the desire of the people, who want to come in. It is the wish of the people, those who have to come, you cannot force them. You cannot force a person to get their realisation.

So this is what is today at the Āgñyā Chakra, I have told you. Āgñyā Chakra I have spoken many a times in England and in America and was very much sometimes `opposed' by some churches and things.

But I think if they want to exist any longer, they `better' take to truth and `know' that what they know so far is incomplete. They have to know the full of it. Because Christ could not talk much and whatever He said was written down by His disciples the way they understood. To understand Christ you have to have your realisation.

May God bless you.

If you have any questions, you can ask Me again today for awhile and then I'll make a move because today I was unusually late. But it happens. You have to get out of time. You have to get into timelessness.

You have to get deconditioned about timing. Those who see time too much, they must learn to get out of time. And that is very, very important, because time is according to certain auspiciousness has to be worked out. It is not to be worked out the way we think “this is the time" and I cannot be the slave of this watch. I have another watch of My own.

So it all works out that way. I am not guilty for coming late, but I'm sorry because you had to wait.

[Hindi.] Question: What is the reason for having dreams?

Shri Mataji: The reason for dreams is that when you are sleeping your attention moves either to the supraconscious side or to the subconscious side, your attention starts moving. And then you start seeing things which are connected with your subconscious or your collective subconscious and all this thing. And you may go onto supraconscious side where you see your future and all this thing. But the reason why you get dreams actually is that the unconscious, which is within you, or you can say the Kuṇḍalinī or your Ātmā is trying to guide you to the right path. And how does it guide you to the right path? Is through dreams. But these are misunderstood.

How do you understand these dreams because you are so confused. First you go deep into yourself and you touch the unconscious, sushupti stithi. But from there you come out. And then when you are coming out, you touch your subconscious or maybe supraconscious.

So whatever anubhooti you had, or whatever experience you had, of the depths of the sushupti gets confused and you don't know what you dreamt and you don't understand and you forget it. But those who are realised Souls go to their sushupti and see exactly what they have to know. Like many people in Bombay [Mumbai] when I came, they didn't know I was coming but they were at the airport because they got the dream.

So at this sushupti level, at the deep level you get the communication with God if you know how to go in and

come out fully aware. But if you get confused with supraconscious or subconscious areas or if you start, your Chitta is not so clear-cut, then there can be a big confusion.

Question: How can you compartmentalise? What happens when a person is a realised Soul? What is the state? When he is a realised Soul, what happens to a man?

Shri Mataji: See, the first thing is to say that “how can we compartmentalise it?" because is the ego and super ego is on two sides. Actually, have you not noticed in our body, everything is a compartment.

You see even a cell is a compartment. Everything has a boundary. It's not some sort of a… even the blood has to pass through the channels. It has to go through these arteries. Everything is a compartment.

There's nothing like something just left there like a pulp. If it becomes the pulp, you won't exist.

So, everything is in compartment. It's ego and super ego are like balloons and they are two balloons which can press each other, which can flow on one side. Now see the ego, though it is placed on the left hand side more, is placed like this on the left hand side more and this one on the right hand side is the super ego. Still the ego when it increases in size it starts moving on the right hand side and the super ego, when it starts moving, it starts moving this way.

So everything is in a compartment in our body. You are sadly mistaken if you think there's anything is in a pulp, nothing. Or something like a air flowing in. Nothing like

that. Everything has a channel. Everything is in a compartment.

Question: What happens to a man if he is a realised Soul?

Shri Mataji: Now that is, I have been telling you what happens to a man he is a realised Soul that his ego and super ego are sucked in and he gets a dent in the fontanelle bone area and the Kuṇḍalinī shoots off and he can feel the Cool Breeze coming out of his head and he can feel it in his hand. This is only on the central nervous system this happens. But so many things happen much more, how to use this power, what it means and all that you have to learn.

Question: In spite of tremendous stress on Kuṇḍalinī by Your Holiness, it is hard for me to reconcile myself with the fact that there is not the slightest reference of Kuṇḍalinī in the authoritative guides on Yoga, I mean Patanjali's Yoga Sutras or Gītā. Why?

Shri Mataji: Yes it is surprising that people will say... He says that in Yoga Sutras of Patanjali it is not written about Kuṇḍalinī and also about Gītā it's not written about Kuṇḍalinī. Is a fact because, you see, it was a secret science. It was kept a secret science, in My first lecture only I said, till the Sixth Century. In the Sixth Century, Ādi Shañkarāchārya for the first time opened his mouth about it. It was a secret science with very great Gurus like Janaka gave Realisation to Nachiketa. And in the same way Śhrī Kṛiṣhṇa did not talk about it, because you see even when Mārkandeya talked about it, people did not know what he was talking. They never thought him to be a sensible man.

Then later on as the people became into two compartments, one on the right, one on the left side, some started worshipping God in a devotion and in a Bhakti way, the another started doing yāgñyā havanadi things.

So whatever was required for these two types of things evolved and that's what developed. The central side of evolution was kept a secret. And even at the time of Śhrī Kṛiṣhṇa it was not mentioned, not a word about this thing was mentioned because this is an internal happening, it's Antar Yoga. It was not described, but Śhrī Kṛiṣhṇa hinted at it, that you have to have your Yoga. But how, He did not say because that was not the time. He was the one who laid the seeds. That's why He is called as Kṛiṣhṇa.

Kṛiṣhṇa means `kṛiṣh', the one who has done kṛiṣh.

So this one was laid, the sprouting had to come. Today it was to be told.

So I am telling you about it. Everything is not told at the same time. Same in Sahaja Yoga. We don't tell you everything at this state. About Āgñyā Chakra I have told you something, but not all. Gradually when you will be so aware, I will tell you. It has to be seen how far to be said at what time. And that's what was needed at that time was told by Kṛiṣhṇa.

So Gītā is the one which only tells you that this will happen.

But Gñyāneśhwara, who was born after the sixth century, in Gyāneshwari has written about Kuṇḍalinī clearly. Because, though Gītā it is not written, but he said, “This is how it is done." Gñyāneśhwara has written. Though he has written, it's not, it's the Gītā translated into a

common language, he put also the knowledge of Kuṇḍalinī. Because at that time, it was to be told. Before that, it was not to be told.

Shañkarāchārya in the sixth century did it, then Gñyāneśhwara did it, then Nanaka did it, then Kabīra did it. All these people did it. Not only, but even Mohammed Sahib in a way has talked about it, about the Sahaja Yoga and resurrection time. They all started talking about the resurrection time much later as they started seeing people getting it. Because to talk too much about the future is dangerous. That time Śhrī Kṛiṣhṇa was placed with Arjuna when they were at the war and that time He had to talk about the problems of hinsa, ahinsa and those ideas which we have about, wrong ideas we have. And that's how He talked on that subject. Whatever was the subject, He talked on that and He told him how to become one with God... not how... that when you become one with God, you become a Sthita-pragñya. He gave the idea as to what will happen to you. But how it will happen He did not say. That was left to Me to explain. They can't do everything, I have to do something, isn't it? Because if He had said how, then they would have said, “Give me Realisation." But they were not prepared for realisation.

Question: I have tried to go into spiritualism in the real sense of the word. But my health is deteriorating day by day.

Shri Mataji: Some gentleman has done spiritualism in the real sense of the word and his health is deteriorating. I have told you already what is the reason for that is, you take to spiritualism out of ignorance. There's no

spiritualism. There is no `ism' with God. Spirit cannot be `ismized'.

So, you take to Sahaja Yoga. Become your Spirit. You cannot `ism' it. That's one thing you cannot `ism'. You can have `isms' in everything. But Spirit is detached. It cannot be put into `isms'.

So those who say `spiritualism' must know they have done wrong. All right? You come to Sahaja Yoga and forget it. I know I am sorry for that. You are misled but God is there and Spirit is there. In Sahaja Yoga we promise you that. Whatever mistakes you have done, it can be corrected. [Hindi.] I would say that whatever I said today, you must take the tape and listen to it at home. I've said all these things already. But your attention should have been there. Now you take a tape from these people.

Listen to it. I've said the same thing which you are telling, that these are the problems of a big person who goes to these things and how he gets into problems. All right? So then you come to Sahaja Yoga. I know you are a seeker. And, if you are a seeker, that will be given to you. That's your right to have it.

May God bless you.

Question: Which will be the end of all the world and of humankind?

Shri Mataji: Which will be the end of world? Again, futuristic, very futuristic. Let's not talk about the end. Just now is the beginning. When the child is born we just don't think about his death, do we? So better be worried about the beginning of this new world that we have

started and don't think of the death and all those things. Forget it for the time being.

Question: [written question in Hindi from a Sahaja Yogi from Kanpur].

Shri Mataji: There's a gentleman from Kanpur he says that in Kanpur people are only interested in the physical curing. Have nothing to do with these wretched people, in this place. You just have nothing to do with them. If they are interested in material well being, Sahaja Yoga is not for such people. At all.

If they don't want to have God. Forget them. Let Kanpur be drowned in Ganges if they are like that.

Useless people. Absolutely. Why should you worry about them? If they don't want to have God. Don't waste your energy on people who just want to be cured. It's absolutely useless such people, they are very selfish, self-centered and troublesome. They are good for nothing. If they don't want to have God, we have nothing to do with them. We have no relationship with them. They can go to the hospitals, take expensive medicines and die there.

I don't like people who just come to Sahaja Yoga for only physical fitness. Is this is a hospital, or what? Reducing it to that level is not good. Anybody who thinks that he should help others, should start helping them in Kuṇḍalinī and not start curing people. Please don't do that. I've told a hundred times, don't do curing. Because what will happen if you start curing you'll start thinking that “I'm curing" and you'll get into supraconscious.

So better not do it. You just put yourself into state which is proper for Sahaja Yoga. Gradually people will know you and will start coming to you.

But as far as is U.P. is concerned, God save that country, that place. I am married in that place. I know the people. Useless, absolutely good for nothing. They made Sītājī go to Banbas, who can forgive them? All dobhis, that's all. U.P. wallas have a very great ego, you know. We had a servant who was from U.P. I am also married in U.P. I shouldn't say but I saw that very clearly. And we had another one who was from Madras [Chennai].

So he was very clean Madrasi [Chennaii] fellow, cleaning everything nicely, working very hard.

So I told this U.P. walla, I said that “If you don't learn all these qualities, one day you will have no jobs in Delhi and you'll all go out of jobs. You'd better learn all these qualities of Madrasi [Chennaii] people, how neat they are, clean they are. They take their baths every day. You're a lazy lump." So he said, “Ah, thika, inko to bartan majne dijiye hum to raj karange." [All right, let them clean utensils, we will rule.] They are all going to do raj, just imagine.

So one must understand that every place has its own problems. Out of them U.P. and Bihar, I don't know how it is going to work out. I am worried. I have already tried to send somebody to Lucknow to do something. My house is in Lucknow. My relations are in Lucknow. I've given Realisation to all My relations but they find it strange, the whole thing is so strange, you know. You don't know what to do with that place. Imagine a nawab married three hundred and sixty-five wives. Can you imagine

such a nawab living in that horrid place? Singing ghazals morning till evening. All dirty things they do. And I don't know if you can really bring them around.

There are some nice people. I wouldn't say there aren't. But on the whole, the whole system is based on something very nonsensical and to bring them around... Specially Kanpur is such a materialistic place, very materialistic. Very materialistic people. The Ganges flows, Ganga, Gomati, Yamuna, all these rivers are in the north, cleansing morning till evening, working so very hard. When will the people realise? So the Kanpur gentleman should come and settle down in Maharashtra. Rāma also had to leave with Sītā. [Shri Mataji says sorry in Hindi to people in the audience who are from UP, the place of Shri Mataji's in-laws.] Question: When I give realisation to persons who have meager desire or to my own family members as there is no Sahaja Yogi?

Shri Mataji: No, no, no, no, no. Don't try your family members. That's not proper. Those who have no desire for Sahaja Yoga, you cannot push them in. It's impossible. Who is your family? These are your family.

Like Christ once they asked, “Your brothers and sisters are calling You." He said, “Who are My brothers?" “Your brothers are calling You." He said, “Who are My brothers?" He looked around.

Don't push your family members. All right? They'll become bhoots. Because if you push them, imagine, Āgñyā Chakra is closed, they'll go to the left or to the right. They'll become bhoots or not. Don't push them at all. What else? Question: One of my cousin brothers here in Delhi where I'm staying drinks wine but does not want

to come to the Sahaj Yog program in spite of my persuasion as he's convinced that he simply can't drink or smoke after attending the program.

Shri Mataji: You see, somebody's brother doesn't want to come to Sahaja Yoga program because he thinks after coming to program he cannot drink and smoke. Now, I would say that you need not tell him this secret that after Sahaja Yoga you don't drink and smoke. You need not tell him. Once you bring him and he gets Realisation, he will not do it.

So let us manage it on that level. Better not tell him if you are interested. I don't say. Did I say, `Don't drink, don't smoke?' Did I say so? I don't say so. But it just happens.

So just let it be, let them come as they are.

[Hindi.]

***Contents: 1983-02-04*, Public Program, The Sahasrāra Chakra, N.D.M.C.**

Park, Hanumān Road, New Delhi, India

Today is the last day, ah, in this pandal and today I'll be telling you about the last center of Sahasrāra.

They are all coming. If I come late it is better I think [laughing]. Still I was quite late I was thinking.

Do you think this is needed on the eyes so much or are you not getting My picture just? This one if you could little bit push it the other way. This one is too much. That's thank you. Ah.

So, this last center, the Sahasrāra, is contained in the limbic area of the brain. Our head is like a coconut. The

coconut has the hair and then a hard nut and then a black covering and inside is white shell of coconut and inside is the space, the water. In the same way, our brain is made. That's why coconut is called as Shrīphala. Is the fruit of the power that is Shrī. Śhrī power is the right side power and the left side power is the Lalitā power.

So, we have two Chakras, left side, here, is the Lalitā and right side, here, is the Śhrī Chakra. These two Chakras are working out the right side Mahāsaraswatī's power and left side Mahākālī's powers.

Now, the central power is the Kuṇḍalinī. That has to rise and penetrate through different Chakras, enter into the limbic area and enlighten the seven Pīṭhas, seats of these seven Chakras.

So, it penetrates through six Chakras, enters into the limbic area, enlightens all the seven Pīṭhas in the brain, which are placed along the midline of the limbic area.

So, we start it from the back, is placed here, at the back, is the Mūlādhāra Chakra. Around it is the Swādhiṣhṭhāna, then is the Nābhī, then the Heart, then the Viśhuddhi and then the Āgñyā.

So, all these six centers are combining to make the seventh center. This is a very important point, which we should know. Now, the Śhrī Chakra is the right side working and the Lalitā Chakra is the left side working.

So, when the Kuṇḍalinī doesn't rise then we do with our right side our physical and mental activities.

So our brain is doing right side activity and that's why our brain is like Shrīphala.

Sahasrāra is actually is the assemblage of these six Chakras and is a hollow space, on the sides of it there are one thousand Nāḍīs. And when the light penetrates into the limbic area, then the enlightenment of these Nāḍīs take place and you can see them as flames, very gentle flames burning and these flames have all the seven colours that you see in the VIBGYOR [rainbow]. But the last one, ultimately becomes again integrated and it is a crystal clear flame. All these seven lights ultimately become crystal clear.

So, you have Sahasrāra with one thousand petals, as they called it, but if you cut the brain in a transverse section or horizontal section, you will be able to see that all these nerves are built like this along the limbic area, all of them are like a petal and if you cut it like this, you will find that there are many nerves in every bundle of nerves.

So, when it is enlightened, you can see Sahasrāra as a burning bundle of flames.

When I'm speaking you should not do all these things, please. They are still coming and just disturbing Me.

This a very deep subject.

So the, when the enlightenment of the Kuṇḍalinī takes place in the brain, then the truth is perceived through your brain. That's why it's called as *[UNCLEAR* Satyakhand], means you start seeing the truth perceived by your brain because so far whatever you see through your brain, is not the truth. What you see, is just the outer side, say, you can see the colours. You can see the different aesthetics of the colours. You can see the quality of the thing. But you cannot say whether this carpet has been

used by some saint. You cannot say whether this is made by a devil or a Divine person. You cannot say that this gentleman, is he a good person or he is an evil person. You cannot say if this Deity has come out of the Mother Earth or not. Also, you cannot say about any person, who is your relation, whether he is a good relation or a bad relation, or what sort of a person he is, whether he goes to wrong people or to the right people, whether he has connections with wrong side or with good side. Here good means Divine.

So actually you do not know anything about divinity with your mind, nothing. Nothing, is impossible for you to judge a person about his divinity unless and until the Kuṇḍalinī reaches at least this part, which is the limbic area. You cannot make out whether a person is real or not, whether a Guru is real or not.

Because divinity cannot be perceived through your brain, unless and until this light of your Spirit shines into it.

Now, the Spirit is expressed in the heart, is reflected in the heart, the center of the Spirit, we can say, is in the heart. But actually, the seat of Spirit is above, here [puts Her right hand above Her Sahasrāra]. And that is the Spirit what we call of the God Almighty, Who say, Whom you call *[UNCLEAR* Parvardigar], you call Him Sadāśhiva or you can call Him, ah, the Rahim and you can call Him by many names which are said about the Lord who is God Almighty. Neeranjan, they call It, Neerankar, every sort of words which start with Nira, Nihi.

Now, at every center in the body you'll receive a different type of joy. Every center has a different type of joy and there are names for every types of joy you receive at

every center when the Kuṇḍalinī rises. But when the Kuṇḍalinī comes into the Sahasrāra, then the joy you receive is called as Nīrānanda, Nīrānanda.

Now, Nee means nothing else but Ānanda. Nīrānanda. Also, is surprising, My name is Nīra, also, in My family I'm called as Nīra. And Nīra also means Mary, Maria. Because it means marine. Nīrais water. Nīra means water in Sanskrit language. It is called as Nīrānanda in the brain.

And this stage ultimately unfolds. First what you know is the Satya, is the Truth, what is this another gentleman is suffering from, that you see on your fingers. First you see your fingers. With your attention you know what Chakras, what fingers are catching, with your attention. Then with your brain you can depict what center, which is catching. Because, if you say this finger, that doesn't mean it is Viśhuddhi Chakra. But your brain then says, `It is Viśhuddhi.' And that depicts it that this fellow is suffering from the troubles of the Viśhuddhi Chakra. But still it is rational. Because you see what finger it catches and then you say it. But when the *[UNCLEAR* Satyakhanda] or the Sahasrāra unfolds itself more, you don't have to think about it, you just say it. Then there is no difference between your Chitta and your Satya.

The enlightened Chitta and the enlightened brain become one. There is no problem at all for such a person, there's no need to see on the fingers, no need to say anything on the fingers and then depict it through brain. Which you have learnt in Sahaja Yoga, that if you find something wrong here, it means Āgñyā, that's not necessary! You just say Āgñyā. And you just say it and it is there.

Then it unfolds more. First it is integrated with, as I said, Chitta. Then, when it gets absolutely integrated with the Spirit, then whatever you say, is the truth. You just say it, it is so. That is how this brain unfolds into three new dimensions. First, it depicts the truth through logical conclusions. Because, I have told you that if this finger is catching then it is Viśhuddhi. And then you ask the person, “Have you got a problem here?" He says, “Yes." Then you believe in Me and then you believe that this is the Viśhuddhi Chakra, which is showing, is true. This is the logical conclusion, in a way, that you have experimented, you are seeing and still doubting whether Mother says it's true or not. And then, you are sure, “Yes, it is so, we have seen that this is Viśhuddhi Chakra." So, the truth becomes logically acceptable to his brain. But still, there is the brain working out on its gross level.

Then the second stage, as I told you, where you believe, you know for definite that this means Viśhuddhi Chakra, no doubt about it. Nobody. Then, then we start Nirvikalpa has started, when there's no doubt about Me or Sahaja Yoga. But then, the new unfolding starts within. For that, one has to do meditation.

In humility, one has to do meditation. And then also, for this new dimension, where your Chitta itself becomes merged into your brain or into the enlightened brain, for that one has to very honestly and humbly surrender to Sahaja Yoga.

Now, what do we do when we get our vibrations? We have different-different reactions.

Some people do not even understand the value of vibrations.

Some people try to learn what it means. And some people suddenly think, “O, now they are realised Souls, they can go on giving realisations, this, that." They go on a ride of a ego trip. When they go on a ride of a ego trip, then they find that they've failed and they've to come back, from the very beginning they start. It's like the game of Snake and Ladder.

So, reaction to vibration should be a very humble, receptive reaction.

Now, on the gross level, because as I told you that the brain is the one which holds the Father in it.

So, if we commit any sins against the Father, then this unfoldment in the brain takes some time.

So, we start reading books. And though people have told that first see the vibrations and then read the books, still we say, “O, what's wrong, we should read other books." You go down again, Snake and Ladder, as I said. That is one of the snakes. We think that, “What's the need to do meditation, I've no time, I have this thing, that thing." You do not progress.

The other point which is very gross. Also, there are some very gross people in Sahaja Yoga who enter into it. Doesn't matter. But first thing you must know you have to be honest, very honest in Sahaja Yoga.

The honesty is like, I have seen people. If we have a dinner, say, for a marriage party, they'll just crawl into it without having any self-respect, without having any understanding as to who is going to pay for the all this? They'll bring all their family, come down and sit down. There are people who avoid paying money which should be paid for Sahaja Yoga. Supposing, they're eating food

or they are travelling or they're coming from abroad, they have to pay money for their travelling, for their food. And, sometimes, you know I have to pay lot of money. Doesn't matter, I don't mind. But is not good for you, the main thing it's not good for you.

So, how you behave towards Sahaja Yoga as far as money is concerned is also very important, though it looks gross. But it can give a big trouble in the unfoldment because of the Nābhī catching and, as you know, if the Nābhī catches it can spread up to the whole of void. And if the void is catching Ekādaśha Rudra, which is placed here, the destructive forces, built-in.

So, before coming to Sahaja Yoga, it was all right, you're doing all kinds of things and you'd have smoothly gone to hell without any difficulties. It is very easy to go to hell. You can take two running jumps and go to hell. The rest of it you should see. But going to hell is the easiest thing. For that you don't have to work hard or do anything about it. But, when you are ascending, when you are rising, then it is little difficult. You have to be careful that you should not falter, you should not fall and that you are ascending.

So, you have to be very alert about yourself that you are not falling into the same habits, which you had.

Some people have a habit of saving money at the cost of Sahaja Yoga.

Some have a habit of making money at the cost of Sahaja Yoga.

Some people have habit of not giving the due amount and like that. It's something, you know, of cheating. They all go out of Sahaja Yoga in no time. They may be looking

like great leaders in the beginning, but they go out just like that. And many a time people tell Me “why don't You keep a proper account and all that?" But in Sahaja Yoga I'm not supposed to keep any accounts or anything. Because My accountants are Sahaja Yogis. If you try to play tricks with Sahaja Yoga, immediately you are pushed out; in your awareness, in your Nābhī Chakra you are never helped, you may make a thousand rupees here, but you will thousands of rupees by get into trouble. You will have any kind of a problem that I cannot tell you and then you will say, “How did I get this problem?" So, Nābhī Chakra if you are not honest in your seeking. Honesty of seeking not only means `I want to seek.' It also means what is your behaviour is, towards yourself and towards others. You have to be honest to yourself that you sit down for meditation, try to improve your Antar Yoga, try to make your, ah, thoughtless awareness, this feeling of thoughtlessness, wider and wider. Try to achieve that state where you really feel thoughtless.

So the honesty lies as you rise higher and higher, deeper and deeper into your own being. First you depend on Me, that “after all, Mother is going to do everything. When I went to Mother, my Sahasrāra opened out. This thing happened, then this thing happened." But what about you doing something that helps you to open your Sahasrāra.

So, opening of the Sahasrāra is very important.

Now, surprisingly, it is so placed that Sahasrāra has got the Brahmarandhra at the level where there is, I mean, at the point, where there is the Heart Chakra.

So, we must know that Brahmarandhra is directly connected to your heart. If it is not done from the heart, superficially done Sahaja Yoga, you can not go very high. You have to put your full heart into it, that is the main thing. Like, people they come to Sahaja Yog and they are murmuring behind. “This could have been like that, that could have been like that” all those things. All such people also are what Christ calls as “murmuring souls." He said that, be careful about these murmuring souls, those who go on murmuring behind and taking advantage, ah, as if, ah, they, they are trying to save others.

All such people also can suffer a lot. Because, they are doing a double game. And such a double game is very dangerous when you enter into the kingdom of God. Any kingdom you are member of, any kingdom, if you are treacherous to that kingdom, you are punished. But in the God's kingdom, it's so blissful, absolutely blissful, complete blessings are poured on, absolutely, with everything, health, wealth, mental, emotional, all kinds of prosperity you can get in Sahaja Yoga, no doubt. But when you are so much blessed, you are also forgiven and forgiven and forgiven and there is a long rope given to you to hang yourself. But you really hang fully, it's not half way.

So, those people who think they can be dishonest with Sahaja Yoga, have to be very careful; please don't do it. If you don't like to be in Sahaja Yoga, you better go away, is better; from your point of view and from our point of view also. Because, in case you are dishonest, you are trying to play tricks and games and you suffer and you

look funny and strange, then people will say “what's wrong with Sahaja Yoga?" So we will unnecessarily suffer. Because we cannot show you in the mirror, that this man has been very, very, āah, disloyal. We cannot show that.

So, it will bring a bad name to us, first of all.

And secondly, you will be harmed, by this kind of a thing. If you are harmed, then also we'll have a bad name that “how could it happened?" But if you are honest about Sahaja Yoga and about your seeking, you don't know how much God looks after you. Anybody who tries to do any harm to you will be very badly harmed and removed from your path. God protects you out and out and He looks after you with complete attention and care. And He's so loving that description of His compassion cannot be given in words but can be only felt and understood.

Now, the problem is, people who are dishonest are because of their background, sometimes, because of their education, because of their upbringing or may be because they are cowards. But there is also another thing that can make you dishonest, is your *[UNCLEAR* Poorva-Jan.mas] and that's how you take your birth and your Kuṇḍalinī is made like that.

But after Realisation, those people who are of a great valor and great strength ascend so fast that all the problems of the stars, all the problems of your Nakshatras and all that constellations, everything disappears and you become a Sahaja Yogi means a newly born, absolutely a different personality; it has nothing to do from where you have come. Like an egg becoming a beautiful bird.

So, this Kuṇḍalinī, when it arrives here, the first hurdle the Kuṇḍalinī has to enter into Sahasrāra, is Ekādaśha Rudra, is here. There are eleven rudra Shaktis, eleven destroying Shaktis placed here. Five on this side, five on the other side and one in the center.

These are obstruction within us, built by two kinds of sins we commit. If we bow our head to wrong type of Gurus and submit ourselves to their vicious ways, then we develop rudra sh..., rudra problems on the left hand side, these five go out.

If you have, I think it's other way round, ha, is the, if you have bowed, because I've never bowed to anybody wrong, so I don't know what to say, the mistake comes from there.

If you bow to someone who is a wrong type of a person and who is anti God, then the problem comes on this side of the thing, on the right side. If you have the sense that "I can look after myself, I'm my own Guru, I, who can teach me, I don't want to listen to anybody and I don't believe in God, ah, who is God, I just don't care for God." All such feeling, if you have, then, your right side doesn't catch, but the left side catches. Because right side moves this side and the left side this side.

So these ten things and one is Virāta Viṣhṇu, because also in the stomach we have got ten Guru *[UNCLEAR* Sthanas] and one that of Viṣhṇu.

So, the seeking is also wrong, as well as these ten Gurus are there. Then you develop this Ekādaśha Rudra. When this thing is settle, set in within you, as I said, one on this side, one on that side.

So, those people who are bowed to wrong type of people develop a temperament or a kind of a personality which is very vulnerable for incurable diseases like cancer and all that. You may develop cancer or any such disease, those who have bowed to wrong type of people.

Now, those who think, “I'm better than anybody else. I don't care for God, I don't want God, I've nothing to do", all such people develop the left side Ekādaśha. And left side Ekādaśha is extremely dangerous too. Because such people develop the problems of the right side, heart attacks, physically I am saying and all other problems of the right side.

So, one of the greatest hurdles of Kuṇḍalinī entering into Sahasrāra is this Ekādaśha Rudra, which comes from Void. And which covers the Medha, is the plate of the brain. And that is how it cannot enter into the limbic area. Even those who have been to wrong Gurus, if they've reached right conclusion and surrender themselves to Sahaja Yoga, accepting their mistakes and saying that “I am my own Guru” they can be cured. And those, who have been thinking that “I'm above all, I don't believe in God, who is God, I don't believe in any prophets or anything", anything against God or prophets is the same. Anti-God personality who talks like that, who develops the problems, gets all right if he humbles down himself and accepts Sahaja Yoga is the only way of, of entering into the super-consciousness.

I've seen people who have been Tāntrikas, are being saved. I've seen people who have done all kinds of wrong things have been saved. Those people, who were members of very funny, strange organizations have been

saved. But, it is very difficult to convince anyone that whatever they are doing has been wrong and they should come to right path.

So, a star came to play its part called Pluto and this star is the one which has brought cancer disease because, Pluto is the one that cures cancer, or all such diseases which are incurable.

So, those people who just go headlong into wrong paths, suffer from funny type of heart troubles, palpitations, insomnia, vomitings, giddiness, all sorts of ah, we can say irrelevant talking. It is a very serious thing to go to a wrong Guru and bow to him. Sahasrāra becomes a closed area for such a person. The persons who are against Sahaja Yoga, have a very strong Sahasrāra, like a nut, in the sense that it's such a strong shell that you can not just break it, it's a strong shell, like a thick nut. Even if you want to use a hammer, you cannot break it.

Today, the time has come, that you have to recognize Sahaja Yoga, you have to. You did not recognize any saints, any prophets, anyone, any incarnations. But today the condition is that you have to recognize.

If you do not recognize it, your Sahasrāra cannot be opened because this is the time when the Sahasrāra was opened and you have to have your Realisation.

So it's a very important thing that you have to recognize Sahaja Yoga. There are many people who say that “Mother, why to believe in Sahaja Yoga this way, we can just call You just Mother, You could be my Mother” you see. All right, doesn't matter. But you can't get your Realisation. And even if you get it, you cannot retain it.

So you have to recognize, recognition is the only worship of Sahaja Yoga. Recognition is the only worship when you want to know God in Sahaja Yoga. All the other Ganas, Devatās, Deities, Shaktis, are one in unison in Sahaja Yoga. And anyone who does not recognize Sahaja Yoga, They just are not bothered about you, what sort of a person you are.

For example, a man who worships Shiva, he comes to Me and I find his heart is catching, surprising. He says, “Mother, I worship Shiva, how is it, my heart is catching?" I said, “You have to recognize Sahaja Yoga. Just ask Shiva." And when he asked the questions to Shiva, then only the vibrations start flowing.

So, Sahasrāra takes charge that it makes you recognize and also it convinces you, to proves it to you.

And by this proving, even if you are not recognizing, then you cannot get your Realisation.

But those who recognize also, recognize partly, they take liberties, they behave in a funny manner without understanding that Who is this Person, Who is here? I've seen many a times, I'm talking, people are just putting their hand up, Kuṇḍalinī, they are just talking, chit chatting, I'm surprised. Because, if you have recognized, then you should know whom you are facing. Because, it's not for My good, I'm not going to lose anything. But only you, in your ascent have not recognized. That shows that you have not yet recognized.

And the way some people try to monopolize Me also, is absolutely wrong. There is no need to monopolize Me, nobody can monopolize. There are some people who say that “Mother must have misunderstood." I never

misunderstand, there's no question. Or, some people try to tell Me, “Do this, do that", that also not necessary. Try to open yourself to this protocol which is very important in Sahaja Yoga, which I have told for the first time today, that you must try to recognize in a full way. And if you do not recognize, I'm sorry, I can't give you the Realisation, which will sustain, I'll, it will start, but it may not sustain.

So, this is the simplest way of achieving your higher things is by recognizing gradually and recognizing gradually.

It is very difficult to tell anybody if something is wrong with that person, it's impossible. After Sahaja Yoga, I can tell you, this Chakra is catching, that Chakra is catching. But also because you know what does that Chakra means, you can come back on Me. “No, no, Mother, You see, it's not so. I'm not." That's not so, why should I tell you you are catching? You have to cleanse yourself with full honesty. But first thing is to recognize with full humility and understanding. Once you have recognized, gradually you will do everything that has to be done, you'll know, what is to be done.

Now the essence of Sahasrāra is integration. In Sahasrāra all the Chakras are there, so all the Deities get integrated. And you can feel their integration. That means, when you get your Kuṇḍalinī in Sahasrāra, your mental, emotional and your spiritual, everything being becomes one. Your physical being also merges into it. Then you have no problem, as to, “Yes, I love Mother. But ah I'm sorry, ah, I have to steal this money." “Yes, I know, I recognize Mother, yes, I know She is great, but I can't help it I have to tell Her lies." Or, “I have to do this

wrong thing, because after all, ah, I can't help it." There is no compromise with Me. It has to be completely integrated. Your Dharma should be corrected. You can not do anything wrong and then say, “I'm a Sahaja Yogi." You cannot. But for this, the strength comes from within. Your Spirit strengthens you. You must just put in your willpower that “Yes, let my Spirit act." And then you start acting according to the Spirit. Once you start acting according to the Spirit, you find you have no slavery of anything. You become Samarth, means equal to your meanings. Samartha, also Samarth means powerful personality.

So, you develop that powerful personality which has no temptations, which has no wrong ideas, which has no catches, no problems. But people who are sneaky, sly try to try, play some tricks are really harming themselves, not Sahaja Yoga. Sahaja Yoga is going to be, he has been and will be, is going to be established. Even if they are ten people in the boat, God is not bothered. It's only My botheration as a Mother. As a Mother, I want many people to come up in the boat. But don't try to jump back by doing all dishonest things.

So, this is what it is, simple, that you are integrated. By integration, you get the power to do what you understand and you have power to feel happy with what you understand.

So, you come to a stage where you develop this Nīrānanda. And this Nīrānand you develop when you are absolutely the Spirit. In Nīrānanda state there is no duality left, is Adwa advaitaita, is one personality. That is, you are complete integrated and the joy is not anymore

dented, is complete. It hasn't got a happiness and a sorrow aspect, but is just Joy. The Joy is not that you laugh loud, the Joy is not that ah you you're always smiling. Is the stillness, the quietude within your Self, the peace of your being, of your Spirit that asserts itself into vibrations which you feel, that when you feel that peace, you feel like light of the sun, the whole rays of that beauty spreading.

But first of all we are curbed down by our own personal, selfish, stupid ideas. Throw them away! We have them because we are insecure, because we have wrong ideas, throw them away. Just stand alone, one with God. And you'll find all these fears were useless. Our cleansing is very important and that cleansing comes only when you really practice the cleansing as told in Sahaja Yoga.

The Sahasrāra is the blessing of the heavens, I should say. It has worked out so well. It's very difficult to break the Sahasrāra. And when I really broke it, I didn't know that it would be that successful. First, I thought is still premature because there are many Rākshasas still on the street, selling their goods; and there are many fanatics who are calling themselves by the so-called religions they are following, not the real religion of the Ātmā. But, gradually it has taken its roots. Now, let this truth take its root within yourself through your Sahasrāra. And once this truth becomes absolutely the light that guides you, the light that nourishes you, the light that enlightens you and gives you a personality that has the light, then only you should know that your Sahasrāra is completely enlightened by your Spirit. Your face should be such that people should know that there's a

personality who's standing before you who is light. This is how Sahasrāra is to be looked after.

For looking after Sahasrāra is is important that you should try to cover your head during winter time.

Is better to cover your head during wintertime so that there is no freezing in the brain because brain is also made of Medha, means fats, so it should not be frozen. Moreover, you should not take too much heat on your brain. To keep your brain all right, you should not sit in the sun all the time as some of the Westerners do. Then your brain melts and you become a crazy person. Is a sign that a person is going out for madness, is something which I've told many a times that don't take too much heat on your head.

Even if you are sitting in the sun, keep your head covered. Covering of the head is very important. But the covering of the head should be done occasionally, not all the time because if you just put a very heavy band around your head, then the circulation becomes poor and you may have trouble with bad circulation.

So, it is an occasional opening of the head to the sun and to the moon, occasionally. Otherwise, you will sit in the moon and land up in the lunatic asylum.

Anything I tell you, you must know that in Sahaja Yoga, we have not to go to anything *[UNCLEAR* Ati/Adhi]. Even sitting in the water, some people will sit for three hours. I never said so. Only for ten minutes you have to sit, but with full heart. If I tell them anything, they'll go on doing it for four hours, there's no need do it for ten hours. Give your body different-different types of treatments, not all the time the same treat. The body gets bored or gets

absolutely ah, overburdened. Now, if you tell somebody, “This is your mantra." All right, it is to be used till you get rid of your Chakras, finished. Lo, something, some screw is to be put here; all right; now what you do, you put the screw till it fixes, you do not go on even when it is fixed. Are you going to screw it more and more so that ah, the whole thing gets spoiled? Is better that use wisdom. And for this wisdom, we must know that it is Śhrī Gaṇeśha or Jesus Christ who are placed on both the sides. Here is Mahāgaṇeśha, here is Jesus Christ. Both of Them help you to correct your vision, understanding and give you wisdom.

So, the wisdom lies not in sticking on to something. Sahaja Yogis are not stuck-up people. If they are stuck up, they are not progressing. You are not to get stuck up with ideas and stuck up with things. You have to be all the time moving and in the movement, it doesn't mean that you should fall from somewhere and people think, “Oh, we are earning such a lot, because we are falling down." You have to ascend in your movement, not to fall.

So, when you are achieving something in Sahaja Yoga, first of all you should see your health should be all right. Your mind should be normal. You should be a normal person. If you are still barking at people, then know that there's something wrong with you. Or if you are still sulking and still Tantrumish and if you are still in a bad mood, then think you are not yet a Sahaja Yogi. You can judge yourself, if you are free like a bird then it's all right. But that doesn't mean on the road you start singing like a bird and jumping on a tree. You see, any analogy I give to a stupid man, he can behave in a very stupid way.

But to a wise man, he discreetly uses it for a proper purpose.

So, one has to understand, Sahaja Yoga is known by the discretion person has.

Now, what happens actually that you get stuck with one thing, that is your Ātmā and the whole your being floats like a *[UNCLEAR* Patangas] does, or ah a kite that floats, goes all over the places, everything, but you are stuck to only one thing, that is your Spirit. And, if you could really do it, genuinely and honestly, not worry too much about your money and your families and other mundane things, just don't worry about anything, you don't have to worry, just give it a bandhan. If it doesn't work out, doesn't work out, finished. What's that wrong? If it works out, well and good. Not that your desire is important, but, “Thy will be done." First you say, “Thy will be done" that it is so surprising that your wills change, your desires change and whatever you say, is done. But when this also comes up, people develop an ego; so be careful. It's all done by the Shakti and not by you, by your Ātmā and not by you. You have to be the Ātmā and once you become the Ātmā, you become into Akarma where you don't know that you are doing it, it just works out. You don't feel, you are not aware.

I wish, after all these lectures, most of your Chakras must have been opened. But this is all My work.

You have to also do some homework. And, you have to also work and see for yourself. Be alert. Try to face yourself in the mirror and see for yourself how far honest you have become. How far clean have you been. How far friendly you are in collectivity, which is a very important

point in Sahaja Yoga. If you are not collective, if you are funny, if you are strange, if you cannot communicate with others, then something wrong. And then you should face yourself as you are and try to correct it. Because you separate yourself from yourself like I separate My sarī from Myself and try to clean it. In the same way, you separate yourself from yourself and try to clean it. This is the way Sahaja Yogis are going to ascend. When the Sahaja Yogis will ascend, the rest of the things also will ascend. Many Sahaja Yogis of this kind will impress so many people that they will also ascend.

So, the whole thing can ascend very fast. But you people who are rising higher should try to rise higher and higher without being aware of it, that's very important. Those who are also who think that others are higher than them are also sadly mistaken, because that's not so.

It's the whole that's rising. Nobody should feel that way inferior or in anyway low or feel insulted that somebody thinks we low. Let somebody think, what does it matter, Divine doesn't think so.

So, all these little, little things you should be careful about and otherwise it's very easy in this Krita Yuga achieve the ultimate goal of Ātmā sākṣhātkar.

I think today I have told you quite a lot about Sahasrāra but if you have any problem about Sahasrāra you may ask Me now but only about Sahasrāra and nothing else, is better to ask Me questions about Sahasrāra instead of all other things. You can ask Me questions.

Question: [Hindi.]

Shri Mataji: This is the trouble with you. You read some nonsensical books, Samādhi, Bindu, this, that, all that.

Now please forget it, please forget all these things. Sama-dhi, Samādhi means, first is the Nirvichara Samādhi. First is Nirvichara Samādhi that you achieve and the Kuṇḍalinī just comes out of your head. Sama-dhi means, the dhi means the buddhi. And when it has got enlightenment it means Samādhi.

So first of all, the buddhi gets enlightened, I just now I told you about that only, the first enlightenment. Now, the Bindu and this and that are higher stages. Ardha Bindu, then Bindu and then Valaya. But you should not be futuristic, just now if you have read some book no use trying to show off that. That's not a good thing. Just try to see what you are. Why do you want to talk about things which, which do not concern at this stage? Just now, supposing you are going by bullock cart, why do you want to ask about the aeroplane? Just now you go by bullock cart, then you get into the train, then you get into the airplane. All right? One by one, not like this. Because you have read the book, it's not doesn't mean that you are supposed to know everything. All these books are written by some sort of crankish fellows who have read something here and there and have put it down. But you must experience. I'm your Mother, so I don't want to give you big ideas, this and that. I want you to do the way we have to move. As a mother would say, “Now, this is the way you are. Now you are in the first class, so pass your first exam. Then you'll go into the second class, then pass your exam." Everybody has to go that way to mature properly; there should be no immaturity in a personality.

So all these books that you have read you better throw them away, there's no good. But if it is by some realised Souls you can keep them and think that they are higher people and we have to be at their stage. Only by reading the book you don't become those personalities, do you? [Hindi.] All such questions are there, one better than the other. I'll tell you it is such a empty thing, how can you be satisfied with empty things? You haven't got anything.

First of all achieve a state, first of all settle down, gradually you will know about it. By reading books you do not become anyway realised Soul, do you? According to Mister Kullkarni all questions are of this type, they are of no use. That only means that you have read some books, that's all, finished, nothing more that. And it's true. If you have just read some books you are just coming and quoting it, no use. Gradually come up. If you are honest and if you want to have it, then come up gradually. Just don't try to show off anything. You better give him writing.

Question: There are request that, You please give a part of Your lecture in Hindi, because some people can not understand English.

Shri Mataji: All right, you see now I've given My lecture in English. But I give My lectures in Hindi also in different places. Here I'm giving in English.

So those who want to hear Me in Hindustani can come to other programs.

[Shri Mataji is conversing in Hindi for two minutes.] Ka pustaki? [Laughs.] He calls it pustaki, pustaki questions, pustaki. You see it is nothing Divine, it's all pustaki. This is true. That's why I used to wonder why Kabīrdas once

has said, *[UNCLEAR* Pari pari pandita moora khabaye]. Now I know why he said it, because by reading people really become funny and they just try to test Me, My knowledge, or trying to show off their own knowledge. Ka pustaki.

Question: What is relation between Kuṇḍalinī, Prāṇa and astral bodies and soul, are they same in different forms?

Shri Mataji: Astral body, Prāṇa...

Question: Kuṇḍalinī and a soul.

Shri Mataji: Soul. Now this gentleman who has asked the question perhaps has come only today.

Otherwise I've explained most of these things. But for your benefit I'll tell you.

First is Kuṇḍalinī. Kuṇḍalinī is the pure desire to be one with God and this energy is placed in the sacrum bone, which is awakened when some authorized person from God can raise it. This is Kuṇḍalinī, is pure desire. Now Prāṇa is the Shakti, expression of the Shakti of the right side, that is Mahāsaraswatī's Shakti, is created out of five elements, called Prāṇa. Astral, what, Astral body. Astral bodies are in simple Hindi language are bhoots and they are the people who just come into your being and take your soul out. Never try these tricks, never. These tricks are tried in America very much and I've told them not to try such tricks and horrible things are happening because a person living in Geneva had a child and in are you know English people don't keep their children sleeping with them.

So the child used to sleep in another room and the lady, her grandmother who was fond of this child wanted to

talk to the child through this astral body business. At every night she used to talk to the child. Ultimately so happened that the soul of the child which used to call out cold not return back to the body and got lost and the child died. It has so many problems, astral body things have, that it is nothing but a dead soul from the left or the right can come into you and can carry your soul outside your body and you can be lost, you can be dead.

So this is something going just the other way round than the Kuṇḍalinī awakening. By Kuṇḍalinī awakening your Prāṇa Shakti and your Mānas Shakti are integrated and you become one with the Divine so your Super-consciousness is awakened.

[Hindi.] Question: I can feel the Kuṇḍalinī reaching my head, but I can't feel it come out and I can't feel the cool vibrations.

Shri Mataji: That is good.

Somebody is feeling the Kuṇḍalinī on their head, that is what Kabīrdas has clearly said, *[UNCLEAR* Shunnya shi khara bhara Anāhata bajine].

So the *[UNCLEAR* anadahata] is ah is hitting the fontanelle bone, but it is not coming out, that's it. Then means it has not broken the Brahmarandhra, as simple as that. Till it has not broken the Brahmarandhra you can not feel the Cool Breeze, it's absolutely spontaneous, it has to work out that way.

So is correct, your Brahmarandhra is not broken, that is your state.

So it has to break and the reason for that is something wrong with your heart.

If your heart is clean it will break, if your heart is strong it will break, but if you have a weak heart also it will not break, if you're suffering from heart trouble it will not break. It has something to do with your heart. If you are a seeker of other things than Spirit also it may not break.

So there are many reasons various reasons why this Brahmarandhra won't break. But what is a reason that we have to find out, yourself, you can face yourself and find out what's the matter.

Question: *[UNCLEAR]*.

Shri Mataji: Brahmarandhra. We'll work it out; we'll work it out for you, all right? Question: *[UNCLEAR]*.

Shri Mataji: Sit down, doesn't matter.

We'll work it out, don't you worry, it will work out. It takes sometimes little time, doesn't matter.

Why should you have fear about it, just it will work out. Yes, we'll work it out. All right? It will work out. Who else, what else is there? Question: One man says he had met Muktananda, now he finally want to be close to Sahaja Yoga meditation center... *[UNCLEAR]*.

Shri Mataji: Ah! This Muktananda *[UNCLEAR* Ribab Pribab] [Oh God! or Good gracious!] Terrible fellow. Ooh. There is a mantra for him. Who are the people of Muktananda just raise your hands please. Those who have written this letter about Muktananda, raise your hands please.

So now, we'll tell you the mantra how to get rid of the problem, all right? There's a mantra for that who he was in the past life and all that, I know and we know how to get rid of it. But you have to religiously do it, religiously do it and you'll get rid of. I know it has it has done lot of

harm to many people. But if those who are not anymore into the clutches, we can work it out, alright? So all those who are wanting to know about it you will know in our centers or if you can come on the sides I'll ask somebody to help you, all of those of that kind. Now, what else is there? Question and Conversation: [Hindi.]

Shri Mataji: Acha [OK]. [Hindi.] Those who have not got Realisation should come on this side and that side and all of them should be worked out. We have lots of Sahaja Yogis from all over the world and everybody must get Realisation, no doubt about it.

Question: Physically I am fit, no heart problems. My problem is that I think too much about myself.

Result is that I have become a psychic case.

Shri Mataji: All right, those who are a psychic case also should come this side, I will tell them how it arises, from where, all right? Question: Kindly advise, may I practice meditation in office keeping Your photo before me?... *[UNCLEAR]*.

Shri Mataji: No, not in the office, you can not do meditation in the office at all. You see, you have to be very careful. Actually, you see, office people are so gross and they will never understand Sahaja Yoga.

So best thing is first to talk to them about Sahaja Yoga, not about Me, don't even show them My photograph, because it's very funny that some people who see My photograph are frightened, they can't see Me. If they are possessed they even shake before Me.

So it's better not to tell them about Me, but about Sahaja Yoga, how you are health. Gradually with great care, like

a nice mother you must bring them to the position where they can receive Realisation. And then gradually open the thing, but not in the office, please, no, not in the office. You have to do it at home and you have to do it in the group where you meet in the centers. That you must do every week, that is very important. And once a month in the ashram, once a month in the ashram.

Question: Man says should one do yogic asanas and Prāṇāyāms? Should one do transcendental meditation, second question?

Shri Mataji: Cha transcendental kakya?, Transcendental meditation, Should we do?, TM., He's done? [Laughs.] He's done all that? Now, about Prāṇāyāma and about, I've already talked about it, but you might come now. Prāṇāyām and all these physical exercises of Haṭha Yoga now I'm already told that in Sahaja Yoga we too do some exercises, quite a lot of our physical fitness sometimes, sometimes for adjusting our Chakras and all that and for improving the bad moon you do exercises. But we have to know what Chakra is catching, there's a science. It's not done that your throat is bad and you are doing all the asanas for the stomach. All the asanas are not done. Like taking all the medicines at the same time.

One is for cold, one is for heat, it's like that, all the medicines we don't take.

So according to need of the person we do Prāṇāyāma also we do according to the need of the person, gradually we understand what is wrong with us and that's how we do the asana. Not blindfolded. First thing. Then about transcendental meditation less said the better. You have to see for yourself what others have achieved, you see.

When you go to Guru you must first find out how much money he takes. If he takes the money, just don't go, first thing. Secondly, how does he live, what is his style of life. Thirdly what others have achieved, what is their condition. Most of the disciples of transcendental meditations are now beggars on the street. And some of them are epileptic patients, I have seen so many getting epilepsy.

So if you have done transcendental meditation it is not meditation but it is anti-God thing.

So you have to first neutralise yourself, come down to normal conditions and then you receive your Realisation. We have a lady here who was a granddaughter of a Duke. She lost all her money and her husband was the director of one of these `ying squads' that he was having. He lost all his money and became bankrupt, this lady got epilepsy, he got epilepsy, her child got epilepsy, all of them got epilepsy. They came to Sahaja Yoga when they had nothing with them.

Today they are all right, all corrected and they are doing well. But we do not take a guarantee on anything because you have to also decide in your mind that you are not going to have this funny ideas because some of the TM people who come are so arrogant so egoistical, that it is impossible to manage them.

So it is your need, not our need and that's how you should come to a doctor as a patient comes. Then only it will work out. Otherwise don't waste our time, please.

That? Now all the questions are over and for the last time let us go into meditation here in this hall.

[Hindi.] Please close your eyes.

[Conversation in Hindi then pause.] Keep yourself steady.

[Conversation in Hindi then 5 minutes pause.] [Hindi.] There should be no shaking, nothing, be steady, be steady.

[Hindi.] Keep your attention towards the fontanelle bone area, towards the Brahmarandhra. Keep both the hands strait towards Me, strait. Not towards yourself, but keep both the hands strait towards Me.

Now. Now see for yourself from your head with your right hand on top of your head, if there's a Cool Breeze coming out.

[Hindi.]

Contents: 1983-02-08 **Talk to Sahaja Yogis, Our Goal Is to Become the Spirit, Universal Sahaja Temple, Ashram, 78 Kṛiṣhṇa Nagar, Safdarjung Enclave, New Delhi, India**

Speaker: We would like you to discuss is the difference in aims and aspirations between India and the developed countries, how they have progressed, the way history has taken them and also what they have to offer each other.

Shri Mataji: Aims and objects? Speaker: Yes, the aims and objects, how they have taken their own courses.

Shri Mataji: Apparently, India has the same aim as you had before. They are actually trying to follow you, apparently. In our political systems we are trying all your methods. In our economic development, we are trying all the past that you have followed and faltered.

In our approach to education, we are trying to follow you. In our mental development we are trying to follow the

west. Even the young people of this country are now trying to follow you, even copy you, in every way.

So apparently this is the condition of this country. Whatever you did about, say, twenty years back, we are doing the same now and we are getting into a state where the decline might start very soon apparently, I've seen. But as far as Myself is concerned, it was the other way round. I could see the future of the disaster of industry and development a long time back and also where all such people were blindly following the west we got into.

So My whole search personally was to go towards the roots, towards the spirit, towards the subtler side of life which we, in any case, sustain the human race. Now you will be amazed that you go to any Indian University, you'll hardly find four or five people to listen to Me. Whatever you are doing there, like jazz, or say all these discotheque business, hippism, everything is now followed in our cities.

So we cannot say that India is very much towards the spirit. It's the wrong idea.

All our leaders, all our bureaucrats, all of them still think that you are the happiest people living in the whole universe and they are blindly following your methods. They are going abroad to learn all your styles of disaster. And if I talk to them they think I am absolutely out-of-date person and they think I am just talking because I have no sense in My being.

So apparently in this country today we are not thinking of saving the world, but following the world into the disaster into which it is made. We are joining hands.

All the countries which are not yet developed, you see, we have two categories, one are developed and one are not developed. These brands have come from the west, that we are not yet developed; so we must develop because if their tail is cut our tail also must be cut and they are giving us money to cut our tail.

So the development they are putting in by giving us money, sometimes humiliating us and doing all kinds of things and trying to develop us. Of course, it is true that poverty anywhere is a threat to prosperity anywhere and that if you people are living well, or are having big *[UNCLEAR* shame up] then it's different, but overall picture of the west that I see is full of unhappiness, of darkness and hopeless conditions.

At least the developing countries have some hopes maybe of the disaster but they have some.

So now for you people to understand that you are facing a big shock is sensible because you are advanced in that direction. Now in the west whatever you have done still because of ego orientation your leaders are not willing to accept that you are in a disastrous condition. Your political systems are not going to admit that you are no good, that you have harmed yourself. It is too much for them to admit that they have committed this mistake because they will not eat the crop. Under this circumstance who is going to convince the Indians that, “You better take to another course"? What has gone wrong with the west is that they have never worried about their spirit. They have all that is spirit, all that is subtler life and have thought that it is better to master the bank, master all these things which they can master.

Yesterday as I told you in Hindi language that whatever you master is lower than you is not higher than you.

So if you have to go further, you have to go a little higher. You have to fix an aim to go higher and whatever you think, you can have or whatever things you can use for your purpose are lower than you. But if you want to be higher, then you have to be useful to that height.

So you have to be humble and you have to accept that if we have to be higher, we should allow that higher thing to do thus and surrender to that higher thing instead of dominating these lower things. Is better to submit yourself to something higher, because of ego this submission is an impossibility.

You cannot submit to the higher goal but the lower goal. Also, they have submitted because the matter is now sitting on their head. Now in India, since ages, it's a traditional country. Since ages, we have been living a different life. When ancient times, you see, now even the climate is so good, that you can stay outside in a forest. You don't need so many things in this country.

So in the ancient times so many people whom we can call as seers and sage went into the forest to find out what is the basis of human beings, what is the meaning of human life, what is the ultimate goal of human beings. And they found out that it is the spirit and they based all the Indian laws and Indian philosophies, music, art, dance, drama, every aspect of life, on the basis that we have to become the spirit.

But when we had the Western influence and Western education put onto us, everyone decided that give up what was traditional, what was old and take to this and

even if we really bothered at all about the ancient things in our country, it was more academic, so that you could write books, you could write something by which you can make some money giving some new ideas or giving some new samples so people might be attracted. There was not serious probing into the subject matter. It was just superficial way of dealing things and ultimately what was accepted in the west was Tantrism. It's the Tantrism that really has impressed the Western people. Nothing else that they could see something better, like you can say, that if you go to the sea, you find lots of mud coming up on the superficial level and that's what is being appreciated, not the depth of the sea where you find the pearls.

So with that they are now thinking that, you see, Indians are the people who into this kind of a Tantrism, that kind of a Tantrism and anybody who doesn't know Tantrism is not sophisticated.

At the same time in your so-called development, you had such horrible people there like Freud and others that you lost all your traditions. Your ideas about spirit, whatever it was, came through Christianity or any other source. Even the Christianity itself ruined the whole chances of going near God. But on the whole, what has happened is that the whole attitude of the human beings in the west now seems to be a sex point. They just want to be a sex point. I mean, absurd. That's what they are reduced to on one side. On other side is most surprising, is that with all affluence and everything, people are very stingy.

They are extremely money-minded and very, very stingy and narrow-minded people. Despite, you have all the

weapons with you, people are so frightened, they don't even allow a little baby to enter their house.

With the atom bomb at your disposal, they are so frightened of others. See in the immigration laws, more strict, in the Western countries than in the Eastern countries. Where the people are really having a problem, they have no problem of getting any number of people are coming. You see how many are there.

On the road if you walk, so many you will meet, how many are settled down here, but this fear has come into the minds of the mighty nations.

They are disgracefully generous. If they are generous it is disgraceful or they are extremely moneyminded, money-oriented. Nobody can believe it that how people are so much money-oriented in the west and Myself, you see, I was surprised that how could they be so much money-orientated while in the east, so far they are not. The advantage is, thank God, we are not developed, that we are not so money-orientated.

Once we get money-oriented, you see, the people who have money in this country are just the same as you are.

But we used to look down upon that kind of a community, like Marwadies and all that, but I find in the west most of the people are just like Marwadies; their styles are like Marwadies.

So instead of developing all the higher qualities which are within, you have just got everything outside; inside there is no development. It's all outside development.

So much load has been taken, so much has been put upon yourself, the norms you see, this kind of a glass is

needed for wine, that kind of a glass for this kind of an alcohol, that kind of a thing. Only, you see, ultimately what is the goal? I just don't understand! You see, you get lost. What is the goal of producing so many things? I just get lost. I don't find there is any goal. It is just a kind of a madness, a craziness to create more and more and more and like mad to run after from one want to another, to another want to another and go *[UNCLEAR* one/on] like that like mad.

That's all it is. What is the goal of a madman? I'm amazed the way people are money-orientated. It's most surprising and I asked somebody, I said, “Why do you need so much money? After all, you have so much money. Why are you so money-orientated?" They said, “Our lives is such, our lifestyle is such that you have to have that." “What is your lifestyle?" “We have to drink." “Must you drink? I mean, if you cannot afford why do you drink?" So drinking is a thing, very sophisticated, not in India. In India, somebody finds somebody's drinking, nobody will marry the daughter in their family. Of course, not these Westernites. I'm not a Westernite. Normally nobody will have a relationship with them.

So the virtues and the righteousness of life, which is the basis of life, the goal of life, is itself is in question.

So the goals they have accepted are all anti-life, anti-God, anti-human beings here. Yet, thank God, we haven't doubled up that pressure of the matter on our heads.

So still inside we are larger. I mean, there's a lot of room for us to grow inside. But the outside rules are so much and the forms and the whole sort of ideas, you see, which flows from the minds. Like the other day they said,

“Nowadays, you see, more fashionable is to have this kind of a dress." I said, “Why? Then what will you do to the old ones?" “We will throw them. This is the fashion." I said, “How did it come?" They said, “There's a fashion designer, somebody very well-known, in Paris, has brought in this fashion." But for what? I mean, there is no questioning. For what? Your dress was comfortable, good, nice. If it was all right, say five years back, why today suddenly this dress is going to be so much? You see to the point. The sun is rising the same way, the light is the same, the rain is the same. Now why your dress has to change every third month? These are all the problems, because, once you give up looking at your Ātmā, your brain starts working and the brain starts like a machine. It spins, goes on spinning, spinning, spinning, spinning ideas and these spinning goes round and round and you become nothing but like a spindle, completely covered with these strings.

So you have nowhere to grow. You just don't grow at all. Inside there is no growth; it is only outside. When people walk along, you find lots of plastic hanging around this side, lot of tins jingling that side and lots of steel hanging that side. You are walking very proud but inside there's not an elephant.

There might be just an ant carrying all these! But thank God in this country we are not yet developed, but I can't say that it will be like that, because we are very, feel inferior that we have not developed outside.

The inside development, nobody thought of that when you try to develop outside. You must have inside development, to carry all this junk. Also, you need an

elephant. Whether it is a junk or anything, you need an elephant.

So the inside elephant, if you make it into an ant and carry all this junk, then that junk becomes more important than this little ant inside, isn't it? And that is exactly what has happened in the west.

Now in India, so far, people still have some room to grow, because they haven't yet developed so many nonsensical ideas. The first time we had people here from the west and all the time what they were seeking was comfort, crawling into the corners of comfort. Anywhere they got comfort, they just crawled into it, you see and nothing but comfort and nothing but comfort.

So I thought another goal they have is comfort and the comfort is nothing but domination of this matter on you. You are not free birds. Your body always needs comfort. If you allow your body to lie down, in one pose all its life, it will be very happy. It will say, “All right, it will grow. I am eating my food. I am doing everything here. Only one bed is the house for me. I don't go out. It is always attached, to it, very nice bird." But if that is the goal of human life then I think you can't help.

So to get to comfort also is so much that they have lost the power to see that this so much comfort has made us slave and that we have no goal left; we have become like cabbages. Such lethargy! Nobody will believe that these are the same people who came in this country and fought us. Such lethargy and such heavy being we have become that unless and until somebody rouses them they cannot give up their comfort. To them comfort is the last end of happiness.

So first comes the sex point. Second is the comfort which is slavery. Now third comes the ego. Ego is the goal or expression of ego, is the goal of the west in every aspect. How smart they are, how they have befooled everyone, how they have been able to get rid of others, to outwit others, to laugh at others, to make fun of them, make a joke out of everyone and think that they are the wisest fools, is the goal of ego because you know ego makes you stupid. And so the goal of ego to make you stupid is so much that small, small things that the Western people do, even to an ordinary villager in India would roar with laughter to hear. “Oh! Do they do like that?" which the Western people might think, “Oh! We are great." So this is the trouble is that when the stupid people start laughing at others, thinking, “Oh! These stupid people and useless people” then how to tell them? You cannot talk to them because they think they are the wisest ever known because they are the best ever known. You can't tell them that this is stupid.

The wisdom lies in knowing your spirit, but yet it is hard to find yet an Indian. He may be the most westernized, a great miserly, useless fellow, or maybe a very narrow-minded westernized fellow in India.

You were just like him, to begin with but then you ended up into something else and now Indians are becoming like you.

So I cannot say Westerners are just people who are to be sort of like a caste, no. It is we Indians can become like you, exactly like you, even worse than you, but still because, you see, we have our roots rather deep we cannot uproot ourselves to that extent.

So most of the Indians, even today, believe that a saint is definitely higher than they are and to become a saint is a great thing. The aspiration of an Indian is to become the spirit. Most of them think like that.

But there are escapes of the mind that, “How can we become? We are householders, see. We can't help it. How do we have to tell lies in this country? Otherwise we can't exist. We have to do a lot of hanky panky. Otherwise you can't exist." All these excuses they can give. “How to feed our children unless and until you are dishonest?" So the other side of it is that the goal of Indians, now, apparently, again, is of course, I mean as far as the *[UNCLEAR* molarity/morality] is concerned, is all right, they want to look at another man's wife, they will give their daughters an education of remaining a good wife, creating a good society, but as far as the other moral side is concerned, is keeping the honesty of money and all that, that they will not do! So one side the people are miserly, because they think they are honest. You see, if they are honest, they are martyrs naturally, because they think if they have remained honest, they have done the greatest favour to God.

So they are martyrs.

So their money is very precious. Every pie they spend they must ask for. Indians believe in earning money some way or other and then spending it the way they like.

So I do not know which goal is correct. They are lost on this side and you are lost on the other side. But still in India, because of traditional training, parents still holding fort, better society is here. You will hardly find an Indian

who will believe in absurd thing, in absolutely obtuse, absurd and also anti-God things that you believe into, that's one. They have not reached that material development. I mean, it's like, you see, your brain developing so much that it goes the other way round and you become just a person who sees everything in a different angle, which is just the opposite of that.

So yet that much development has not come to us, you see, from concave to convex. You see, they have not developed.

So there is still some space with the Indians. But because you have seen the disaster you are facing, some of you, more thoughtful people who have not reached that height of idiocity, are very great seekers, ardently seeking, working it out. But Indians are not that much of seekers, I must say, because they still think that, “All right, we are to believe in the spirit. All right, good idea. We have to be the spirit." But partly the spirit and partly the other side of it, because they are better off than us.

So still they want to go halfway this side and halfway that side.

So Indians are not such good seekers. You are very good seekers but there is a convexity.

There is concavity but there is no seeking. Can you imagine My situation? Indians have no goal as far as spiritual life is concerned. Mostly, if they have it, it is so limited that it should help them in their family life, in their relationships with others, with their body, or with their jobs or with their marriages or little more, little more. That's all. They are very gross. The goal is extremely gross, of Indians is, that they want to achieve

a kind of an affluence that you have in their heart of hearts, you see, but they do not know the backs but they think we can keep the spirit as well as have the other side of it. You cannot.

You cannot serve two masters.

So now, what to do? They would prefer to choose this side; then to choose this play.

So the goal of Indians today is somehow or the other to make money. If somebody knows that you know a certain minister, then, they will be after your life! Tell the minister like this, will you tell your brother like this, your father like this, everyone, all of them will be just coming out with. I mean it is a very common feature with Indians. It's nothing. For them it's an everyday affair. To them to tell somebody to get thither, it's all gross. It's all absolutely materialistic. But that is what their goal is, not the goal of the spirit.

To believe that God Almighty is the only one who is going to deliver the goods. He is the father, who is the most generous father you could think of and He looks after our material side so we don't have to worry about it. It just happens that he looks after it, but they will come and complain, “My material side is just the same. I don't know what to do. Mother, do something about it” and then I will never do. On the contrary, if they say, “My spiritual side is not all right” that's a better idea. This is the difference between the goals, aims and objects.

As far as I'm concerned, I look at this side and that side and I don't know what to say, because all of you must have only one goal and that is to rise in spirit. Not related anyway, that they have to accumulate some wealth or

they have to do some sort of a material progression and on your side that you have to do some material regression. Like, you people believe if you become hippies, you will go nearer to God.

You will not because your brain is beyond hippism, beyond everything.

So you cannot. Your brain is ultramodern. How can you become hippie? You become primitive outside.

So in your dresses and all that, even if you believe reduce this, all this hair style and all that, inside the brain is a modern brain, you must know, extra modern.

So must understand that unless and until you bring the spirit into your brain, all these outside things are not important.

So it's a big confusion. That is, the modern times are the confusion that the Western people are confused. They have seen the value of this material affluence.

So they are trying to give up the material affluence style, that style. They are changing the alternate styles, but by changing the styles also, you don't achieve much that's another means of something else. While the Indians think that they are poor and God should help them to make them rich, that's another alternative style. This is also outside. Or they have no children; then they'll come, “Mother, I have no children." If they have too many children then they will have no job. You get them the job; then they'll say, “Marry my elder daughter to someone." Then you do that; then they'll say that, “Do this." But nobody says, `What about my Spirit. What about my Ātmā? Mother, what about it? What is happening to me? Where is it? Am I all right? Am I clearer?' So, to say that

Indians have the aims that are correct is wrong. Or to say that you people have correct aims is also wrong, because your aims may be that you want to become, meet God and you want to become the Spirit but it goes wrong because the methods you employ are all wrong.

But as far as the value of spiritual life is concerned, I would give the Western people more marks, those who are seekers. Forget all the dirty people. I'm not talking about the idiots, but I'm talking about the same people. The spiritual value is much higher while the Dharmic value of the Eastern people is much higher.

So, it's like somebody who has a lot of property and doesn't want to gain and somebody who has no property and wants to gain.

So this is the situation today I find in the east and west. But basically from the ancient times in this country, people have been seeking; some of them not all, because seeking has always been done by one person or two persons or three persons.

The first fish must have come out and then shores of fishes must have followed.

So the goal of the fish was to come on the shore and many must have followed.

So in this country, the search within, actually started a long, long time back. But in the west, it was never done that way. They had people like Christ who never needed any search, like Me. I don't have to go searching, searching. He brought all the truths of life to you, but you made a complete mishap. Here also, we had great saints and great incarnations, but the saints are the people who told that you must seek, you must seek, not that Christ

didn't say you do not seek. But nobody's bothered on that point, whether you should seek or not, but in the east people know we have to seek. We have to get to God but to get to God for what? Just that we should be benefited in our material life.

So this goal is of no use.

“Mother, you are very kind” some of them say. “Be kind to us." “Mother, be kind to us” for what? What kindness more do you want? I have given you the spirit, finished. Now what more kindness? “But that doesn't mean you have give us our realisation, but now look after my bank balance." It's a very poor show. It's a very, very poor show and that's why I get disappointed when I come here. I find this kind of an aspect of Sahaja Yoga, I feel very disappointed. But I go to the west and very seriously, they have problems which I just don't understand, because these are no problems because materially they are all right.

So they have emotional problems and absurd emotional problems they have and these emotional problems, also, have no meaning at all. They have no basis at all. They just try to find out a way and method of not living together.

Somehow, somehow, you see, their brain is so clever. First we were all right, but now suddenly we have become bhoots. How do you explain? We were doing well. Now fourteen people are married. I'm just worried about the Western couples because the brain is still thinking, “Now what should we find to quarrel with the other party? What is the difference between the other party and myself? Now, how to ruin the image of each

other? How to ruin the joy?" Because if you cannot live together, two persons, how can all of you live together? Not only that you two human beings but you are saints. You are Sahaja Yogis and you have no tolerance from each other and you are just analyzing each other when there is no fundamental problem.

I can understand if somebody has a fundamental problem. Just with your brain if you start doing like that, then how can the whole world live together? Just think of it. Here the husband, wife will stick, no problem. They will live. Children will stick together, no problem on that point. But the problem that comes to Me is collectivity, that I must solve now, not the problem of one person, but all of them. Even when they are sticking together they do not become a powerful unit. On the contrary, they become a powerful problem.

So the aim as it should be, whether east or west, should be to be what you are made for. You are made a human being to be the spirit.

So the aim should be that you should be the spirit. You have to think through the spirit. You have to understand through the spirit. You have to be satisfied through the spirit.

You have to be certified through the spirit and not through your brains. For both of you people, the aim should be the spirit. This I'm talking of the new race that are going to come.

So the Western problems are that they do not recognize spirit and the Eastern problem is when they recognize the spirit, but are materialistic and the Western people do not recognize the spirit but are materialistic.

So they are keeping a balance on that.

Now, what I have to say is this. This matter is produced for your joy and happiness, but even the essence of the matter you are not enjoying because you are not the spirit. Even the essence of the matter, you are not enjoying.

So what you have to do is to become the essence yourself and enjoy at least the essence of matter. The essence of matter is not comfort by any chance, is not, is not possession that it gives you, or the surrender it gives you, neither the ego that you receive by having a big car and this and that, but the essence of matter is the joy one receives when you part with it. If you don't have anything with you, you see, if I don't have any money, then I don't know what the joy of parting with it is, giving it to someone. But supposing I have the money, then only I'll enjoy.

So you must have money. That's the only reason why you must have money, so that you can give it to others. Actually, this is the essence of it.

That way Indians are carrying on more of the essence part. The first part of gaining money is wrong.

But giving money is all right. They enjoy giving. You see, somebody goes to their house. They would love to give them tea, coffee, serve food. All that, they like. Anywhere you go to their house they will not on that, they would like to give. But how did they get their money, you don't ask. That's a different point, but when it comes to giving *[UNCLEAR]* so they know the essence part, I should say, that giving is the way.

While in the West, the more important thing is that how you get your money, you see. Otherwise, you are middle class, or this and that. How you get money, you see, that part of thing is there, but you get to it, through that kind of an idea. Then you just stick onto it. It doesn't pass your hands.

You are literally frightened to part with it.

So you miss the point. That's why the Indians look so generous, so happy, that they are keeping to the essence of the matter. Sharing, they love to share and that is what is keeping them so happy and joyous, despite their poverty, despite their frugal life and this is what I just don't understand and that once you don't have you want to give and when you have it, you don't want to give it.

Human beings go on changing their goals, depends on what level you are. If you are a poor man, you want to become rich. If you are a rich man, you want to become poor, but poor in the sense, poor inside, not outside. Now, actually the goal of every human being is to become the spirit, nothing but the spirit.

That is the goal of every human being and if you don't become the spirit then whatever you are doing is against your goal. Once you become the spirit, no more this human being, but the spirit, then the whole thing changes in a different way. You act in a different way, you use your telecommunication, you use your television, you use your things in a different way, at a different level, at the unconscious level.

So you have to reach to that unconscious level, where everything is available, everything. That's how these miracles take place. Like, the other day, you see, we

wanted to buy some sarīs and I just stopped and said, “Here." Now we got the sarīs for one-tenth of the price, we should say, or one-eighth of the price of the whole of the sarīs that you get in the market.

So? So when the spirit guides you, you get everything.

There is affluence and you are generous because so much of affluence in the real sense, flowing.

What I can only tell you is what goals you should have and the goal as I told you is to be the spirit.

That's what is your goal. To Me, east, west, north, south, doesn't count. I don't know the directions.

I only feel that if every human being in this world decides that he has to be the spirit and spirit alone, all other problems will be solved, because he lives with the absolute, not with the relative. He doesn't compare. He's in absolute state. He doesn't compare. There's not relativity. The relativity creates a problem. Like developed, underdeveloped, all these are relative terms, isn't it? But if you are the absolute then there is no relativity, there's no problem and you become the goal itself and this is the message of your Mother. I have to give you the message; I have to give you the right thing. It is not that the Western people have less quality, or the Eastern people have less intelligence, it's only that, they have no idea as to have only [next continued from Nirmalā Yoga, Issue 29 (Sep-Oct 1985), pp.32,35] `single-minded' goal to be the Spirit, in both the cases. Once you decide on that, problem is solved.

A day may come when Westerners will be more Easterners than the Easterners. I mean, you see, in the West when the Indians go there, `the uprooted ones',

they are much more Westerners then you people are. They cannot understand Indian classical music, they dd not like Indian furniture, they do not like Indian paintings, nothing. Because they have lost that subtle side of life, they just see to the superficial side and they live like that, While you are becoming subtler. Because whatever was there hankering in them [Indians] little bit of the Spirit is lost as soon as they went away from here. They get mixed up with the West, they just got transformed into Western life and they have accepted it. While now you are transformed into your Spirit.

So you like the life of the Spirit. But to say that Indians today are great people of Spirit, I must say, to be honest, they are not at all. Because of their past traditions here, because of this Yoga Bhūmi of course, they cannot uproot themselves, but they are trying very hard to get themselves uprooted. All of them, are trying very hard to get uprooted. Even Sahaja Yogis, when they come to Sahaja Yoga, they are still not trying to go downward towards the Spirit, but trying to use Sahaja Yoga for building up so-called their complexes about their material life. It is so. It's a very sad thing, but that's a fact.

So it is meant for all the Westerners and the Easterners that don't be on a firm opinion about yourself.

Today who look to be lost may be the people who might guide you. Might be one day that it is those people who were thought to be absolutely gone cases will have to fetch you out of your own problems.

So everyone of us must honestly decide that, “We have to be the Spirit, that is the goal of life." Then all problems

are solved. But when I say this, you fix it like that “Mother has said that all problems will be solved, so take to Spirit", is again relative.

No, take to Spirit. “Mother has said take to Spirit, alright we take to Spirit." Even why say, “Mother has said it” but say, “I say l will take to Spirit." Keep it at that point.

So, by God's grace all the humanity will rise at a higher level than what they are. Actually, the level at which the human beings are, are called as `Loukika', means the gross type. To go to the subtler, or the `Aloukika', you have to give up using this brain. But you have to use the Spirit. And if the Spirit is not available to you then what will you do? Anything that Sahaja Yogis are doing today; say, a marriage. Now, you are Sahaja Yogis and you are married, but you are married `in Spirit'.

So that is to be kept aoat, one must understand. If you keep that aoat you'll be amazed you'll enjoy that marriage, enjoy the whole thing and you'll have the best of children born to you.

But for that you do not seek the Spirit, again. This is how the Mother tries to tell you that, “Do this, then I'll give you one peppermint." But if you are mature then you don't listen to these things. You just say, “Mother, whatever is right that's what I have to do. Because I'm here to do the right and I'm convinced that you'll always tell me the right thing to do.

So I'll do the right thing." Such a decision anybody who says or takes, whether he is north, south, east, west, any side, he is the Yogi. He is the one whom God is going to Bless. But again for `that' you should not.

The goal should be a higher goal. But the higher goal should not be seen relative to whatever are the lower goals. Accept the higher goal in an absolute way. Otherwise ascent would be slow.

Alright, what is the second question?

Sahaja Yogi: I think Mother you've answered the second question which was “What is so important about Self-realisation?"

Shri Mataji: No, but that I've not given. `The importance of Sahaja Yoga,' I've not given.

Now, what is so important for human beings to become human beings.

So the importance we have not to see from your own angle, but from the Creator's angle; because you do not understand your importance as it is. Human beings never think, `Why have I become a human being?' Do they? So they have no sense of importance about themselves.

So how can they have sense of importance about Self-realisation? From human point of view I would say, “Because you have to ascend." But why? I would say: “So that you will get your `Kshema', your well-being." But for what? “When you will become the Spirit, all your problems will be solved." But why?... you see, the human beings are like that.

But it is important because, “The most important thing is your Creator and He wants you to have your Self-realisation." Is the absolute thing. “If He wants it, alright." How many are there who will say, “Alright, if God wants us to do it, we'll do it." Just for God's sake: “Thy Will be done." “He has arranged it, He has made us human

beings, let Him make whatever He wants out of us." This is absolute again. Surrendering to God has to be there before understanding this problem. “Thy will be done" should be your first attitude, before attempting to understand this answer of mine. “Is the will of God; God who has created us, God who has made us human beings, God who has given us everything. God who has given us Sahaja Yoga.

So it is the Will of God that we should be the Spirit, so we will be." What have we given to God, so far? We have been extracting all His energies, we have been extracting the Mother Earth, from the Sun we are getting this, for everything and we are creating problems for Him, we are troubling Him so much that He has to solve our problems.

So let us be surrendered to Him.

So that is His Will that, “He wants us to be the Spirit, so Let us be the Spirit." This is the greatest importance of getting Self-realisation.

But if you cannot stay to that state and you come down at a human level, then I can write a book saying that, “Self-realisation is very important because without Self-realisation, in these days of turmoil and all kinds of problems, there is no solution. The man has to be transformed." But God has no problems. He has no problems if you do not want to get to Self-realisation. He solves the problem just like that! He has many quick methods by which He can just solve all His problems.

So in a nutshell, one should understand that the importance of this has to be “because God wants it" and otherwise He might be doing something else! So better get to it.

This understanding is that of a child who surrenders to his mother, knowing that the mother is doing everything for his good.

With your brain if you start thinking about the importance, your brain will give you the other side of it also and will start telling you that, “If you get Self-realisation, then you'll have to surrender to God! Then there wouldn't be any individual left, you will all have to move in the buses, in the dust! Wherever God takes you you'll have to go there and live with great discomfort! You may have to hug people who may not apparently look that sophisticated! And you may have to lead a style of life which is not suitable to a `sophisticated Western, personality!' All these problems would arise. And when such problems will arise, your brain will have no way to answer it. All importance will be finished." So best is just to say in a surrendering way, “If that is the important thing, to establish my Spirit, I will do it." Because when you are on the brain level you are always in relative state. Everything has a double thing. I mean you talk to anyone... The other day I was talking to somebody about the Israelis being cruel to PLOs.

So they said, “What about PLOs? They have been cruel." I said: “But where to end it?" He said, “It can be ended later on when PLOs are finished." I said: “*[UNCLEAR]*." Everything has a second thing! Whatever you may say it has a second idea. Because this brain has a great capacity to produce waves on both the sides. Because it lives in relative terminology.

To overcome this, there is only one way, is that you forget this and that and you just say `It is.' Then only you will know the importance of it.

Because any number of importance I may give you, you'll neutralise it. That's why Sahaja Yogis puzzle out. You've seen that. Why Sahaja Yogis, they get realisation and everything, still they puzzle out one by one? Why? Because their brain has a great capacity to produce anti-Sahaja Yoga understanding.

So what importance should I tell you which is absolute for your brain, I just don't understand. Because you are very clever and you will find out an antidote of that also! It's impossible to convince certain people, but one thing one should know that God Almighty is an Absolute Power. It will do what it likes.

So better be surrendered to it. That's what a mother can tell to the children, that this power of Love and Beauty is to be surrendered to...' Twamekam Varenyam, the One to be accepted, the One which is to be surrendered to. That's the One to be surrendered to. The beauty of the whole thing is that this is `the Power' one should surrender to than to the power of your brain or of your mind. And once you realise this, then the importance of the whole thing will dawn upon you.

Now, if you want to tell the people who are not seekers, you are in for trouble, I must say. It's not easy to convince these people, because they want to escape. And the idea that we have, `That we should convince everyone'... you are sadly mistaken. On brain level you cannot convince them.

So best thing is, that you can take them to a point: `See for yourself.' Otherwise, you give up. They are the losers, not you. What can you do? You have tried your level best! But we think that we should have more people with us. But I don't know how many can be accommodated there. It's the other way round. Like, when you have to go by the plane, you have to ask the company to give you a ticket. If the ticket is not available you cannot travel. In the same way we have to see if the ticket is available these or not.

When we think of God also we think He is lower than us, so we can use Him. You cannot push people into it. Only those who will be allowed by God will be there. It's the other way round, we must understand this. This is what we miss. “That if we want we can push as many number as possible. We can get so many people to God" is a very, very wrong idea. You cannot force God. He's not under you. You have to take His graciousness with prayer, with great asking and `then' you can save these people. He's not interested. He can create many more.

So those who are not wanting, you should not try to sell. You cannot sell Sahaja Yoga. You may think that more quantity is a sign of credibility. Not with God! So many will be just dropped down, I must warn you.

You have to be careful as to see, that even if you bring one person, you must consolidate. That's a better idea than to get a big quantity of people who will not get even a ticket, leave alone the seats.

So, one should be satisfied. Alright? What is the third question?

Sahaja Yogi: What are Vibrations?

Shri Mataji: Vibrations are the pulsation of the All-pervading Power within us, which we can feel in the central nervous system. The Spirit doesn't pulsate. It doesn't pulsate. The pulsation exists in the All-pervading Power. But through Spirit when you get connected, then only the flow starts. And you then start feeling the pulsation on the central nervous system. And this pulsation of the Holy Ghost are the Vibrations.

Contents: 1983-02-09 **Talk to Sahaja Yogis, Sickness and its Cure, Jangpura, New Delhi, India**

Today I want to talk to the Sahaja Yogis also because from this particular place there are very few people who have come and most of you are Sahaja Yogis who are trying to know many things, which I didn't have sufficient time to explain to you.

Now, *[UNCLEAR]* I wanted first of all to tell you something about the sickness of the people which perhaps I have not elaborately told you about, how to cure people and how people suffer from different sicknesses.

As we are now on the principle of the being, we must understand that sickness also comes if there is something wrong in the principle that builds up the human beings.

So now basically there are two principles which effect the body and the third principle effects the evolution.

So the first principle of the left-sided Icchā Shakti or the desire power is if in danger we develop lots of diseases due to lethargic organs. Left side is the tamasik side, is the side where darkness is effecting people. Those people who live in too much darkness, or in the past, or

in a sly way, in a hidden way, who are introverts, we can say in short, who spend their life mostly in a very closed waters, or live with people who are extremely cautious and afraid of others, all people who do not talk much or who avoid meeting people, who shun people; all such people are left-sided, have got in `tamas'. Such people, in their spiritual awareness or spiritual ascent, try to take to Bhakti [devotion]. They take to Bhakti more. They worship God from their heart, from their emotions. They work through emotions. There are twenty four types of relations they establish with God. That is called as Bhakti Relationship, we can say and they dwell upon it and all the time weep and cry and say” 0 God, when will I meet you." Such people are the ones who take domination from others, suffer, sacrifice and lead a life of great suffering. But in their expression, in their achieving God, they start doing Bhakti . And they think, that through Bhakti they will come to God.

But with Bhakti , God comes to them. Because of their Bhakti , God comes to them and He incarnates for the Bhaktas, the ones who cry for God, He incarnates.

So there is nothing wrong with those people.

Now these people eat extremely imbalanced food as far as proteins are concerned. And in proteins, they are so weak that they might suffer from all lethargic muscles, in every way.

So you can see that these people suffer from cold, they suffer from diarrheas, because the muscles are weak, they will eat the food and the whole food will pass out as diarrhea. They will have lethargic hearts by which they will get a heart which will not pump the blood. Swellings

in the body. Also they might get this gout and these troubles of the joints. They also get the lethargic liver which gives them allergies. All kinds of allergies come to these people through their lethargic liver.

So now you have to base all these troubles of lethargic organs, of any kind, on the left side. For example a person whose eyes are open but he cannot see, is also suffering from the same type of disease.

These people are effected by the subconscious and the collective subconscious. From where the spirits attack them and they becomes involved into the spirits and they have a very bad sympathetic attitude towards themselves. They are themselves miserable and make everyone miserable. Because they get their ideas from these miserable sly people and they cannot see anyone happy nor do they keep happy themselves. They will make a big fuss out of their so-called troubles and sickness and problems and try to create as much problems as possible for others. But the problems are not aggressive looking. It is more by appealing to the sympathy, appealing to the weaknesses of others. And a person who stays with such people can also get effected if he tries to show sympathies with these people.

Cancer and muscular discrepancies and weaknesses in which the muscles become extremely weak gradually and osteomyelitis, poliomyelitis, all these lethargic things that makes your even lungs lethargic. If your lungs are lethargic, then you get diseases like TB, tuberculosis. Tuberculosis comes from the left side.

Now those who are strict vegetarians, who do not eat any even garlic, or don't eat even onions and all that are very

vulnerable to left-sided business. On top of that if they are going to a Guru who is left-sided, they are even worse.

So one need not lead an abnormal life. One has to be a normal person, eating right proportion of proteins, carbohydrates and fats.

So this is one side of Sahaja Yoga in which you see that left-sided people have to be very-very careful and not to just assert themselves on that side.

Many people come and argue with Me because they say that in Gītā it is written they said so, I do not know, that tamasik people eat lot of meat. It is not true. Is not true. Tamasik people are the people, they are not bad people by any chance, they are one type, are the people who eat too much of carbohydrates, Because left side is hydrogen and carbon comes from Gaṇeśha on the left hand side.

So it is more carbohydrates, no question of eating too much of meat.

But the right-sided people now, have a very-very overactive, extremely overactive personality. Such a right-sided person is eating too much of proteins. All the time meats, this, that. And he becomes an overactive person and such an overactive person receives a blessing of their ego and a big ego develops.

Such a man aggressively destroys others, the images of others, pulls them down, criticises others, jumps on them, can be very hot tempered, can' be absolutely demonic. As I said before, Hitler is the example.

Now this type of people who eat too much of meat and too much of heavy food and develop muscular capacities too much, more than a human being, should I say, they become like horses. Then they start behaving like horses, worse than horses also. And that is why a person should not take to too much of anything, you should keep to the center.

All such people have overactive organs. Due to overactive organs, they develop a very bad heart, which is overactive. In which the heart pumps fast, palpitations take place. In lungs he develops asthma. In his intestines, he develops constipation, he develops a very-very bad liver and a very unhealthy skin. The skin is extremely sallow. And such a person is very-very quarrelsome and aggressive.

A person who leads a very ascetic life and of martyrdom; for example, many government servants think that they are doing a very great work of martyrdom for their country. But such people also become so conscious of that, that they are hot bricks. You just can't go near them. They are extremely hot tempered.

Or any person who leads a life of asceticism of a severe type like Vishwamitra, Durvasa, all these people, they, all become so hot-tempered that you cannot talk to them. They are very snappy and their language is very sharp. And when they talk, you can feel that it is not a person who has any balance in him. But they look very brilliant and consider themselves to be very intelligent, but they are actually stupid people.

Because they do all kinds of stupid things. They do such stupid things that anybody who is wise can see that they

have no sense of proportion in doing anything that is against the whole.

Such people are vulnerable to many diseases, like as I said, the heart, liver, cirrhosis of the liver. Also diabetes, leukemia kidney trouble, high blood pressure, uterus troubles. Such people can become barren women, they may not have children at all, such women cannot have children. Specially women who are very-very flirtatious type and who think they are very beautiful and also they are having a very active life, can become completely barren. Also men can become something good for nothing people, if they over-do things. If their attention is spent all the time in fulfilling their ambitions, they can become like that.

So those people also who indulge too much into life and so-called enjoy life and waste their time in drinking and being with women and all that. They can be ruined not only by money, but also by their very bad health.

Now on the level of right Heart, you know that such people may have very bad time with their children, may have bad time with their parents and may have very bad time with their wives. At the level of right Nābhī they will have problems of digestion. They may have money. But they can never enjoy that money or can never think of living a life which is complete. At the level of the brain they become ego-oriented.

The ego can go to that level, that they can develop paralysis. Paralysis is possible in both the cases. Even the left side person can get it or the right side person can get it. But mainly people get the paralysis on the right side. It

comes from left side but effects the right side of the body.

So there are two types of paralysis. One is the paralysis caused by too much of ego another by super ego. Those who have lethargic temperament develop clots in their blood and low blood pressure. And these clots cause the paralysis also on the left hand side. The another one on the right hand side is caused by the damage to the brain by the over development of Mister Ego within you.

That is how we can summarize on the whole, that the diseases of the physical side are caused by these too imbalances.

Apart from that we have the mental troubles with people. Like a left-sided person will have a mental problem, like he will be a sly person, he will be a frightened person, he would not be talking to others, he would be nervous, he would not have self-confidence, he will be running away from public. And also then, he becomes schizophrenic that he hibernates sort of thing in the house, becomes like a cabbage. You can say like that. That kind of a lunatic he becomes.

Another side, of the right side, is that such a person, becomes a very hot tempered and obnoxious person absolutely. Such a person can be so cruel, he can be so troublesome that he would be a really a challenge to the whole family, to the whole society and he would be very disturbing.

So this is the second problem, also is a mental case. Now such a person may not look mentally upset, the right-sided person.

But when they grow old, they just talk. They will go on talking so much that nobody can talk to them.

You cannot even open mouth before them. They go on *[UNCLEAR]*. They go on jabbering all the time, everything they are telling you. And quite relevantly they will talk of God, of Ātmā, this that. But just they are talking, because they are so egoistical that they just go on talking, do not allow anybody to speak.

And such horrible characters, if there is even one, you are in for trouble. Because you get headaches from them and you get other problems, that you don't know how to manage them, how to keep them decently in their proper places.

So they are also in a way mental cases because they are not normal.

So on mental side also we have problems of people who are egoistical or who are accepting domination from others and becoming sly. Sly people are good at spoiling their relations of each other by saying something, by carrying stories, by being sly. And so both of these kinds, extreme type are very injurious to a proper social life.

Now, ego-oriented person has another very big problem, that he asserts his idea about everything else.

So always such a man, because he is stupid and idiotic, the idiotic ideas survive. And because of idiotic ideas, every planning that is done by such people is a failure. That is the reason, our Planning in India has failed. Everywhere it fails. Because the idiotic people, they are stupid, they are ego-oriented, just to assert their ideas, they are trying to plan something and that is how `the plan' goes out. Everywhere, where the administrator

becomes much more than what he should be, then his behaviour itself is so idiotic and so much away from reality that everyone has to suffer, if such an administrator is asserting itself in the planning of any program of a country or of a nation. The worst and worst are the Rākshasas [demons] who are so egoistical that they think of capturing even the Ādi Shakti, the primordial Mother. It's such a stupidity, is the greatest stupidity that they indulge into! So, stupid man is very big problem to the whole society though he never realises. He thinks I have managed the show, I am the most successful person. But when the history is over, people talk about him as the greatest stupid person ever born on this earth. Like one Mister Idi Amin who is supposed to be, now he is not there, but he was Prime Minister of Uganda. Now he was a real idiot. I mean, you could see the way he used to talk and all that, he was an idiot. And he said that, “The people of my country should be called from my name, because, you see, I am the one who represents this country." So somebody suggested that, “It is alright, but how should we call them? Like from Cyprus people are called as Cypriotic.

So if we call your name, it will become Idiotic!" So the people refused to accept this solution, though he was so dominating. There was another one who made shoes out of pearls, you see horrible nonsense for his marriage. I don't know which was the number of that marriage. But he wanted to make shoes of pearls.

All sorts of idiotic things they do.

I mean these people who are such extremely ego-oriented surprisingly become very miserly. Extremely.

They are so money oriented that they are extremely miserly. They spend all that money on themselves.

But none on others. That they will try to save. Any good work has to be done, they will keep back their money. But on themselves they will buy the best wines, they will buy the best things. For themselves.

But for others they have no money. Even where it is their due, they will try to save money. They will not pay where it is due.

Which we see among so many people, even in Sahaja Yoga. That they have to pay something which is their due, for something which is very important, but they will not pay. They want even free sometimes the books, sometimes whatever it is, for which people are paying. For example this pandal is raised now.

It needs money. Who is going to pay for it? I paid for at least three to four years Myself from My own pocket and My brother helped Me to do all this work. And they wanted Me to go on with it all the time. Imagine! For your Self-realisation, I have to pay. I travelled on My own, I had My own things done. They would not even pay for what is done. I mean, it is required that the people who are organizing this program should put-up the pandal. I am supposed to give you the realisation free, but not to pay for your pandal.

Tomorrow, you will say “Mother, also pay for us for coming here and going back, our fare." I am not surprised, you see. Such people are `extremely' miserly. Every pie they pay, you see, they think that we must get the money back. And if anything is done extra for them, that is not counted. Only thing, because whatever you

can get, you should get. But while giving they are zero. And these money oriented people are horrifyingly surprisingly are rich. One cannot understand how are they rich. Because there is nothing like generosity in them, no priorities, nor proprieties, as to where you have to spend the money. And there is no self-respect about it. There's no self-respect. It is very surprising.

You will be surprised, if I tell the Indians, that I have seen in the West, sometimes you go to a Hotel with other people. I have never seen anybody offering to pay except for My husband or Me. They start looking this side, that side. If somebody can pay, very good. It is most surprising. Even in countries like Sweden and Switzerland. Switzerland is another. The greatest miserly country you could ever think of is Switzerland. Europeans are `extremely' miserly people. Most surprising it is, how miserly they are. And Indians in Delhi are, Sahaja Yogis, are very funny. I must say. I was surprised to hear that people just come for food free. I mean, am I supposed to pay for your food also? Pay for your food, pay for your taxis. Tomorrow, you might even say. “Pay for our house rents." It is absurd.

All this comes from ego, which does not allow you to see the propriety of things. It is very surprising.

They will spend money on themselves, buy this, buy that. But to do the proper thing, they have no money, most surprising thing is. Every time, I come, I find Mister Verma or somebody tells Me that, “Look at this Mother, this is the money they have given." So every time I have to pay out of My pocket to fill up the gap, all these things. Every time. May be this year also. Now I have told

him this time, I am going to give you My Kara [golden bangle]. You sell it and... This is the situation in this Delhi, where the Sahaja Sahaja Yogis are so wretched that they do not want to pay even two hundred rupees per year. Don't learn things from European yogis. They have to learn from Maharashtrian Sahaja Yogis. They are poor people, but never have they taken a single pie from Me. They say, “Mother, it is sufficient you are doing so much for us." Other Gurus take their money, extract all the money. Here the Guru has to spend the money all the time, Can you imagine Sahaja Yoga of this kind? Have you heard of such a Guru anywhere? That the Guru is spending the money for Sahaja Yoga. I have been spending, not this year, twelve years I have been coming to Delhi. I think till last year I have been spending My own pocket money. And I don't know how to answer My husband. He just cannot understand. He said what is this Sahaja Yoga that you have to pay for the disciples. I said” Thank God, they don't ask for their house rents!" It is a very shameful situation.

I must say it is a very shameful situation. That, where the money is needed, they have no money. There is no budgeting at all, of a priority. You are Sahaja Yogis, you are Saints. What are your priorities? But in Maharashtra you must come and learn, they are poor people. They have not got so many riches. You wouldn't see many cars in Maharashtra. There are hardly one or two people who have cars in Maharashtra. But never such a problem comes up there, whether you go to villages or to the cities.

Nobody makes up an account because the whole account is, you have to pay for this electricity, this, that.

All has to be paid through My pockets. That is why, I am talking to Sahaja Yogis today.

So European Sahaja Yogis also I have to tell them. That they have to behave themselves a little better.

This is not the way to behave towards money. It is a shameful way that I have heard that European Sahaja Yogis, some of them, are behaving in a very shameful way. It is not correct. It is not a good thing.

So this is the right-sided stupidity. You know, any `kanjoosa' [miser] man you meet, you just laugh at him, isn't? They are so many stories of Kanjoosas.

So the kanjoosa and the lazy, which one would you prefer? I do not mind a lazy man. But a kanjoosa, God save Me! Whatever you may do for them, you see, a kanjoosa has no sense of shame. No sense of shame left in him. He does not understand what he is doing. It is so surprising sometimes.

You cannot save money where it concerns Self-realisation organizing. It is most surprising that these people when they behave like that, all these countries one by one are becoming poorer and poorer. The more you are worried about money, the worse it becomes.

Of course, I don't need any money. You know already I don't know how many thousands I have spent out of My own pocket so far. But the problem lies that nobody understands that it is a shameful thing that a Guru has to spend for you.

Now that is why I said today I want to talk to the Sahaja Yogis of Delhi. I was ashamed absolutely to hear that Sahaja Yogis here cannot even give eighteen rupees per month! Eighteen Rupees; per month.

Those who cannot afford, it is alright. Those who are retired is alright, children is alright. But you cannot even give eighteen rupees per month. It is not even eighteen, less than that. I don't know. This is the minimum you can pay. We have to run an Ashram, we have to run these things, you want to have a place where to go. How can that be? I just can not believe it! With Sahaja Yoga if you do not even have this much of generosity, it is better you give up Sahaja Yoga. Better give up. You are not the one who can go on with Sahaja Yoga.

Look at your Mother how generous She is. I give you realisation, work `morning till evening.' Today, I didn't have a single minute free. I was working. Whole day, I have been going doing this, doing that.

Even for buying things for you, all the Sahaja Yogis. How far I go. I work so hard and you cannot even give eighteen rupees. I cannot believe it! I heard about the Sahaja Yogis. Now you are sitting under the pandal, who is going to pay for it? I should pay? And these carpets, I should pay? Is this the way to behave? Next time, if anybody does not pay like that, I am not coming to Delhi, I'm telling you next time I'm not coming to Delhi. I cannot afford it now any more. Coming to Delhi means I have to shell out My own money, every time. Those who have not paid the money please pay, otherwise I will not come to Delhi. I am telling you. I don't like this kind of thing, that

you cannot even pay eighteen rupees to maintain that Ashram, to maintain all these things. This is too much.

Now will you please try to understand that you have to be of a calibre to be a Sahaja Yogi. You cannot be just a *[UNCLEAR* raddad] person from the road, who can become Ādi Shakti's son, can you? I do not want beggars to be My children. Will you please, now all of you, decide today, that no more of this talk, I will have to do. This is the last time I am telling you. It is a shameful thing and in the History it will go down, that Mother stopped coming to Delhi because every time She went there, She had to shell out money from Her pocket. The History of Sahaja Yoga will be written in Golden letters and remember that every body's name I am going to put down there. And those who do not pay, please give Me their names. That is it. I want to know who are these culprits, aur jo log kanjoosi karenge, unke sāth Bhagwan bhi kanjoosi kar sakta hai [And those who are miserly, with them God can also be very miserly].

So now we come to the center, the central path of Suṣhumnā. The central path of Suṣhumnā is for the people who are in the center. The people who have their proper understanding and who have got their wisdom. These people are `extremely' generous. You take any Guru, Sat Guru unit. Take any one, take any one, take Nanaka, take Kabeera or take TukāRāma. TukāRāma; his children asked him, “You get us some sugarcane." So he was walking and one gentleman, who was his master, who's field of sugarcane he was looking after, gave him lots of sugarcanes.

So he was coming home and all the children started asking “give me one sugarcane, one sugarcane." He gave everything. He came home, he had no sugarcane for his children! They suffer from over generosity. They are so generous, you can't imagine. You should ask people who have known Me in that aspect.

Generosity is the only way you can express your love to others. I have told you before also. All your material wealth and everything has no meaning unless and until you show generosity for the people. But it should be quiet and it should be `absolutely' silent. I have seen that it is nice to oblige somebody who comes to your house. Indians are very good at it: please have your food, this, that. Because just to impress., Later on they will take out some work from that person, or something. But there is no genuineness about it. Anybody who comes, just help, doesn't matter. Any great cause, what can be the greater cause than this work of God that I am doing And there I find you people behave like this. Now where are you going to spend your money? So the center people are extremely generous to begin with. They cannot retain food if they have it at somebody's house. Either they vomit or they will have diarrhea. If they eat at a place where they should not have eaten, if it is not properly vibrated, if the food is not good, they will not eat the food. Even if they cat the food, they will vomit it.

They are extremely kind and generous. They do not suddenly jump on people and say, “Oh! you have a food that has got this and that." If it is so they try to avoid, not to eat. But sometimes they are crucified.

Alright, does not matter. They think, “Alright I will eat and throw it away." They are extremely wise and tactful. `Tactful.' They know how to deal with people. They are extremely diplomatically-gifted, to please others and somehow or the other bring them to the temple of God. The whole attitude of such people is to clean themselves, to keep them clean, to keep them alright, to get more and more people to this great work of realisation. They never show off. I never see them before. They don't stick on, they don't show off. They are not in front. They do not want to show their faces. They are quiet. I know who they are.

But they are dynamic and they work it out. Only when they have to consult something important, they will come and see Me and talk. I know the way they work out. Extremely silent and beautiful, gracious people they are. And they also know how to handle others. They can sometimes get into temper which is necessary, if they have to protect the protocol of their Mother, or could be protocol of Sahaja Yoga and of God.

Normally they are very quiet and silent people. Their presence is blissful. Whatever house they enter, it is auspicious. Whatever shop they enter, prospers. Whatever person they talk to, is benefited. They are auspicious. They are blissful. They give blessings; automatically. They do not have to say” I bless you." If they are there, they bless you.

They never think of making money out of God's work, never, not a single pie. They are so truthful.

Not because they are afraid that if we make money thief will come and take away all our things. Not with the fear.

But with the full confidence that what they are doing is the greatest happiness and joy.

And their health-wise, they are more on the fatter side, I should say, because they have gas in their body, lot of gas, the Prāṇa Shakti, *[UNCLEAR]*, is in the center in the Prāṇa, enters into Suṣhumnā.

That creates the gaseous body. The gaseous body is not heavy, it's very light. They walk very fast, they are active. But, to look at, they look plump. Normally. If they are not, they try to be plump. They want to be plump, they want to find out what is wrong with their liver, so that they could be plump. They are rather on the plump side.

Their main disease is their excretion and their all kinds of vomiting and all that. For example, a person who eats a wrong type of food or a wrong type of liquid has to immediately go and vacate it. This is their problem.

Another problem they may develop that if they have taken too much vibrations, they may develop a swelling on their body. Under these circumstances, first of all they should find out if they are in the neighbourhood of somebody who is anti-God. Because such swellings are developed when the vibrations are fighting an anti-God activities of the person who is with you. Say your wife is negative. Then such a person might develop a swelling because his vibrations are fighting the woman. He should not mind that fighting. But he must know how to correct the woman. He must know how to put her right. Or the man who is like that, the woman might develop an anti-devil force within her which will give her that swelling.

Different types of swellings might appear, with the vibrations jetting out with a great speed. They might develop arthritis, if they do not give vibrations. Or pain in the joints.

The other problem they may have, is of very low breathing, low blood pressure because of parasympathetic activity. And when they are fighting with the anti God activities they might feel tired also sometimes. But again they recoup and they feel alright. At every center, if the vibrations start flowing too much, then all these people may develop, may develop, I am saying, a kind of a suction or emission of vibrations, depending on the quality of the person who is facing them. And when such a thing happens, they can easily correct it by giving a bandhan. And in case they find the vibrations are too much, then they can ask another Sahaja Yogi to take out the vibrations from a particular Chakra and give it to the atmosphere.

They may suffer from the throat trouble. Also may suffer from the drying up of the liquid in the body if they have to fight the anti-God elements very much.

So a kind of a dryness can develop in their peritoneum or may be in their tracts which are covering them. That is why it is nice for them to eat some ghee or butter. They must rub their fingers and the hands and all these places with ghee or butter to soothe it down. Because the heat from other people can also make them dried up.

At the Āgñyā level, they may sometimes develop a headache with people who are very much caught up on the Āgñyā, on the right side. It is important at this time to give a bandhan to yourself and to other person who is

very egoistical; and don't listen to them. Just close your ears and the person will stop talking. Also they might develop some pressures on both the sides of the head.

Sometimes when the Kuṇḍalinī cannot rush upward, there is an obstruction on the Āgñyā then you might feel the pressure on this brain plate. At that time they should try to bring the Grace on top of all the sympathetic systems, bring it down, stand on Mother Earth. Ask Her to suck it.

So the Kuṇḍalinī's pressure is reduced because when the Grace comes on the body, then all the Chakras open up and also Āgñyā opens up. If they have problem with their Āgñyā, they should use a candle at the back, if their eye sight is getting weak or short sighted. If their Āgñyā is too much here [front] there are mantras which are to be used like `I forgive every one,' and all that. On the subtler way, you know all the mantras that are to be said.

It a Sahaja Yogi finds his Sahasrāra catching, then he should take a bath in the sea, I think, I don't know where he should take a bath. Because Sahasrāra is My place, as you know. And to catch the Sahasrāra is a very serious thing for a Sahaja Yogi. He might develop a Ekādaśha with that and, he will be in trouble. And then he will come and tell Me that Mother, though I was a Sahaja Yogi, I was praying on Your photograph and all that, still I got this trouble." The reason is, when you are a Sahaja Yogi you `have' to recognize Me. That is the condition.

So far you have never recognized any one, but now you `have' to recognize Me. It you don't recognize Me, you will develop this Ekādaśha and I tell you that if you try to

do like this, then it is not possible to allow the Kuṇḍalinī to come up.

So Sahaja Yogis who are very doubtful and still like this, should not be called as Sahaja Yogis, they should be kept out, as far as possible. Let them learn that they are not worthy. Let them know that this realisation has been given by Me and by nobody else.

Like once Venugopalan told Me that “Kṛiṣhṇa did not give me realisation. Rāma never gave me realisation, Gaṇeśha never gave me, Shiva never gave me, Pārvatī never gave me, Ādi Shakti did not give me, it was Mātājī Nirmalā Devī who has given me realisation So She is the one I know." Unless and until you understand this, all, Rāma, Shiva and Brahmadeva, Viṣhṇu, `everyone' is going to get angry with you. Because they will not understand. Because you have got your realisation, still you are denying Me, that means something wrong with you. And the whole plate can be covered and you might develop Ekādaśha. That is the beginning of the end.

Taking too much advantage of Me is also like that. Too much sticking on to Me also you might get this Ekādaśha. You must keep out. Too much pressurizing Me you will get it. Answering Me, not listening to Me. When I say, “I want to do this” you will say, “No, no let us do this”, you catch.

I know what to do, when to do, where to do. I know that. I know when I should reach a place, when I should raise the Kuṇḍalinī, where it will work out, I know everything, you have to leave it to Me. And if you start challenging Me, you will catch on Sahasrāra. And then don't blame Me.

Only in Sahaja Yoga if you could rise and ascend and try to recognize Me, I will have no problem, you will have no problem. If there is anyone, say your wife, or husband and anything, who talks against Sahaja Yoga, close your ears, close your eyes. You are not to hear any ninda [criticism] of Me at least. If you don't understand, you don't understand because after all you are not Me. But know that I have given you realisation. And you should not try to challenge Me, because God himself will be against you. This is very ungrateful of you to behave like that.

So first thing you must do is not to trouble Me much by any chance. You have to keep Me Prasanna [pleased]. This is what we always say that “keep the Devī Prasanna." Yesterday the music was on, I was very Prasanna, you should have been happy that music was on, Mother is Prasanna, that is all. But no, you wanted it to be your way. You hurry Me up. You say come along now, we have to go. That is all.

Then your ascent is not going to be alright. If you are a big administrator anything, that is in the office.

Not here. Here I am the one. You have to leave things into My hands.

Don't try to play tricks with Me. Because apart from my Mother's heart, there are many other Ganas, you see, many other Deities, many other great things which are waiting and they may try to trouble you.

So as Sahaja Yogis I have to warn you. New people wouldn't understand this. For them it will look like egoistical and all that. They wouldn't understand, forget it. But there are very few new people, that is why I am

talking to Sahaja Yogis and telling them the truth. Because so far I have had no chance to tell them all these things.

So it does not matter. As Sahaja Yogis you are saints. And you `must' have that dignity of a Saint and that generosity of a Saint and a sense of priority and propriety. I hope Delhi Sahaja Yogis will begin from tomorrow a new life in their behaviour.

Aacharan mein lao. batein karne mein kuch nahi hone wala. Aacharan mein Lao [Bring it into practice.

By talking about it nothing is going to be achieved. Bring it in to practice.] And try to be good Sahaja Yogis, to begin with.

You cannot compromise on certain things. In Sahaja Yoga, you will be amazed it is `such' a great science, `even' one line here and there, they are finished. The other day a gentleman came and he told Me that I don't believe in such and such Saint. Say, a Muslim may say that I don't believe in Guru Nanaka.

Immediately his vibrations must go down. Finished. But much worse when you say about Me or think about Me. If there is even a thought coming, see that it goes. Because Guru Nanaka is a person within you, but he did not give you realisation. He and Me are one, there is no difference at all. But what He feels when He has become Me and given you realisation. You do not want to recognize Me, then alright, He is the one who will be angry, not Me. You have always seen people who worship Shiva, in the hand they keep them. They catch in the heart, its the Shiva's place. Because Shiva himself is angry.

Sahaja Yoga is a very dynamic thing. And for that we do not need these people who are good for nothing. Kanjusas [misers] are out. Absolutely. You should be extremely punctual and anxious, ātur, to do the needful for Sahaja Yoga's work. It's a `tremendous' work. While we have people who are so anxious. They are willing to stay here, they are willing to go anywhere, they are willing to do any work in Canada, want to go to America, work it out. And here we have people. It is surprising! In the Yoga Bhūmi. This is Jangpura, just imagine this is Jangpura. May be here the jang [battle] I don't know of who, which people took place. In Hastinapur a great jang took place long time back, where evil forces were fought. But was there anybody like the" people we have here? Can you hold the Sword of Righteousness in your hand when you do not have any righteousness in your behaviour? We cannot be like these ordinary politicians and these business people.

We are Saints! Understand you are Saints. You cannot behave like them, cheapish way. I never take anything free from you. It is very difficult to give Me something. Unless and until, there is a purpose or some sort of a reason, I would `hate' to take it. You know that.

So I should be your ideal. You will be very much respected, if you behave like a Saint. Saint has to be Saintly within and without. One person who behaves like that, shines and everybody knows, “Oh here a great Saint has come." You don't have to become a very wealthy person for that. You don't have to be a big politician or a big minister; nothing.

An ordinary person can manifest the whole thing.

So I think one way of improving this would be that all of you should take up responsibilities. You should try to travel around. Now some people should travel around. Go, establish some center, look after that. Then go somewhere else, establish that center and look after. Now establish a Center in Jangpura or some place. Try to come, bring in, distribute some handbills in the market places. Get some people, establish it. There are hardly few numbers of people who are organizing, it is not the way. Every one of you is part and parcel of the whole.

So now I have to tell you, today again I have to go somewhere, so you have to excuse Me. I hope you don't mind today that I wouldn't allow, it wouldn't be possible to make you touch My feet. It is alright. There is no need to touch My feet at all.

I will tell you a very sweet story of Śhrī Kṛiṣhṇa and Rādhā and then I well go away. Once it happened that the ladies who were married to Śhrī Kṛiṣhṇa got very jealous of Rādhāji. And they told Śhrī Kṛiṣhṇa that you don't love us. On top of that Śhrī Nārada came to put more oil on the fire. That he said, “He really, I believe, He `never' cares for you, He just likes Rādhāji, He is not bothered." So Śhrī Kṛiṣhṇa, as diplomatic as He was, He started saying, “Oh God! I have terrible pain in My stomach, now what to do?" So they said, now what to do? He said, “It is very simple. You know anyone who is My Bhakta [devotee], if you can give the dust of your feet for Me to eat, then I will be alright." So they got a fright of their life, you see.

As it is if I tell you anything, you just want to give your solutions every time. Nobody listens to Me.

If I say go here. “No, no, it is better to go that way." Come here “No, no, this way is better." Every body has a brain wave about it. Does not matter.

So there they had brain waves. They said you see why don't you take some medicine? Then somebody said, we will call the Vaidya. He said, “No, I know for definite that I cannot be cured by anything else but one thing, that you have to get the dust of one of My Bhaktas and I will eat." So everybody started looking at each other, you see. As some of the Sahaja Yogis do when it comes to paying I They never heard it.

Some of them. Never heard. Better. You see, it is very tricky nature.

So they said now what to do. If we do not cure Śhrī Kṛiṣhṇa, He is just wailing and what to do? Śhrī Kṛiṣhṇa said” Have some pity on Me, give me some dust of your feet." So He said to Nārada that you go and ask Rādhā to send dust of Her feet.

So he went to Śhrī Rādhā. Śhrī Rādhāji was in Vrindavan and the soil of that place is yellowish in colour like (Keshara), like saffron.

So he went and told that Śhrī Kṛiṣhṇa is very sick, He has got a terrible pain in His stomach.

So She got a fright. She said, “Really! how can that be. I cannot believe it. So what does He says? What treatment can He take?" He says anyone of his disciples, anybody his Bhakta, if they send a little of the dust of their feet, He will be alright. He has to take that as medicine.

So She said alright, take the dust of My feet. He was amazed! He said “What are you doing? You understand,

if you give Him the dust of your feet, then all your Puṇyas [merits] will be lost. He is playing some trick, you know. Just don't try this thing." She said, “Nothing doing, you better take it." But he said, “What about your Puṇyas and Pāpas." She said, “I know one thing, it is He, who looks after My Pāpas and Puṇyas. I have not to think about it." So he took the dust of Her feet which was absolutely yellow like a saffron or like a pollen of the flower.

And he went and gave it to Śhrī Kṛiṣhṇa. Śhrī Kṛiṣhṇa said, “I knew Śhrī Rādhā will send, now let me eat it." He said, “You can eat, but you have to answer the question that Śhrī Rādhā has said, that you look after Her Pāpas and Puṇyas. How is it? How can it be? What does that mean? That you know what is Puṇya and Pāpas are and She is not bothered about it. She has not to worry about Her Pāpas and Puṇyas." He said, “Alright, now let me take the medicine." He took the medicine and He said I better sleep. And Śhrī Nārada saw the heart of Śhrī Kṛiṣhṇa opened and in the Heart was the lotus of a very beautiful pink colour. On that lotus was lying Śhrī Rādhāji. And Her feet were rubbing against the pollen of that lotus and the yellow of the Vrindavan clay was the same colour as that. And then he realised that when She is touching that lotus with Her Feet, what does it matter if She gives the dust of Her feet to Śhrī Kṛiṣhṇa to take. She is in His heart. When Her feet are in His heart, what does it matter? And that is how they realised that Śhrī Rādhā's love was so great that for Her She did not think of Dharma-Adharma, but just to be at the command of Her Lord, She acted and that is how She had a place in the Heart of Śhrī Kṛiṣhṇa.

May God bless you.

I hope tomorrow we'll meet again and I'll talk to you at length about Kuṇḍalinī. Those who have come for the first time today should at least come tomorrow and I'll tell them all about Kuṇḍalinī and I'm really now fed up of talking on introduction.

So you can take the book, read about it, come back. Sahaja Yoga is at heart and also I'll give you Realisation tomorrow. I'm sorry I have to go for some work today and that's how you must excuse Me today. I hope you don't mind. Thank you.

[After the talk Shri Mataji provides an opportunity for questions.].....

Question: What will be the end of the entire world and of human beings?

Shri Mataji: Let's not talk about the end. Just now is the beginning. When the child is born, we just don't think about his death.

.....

Contents: 1983-02-10 **Talk to Sahaja Yogis, Questions and Answers about America, Universal Sahaja Temple, Ashram, 78 Kṛiṣhṇa Nagar, Safdarjung Enclave, New Delhi, India**

Sahaja Yogi: *[UNCLEAR]*.

Shri Mataji: Did you hear Me? I said that's nothing to learn from India, on the gross and nothing to learn from the West. Both are in the same melting pot: one is developed and one is developing [laughing]. What do you say?

Sahaja Yogi: On... on the spiritual level, Mother.

Shri Mataji: What do you think about India on spiritual level? Is zero! What is it India?

Sahaja Yogi: Well, the aspirations of... what it's still preserved in this country.

Shri Mataji: You see, if I've to talk to Americans you know they are ego oriented they'll fill hurt.

Better not say India is anything greater than they have.

Sahaja Yogi: You being the diplomat of the diplomats. [General laughter.]

Shri Mataji: You see, our... our main object is to get them into Sahaja Yoga isn't it? Younger

Sahaja Yogi: Yes, Mother.

Shri Mataji:, not to blast them.

So let us avoid sub... subjects which are a little... will challenge their ego, try to challenge their ego so they just get out of...

Younger

Sahaja Yogi:.....

Shri Mataji:.....

I was the first to go to America. And then all of them followed.

And so many Americans suggested to Me that “Mother, why do you not get some money for Yourself and also ask for money for what You are doing for these people. Because you are doing the real thing.

Because Americans will not understand anything that is free and is precious." But I said that, “Money can only buy whatever is lower that you. You cannot buy

something that is higher than you." But they said, “You will never be successful in America. You are to fix so money." But I said, “I don't want this success. I want Sahaja Yogis, I want Yoga to work." One day will come they will realise that those Gurus whom they have purchased, have exploited them, have exploited completely and have used them for their own purpose and have run away. Let them realise, because if I tell them they are not going to realise it. One must know, whatever is vital for life you cannot purchase it. In all humility, human beings also must realise that you have done nothing to become a human being.....

Contents: 1983-02-11 **Shivaratri Pūjā (English+Hindi), Shiva Tattwa Within Us, Universal Sahaja Temple, Ashram, 78 Kṛiṣhṇa Nagar, Safdarjung Enclave, New Delhi, India**

[Shri Mataji talks in English:] I am happy that you all have adjusted yourselves in this small space. When there is love and understanding, little space can occupy many hearts. But, when there is no large heart then whatever one may get it is never sufficient.

Today, we are going to worship Shiva Tattwa within us, principle of Shiva. For all Sahaja Yogis it's very important, because Shiva is the ultimate we have to achieve. Shiva is represented in our Spirit, so to become Shiva is the ultimate aim of everything else. The rest of it is all created, like Viṣhṇu Tattwa and Brahmadeva, just to create human beings, to evolve them and then ultimately lead them to Shiva. That's the ultimate.

But human beings get so involved into the Brahmadeva's Tattwas that even to get into Viṣhṇu Tattwa is difficult. They get into, involved into the five elements which have created us that is the outermost being within us. All the Chakras have the outermost, we can say, just the vessel. But the desire to be the Spirit is of primal importance in Sahaja Yoga.

So we have to see inward towards ourselves as Sahaja Yogis: do we have that desire entirely? Or we have still many desires hanging around? See the greatest problem is of the Nābhī Chakra, whether it is in the east or the west.

Some people still have hankering for the baser search of food, which is very surprising, even in Sahaja Yoga, of Nābhī Chakra.

Then, still some people have sense of possessions and money quite a lot. And subtler and subtler they grow, still the detachment doesn't develop within them. It becomes subtler. As you grow subtler, the attachment becomes subtler and difficult to get out, specially people who come up as leaders in Sahaja Yoga or closer to Sahaja Yoga are always under attack. They are attacked maybe by their husbands, wives, brothers, sisters, sons, children, something like that.

And that makes it worse because all such leaders who are attacked, try to displease all the deities by small things here and there. The whole behaviour has to be understood that you have become a subtler person and you are rising higher, so naturally the negative forces are going to attack you. Always the front line is under attack, not the back line.

So those who are in the front are always under attack and they have to be very careful as to how they are behaving. For if there is a sly person, he will become sly, but subtler sly. He will not just become the other way round. His slyness will become subtler. If he is a miserly fellow, then he will become miserly in a subtler way. Or say, if he is an ego-oriented fellow, then he become ego-oriented in a subtler way.

But to get rid of these things within you, you have to go to the other side of it. Say if you are miserly, you become absolutely generous, give up everything that you have. Don't be calculating, don't talk of money, don't worry about money. If you are extravagant, indulgent too much, you should go the other way round. Unless and until you become juxtaposition, you cannot get rid of these things. Like if you are hot-tempered man, very hot-tempered, then become so mild that even if somebody beats you, it's all right. Whatever one says it's all right. That's how you get rid of your habits which become subtler and subtler.

There's another way of dealing with it: being alert. When you are alert, you start seeing yourself as a separate person with the habits that it has and then you start understanding why you are behaving: “Oh I understand, I knew you before, ten years back, before my realisation. I know mister you are like this." And then take juxtaposition against that personality and just shoot it off.

Like a person who is a negative, left-sided person. Whatever you may do for that person, he will become subtler and subtler. Suddenly, if it's a girl, she will start

just crying for nothing at all and feeling miserable. If it's a boy, if he thinks about, analyzes, he will become analyzer of Sahaja Yoga also, in a subtler way.

Then what they should do is to stand before the photograph and see the reaction, that's the other one who died. And just try to make fun of that or shout at it, depends on. If it is an aggressive stuff, it's better to make fun, because it's stupid. And if it is the one who takes aggression, then shout at it: `What do you mean, by taking aggression like this?' All these things, you see, are keeping you away from reality. Your being has to be cleansed. With your help only I can do it. Many people say, “Mother, You are all powerful." All right, I am and I can do everything. But only thing I cannot surpass your freedom. That's a fact. I cannot cross over your freedom.

And when I cannot cross your freedom, you have to cross that. If in your own freedom, you come inside, then I will bestow upon you all the blessings. But if you want to stand outside I am not the one to put you in with a pistol.

No, that's not the way it will work out. This is one hurdle that Sahaja Yogis must know that at every moment you are free and freer and freest. The more free you become, the worse is your situation as far as the facing of the negativity is concerned.

Say there are four persons around you. They will be first attacked. Naturally you can understand the front line is always under attack, not the back side. Though according to the law, it should be the back side because all these horrible negative forces should come from the back. But they are very clever.

They know that the back sometimes drop off by themselves; there is no need to go that side. They try the front line. And those who think they are in charge and responsible have to be very careful as to how they behave, how they are responsible, how they work it out. If they are keeping their old habits at a subtler level or they are just fighting it. It's very important. And this is how intelligently you can manage yourselves very well.

Then once you become detached, go from all these things, only at mental level. The spiritual level I'll look after you but at mental level, you must come to logical conclusion that: “I have to fight this nonsensical stuff. I have to be alert about this nonsense that exists within me." Shiva Tattwa is innocent, absolutely innocent it is. It is very powerful and extremely innocent. And the secret to achieve it is only just to please, just please Him. If you please Shiva, then He may be a Rākshasa or anything, He grants all kinds of boons. But to a Rākshasa He can only grant the boon of longevity, of long life. But to a saint, He'll grant the Sat-chit-ānanda state.

So even if He grants anything to a Rākshasa, one should not ask questions about it. He can give you longevity, what does it matter, even if he lives for thousands of years and earn nothing out of it? You never get your realisation.

So to a saint, He gives that eternal longevity which comes through Spirit. This is the blessing of Shiva Tattwa.

While Viṣhṇu Tattwa, He gives ascent to a saint and light of wisdom to see and understand everything in collective

consciousness. And to a Rākshasa He gives death, He kills.

So for people who are not so deep, it seems that why should Shiva give any blessings of longevity to a Rākshasa? These are the characters of these different deities. Now for example, if a Rākshasa wants to live long, he goes to Shiva, pleases Him by praising Him, singing songs to Him, by asking His blessings, by doing tapas for Him, talking about Shiva's innocence, he gets longevity.

Sometimes, these Rākshasas are better on the earth than in the subconscious.

They can be horrid. They can gather some more bhoots to torture human beings.

So it's better to keep them in the eyes of Viṣhṇu. He manages them better here than to send them into the subconscious.

But Shiva's style is very different from that of Viṣhṇu's style. You have to have all kinds of styles because you know there are so many permutations and combinations in human beings. If you have one style, what will you do with the other style of human beings? So the style of Viṣhṇu is that if you are trying to be funny, He plays tricks and puts you right. Say, a Sahaja Yogi, He is not interested, Viṣhṇu, so much interested in other people, but in Sahaja Yogis. If Sahaja Yogi tries to be funny; say he wants to drink wine, all right, He says, `Drink wine.' He drinks the wine and then he gets sick somewhere, his car falls off, or he is insulted somewhere.

Something happens to him, he is punished so badly that he says, “Oh God, what have I done?" That's Viṣhṇu Tattwa.

But Shiva is the other way round. If you see Shiva's style is this; that if you drink, He just disappears from your heart. You have a heart attack and you die. He also kills. One kills directly in a positive way, He definitely kills; the another one by recession. If Shiva disappears, how can you exist, that's one way.

Second way is that, those who are born with Shiva Tattwa, like our Sāi Nāth was, Shirdi Sāi Nāth, or people like that; even the Devī sometimes can do that. They drink away all the wines of the world, all the poisons of the world. Like Shiva did that.

So when Sāi Nāth found that so many people were smoking this tobacco, he smoked all the tobacco of the world. He tried to smoke everything in Maharashtra so that nobody should get it. That's the style of Shiva to take all the poison into Himself. And to absorb all the poison within Himself. He can deal with the most difficult things; so the one dealing comes through the brain. Because Virāta is in our brain, acts through the brain.

So He plays tricks on you. And that appeals to us because we can see that He's killed someone.

So we think “very nice Mother, You have punished that person." But Shiva Tattwa gives you the problems which normally you cannot see, but works out in a short time like that. Like heart troubles or a person who has very poor Shiva Tattwa can have all the incurable diseases of the world. There nobody is killed, but every minute the person is suffering. That is the way Shiva corrects.

In us when Shiva Tattwa is awakened our priorities change absolutely. I see now that those who have come, say, to India from the west have changed quite a lot in their priorities, but still there is not so much change as it should be. They're of course thousand times better than their fellow beings who are not realised Souls. But still, attachment to things, attachment to money is quite a lot. This detachment must work out. See things are not correct in people and the alertness is not there.

To give a very, very gross example of this is, I will tell you that, a gentleman, say, came and he was told that you have to give, say, 11 rupees for Pūjā. He said, “On principle we are not supposed to give." So I mean, you are only paying even on principle you are only paying for your food and lodging, not for Pūjā. The other side of it they will not even see that Mother is spending so much for us extra for which we are not paying. It's not all found. Like the other day, I said that people are now asking Me to pay for this, now tomorrow they will say pay for our house rents. It was so.

It was such a condition, once upon a time in London when I started the ashram. That they asked for all the utensils in the ashram, I paid for the rent, paid for everything. [Laughs.] Ultimately they said we don't have an ironing board, please send us. From that, it's not so bad now, I mean, of course. But still, if they have to pay 5 rupees for taxi, they will think that, “Oh we have to pay for taxi, Mother is supposed to pay." But if I have to pay 7,000, 8,000 rupees for you to go to Haridwar, that's all right. That's good.

That nobody wants to find out, how Mother is paying for us.

It's surprising and this disturbs Me very much that what is your attitude towards things. The pleasing should be done with full heart. Say if you want to buy any presents for your friends, or anything, you don't mind spending money for that. But for Pūjā you have objections. For your laundry you used to pay always, I mean I have seen the laundry bill, I was amazed how much money was spent. But 21 Rupees, the principle was involved, imagine. Look at it. If you look at it, you will be shocked at yourselves. That shows despite all this, you have got your realisation. See the generosity. It's very, very, you see, it's very gross. It's very gross.

So the detachment from this gross life must go away.

But an ordinary villager understands better because he is innocent. He is innocent. Because you are not innocent. That's why you see everything from your mind. You think too much. How much have we paid, how much this is, this that, this that. But an innocent villager even if he has four annas, he would like to do something, “Mother, that's all I have." We have a parable in the Bible. And this is what it is.

One should see our detachment starts at the very baser level of money. You need not have any friends, what is the need to give to any friends? What are these friends for? Except for Shiva Tattwa, what other friend you need? Think of it, without God, what is your life? So the detachment must start. The priorities must change and you must know that God is the One who is your Friend, who is your Father, who is your Mother, who is to be

worshipped, there is nothing else. Tana, mana, dhana, everything is for God. Of course, I don't want anything from you, you know that. But that should be the attitude of a person.

So the first, this attitude comes in a person. Of course, in Sahaja Yoga, you have a great advantage that those who have developed this attitude have been helped so much materially that you find the proof of it immediately. The proof is there and those who do not take to this kind of a thing suffer.

So the proof is there.

I must give you an example of a, goldsmith. I had given him something to be made for the Pūjā. A lot of gold was given, everything. And still, stupidly, he tried to make money out of that. And he got cancer and he died. I didn't do anything. But I knew he had made money, I knew that all. I know lots of things, I didn't say anything to him, nothing, never, never even mentioned. He got cancer and he died, he is no more. Because Shiva Tattwa disappeared. This was for a Pūjā, the money of the saints, something was to be made and he should not have done it. The proof is just there. Now, those who knew him got a fright of their lives, “Oh God, now no more of this from us at least." But those who have been surrendered about their money part also, not that I take anything from them nor I want anything from you. But, still the attitude I am saying is different, they have gone out, they have made money, they are very rich, they are very well to do, they are all right. They get so much blessings, everything. This is the first Nābhī Chakra's detachment. We should start by putting Shiva out.

Every attachment can be attacked with Shiva Tattwa because Shiva Tattwa is brilliant like a diamond, brilliant. Every facet can be cleansed out, very simply through our Kuṇḍalinī awakening and through our alertness and what after that you can see there are other attachments we have. This is friendship, sympathies, friendships. Sympathies always go to a person who is in need or something like that. You have no sympathies, have tortured so many people. The other way also could be that you hate someone too much, you love someone too much, some sort of a thing like that.

So detachment comes that you do not hate nor you love anyone. You leave it to God to decide. That's the kind of a detachment that you leave it to God. God, please that's His decision. I am not going to judge. Only thing I judge them on Kuṇḍalinī and I awaken their Kuṇḍalinī. If it works out well and good, if it doesn't work out, all right.

So you have detached yourselves, from the responsibility of judging others. Only your judgement is on Kuṇḍalinī, if it works out, all right. But, you are just like a barometre that's all, or like a machine that cures. You are not involved into it.

So this involvement into personal lives and personal relationships like mother, sister, brother every sort of a nonsense must be taken up. Now say, if your mother is not all right, you must just get after her and see that she is put right. That's very important, mother has to be all right. If she's not all right, then you tell her, `I'm not going to eat food from your hand,' finished. You get your vibrations, all right. You tell her that `You better take to realisation otherwise I will not have anything to do with

you. I'll just see, talk to you and go away.' Show that detachment to her. Be strong.

You must cure your mother. Very important because mother is a part of Sahaja Yoga, it's very important.

But many people I have seen just do not know how to resist. You must protest; go on protesting one after another because that's the greatest thing you are doing for your mother. What else can you give it to her? Anything you give the whole world has no meaning except correcting your mother for the better life, an eternal life, life of God.

Then your wife, wife is a very dangerous situation. If your wife is negative, she will go on putting into your head things which will work out at a odd time and you will be amazed how you slipped out these things and how you said these things. Why should you have done it, why did you do this. But the wife is to be told that, `You have to behave yourself, you have to get all right, nothing doing. And there is no compromise. You be in another room, I will be in another room. You should get well. I am not going to help.' Because that is even much more dangerous because you know if the woman is catching then there are very serious diseases you develop with the Mūlādhāra problem.

So you have to be strict with your wife. You should make her. You should tell her, `I'll not eat any food with your hands. I'll have nothing to do, I'll not talk to you, I'll just come and sleep in another room and go away. You better not touch my clothes. If you don't listen to me then I have nothing to do with you, I'm your husband. Whatever Dharma I follow you have to follow me, if you don't want

to listen to me, then I have nothing to do with you.' The wife can also do the same with the husband. Gradually showing indifference in a way that he understands that it doesn't bring love. That's how women corrected men long time back. Nowadays, of course women, if you give them something, they get pleased. Even if there is a keep, as long as they are giving diamonds to the wife she is quite pleased with the keep. Still in India it's not accepted. But I have seen in the west nobody minds, if the husband has ten keeps doesn't matter as long as he is giving you the money, all right, nobody minds it. That's very funny.

So wife's relation, mother's relation, husband's relations, close relations must be corrected.

Now children must be guarded. You shouldn't allow your children to go away to the wrong things. If they are doing wrong things, they are not coming to Sahaja Yoga, you are duty bound; you should say, I'm not going to pay you any money, nothing doing. I'll not see your faces, if you do not take to Sahaja Yoga. What else are you going to give to your children, but God? You can do it. All can do it. But one should know I need not do it.

So many people say that, “Mother, Your husband is not so much a Sahaja Yogi." It's all right. I know where to bring him in; I know when to bring My children in; because if they were in everybody would have said, “They have floated a family enterprise." [Laughter.] As long as they are out of it, it's a very good idea, specially in India.

So best thing is if they oppose Me, I keep all of them out, My brothers. Imagine My own brothers, My own, I mean,

they all have tremendous respect for Me, no doubt. Even My brother said that, “Thank God You are staying in my room now, so the vibrations will be very good for me. What do You think of my vibrations?" Everything he says, but he is not a Sahaja Yogi. I have given realisation to all of them, everything is there, but they are not Sahaja Yogis, a part of this. Otherwise they will be in charge of money, you see. What money you get. Now come along this is the money we have, all problems. With all these relations around, you don't know.

Somebody will go and say, “Shri Mataji said so." “Oh, that's the daughter of Mātājī has said so.", That becomes. I don't want all these pressures on My head.

That's the best way; I wish these our politicians understand that; never have your relations around.

That's the best way to administer. If you have your relations around, then you will never do right things.

Or even if you do right things, your relations will spoil it.

So all those who are Sahaja Yogis must know that you should not try to help your relations in a way that they take advantage of Sahaja Yoga. Like, if you are a Sahaja Yogi, then you bring your mother and make her sit in front of Me. First correct her vibrations, put her right and then bring her. Correct my father, correct my mother is not Mother's responsibility, it's your own. When they are all right, then as you bring flowers to Me, bring your relations as a very good present from your family. That's a much better thing than to be like this that I have to clear. If one is a Sahaja Yogi, all his three generations up and down, this side and that side have to cure that is done. Like Mehrotra [a Sahaja Yogi] made Me do.

So one should detach from these family ties and these emotional imbalances we have, emotional problems we have by understanding that the only thing that these people should have is Sahaja Yoga. And some people should not be in Sahaja Yoga like as I said, My own husband and My daughters and My relations, I keep them out. All such people if there are any, you should not also have them anywhere near Sahaja Yoga. You should be discrete to find out.

Although, all these, My relations are very Dharmic people, extremely Dharmic, very good. Very selfrespecting, all qualities they have got, everything. Ready made, but they are not in Sahaja Yoga.

So none of you can say somebody said so, so one said so. It has to be Mother has to say.

This detachment has to come, it takes time. Especially with Indians, all the time they are worried about their children, mother or father goes on and on and on and on and on. See years together, my son, my daughter, my son, my father, all the time. Now by God's grace so many have got rid of all their responsibilities somehow, through Sahaja Yoga, or whatever it is, [laughing] so they are now they have settled down with themselves, because you have your own responsibility.

So this detachment must be brought those who are coming to Sahaja Yoga, that we are here to get Sahaja Yoga blessings. We are going to be blessings, with that pride. You should be in the family, all right. If you want to have Sahaja Yoga, you have it. But not to force them on Sahaja Yoga, but you can force Sahaja Yoga on them, the stage has come that you have to talk about Sahaja Yoga

to them. In the beginning I used to say, “Don't talk to them." But those who are useless, if they are not to be brought in Sahaja Yoga, tell them, `You are not good for Sahaja Yoga, better not ask.' Then they will come.

Some people you should show complete indifference, `You are incapable, you are no good, you are too materialistic.' Then that person would say, `I will prove that I am' [laughter].

All these detachments take place and then the detachments are at Nābhī, Nābhī Chakra's, you rise up to your emotional side in your Heart Chakra. And then you have to have the detachment even of a kind of a collectivity that we think is collectivity. I call the fraternity of the bhoots, not collectivity. Always all the useless Sahaja Yogis will form a group and they will have a very strong objection to everything that is sensible. And they will have suggestions for everything. There has to be no suggestions at all. There are no alternatives, because Shiva is absolute. Once what is said is said, you just do it and see, that's the best. Alternatives will be second best or third best or maybe useless. But there is no alternative for Shiva Tattwa.

I'll give an example, I told Delhi people that you organize say, program for seven days outside with other people. It was sensible because I knew it was to rain. It has to rain also. Rain can be stopped, but it was to rain for all the other villagers, you see. We cannot stop it only for Sahaja Yogis. Of course, Sahaja Yogis are important so I said, “Let them be with other Sahaja Yogis." Now they started an alternative, only thinking, that you see they won't be comfortable. And I mean it was good, but on a other level

that they will not be comfortable with Sahaja Yogis, another level. But there has to be understanding if Mother has said it, it must be done, whatever it is. Even if She says, `You kill somebody,' you have to kill. Keep it like that, to that extent. Keep to the maximum, even if She says, `You have to die,' you should die. If She says, `All right, you tell lies.' Go on, `I'll tell lies.' Like Rādhāji, She said, “What is my Puṇyas, what is my Pāpas [sins]. I'm in His heart. What can I do, whatever He tells Me I do." That is Shiva Tattwa.

When it is awakened you see it at least recognizes Shiva in Me. And it sees that this is Shiva Tattwa.

It understands because at Shiva Tattwa you don't commit any sins, you are sinless. When you are the Spirit, you are sinless; there is no sin in you. If, supposing according to human understanding, if Shiva leaves, a person dies, then it's sinful. Why to leave anybody. It's sinful, isn't it? For all common purposes, common understanding will think it is sinful for Shiva to leave the person and make the person die. For example, a lady dies, her children are left behind, then one can blame Shiva for that, that, “See now You went away and these children are now without a mother or without a father” or something like that.

Because Shiva is sinless; whatever He does is sinless.

So whatever you do is sinless, the idea of sin is finished because who commits sin is your ego. Ego commits sin. But if you have no ego, there's no sin because you are not doing anything. You stand in Akarma [not the doer]. Say the sun is shining and shining sharp and somebody wants to stand in the sun then he gets burns. It's not the fault of the sun, the sun is shining, that's the job of sun.

Whatever is the job of the Shiva, He is doing it. He's not sinful. It's our mental attitude makes us think, this is sin, this is not sin. But when we have ego, we are committing sins.

If you ask a tiger, `You are committing a sin because you are eating a cow?' He will say, `I never knew what a sin was. I don't know what sin is.' It's a story when some missionaries were going away from a village, you see.

So the villagers, poor, innocent villagers, they got up to thank them. They said, “Thank God, when you came here you told us there is sin. We didn't know what sin was." [Laughs and laughter.] Innocent people, they don't know what is sin. Because Spirit is innocent, it has no sin. It obeys the other source of innocence.

So there is no sin for a person who is the spirit. For Shiva, there is no sin whether He wants to give His blessings to a Rākshasa or to a saint. There is no sin for Him because He is Bholenath [Lord of Innocents]. He is beyond sin. Whatever He does, He is beyond sin because ego cannot envelope Him. There is no ego. Because we have ego we commit sins. Once ego is finished we are no more there, so who commits sins? When we are not there, who is committing the sin? Shiva can't commit sins, so we are the Shiva; so we cannot commit sins.

So all these ideas of giving alternatives at the mental level is also wrong. I give, anything I say, immediately there will be ten suggestions. I try all these tricks with you. Because you are used to conferences, you see. [Laughs and laughter.] So I said, “All right, Subramanian [Sahaja Yogi from New Delhi], what do you have to say

about it?" Because after all, Lord Subramanian is there. Must ask him.

Then I ask Venugopalan [Sahaja Yogi from New Delhi], then I'll ask Gavin, Warren; all these people. Now what do you have to say? And then they give their suggestions.

But if you see in the conference of all the Divine Deities, there is no suggestion, no suggestion, no alternative. No alternatives to your Mother's ideas, nothing. Absolute. It's absolute. Nobody gives any suggestions to Me; never. No question. They won't listen to you, they won't listen to anyone. There's no question. Such harmony; complete obedience. And not only they are fixed with their qualities. They are told that you have to do it, they'll do it. This is the difference. They try.

Sometimes it appears, you see.

If I say all right, go this way and you will find the place but you won't find.

So then you will say, `See Mother You said to go this and that's why we went this way and we didn't find the church.' Now there it is not that I'm saying that you will find the church, it is I am trying to see what you think.

I am telling you My own tricks, all right, so be careful. [Laughter.] I'll tell you all, go this way, now you didn't find the church, I'm sorry. I should not have told you. Or you shouldn't have gone that way.

But that's not true. I must tell you, that's not true. What I'm trying to see what you are saying about this. Now if you are clever, you would say, `I went there, I didn't see the place, but I saw something else.

Mother, that's the reason You sent me there. Now I know why You sent me there.' That's it. Then I know he is Sahaja Yogi. But if you say, `Oh I went there because I thought I will find this thing, but, it was not there and You sent me, You sent me.' [Laughter.] Finished. If you say that, “You said so and it happened" or I did say, no doubt. But what I said was just to play a little trick on you. Because one of the natures of your Mother is Mahāmāyā; so be careful. How you react is very important for Me to see how far you have gone. This is one of the ways you are judged. But for a villager, it's a different thing if you see. If I tell him, now if you want Me to go to that village you see take the cart, or take the bullock cart this way; he will take it. But there will be a ditch.

So I'll get hit.

So he will say Mother, I am sorry, you got hit. But I could have avoided it. You see.

So he takes the responsibility upon himself. He takes everything upon himself. Because you asked Me so I have to go that way but I could have avoided it if I was careful.

So this is the difference you know, not to put responsibility. It's a common human nature is to put responsibility on somebody else. Best is to put on Mother. [Laughs.] But in that you lose all your Puṇyas.

So the responsibility is mine, I must have done some mistake. I must have done some mistake somewhere or else maybe that Mother wants me to learn something in this. Every time you do something, I tell you something, it's just for you to learn something. I don't have to learn

anything. If you think that way that I have to learn something now anymore.

So you have to learn something. And that is what if you understand; then a kind of a detachment will build in you and a surrender. You will be amazed that you will be so much relieved of nonsensical headaches that you have and the burdens you carry. If you understand that the whole joke, the whole work, the whole drama is done by Mother and I am just playing into it. It's so simple. That is to be felt, to be understood. And the enjoyment lies in that. Not in judging or finding alternatives. You try it. Those who have tried it have enjoyed it very much. And so many things. Every minute, I'll give you an example of that.

I'll give you an example of Gregoire; last time I went to his house. He tortured My life for his wife.

When will she have her delivery, how will she have, who is going to stay with her? Morning till evening, he had one talk. All right, I said, “Something will be done. You can have this lady to stay with you." And then, “How will I go to India?" I mean, `I' was so important. Then he didn't realise it at that time, he thought it was so important to do that. Ultimately quite before going I told him, “Gregoire, you troubled Me too much this time. But it's all right." Then he said, “I'm sorry." Then he telephoned Me one day saying, `Mother, my wife is in for abortion. She has gone to the hospital, there is no chance." I said, “Forget it. You go back to the hospital, she will be all right." He went to the hospital and he said, “It's a miracle. She's perfectly all right, there's no problem. She's all right." So it came into his head, as he told Me.

Oh, Mother is looking after it, why should I worry. Why should I worry? This is first thing. Then, the child was born earlier than time. And he came to Me.

So also I convinced him, what I say, what I do, you know that. That I look after you. But when you took up responsibility upon yourself and start thinking about it, then I cannot help.

So just know that leave it to God. It's all for your good, for your `hitta' [benevolence]. Everything is for your `hitta'. Whatever it is, sometimes I have to shout at you, sometimes I have to correct you, sometimes I have to tell you that, “Don't come here." Some people who touch Me, you see, can give Me horrible sensations, then I say, “You just don't come here. You don't stand before Me, get out from here." That helps them. But if they stand there, the bhoots will never leave because the bhoots want to trouble Me.

So this point if you understand, you will get completely detached and will know that for our good, for our betterment we must keep Mother pleased and these things if we do by displeasing Her, we are going to be finished.

Now to understand this, what you need, not age, not position, not your qualifications, nothing, you need a wise mind. Deep personality. I've seen very young people are so sensible; their parents are stupid, absolutely stupid people.

So you just need a wise, deep personality to do it and that you should try to develop. That comes only sticking on to Shiva Tattwa, which is a solid thing, which is Shiva `achala', which doesn't move, absolute. It is not relative,

it's not relative at all, it's not related to anything, absolute.

That gives you the depth. That depth which is required to settle down, to go deep.

Shiva is your Guru. Guru is the one that gives you the gravity to go straight down, deep into it.

[Aside in Hindi:] Remove the child from front. Child is mentally imbalanced. Isn't it? Is he all right? Make him sit silently.

That is very important. And all this I hope with the Pūjā today we'll try to settle you into that great principle of Shiva. Let your attention, every particle of your attention be filled, sparkled and rejoice by that blessing of Shiva Tattwa. I bless you all! So to begin with, we are going to worship the Devī first of all and then the Shiva.

[Hindi.] AVāhanam means we have to establish Śhrī Gaṇeśha. That is important. And then, after that we have to say the names of Viṣhṇu, whatever, because these names have to be said which are the ascending names.

And after that we will be having the location and everything described where we are doing it, why we are doing it, the Pūjā. Then we'll worship Devī. We take 108 names of the Devī. I think you all should remember these 108 names by heart. Have you got it printed, the Devī's names? Have you got copies? You have got them? Have you got these with you? You have booklet? [Shri Mataji talks in Hindi: MISSING.]

***Contents: 1983-02-23*, Public Program, Day 1, Kuala Lumpur, Malaysia**

I bow to all the seekers of Truth.

This is the time when so many seekers are born on this earth. This time has been predicted in all the ancient scriptures, perhaps we are not aware of it that this is the most important time in the history of creation.

We are seekers of truth, that's why we are dissatisfied in life, because we do not know the real meaning of our life. We do not know why we have come from amoeba stage and have become human beings. The scientists must ask this question to themselves: Why have you become a human being? What is the purpose of the nature, because they don't like the word God, to make this beautiful thing called human beings. But such questions which cannot be answered, they cannot ask either.

The truth is that within us lies the Spirit, the Self. Doctor Warren has mentioned about many great people but not about Buddha and I would like to tell you about Buddha also, because there're lots of Buddhists in this area. Buddha Himself did not talk of God. The reason was that when He found the people who talked of God were just talking about Him. That was the second stage where one has to reach. Instead of that they were just talking about God, God Almighty, His creation, His kindness, His compassion, all these things. But it was nothing to an ordinary person. Everybody took up a note from others who were talking, they were also talking the same thing and they were only talking, talking, talking about God Almighty.

So He decided first of all let them have Self-realisation. That is the first step. Because without Self-realisation you cannot understand God Almighty at all. By talking, it's

only your mental projection that takes you somewhere which is limited, while God Almighty is unlimited.

So He did not talk of God, it's called as anishwara, means He did not believe in Īshwara, people say He did.

But He did not want to talk of God, same thing we do in Sahaja Yoga.

First you get your Self-realisation. Why? Because the knowledge about your Self is the knowledge of the roots, while what knowledge you get in these modern times, the Western knowledge that is coming to us is of the tree. The people who have progressed in science have done some good, no doubt, but in totality it is coming to a destruction. The reason is whatever they have progressed, they're not bothered to find out the Spirit behind it. The roots if they're not looked after, the tree will grow, no doubt, up to a point and then it will die. Automatically it has to die because the roots are not looked after. In the same way the roots which are within us, if we do not see to that, we'll go bizarre, we'll go mad, we'll not know what to do and all kinds of destructive forces can be set in. That's why today we find all kinds of funny diseases coming up, one of them is cancer.

Now, I have told this long time back when I came to Kuala Lumpur before that cancer cannot be cured by anything but Sahaja Yoga and it is a fact. I will tell you later on tomorrow how cancer is cured through Sahaja Yoga, or any such diseases which are supposed to be incurable are cured only by Sahaja Yoga.

Now the problem is we are so much enamoured by the knowledge of the tree that we are not bothered to find out about the roots. Now to find out about the roots also

is not an easy thing because you have to become a subtler being. You are a human being, all right, but still you have to be a subtler being, the being that is your Spirit which is a reflection of God Almighty within you. Unless and until you become the Spirit which called as Pīr, in the Koran it is called as the Pīr. You have to become the Pīr, even Mohammad Sahib has always talked more about resurrection than about the doomsday. He said the resurrection day will come; what is that resurrection? The resurrection is the day when we become something more than what we are. In our human awareness we have achieved some things. For example, we're very particular about cleanliness, specially I've seen Singaporeans and, say, Kuala Lumpureans are very, very particular about cleanliness but an animal is not. You want to take an animal through a dirty lane, he cannot pass through, he can pass through but a human being cannot. Like this we have had many types of awareness within us which are higher than animal awareness. It has happened to us through evolution that we have become human beings.

But, now why, why are we human beings? Why this special instrument has been created. For example, I create an instrument like this, you'll ask Me, for what? What is the purpose of this? But unless and until I put it to the mains you will not know the purpose of this instrument. In the same way, this instrument of a human being is created by God Almighty with very great care, with very great understanding and the whole thing is within us. Now it has to be just put to the mains, that's the point.

If you tell a villager who's never seen a computer or electricity that this is a television and if you put to the mains you can see all kinds of music out of it and all kinds of pictures, he wouldn't believe, he said, “This, how can it be?" But if you can somehow put that into the mains the instrument works. That's how Doctor Warren when he told you that when he got realisation he would not believe that he could give realisation to another person because he did not know that his instrument has started working. When this instrument starts working it has to produce results. The knowledge of the root has to be known once you become subtler, means you get your realisation.

So first thing is that you must get your Self-realisation.

Now it is absurd to believe that you can pay for it. How much did you pay to become a human being? As simple as that. What effort did you put in to become a human being? Did you stand on your head? Did you do any jumping or anything? You just became a human being, in a spontaneous way, in a living way. Who has done this work? Who has made you a human being? There must be God's Divine Power, All-pervading Power that must have done to you. We see the working of this All-pervading Divine Power which is called as Rūh. Everywhere, everyday but we do not want to believe into it, we're not aware of it. We human beings cannot even transform one flower into a fruit, one flower into a fruit. And there must be some power that's doing it. Moreover if you plant a mango seed you get a mango tree. Who does this work? Who does this complete sorting out on such a great permutation and combination basis? Who is the

computer? Who is the one who works it out? It's easy to deny God, to deny all these people and say, “No, there's no God." It's very easy to say that because human beings can do what they like, they have the freedom and God cannot take away their freedom; if they want to go to hell they can go very quickly. But if they want to go to that awareness which is being promised to them of Self-realisation also all arrangements are made within you. It all lies within you, it's all your own, it's all your property, only I'm here to give you the keys.

So you cannot pay for it and you cannot do any exercise for it, you cannot sort of make a physical effort about it. Many people think that unless and until you cleanse yourself how can you reach God? Of course those who are clean people achieve it much faster, no doubt. Those who are frivolous, cheap-type people, they cannot get it; it's one thing true. If there are people who have no balance, if they're not balanced people, who are not Dharmic as they call it, or the people who are very much extremist, anybody who is an extreme personality is difficult. But those who are leading a balanced life get this realisation very soon and that's why balance is important.

But Sahaja Yoga today, we call it a Mahā Yoga because it doesn't even bother about your balancing, your past, your sins or anything. It just works. It works so fast that I'm Myself amazed at its own working.

Because I think the time has come, this is the blossom time and you all are ready for it, that you are deserving cases who are born on this earth and it is what, it is your own that you're achieving it.

It's an impossible situation before this, if you think of any incarnations who came on this earth, what difficult times they had. You read about Buddha, you read about Mohammad Sahib, you read about Rāma, you read about Kṛiṣhṇa, anyone of them, how people tortured them morning till evening when they lived. And they had to face such a tremendous opposition all the time that they couldn't even talk fully about what they had to say. You know Christ was crucified for what He said. It's very nice for people to crucify such things which are the most Divine personalities on this earth. But then they have to suffer was the point; one has to suffer for that and whatever they have done we have to forget about it because now the time is of complete forgiveness, of complete compassion, of complete love.

God has decided perhaps that the time has come that all of you must get your own meaning. And your meaning is your Self. We always say, “I think." Now what does that, what is that, that thinks? What is that which feels? It's not your Self, it's not. Because you say, “My book” it is away. “My thinking” is not you. “My house” is not you. “My mind” is not you. “My ego” is not you.

So what is that which gives you this “My"? That `I' is your Self. But by doing these acrobatic things in the head, you're not going to reach there. There has to be some arrangement within yourself. You are all paying attention to Me. If I say, “Pay attention to your Self” you cannot, you just cannot do it.

Something has to happen within yourself to attract your attention and that's why this Kuṇḍalinī which is placed in the sacrum bone has to rise.

You can see with your naked eyes in some people the pulsation of this bone, just like a heart and with a stethoscope, if you use a stethoscope you can feel the sound of the heart, `Lup, dup, lup, dup,' going upward coming to the head here and breaking it through and you can feel then the Cool Breeze coming out of your head. This is something you can't do.

Some people think if they're jumping, if they're singing, if they have got some money because they pray to God, they have got God. That's not the way.

What have you got in your own awareness is the point. As human being you understand what is dirty, what is not dirty but as a higher personality what happens to you? You become, again I say you become, it's not mental, it's not brain-washing, nothing, you become collectively conscious. That means that your hands start speaking. The language of hand is a universal language, if you know, otherwise also for people who can't speak they use their hands to express themselves. But here the language of hand becomes an awareness in the sense now if somebody comes to Me and if I have ten children who're realised Souls and I ask them, “Tell Me, what's wrong with this person." They will all raise one finger, like this, say, or like this, or like this. Now all these are to be decoded and to be understood, what does this mean? Even if you tie their eyes they'll say the same thing because truth is the same. It cannot be two and when they say it, if you ask the person, “Are you suffering from heart trouble?" He said, “Yes, I'm suffering from heart trouble. How do you know?" It's a little child also knows that he's suffering from heart, because he's rubbing this

little finger of his. And that is how it does not require any language, it's a language of sensations, what we call as the bodha. It's the one from where the word Buddha has come, from where you know the sensation that you feel on your hands.

This is something so universal. Now today we can say Doctor Warren is an Australian. Now I have worked in about twelve countries and we had about hundred and thirty people representing every country, who came to India to work out Sahaja Yoga. And they all speak the same language, they speak the same language, not only that but this rebirth, what does it do? It makes you a person of a new awareness. Now this new awareness, you can imagine if all of us are born again, in Sanskrit language a born-again person is called as a Dvijaḥ, means born again. And even a bird is called a Dvijaḥ because a bird is first born as an egg and then as a bird. Now see the difference between an egg and a bird.

There's absolute transformation and this is exactly what happens to a person who gets realisation that he's completely transformed; he becomes a very different person and the whole priority changes and all the ideas that we have of conditioning, that we have had and also the aggressiveness that we have developed, everything disappears and we become one with our Spirit which is the giver of joy, which gives us joy. Not only the joy but it gives us the truth.

And what is the truth? The truth is that you are an instrument made by God Almighty and that once it is put to the mains you start working it out. The energy that flows you can feel it, the energy that comes in, you know

how to manoeuvre it. With this energy you can raise other people. From one light that is enlightened you can enlighten another light. Like this, this movement of realisation starts. If, maybe, some of you become lethargic after getting realisation but after some time again the same feeling comes back into you, you feel compelled that God has given you this, such a great thing and why shouldn't you give it to others. Christ has said, “An enlightened light is not put under the table." So when this happens, it is such a pleasure to give realisation to others and cure them of their ailments, cure them of their conditionings and give them that eternal peace which is promised to them.

The whole world has to achieve it, as many as will achieve will receive the blessings of God and they can enter into the Kingdom of God. But those who refuse, what can we do? We cannot fall at their feet that, `Come along, receive your realisation.' It has to come from within. You cannot force a horse to drink the water, at the most you can push it in the mouth but he has to drink it. In the same way it has to happen within you, through your own asking, nobody can force you because this freedom is given to you and nobody's going to take this back. After getting realisation you have to understand how to use these powers. They are within you and you can work it out in such a manner that you can really help people in the real genuine way.

We had one gentleman realised, he was a farmer from Maharashtra state. He came to see Me in My house and he got realisation. And he got such a tremendous feeling, a compulsion that this is the living work and we have to

do this work, that so far he has transformed more than ten thousand people. Even I would say, Doctor Warren who was quite, in the beginning, shaky about it, has now given realisations to so many people, have cured so many various diseases that I won't be able to tell you in three lectures.

And he himself has started seven centers in seven cities of Australia.

Everywhere there is a seeking, no doubt and that's why in the market there are people who are very false who have come up. They have to be there because after all, everything that is real has to be followed by something that is false. But we must use our brains and we must use our reasoning to find out how can this be a true thing. For example, somebody says, “You give me money, I'll tell you how to fly." Now that's not the way. You don't want to fly in the air anymore, I mean, already there are so many aeroplanes that people are finding it difficult to have the proper traffic and why do you want to fly in the air? Just think of it that people are paying thousands and thousands of pounds just to learn how to fly in the air.

It's an absurd thing that people are asking for or somebody says that, “I will give you a power by which you will become something extraordinary." Now what power he gives is nothing that the person becomes lunatic or he becomes out of normal personality, some sort of a funny person and also he might become an epileptic patient.

Now what should happen to you is that you should become absolutely a normal person, a deep normal

person, that your life is normalised. You don't have to have all these announcements outside saying that, `I'm such-and-such, I'm the one who is a yogi.' Anybody from your face can make out because your face beams with that light, there is light on your face, nobody has to certify for you. We can see that a person who is a realised Soul is a very gentle and a very kind and affectionate, compassionate person. Of course, it's true that everybody who gets realisation doesn't come up to that level, does not, because if they have some diseases they have to work it out. If they have some conditionings, they have to work it out. But you have to get after yourself to know that this is the truth and, `If I miss it in this time when am I going to get it? For anything at all, I'm not going to miss the truth and I'm going to be truth.' If there is a determination, it does work out. It works out better with the people who are simple villagers, who are simple villagers. The simple villagers are very straightforward, they're not so complicated, they don't have so many conditionings, they don't have firstly, such a lot of big fat ego which is very difficult to combat. If you say something to anyone in a city that you have to do such-and-such thing immediately he comes on you like a snake and he says, “Why?" It's for your good you've to do it.

Supposing if somebody is suffering from a cancer and a gentleman who was a big fanatic and he was suffering from cancer and I told him, “You cannot be a fanatic, you have to understand that all these are great incarnations came on this earth to save us, so you don't become a great fanatic, that's not a good thing, you believe in one

person, all right, but you should not be a fanatic and hate others, it's a wrong thing." But he said, “I can't do it because I've been conditioned like that." His cancer grew worse and worse and worse and his wife told that, “Listen to Mother." He had to do that because if you want that you should have physical, mental, emotional equanimity and that you should have the blessings of God you have to understand there're certain laws and regulations of God also. If you do not follow those laws and regulations in your lifetime, doesn't matter but after realisation you have to follow them. But there is no compulsion of any kind, no compulsion, automatically you do it.

For example, in London, first six people who met Me were all drug addicts of the worse type and when they came to see Me they were all like patients in coma. They couldn't even look at Me and they were staring to see who's the person in front of them. This was their condition and I worked with them for four years, you won't believe that they became absolutely first-class Sahaja Yogis. They got realisation, all right, but the day they got realisation, they gave up everything, just gave up. Because when you become the Spirit, you become the master. Then nothing can master you, nothing can enslave you because you become the master.

To give you an analogy I'll tell you because you understand the car. As in the car we have got the brake and an accelerator. Tomorrow I'll tell you how we have these two powers within us.

So when you are learning how to drive, you first try the accelerator, then the brake, then the accelerator, like that and you start adjusting your speed and your driving

accordingly. Then you become a driver, you become an expert and you don't think. You become thoughtlessly aware. That's what happens in Sahaja Yoga. When the Kuṇḍalinī crosses this center you become thoughtlessly aware, there's no thought. And you become an expert as far as the driving is concerned but your master is sitting behind which is the Spirit which is watching you. After some time you become the master, you become the master. When you become the master, you become so powerful, you laugh that you understand your own value, you understand what you are. You are the temple of God, you are the mosque of God, you are the Gurudwara of God and you start feeling, “Oh God, what have I done to myself." Today while coming by plane I read a very nice article by a lady who was a Russian lady and she was describing her experiences when she went back to Russia. And she said that, “I feel that everybody is thinking that what about God? What about the Spirit? And I have been to Russia, many people ask me, `What about the Spirit?' " Because this matter cannot give us joy, cannot, it's a principle of economics is that, in general, wants are not satiable. In particular, supposing you want to have a house, all right, you go for a house, you just do everything to get a house. Once you get the house then you want to have a car. But house is finished now.

So then you get a car, when you get a car and you know what you want, again you go on running this rat race for getting this, getting that, getting that. But if it was satisfying then you would not run from one to another, so that is proved by economics itself that generally the

wants cannot be satisfied with matter; matter cannot satisfy. On the contrary matter enslaves you.

For example, those people who are used to the chairs, they can't sit on the ground; the chair is sitting on their heads. Wherever they go they have to carry a chair with them. Like that the matter is always trying to overpower the Spirit. But I don't say that in Sahaja Yoga you do not develop materially, you do not develop materially is not the point at all. On the contrary you become dynamic, absolutely dynamic.

It's said in the Gītā, Kṛiṣhṇa has said, “Yogakshemam vahāmyaham” that is, when you get your Yoga, when you get connected, once you become one with the All-pervading Power, then God looks after your kshema, means your well-being. It's a fact, you won't believe that even materially you improve, so much so that you just forget about your material and financial problems but you don't become such a rich man that it's a headache, because possession is a headache. Supposing I possess this, thank God I don't possess this instrument, otherwise I would have been worried, “I hope I'm not shouting too much loudly, I hope I'm not breaking this instrument, how will I carry it, have I got the insurance of it” and all that. But if I don't possess it, I'm enjoying it and using it, so the possession, the idea of possession is itself very much killing, so you get over that and you see the matter as an enjoyment, a source of enjoyment. And that the greatest of all, the enjoyment of matter is what you give to others.

Then you become a different personality altogether. Say, for example, some communists came to see Me and then said that, “You see, how do you talk of God." I said, “All

right, I will not talk of God if you don't want Me to talk of God” but I'm the greatest communist and I'm the greatest capitalist. He said, “How?" Because I have the capital with Me and I can't live without distributing it. I'm going from places to places everywhere just to distribute this.

So you combine both these things at the stage when you become the Spirit.

All these becomes, if you understand why, all these creations of U.N. and all that, is coming from our unconscious that we want to have people living together in complete peace and happiness and all the countries have to live with understanding with each other, keeping up their individuality and all that. But we can't do it. Why? Because the thing that is unifying is the Spirit and we have never bothered to find out the spirit of everything. Without the Spirit whatever we do has no meaning, has no pulsation, has no life. And whatever is done is all dead. We think, think, think like mad and being for something, what's the use? After some time it becomes useless and of no value to anyone whatsoever.

Now tomorrow I'm thinking of telling you all about these Chakras and these centers and how they're placed within you, these are all subtle centers and also I'll tell you about the medical terminology, how it is connected with the medicine. I Myself studied medicine just because I have to talk to doctors also and now we have many doctors who are Sahaja Yogis, who are practicing Sahaja Yoga and who're trying to translate it in medical terminology. As you will see that if you grow the tree outside, as it grows, it becomes specialised, you see, we

have specialisation and we start analyzing everything. For example, you may have a doctor for one eye and another doctor for another eye, it's so much of specialisation goes on and things start becoming complicated and complicated and complicated. But when it comes to the roots then it is simplest, it's the simplest.

So when it comes to the Spirit the whole principle is very simple and you can manage it very easily. How? You can cure diseases and all that, when I'll tell you tomorrow, you won't believe it but it's better to do it and see for yourself if it can be done or not.

Now the simplicity of the principle within us is existing there and is working out all our autonomous nervous system functions. But it is for us to be aware so far the Spirit is not in our attention. The Spirit is watching us all the time. If we try to deceive ourselves it knows it is this way. If we try to deceive our own inner understanding it is all right, it is watching you all the time but once you get realised then the Spirit comes into your awareness and when it comes into your awareness, the light, the light gives you the truth by which you know the truth about every person.

For example, I went to a place called Mia ki takli, in a village, you see and I said, “There must have been a great soul living in this place." They said, “Mother, how do you know?" I said, “There're such vibrations. It cannot be that it could be without some great soul living here." So they tried to find out, they said, “Yes, there was a Muslim called as Mia, who was a Pīr and who died and buried here in this place." So I said, “All right” I asked for the Sahaja Yogis to go and see his grave and they felt

the vibrations. When they came back I was just giving a speech and at that time suddenly a ray of light started falling from the sky and it just fell on Me, six times it came and seven times, then I just stopped it and it stopped. And people have photographed it. It's surprising how these people are working it out.

There're many like this who are great souls born on this earth, who came on this earth to help us and we have though denied them, rejected them, have died, but still their spirits are working for our emancipation and they're all helping us.

There are many children these days I find who are born realised, who are born realised, great souls are taking birth, very great souls are taking birth and if you are not aware of their capacities of their value system, you are going to harm them. You have to become a Self-realised person to get the new value system where Spirit is the most important thing, because it is the absolute, it is not relative, while we live in the relative world and when you live in the relative world, you're confused, you're unhappy. That's how you get all these problems like tension, this, that. But when you know the absolute then there is no problem because absolute says the absolute truth and there's no confusion. All your problems are solved, only by knowing your Spirit that resides within you which is your own, which is there all the time and this Kuṇḍalinī, the power which resides in the triangular bone and is just waiting to rise and enlighten you.

Now it is described in the Bible also that, “I will appear before you like tongues of flames." And these Chakras that you see here really look like tongues of flames, very

beautiful in different colours but at this point, the Sahasrāra at the limbic area you see all colours but very mild and pastel colours and beautifully shining, crystal, you can say that when I see your jade it reminds Me of those different colours that you see in your brain. Inside your brain where the limbic area is you see the Sahasrāra like this spread out and it starts showing you that colour.

But many people also believe that if you see colours then you are becoming God, it's not true. If you see something you're not that, you have to be that. For example, when I came, I saw the hall from outside but when I come inside I don't see the outside. In the same way when you become you don't see anything, you don't hear anything, you just become. And when you become it acts, your realisation is. Like a socialist came the other day and was arguing with Me. He says that, “Why did you cure the president of India, why didn't you cure a poor man?" I said, “To Me, both are just the same, I have to cure the poor as well that I have to cure president, I've cured all sorts of people, somebody must have told you that I've cured presidents, all right I've cured him, so what?" So I said, “To My eye it's nothing, it's not that way” but I said, “What about you, do you have real compassion?" He said, “Yes I have real compassion." I said, “The compassion must work." My compassion just works, it doesn't speak, it doesn't say that, `I'm compassionate, I'm this, I'm a socialist, I'm a communist, I'm a capitalist,' nothing of the kind. It just works, it works automatically, which is just flowing, just flowing. It doesn't have to say anything, it just works out.

By God's grace today I'm again here, I'm very happy that after such a long time I've been able to come back to Kuala Lumpur and I hope you will take to Sahaja Yoga in a serious way. It will improve the lifestyle, the quality of your life, quality of human beings. This has to happen to all of us. I hope you will all agree with Me and try to get your realisation today. And tomorrow we'll try to establish it properly.

It has to be established, like a seed it's first transplanted and it's a small little primule is coming out of it.

You have to look after that, very gently, carefully and respectfully. And once it grows, starts growing it becomes a big tree. That should happen to all of you, I pray that you people take your realisation today.

May God bless you.

If you have any questions I would like to answer them today, if you have any questions please ask Me.

Warren: He's a practitioner of Bhakti Yoga and he wants to know what relationship it has and can he reach Self-realisation through Bhakti Yoga.

Shri Mataji: But we don't understand because He was the incarnation of diplomacy. What He said about Bhakti Yoga in Sanskrit language is that, “If you give me any fruit, any water I'll accept it” but when it comes to giving, He said that “you have to do ananya Bhakti ." Ananya Bhakti , means when there is not the other. When is this situation, when you are Self-realised. Without Self-realisation what Bhakti can we do? We are not connected yet to God. What is Self-realisation is connection with God, all right? So first we should get connected, then you definitely do Bhakti . Then you

understand that this connection is established, now whatever you do has a meaning, otherwise it would be like telephoning without the connection, how the telephone being there.

So the Bhakti Yoga only matures after realisation, not before realisation.

Question: *[UNCLEAR]*.

Shri Mataji: You see, first you start getting the Cool Breeze in your hand, that's the power of God flowing through you, that's first thing happens, all right? Then you have to see how you use it. Now this is a new awareness which we call as a vibratory awareness. Now when you have got your eyes you use your eyes, isn't it? To see what is the colour of this room, or what is the colour of say, this sarī or something like that. In the same way when this new awareness comes into your hand, when you start feeling it you use your vibrations to see whether it is true or not. For example if you want to know: Is there God? You can put up your hands like this and ask the question, `Mother, is there God?' You say it thrice and you start getting a Cool Breeze flowing into you. That's how you judge. Gradually when you start doing all this, then you become a master and you don't have to even ask, immediately you'll know because the vibrations start flowing. Immediately you feel the vibrations are flowing through your hand, that means this is the thing that you have to do, this is the one, that's the correct action. The connection and in connection is only possible if you receive the absolute, isn't it? Otherwise you are thinking with your mind and if thinking by your mind was a correct action there would have been no

problem at all because we are all thinking. But it is not, it is let your spirit manifest and when it comes into your attention, it gives you the power to discriminate because you can feel it on vibrations. For example if you want to ask about somebody who is not a true personality or who is not a true Divine person, you just ask the question, `Is this a true personality?' immediately you will find the vibrations will stop, if he's a evil person you might even get heat coming out of him or maybe that you might sometimes get little blisters, for a short time to indicate that he is a horrible devil. It is all there because you develop a new awareness, this is what I'm trying to say, all right? Question: *[UNCLEAR]*.

Shri Mataji: You can use this everywhere, in daily life, even your food and everything you can use it there. It's a new awareness, you see in daily life, we use our eyes, isn't it? In the same way you start using your vibratory awareness and once you start using it, it becomes part and parcel of you, you just know, you just know.

Question: *[UNCLEAR]*.

Shri Mataji: I'll tell you one thing, if you are following Sahaja Yoga nobody can harm you. That's one we have seen. Miracles after miracles I can describe to you. Now I'll give you one miracle which is very, very extraordinary. If you sit down I'll tell you one miracle. Now he said about the safety part. It's very important to know how miracles take place. There have been so many miracles in Sahaja Yoga that people have been saved from accidents and from deaths and all kinds of things, but this is something very remarkable and happened in

London, so we will believe more because it has happened in London.

In London, I had gone to a place called Bedford where I was giving a speech. About seven o'clock the meeting had started and I was there. And a boy about eight o'clock fell down from a bridge from his motorbike. And when he fell down the ambulance was sent for and when he was taken to the hospital they found that he was perfectly all right, nothing had happened, while he had fallen down very badly. They couldn't understand, so they said, “How is it that you're not at all hurt?" So he said that, “A Lady came in a white car and in a white sarī and She came down, She was an Indian Lady and She touched me all over and I got cured and a little point She left saying that you come and See me and I'll cure this point also, because you'll have to lie down so you'll come along later on." So they could not believe it and they published it in a newspaper that there was a miracle that happened to this boy and all the doctors are surprised that he's in such a good shape that he walked out.

So the whole thing was so surprising. Now he saw My photograph after two days in the newspaper and he telephoned to the hospital and to the newspaper saying that, “This is the Lady who cured me." And actually at that time I was with about six hundred people in Bedford talking to them and I was there till ten o'clock.

So that's how God looks after you. There can be many such incidents where you'll find how you are saved.

So many times it has happened with so many people. There was a lady who was coming from Rahuri, a place and there a big bus fell down. And it fell down about

eighty feet down and rolled once and felled on four legs, you see, so it was the whole four wheels were there and nobody was hurt. There were children, other people, nobody were hurt. Now the driver, you see, ran away with the fear and he didn't know what to do. He thought that something must have gone wrong, so many people must have died, but one person who said he knew how to drive came to the seat of the driver and he started the car and they came out.

And then all of them started saying that, “There must be some saints sitting here, otherwise how can it be, we cannot be saved under these circumstances. Nothing happened to the bus, nothing happened to the people, how can that be?" So there was this disciple of Mine, or My child, she was wearing a ring with My photograph and in Maharashtra people know Me very well. “Oh” they said, “This is the saint sitting here." And she came and told Me this and then people from that bus also came to see us.

So God looks after you. Once you are in His domain, in His empire, He has so many ways that He looks after you, so many ways you have to just see and the miracle word loses its complete meaning. You are amazed how you're looked after. After all He has created this creation not to be destroyed, especially you, you are a special creation of God which is not going to be destroyed. But human beings are such that they take time to take to God and to believe in His domain and to remain in His domain.

So you don't have to worry about all these mundane things about which you worry. It's all taken over by God's angels.

It looks like a story to you but it's a fact because for the first time I'm talking all these things in Kuala Lumpur. But now it's a fact for thousands and thousands of people all over the world. You have to just see whatever I'm saying, you need believe in it but you have to just see, keep your minds open and see for yourself if there is God or not, whether He has His own arrangements, He has His own telecommunication and everything much more efficient and absolutely perfect than what human beings can create.

Is there any other question please? Question: How does one forgive?

Shri Mataji: Now I'll tell you one thing. It is a myth we don't forgive. What do we do? Supposing I say, `I don't forgive,' then what do I do? I'm doing nothing. I'm just playing into the hands of the person who has harmed me, isn't it? All the time thinking about it, how much he has harmed me, how much pain he has given me. Do I do anything about it? Nothing, I'm just killing myself, I'm playing into his hands.

But when you say, `Forgive,' means you take it out of your mind, that's the point. You see, in practical way if you understand what Christ said is absolute truth. You don't know it's a mantra. At this point if the Kuṇḍalinī doesn't rise, I have to say you forgive everyone, it rises. You won't get your realisation if you don't know how to forgive. It's true, because not forgiving is just a myth. What do you do when you forgive or don't forgive. Nothing, it's just a myth. Now think about it, all right? Whatever is said is absolute truth, no doubt about it. I am here to explain all of them, whatever they said I'm here

to explain every word, whatever they have said it. And to prove that they were all right and they were all truth.

Question: *[UNCLEAR]*.

Shri Mataji: You see, what happens within you that your awareness gets enlightened. For example, now I'm sitting down here and I want to know about a particular person who's far away. Take a simple example, I've to just put My hands towards that person, thinking about him, or just wishing to know about him. Immediately My fingers will tell Me what's the problem with him. This is one small little thing that happens to you. But actually what happens to you that your awareness becomes, again I say, becomes aware of the whole, of the akbar, of the virat, of the whole primordial being of which you are part and parcel, like a microcosm becoming aware of the macrocosm. It's the little cell becoming aware of the whole body. For example this finger is aware of all My body, isn't it? Supposing I get hurt, I feel hurt here isn't it? But when you become aware of the whole then you become collectively conscious, means you become aware of everyone who's around you. You are aware of yourself because there is light within you, you can see yourself and there is light around so you can see others, in the true sense, in the absolute sense, in the subtler sense.

But what happens to you that I would say in a very gross way, you become ten years younger, in a very gross way. Now I'm sixty years of age and I'm working so very hard, I never feel tired and I'm just doing everything. I was telling the other day to a lady that you don't have to to beauticians anymore, your skin becomes so soft with Sahaja Yoga, your expression becomes so soft and you

have no physical problem, emotional problem, mental problems, nothing. You become a person living in the seventh heaven, it's a fact. The whole life becomes a witness, you start witnessing it like a drama. You're no more involved into it but you're dynamic because you're not involved, you see it clearly, as a witness. Gradually you mature into Self-realisation, absolutely. Then you become an expert. One by one, we'll be moving to that point, all right? Everything we should not know about the future; the present, we have to be in the present, just now you all get your realisation. Because you're futuristic, you always think about the future, future doesn't exist, does it? What exists is the present, just now to have the realisation. Once you get the realisation you live in the present, not in the future, not in the past.

Question: What is the purpose of initiation?

Shri Mataji: The purpose is that you have to become the Spirit, otherwise you are just. You see like if I make this instrument but do not connect it to the mains I have no purpose. The purpose is to be the purpose.

Question: *[UNCLEAR]*.

Shri Mataji: In Sahaja Yoga? Have you seen in Sahaja Yoga? No, I don't want to talk about others, as far as Sahaja Yoga is concerned once Kuṇḍalinī is awakened, it's awakened but as I told you it's a little seed which is sprouted, you have to look after it. As the parable of Christ is that some fell on the rocks, some fell on the wastelands and some fell in the right places.

So you have to look after it, you have to look after it, you have to allow it to grow.

There is nothing like initiation in Sahaja Yoga, we don't use that word at all, we call it the Kuṇḍalinī awakening. First the Kuṇḍalinī is awakened, passes through your various centers and crosses through this.

This we regard as the beginning of the Self-realisation. But if you have problems it is again sucked back and goes and attends to that problem but you can always raise it again and again and look after it yourself and that's how you should start growing. It's a living process, it's a living process, like a seed, how it grows, in the same way it matures, but the sprouting has to be done first.

Question: Is this connected to Kriya Yoga?

Shri Mataji: Oh no, not at all, it is akriya. What kriya can we do? You see what akriya can we do? People take out their tongues in Kriya Yoga, cut their throats, push it back. By mechanical things can you do living things, can you? Supposing you have to sprout a seed, if you stand on your head or cut your nose, is it going to sprout? No, there's no kriya, it's akriya. We have not to do anything, Sahaja, saha means born, ja means born with you and it's spontaneous. For all living things we don't do any kriya, we don't read anything, nothing of the kind. Supposing our breathing, if we have to do some kriya for it, none of us could exist. If we have to read some books how many would exist if we have to know by reading how to breathe, it's all spontaneous within us. It is not, on the contrary it's just the opposite of it.

Question: Whether you could you explain your life story, how you came into this.

I think you better find out about Me, if I tell something you may crucify Me, so I'm very careful. It's better not to talk about yourself, you see, that's the problem. If you tell about yourself, they all get on to your throat, you see and also not only that, but one gentleman told Me, “Why you?" I said, “It's very good, you come along and sit in My seat and do the job, I'll be very happy because I'm a happily married woman with a happy life and actually I have to give up lots of things of My family to come down here and under the circumstances it will be a good idea if you can do the job for Me." So, you see, I don't want to talk about Myself, it's better we talk about Self-realisation. Because that you can discover later on, gradually, one by one. That's a better idea, isn't it? Warren: I think you'll all be very anxious to experience Self-realisation, so why don't we have it? I think it's the experience that you've all come for, so just place your hands out towards Mātājī, ask sincerely from your heart that you get the experience, ask in a humble way. Just close your eyes and just allow it very simply and very sweetly to take place.

Shri Mataji: Now you will know later on that the left hand is the one that represents your desire, is the power of your desire.

So put your left hand towards Me like this, first of all. And the right hand is to be used to suggest the desire, the kriya, means the action, the power of action is on the right hand side.

Now what you have to do, just through your hand, you have to express your desire that you want to have your realisation. And it's very simple, you have to close your

eyes, please don't open them, because when the Kuṇḍalinī is rising if the eyes are open then it won't go higher because there's a dilatation of the pupil and the Kuṇḍalinī will just stop.

So please don't open your eyes. You can take out your glasses, will be good and it is also good for eyesight, so better take out your glasses. If you have anything tight on your waist or anywhere, or a tie or something, just make it little loose, that's all, be comfortable.

Sit with your left hand towards Me just like this and please close your eyes, please close your eyes, all of you. Now put your right hand on your heart, please close your eyes. Right hand on your heart on the left side, full hand on the left side, just left side. And now in your mind you have to say, not loudly, ask a question that, `Mother, am I the Spirit?' Just ask the question, `Mother, am I the Spirit?' Sincerely you must ask the question, `Mother, am I the Self? Am I the Spirit?' This you have to ask these questions because as I told you, I cannot cross your freedom. I am requesting you that you should ask this question to Me thrice, with sincerity, `Mother, am I the Spirit?' Now please put your right hand, without opening your eyes, below the heart, on the stomach, on the left hand side, on the stomach on the left hand side. Please put your right hand on the stomach on the left hand side and little lower, lower than the ribs and press it. Now at this place you have to ask another question, ten times you have to ask this question that, `Mother, am I my own master?' Because the diffidence that is in you can also stop your realisation.

So just ask the question, for the future you have to ask, `Mother, am I my own master?' Please ask ten times the question, `Am I my own master? Am I my own Guru?' Because your Spirit is the master, is going to teach you. Once your Spirit is enlightened it is he who is the master and you have to go according to the guidelines of the Spirit.

So you have to ask the question, `Mother, am I my own master?' Now again you have to put this right hand on the heart, it's important because of the tensions of life, I feel your heart is rather weak because of our attention outside, our attention on the heart is much less.

So you have to ask a question on the heart, a simple question, again the same thing, `Mother, am I the Spirit?' Or you may even say with full confidence if possible to say that, `Mother, I am the Spirit. Mother, I am the Spirit.' Just assert, `Mother, I am the Spirit.' Please say this twelve times. You have to accept that you are the Spirit. You are nothing but the Spirit, the rest of it is just an outside, outward things.

You are the Spirit and you are the glory of the Spirit and not a person who is enslaved by anything else but your own Spirit which is God Almighty's reflection within you. Now as you are the Spirit you cannot commit any mistakes, you cannot commit any sins, so you have to forget about the so-called sins you have committed and all these things, because God Almighty is the ocean of love, is the ocean of compassion, is the ocean of forgiveness. In His presence what mistakes can we commit? So you are not guilty at all. In His presence your guilt has no meaning.

So raise this hand higher at the base of your neck on the left hand side. The right hand you raise on the base of your neck, base of your neck and please say, `Mother, I am not guilty.' Because you're the Spirit and how can Spirit be guilty, because it is a detached thing, it cannot be guilty. You have to say that sixteen times. It's very much more with you people. This is the very big problem I think that people unnecessarily feel guilty. Because we have created so many norms out of our ways that, “This is good, that is bad, that is you have done wrong, that is I have done wrong." Nothing of the kind. Just say, `Mother, I am not guilty.' Say with full confidence, you're not. Sixteen times, say with full confidence, `Mother, I am not guilty.' This guilty feeling has come through various conditionings for nothing at all. There's no need to feel guilty about anything. Also what do you do about it? Nothing. To say that, `I'm guilty,' itself is an escape, I think, just from yourself. You're not guilty and when you say guilty you don't want to do anything about it. Just say, `I'm not guilty,' you're not.

Now you have to put your right hand on your forehead across, forehead across, here on the forehead, put it across but keep your eyes shut. Now at this point you have to say, `Mother, I forgive everyone.' Just say it, just say it, `Mother, I forgive everyone.' Because if we don't know how to forgive others, how God is going to forgive us.

So we have to ask for His forgiveness, but first we have to say that, `Mother, I forgive everyone.' Just say this, so that God can forgive us also if we have done any mistakes but don't feel guilty, again I would say, without

feeling guilty you have to say this, without feeling guilty you have to say that. Don't feel guilty.

Now put this right hand again on top of your head, on top of the soft bone which you had in your childhood. Just press it with the palm, that area. And now at this stage you have to ask for realisation, nobody can force on you as you are free people.

So you have to say, `Mother, please give me my realisation.' Or, `Mother, I want my realisation.' Just put your hand down, up there you'll find it's lot of heat coming out. It's all coming from within, lot of heat is coming out, try to press it. Press it, little bit and the heat will go away, we'll see that gradually.

Lot of heat. Just say that seven times please. Why all these numbers I'll explain to you tomorrow, while seven times you have to say that, `Mother, please give me my realisation.' You can change your hand now, you can put right hand towards Me and see with your left hand, you just hold it little higher and see if there's a Cool Breeze coming out. Don't open your eyes please. Just you can change your hand. Put your right hand towards Me and see if the cool is coming out. Raise it higher, about four, five inches higher and see, just move your hand and see if there's a Cool Breeze coming, you can change your hand and see for yourself. Put your both the hands towards Me. Now just watch Me without thinking, you can do it, just watch Me without thinking.

Are you getting Cool Breeze now on your hands? It's a very subtle thing, it's very subtle and so one has to be careful about it. Close your eyes again please, close your eyes.

[Shri Mataji blows into the microphone.] Please raise them very much higher.

Please raise them higher and just ask a question, `Mother, is this the Cool Breeze of the Holy Ghost? Is this the Cool Breeze of the Primordial Mother? Is this the Cool Breeze which is called as Rūh? Is this the Cool Breeze of the All-pervading Power of God? Is this the Cool Breeze that is Brahma?' Just ask a question. Get the Cool Breeze in the hands? All right, just put your hands towards Me now. Now be comfortable. Now you have to respect yourself because now you have become the temple of God. You have to respect your realisation also and you have to know that God has selected you to be His vehicle, to be His instrument.

So one has to know about it, the whole knowledge about the roots that we are in reality. I hope tomorrow you'll make it convenient to come to see Me and here.

We have got books about Sahaja Yoga but the problem is if you give them to read to people they just start thinking about it. I think today as you have got realisation just go home, don't think about it too much, just don't think and discuss because by thinking you're not going to reach there.

So just don't think about it and when you come back tomorrow I will give this book and tomorrow I'll explain to you what are the centers, what are these Chakras and how to work it out and then you can take the books from us.

***Contents: 1983-02-24*, Public Program, Day 2 (evening), Kuala Lumpur, Malaysia**

This morning when we met together, I told them how to come to right conclusion about the right Guru because unless and until there is an enlightened personality you cannot be enlightened, that's a fact. Also it doesn't mean that there is nobody who can enlighten you. There are many, many fake Gurus and many, many fake things. But we should come to right conclusions.

I will repeat what I said this morning, how we come to right conclusions, first of all you must know that we must use our brains. You cannot be a brainless person when you try to come to God's ways because we are human beings and God has given us a brain to come to logical conclusion and not to a rational conclusion.

Now what is the logic? First of all we must know that God cannot charge you any money; first, they cannot charge you. That's one first principle of God is, He doesn't understand money. He doesn't need your money. And the person who is godly or Divine can never take any money from you for his or her maintenance. Of course it's all right this hall, these people if they want to pay for the hall, all right, it's they've paid for the hall but for realisation or for anything because those who are living on your money are parasites. You're retaining them, you are really retaining them by paying them and parasites cannot be Gurus.

So this is one thing very sure, anyone who takes any money from you for the maintenance of the personality then of course he is not a godly person. You might even say that then, “Mother, how have they to live?" They live as they have been living; I'll give an example, there was a boy whom I gave realisation, he was an Indian boy and

he went to America and he started charging money for `intensive treatment' of Sahaja Yoga. And when he came to America every Sahaja Yogi told Me, “Mother, something wrong with this fellow because whenever we put hand towards him we get a reeling feeling." So I asked him, “I would like to see the brochure” and when he showed Me, it was written, “For ordinary vibrations” so much and “for intensive vibrations...", like this.

So I asked him, “How did you get your realisation, did you pay for that?" “No, Mother but you have money." I said, “Whatever money I have is all right, how did you have money yourself?" He said, “I used to work as a teacher." I said, “You should work as a teacher, because I'm a housewife I've got money, My husband pays for Me all right. If I were not a housewife I would have been a maidservant, all right. Why should I take money from you for My maintenance, it's first thing I should have My self-respect." Secondly, absurd ideas should never appeal to you, like the one you have mentioned that you should not get married and you should stay in a place and become Brahma Kumaris and self-appointed people.

That's not the way it has to be done. Why should you not get married? All the people who were great people got married. Christ died very early; there may be some did not marry doesn't mean that everybody should not marry. It's against God not to marry because after all, the children are to be born. This is the work of God that children are to be born, so anybody who tells you, “Don't get married” and then live in a very unnatural way and do lots of perverted things is a wrong idea. It's absolutely wrong. This has never worked, one should never do. Now

you see we had nunneries and this and that and these monks were there. And recently if you hear about them you'll be amazed that they are demanding now so many things, they've formed unions. Not only that but they're leading a very bad life and so many have confessed that, “We couldn't live like this." So why to make a person absurd and obtuse, for God's sake it's not necessary, God never wanted you to be that way.

Thirdly you must understand that the miseries, people tell you that you must go through miseries.

Many Gurus I've seen when they try to initiate and all that, they take lots of money, of course the first is always there, the taking money part. And the second is people start suffering. For example these Maheśh yogi people, they started suffering a lot. Now the explanation was given that these are your sins you're suffering for.

So they asked then, “And if these are our sins what are you doing there? Why are you our Guru? You can't look after our health." So what's the use of having such a Guru? If you have a Guru, at least your health should be all right. And if they cannot even look after your health then such a Guru is of no use. They said, “You must suffer." Now this is very out of date idea about which I have to tell you that the suffering was up to the time when Christ came in. After that it was not true. You see, the Jews refused to accept Christ because they believed that without suffering you cannot go to God. It's not true. But they believed in such a thing, they refused that Christ should be the one who can lead them to something, better life. And that's how you know how much they suffered. They got Hitler, you want to suffer,

all right, have it, have all the sufferings of the world. Now the Jews then suffered a lot and suffered so much that they didn't know what to do, they could not control it, it's beyond them.

Afterwards when they came in charge of the thing like a state of their own they started behaving in the same manner as Hitler behaved, same manner, so there's no transformation within. Suffering doesn't give you any transformation. Just imagine how much Jews have suffered, to what extent they have gone of suffering, can there be a greater suffering of human beings and the Jews have suffered. I mean, if you read a book like, called Exodus, you'll be thinking that, “Oh God, what's happening to this world." But in modern times very recently how Jews have behaved towards human beings, you can't believe it because there's no transformation of nature. They're not at all transformed; it's just an idea they had that they have to suffer and they made others suffer. Now how will they explain this, they cannot explain.

So we have to understand logically those people who are going to all these Gurus, is there any transformation in their character, in their temperament, in their behaviour? Then we have to know if these people have got some powers of their own of love. Have they got any powers of love? Like now you have got here Warren, Doctor Warren came to Bombay [Mumbai] with a telephone number about Me and he was given all funny ideas about Me that She doesn't meet anyone and She's this and this and that and that and he just telephoned and came to see Me. And I knew that this is the person who is seeking, he's a

true seeker. He got his realisation, still he was going like that for some time.

But then he settled down and today here he is, he is doing so much you can't imagine how many people he has cured, how many people he has given realisation to, you can't imagine. If you see his lifestyle you'll be amazed and say he's one of the saints that you have ever seen. He is not attached to anything, he's so much detached about things and he's doing so much good to the whole world.

And he travelled with Me to America and he..., you see I'm all right because I'm like this, I can live under any circumstances, I can sleep on the street, I can sleep everywhere. But he too, I've seen so many Sahaja Yogis, they have so much adjusted themselves, they have really become like great souls. They adjust themselves anywhere I go, wherever I sleep because, as you know, we do not take any money, we don't have big palaces and air-conditioned places to live in. We have to go in the villages of India, we have to travel by bullock carts, we have to live under all circumstances, we don't feel the sufferings at all because then you become so much adjusted to yourself. When there is adjustment absolutely achieved, you don't feel that.

So you must also see what is the achievement, the people who are there, they've got. If they just talk talk talk talk talk, it's no use. See their character, see their behaviour, how they behave, how their attitude is towards money, towards women, towards all these things, like temper, if they're hot-tempered, you can find

out from the character of the person if there has been any transformation or the people have been bettered.

I have seen people who were called to be the worst of all, they said, “Oh this man is the worst of all, you cannot do anything about it” it's completely changed. They leave all their habits, they leave all their funny behaviours and funny ramblings and they come to a settled position of peaceful behaviour.

So this is also another logical way of seeing. We should not jump into anything like that. When you see that somebody is being benefitted you can come to them.

In Sahaja Yoga, for example we just say that you have to achieve your Spirit, you have to achieve your Spirit, nothing else. Now when I say that you must know it's the other way round. You do not have to give anything to Me, I have to give you something. It's you who have to receive something and the reception is only this much that an enlightened light enlightens your light. This is all your own, it's all yours, just I have to enlighten your light. Once you're enlightened you can enlighten another person's light. It's so simple and logical to understand. But if somebody says, “All right, you do this kind of a penance, you do this stand and that kind and all that” and that leads you nowhere then it is better not to have such a Guru.

There are so many ways by which you can judge people. Like one gentleman wanted to have fifty-nine Rolls-Royces, he's got fifty-eight Rolls-Royces and he's going to have the fifty-ninth and he's supposed to be coming here also. Now imagine with any sense in your brains you can understand what is it for a realised Soul to have fifty-nine

Rolls-Royces; to Me even one Rolls-Royce is what, what is the need to have a Rolls-Royce, I mean, just imagine, little bit of your brains you can understand for a realised Soul what is the need to have all these? This lifetime I am born in a very rich family, My husband is rich and I really live with a great style, I should say as far as My husband's life is concerned. It's true but I can live anywhere. I don't know what is the importance of all these things than to think of God and just do His work.

So those who are doing God's work should not be interested in Rolls-Royce and things like that. But people are so mesmerized that in London people starve themselves, ate these potatoes and all that and they gave a Rolls-Royce to this fellow. Perhaps he might beg one more from you, one more Rolls-Royce. Is he going to carry all these Rolls-Royces with him? If you just think about them you'll understand this is all nonsense, it has no sensible background and as you ask the question, everybody should ask the question that you have asked, there's nothing wrong in such asking, I don't mind but only thing is that, you see, if I say this things, sometimes people get very upset.

For example, about, in the year 1970, I think, in a big hall like this, bigger than this, before thousands of people I told about all of them by name, I told them this is this devil, that is that devil, I told them very clearly and everybody's so frightened that they said they're going to shoot Me now, all the Gurus and all that.

So I said, “Let Me see if they're going to shoot Me." But nobody listened to Me. On the contrary they didn't like, they said, “She is criticising, you see, `this' not good."

But today they're all exposed one by one, you can see everyone is exposed. You must use your brains. You should not be a naive, stupid fellow to follow these things. You know the whole money is spent, it's all a ego trip, sometimes they give you, they pamper your ego, sometimes they mesmerize you, they do all kinds of tricks and what do they make out of you? You are seekers of God, you're seekers of truth and when there is no truth why should you accept it.

There is no need to accept but also you must keep your open mind to the understanding that if there are so many plastic flowers, there has to be some real one. And the sign of the real one is that the real one gives you your own powers, talks of the higher things. It's only worried about your own ascent. The real one is not worried about all these nonsensical things like a Rolls-Royce and all these foolish stuff.

So one has to understand that so many of them, it's so surprising that those people who have been elevated as something great, even if sometimes they make a drama, you see, they can be very dramatic also, they will wear a dress like a big Guru or just wear a small loin cloth, you see and also may have punctures in their hands and pours something into their noses and do all kinds of these things just to appeal to your pity side of it, you see and they may try to do. But that's not the point. One should understand that it is not in the exterior that you should see a person. The way the whole thing is conducted, the way it delivers the goods and what is the thing, that is the Spirit. You must get to your Spirit.

Now you'll be amazed that these are the modern times when there are thousands and thousands who are seeking. You are a seeker, you cannot think of this happening about thirty years back. Now there are so many seekers I find of this age group, say, thirty below and thirty above but at My time when I was born, I didn't find anybody realised except for My own father, I didn't find anybody who was a realised Soul. And nobody had any seeking, instead they were worried about other things because that time we're fighting the war of independence, they were worried about the independence, was a good idea, that time it was necessary they fought it.

But today the time has come to seek God because we have got this svaTantreya, the one that is in the awareness. Now we have to have the freedom of the Spirit, the svaTantreya, we have to know the mechanics of this swa, that is yourself, your Spirit. And this is what one has to take to and when there is a demand, people know, these negative forces also know, they come from everywhere and create all these false images and come to you.

Somebody will come with a big hairdo, you see and stand before you showing some diamonds coming down. Are you asking for diamonds? Think about it, do you want diamonds? What is this? Somebody is giving you diamonds, for what, why to have diamonds? Just ask, do you want diamonds? Then you go to the market and buy the diamonds. God is not bothered about diamonds, what diamonds you have got, how many diamonds you need. He's bothered about one diamond which is your Spirit.

You have to get to your Spirit, that's what God knows. What is diamond for Him, is not even equal to the dust particle of His feet. Why should He give you something that is dust? He should give you something that is great, parama, supreme and that's what one should see.

And your question is all right, I mean, they're all questionable, most of them who are in the market, I tell you. I'm not in the market, I'm sitting at the backside in a temple, waiting for all of you to come to know your own temples. It's a definitely different style of thing, is Sahaja Yoga, is that Sahaja, saha means with and ja born. It's born with you. Sahaja is spontaneous, it's born with you. This Sahaja becomes a Yoga, means union with the Divine and as I told you today, people think they have become realised Souls, suddenly they self-certify themselves, born again and this and that. I said, “How are you born again?" If you're born again you have to have collective consciousness. And when you tell them, they don't want to believe it because it's an ego-pampering to believe that, “I'm a realised Soul." But even if you're really realised Soul you don't feel that way. There is no pride or no vanity about it, you just feel the other personality within you on your finger tips. You don't feel that pride and that ego within you, “Oh you are a realised Soul." On the contrary you become very humble, you become very kind, you become very compassionate and you start thinking, “Oh how will I do it?" Like I would say, Betty Hubbell who was in Houston who called Me there and when she came here, she was to be transferred to London, she wanted to be there with Me. But I told her, “It's better you be there in Kuala Lumpur,

they need you very much." And because she came here, she just felt that it must be brought to these people here. It must be given to her, she's very well off in life, she lives very well but she felt that, “What I have got I must share it with the other person, it has to be done." And she said, “Mother you must come, even for two days, you must come because here the people are seeking." And that's how one feels, there's no pride, there's no vanity, nothing, you become extremely humble and when you meet them you're surprised.

We have a Sahaja Yogi who is a president of the Hague high court, he's a judge there and now he's the president of the world high court. Once he was sitting like this and when somebody came and talked to him and he asked him, “What are you?" “I'm a Sahaja Yogi” that's all. Nobody could make out who's who, because what is important that you are a Sahaja Yogi, it's not important what you are in life. Such a personality has to develop within you through the Spirit because Spirit is the highest. And that's how gradually you come to right conclusions.

The trouble is there are so many things floating in the market that you definitely get confused. I know it is so but that's why you must get your realisation. Without realisation you will not know what is the truth and what is not the truth. For that you don't have to pay anything, you don't have to do any exercises, nothing of the kind, you have to just get it in your being, in your awareness and you start feeling it.

The only trouble is it is so smooth and so simple that when you get it you don't understand the importance of

it. You don't understand that how you have to grow it and look after it. This is the only point where I would request you that to settle down within yourself and see for yourself and work it out.

You must spend this, give realisation to others, try to develop that and then you will realise that you are a realised Soul. Because you become so humble that you don't want to accept that you're a realised Soul.

You become so meek and so simple that you can't believe, people just can't believe it, “How can I be a realised Soul?" They just can't believe it, it's too much for them to believe that they could be realised Souls.

But you must have faith in yourself. Like, say, a computer is there and the computer has no faith in itself that it can do all the work. Once you put it to the mains you see the Yoga takes place, it starts working. When it starts working it has to believe in itself. You must know that you are made with very great care by God, very great care. See now how beautifully He has made you, you're not even aware of it, you don't know these things exist within you, that these are the subtle centers which look after your physical side, mental side and emotional side.

These are the centers which guide all your movement in life. You have no idea, you're not aware and these centers exist within you and these must be known and found out and felt within yourself and by that, bodha, by that awareness, the new awareness which gives you the vibrations but the vibrations are Cool Breeze, there's not heat, there should be no heat in the body. If there's heat that means there's some sort of an opposition going on.

They experimented with helium gas and they found that the helium gas when it is cooled down, it starts going in a way that is very collective. All the molecules start moving in a way as if they're collective following a pattern. But once it is heated it becomes *[UNCLEAR]* and all the molecules start fighting among themselves.

So some people believe if there is heat, it is God, how can that be? It is said that it has to be a sheetala, sheetala bhavan, is described in all the books it is true, is described, it is described as the Cool Breeze of the Holy Ghost in the Bible, it's described in all the books like that and when that starts coming, but it's not very, very cool. If your hands become very cool and sort of you feel that you're numbed out, then there is something wrong. But it is a cooler type of a wind that starts flowing in you and then you feel it all over, the wind is all over and this is the wind of Brahma, it's the wind of Rūh which is working out every living work, every living function is done by them.

Unless and until you become the Spirit you are not going to stop your seeking, so better become your Spirit, that's the main thing is. It's a very different thing, we have no organization as we don't have members, we don't collect any money, there is nothing like that. What we have is a living organism, it's a living organism.

Some people who join it become one and those want to give up can go away. There's no compulsion on people who do not want to stay but mostly when they come, they find such a lot of good coming to them that gradually they get attracted and then they settle down

within themselves. They meditate and find their depths and they think this is where lies the Kingdom of God.

Is there any other question? Yes please, we'll have two questions.

Question: [about children].

Shri Mataji: Oh, they're the best, children are the best. You see, children are the best to be realised no doubt. They get realisation just like that. I went to a village in Trishul, a place little away from the city and they had a residential school and we had about eight hundred children, the professor and the principal of that school was a Sahaja Yogi and he said, “Mother, will you give realisation to these children?" I said, “All right, let's see” and they all came down. And when I said, “All right, now let's see, is there any Cool Breeze?" tremendous breeze started coming and it started coming back on to Me. Normally I never get any breeze from anyone. But it started coming waves and waves and we were enjoying among ourselves.

They are the best, no doubt but I find that, you see, sometimes we pamper our children's ego very much, sometimes they can be really very ego-oriented. We had two children today in the program when we're sitting and they had such a terrible ego, I mean, I was amazed for little children of say, ten years old, he had such an ego that the Kuṇḍalinī would not rise at any cost and they were very egoistical. I don't know how this ego was built in these two little children, one was, I think, about fourteen years of age and another boy of eight years of age and I was amazed that they were so ego-oriented, so much ego in the little boy and the girl, how they got it we

just couldn't understand. They thought no end of themselves and they're behaving in a manner that one can't understand.

There could be some like that but most of the children are innocent and simple and above all there are so many children these days are born realised, so many children are born realised. You don't know what they talk, how they talk, what they mean. But once you get your realisation you start understanding them. The way they talk about things it's so surprising. In England, a lady wrote a book about what children have to say about grown-ups and she wrote a book and the book was finished within no time and she wrote about..., three thousands copies she had and all the three thousand copies were finished in one day and she had to republish and republish. Because whatever they're saying, they're so wise you can't imagine, they're extremely wise.

Luckily all My four grandchildren are born realised and they have all the knowledge of Kuṇḍalinī, they're great people. And they were very young and I'll give an example of how they were used to behave towards Kuṇḍalinī and this and that. One grandchild, one granddaughter went to Ladakh with her father and mother and there was a lama sitting, his head was shaved and he was wearing a big robe and everybody was touching the feet of this lama and she was looking at him like this, she didn't like it and then the mother and father also, because everybody was touching, they went and touched the feet of the lama. She was very angry, she went and stood, she was only five years, she went and stood before him like this and she said, “What do

you mean? If you have shaved your hair and wearing this long thing, do you mean you should ask people to touch your feet? You're not a realised Soul." Just she told him off and the parents were so embarrassed. They said, “What are you saying?" She said, “I will say it because why did you touch his feet, he's not a realised Soul." You see, the children are like that.

Then we had one program of the centenary of Brahma Śhrī Rāman who was a realised Soul, no doubt and I was called as a chief guest there and one of My, another granddaughter had come and she was sitting in front and there were lots of Sahaja Yogis also sitting and the program was about to start and she stood up and she said, “Grand Ma, the one who is sitting next to you with a maxi” because he was wearing a big thing, this big robe thing, so she didn't understand what to say, “The one with a maxi, please ask him to get out, he's giving all heat to us, please ask him to get out." And he was the head of one of the missions of a mission is there and I didn't know what to do, that's how they are.

But we don't understand them because if you're not a realised Soul you don't understand. And once the little one, she was only three years, going to a kindergarten school and she brought a paper and she showed Me that this is the paper they gave in the school, imagine the school also is funny to give this to a three year old child. The writing was that if you pay hundred rupees and go to a particular hotel then they can transform your life and can change your life.

So she said that, “How can that be possible unless and until Kuṇḍalinī is awakened, it cannot be possible." The

little one three years old also said and the elder one said, “But there cannot be course in Kuṇḍalinī, how can there be a course in Kuṇḍalinī? My father has done fourteen courses, his Kuṇḍalinī is not yet risen." So that's how they are, you see, they're so much there, they're so much there. They understand each and everything and they know how to do it and they express themselves in such a good way that you can't imagine. But the trouble is we ourselves are not realised Souls then can we understand these children? It's a very good point you have taken up, I mean, without the children I can't work out. But if you have such ego-oriented children, then it's a difficult thing, it's a difficult thing but if you have children who are sensible it works out much faster.

All right now should we start the program in a way that I must tell you about these three... Whatever I'm saying to you I would suggest that you should be an open-minded scientist because as I told you yesterday this is the knowledge of the roots and you have to be an open-minded person. Now it's like a hypothesis you must listen to this, you need not believe Me what I'm saying. It's not necessary but you should keep your mind open as you go into a university or something, you keep your mind open, see for yourself and it works out, you have to accept, even then if you don't accept then you're a dishonest person, you're not a seeker definitely. Once it happens to you, you have to accept that this is the truth.

Now here we have one power within us which is on the left hand side, you see, the blue line. This is the power of our desire. This power comes to us first because first it is to be desired that we should exist.

So this is the power of our existence also and also it gives emotions.

So the first thing that comes to us are the emotional ideas, the emotional feelings, the emotional memories.

So this represents also the power by which we collect our past. For example, a thought rises in our mind and then falls off and another thought rises and falls off. The thought comes either from the future or from the past and then it disappears into the past. All these thoughts, all our doings, all our experiences, all our conditionings are managed by this power of desire. In Sahaja Yoga language this subtle channel is called as Iḍā Nāḍī or the moon Nāḍī, Chandra Nāḍī.

Now there is another power we have got here on the right hand side which starts from this center is called as Piñgalā Nāḍī. This is the channel from which we get our power of action, physical action and mental action and it looks after the future thinking, the future managing and it goes towards the future side.

So this is the Piñgalā Nāḍī and these two express outside, the left one in the subtle is the Iḍā Nāḍī but expresses itself as left sympathetic nervous system and the right one expresses itself as the right sympathetic system.

Now in the center we have another little one, there's a void in between, but there's a little one inside the channel which is not yet fully developed ready to receive the Kuṇḍalinī from down below which we call as Suṣhumnā, Suṣhumnā Nāḍī. This is the channel by which we ascend. We've ascended so far to be a human being, as being told that we came from amoeba to this stage. This ascent came to us because we have this power

within us to ascend. We never think how did we become human beings. Even Darwin, I was told, has said that, “Now the man has come so far, so he has to go further." But he has not indicated where he has to go but Jung has very clearly said that if man has to rise anywhere higher, he'll become collectively conscious. It is Jung who said that because Jung was the person who got his realisation in his lifetime and he was a changed personality and he talked about it.

So you have to become, again I say it's actualisation, you have to become collectively conscious, it is not just saying, `Oh now we're all brothers and sisters,' it's not so. It is the awareness within us, the Chaitanya within us has to become enlightened with this new awareness. As human beings we have so much awareness, as I told you the other day, higher than that of animal and it has to be a higher awareness and unless and until it works out on that level, it is not a Self-realisation.

So you have to feel your Spirit on your central nervous system, that you have to feel it in your hands, to feel it on your feet, to feel it on your back. You've to feel it on your central nervous system as you can feel anything like this wood or anything.

So the awareness has to be such that you must feel your Spirit flowing through you. Now this first power is important for many reasons because through this we try to express our seeking through Bhakti .

We worship God, we ask His help, we say, “God, please come and help us” or we pray to Him, we have churches, mosques, all these just to pray to God so that He descends on this earth to help you. This is the Bhakti on

this side, left side. The right side is by which people did homas and yagyas in India and all the intellectual treatise people wrote about ascent and all that, is on the right side.

But human beings as they are normally they use the left side to express their desires and this desire that is the purest desire, the desire that is uncontaminated is the only desire which really we seek, is sitting down there called as Kuṇḍalinī. It's the purest desire within us and the desire is that we have to become one with the Divine. This is the only desire that is within us and which we should express, otherwise we're not going to be happy. As I told you yesterday that material gain or material advantage goes up to a point and you're not satisfied, it's not satiable.

So this desire which is sleeping because it has not yet manifested itself, you have not known the All-pervading Power, your Yoga has not been worked, the Yoga has to take place.

Now these three powers are within us out of which, I told you, these are left and right sympathetic but this one is the parasympathetic nervous system and if you ask any doctor he'll say, “I have no idea as to what this parasympathetic is like." Moreover if you ask a doctor why the behaviour of a particular chemical like adrenaline or acetylcholine is so different in a human being at different places, he won't be able to explain. But they're honest, whatever they see is the science but whatever they do not see is no more there.

So to know about the science of God's work, one has to become a subtler personality to be the Spirit.

Without becoming the Spirit you will not feel these Chakras, you will not feel these sides and you will not understand.

So now what happens with people who are extremely emotional? They go too much on emotional side, then they start moving gradually that side, that side and beyond that lies the subconscious and beyond the subconscious lies the collective subconscious. Most of these Gurus use these methods of pushing people into the left hand side. “Now do your Bhakti , do Bhakti ." They go on doing Bhakti , Bhakti , Bhakti and they go to that side. Now by going to the left hand side in the collective subconscious, resides all that is dead since our creation.

Recently I saw a very nice film on cancer, the recent research on cancer and they said that cancer is caused by the triggering of cancer and this triggering is done by some sort of a protein, which they call Protein 58, Protein 52, all sorts of things, they give just the names because they don't know. But one thing they definitely said that these proteins are built within us since our creation, means from collective subconscious which is correct. And that's why I said that cancer is caused by this triggering within us.

Now I will explain to you how when we are too much on the left hand side, how the diseases are caused.

For example now we have in the center is the Chakra here, the center is the Chakra and on the left hand side and right hand side are these two powers. Now when we work too much of sympathetic nervous system, the Chakra starts working like that and then suddenly they

break. When this is broken then the connection with the whole is broken. When the connection with the whole is broken you become on your own, the cells become on their own, means they become malignant. A person who has broken connection with the whole society can be on his own and can become malignant to the society. Thus the cancer is caused within us. Once the cancer is caused within us there's no way you can bring it back and that's why people cannot control the cancer.

But Sahaja Yoga can not only control but also can cure it because what we do is to just give vibrations to one of the centers there so that they get the energy that they've lost and they come back to that central point where they get the connection to the whole and the whole thing is controlled. In the cancer you know, one cell grows so much that the nose will start increasing more, the ear starts becoming big or something and they start oppressing other cells and that's how cancer is very dangerous and according to doctors it is incurable, but not according to Sahaja Yoga. We can always cure cancer, you can cure cancer and if you get to Sahaja Yoga it's very hard for you to get to cancer.

Now we have on the right hand side, there are many diseases like, what are the names, like mellitus and all that; on the left hand side what are the diseases, poliomyelitis and all sorts of these diseases which we do not understand, this Parkinson's and viruses and all these diseases, polio, all these come from left side and they can be easily cured if you know how to get rid of these proteins that are invading you and how to make you relaxed and endowed with energy so that you go back to

your normal condition. It's so simple to do it. Now we have on the right hand side another power as I told you by which we think for the future and when we start thinking too much what we do, actually medically that I don't know if the medical science accepts this thing, but it is so, that when we use the brain cells which is replaced by the fat cells of the stomach. It is all the time replacing the fat cells from the stomach and when this action takes place what this center, the center you see there, the Swādhiṣhṭhāna which has to do this transformation of the fat cells for the use of the brain. Also it has to look after your liver, your pancreas and your spleen, your kidneys, your uterus.

So when you start thinking too much the energy of this center is devoted more for the work of the transformation of the fat cells and these organs suffer. That's why people who think get diabetes. Normally the people who are working in the villages, they take so much of sugar, they never get diabetes because they don't think, they don't worry about tomorrow, they don't have insurances, nothing of the kind. They just live for the present, they live happily, they don't have to worry about, `What is going to happen to me tomorrow, what is this, what is that,' they are just doing what they have to do, so they don't get diabetes. But those people who think too much always get diabetes. Now the nature is trying to give you a balance because it is working so much, on one side it has to be balanced and just to indicate it gives you a disease called diabetes which only can be cured through Sahaja Yoga if you know how to give yourself a balance.

Another disease which comes to you very often the disease of high blood pressure and tension and kidney troubles. This comes to you because of the same thing, if you think too much then what happens that the energy that is to be used also for looking after the kidneys is completely neglected, it doesn't get that energy which is required by the kidneys and so you get the problems in the kidneys and the blood pressure and tension rises and you suffer from blood pressure, high blood pressure and hypertension and ultimately it results sometimes into all other troubles like, hypertension leads you to paralysis, to things like paralysis and, you see, you get complete paralysis and you can get also a temperament where you have no memory, amnesia. Amnesia, absolutely you forget the past, absolutely you don't remember of the past, that can also happen to you.

So all these things happen because when this is working too much, as a by-product it produces a yellow thing as you see like a bile, is the ego. This one produces the superego on the left hand side and this one produces the ego. And when this ego envelops your brain all these things happen that you forget the past and you get hypertension, the whole ego collapses. I've seen people getting balloons and balloons of ego on their heads. And then they come to Me that, “I'm suffering from this disease and that disease." Then you have another disease of the liver. People have two types of liver, all organs are of two types, one is lethargic, another is overactive. When you're overactive you're on this line, when you're inactive you're on that line.

So overactive liver can be creating nausea and all these things, what you call, the biliousness in a personality and can lead you to horrible diseases like cirrhosis of the liver. It's a very serious disease and can come to you without doing any harm to yourself. Now this is an important thing to understand that doctors always give medicines, general medicine like you should not have sugar, everybody's told not to have sugar, whether you have diabetes or not.

But the people who are suffering from liver must take sugar, it's important. If they don't take sugar then liver cannot be improved. I'm talking about liver because I found that in Kuala Lumpur many people are suffering from liver trouble. But there can be a liver which is also lethargic. If it is a lethargic liver then you have to take calcium or things like calcium, which give you..., the lethargy is removed and you get more active.

This is another trouble that comes to you is a very serious trouble, comes to you from the spleen.

A person who is a very hectic person, who is very tense, who is all the time working, like eating your breakfast in the morning in the car, then rushing about and shouting at everyone and who's a hectic person, always in emergency gets the problem called as leukemia, blood cancer. The reason is this spleen starts getting hectic itself because it has to produce red blood corpuscles for the use of this emergency.

Now the emergency's so hectic that the poor thing goes mad, actually it becomes crazy. When it becomes crazy it starts producing blood cells at different points with different frequencies and with different sizes.

That is how we are vulnerable to leukemia and if there is triggering, immediately you get leukemia and leukemia is a fast moving disease and it kills people in no time. You'll be amazed that Sahaja Yoga has cured leukemia of many people and it settles you down with the proper speed and proper understanding, because we are human beings, we're not machines one must understand, we should not try to move like machines, otherwise we'll become machines. Those people who've used machines too much, they don't even recognize their fathers, their mothers, their wives, their children, they've become just like machines.

You'd be amazed that in a place like London it's a fact that two children are killed by parents every week. Can you imagine? And they don't mind it, they don't mind, “What's wrong?" Everything, “What's wrong?" you see. It's like a machine, they have no feelings left. Thank God you're not there.

Sometimes I feel that these people have lost all the contact with their heart, there's no heart, only the brain, the brain is thinking all the time, all the time the brain is thinking. But the heart is not working.

So when you become like a machine and you're so hectic and all that, these problems come to you, like leukemia. And we have to understand that if there is no energy left within us, if we have exhausted all our energy then what's going to happen to us? If all the petrol is finished then what do you do? You get tense, isn't it? In the same way if all your energy's exhausted in this kind of hectic work you get completely exhausted and that exhaustion

brings another problem also of another nature that you might get a heart attack.

Now heart attack is a very interesting thing, one has to understand. Heart attack comes to people who think too much, who plan for future. Because they're outside, they're extroverts, they have no attention on their Spirit and the Spirit resides in the heart and under these circumstances when the ego develops so much it covers the whole head, it also covers the heart. And when that pushing takes so much pressure on the heart you get the heart attack.

So the heart attack person is not to be pitied at all because he's to be told frankly, because he has to be an aggressive man who gets a heart attack, he's to be told that he should take his life easy, not push others, not push himself into this rat race. This rat race is a maddening thing and this is the balance that the nature is giving you. The interesting part of it, those who suffer from heart actually have worked with their brains. They have worked very hard with their brains so heart goes out. But those who work with their heart, people who are hysterical and all the time crying, weeping, their brain goes out, they become, what you call in American language, gaga. They just become funny.

That's what is the balance of the nature that comes to you. A doctor told Me that in a lunatic asylum you never use anything that is connected with the heart because there's no problem of the heart, heart is always sound. And a person only gets problems in the head, not in the heart. It's surprising, when he's working with his heart, he gets the head problem.

So one has to understand that one has to be balanced and that is why all these primordial masters came on this earth to tell you, “Be in balance. Keep in balance. Do not go to extremes." You have to be in the central path and you are not to do anything extreme, has been told by everyone because a balance must be maintained. Everything has to be in balance. Supposing your car is going on one wheel, will it move? It cannot, you have to balance it, even if there are two wheels to a bicycle you have to sit on it to balance it.

So if you have to ascend you have to balance and that balance has to come through understanding of religion and religion doesn't mean by any chance the religion you think of, which hates others, you have a clubbing, which makes another group and which fights with others. It's not that, religion is within us, is the capacity, we can say it is the valency of man, as the carbon has four valencies, the man has ten valencies. He has to keep his ten valencies and these are the Ten Commandments. In every religion these Ten Commandments are regarded as the highest goal for any human being.

But for a Sahaja Yogi the highest goal is the Spirit. Why this balance, is for your resurrection, for your rebirth. If there is no balance within you then there is a problem. But that does not mean that if some of you are not in balance it will not work out. Kuṇḍalinī has such a sense now, it has become such a sensible thing now, all of you have this Kuṇḍalinī, your Mother, She's become so sensible in these special times of resurrection that She really gives you balance, everything, She corrects you and She just comes up.

Today we had somebody who had a liver problem, the Kuṇḍalinī was just going and pushing at his liver, all the time. You could see very clearly the pulsation, you could see the pulsation, first it started there and then it went to the liver. It was pulsating there and you could see it's working and then when I soothed down the liver, then it went up, very slowly it came up. It was suggesting that, “Look after the liver of this person, he's very sick” and he was a liver patient.

So this is how the Kuṇḍalinī is, She's your Mother, She's very kind and She's the one who looks after all these centers when She goes up and pierces through. What happens, She links up all these centers. Now all these centers have their seats in the brain, all these centers have their seats in the brain, for example, this is Āgñyā Chakra, is there and the seat is also here. Now you have got here is the Viśhuddhi Chakra, then here is the Heart Chakra. Then you have got the Nābhī Chakra and round it is the Swādhiṣhṭhāna and in the center is the Mūlādhāra Chakra. All these Chakras are in the limbic area that you see there, around the limbic area there. Now this is the cross section but I'm saying if you cut it this way then you can see all these seven Chakras lined up on a line up there.

So when the Kuṇḍalinī goes through the Sahasrāra, it penetrates through all these Chakras and there She arrives at the top of the head, our head and what you find that you are completely integrated, means your physical being, your emotional being, your mental being, your spiritual being all is integrated. There's no problem, there is no question.

You see, like some people want to drink but they think, “Oh drinking is not good, I should not drink” but they just can't do it. They're empowered to do it, they just want to do something, they just can't do it. But here once you become realised and you develop yourself whatever you desire works out to that whatever is desired and the whole being, whole being is so integrated, so beautifully integrated there's no struggle left within yourself. And you work out the whole thing in such a manner that it pleases your Spirit, not only that, but God Almighty Himself, God Almighty Himself helps you in every way possible as I told you yesterday. But this is a serious work, I must say, Sahaja Yoga is not possible in people are frivolous, who are cheap, who have no respect for themselves, who are people who are wavered, who do not care for the realisation and for higher life. You see, that's how Sahaja Yoga spreads very slowly, it doesn't spread so fast.

You will not believe, this is the third year I'm in Kuala Lumpur, this is the third year I'm trying. Last year we had few people, very few people. I started with very few people and gradually it is going to come to you but a day will come when there would be many in this Kuala Lumpur who'll be joining you. But of course, those who are frivolous, cheap type, egoistical and those who think no end of themselves, those who don't want to seek, we cannot force on to them. Remember that never discuss Sahaja Yoga with people who are not interested in it, no use breaking your head and breaking your neck with these people who are so useless, like Christ has said, “Don't throw your pearls." In the same way, we cannot

convince a person through reasoning to that extent, we can logically bring it to a point to say that we must seek and we must seek the Spirit and nothing else. But if somebody doesn't have seeking, he has no desire to it, you cannot force him, even if you force him, he cannot digest it.

So the most important thing is to find the Spirit and as he said, it's Sat Chit Ānand, it's the nature of the Spirit.

The nature of the Spirit is so beautiful that first thing it gives you the Sat. Sat means the truth.

Through the Spirit manifestation within your attention you can find out the truth. For example, the gentleman asked today about somebody. Supposing he gets realisation, he doesn't have to ask, he just have to see the vibrations and see that he'll get burning on both his hands, maybe blisters from these people, the so-called Brahma Kumaris. He'll catch it, it is true that these people have such horrible methods that they really burn you sometimes and sometimes they give you blisters.

So that's how you will know what is right and what is wrong. You don't have to think about it, you cannot rationalise it, you just have to feel it through your hands, so it gives you the truth. Sitting down here if you want to know about somebody, how is that person, you just put your hands like this and you can feel what sort of Chakra he has got, what is he catching, what is his problem, how to do it. We knew about so many people like this sitting down here.

So in the attention it becomes collective consciousness. In the attention it becomes the Chitta, the attention

becomes the collective consciousness and the Chitta comes, the attention comes through your liver.

So through your brain you know the truth, you know about every person, where is the Kuṇḍalinī, how it is moving, where it is going, through your brain you understand everything because the brain is enlightened and you start seeing much more than you have seen before. And then through your liver you start getting the collective consciousness because the attention becomes enlightened by collective consciousness.

For example if you have come in the room and there is no light, you cannot understand, you may say, “This door is the room, this chair is the room, this rod is the room” you'll go on fighting on that. But once the light is put, you see the whole thing together, you see the relative position of each other because now you see the absolute. And that's what happens to you when you know the Spirit, means Satya, means the truth, the truth comes to you and everything that you know through it is the truth. Then it is the Chitta, as I told you, becomes collectively conscious, the Chitta itself the attention becomes so sukshma, so subtle, you can feel others' Kuṇḍalinī, you can feel their problems, you can understand them and you can understand each and every problem of another person and of your own person because your attention has now become subtler and can enter into that subtler position when you have to know about others.

Normally you will never know about the Chakras of others sitting down here.

So by that you can diagnose a person's disease.

I told a person that, “You have such-and-such disease” he could not believe it. I said, “You go and check up” and he had that disease. He said, “Mother, how did you know, I never felt the symptoms." I said, “Only on the fingers, anybody can feel it." So there's nothing to go to the library or to go to any laboratory to find out and put... Imagine these people have such horrible methods of finding out the diseases. By the time they find it, you're half-dead but here you don't have to do anything like that. Just through your vibrations you can find out what's wrong with the person and you treat the person and get the best out of it.

So that is what it is that your attention becomes enlightened and that's how there are so many things that it is not possible for Me to tell you in this short time.

But when you come to Sahaja Yoga you yourself will be amazed how things are working out. Like a lady was there, a Sahaja Yogini and she was wanting some Sahaja Yogi to come and help her and suddenly somebody walked into his room. He said, “How did you came?" He said, “I don't know, I just felt I must come and see you, so I got into the bus and I came here." Like that, so many things will happen and you'll be amazed how this attention works out.

Then the third thing that you get from the nature of Spirit is the joy. Joy is not duality, it is not sorrow nor unhappiness and happiness. It is just joy, it has no duality. You just start seeing, seeing the play, the drama and whether it is a tragedy or a comedy you see and the joy is a state of mind in which you are absolutely relaxed. You just feel your peace within yourself, you enjoy that

peace, abide in it and give that peace to others. Even such a peaceful person is sitting next to someone, for example, in Singapore I used to live with a gentleman who was a drunkard, drink a lot and I had to live with him. The other day he came and told that, “I was a wild man and she never told me anything but now I've become all right." Because I was just then I was not just not saying anything to him and he just, he's all right now. He's very normal, he's normalised because the atmosphere that is created out of the waves of your personality just settles down upon a person and he becomes a normal person, absolutely settled down. And this is what it is.

It's such a joy-giving thing, it's such a fun, the whole thing becomes such a fun, half of the time the Sahaja Yogis are only laughing and enjoying the jokes and it's so wonderful. There's nothing to be serious, one feels and that the way God manifesting within us. This is God's work and God's work has to be treated the way it is. It's a dignified thing, it's a glorifying thing that is the work human beings are supposed to do. That's why you have come on this earth. You have come on this earth to know your purpose and the truth is your purpose is to serve God and to serve Him with your Spirit.

May God bless you all.

I hope I'll be able to come next year again and stay here for a longer period and we'll have more people and more people. But first of all you who get realisation today and those who do not even get should work it out. Now we have given you our address, you can always go to Mister Lum and his wife is there and we have other Sahaja Yogis

also, as I told you, Betty Hubbell is here. You all should work it out and see that you achieve that perfection within you of a Sahaja Yogi, that's important. This transition is a dangerous thing. In this transition and only many people drop out and then they appear again every year, so what's the use? A month if you work it out seriously it will work out so beautifully that you'll be amazed.

Now as far as the workshop is concerned we had it this morning but if you all have any problem you may write to Me and I would like to help you. Even if you write to Me I may be able to help you. If there's any personal problem you must write to Me and you must get My address from these people.

I hope we'll again do the meditation and awakening of the Kuṇḍalinī today and let us see if it works out. If it works out, it's a very good thing. Those who got yesterday, some of you might have lost it also because you must have started thinking, doesn't matter. Now today again we have to re-establish it. It happens that you just start thinking about it and you lose it but it will be established very easily if you just go on progressing with yourself. First you must have respect for yourself, must understand that it is you who is getting it. It is your own power that is getting it. It's you who are important and that you must look after yourself and you must not be illusioned about cheap things and cheap publicity of people.

It is you who should respect, who should have faith in yourself, have confidence in yourself, because you are

great, no doubt, you have to only discover how God has made you so great.

May God bless you all.

Contents: 1983-03-01 **Śhrī Gaṇeśha Pūjā, Perth, WA, Australia**

I think it is the quality of wisdom which is still manifesting in many Australians, which many have lost because they have taken to the gross side of materialism. Śhrī Gaṇeśha is the tremendous purifying power, because it cannot be contaminated by anyone, whatever you may try, it cannot be contaminated. Only thing is, it may recede back, it may not manifest, but whatever it is, it is in its Absolute Form.

If you know how to use it, you can purify everyone.

So the responsibility of Australians, one must understand is very clear, because they are living in a country which is ruled by Śhrī Gaṇeśha, so first they have to maintain their purity. Purity of their being. Many people sometimes think that purity is only limited to the gross side, that purity of their sex life is sufficient, it is not so. That is why Christ has said “Thou shalt not have adulterous eyes” meaning your eyes should be clear and as you know, eyes represent both your ego and superego.

So when He said that your eyes should be clear, He meant that your thoughts should be clear.

Now, what is the generator of your power, we have to go deep into it and see how thoughts are created.

The brain of human beings as you know, is like a pyramid. It's elevated through a central point in a conical way, it's the epitome, it's the Brahmarandhra and when

this mind elevates to that stage in human beings it goes into a tremendous change of its reactions to its environment. For example, an animal, if it sees a thing, it doesn't think about it, there's no reaction created. But only in human beings this reaction takes place because of its conical brain, we can say that this attention that's coming in, goes into a parallelogram of forces, because we have two types of densities in our brain. There is also refraction and because of refraction this parallelogram of forces acts in such a way that your attention goes out and the attention that goes out, reacts. And when it reacts, the thought waves start coming in to us. You must have seen a lake. If you drop a stone in a lake, the waves start and they come to the shores of the lake and then it is the shore that gives it another wave which goes back. In the same way, when human beings look at anything they put attention to it, there is always a reaction that comes to you.

Now according to Christ we have to have non-adulterous eyes, there should be no adultery. The word adultery in the pure sense is not so bad. Adultery means there should not be any mixture of what it exists, simple as that. When we say there is adulteration in the milk, we mean that it's not purely milk but there's something else in it.

So when you look at things, say this is a wall, a wall is a wall that's all, what is there to think about? But a person who is not a realised Soul will immediately start thinking about a wall even. Now depending upon the conditioning of a person, if a person is a very perverted soul, I don't know what he would think of the wall because I can't go

to every limit of thinking also I'm sorry I have certain limitations. But a person who is say a normal person, also may start thinking about the wall, how much it will cost and what will happen and this and that and all sorts of conditionings according to the money point of view, if he is money oriented. If he is ego-oriented, then his thoughts would go reacting that same way. This is the adulteration, that when you look at things there is nothing to think about, what is there to think? Whatever is, it is, but we think that by thinking we solve the problems. Also this kind of a myth exists among human beings, that when you look at something or you think about something then you solve the problem. It's not true. It's a myth, because thinking is just an empty process of the mind.

It's like a wave passing toward the shore and thinks that it can just engulf it or dissolve it completely.

So the thought is just an empty vessel which carries nothing. It cannot do anything, it cannot bring forth any fruit whatsoever.

Sometimes this statement might look very big and you might think how can that be Mother, we've done so much by thinking and this and that. But you've not, whatever you have done is through spontaneity because the Unconscious has helped you, has given you the ideas, the inspiration, you have done everything through inspiration and not by your own thinking. Now there we do not want to agree, because we have to give up our ego because we think we have achieved it through our thinking. But when you think too much, too much, too much, like that, then what happens? The Unconscious

gives you the necessary information, because it has compassion, it has love for you and suddenly you find something there. You are just pushed into that corner where you find it. And for this you must know it is Einstein is the person who says that the theory of relativity dawned upon him from somewhere unknown, because whatever is known is already there. And whatever is unknown you cannot find out by this brain which is thinking, but by the brain which is enlightened.

Now when He said, “Thou shalt not have adulterous eyes” of course the adultery as we understand, is that we should not have lust in our eyes. But I would go still further to say that our attention has to be so pure that we should not have any idea of return coming to us from a particular thing, but just enjoying it, just the joy part of it. If I see a beautiful thing, then I am just enjoying it, not that I should possess it, nor should I think about it, nor do I need that I should repeat it. Just enjoy it as it is. Maybe if you just enjoy it you will just create it again. That's the capacity one should have of purification.

So, sometimes people think that Sahaja Yoga is a very Victorian sort of a System in which you can't lead a life like this and the freedom we have achieved and the abandonment we have achieved we cannot enjoy in Sahaja Yoga. But this virtue or this righteousness that we have condemned so far, is really the sustainer of life, is our quality, is our gold, is our wealth, is our property, is our security which we have lost and we have to just again have a cleansing. It is there because if it is fundamentally eternal it cannot be lost, it cannot be permanently destroyed. It is like you have seen a brass

metal or something like that, which gets covered with atmosphere, is black, red, yellow, every sort of a colour and ruined. But again you polish it out, it comes back to it. But if it is gold, it is untarnishable, but if gold is allowed to rust in the dirty gutter or something, you cannot see it, it is covered with ail kinds of things and you think it is just finished now, it's not there. It exists all the time, our innocence exists within us. It's not lost, it's there, only it's covered. Just like the sky can be covered with clouds, it is covered now because of the atmosphere, because of the way we try to dent it and do all kinds of things to it. That's why I say don't feel guilty, because if you feel guilty then you have a hand which is weak, a mind which is weak, a mind which is wobbly and then you don't want to cleanse yourself. But it exists all the time within us, untarnishable it exists within. You have to just get to it.

Now Śhrī Gaṇeśha is the one who does that job for us. He is the one who cleanses it. That not He is the embodiment of purity, but He does that job. Only a person, or only the Deity which is embodiment of purity can do it. As like you can see a soap.

Soap is the one which is in a quality, is a pure thing and it purifies too. Supposing it is not pure, it can become contaminated. In the same way our innocence is absolutely pure so it is our innocence itself cures ourselves. Just see this. The One which is lying under, which we have always repressed, which we have undermined, which we have not respected, comes to our help and shines within us. It's such a great blessing that we have so many eternal things existing within us,

otherwise human beings would have been finished a long time back. There would have been no trace of human beings the way they have been playing about with their chastity, with their real power of their character.

So when it is very much always impressed in every religion that you have to lead a proper life, a sane life, the reason is this gold that is within you must be made to shine and the brilliance of such a face you can see. You can see a person who leads a very fast life, as you call it, this sallow face the sad life and all kinds of unhappy lines on his face. But a person who starts shining one's own being with that wisdom and that purity beams, absolutely beams with the lustre of Śhrī Gaṇeśha, the innocence of Śhrī Gaṇeśha, His joy, the way He enjoys joy, the way He manifests joy. He is source of all the joys of the world. Now in English language there are no names given to joys, there is only one word joy and I find it sometimes difficult to describe the different kinds of joy that you can have at different levels of our evolution. But when you get to your Sahasrāra the joy is called Nīrānanda. Now Nira is My name, you know that. Ānanda means joy. Nira means that there is nothing else but joy. There is complete joy, no reaction, nothing just submerged in joy. That quality also evolves through the quality of Śhrī Gaṇeśha.

It's the Śhrī Gaṇeśha who evolves that quality of Nīrānanda within us. He goes into evolution gradually as you see up to Āgñyā Chakra lie becomes Christ. That doesn't mean that he goes into evolution, but we can see a seed growing into that tree and ultimately what we find that we are sitting on top of that tree in joy like children.

The joy that our heavenly Father has bestowed upon us at the Sahasrāra.

Now the Pūjā part of it one should understand. It is very important in Sahaja Yoga, but everybody should not be exposed to Pūjā to begin with, from two points of view.

Sometimes the people who come to Pūjā actually are not really worthy of it and then they react, they react to Pūjā. They think why this Pūjā and this is subservient and all sorts of things because they are not worthy of it, they have to find out some excuse to justify their unworthiness.

So we have to first find out if the person is worthy of Pūjā or not. If the person is not worthy, it is better to leave the person alone till he becomes worthy of the Pūjā because doubts and all those things can obstruct the flow of vibrations to other people and such a person can create a problem for others.

So it is not civil of that person also to be in the Pūjā if the person has not got an open heart and understanding of what Pūjā is. Doing Pūjā to any Deity as such is not an easy thing, especially to Śhrī Gaṇeśha. Those people who do Pūjā to Śhrī Gaṇeśha should know that of course it has to be a Swayambhū means the one that is created by Mother Earth. No other than Gaṇeśha should be worshipped. And if they are not a realised Soul they can never worship Śhrī Gaṇeśha. They cannot even think of Him, they cannot even take His name, it is so difficult to reach Śhrī Gaṇeśha. But after realisation the first thing you have to do is to worship Śhrī Gaṇeśha because that's the base on which you got your realisation. He's the One first who got His crucifixion then His resurrection and it is

the One who opened the path of realisation for you, So you have to worship Him before any other Deity with the greatest sacrifices.

The greatest evolutionary ascent He achieved for your sake to become a human being to die and to suffer like a human being so that you should not find it difficult to get your realisation. Today when we say it's so easy, how do you get it, we forget that people have done a lot of work to achieve it for you, to create the path. Like supposing I come to Perth. Say, when I was studying in schools I used to read the word Perth and I could not imagine that Indians could easily reach Perth from say just fly out and you are just there. But it's possible today that we have achieved this kind of an ascent from India to Perth so easily because people have worked for it. People have sacrificed. How many people must have died creating an aeroplane, how many must have had shocks and things like that? We are so privileged to use their sacrifices for our benefit. We take it all for granted.

In the same way in spiritual ascent when we say it's easy, it's not so easy as you think, because it has worked out since ages in a very deep way and even your Mother has worked very hard to achieve it.

So somebody has done the job.

So if it is easy you should thank your stars that it's not difficult for you instead of doubting why is it so easy that you want to contribute something to it, alright you can, but first take advantage of what is available and then you can contribute something more to it. If you have not known an ordinary aeroplane, how are you going to build a complicated one? So first know that whatever is

achieved is Self-realisation and the cleansing power of Śhrī Gaṇeśha. Establish Śhrī Gaṇeśha within you.

First of all you must establish Him and then you can use it for others, for yourself and for bettering and bettering the methods of Sahaja Yoga that you have learnt.

That's how Śhrī Gaṇeśha is so important for all the Sahaja Yogis to be understood in all its aspects, but this principle is very enormous I should say. The principle is very spread out, it's very subtle, so to understand in all its aspects is not an easy thing. The only thing you can do is to become One with it, like the ocean. If you become One with the ocean you become the ocean. Just become One with it and that's how it works out.

But if you use your brains to understand it, your brain cannot even capture a wink of it.

So the best thing is that you just be humble about the whole process, just to try to become One with it and those who can achieve that will realise that they have become joy themselves and they have those joy-giving qualities, they have those qualities by which they just give bliss and peace to others. Just them being there itself is sufficient to create this feeling. I always have great hopes on Australia and I'm sure that one day it will happen here in a big way. And when it happens here we'll achieve greater results in in other places.

I have to work hard and you all have to work very hard to understand the importance of this country, your importance as Australians...

So a great message to Perth and this center is the door. This is the door of Śhrī Gaṇeśha and you have to find more people who are true seekers and don't quarrel with

people who are doubting Sahaja Yoga, just don't quarrel. Gradually all of them have to come and if they don't come don't despair, that's alright, that's their luck.

So you just don't argue on that point. Don't waste your energy arguing with them. We have other methods of convincing them: of giving them bandhan, of all the Nirmalā Vidyās that you use.

So you don't despair and you don't get angry with them, because they're ignorant and you must know your past also, how you behaved towards Sahaja Yoga in the beginning and then you will be kind to them.

Be kind. Gradually everyone has to come, those who are seekers. We'll see that they're all in before we close the doors.

[Additional quote:] Now we will give a bandhan that all the non-seekers will get their realisation.

[Just after the beginning of the Pūjā, Shri Mataji stops it:] I am Gaṇeśha and it is Me you are doing Pūjā too.

[At the washing of the Feet:] You see, you can't feel any bones. There are no bones. My Feet are Śhrī Gaṇeśha. My hands are Śhrī Kṛiṣhṇa and My head is Śhrī Ādi Shakti.

Contents: **1983-03-0x Quote on Dogs, Kitchen, Ashram, Dalkeith, Perth, WA, Australia**

[Sahaja Yogis are chasing the cat and dog as they kept trying to come and Sit under Shri Mataji's chair.] It's all right, the dog is like the disciple of the Guru and they teach us devotion. Every ashram should have a dog.

Contents: **1983-03-0x Quote on Wind and Desert, Perth, WA, Australia (year not sure)**

Lyndal Vercoe: [asks why we get irritated when the wind is from northeast.]

Shri Mataji: That would be the wind from the desert. The desert is God's place.

***Contents: 1983-03-03*, Public Program, Day 2, God Has Created Us with a Purpose, Dalkeith, Perth, WA, Australia**

Sahaja Yogini:..... which is the point of evolution for all of us and it gives great pleasure to Sahaja Yogis to see so many other people coming along to get their realisation. Because the experience, once you achieve it makes you collectively conscious and puts you in touch in a very real way with the vibrations of other people and with your own vibrations of course so that you are able to feel the exact condition of your subtle body and your Spirit and your Chakras, which are these coloured circles here [that] represent the subtle transformers of energy that are placed within us along our sympathetic nervous system. And in the center there, between the yellow and blue lines, the area in which the Kuṇḍalinī energy rises when it's awaken by the presence of another being who already has that awakened within him. And *[UNCLEAR]* meeting the vibrations that are the same as the universal Kuṇḍalinī energy.

Kuṇḍalinī in Christian terms is called the Holy Spirit and it's the same energy that is described in the New Testament as a “cool wind." In Indians Scriptures it is described as the “Chaitanya” as “cool vibrations” and in Muslim's scripture it is called the “Ruh” and also described as “cool vibrations." And these cool vibrations

that you feel once you receive the awakening, the vibrations of absolute Truth, once you develop this awareness, you are able to ask any absolute question. And by holding your hands out you can ask; if you're *[UNCLEAR]* you can ask the existence of God. And rather you get a cool or warm vibration you can tell whether what you are asking about is true or not true. You do need to rely of your intellect anymore to try to work out things, because that's a limited sphere of activity. But actually, when you get your realisation, you go beyond mere thinking, into the unlimited, into the Divine area.

I think it's a relief to be with people who are seeking their Spirit, who do have the desire to know the Divine and to understand those things that, in this society, have almost become *[UNCLEAR* to boo/taboo] subjects. There is so much emphasis around this, upbringing on material success and competition, doing better than everybody else and achieving things, that the subtlest things that are much more important get pushed completely into the background. And sometimes we feel, as if we quite at a step with everything because we know there's an uneasy feeling that there is something wrong with the world at the moment, but we can't put it right ourselves. And it's quite distressing.

In my experience once I actually received my realisation from Mother two years ago, in Melbourne, at a program like this, I couldn't believe it. That it did actually... That I had found what I was looking for without even quite knowing what it was that I was looking for. And it's because at first you try to understand with your intellect and it doesn't seems to even make sense. A lot of

people, their self esteem have been so damaged by their seeking that it's hard to believe that you, yourself, can have this quality within you that is just waiting to be awaken.

So perhaps before Mātājī arrives, it can be good if we can all sit quietly and don't try to do anything, if you've been in the habit of doing particular types of meditation or techniques, just try to put it aside and try to have a completely opened mind about this experience because it is different, although the terms may seems familiar to you from readings and teachings that you've had. It's best to sort of try to approach it like a child with complete openness and freshness. There's nothing frightening about the experience, because it is in fact a gift of God to us and God is compassion and love. And the vibrations that you feel when the Kuṇḍalinī is awakened are those vibrations that come from that Being. And there is nothing to be afraid of although some books do say that Kuṇḍalinī awakening can be dangerous and so on, the people who have written that have experienced something quite different. But the actual experience should give you peace and joy which is absolute.

So if you can just try, just be at peace now and quite and then *[UNCLEAR]* the frame of mind and enjoy the experience when Mother comes. Thank you.

Gentleman [to Shri Mataji]: *[UNCLEAR]*.

Shri Mataji [to the gentleman]: *[UNCLEAR]*.

Sahaja Yogi [to the audience]: Again ladies and gentlemen, it gives me a great pleasure especially to the... [stops as Shri Mataji receives a bouquet].

Shri Mataji: Thank you very much.

Sahaja Yogi: Especially for the people who come for the first time, there are many who couldn't come either last evening or today to the workshop, to all of you, welcome. Shri Mataji is here, for the first time in Perth to grant Self realisation, not just on a one-to-one basis but to as many people as desired from their heart. Many got it last night, some came to the workshop today and experienced something more.

All of you have to get it because this is the time where the grace of God is overflowing and all of the true seekers of ages have to get Self realisation. It's the reward of their seeking, it's the blessing of their past births and all the seeking of God over the ages.

We've all probably been a Christian, we've all been a jew, we've all been a Muslim. We've been worshippers of God the Father and God the Mother, at many, many, times in history. And so now the times has come where we can get that final step in our evolution which is just to be triggered by an enlightened being. And once you get it you can develop to that point when you become totally one with God.

This is the real Yoga. Yoga as you know means `union', `oneness with God'. It's not exercises it's not discipline, it's the actualisation of Self realisation. And so, without further introduction by me, it gives me again a great pleasure, ladies and gentlemen, to introduce to you Her Holiness Shri Mataji Nirmalā Devī.

Shri Mataji: To all the seekers of Truth and Joy I bow. It was really nice this morning to meet some earnest seekers come down to the place where I live and to get

their ultimate: what they are seeking. We have to know that God has created us with a purpose. He has worked for so many years, He has made us human beings with such care and love, there has to be a purpose behind it. We also know that we have not yet found our purpose and that's why we are seeking. If we understand that, then one must know that something has to happen. God has to save His creation and His greatest creation is a human being.

So this what he has done with all the creation that He tried to evolve and that's how human beings are created.

The only thing was a human being was given freedom to choose between the right and the wrong for life. It so happened that human being in their error, naiveness, I should say and ignorance, did lots of mistakes. Doesn't matter, even if they have done, they have come to right conclusion. And that right conclusion as I told you yesterday sums up like this: that “whatever is going to happen to us, further than this, it has to be spontaneous." It's a living process that made us human being nothing dead, living process that has to work it out, that it has to be spontaneous, we can not work it out. Secondly, that you can not pay for it, or you can not manoeuvre it. And thirdly that you can not put in any effort, it has to be effortless. If it is has to be the most *[UNCLEAR]*, is has to be effortless.

So that's how we reach certain conclusions, that Self-realisation, if it is epitome of our evolution, it has to be absolutely freely given and has to happen in a very spontaneous way.

Yesterday I explained to you in short all the various type of ideas people have about Self-realisation and what we have to expect about Self-realisation. We had another enquiry this morning about Kuṇḍalinī, that gentleman asked Me a question saying that he read a book saying that Kuṇḍalinī business is very difficult, it comes up to a point and also not beyond a point and all sorts of stories.

I have to tell you that that's not true. Kuṇḍalinī is your own Mother. You have your individual Mother.

And She is waiting all the time all these years just to give you your second birth. She never harms you, She never troubles you, She doesn't do anything of that kind... I don't know the people who do not know how to do the thing or who have no authority, must be doing all these kind of tricks and must be suffering from Kuṇḍalinī awakening.

I know of one gentleman, who in Kashmir said that he's got Kuṇḍalinī awakening and he had tremendous eat and he had tremendous burning and all sort of things. And that it's a very dangerous thing. He has written a book on that, sort of a... I'm forgetting the name of the book. Now this gentleman himself is leading a very horrible life; of that, I've been able to find out. He had all sort of relation, he is leading a sort of ridiculous life, not suitable for any saint. If such a man has to have Kuṇḍalinī awakening, I can't understand how can Kuṇḍalinī come to him but, must be some sort of God's anger on him that he has felt some kind of feeling within Him maybe. Or maybe he has been to somebody who is a wrong type of a person who has awakened the Kuṇḍalinī without any authority and maybe that time the first Deity as I told you...

[Aside to Sahaja Yogis:] Is it there? The chart is not there. Ha here.

The first Deity as I told you, did not like it and got angry and the whole sympathetic nervous system on the left hand side and on the right hand side got angry. And when that happen the person may develop lots of heat and lots of blisters, I have seen a person getting a blisters all over all around his neck.

At the very outset I must tell you that heat is the sign of violent action. Say for example if you heat the helium gas, the molecules of the helium gas start going all round, they are very volatile. They start moving in a way that you feel that two armies are fighting, then you find that en armies are fighting then you find that all of them are fighting with each other. But if you cool it down, their action is very collective, they move in a smooth manner in a very collective manner.

So one can see that when we are heated up also, you see a man is very hot tempered. [Which] means he is a very angry person and he can not carry on with others, he has no patience. But when a person is cool, he is collected, we say `he is a nice person.' In the same way if you feel heat from your Kuṇḍalinī, then be sure that something is wrong that is resisting you. Even while giving realisation in the beginning you do feel little heat because the heat of the body has to go out. But today I'm going to tell you particularly more about the Chakras and not about the general things that I told you last time. In any case you can get the book and come to our centers and clarify it more and more. But as much as possible today I will try to tell you about the Chakras: how we spoil them and

what are the effect of these subtle Chakras which look after our gross plexuses within our body.

Please be seated.

Now the first Chakra as I told you is called as the Mūlādhāra Chakra. [Microphone is arranged.] Now this is the first center which is a subtle center within us. And this plexus is manifesting about in as your called the pelvic plexus. The pelvic plexus is responsible for all our excretions. Whether you like it or not it is there, it is present within us and it looks after our excretory functions. It is important to see that this Chakra is placed under the Kuṇḍalinī.

So when the Kuṇḍalinī rises; the Kuṇḍalinī is the power within you, the pure power of desire: the desire that you want to become one with the Divine.

It lies below. This Chakra lies below, it's a very important point, that this Chakra does not play any part in the ascent of the Kuṇḍalinī because Kuṇḍalinī doesn't pierce through it. On the contrary if this Chakra is pure, the information about somebody that wants to raise your Kuṇḍalinī can be easily communicated through this this Chakra but it does not play any part in our evolution. That means sex does not play play part in our evolution. Animal know what sex is, human beings know what sex is. Sex is a part very natural within us and for our ascent, the sex does not play any part. At the time when the Kuṇḍalinī rises; the Kuṇḍalinī who is the Mother of the deity in this center, this Kuṇḍalinī is the Virgin.

So He is looking after the protocol of the Virgin. And this Kuṇḍalinī when She has to rises, if you have by any chance *[UNCLEAR]* with this Chakra, then it takes time for

Kuṇḍalinī to rises because this center has to give permission, or you say the sanction that it's alright then the Kuṇḍalinī can rises. This is the sustaining force, or it's the center of the Kuṇḍalinī itself.

Now the word Mūlādhāra means `the one who is the support of...' [to Herself] `Moola' is... `Moola' is... [to the audience] `... of the root'. The root is the Kuṇḍalinī and it resides is that area which is called as Mūlādhāra while the center is down. And the center is called as `Mūlādhāra Chakra'. that's how you have these two things separated. Now it is important, because it is the sustenance, it looks after the protocol of your Kuṇḍalinī.

So anybody who says that you can ascend through sex, please be sure you are mislead by that. I do not want to mislead you, I want you to have your Self realisation because you are people who are seekers, not today, you've been seekers of ages. And no use running after something because it appeals you on weaknesses or because it supports some sort of a thing which you heard before like Freud.

What Freud has said is absolutely wrong. Because what he has achieved today, you can see clearly that all the societies in the west are finished. This is thank to the unholy trinity and one of them is mister Freud. When I said this in Austria people were very happy because they were feeling guilty for this Freud whom they supported always and what he has done: he's played a mess with everybody's live, he just knew one side of life. Which start from the sex and goes up. That's only the desire. That's only the desire power but he didn't know the other side. When he talked that you should not be conditioned

at all, he did not know that if you did not conditioned yourself, then there is another side which is much more dangerous and that is the side of ego.

This is what exactly Hitler did. He used his ego and with his ego what he has done and so many such people who are taking `there is nothing like conditioning, what's wrong, what's wrong?' and what they achieved is nothing but a very bumptious, useless ego which can not see the Truth. Anybody who *[UNCLEAR]* that ego, they run after it. They say this is your name, big name they give you, or just do this, you look like this, you wear this; you get quite satisfied with this. You have to be honest, if you are not honest to it, how will you get your realisation. You have to be honest to get your realisation, you have to be a human being first and last. if you are not a human being you are just trying to do something which is so outside. If you are doing something outside, you can not get it inside, you has to happen inside.

I feel concerned because you people are realised person if you take to reality but if you don't take to it, what's going to happen to you? Because you are seekers, you are not like mundane ordinary people, who are not seeking, who are just seeking money or possession or thing. You are special people, you are people of God who have to become prophets and you must have powers to make others prophets as William Blake has said about hundreds years back. You are that type of people and you should not waste your energy believe in things which is not true. Because you see the Kuṇḍalinī is placed above that point which we call as sex.

We are not sex points to reduce ourselves to sex points is the minimum; I mean the more degrading things that can happen to human beings. We are the highest type of creation God. Sex, everybody has, even earthworms have, any sort of nonsense has sex. What so great about sex? There is so much we talk about sex as if we are impotent people. There is nothing is sex that can give you your realisation. Of course, you have to lead a sanity... you have to understand a life of sanity and lead a life of understanding about sex.

Sahaja Yoga is never against sex, we believe in sensible marriages, bringing up children who are really realised Souls to be born on this Earth, that is the thing that we have to achieve.

So many great people who want to be born. But the people who are going to give them birth are lost into nonsensical things, they are just lost. They have no idea as to the whole, what *[UNCLEAR]* what role they have to play into it, Just they get lost into their individual understanding of a thing. It is not that, you have. You have to understand it's a very cosmic thing that's happening and thousands and thousands and thousands of people have to get their realisation, that's the main thing. If you don't get your realisation, I must say all the *[UNCLEAR]* of desire of yours is lost forever.

So don't fix your mind into something that somebody has screwed into your head because thousands are running after it. Maybe that reality can not have thousands, maybe... Millions we can't have, I know that. Reality is not easy to accept. Never people accepted reality so far.

When Christ came in, how they behaved, when Buddha came in, how they behaved? Nobody does that way. You see, it's like a horde that's walking towards it, it's not a shoal of fishes walking towards it, it's not a big mob walking towards it, it's every person that has to receive the realisation. And you have to pay full attention to it. You have to respect yourself and know that you are a seeker and as a seeker you all must get your realisation otherwise you have no meaning no purpose nothing. And if you join any purpose let pursue I would say: I've told with all earnestness and with all My love. But if you don't want to understand it, nobody can force you realisation.

So please understand that first thing is to get your realisation. If you can't get your realisation, then you have lost the biggest chance of your life.

You all have to become your Spirit, your Self and this [shows the subtle system chart] is the great instrument God have placed within you. And it is the greatest knowledge of the roots. Of the roots within us. And this knowledge, you have to understand first of all, you need not accepted it, but you should not deny. With opened mind, listen to Me as what happens and how these Chakras are within us and how they react and how we falter.

So one of the first things I have to tell you that sex plays no part in Kuṇḍalinī ascent as far as its piercing is concerned, it means it doesn't have to pass through that. Whatever is the Truth I have to tell you. You may not like it but I have to tell you. I am not here to seek votes or to have elections or to collect money out of you, I don't want to buy Rolls Royces, nothing of the kind. I just here

to give you what you have, what is your own. I am just here to give you that: what is your own, what your own property.

So it does not matter also if you don't like it for the time being, but ultimately you'll like because you will know Mother has told us the Truth.

Now the Swādhiṣhṭhāna Chakra, the second Chakra within us, is also very important. This Swādhiṣhṭhāna Chakra plays a very very important part in our lives [when] in the modern times specially. Because this is the center we use for planning, thinking, for all our futuristic life. As well as doing all sort of physical work.

This center is the one that crete balances as well as imbalances. If you use this center in the wrong way you create an imbalance within you, of a very very serious nature. This center for example, Swādhiṣhṭhāna looks after your aortic plexus in the gross. Aortic plexus doctors know what it is, but this center is placed in the... longeta, inside the spinal cord.

Now with this center we think about the future, or we can think about the past, we put in physical work also with this center.

So it move to the right as well as to the left, it is dangling in the air, it's the only center which moves on both the sides in such a big periphery, all round and it can also retract and can go further within. Now when we have an imbalance in this, we really do not realise that we are leading an imbalanced life till we get into a serious trouble.

This center has got to look after your liver, your kidney, your spleen, your pancreas and your uterus.

Plus it has a very important work that, when you think too much, the brain's cells are used up, to replace the brain's cells from the fat cells from the stomach, it transforms the fat cells for the use of the brain.

And this is a very important work it has to do.

[Aide to a Sahaja Yogi on the stage:] Can you put on this one please? Now when this Chakra works more for thinking or planning this, that, it neglects its other work which is also equally important like liver and your pancreas and your kidneys, your spleen. And thus we develop diseases of liver, of all these organs.

All of this liver troubles come to us because of its over-activity, also it can come to us because of inactivity of the liver. It can come to us from both the types of liver. Now if you have an active liver, a very active liver, you develop a funny diseases called biliousness: your attention is always unhappy and you feel like vomiting all the time you are irritable and you have a temperament that you don't feel the peace within yourself. This is that, that means your attention is absolutely disturbed because the liver it the one that really sustain your attention.

So when your liver is out, your attention is funny you don't know what to do with your attention and all the time it's terrible and you feel very nervous and agitated and anxious. And then, doctors do not know at this stage I think, it's liver which is bad.

So what they do is to use something to find out about liver, what's wrong with the liver but when they try to do that, it's not so easy to find out, till you find the patient is lying just at the deathbed with a cirrhose [cirrhosis] and

then they certify “Now you are going to die." But in Sahaja Yoga, if you have a liver [problem], at the very outset, you can make it out, that you have liver [problem] because as you know on the fingers, it can be felt where the liver is and if you see that if this center of Swādhiṣhṭhāna Chakra is catching [shows the right hand thumb] with this center of Nābhī Chakra [shows the middle finger] then it means you have bad liver. And this liver is a very serious thing because it makes a personality absolutely useless for any communication after sometimes.

Another thing is the neglect of other center, let say your spleen. This a very serious thing because if you are very hectic by temperament and if you are all the time thinking of future “I have to go” “I have to attend the office” “I have to do this, I have to do that" [at] that time, this center, as we call it the `left Nābhī center', gets excited. And it hasn't got, we should say, it has got that `attention' that it requires, so it becomes very hectic itself. It goes into an emergency. All the time attending to an emergency, it is producing more and more red blood corpses and you become absolutely hectic. For example first thing in the morning people read the newspaper. First shock comes to them from the newspapers: `Somebody died,' `Something happened,' `Some horrible things happened'; naturally the poor spleen goes into action and it starts producing red blood corpses. At... That you start having your breakfast for example, so also additional emergency, then you are suddenly rushing out. On the way you see lots of this traffic and you have to catch up with the time and all

that. All this modern life makes you that hectic, nervous, hasty we can say and a speedy person.

This spleen; actually the speedometer is your spleen, so poor spleen goes into a bizarre state. It can not control your speed and it tries to keep the speed with you, your hectic nature and it becomes hectic itself. And then a disease which we call as leukemia, blood cancer can develop. Blood cancer is the result of this kind of temperament and nature.

There are many children who get blood cancer. I've seen many children suffering from blood cancer.

And these children get it from those parents who are like this, `hectic ways', who are anxious “We must go to the office” “We must do this” “We must get that"; so many things at the same time. Such people get this trouble called leukemia and [which] is absolutely curable through Sahaja Yoga. It is absolutely curable through Sahaja Yoga. It's not difficult to cure leukemia, but you have to continue with the practice of Sahaja Yoga so that you absolutely get cured and that you can cure the leukemia of other people.

Another thing that can happen to you is the kidney trouble. You see the kidney becomes overactive.

The activity in the kidney too much create a problem within us which we call as hypertension. By which we get high blood pressures and things like that. People always say “I suffer from high blood pressure." Doctor Warren himself when he came to Me, was a patient of high blood pressure and many other problems. But after Sahaja Yoga you settle down, you find you strike the balance.

You strike the balance because you don't think so much. The thinking that goes on like mad stops. If you want to think you can think. If you don't want to think, you don't think, you can stop it and sleep, but if you want to think, you can think. When I met a doctor, in Geneva he said: “Cut my throat, do want you like, but stop this thinking." You see it's so disgusting for some people, because even if I don't what to think this brain goes on `chuk chuk chuk chuk' like that troubling me so much. But it is because of this center which has got out of its balance and it doesn't know how to control and that's why these things happen. Then also women who think too much can become *[UNCLEAR]*. They may not produce any children. It's possible that they can become barren women because there is no nourishment to that uterus and maybe they can develop troubles of the uterus. All this troubles come from this over thinking, futuristic attitude, speediness in life. One of them is diabetes Now diabetes will not occur to any ordinary farmer who doesn't think so much. But it will always happen to a man who is thinking about a big plan, of how to project himself, his business plan or his other plans, all such people get diabetes. The reason is he think so much that there is no attention left to that poor pancreas, the pancreas gets seek and that's how we get this disease of diabetes which supposed to be incurable, not by Sahaja Yoga. In Sahaja Yoga, diabetes is absolutely curable. Jaundice and all these diseases of the liver are also absolutely curable in Sahaja Yoga.

By giving the balance to the people you can achieve a lot, because this is what all the prophets told us: that we should lead a life of moderation, not to go to extremes. If

you go to extremes, then you are not Dharmic, [which] means you are not sustaining yourself properly. These are ten valences within us, in the human beings. In the carbon, there are four valences as you know. In every element there are eight valances and these valences become ten valences in the human beings. Now these are the ten Dharmas as they call it, or the ten kind of sustenance or ten kind of behaviour we have got to look after. If you do not keep that balance of these ten things, then we go off the balance. Like Buddha has told you that “you have to keep to the central path of ascent" that what exactly it is, that we have to keep to the central path of ascent if we can not keep to the central path of ascent then we suffer from, first of all, the physical problems.

First of all we suffer from the physical problems then we suffer also from mental problem because we go into an imbalance. Now when this Chakra moves to the left side, we get into mental problems. Because when it goes to the left side what happens is that we start using things [like] for our emotional behaviour and emotional expressions and to much of it. As a result of that, what happens to us [is] that we become possessed by another force that resides beyond this center. And beyond this center resides the collective subconscious.

This collective subconscious is a very dangerous area where people should not enter. Any person who says “I'm very devoted, I'm very dedicated, I must do this" without getting connection with the God, if you do all these things, your whole attention can be ruined. For example supposing there is a telephone and you are not

connected and you are using the telephone very fast then what will happen is that the telephone will go out of order and you will have no connection. In the same way who earnestly try to do something without having connection with God, move to the left side which is called as the collective subconscious area. And this is a very dangerous area within us. From there many things, which the doctors call as `protein 58', but we call them as dead souls, are attacking. Doctors call it as protein 58 because they don't know what they are. They this protein comes from areas which are unknown but existed within us since the day of creation. That means it is collective subconscious. And these protein, 52, 58 they have tried to even photograph it and they that when they attack us, then only cancer is triggered. But the... of the cancer is created by our extreme behaviour.

How cancer is created, we should try to understand. For example the left side and the right side, as I told you there are two powers left and right side powers which we work out. For example the emotional on the left and on the right hand side, we have a power which we call as `the power of action' where your physical and your mental efforts are expressed. Now when we go to the extreme of these, then what happens the connection between the left and right breaks, just breaks. And when it breaks you start getting the power on its own, because it breaks the connection with the whole.

So it is very arbitrary, it is not coordinated, it doesn't cooperate with the whole body, it just starts growing by itself. And then one cell becomes big or a cell in the nose start becoming big and starts covering the whole face.

There's no relationship between the different organs and different parts of the face, it just starts growing, overpowering other cells and that's how we call it a malignant growth or a malignant cell. Now when you go on like that what happens: it breaks; and the Deity, the One which controls it, the One which is inside it, just slips off. At that time, the best thing would be to awaken that Deity. If you awaken the Deity, the whole thing comes back and that's how we can cure the cancer of people. It's true Sahaja Yoga can cure cancer; I've been telling this for the last, I don't know, the last twelve years or so: “It's only through Sahaja Yoga, cancer will be cured." Now we have many doctors that are doing cancer research and all that. We have one Dr. *[UNCLEAR* Shrivardhar], who is doing a research now on cancer and he has accepted this, it is only Sahaja Yoga [that] will cure cancer, otherwise nothing can cure it. Because when human beings go to the extreme to the right or to the left, they do this to themselves and they are vulnerable to be triggered by some sort of a protein, which enters into your being and triggers this cancer. That's why doctors they can remove your ear, they can remove your nose, they can remove this, they can remove that but they can't remove the base of cancer and the base of cancer is the center, the subtle center. And to attack that subtle center, one has to become a subtle person. Doctors have to become Self-realised so that they can attack.

In Sahaja Yoga we have many Doctors.

Some are Russians, some are English, some are Indians and they are all working it out together. Maybe that we

may be able to publish a book on `How to cure cancer with Sahaja Yoga' or `How we have cured cancer with Sahaja Yoga'. But the main thing is that we are not here to cure people, not to give cure to everyone every *[UNCLEAR* dicomentaria] as we call it, but we are here to give you realisation. God's interest is in people who are seeking God, who are God's people, He's not interested in devils. Supposing tomorrow, Hitler gets cancer, God won't be interested in curing him.

So God's interest is in people who are seeking Him and those who get enlightenment and after their enlightenment they can give light to others. God doesn't bother about people who are just wasteful, who are good for nothing. He has to look after the people who really will take up the cause of God and do His work after getting cured.

Now we had a patient, today, this morning, who came to us, who went to some horrible Guru and paid a lot of money to get epilepsy and then a brain cancer. Now with Sahaja Yoga he is very much cure. He is walking about; of course doctors had given up hope, that “prepare for his death" in your Perth, we have got a case here. He's now completely cured, he talks well, he walks well and everything is going on well with him, but for this, he had to come to Sahaja Yoga. God is not going to fall at your feet: `O, please listen to Me, you are very sick and you must get well and this should happen,' God is not interested, you have to have to be interested in Him that is one thing, `You have to be interested.' [Let's] say your prime minister, if you want to meet him, he's not going to come and say `Alright, come and see me, I want to meet

you, please come.' You have to *[UNCLEAR* want him], he's just a prime minister. But this [the One] I'm talking about is the prime minister of all the prime ministers, the highest of all.

So you have to be interested about God, you have to get to Him, you have to ask for it otherwise, He's not going to fall at your feet, that's important to understand.

Now this center, which I've told you about [was] `Swādhiṣhṭhāna'. Now the next center is the center of Nābhī. They have already explain to you what is Nābhī Chakra, but you should what diseases are called by a bad Nābhī Chakra. First it is on the left hand side and right and side. There are two types of people: left Nābhī and right Nābhī. The people who suffer from right Nābhī are the people who have got all the problems of the liver. There was a gentleman who was writing as thesis on alcohol. `What is the chemical reaction on liver when we take alcohol?' And through Sahaja Yoga only he realised what happened actually to this [liver]. That water as you know is H_2O, H ion are on both the sides and O is here is bound by that [joins Her hands before Her like a roof showing O at the top H on both sides] `H_2O': there are two H and one O. Now when you start taking water, it [the molecule] keeps normal like that [Shri Mataji has Her hands joined in one line, the middle fingers touch each others] when the blood and the water comes in contact with the liver. The liver has the function to take away all the poison in the body as heat, it absorbs the heat and then transfers it as biles and it goes out of your system. But if you take [let's] say alcohol and all these things in a very strong way, not in moderation and it's too much, its

H [of the water molecule] goes down like this [shows Her hands like a high roof, the hand are close to one and other but only the fingertips are in contact] and when it goes near the liver, [the] liver can not suck in the heat, it can not suck in the heat. That's how, the heat is accumulated, the liver goes on malfunctioning and you'll always have the trouble of the liver. Now supposing you in Sahaja Yoga, then the H starts moving like that [turns Her hands in the opposite direction, all Her fingertips are pointed towards Herself] and all that is heat within you is passed into the liver.

You'll be amazed when you will be doing Sahaja Yoga just now, we'll be raising the Kuṇḍalinī, in the beginning, lot of heat will be coming out of your head before you start feeling the Cool Breeze of the Holy Ghost. First, the heat from the liver will be pouring out and you'll feel very relieved when it's poured out.

And then you will start feeling the Cool Breeze of the Holy Ghost in your hands which is the all pervading power of God as I told you and first time after realisation, you can feel that Cool Breeze within you.

Now this Chakra gets spoiled on the subtle when you are very money oriented. If you are very money oriented person and you are always thinking about money, how to get money like mad, it's a rat race for money then this center goes out. And when this center goes out, the person suffer from many troubles, not from money troubles maybe, but other troubles like he's emotionally dried out, he becomes an unemotional person. He becomes a person who has no feeling for anyone. You must have heard about the Great *[UNCLEAR* decoids] in

India, there is a lady, who was a *[UNCLEAR* decoid], a small little lady of four feet height and she was a person [who] was devoid of any emotions, she could kill anybody, she could do anything as long as she got the money. I mean the whole emotional side is completely blocked of such a person, who thinks too much of money all the time and gradually he becomes very materialistic. And a person who is materialistic neglects his heart all the time, he neglects his emotions, his worried more about the carpets, more about this more about that than the emotions of the people than the feelings of the people. This kind of imbalance can come when your Nābhī Chakra goes out of order and you start putting all your attention to money.

Now it's more surprising the countries which are affluent have more money orientation than the people who are not. It's very surprising. [Let's] say for example in an Indian village, a person may not have so many things as you people have, but if you go to him, he'll be very happy, whatever he has, he would like to serve you, his food, anything that he has. We would not like to see that you have not taken your food or your milk or something *[UNCLEAR]*. He'll feel so obliged that `you go and to serve you him' with that joy and that love that he has. He would like to express his love. Now people misunderstand. I've seen people which are affluent misunderstand, they think it's a slavishness, it is not. It is that they find joy in emotional life, in expressing their joy. To them it doesn't matter, if he has to starve for the day, doesn't matter. If he has given you food, He feel that's his satisfaction `O God, he's eating at my place, so

sweet of him.' There is no slavishness, but it's a kind of expression of that love. But in the west I found that people say that if you do that to somebody then people misunderstand, they think you are a weak person “That's a sign of your weakness." I mean I was amazed, how can it be? I live in an area that is supposed to be *[UNCLEAR* poor] very very rich people live there, very rich people. Once it was snowing, snowing very heavily in that area. We were shifting that very same day so I went round, there is a square where we leave, so I went around the square and I deposited some things.

I saw a lady standing outside with a little baby in a pram and [then] another lady had opened her door a little bit and talking to her there and the little baby was in the pram and it was snowing. Can you imagine and this lady was talking. I came back after half an hour and this lady was still talking like this she wouldn't open the door. And they are extremely rich people. I can't understand, how can a person with a little baby is in the pram. They hate children there. I've seen in that area, the people just hate their children, they beat them so badly. I'm amazed, they give them to the servants and the servants look after the children. In England you'll be amazed that two children are killed by their parents every week.

First I used to think it is England, but it is not so it only in London this is happening. Can you believe a thing like that? I mean in India I can't think of one woman doing that.

So emotionally they are very strong people, but they lack [of] other things which you have which is to be combine with east and west has to be brought to a balance. It

should be about `emotional life', that you want to have more children and more children. That's why more children are born in that country [India]: they like to have more children apart from that, they are the only people that look after their children so well, so all children want to be born there also. They would not like be born in those places where the mothers are very `hotty' and angry for only a carpet being spoilt or something if the children *[UNCLEAR]*. Naturally they would like to be born with parents which natural, which are sweet to them and that must be one of the reasons, why we are suffering from overpopulation. While in Germany it is minus, in London it is minus, you go to Norway, it is minus, [if] it is Sweden it is minus. On top of that people are committing suicides, they are competing among themselves: “Who is *[UNCLEAR]*?" For example if you go to... First I heard that it is Sweden where people were committing suicide more but now Switzerland has taken over and they have doubled to number of people that are committing suicides, I can't understand. I heard about three girls from Cambridge, which came from Switzerland and they came to Me and their vibration were like [of] dead people, absolutely numb. I was shocked, these young girls between let's say sixteen or twenty, something like that: why should they not have that feeling of exuberance, that joy within them bubbling with life, such young girls. And I ask them “You come and see Me in the house” I mean I was really surprised.

When they came to see Me I asked them “What are you doing?" they say “Mother to tell you the truth we are just planning how to commit suicide." Can you believe it? It's

such a tragic thing! Young girls just planning how to commit suicide but I said “Why? What is so much?" [They said] “Nobody gives us love, nobody loves us" there is no love. “We've got money, we've got everything, we are daughters of rich families, but there is no love and that's how we want to commit suicide." Just imagine. This is what is happening when one goes too much into materialism. Matter can never give us joy, take it from Me. It is also an economic science that the material things can not give you satisfaction in general. They can give you a particular thing then you buy now you buy this, alright then you want to buy that, then you want to buy something else. But in general they are not satiable, that means `matter can not give joy.'... I do not say that you can not use the matter. You can use the matter for your purpose also when you know how to give it to others. That the joy of matter is in giving. Perhaps we have missed the point, but after Sahaja Yoga you will know that the joy of matter is only felt when you see the beauty of matter and when you see what it is to give to others. To give to others. It's not for yourself that you can't ever enjoy but only by giving [to] others, you enjoy the matter.

Alright, that's going to a very subtle point, but that is what happens to you. That you become extremely generous and as a result of that you enjoy the bliss and happiness and your own generosity within yourself. I'm supposed to be extremely generous and sometimes Sahaja Yogis are quite worried about Me that by the time I return I'll be finishing with all My saris and nothing will be left out of that, they are telling Me all the time

“Mother be careful, You are extremely generous." But I enjoy My generosity, I do not enjoy these possessions so called [more] than My generosity because if have a possession it's a headache, you have to go to the insurance, you have to worry that if you should be kept alright. It's better to give it to somebody else and seen on other people than to have your own. If you own it, it's a headache to you but if you give it to others it's nice. You enjoy it alright, you enjoy this hall very well without owning it, if you have to own it, it would have been a headache for you to go up there [looks at the roof of the hall] and look after everything, isn't? It's better not to own it, let others have the headache and let's have the enjoyment. That's what is the policy in Sahaja Yoga [which] you try adopt.

So now we have another center which is very important, it's the center of Heart, `center Heart' we called it. It's the center of the Mother of the Universe. In Sanskrit she is called as `Jagad-ambā'. She is the One who stays there and gives you the sense of security. She looks after the saints who are trying to go out of this green thing [Void around the Nābhī] we call it as the `ocean of illusions'. She protects them, She gives them all the help, all the guidance and tries to pull them out of the illusion and this is the way She kills all the devils and the demons who are like fake Gurus who try to put down the seekers into the illusion more.

She the One who is the remover of illusions and this incarnates again and again on this earth to help the seekers to get out of the `ocean of illusion'. But when this center as in childhood, it starts pulsating first.

The sternum bone creates lots of antibodies and these are actually the soldiers of the Mother and they go and get distributed in the whole body. When you see something coming up on you, you get a fear and you get a palpitation in here [at the chest level]. The rhythm of these palpitations informs the antibodies to be alert, to fight the person who is trying to attack. And that's why it is important to understand that this center builds up your sense of security. If this center is disturbed, your sense of security can be disturbed.

Now the disease of this center is mainly breast cancer. When a woman is insecure in her life, feels insecure, then she develops this trouble. When she is insecure as a mother, she gets this trouble of breast cancer. Now doctors won't believe it, but I have cured many breast cancers and that can easily be cured by awakening this special power of the motherhood within you, you just become self confident and the diseases, completely cured, eradicated, without going into any operation or anything like that.

There are two other centers you see [at the Center Heart level], the one on the right right is of your own Father, on the right is of your own Mother; or we can say it of fatherhood and of motherhood. If you are having a bad father or if your father has been not nice to you, this center suffers. If this center suffers then you get the disease called asthma. Asthma can only be cured if you tell the person who is a Sahaja Yogi, about `your father, where the problem is, if the father has died, he suddenly died, if you are missing him, or if there is a problem with your own child' anything like that: the quality of

fatherhood is *[UNCLEAR]* by that. The left side is is the mother's thing, if the mother is not being very kind to the child, the child can be erated [irritated] and could be very volcanic and temperamental. Very temperamental he becomes.

If he [had] not see his mother, or the mother has been a very unkind person then such a person can be absolutely insecure all the time and could be all the time demanding attention from others and would be very very aggressive on that point.

So this is what it is, one has to understand, that these two centers within us are important.

After Sahaja Yoga, you start understanding your parents even if they have been very nasty to you, you try to forgive them and they also come round very well and good relations are established with parents.

Because you are seekers, sometimes the parents don't understand you: because they have no seeking, that's the *[UNCLEAR* age/H] which may not understand your seeking. But when they see this transformation coming into you, then you completely change, you are completely changed. I'll give you an example of a swiss Sahaja Yogi who came to Me, he has written a very big book on Sahaja Yoga called Advent. This boy had a father who was leading a life away from the family, give a the mother, he used to have some sort of a relationship and he never had any good relations with his children. But when this boy came to Sahaja Yoga and his younger brother and his sister, he was amazed how they were transformed, their ideas were transformed, they were leading such a nice life, very sain[tly] life and that they

were looking after him also and they were doing whatever is possible just to make him happy. And this amazed him, not like the other children who just like to all the time say sharp things to the father and all that. Now one of the Sahaja Yoginis met him in a hotel somewhere. And another person started speaking about Sahaja Yoga and he said “I wish I was born at a time where Sahaja Yoga had started because I would not have wasted my life like that." So the parents start seeing that `how my children are changing' and then they take to it, your style of life, betterment of everything.

Now the last Chakra, I can not tell you perhaps today, is the Viśhuddhi Chakra, which you read in the book, because already there is [it has been] a lot of time, we have to have realisation. But this is very important Chakra because this gives you collectivity. It's the center by which we know the whole, `Akbar'.

They say `Allah hu Akbar'. It's the great primordial Being and we are part and parcels of that, so you feel the collectivity within you through this center. Those who spoil this center; you spoil it by mantras, you can spoil it by talking too much, you may spoil it by not talking at all and sorts of things and this reflects in sixteen sub plexuses, aortical sub plexuses which has got to look after you nose, eyes, throat, neck, the muscles of the eyes and your forehead also. It's a very important center within us which gives us collectivity.

The sixth center which here [shows the middle of Her forehead] is the center of Āgñyā Chakra. Āgñyā Chakra is very important because at this center, Lord Jesus Christ came in. He is the embodiment of that innocence `Śhrī

Gaṇeśha', He came on this earth incarnated and He came with a special purpose. He came with the purpose to cross through that point which was very much join together because when we have the desire too strong and to act on it too strong, these two forces combine together, in such a way that there is no gap in between.

So He came to go through that gap, to go through that cross that's why His crucifixion has a big message. He came through our awareness to go through that position which is very subtle because He was Himself the subtlest of subtle. He was the One who was the Omkāra he was the One the was the `logos', as you call it, the `vibrations' as you see, He was that. And because His body was also made of that, He could get he resurrection.

So the Christianity has the message of resurrection and this is the time of resurrection. Because he is at the gate there [in the middle of the forehead], we have to pass through that gate. But when you pass through that gate what happens is that the Kuṇḍalinī awakens Jesus Christ. When Jesus Christ is awakened both these institutions of ego and superego are sucked in. When they are sucked in, you find that this place in your head becomes opened out. When this place becomes opened out, you find that this Kuṇḍalinī also starts pulsating and afterwards you find Her coming out of your head and giving you a Cool Breeze and that's how you achieve your Self realisation.

So that's how it happens.

And the seventh Chakra I think, when you come to the program of these centers [to the weekly program to meditate] and all that, they'll explain to you is [the]

seventh Chakra and how it is integrated of whole the six Chakras, And the seventh one which the heart here [on top of the head], which is the Spirit. In the heart reside the Spirit and the nature of the Spirit, yesterday I tried to tell you in short. That's what you have to be `Sat', `Chit', `Ānanda': `Truth, Attention and Joy'. Your Attention gets enlighten, you get the absolute Truth and you become the Joy. This should happen to all of you. I hope in this short time I've been able to explain to you the subtle side of these Chakras as well as of the gross. But the subject is so great, that you will be amazed that least from London they have done at least thousand tapes here, which you can listen to them on various aspects and dimensions of life and enjoy your realisation like the bird after coming out of the egg, enjoy all the dimensions of beauty and the glory. May God bless you.

If you have any questions please ask.

There is one more thing somebody who was curing, you see.

Someone through so called spiritual hand, He's not God's hands. As I told you this is coming from the left or the right side, it's not God's help.

Because if God's power starts working in you, It transforms you also. If it does not transform you, you are just like a radio, the music... but if it is transforming you completely, then it is God's work otherwise it is the work of those spirits who are just trying to play some tricks. They are busy bodies so they just try to help you but don't go near them, they are horrid. They'll remove one disease and you will have another one.

Sahaja Yogi on the scene: Any questions? Shri Mataji [to him]: You can stand there.

Sahaja Yogi: Any questions? A gentleman from the audience: *[UNCLEAR]*.

Shri Mataji: [Aside to a Sahaja Yogi:] He's a realised Soul, so I can hear him clearly. [To the gentleman:] It's true. What you say is true also; that the centers we have, as you see are seven centers, then we have moon and sun: nine centers and they are three above us. They are called... I don't know if I should confuse you, but they are called as Ardha Bindhu, Bindhu and Valaya. These are three centers above realisation. These you have to achieve in your realisation later on. Now we have twelve of these and these twelve things make for the gross body of a human being through astrology. But we have in India a method which is called as Krishna Murti Partathi where we can talk above the spiritual side of these centers. We have a very nice thing developed in India, very nice.

Now when these fake Gurus came in, their birth days were taken into account and immediately this astrology cast their horoscope and say that “they are all fake, they are Rākshasas, they are this they are that” and they change all of them, their birthdates and everything. It's really remarkable how they change their birthdate first and then they say “we don't remember, this, that" and all sorts of things. But you should see, they have published a very authentic magazine which is dealing from *[UNCLEAR]* astrology, horoscope and all that. It's amazing how they have predicted all the things perhaps and Perth, they've been saying that I'll be touching Australia, australians would be the great Sahaja Yogis, surprising.

Sahaja Yogi: He also asked “Are there Chakras on this Earth and does Australia has a Chakra?"

Shri Mataji: It is! Australia is the Mūlādhāra itself, it's the biggest Chakra that you could think of.

[It] Is the Mūlādhārā itself, it's the first Chakra. If you see, Perth is all red everywhere, if you see it's a *[UNCLEAR]*. You have got in the center of Australia, Śhrī Gaṇeśha sitting down.

[Aside to a Sahaja Yogi:] What do you call that?

Sahaja Yogi: Ayers Rock.

Shri Mataji: Yes and you can see his trunk also, red like that. It's the Mūlādhāra itself, it's one of the biggest centers in Sahaja Yoga.

Sahaja Yogi: And interestingly enough, it is exactly, the same longitude...

Sorry, latitude of the birthplace of Shri Mataji. Precisely the same latitude of the birthplace as Shri Mataji in India. As it is one the tropic of Cancer, so it in the tropic of Capricorn.

Shri Mataji: Yes, Australia is very important from Sahaja Yoga point of view. Very important. You see your basic quality is Innocence imagine! According to Sahaja Yoga, Australia stands for Innocence.

[A lady wants to ask a question.] Just a minute, let Me finish. And this Innocence is your basic quality.

According to Sahaja Yoga, Europe is the liver and London is the Heart. India is the Kuṇḍalinī.

The lady from the audience [Sahaja Yogi repeats the question to Shri Mataji]: Can you give the translation of the Nābhī?

Shri Mataji: Nābhī means `navel', alright? It's `navel'. I went to Athens and they told Me “This is the navel of the Universe." I was telling them that Europe was the Navel. And there I went, they said in Delphi, they said “this mont represents the navel of the Earth." So I tried to feel the vibrations, it was.

But I turned down and say “Why these vibrations are coming?" and there it was Śhrī Gaṇeśha sitting there, like an elephant, a little elephant.

So I asked the translator I said “What is this?", she said “a little elephant sitting down there" can you imagine? The Mother Earth has created it. This is all created through Mother Earth which is said in the Bible that “Thou shalt not produce or reproduce something that is created by the Mother Earth." And what is that? That we call as Swayambhū `the one which is created by Mother Earth'. And this is one of them, you have Śhrī Gaṇeśha created in the center of Australia.

The lady from the audience [Sahaja Yogi repeats the question to Shri Mataji]: When you do Your Yoga concentration, as she calls it, do you concentrate on the Void as well as the Nābhī.

Shri Mataji: No, no not at all. Not to concentrate on your Nābhī or anywhere. Concentration part doesn't take much part in Sahaja Yoga. First you allow your attention to be absolutely free, alright? Then the Kuṇḍalinī rises. She rises and comes out of your `Brahmarandhra' as we call it. In case your attention is very rumbly, we say that `pay attention here a little bit' but there is no need at all, the Kuṇḍalinī comes up and She'll breaks through. You have to leave your attention a little loose, not to bother

about it. But later on what happens supposing, you have a Nābhī problem as you were saying, in the Solar Plexus you have a problem. The Kuṇḍalinī will go back and hit there and your attention will be drawn automatically.

You don't have to pay attention it, you'll be drawn. Then by your attention you can raise the Kuṇḍalinī.

So you don't have to concentrate anywhere just like that. Like if you are driving, then you just have to concentrate on driving it self. But if you concentrate on any point you are finished.

So you must know where you are and where you have to move. Before realisation there is no question s of concentration, it just spoils you completely.

Another lady: Shri Mataji, is realisation synonymous with `enlightenment'?

Shri Mataji: Yes of course.

The same lady: So...

Shri Mataji: You see, it means you have to be enlightened. It also means ` Ātmā sākṣhātkar', it also means to be the `Piir' [twice born]. In Lao Tse, he says “Tao” you have to become “that." That's so many things. Everybody had says, it's “that." [To a gentleman in the audience:] Yes? The gentleman: One occasion several years ago.

Sahaja Yogi: He went up on the night of a full moon, he was absolutely frightened and shaking Shri Mataji [asks]: On Gaṇeśha?

Sahaja Yogi: [confirmes].

Gentleman: It's like being confronted by Eternity.

Sahaja Yogi: [repeats to Shri Mataji].

Shri Mataji: My child you have been to all horrible Gurus, you see.

So naturally, Gaṇeśh was trying to frighten you there. He frightens, not only that, He is the One who gives you these horrible experiences of heat, these blisters and He is the One who gets angry because He doesn't like the way people are. You see, He is the One who gets upset. Kuṇḍalinī is the He looks after Her protocol but He can not understand why people are doing wrong things... because He is Wisdom, He is the embodiment of Wisdom and if you have done something unwise, He gets angry with you. [Laughing:] that must be the reason. You have seen people come to Me also shake on the beginning a little, but it doesn't matter.

Sahaja Yogi: Any other questions? Shri Mataji [pointing at someone in the audience]: Are you alright now? Good. Good now.

The person: [answers].

Shri Mataji: It doesn't matter it's so good.

Sahaja Yogi [repeats the question of a lady from the audience to Shri Mataji]: Can she be healed, she had a stroke some years ago?

Shri Mataji: Yes, of course.

Sahaja Yogi [to the lady]: Have you got paralysis? Lady: [answers].

Sahaja Yogi [to Shri Mataji]: Partial paralysis.

Shri Mataji [to the lady]: That's nothing, that can be healed no doubt.

Sahaja Yogi [repeats the question of another lady from the audience to Shri Mataji]: She can understand about

the enlightenment, but she can not understand about the emanations probably she means Your powers.

Shri Mataji: You will understand that, alright? Gradually. Everything you can't understand in one days can you? You will understand everything. You don't worry about it, You just worry about yourself.

I didn't say anything about Myself, have I said? I've never said anything. I've been very humble. I've never said anything, I dare not. Because it is not wise, I've learnt it. *[UNCLEAR]* who said it had a bad time. If you say something about yourself, suddenly the ego will just punch at you. It's very bad.

I've never said a word about Myself.

So you don't try to understand Me just now, first try to understand yourself alright? Then you understand Me.

Sahaja Yogi: Any other questions otherwise we will have the experience of Self realisation? This is what Mother's come for. Really, a lecture is not the important part, the experience of Self realisation is it. We'll swift the fans off and you'll feel it for yourself. Any other questions? Sahaja Yogi [repeating a question to Shri Mataji]: If they are your devotees, do you look after them? Shri Mataji [laughing]: If I look after them? Ask them, you'd better ask them, if I've looked after them or not.

Sahaja Yogi: I think it's obvious. Insofar, as all of us have been physically well, our nervous, mental, psychological problems have been healed. If we are endangered by an accident, if there is any particular problem which we want to solve within our own lives or within our relationship, we put that at the attention or our Almighty God and by doing so, we find that it gets solved. We've

got all sort of little methods by which work things out, we showed you some of them today. In working out how the Chakra are cleared, you can learn all of these things at the center, there are certain aspect which you won't fully understand unless you actually achieve the awakening of the Kuṇḍalinī, but as you grow in it, you'll understand how eventually the blessings of God actually descend upon you in a tremendous way. Your well being is cared for, your health is cared for, your psychological problems are solved. You become a complete and whole person and this is the very beautiful part. When this lady asked is enlightenment is synonymous with Self realisation, the answer is `yes', but it's a growth process: you touch it, or maybe you go more than that it the beginning. And from that touching of self realisation, you grow from that point to a complete realised Being. But you are an enlightened Being because you start this final journey in your spiritual evolution. We've had a human evolution this far, now we've reached our spiritual evolution. And the road is very very rapid now because in this lifetime, we can achieve the state of full realisation. Just by these techniques. Very simple techniques that will be shown to you by the devotees of Shri Mataji.

Shri Mataji: But I must confess one thing to you people. Your Guru was very allergic to flowers and things. I'm very allergic to these dress, absolutely, because this is not your style. These are to be worn by people who lead an absolute celibate life and it meant for people who are not householders. And another if you read... Valmiki in the Rāmāyaṇa, I don't know if people read that or not where Śhrī Sītā said that a Sannyāsī has nothing to do

with householders at all, if he's a real Sannyāsī, he should stay out of the city, out of the village only for... and he used to be given one day *[UNCLEAR]* and finished because you know what happened with Her, Rāvaṇa came with this dress and that's how I'm very allergic to this dress because it's not true. It's not true. Have you renounced to whole world? You have not.

So not go into thing kind of a thing, you have to be normal people, you have to be living normally, accepting what you are. And not announcing something which you are not. You see, this is what the Gurus do, they give you a dress and...

So if you want to have Sahaja Yoga; of course today I hope I'll give realisation; but afterwards you give up all this nonsense, you become normal people. You have to be absolutely normal. Nothing abnormal about it, recluses, funny type, no. We have to get the whole world out of there to *[UNCLEAR]*. We can't just do it for ourselves, individual some sort of a nonsense, no.

We have to be responsible for the whole world. We have to be absolutely normal people, behaving in a normal way, not to get an abnormal way. Alright, so I am very allergic to these dress, I just tell you. I hope I give you realisation, because you are seekers, I can see that. All of you you are seekers, you should get your realisation. But I'm absolutely allergic to this, because their Gurus is allergic to flowers. Imagine, God is so fond of flowers, I can't do without flowers. I can not understand how can any saintly man be allergic to flowers.

Contents: 1983-03-04 **Pūjā, Mother You be in Our Brain, Rented House, Adelaide, SA, Australia**

So it's very nice to arrive here among all of you and I'm sorry for what has happened before My coming here. But, as I also told you that nature also can be awakened with the presence of a Divine personality and once it is awakened it starts behaving in a manner, as a realised Soul would do. Like it gets angry with people who are not religious, people who don't want to know about God, people who are doing wrong things on life, people who are not normal people, in the sense they don't want to be part and parcel of the whole, recluses, all sorts of people. And once it is brought to that level then it starts working on its own.

As you know that according to Sahaja Yoga all these elements have got a deity behind it. For example, agni has got a deity called Agni Devatā. In pure form Agni Devatā is the one, which really purifies us.

It purifies everything, it purifies say a gold, if you put gold in the fire it doesn't burn, it comes out more brilliant, better. But if it is something that is not of such a value it will burn off.

So all inflammable things are mostly of a low-grade things, which are to be burned only. But amazingly these lower things only when they are enlightened or you can say, when you put some wood, you take and you put fire to it, so when fire is added to that wood the same fire which is coming, actually the base is that wood itself, it is inflammable and the flames that are coming out of that fire, once they are enlightened they start knowing what is truth, what is untruth. Or reacting in such a manner as

if they know it, what work has to be done. Now the difference between a Sahaja Yogi and the fire, which is so initiated, is this, that it does not think about it. It just goes on completely finishing things, which it has to do. And by a method of frequencies it knows where to go and which one to burn off. And that's how it goes on burning things, which it has to burn.

And some of the unfortunate things are that people feel that this fire has no compassion and that the fire must have some compassion also to spare some people. But the trouble is we must understand that we have so many things within us. We've got fire, we've got water, we've got Mother Earth all elements are within us. But in the fire, it is only the fire element, nothing else.

So it acts according to its own quality, that is fire. And whatever is the quality of the fire when enlightened, separates truth from untruth and starts behaving in that manner, but it remains fire. It cannot become compassion. But in a way if you see, when you start choosing between the wrong type of a person and a right type of a person if you see in a subtle way it is compassion because it is truth and truth is love.

So whatever it is doing is to manifest the love of God and when it is manifesting the love of God you should know, that though it is fire it gets the performance of a personality, which is as if, is a human being. Because it is discreet. It knows what to burn and what not to burn.

One day I must tell you, we were doing some sort of a cleaning of the doors with those lamps you get and Linda one day you see by mistake, brought that lamp very close to My body and the lamp, the flame was very

strong, but it just went round Me, didn't touch Me. She was surprised, she said, “Mother You're burning." I said, “Don't worry” it just went round and came out.

So the fire doesn't burn a person who is pure, doesn't burn. The example is Sītājī. Sītājī when She was brought by Śhrī Rāma from Rāvaṇa's place, you see, everybody said that She has lived with a Rākshasa and She must be found out whether She is guilty or not.

So Rāma first of all He said, “All right” He put the fire. She Herself said that, “You put a fire, a big pyre of fire” and She sat on that. And when the fire started burning it could not burn Her, She could not be burnt, you see and the whole fire subsided.

So that time the Agni Devatā knows what is right, what is wrong. Who is holy, who is unholy. But human beings take lot of time to recognize that and to understand, even in Sahaja Yoga, because the sensitivity has to be grown much more. Now why is it, that anything that like water, or Agni or any one of these elements become so sensitive than human beings are. How they just obediently do the thing, as if they know the job and they're so quick at it, so efficient.

The reason is they are completely under the control of the Divine. They are under the control of the powers of God, absolutely, hundred percent. Whatever God wants, they do it, once they are enlightened.

But human beings are still, you see, dwindling between his own human awareness and the Divine awareness and the oneness with God.

So it is the sensitivity in a person grows very, very, slowly, doesn't matter makes no difference and when it

grows, it comes you see it moves sometimes, two steps forwards and five steps backwards, you see again like that. When the time is about two years, you'll find a gentleman at the same spot where he started. You get quite upset at how it has happened, despite Sahaja Yoga. But this is the thing is, that human beings can think and they can decide and they have ultimate freedom to give up this sensitivity at any time.

So you have to be under complete obedience of the Divine, which is, one cannot understand sometimes how to be like that because we have not been brought up that way. We don't know how to do it and it's very difficult.

So many people say, “Mother it's very difficult to surrender." It's not that they don't want to surrender, but they think that, “We are still you see, there is still ego popping up somewhere, Mother says something but we start questioning her. Mother says this, then we think that we should, we can suggest to Mother there's another alternative and this and that." But there's no alternative, there's no alternative for a person who's a sensible person.

If he knows that Divine is only thinking of your hitha, of your well-being and whatever it sees and does, you see, knows much more than you, much much more. And in so many dimensions that, if somebody says so that, “Do like this” best is to do that.

Sometimes it shocks people. People have ideas about sympathies, ideas about being, you see, kind to others and compassionate to others. But what is a human compassion, it doesn't do anything it just talks. While the God's compassion works, it works. It works on people, it

doesn't talk that, `Oh, I'm very compassionate, I'm full of compassion,' nothing, it just works, it manifests itself.

So one should understand to be a complete egoless personality, one should try to obey the Self within yourself.

Now how do you obey yourself within yourself? It is through vibratory awareness. Try to obey through your vibratory awareness. Any question you want to ask, anything you want to do, you must obey it through your vibratory awareness. Now some people are not so sensitive, that's true. The reason why they are not sensitive is because they think about it. Now you think with your brain, all right? If your brain can be enlightened, then you will think as the Divine thinks and your sensitivity will improve, because sensitivity comes from the central nervous system. Now in the central nervous system if there is any blockage it is actually in the brain because all the centers are represented in the brain.

So the best thing is to say that, `Mother come in my brain. Please reside in my brain. Please make Your room in this brain. You be the controller of this brain. Let this brain be guided by Your Divine wisdom.' And you don't think for yourself and this word `I think' should be dropped completely from Sahaja Yogis. `I think' means, goes on you see, in funny ways; it can be anything, you see. Like once we went out and we had one of my very stupid relations staying with us, a girl. And as I was going out, we had no servants that day, so I was cooking, but that day when we were going out I said to her, “I'm going in the morning, so can you make a little bit of kedgeree

for us and when we come back we'll have it." That's the only cooking she did in her lifetime, maybe she did not do also.

So when we came back she told Me that she has not cooked.

So I said, “Why? Why didn't you cook, because we were supposed to take our food here." She said, “I thought that maybe you may not come. Maybe you're not hungry, maybe you may not like to eat. Maybe I may not cook well” you see, all these four alternatives not to do the cooking. But I said, “Why didn't you think that we may be hungry, that we will eat. Why didn't you think this way?" “But I thought” you see this is an explanation for not having one in the brain I should say, that there is no Divine guidance in the brain. Then the guidance comes from your ego or from your superego, which says, “I thought that this might happen." But how, why, why did you think like that? Why not the other way round? Why didn't you think the other way round? But that is how it is and when these things happen we really are so much used to this kind of justification and alternatives to be offered, that this becomes again the habit of the brain and the brain gets separated from the Divine.

So you tell your brain, `But why, why did you think like that? Now will you stop thinking about these things on these lines? Let us think of the positive thinking.' Now positive thinking is nothing but is thinking, as according to Sahaja Yoga, is not aggressive thinking, but it means that a thinking which helps to manifest the Divine. That is what is positive thinking.

And the result of that is that your nerves start opening out and you start feeling the manifestations of Divine Power in your fingers in your being. And this is the basic thing that doesn't happen in the West or in the Western culture because we have a very big idea of always giving an explanation for anything.

Now you can see that, supposing you go to a person who is possessed and you get possessed, then you'll give an explanation you see, I went to that person thinking, I thought, that I would cure that person. But the result is that you are mad now. Instead of that person getting cured you have *[UNCLEAR]*.

So what is the reason? The reason is that you thought in a very negative way, that, “I thought that this would help me or I was helping that person” on the contrary you got into trouble. Now the trouble did not think, no, it just entered into you without thinking. It is there, it never thought `whether I enter this person or not,' it just came in, walked straight forward. While you were busy thinking, you see, it entered into your being and settled down there.

So it's like a thief walking into your house nicely when you are busy, absentmindedly doing something, you see, it's exactly like this. You see the thief walking in suddenly you find Oh, the thief is standing behind you, now you said, “I was thinking." Is exactly the same way it happens to us and when we know, our mind knows, that “I can give an explanation about it." Every time it is ready to give explanation then the mind, you see, is used to that kind of a phenomenon, that it will always give an excuse, always it will say something.

So it is never on the alert, because you see, even if the trouble walks into you, you'll always say “this is the explanation." But explanation doesn't cure, doesn't help you. Because by mental explanation...

[Lady coughing.] [Aside:] She's not well, give her some soothing things.

Sahaja Yogi: *[UNCLEAR]*.

Shri Mataji:...

So one should not be extremely on the thought waves and on depending on their thinking because, you see, thinking has an alternative. Thinking always has an alternative. You can say, “I was thinking this, or I was thinking that." But whom are you blaming? It was you who were thinking so you are responsible for that.

So if you take the responsibility for your thinking, then you may not do such a thing as to say that, “I thought, if I had done this thing it would have been better” because you are responsible for your thinking. Supposing an engine driver decides that “I thought I better go by the other route” and has a big accident. People will ask him, “Why did you think like that? What was the thing that made you think like that?" But in everyday to day life I find human beings are always saying, “I think, I think, I think” all the time giving alternatives and that's why they go up and down, up and down, up and down like that.

But for fire, or for water, or for Mother Earth there is no alternative, no more alternative. If I just touch the Mother Earth and I say, “Suck in their problems please” She just sucks them in. If I tell the fire, “Now come along you have been ignited." I don't even tell, I don't even tell, they immediately suck in.

Their Kuṇḍalinī rises you can say. You put a fire in front of My photograph it's vibrated, you put a light it's vibrated, it has no alternatives. It doesn't think it has no alternatives, it's just enlightened, it has its own quality of enlightenment in the purest sense, because thinking makes it impure. Your enlightenment becomes impure by your thinking, by giving explanations, by giving all these nonsensical alternatives.

So one should know with the Divine there is no alternative. In Sanskrit the word is pariyai, there is no pariyai for Divine instrument. There's nothing like that. Supposing you don't want to accept it, you'll have problems and then you'll say that, “Mother how did we have problems?" As you saw in Delhi, I told these people many a times that, “Please do not have any program for eight days and let all these people stay with some friends." They wouldn't listen to Me. They're in the program in that at business and they were thinking they will have a big pandal in which they'll give them the food to eat and all that. But you know what happened, it rained and rained and rained. Now rain knew what I wanted, because it had to rain for the rabbi crop, you see, I have to look after the whole universe. And that's why I said, “That for these eight days don't allow them to stay in this because it will be difficult for them to move out, better keep them with some other people so they can carry them along and all that." But they did not, you see. Ultimately it turned out to be a āsco. They had to arrange for the stay of all other people into some houses.

So this is this situation.

Now they might say that, “Mother, You better stop the rain." I will not. Because it is, they must know that the question of rabi crop is also equally important for Me and they have to have their share. After all they are human beings and they are to be helped. But why didn't you listen to Me? And then he came to Me and he said that, “Mother will you please stop the rain tomorrow?" I said, “All right, tomorrow I will." Went back and he told the other gentleman, he said that, “Let's put up the *[UNCLEAR]*, let's put up pandal and let the, let us cook there." He said, “But no it will rain." He said, “No, it will not because I've told God Himself." He said, “Where did you meet God?" He said, “I did meet Her and now it's done." Next day was, he got up at five o'clock the other fellow and he saw the whole sky so clear and he said, “Look at that. You have told God and God has listened to you." So this is it, then when you are that much one with God, I mean if you tell anything it will work out. Anything you ask for it will work out.

But we are not, we are always finding alternatives, you see. And these alternatives is a game, all these people have played with you, all the time giving you alternatives. See now, in the market if you go, just now I asked him about how, what car you have.

So he told Me there are so many combinations, this that, cylinder this that, so you go mad. “All right Baba, give me something, whatever it is." And then you see they, this is all playing with your brains all the time giving you alternatives, whether you want this or that.

And you feel that you are really a great personality that you can decide about “I'll have this colour and that thing”

very seriously people do it. Even I've seen, you see, in a dinner if people are sitting in a hotel or something, they'll study all the menu very carefully and anyone of them will say, “All right I'll have this” the other fellow will say, “I'll have that." And the bearer is quite puzzled but owners are happy that they have befooled you completely. They just mix up this with that, “Oh this is this, this is this” and just they try to befool, you see. Everything is boiled, kept there, all right, this is the choice, this with masala, this with masala, it's all ready. You see, just mix that, put it before you, “Oh I've got very good this thing..." It's not, it's not that your Spirit is happy with it, it's not even your stomach that is happy with it, it's not even your palette that is happy with you, it's only your brain, this ego is happy. And you say. “Oh, very nice, oh." Still it's not good.

Same thing with Gurus it happens like that. That you see they pay for the Guru, all right, so now the satisfaction is “I have paid for the Guru." And when you go there, even they feel the scorpion is pinching them, you see, all the time is biting. You say, “What happened?" “No, no, it's all right, nothing has gone wrong." And they continue with it, “Oh I'm very quiet. Yes I'm all right, I'm very peaceful, I'm never agitated, I'm absolutely relaxed." And you can see his nose is jumping, his eyes are jumping, his head is jumping and he is supposed to be the most relaxed person. “Oh, I felt very peaceful, very happy, no doubt." How can you? With bhoots, how can you? I mean I know you cannot but I've seen many people telling Me this story, oh they felt very nice with the Guru and they felt very peaceful with the Guru and then you become

dishonest. Just to support that Guru one becomes dishonest.

So we come back to the same point, that all these elements are honest, they're absolutely honest.

Whatever is their quality they profess that. A fire will not say that, `I will cool you down,' it will not say.

But after realisation so many of you must have noticed that if you put your hands to the fire you'll get Cool Breeze coming out of it. Because it burns away whatever is ugly, whatever is bad in you and you'll get the Cool Breeze from everywhere then, because that part is burnt away. It does the work of burning away and when it burns away then you put a hand towards the fire and you are surprised that from the flame the cool is coming out. Instead of burning me, how the flame is cooling me.

So the quality, whatever they represent, they have within themselves built-in and they are honest. They are not dishonest, because they are absolutely one with the Divine laws. But human beings are not like that they play tricks here, there, that. That's why to give realisation to human beings is a very difficult thing.

Now I'll also tell you about the swayambhū things that come out of Mother Earth. You see the Mother Earth sends out certain forms above Her being for you people to see that there are vibrations. To work out Her spiritual thing by which She makes the spirituality emit among you, by which She guides you, by which She creates a nucleus for you to worship and this work She does in a very honest manner. But when such a swayambhū, things comes out, you can't understand why people are attracted to it.

So then you become a sort of, in charge of that thing. Then you want to make artificial images of that, it's human nature, to make everything that you see real, make it artificial. And that goes on and on and on, till human beings themselves become so identified with their artificiality that they don't understand what reality is. In reality whatever you are, you are the highest.

You are the highest epitome of all the creatures. Even the thing that comes out of the Mother Earth cannot do the work that you can. It cannot raise the Kuṇḍalinī, it cannot, no maybe a little bit, effects might be, but it won't work out with that force with that manoeuvreing I mean you are like a very advanced machinery of God's work, very advanced, extremely sharp and extremely effective. And the problem is this brain of yours, you see, when it comes in between, which is nothing compared to that big brain, you see. Your brain is nothing but like a little mosquito, it comes up, comes here and there, says, “Oh, this, this, this, this, this" and then the problem starts. But if you really start using this power with in you, God has made you as the best instrument that you could think. And as you start using your instrument with that wisdom and surrender or humility, gradually it evolves more and more and more and you start developing more sensitive sides, or we can say evolving a new method in this and getting a better and better understanding of the working of Sahaja Yoga.

So it is important that first of all you must decide to stop the brain working too much and say that `Mother You be in our brain.' Thank God I'm before you in person, it's not difficult. Just say that `Mother, You have to be in our

brain.' Now this brain is as you know, is supported by the five elements, they all are in this brain and if you can somehow or other bring Me in that brain, somehow or other, by telling your brain, now, not to disturb you any more, you'll be amazed that immediately the whole system will start working like a dynamo. It will be such a sensitive thing, you don't have worry about anything, don't have to think about anything. You touch anything it becomes gold sort of thing, you see becomes Midas' touch, becomes such a great thing. But that, to achieve, is difficult for human beings. They find it difficult to achieve that kind of a perfection where you lose completely your ego and you become egoless.

Like the fire, the Mother Earth, like all other elements, they have no ego. It's only human beings who have built the ego. And the ego is such a big myth. Because when you don't do anything, why should you think you are doing something and why should you be responsible for doing anything? But the thing is, we think that, “No it's not God, we have to do this thing” and “I have to decide." You see it's just we play tricks with ourselves morning till evening spoiling our brain, absolutely becoming mad. Best thing is to surrender and see the things will come before you, you'll be amazed, oh, how it has happened, how it has worked out.

The other day I told just Kerry, “You better go and register yourself." She said, “Mother the university has closed down these days, I can't get into it, it's very difficult." I said, “All right I've said it, you go." Then she telephoned, they said, “It's impossible, you just can't do it but if you want you can come and see." And as she

walked into the university in the office they said, “All right, come along you are registered." It is, so many times it will happen to you people. But it took about ten minutes for Me to convince her that you just try it. But I must say still she was not so adamant she was thinking, “If Mother is saying, I may get it this thing, it will work out." But if you suppose, “It's all right, Mother You are saying, I'm just going to register, finished." Then what happens even if you do not get registered doesn't matter. That's not important. Your brain improves.

That's important, that your brain improves, it becomes more sensitive. It's not important that the work should be done, that's not important. What is important that in you brain you must get this idea that “Let me be enlightened, truly." All right? This is what one has to understand, in a very subtle way that we all are very sensitive instruments made by God and all our energies are not yet working.

So we have to supply energy to all our nerves and that's only possible if we remove our blockages created by our ego and by our conditioning. If you can remove the blockages, all our nerves will become very sensitive. And that's why, tell your mind that, “Now any further, you better put Mother down there." Now it is also expressed through the way you talk you see, you jabber, jab, jab, jab, jab, jab, jab and nothing I've seen you jabbering and I say, all right, now? There is nothing to talk about, there's nothing to say about it, it's just there and if it's just there then it is better to be done and to be executed and it will work out. Because if you know how to talk too much then it's difficult, it's going to be difficult.

Because you'll not suck in anything within yourself and you'll always give explanations, you'll always say, “Oh, maybe I thought, maybe this, maybe that." A simple example, say for example I say, “Oh, think I brought” If I say I think I brought, I mean something with it. I say, “I've brought my chappals with Me." The other person, “No, I think..." finished.

May not be true, I may not be true at all when I'm saying that, you see, I may be saying it just to test you. And to say maybe “Then, let's see, all right." Try. Once or twice you say, that whatever you know so far you say must be, if Mother says so, must be, just try to train your mind that way. I tried these tricks and I find mostly they fail, then I give up. Mostly they failed and they just can't understand how these things happen and how what Mother says comes true and how that thing works out this way and...

But now understand that, I am just playing tricks with you, just to make you understand that put your mind absolutely at rest and let the big Ahaṁkāra, the Mahat'ahaṁkāra take over, the Mahat ego, the great ego of God take over and you'll get it, all right? May God bless you.

It's better now, I think the brain activity has stopped quite a lot.

So now what should we do, now what is the theme as you asked Me now, I don't know...

You see, by washing My feet what you are doing is that you are awakening the Spirit in the water, first of all. And when you decorate My feet what you do is that you

decorate the powers that are there and when you put those red things on...

Contents: **1983-03-0x Quote related to Davis Cup in Tennis, Adelaide, SA, Australia (year not sure)**

[While walking around the lake:] Why won the Davis Cup tennis? [Nobody present knows.] Well, God only knows. But then again, She doesn't, does She?

Contents: 1983-03-05**, Public Program, Day 1, Town Hall, Adelaide, SA, Australia**

I bow to all seekers of truth.

These are the special times when so many seekers are born all over the world. We are not aware as to the nature of this time, when we get so much worried, anxious and upset with so many things happening around us and we do not find any answer to it.

Sometimes if you read some of the books which give all the datas about what is expected of human beings many people have now, I think, accepted the ultimate doom and they think that after all the doom has to come so why worry. Even Mohammad Sahib has talked about the doomsday but much more than that he has talked about the days of resurrection. They all have talked about the future, the day of judgement, the day of resurrection. When is this going to happen and how it is going to happen? We have to first of all know that why are we seekers and what are we seeking? When I said that you are the seekers of truth we have to find out first of all what is the truth and for that finding out we have to just

use some logic, we have to come to some logical conclusion.

Now the first thing one must know that we have become human beings from amoeba stage. We have come to this stage with a purpose, it is not purposeless. But why have we become a human being? There must be some purpose and if this purpose has to be served it will be served not by some sort of an outward happening but something inward has to happen to our awareness. Like animals do not have any awareness of cleanliness, of beauty, but human beings have. In the same way when we become a higher personality we have to have something happening, happening again I say, to our awareness. And for this I would say Jung has done lot of work, Jung who opposed Freud very much and he said that if man has to evolve little higher than what he is he will achieve his own goal and according to him also the goal of man is to become collectively conscious.

So even the scientists, the psychologists have prepared the stage for our ascent. Even Darwin who did not believe in God but he did say that, “If man has come so far he has to go still further somewhere at his destination." Even he would not accept a situation or a proposition in which one has to say that there is no purpose of nature in creating human beings.

The second conclusion we have to come to very logically, understandingly, is that the process of evolution has been done by the living force of life. It's not done by something which is dead. Like supposing we read the book it's all dead work or if we stand on our heads or do any such things we don't create anything.

Living thing can be understood from, living process can be understood from a living thing. Like if you have got a seed and it looks like a dead thing but you put it in the Mother Earth then it starts sprouting by itself, spontaneously. How it happens, why it happens we can't explain, but it does. You see for yourself that it happens and that kind of a living force has worked out your evolution without your knowledge but now in your knowledge it has to happen. That's the only difference between the evolutionary process so far and further and because it has to be in your knowledge you are given complete freedom to choose either the ascent or the descent.

And when you come to this right conclusion that it has to be done through some living process then you must understand another point that you cannot pay for it, not a single pi. Because this is something very difficult for human beings to understand that you can get something without paying but you are getting something. You get the sun's rays without paying for it. Everything, this pay business and all, this economic activity has been started by human beings alone. It's not done by God and perhaps God never understands money at all but is all done by human beings and also they want to bring in God into the same pattern and say that you can sell God. You cannot organize God and you cannot sell God.

So another conclusion we have to reach that we cannot purchase God or His Divine Power, this has to be brought to us spontaneously. Means that we cannot sort of work it out ourselves, it's some sort of a grace or we can say a force that has to work it and when that grace works it out

we can become a higher personality as we have become higher personality so far.

Now this grace about which people have talked that there is an All-pervading Power everywhere and this All-pervading Power is doing every living work. Like again I say when the living process where we see a flower becoming a fruit, thousands and thousands flowers we see are becoming fruits. How do they become? They become spontaneously, but how? A flower just becomes a fruit, we take it for granted.

Now the thing is, this All-pervading Power is everywhere, is everywhere and that pervading power does this living job everywhere. Not only that it makes a flower into a fruit but also it decides which flower has to become what fruit. It decides, it coordinates, it arranges, it organizes and it loves.

So this power we have to feel. We never feel it, we see only nothing but the breeze blowing but we don't see any power being existing in this atmosphere. The reason is this power is subtler for our feelings, we cannot feel it, is the frequency of this power we cannot feel. “So how are we to feel this power?" is the first question should come logically into our head. There must be something more must happen to us we have to become subtler personality to feel that power.

Now this becoming is the knowledge of the roots, is not the knowledge of the tree. Whatever we have achieved through our mental projections or all discoveries and everything we have done about nature, is we have put them in the books and all that is nothing but the knowledge of the tree. But this tree is sustained by the

roots and these roots are sustaining this great tree which is growing, but if this tree doesn't look after its roots a day will come that it is going to be destroyed. And that's why people are frightened that this creation is going to be destroyed now, it's just on the verge of destruction. Even the human beings who are the epitome of great evolution have done nothing in totality if you see the science has advanced more towards destruction than towards construction. It has constructed few things, all right, but in a whole way supposing you construct the whole house very beautifully, make everything beautifully and decorate it nicely and then you put a big bomb underneath it. That's what we have done out of science. We have created all these nice things and then we have got this hydrogen bomb, this bomb, that bomb, planted on all the sites that if a button is pressed the whole thing can collapse whatever we have created with such difficulty.

So look at the stupidity of our endeavour, our enterprise, the way we have worked it out that in totality we are just facing our own destruction through our own mental projection.

So the other thing that has to happen to us in our realisation is that we find out a method by which we understand the constructive side of life. Anything done without the Spirit in it, without God's grace in it, leads you to destruction. Even the elements can get upset with such a society and can start destroying such societies but if the elements do not take over it is only the same societies which are trying to elevate a society to higher level themselves turn back upon themselves and start

destroying it. Because there are no moorings for us, there are no roots, because this kite which is flying has lost its attachments. The attachment has to be to the Spirit.

Śhrī Kṛiṣhṇa has said that “Yogakshemam vahāmyaham" that you get your `Yoga', means `union with the Divine'. “Once you get union with the Divine then I look after” “I look after Yogashema" means, “I look after your well-being” is said by Śhrī Kṛiṣhṇa. But he doesn't say that first I will look after Yogakshema and then you get your Yoga it's the other way round, you have to take to your Yoga. Now the right conclusion about Yoga we should find out what is Yoga. Now many people think that doing Haṭha Yoga, which is just a little bit of standing on your head business, is Yoga. It is not. It is very commonly said, “I am doing my Yoga." I mean you can't `do' Yoga you have to be `in' Yoga. `Yoga' means `union with the Divine' and this happens to you, it just happens to you by which you become connected with your Spirit, what Christ has said is the rebirth, we are to be born again. But human beings are so much deceptive to themselves, they deceive themselves so much that I have known people that when I went to America I told them that you have to be born again and all that. After that some of them started an organization called as Born Again and they just self-certified themselves that, “We are born again." But I mean how can you certify yourself as born again when you haven't got the qualities, the capacities and the powers of a twice-born personality? Now we have to understand also that if it is going to be a new birth, a transformation must take place within us. We must have

a transformation. But you'll find that all efforts people have put it in of conditioning, giving puritanical ideas and doing all sorts of things it has not been able to give people transformation. It has not led to any transformation. On the contrary, their addictions to all kinds of habits, addiction to all kinds of thoughts and also enslavement to all sorts of conditioning has not at all vanished. In some way or other if they are communists, they become capitalists, if they are capitalists they become communist. You see from one to another you are going into some sort of an ism, ism, ism, ism.

But in Sahaja Yoga there is nothing like this because you are only human beings, only human beings in the eyes of God. He has created variety he has created one variety of say, Australians, then in Australia also he has created so many varieties as you have so many flowers we have so many human beings. But inside every flower flows this vital force of God's love and that vital force is to be understood through going into the roots not from outside through your mental projection. Actually through your mental projection how far can you go? Because it's a limited brain that you are using to understand a problem but you have to go to the unlimited. If it is so, something has to trigger it, your ascent, into that space where it is unlimited and that's why we have to know that through only logical conclusion we can come up to the door but afterwards you have to enter through this door through that triggering otherwise you cannot enter into it.

Now whatever he has told you all about these Chakras you need not believe as Doctor Warren has told you. There's no need to believe into it because even if you

have blind faith it's not going to help us. But as a scientist you must keep your mind open and you must accept this as a hypothesis placed before you.

Now this hypothesis if it is proved right you have to accept it as a law, the Divine law. Now this hypothesis is that you have got all these seven centers within you and you have got the power called as the Kuṇḍalinī placed in the triangular bone.

Now one may say that this is a Sanskrit word and Sanskrit is not for only Indians it is for all of us. As English language is for all of us, in the same way Sanskrit is also for all of us. But only thing I would say, that as the west was more busy and you though you are on the east but still I call it the west, busy with the advancement outside, there were people who were busy with the advancement down. And these people are the seers who have seen that there is a power which is settled down in the triangular bone called as sacrum. Now this is a Greek word. It is very interesting to know that sacrum means sacred. And I asked the Greeks when I went to Greece I asked them, “Why do you call it sacrum?" They said that, “Most of these words have come to us because we have had a very long rapport with the Indo-Aryan groups." “So when was that?" They said, “It was much before Alexander went to India." So we knew about India long time back and the Indians told us that this is a sacred bone. Even doctors know that when the whole body burns this bone does not burn. It takes lot of temperature, very high temperature to burn this bone and when you put it in the cremation this thing and all that, that has to brought to a very high temperature so

that this bone should burn but with other temperatures, lower temperatures, the whole body may burn but this bone will remain still unburned.

So the reason is there is this power which is protecting it.

Now this power is called as Kuṇḍalinī because it has got three and a half coils within it. You might have read some of you, being seekers, you must have read books about Kuṇḍalinī and everywhere I go people tell Me that, “Mother we have heard that this is a very dangerous thing to have the Kuṇḍalinī awakened and it's very, very wrong to touch it." Now this is something absurd. First of all this is the only way you are going to get your realisation. Is the primule, is the germ within you, the germinating power within you which is going to give you the ascent and how can that be a thing that will be dangerous for you. There must be something wrong. For example, I don't understand about this instrument or about electricity. I'll put my both the fingers in the plug and I get a shock and I say, “Oh, it's the most dangerous thing that you can have” that means I don't know how to handle it.

But Kuṇḍalinī when She is said to be troubling people it is never the Kuṇḍalinī but this first center of innocence which gets into annoyance and when it gets into annoyance it sends lot of heat in the body and that heat is felt in the body by so many people. When people who have no authority from God Almighty, we can say, those who are not holy people, those who are making money in the name of God, those who are people with very bad characters who have no possibility of even taking the name of God such people when they try these tricks it

happens to you that you feel that tremendous heat in the body. One must know that heat is not a sign of spirituality. Everywhere, whether is in Sanskrit or any language, they have said that it's a cooling, it cools you down. Even a person you say, “He's cool minded", means he's not violent.

Now in science if you try to cool down the helium gas they, you'll find that when it is not cooled down, it is heated up, all molecules fight each other. They become so violent that they hit each other. They form certain groups hit each other and then these groups also again hit each other. But when helium gas is cooled down they all become collective and they start behaving in a manner that is very collective.

So the idea is people who say that with Kuṇḍalinī you get tremendous heat, you start jumping and people told Me that they start jumping like a frog. One gentleman sitting before Me had put both his legs on the ground he was sitting.

So they said, “You can't put these feet towards Mother." So I asked him, I called him, “What's the problem?" You see, Indians understand how to respect a saint.

So I said, “What's the problem? Why are you putting your legs towards Me?" He said, “Mother, if I sit with folded feet I start jumping like a frog." So I said, “Are you going to become a frog now? Just think about it! You are not going to become a frog or a bird. You are going to become a higher personality. Who has told you that you are becoming a frog?" He said, “My Kuṇḍalinī is awakened by a Guru and he has given me this book and in that book it was written”, actually I saw it with My own

eyes, what a misleading thing!, “that he is a person who gets his Kuṇḍalinī awakened starts jumping like a frog." Now all these absurd things must be understood that all abnormalities are dropped out after you become the Spirit because that's the most beautiful thing you have. Spirit is the reflection of God Almighty and when the Kuṇḍalinī rises and pierces through your Fontanelle bone area where you actually get your baptism that time you become a beautiful person, a decent person, a sweet person, a nice person and you forget all your violence. Not only that but you feel the love for others and not violence. Your ego drops out, your superego drops out, means your conditioning drops out. If these transformations don't take place what's the serve of becoming the Spirit? So the ideas people have that you start jumping.

I know of so many people now who have been to fake Gurus. And this point I must bring to you because everywhere I went the newspaper people ask Me about the fake Gurus. The other day a American lady asked Me in an interview of radio at Perth that, “How do you explain that the people who are seekers, the young people, they go to India and they end up penniless and sometimes they get epilepsy or they take to drugs? Or they become jobless, useless, they live like cabbages and they have nothing to contribute to the society or to themselves. How do we explain that?" She says I've got the datas to show you. I said, “I agreed." I do feel ashamed that these Gurus who are not only fake but they are criminals they go into another country to make money. I agree. I accept.

But also I would blame the people who go to them. They are naive, simple people. They are the ones who are earnestly seeking but you must come to some logical conclusion about everything. That is important, because you are here to get to your Spirit and not to get to a Guru. That's one thing one must know that we have to be the Spirit and not be attached or be sort of enslaved by any Guru whatsoever.

The Guru resides within you in your heart and your Spirit is your heart. Only thing somebody has to trigger it just to become that. But the amount of enslavement and all these things people undergo for nothing at all. You cannot pay for it. Anybody who takes money from you is a parasite, you must know, whether he may be calling himself anything, by any name. Don't listen to such a person. Now I've been telling all the people for the last fourteen years. I was the one fourteen years back, in a very big hall, at least five, six times bigger than this, called as Jehangi Hall in Bombay [Mumbai], I spoke so loudly about all of them. I told their names I told them what they were, how devilish they are. Keep out from them.

But nobody would listen to Me. Even when I went to America, in the beginning, nobody would listen to Me. I told them that, “Be careful. These fake Gurus are out, they are going to loot you. Be careful about them!" But nobody would listen to Me on this point because they were so enamoured.

On the contrary, they were teaching Me some wisdom. “Mother, you must take some money otherwise Americans won't understand. If, unless and until they pay

for it they are not going to understand." I said, “How do you underestimate them?" They said, “It's true." And I tell you I ended up with some disciples there or some people who got realisation, but I was so frustrated. I asked one great saint of India to go down to New York about two years back and he ran away. He ran away. He said, “I can't manage these Americans. Their whole thinking is just the other way round, about God, about everything." Now there were people who were teaching that you can approach God through sex. I mean absurd things, it's obtuse, absolutely it is opposite of what God is. Not that in Sahaja Yoga we disregard sex, sex is a part of life. But sex does not play any part in the ascent you can see because the first center here Mūlādhāra is for your excretion and for your sex.

So we do not in any way condemn it, but it has its own sanctity and its own channelizing. If you become sort of perverted about it you develop diseases, there are problems and anything that is Divine cannot give you a disease.

So another conclusion they should have reached, I think, that if you are sick, your head is going, reeling, if you are feeling unhappy, sickly and you don't know what to do then why should you stick onto that Guru? Because just you have paid for it? It's like if you go to a drama and it's boring, you don't like it but you said, “Now we've paid for it so go through it." That's all right because drama doesn't make you mad, you see, but this kind of thing which is so dangerous even if you have paid, finish with it. Now we started that we have had enough of this man.

Now they are buying Rolls-Royces, they are buying aeroplanes. Look at where is their attention. They're more bothered about gathering money to themselves and having other people's money as they call them opium and live on that and thrive on that and why don't you use your brains to understand that how can you pay for your realisation? It's one of your mistakes, I think, not to understand that anyone who is interested in your purse is not interested in your Spirit.

Then apart from that there are so many other mistakes people have committed in pursuit of God. One has to know that when you get your Spirit you get your own powers. I may say I'm as these people have said that, “She's the greatest saint." All right. If they have said it I say, “All right, because all the saints in India say so about Me, so all right, I agree." But I need not say that. Even if I say, `I'm the greatest,' why should you believe in it? What have you got? What powers have you got out of it? What have you achieved out of it is the point. Is should be absolutely clear-cut to you that unless and until you get your realisation you should not *[UNCLEAR* pujout] and you should not accept Sahaja Yoga is the ultimate.

You must try to get your realisation, you must get the mastery over it. Unless and until you have done it what's the use of all Sahaja Yoga done to you. After all it is to transform you into a new life. Transform you, what is your own, is all your own property, I would say. Everything is like a trust. I sometimes say I'm like a banker. Now you put your money in the bank and I'm just a banker who has to give your money.

I'm little a very gracious banker so I may give double, four times, five times, ten times, that's a different point.

But you are seekers so you are “men of God" as described by another very great saint of England, William Blake. He says he has described all these things to us very clearly that at this time men of God will be born and they will become prophets and they will have powers to make others prophet. He has said so clear, everything is so clear-cut, you can't imagine. If you read him you will be amazed that he has even mentioned where the ashram for Sahaja Yoga will be, where I will be staying, into all details he has mentioned and you must have heard the story of Jerusalem that England will become chaste. I mean if you are *[UNCLEAR]* what they have been doing about hundred years back in India nobody could have believed the stories that he said, but he could see that the same land which is so aggressive today will become the land of peace, harmony and of spiritualism.

Australia especially I have tremendous respect for Australia as a land because it plays a very important role in Sahaja Yoga. This first center is the Mūlādhāra, is Australia. Australia is the Mūlādhāra of the whole universe and I find every Australian when I meet them there's a kind of an innocence in him which is still showing now. Of course, innocence can never be destroyed, it can be covered but it can never be destroyed. I have seen that in Australians there is a kind of an innocence which shows very sweetly and that's where it works out very fast.

Now Doctor Warren he first came to Me and his friend and in the beginning they were very volatile people,

extremely angry, hot tempered and all that, you see. And they came to Me when I was on My way to Pune so I said, “All right, you come along with Me, I haven't got time." I think they came to My house and they touched their realisation but still they were so volatile and so angry.

So I said, “All right, you come along with Me to Pune." And you see in Sahaja Yoga we don't take any money. Naturally, you see, we haven't got very good arrangements for you. If you want you can stay in a hotel, if you want, but as far as we are concerned whatever Sahaja Yogis had arranged in those days, so we arranged for them to stay in a, what was that?, a, some place, all right and there there was a doctor from England and these two persons and there was only one mattress for three of them, you see. There was troubling, pushing each other. In the morning, you see, they got up and they got into the rickshaw, saying, all their luggage there. I said, “Why?" “We slept on the cement” you see. I said, “How?" “We slept on the cement” thrice they went on. I said, “What's the matter?" I said, “How did you sleep on the cement? They didn't give you any mattress?" “No, nothing. That fellow from England he was snatching our mattress all the time and we could not sleep and we slept on the cement." And in that I felt the sweetness of it, how sweetly they were telling Me their problems. It's such a simple problem to sleep on the cement but sleeping on the cement helps a lot, they did not know at that time, which helps quite a lot that the Mother Earth sucks your problems.

So it was all arranged perhaps that they should be on the cement. But the way they were angry so sweetly and

everybody enjoyed that anger so much in Pune and then they got their realisation and I knew that something good has to happen.

Once an Australian gets their realisation it will work out very fast. That's what exactly what happened in their case and should happen everywhere. I'm very happy on My tour last time in Sydney we did very well. And then we had also this time some program at Perth for the first time. Many people, about three hundred people, got realisation and it was wonderful and the whole thing worked out in such a beautiful way that I am so much encouraged to be here to be with all of you and to do this job, because this is the job I am here for. For this you don't have to do anything. First I have to work and then you have to work for others. There are so many who are lost, so many who are seekers all over the world it's not in Australia only, everywhere. They have taken to drugs out of seeking, they have taken to these Gurus also out of their seeking, all these problems have come to these seekers. Even too, I've seen people who were quite of My age group they told Me they have been to some Guru in America and who wanted to cut their tongues. All sorts of things they have been trying. You don't have to do anything like that. You have to be quite intact but only thing that light within you which is the Spirit has to shine into your attention.

Tomorrow I'll tell you what is Self-realisation. Tomorrow I'll tell you exactly what is Self-realisation and also I'll tell you about the Chakras. In any case they have given you the books which are of course just the beginning of the whole thing is, you can see and read it and understand

what are these Chakras and what do they do. There's nothing to be afraid of, nothing to be worried, it's your own, it has to happen spontaneously, it happens absolutely without any trouble or torture to you. It may happen to all of you, it may happen to some of you and whatever it is we have come here for this purpose only and I'll work out till My last breath to see that you get what you deserve.

May God bless you.

They want to tell that there is no program tomorrow but we want to have a workshop because in a workshop, just now we'll give you realisation as well, but in a workshop, tomorrow, I'll also see if there are people who have diseases and troubles and things like that, because Sahaja Yoga first thing it does is to cure you of your troubles: physical, mental and emotional side, then your social problems it solves. It solves so many problems, I mean it is the answer to all of our problems of today. And if you really feel that seeking it is because this problem has to be solved that all human race has to be emancipated, that you have to save all of them, not only that, but enter into the kingdom of God which is promised to you.

So tomorrow we are going to have a workshop, what time? 10 o'clock? From ten o'clock onwards. But we are in a place which is not so big. We have taken this on hire. Maybe we might go to a riverside if there are many people, if there are very few then we can do it here.

So after realisation those who want to come to workshop please let us know who want to come to the workshop and that's how then we'll arrange the place.

All right, so now is there any question? Because at the first meeting we must answer questions, is very important. Please ask Me questions but don't ask about these Gurus, you see, because it's a controversial thing. Just forget it. Whatever has happened has happened. Don't ask about them, `What do you think about this Guru?' because I don't want to say all these things but you yourself should be able to judge it.

If you have not yet judged it better judge it now, but, you see, I am not going to talk to you about these things. If they have not given you realisation better forget it. They should have given you realisation, if they have not given realisation then they are good for nothing. Just forget it.

So please ask Me questions which are more of constructive thing because you are seekers, I am here to give you realisation, that's all, that's the only relationship we have, of a mother who wants that the children should be reborn again, nothing more or nothing less.

So one should not exceed in this and try to ask Me questions which are irrelevant for nothing at all.

So may God bless you all.

Warren: Any question? [Long discussion of where to meet for program on the following day.]

Shri Mataji:... from all these various places I have taken a little place on hire and that's how we have started the program. But now if you people get realisation you can start a center. It's a very simple, don't have to pay for anything, it's a very simple way of doing it. You must master Sahaja Yoga, we'll get some people from there who will come down and settle down here to help you.

So nobody has to pay anything for it, nothing of the kind, it's just that you should get together and understand it and master it.

Warren: Any questions?

Seeker: I would like to ask Mother a question. Is schizophrenia an evolutionary process?

Shri Mataji: No, no, no, no, no, no, no, by no chance. You see, that I will tell you tomorrow, what happens, how you get these diseases. All right? It's not at all evolutionary. You become the sanest personality. No. But how it comes, how it works out and why it enters into our being that I'll tell you tomorrow, everything, all right tomorrow lecture. I'll cover it up with why do we get schizophrenia? Why do we get cancer? Why do we get other diseases which are not curable? All psychosomatic problems, everything I will explain to you tomorrow, on these Chakras and on the centers. It's not at all evolutionary at all, absolutely not. On the contrary it is against.

That's what it is you see, one of the Gurus had a lecture and one of our Sahaja Yogi had gone to that lecture. He is a doctor and he was amazed that the fellow was talking that when you see a person doing that particular type of a mantra and you see the brain then what you find in the brain is the theta wave.

Now theta waves are only found in a person who is epileptic.

So he got up, he said, “Oh God, that makes you become epileptic, is that so?" So they said, “No, no. It's not epilepsy, it's another type of theta wave." I mean, if you have to diagnose, you see, I have also done medicine. These Gurus have no knowledge of any kind, they have

no science knowledge, nothing, you see. They take some scientist, “All right, you come to our group and speak to them” and now they become identified with them and take all the credit with them. An ego-orientated people, you see. You tell somebody, “Oh, you are a great scientist. You come and speak to our people” and they say, “This is what we are teaching." Imagine! This one was shocked and he said, “How is it theta wave? Because when you have to find out about a patient whether he is suffering from any trouble if you find theta wave that means the person is epileptic.

So how the diagnosis is?" So you see, they started saying, “It's another kind of thing" or “We'll meet you again” and then they contacted the doctor. They said, “Why don't you come and see us, have lunch with us” they offered him money, this and that. Can you imagine? But how people have closed their eyes! The other day one doctor came to see Me in Perth. He's a very good man and he's an Indian doctor. More surprising is that some of the doctors have give up their jobs and they have become like cabbages. They can't also see a, what you call?, garlic. This is their situation and all blame should come to India and Indian Government. I said, “But what can Indian government do about it?" You see, nobody can do anything. There are people who are really penniless, you can't do anything about it.

There was a lady, a granddaughter of a Duke, you see, she went to an organization like that. Actually they were running a, she was a director of a flying academy in Scotland and they had huge properties and everything

and they became absolutely penniless because the students who came ate in their place where they were.

Sort of they never had any contact financially and the whole money was taken away and they became absolutely penniless. This woman got epilepsy, her daughter got epilepsy, the husband got epilepsy. And then they came to Me. I had to put them in My own house because where do you keep them, such people you can't keep them with other sane Sahaja Yogis, you see. They got cured, they're all right but the husband because he became bankrupt he had to go back to South Africa. And the wife and the child are both of them are there but they have lost everything. Now through Sahaja Yoga they are working out something and we'll try to help her to resettle her life. She had such a lot of *[UNCLEAR* rich] she was the granddaughter of a Duke.

But I asked her, “How did you go about it, you see, you were getting epilepsy?" She used to scream for three hours. I haven't seen this kind of a case that she was and she used to get her neck back like that and she used to scream for three hours. And when they told this gentleman, their Guru, that, you see, “This was happening to me” he said that, you see, “Go and see some psychiatrist." They take no responsibility, no responsibility at all.

So I mean I asked her, “How is it?", she is a very well-educated lady, I said, “How is it with all your education and everything you jumped to this kind of a nonsense?" And she said, “You see, it was like walking under the blanket. We did not know. They said, `You pay three hundred pounds we'll give you this mantra.' We paid 300

pound and the mantra they gave any Indian who is here will know was `tinga'." Imagine! That means showing like this is tinga and they were told this is a secret.

Inga, pinga all sorts of names they gave and this is a secret. “You are not to tell anyone." And this Guru used to actually giggle at them all the time, he used to giggle at the stupidity of these people. This minted money. There's an article that he's got 60,000 crores of rupees. Crores means, ah means 35 million dollars in Indian money, Indian. We don't know how much he has got with the bank in Switzerland. Like this is only one. Another one who was giving realisation with a peacock feather or something like that, he died in America, he has got, you'll be amazed now if you go now and enquire, you'll be amazed that sixty thousand crores of diamonds he has got. Sixty thousand crores of diamonds he left and both the disciples are now fighting. Then another one has got now 36 Rolls-Royces and three aeroplanes. Just imagine. The another one has 58 and he told the disciples in England that if you give me the fifty ninth I'll come down. And these simple people, you know, already suffering so much, they are having so much trouble, some of them are gone mad, you see they starved themselves, ate only potatoes and all that in one whole year and then they called this fellow and gave him that Rolls-Royce that's why he came to give them a darshan. Can you imagine? How you are responsible, I would say, in a way, to be that much stupid to believe anyone like that. You have got nothing. Nothing you have got. It's a very sad thing, I know, but you find everything they have to find they can't surpass you, they cannot win over you, they cannot

be victorious, they do not know the powers of God, but give them up completely, you have to fight them, we'll fight it out. No doubt there's so many people now coming back and understanding.

Question from seeker: *[UNCLEAR]*.

Shri Mataji: We have to be the true seekers of truth.

***Contents: 1983-03-07*, Public Program, Day 2, Town Hall, Adelaide, SA, Australia**

We have to be the true seekers of truth, which is a rare quality people think, but I have found out that in this world there are many seekers who are honestly and earnestly seeking. They are seeking the truth; they are trying to find out what is within them. They are trying to find out what is being prophesized about them. It has been prophesized that the Day of Judgment will come. This is the Day of Judgment when you are going to be judged. You are not going to be put into any scales or there is no other measure by which you are going to be judged, but by knowing how far truthful you are about your seeking and how far you can gain something about it. Today I had a chance to be with some media people and yesterday also, I feel some of them just want to bring some controversy, to make it more interesting perhaps. Whatever it is, as a Mother I have to tell you that I have to take nothing from you. I have come here to give you.

If you're identified with any organization, or you think you can fight for an organization, it would be very much better that you should not disturb us who are the people who are real seekers sitting down here. It would be very civil of you to be away from us because we are not

identified with any organization but with our own Self. We have no organization you know in Sahaja Yoga and every type of a person is allowed to come in Sahaja Yoga so that he gets the full advantage of his destiny.

In My own experiences I have found out that people in the west are rather difficult to get realisation to begin with. In India there can be six thousand people and just in a split of a second their Kuṇḍalinī rises and they get their realisation, it's a fact. But even when they get realisation they are not so seriously adhering to it and they don't try to learn about the technique of the laws of God's love. But in the west on the contrary though the first motion is very slow, some people get it and lose it, but they are very great seekers, they get completely transformed. I've seen people who have been drunkards, alcoholics, who have been taking drugs and who have been homosexuals, who led a very wretched life, did all kinds of nonsensical things to ruin themselves, once they get realisation they really become so aware of themselves, their self-esteem rises and they take to Sahaja Yoga in a very proper, auspicious way. It's something surprising that those who can get realisation very fast are not so good for giving realisations to others.

They do not seem to understand that it has to be given to other people. While those who take more time, those who have suffered so much, those who have had a miserable life before, those who people could be condemned as the worst people on this earth, become so beautiful. Not only that but they take it upon themselves that this great joy of God's love must be given to others.

But of course, despite all that we do have some funny people in every group sometimes, who are like dog in the manger, they don't get their realisation nor do they allow others to get it. Is a *[UNCLEAR* self] feeling it's very frivolous and flippant people who are harmed very badly, still they don't want to have the blessings of God and try to create problems for us. It is a sad thing that it should happen in a country where there are so many seekers who are already lost.

So many people who are God's own people are lost. One must have some civil sense in understanding that those who are lost are the people of God. As William Blake has said that, “The men of God will become prophets and those who will become prophets will make other prophets." This is the first thing that happens to you that you become a prophet, in the sense that you become a saint, in the sense that the energy of God which is All Pervading, which is doing all the living work starts flowing through you. And when it starts flowing through you, you can use that power, not only to correct yourself and improve yourself, but give this the blessing of peace and bliss to God.

[Aside:] Please be seated properly, if you can't sit please sit on a chair.

Now for us it is important to understand that I'm here talking about something that is extremely Holy and auspicious. It has not worked out before. This is the first time in the history of spirituality so many people are taking their realisation. As I said, “This is the time of last judgment." This is the time of resurrection, which Mohammed Sahib has described that, “At that time your

hands will be speaking." How can hands speak? Anybody can say that, “How can hands speak?" But the Muslims don't think about it, they just say, “Let us do namas all the time morning till evening, do the exercise of namas and we'll get realisation." Christians think that they will get their realisation if they take their baptism, it's not so. All these religions were established much before just to keep you in balance, to live a life of moderation. On the contrary human beings have gone to the extremes. But I must tell you that the Divine is so generous, is so kind, is working so fast that despite all these things that you have done to yourself and to your society and as human beings, the way you have erred or whatever you have done, It just forgets and forgives, because you are the children of God, because He is your Father. He's the Father who is love, who is truth, who is joy and He's anxious that His children should enter into His kingdom and enjoy all the blissful things that He has to give. Now if you want to see how you are made you'll be surprised. We must have self-esteem, we must understand that God has created us with very great care, with very great love to become human beings and we should not for anything whatsoever, whosoever it may be, the Guru, or the cult, or the religion or anything, should neglect ourselves. Then you will be responsible for you own neglect and not God Almighty or any one of these prophets they have said that, “You can be saved." Now as you see, within us lies these subtle centers. These subtle centers are the ones which, whose represent within us a different stage of evolution. First of all if you see the first center is the Mūlādhāra.

Now this center is very important because for us Australians I should say, because in the universe this center is Australia. Australia the place where this center we can consider as manifesting the powers of Mūlādhāra Chakra. It is the most powerful center in the whole being, because it is the power of innocence in a human being. The innocence that is the matter, matter is innocent, animals are innocent because they haven't developed their ego so far, neither they have got those conditionings by which we are supposed to be sinners. A dog or a horse or a camel, none of them think that they are sinners, it's only we think that we are sinners and we have done something wrong. The reason for this is that God has given us freedom, so whatever we have done in that freedom we feel responsible for it and we start condemning ourselves as sinners and all this. But who feels that he's a sinner is the ego and not the Spirit. The Spirit does not commit any sin, is the purest of pure. Nothing can contaminate it, nothing can destroy it, nothing can make it absolutely invisible. It is all the time there within our heart watching what we are doing, as described in Gītā it's called as *[UNCLEAR* chetrughra] the one who knows the feel, who watches the feel, who is the witness of the feel, which resides in our heart. All these things what ever I've said has to happen to us otherwise it just becomes all a mental activity.

I've nothing to bring in anything that is controversial everybody has brought out some sort of a thing and said that, “This is this and this is this." But one must know that once you get your Self-realisation it must work. That's the point people do not understand. That if you go

to a Guru, did it work out your own powers? Maybe they might be paying you for doing some work, doesn't matter, that's another enterprise.

But did it give you the reality? Did it give you absolute meaning? It has given you purpose or not? Has it finished your seeking or not? You must ask these questions to yourself and be truthful about it. If not then you better get it. Now to say that I'm the only person doing this all comes out of these people asking funny questions to you. Now the thing is, she asked Me a question, “Are You the only person doing it?" I said, “I don't know of any other." I mean you can twist it the way you like. But so far I haven't met anyone who is giving mass realisation. I've not met anyone and if I meet I'll be very happy to retire. Even if the Sahaja Yogis who come up to that level can give mass realisation just like that, it will be a nice idea to retire because I'm going to be sixty years of age and I think I deserve retirement after the hard work of fourteen years.

This one is the first center as I told you, is this great country of Gaṇeśha, Australia. The symbol of this is already expressed in the place called as Ayers Rock. Ayers Rock if you go and see has the symbol, which is embody the great Deity that resides on this. That has the same colour if you see there and it has the same Deity sitting down there, which is called as Śhrī Gaṇeśha in the Sanskrit language. Now this Deity, innocent Deity or the one, which is representing innocence, incarnated on this earth for our save, for our salvation as our Lord Jesus Christ. He incarnated and He is bestowed upon that center of Āgñyā, which you see there, which is actually

the body is made of the sun, that's why most of the Christians are sun worshipers. This great personality came on this earth with a very great work, because all others also you can see, but today I would like to speak about Him. I was told in Adelaide there are lots of churches, but every human being is a church of God and temple of God. In that resides Christ at this point which is the gate you can see very clearly, in that gate He resides and that is the cross which He has carried, on which He was crucified because this cross was too tight and something had to pass through it. His resurrection is the message to all the Christians that the way He resurrected you are going to be resurrected by God Almighty. He came on this earth suffered for you and He died on the cross just to give you this special privilege of having this great Āgñyā Chakra there, which He adorns. This is the Āgñyā Chakra within us.

Now the mistake lies in one thing, that when we say of baptism it is not an artificial process, this is a living process. Christ could not have talked of something artificial or ritualistic. What he said, “Baptism was that the Kuṇḍalinī should be awakened and it should penetrate through this fontanelle bone area and should give you the experience of the Holy Ghost." Now this, what I'm saying is also written in an Indian book about our Lord Jesus Christ and we do not read the right books in Sanskrit because they are not translated. What we are reading are the so-called pseudo people who came about from fifty years back and tried to preach about Hinduism or some sort of a `ism'. But about Christ nobody told, when they came from other countries to visit India

nobody told that He is the Mahāviṣhṇu because no body knew about it, they could not relate it. They could not relate, they could not tell that He was the incarnation of the Mahāviṣhṇu and Mahāviṣhṇu is the one if you read in the Devī Māhātmyam everything tallies exactly with the character of Śhrī Jesus Christ. If you read it you'll be amazed how clearly he's described, even it is described that first He was an egg and out of the egg, half egg was Śhrī Gaṇeśha and the half egg became Śhrī Jesus Christ. And then that's why on Easter day if you know we always give eggs, meaning we human beings are eggs at this time as human beings but we have to become the bird.

He came on this earth specially for creating a very special type of device and an awareness within us, because this is the gate as I told you to the kingdom of God, which is the limbic area within us. Whatever is in the subtle is in the gross, so this limbic area was to be achieved through piercing through one gate that is our Lord Jesus Christ. Now how to pierce it was a problem because if anybody tried to pierce it he may just go on the sides and become something else but a super-conscious man.

So it was Jesus Christ who is the embodiment of the Rue, the All-pervading Power, the Chaitanya, the Omkāra, He came on this earth and He did that job for us because He resides there. Now what he said by the second birth or by baptism was, that this Kuṇḍalinī which is lying at the triangular bone there, has to rise. Rise and penetrate through this center, awaken Jesus Christ there. Now the what great miraculous thing He has done, that once you awaken this center within us these two institutions on the

left and the right, one is the ego another is the superego. One is the ego which gives us all ideas about ourselves which are not really self esteem but something false and superego is the condition in which we human beings become conditioned in which we accept conditions, “I am this, I am this, I am this." Both the things are sucked in by the wakening of the Kuṇḍalinī of this great incarnation on this earth. Once it is sucked in what you find, that on top of your head where you reach this place, you find that it has become an open space now and suddenly you find the Kuṇḍalinī's rising and you can feel the breeze of the Holy Ghost.

In the Bible about Holy Ghost very little is written but for that you have to go to Indian scriptures where it is described as the power of God Almighty as Ādi Shakti. It is not proper to bind yourself like a horse and see whatever is available but open yourself out and see the references that are given about the great happening of the advent of Śhrī Jesus Christ. Now what relations he has with Śhrī Kṛiṣhṇa, with Śhrī Rāma, with other deities and other prophets is to be seen later on when you come to Sahaja Yoga, gradually you'll realise that they are all relative to each other. And Christ has openly said that, “Those who are not against, are with Me." The three people who went to see Jesus when He was born were Brahmā, Viṣhṇu, Maheśha. Is described, were the three great people who went to see Jesus He was born was Śhrī Kṛiṣhṇa as Viṣhṇu and Maheśha is Shiva and Brahmā as Brahmadeva. All these people went to worship, nobody knew from where they came who they were, they were called as the three wise men. Now whatever I'm saying

has to be first experienced, because if I say something need not be true.

As I would say that it is not essential that you should believe every word I say, on the contrary blind faith is against Sahaja Yoga. It should happen to you first, once it happens then you will be amazed that you yourself is a very great miraculous instrument of God. You'll be amazed how this instrument works.

Even the people who come to Me say, “Mother we are gone cases we are good for nothing we led a very bad life, we are inauspicious, every sort of thing." I said now, “Let it be, you don't judge yourself, let the Divine judge you, let's see what happens to you. Why are you after yourself? Forget it." First of all you did mistakes doesn't matter but now you are using that again to harm yourself.

So please forget all the mistakes everything that has been done, all wrong things you think you have done. Only you get what you have, I'm here just to give that what you have.

Now this great happening takes place in such a smooth way in people who are normal people, but not in all people I would say.

Some people do not feel it because they have some abnormalities in their different centers, which are placed within you. These are the subtle centers expressed outside as gross centers. They're all the time there but the deities within them are not yet enlightened. They only get enlightened when the Kuṇḍalinī rises and pierces through the fontanelle bone area. Now the Spirit resides in the heart. Spirit is the reflection of God

Almighty and Holy Ghost is the power of God, the Shakti of God, which manifests everything else. You'll be amazed how in the gross these things can be seen, absolutely in the grosses thing. My son-in-law is a great photographer and he was working on Himālaya, ultimately I said, “You take it from some old books and find out about it." So I gave him an idea that you go and see near *[UNCLEAR* Munisarhora]. There's a place called *[UNCLEAR* Munisarhora] were also you find the Sadāśhiva is kept, just like a human being, human face. Twelve miles of area you can see that it's just a human being, a face of human being, which is called as *[UNCLEAR* Dakshinamurti] which is looking towards the south. And this one is just a, not melted at all, nothing, is all the time there.

And if you see the face there are two other aspects of Him are shown on His head. But I told him that in Munisarhora, if you go that is the superego. Munisar, munisar means the emotional mind you see, English language is rather funny. But I'll tell you *[UNCLEAR* Munisarhor] the emotional mind. There is this emotional mind represented as Munisarhora and after that I told him that there must be another one.

He said, “Yes there is another one which is called as *[UNCLEAR* Rakshistar]." Rākshasar you know, the word Rākshasar means a devil. Rakshistar and now that Rakshistar is so turbulent despite the fact they're close to each other and between them is placed this Sadāśhiva's image. But this Rakshistar is so turbulent that one can't believe that the same, at the same place these two are having a different type of nature. And those people who went with him could not even touch that water of that

Rakshistar because it represented the ego, less they become ego-oriented.

So they would not touch it.

So this was nothing, you see there were so many things in the gross you can make it out whatever is described in the old times is there existing, it is there. In the same way human beings are in the intermediary state and if you go even subtler you'll find all these centers *[UNCLEAR]*. Now how can you prove through Kuṇḍalinī that what I'm saying is true? That we have to see for oneself. Because in the west I have to go on convincing people, convincing people, pleading them for their realisation. Just for getting realisation I have to put all, put forward all kinds of explanations, all kinds of suggestions that they should believe that they can get Self-realisation. There are people also who say, “How can you get is so easily?" But if I say you can why not try, what's the harm? It is so difficult to convince a mind, which is all the time thinking about it. You can't think about it. You can't think about a sprouting of the seed it just works out. If you put a seed in the Mother Earth it just works out, you don't have to think. If you start thinking about it will it sprout? It will not. It is the capacity of the Mother Earth that does the job, but that time we take it for granted.

In the same way if I say you can get you Self-realisation people start being doubtful about it. Another thing is that it is the other way round, it is you who has to take something, not that I have to take anything from you. You cannot give Me anything; it's you who has to benefit by it, not Me.

So why there should be a question when I'm not selling anything, when I not acquiring anything out of you, when there is no possibility of you being exploited or plundered by Me or used by Me, why should you get this doubt in your mind? Is it also that you feel doubtful about yourself? But that is to be decided by the Divine and not by you.

So please first of all try to know that you are the Spirit and that you have to become the Spirit and that once you become the Spirit you become collectively conscious. Today only when I went for this interview for the ABC, the gentleman was, of course interviewed Me, when I came out there was a lady, when I told the lady that, “You have got liver trouble." She asked Me, “How do you know, did he tell you?" I said, “Nobody told Me but I know because I know." So that's what happens to you, that you become collectively conscious, you can feel it on your hands what's wrong with others and with yourself.

Now when we come to this point of realisation we have to know that the problems of this world are due to one fact, that we have not achieved our absolute.

Some people think by doing alternate work we'll be happier. Supposing somebody is a capitalist he become a communist, then if he's communist he become a socialist. These are all manufactures of this brain. But actually if you ask, I am a complete capitalist because I have all the powers and I a complete communist because I can't live without giving it to you.

So how the communism and capitalism, which is so artificial outside, becomes a reality with you, that you become empowered with your real powers and not

unreal powers, because possessions and things are unreal. They are not real powers and once you get these real powers, you want to share it with others; you want to give it to others, you want to work it out for others. And under these modern circumstances where we think we are very frustrated and we are unhappy that's why we are going to God is a wrong statement. You are coming to God because you have been seekers of ages, we have been seeking long time back and this is the time the fruit of it is coming. I have met so many children even in Australia who are born realised. Great saints are taking their birth today, just to do this God's work and you will find that you are one of them who has been seeking.

In *[UNCLEAR]* Koran which was written I think sixteen thousand years back it is mentioned that this *[UNCLEAR* Nullar] got very angry with Kali, Kali is the one who governs this modern times and he said, “I'm going to kill you because you create confusion in the minds of people. You create complete confusion of values and you make them destroy themselves, so I better destroy you once for all, so there is no problem for human beings." So Kali said, “All right you can destroy me but I have some good points, you must know also the importance of my being there." He said, “What is your importance?" He said, “The importance is that when I will come on this earth to rule that time these people who are now wandering in the Himālayas, wandering in the hills and dales all over the world, who are seeking outside the cities, outside the houses will find the answer. They will find the God Almighty; they will find their Spirit." He said it about sixteen thousand years back and that is today has

started. The point where we have to be really sure is that this is the time, because the signs and symptoms are like that.

You can't imagine so many people seeking anywhere in the world, anytime, when even Christ came it was so difficult to carry this twelve people with Him. Nobody was seeking at the time. He of course gave sermons, He talked about it, that is the last we can say who was such a great incarnation on this earth but nobody listened to Him. After that Mohammad came when he lived how people treated him. They tried to poison him, they tried to torture him and he had such a miserable life that the Muslims today when they behave in the same manner it is most surprising that whatever he has suffered the people have to suffer at the hands of these Muslims. There are other also ideas people have got, like we must suffer for our emancipation, or we must cleanse ourselves. Already somebody has suffered for us, there is no need for you to suffer and do all these things. As I said that, “Jews believed in it and they denied Christ then they suffered, really they suffered." But after that suffering was there any transformation? On the contrary, they were so embittered the way they behaved while killing these PLO people you will be amazed, the same people who suffered so badly forgot all that and became such cruel people and they killed so many people.

So this kind of a suffering doesn't bring any kind of transformation within you. Transformation has to take place, this is a condition of your Self. If the Self is manifesting, it is not that you believe in this and I believe in that, it is, it's no question of believing, it is. That is

what it is, nothing to believed into blindly or to be professed into or to accept something, but it is there within you and that is an absolute truth.

Even if there are ten small children sitting and they're realised Souls and if you ask them, “What is the condition of this gentleman?" they will all raise one finger, this means only one thing, because they can feel it on their fingers something burning, maybe something numb, maybe something heavy. All of them even if you tie their eyes will say the same thing because truth is the same. As all of us are sitting here we know it's night and that the colour of this thing is creamish or whatever it is. In the same way when you get your realisation the feeling, the awareness comes in you feeling and this feeling tells you exactly where you are and what you have to do.

It is a remarkable thing that you are a human being. Is the greatest work of God, the greatest creation of God is human being. Of course you may think they're ugly and you should have nothing to do with them. There are some people who just believe that human beings are the ugliest things, but they're not.

Only thing they've not been put to the mains, this is Yoga, is the union with the Divine. Unless and until an instrument is put to the mains, to its source, it has no meaning. In the same way unless and until you are put to the mains you will have no meaning.

So the best thing is for you to be convinced that you have to have your realisation and it can work out in a split of a second and let it work out. Just work it out, is the best for you that anyone can suggest that you become the Self. Now about the self I have talked many

a times, I told people that, “Self is the one that is residing in your heart." But the seat of the Self is here, the Sadāśhiva, it stands here and when the Kuṇḍalinī rises and touches that, the seat sends message to the heart and then the heart starts feeling, throwing those vibrations. Actually it is not the Spirit that does, but it is the Kuṇḍalinī after enlightenment starts pulsating. Is so clear-cut you can't imagine, it is so beautiful you can't imagine.

Now the result of this Self-realisation, in this short time I have to cover many points and that's why I'm trying to cover it up, is first of all you get your physical fitness. People ask Me, “How could you cure physically?" If you are doctors here you will understand that doctors do not know anything about parasympathetic nervous system. That is the expression of the central path within us called as the Suṣhumnā Nāḍī. This parasympathetic nervous system gives us the balance, the sustenance. For example if you are running fast your heart beat increases, but it is slowed down by the action of parasympathetic nervous system. When the Kuṇḍalinī's awakened this parasympathetic nervous system becomes evident in our awareness. First time the Spirit starts becoming one with our attention, our attention itself becomes enlightened. Now when this Kuṇḍalinī rises this parasympathetic nervous system start manifesting itself and whatever center is exhausted, by which an imbalance is created within us, in our physical body, or in our emotional body, or in our mental body, or in our spiritual body, it starts absolutely behaving in a manner as if we have reached our total blessings. It just

disappears, it just disappears and it is so surprising that people don't want to believe it because they have seen a person behaving this manner and that manner and suddenly next day overnight they find the person who's a alcoholic becomes a free bird, they find a drug addict becoming a free bird, they can't believe it. It is fantastic.

Everything that God does is fantastic. All His work we have taken for granted, at least this living work of God you can understand, that it works within you. It is beyond all your dogmas, all your philosophies all your complications because it is unlimited. While your brain is limited, your intelligence is limited and if you want to understand God you cannot understand it by this limited thing, which is your brain. Of course logically you can come to conclusion. You have to come to conclusion logically, understanding that you cannot pay for it, you cannot work it out, it has to be spontaneous and you cannot do it yourself.

Everything you can do it yourself but realisation has to be worked out by somebody who's an enlightened person. For example if I work it out for any one of you that person can work it out for others. This is so simple as that and I think it is high time that we should go in for realisation. We have so many people and I won't be able attend to you if I continue with the speech. Is it all right for you to have the realisation now? [Aside:] Open any windows [talk of air conditioning and windows].

If you do not treat yourself with respect nobody can treat you with respect, so be respectful about it and try to get the blessings of realisation that would be a nice idea.

Contents: 1983-03-08 **Press Conference followed by TV Interview, Windsor Hotel, Melbourne, Victoria, Australia**

[In the car from Airport to the Windsor Hotel, when Sahaja Yogis inform Shri Mataji about the draught conditions and bushfires:] It will rain now. This is the least I can do.

Shri Mataji: Now, I think, we should have questions first...

Question: What is Self-realisation and how do you grant it?

Shri Mataji: Self-realisation is the epitome of our evolutionary process which is a living process through which you achieve your higher Self.

Even Darwin, who was an atheist, did say that as human beings have come so far they will achieve their absolute.

So, to achieve your absolute means to get Self-realisation. The purpose of our life, the meaning of our life, is only achieved when we get connected with the Divine Power, which is all-pervading.

Now, one need not believe in the Divine Power, but you can see the manifestation of this living Divine Power when you see a flower becoming a fruit. All living work is done by this Divine Power. But we are not aware. At this human stage, we are not aware of it.

But once this happening takes place, in your awareness, that is not just suggesting that you become something great on mental level but actualisation of this experience is felt in your awareness, on your central nervous system. You can feel that you have become, again I say you have become, not told or brain washed, but you have

become collectively conscious. Is a state where you can feel your Self inside and others, too.

Now the knowledge of this is the knowledge of the roots. Whatever we have achieved is the knowledge of the tree. But if the tree outgrows itself from its root, then it may die.

So it is time that we should find out about the roots and to know about that we have to become a subtler being. At this human awareness you cannot. But sometimes it challenges the ego of people. You think, “Why not? I am such and such.

What shouldn't I know?" But you cannot. As you have to have a microscope to see things deeply, in the same way you have to have this new awareness within, this dynamic awareness. Of course, the nature of Self is that it is collectively conscious, that it is the source of peace and bliss, that it is the Truth and Love. That's the nature of it. And you become that. You become. It is not only mental, but you really become. Because whatever is mental is artificial, man-made.

Question: And do you perceive this collective unconscious or this collective consciousness mentally?

Shri Mataji: Yes. The unconscious becomes conscious, means it comes into your central nervous system. It is within you. Everyone has said it. Christ has said it, Mohammad has said it, Buddha has said it, Mahāvīra has said it. Everyone has said the same thing. Like Lao Tze, you can say Zen system, everything has said that you are to be born again. There has to be some transformation. They didn't tell us lies. But the trouble is people can use these for their own purpose and mislead

others. That's a different point. But logically, the disciples or the seekers also must know that you must feel your own powers, you must feel your Self. Otherwise, what's the use of just following somebody where you achieve nothing of your own? What did you achieve is the main point, you should see.

Question: And how do you grant this Self-realisation en masse?

Shri Mataji: Yes. That's the only thing is new today, is that it can be done on mass level. That's why in India it is called as Mahā Yoga. Formerly it was done for one or two persons but now on very mass level you can do it. We had once, they were there six thousand people in a village called *[UNCLEAR]*.

All of them got Realisation. In India is very easy because they are not so complicated. But Indians take it for granted. They know what Sahaja Yoga is. They know what Realisation is. I mean, they are trained that way, or I should say they are conditioned that way, that they understand it faster. But when the Western people get it they are sometimes difficult, but once they get it they are very deep and they think this is the solution, the only solution for all the calamities.

So they work it out very seriously and really, they are doing very good work.

Question: It is harder to grant Self-realisation to Westerners?

Shri Mataji: I used to think so but the other day, in Adelaide, I was amazed that they got it without any difficulty, so many of them. There must be about three

hundred people in that hall. It was all packed and they all got it.

So all My ideas about that also are now changing, that suddenly I'm meeting the right type of people, I think.

Question: But how is it you actually rise this mass level of consciousness? How do you do it, Mother?

Shri Mataji: How do I do it? As I said, is spontaneous. A seed, which you put it into Mother Earth, it sprouts by itself. You cannot say how you do it. But, because you are just ready for it. It's like one enlightened light can enlighten another light. Even if you put your hands towards Me like this, you can get it.

So simple. And then you can give it to others. Once you get it, you can give it to others.

Question: With due respect, we get a lot of Eastern visitors to Australia now with different brands or different types of religion. Who do we know is leading us and who do we know is misleading us?

Shri Mataji: You see, you must use your brains for everything. God has given you a very good brain and logic and logically, you must get proper conclusion about your Realisation.

First of all, you must truly find out whether you want your Realisation or not. Because if some people want to fly in the air, then I can't give them.

Some people want to have diamonds. That I can't do.

Some sort of funny miracles that they do, all these tricks.

So you have to be honest, first of all, about it. Secondly, you must know that this is Love of God and you cannot sell it in the market. You cannot purchase it, either.

That's one of the very important things one should know. Because they pamper your ego in a way that you are purchasing your Guru, that he is in your pocket. That's what one feels. But you cannot pocket the Guru. Guru has to be higher.

Then you have to find out the lifestyle of such a Guru, how is he, how he lives. Is he a honest man? Is he a righteous person? Or is he... You must find out the credibility of such a person. Apart from that, you must find out the credibility of the followers also. What are they doing? There are so many Gurus who have got followers for eighteen years, sixteen years and they are epileptic. If the Guru can't even look after their health, then what's the use having such a Guru for yourself? But human beings are very competitive in certain things.

Question: Sorry, they really...

Shri Mataji: They are very competitive. Amuses Me. Like, they see a person coming out of the pub, falling in the gutters. And they enter into the same pub.

Sort of thing, you see. It's sort of a competition that they get into. And they think, “Why this man has gone to this Guru? So, I'll do it." It's a fashion.

People talk, “Who is your Guru?" And the other says, “This is my Guru." It's really, I can't understand how people can do that.

Question: You see, it's sprung up like that.

Shri Mataji: Yes. What I'm saying is this a special time, a time of your Resurrection, the time of your judgment.

So there is an *[UNCLEAR]*, there is an *[UNCLEAR]*. But people are so vulnerable and so naive, I would say very naive

not to understand who is right and who is wrong. It's very simple. People come out of the jail, wear a funny dress and go to America, sit in a square and start singing something funnily. Everybody will say, “O, look at him, what very great." Moreover, a kind of a inferiority complex, I think, people have who are householders. They think they are very selfish; they are raising their children and looking after their household. It is not. It is one of the greatest jobs, is to be properly married and to have nice children. But if you see somebody wearing that dress, see he has given up everything in the world, you see, you feel so enamoured. If superficially you cannot judge it.

Question: I asked, do you believe yourself to be the only true Guru or do other organizations offer enlightenment as well?

Sahaja Yogi: You believe that you're the only true Guru and are there other organizations who offer enlightenment?

Shri Mataji: There are many true Gurus also *[UNCLEAR]*. It's not so that I'm the only true Guru, but I'm the only Mother. Because these true Gurus who are maybe in Himālayas and other places on the caves, don't want to come down. They don't want to mix with people. I sent one fellow with great coaxing and persuasion to America. He ran away within three days from there. He says, “They can't understand their methods. Other way round people. They can't understand God. They understand dollars." So there are many Gurus. And they recognize Me quite all right. That's why when they say that, “She is

the, what did you say, greatest Saint, or anything" is all said by these Gurus only who have told them.

Question: What about *[UNCLEAR* risk]? Do you think they are Gurus or not Gurus but do you think they are a religious organization?

Shri Mataji: Yes, Yes.

Some people have taken *[UNCLEAR]*, you see. It's a good enterprise to make big money, you see. Now imagine one Guru has made six thousand crores of rupees, now crore is hundred and then hundred and then...

Sahaja Yogi: Six.

Shri Mataji: Thousand and then...

Sahaja Yogi: Multi billion...

Shri Mataji: And then hundred thousand and then hundred of that is one crore.

So six thousand crores of rupees he has made in India alone. God knows how much in the Swiss Bank. Another one has got fifty-nine Rolls-Royce. Another one who has run away from India has purchased three aero planes and thirty-five Rolls-Royces. They have a special liking for Rolls-Royce, I think. See, so one must understand that it's a very big enterprise. Even *[UNCLEAR]* cannot afford it.

Journalist: So it's a good *[UNCLEAR* value] for the market place.

Another Sahaja Yogi: Yes.

Shri Mataji: Yes. They know, you see, they're very clever. Not only they have employed people to tell them about, you see, they have employment of also publicity department. They have every sort of department. I mean, it's a big enterprise.

Journalist: For being a Guru.

Shri Mataji: Beg your pardon...

Journalist: For being a Guru, it's a big enterprise.

Sahaja Yogi: Being a Guru is a big enterprise.

Shri Mataji: Very big enterprise. If you can venture it, really... I mean some English people have tried it. They have been successful but not so much as leaders. I think Indians are clever to do that job.

Sahaja Yogi: You missed the point you were asked. She asked are there any enlightened Gurus in the West?

Shri Mataji: Yes.

Question: Are they genuine spiritual leaders?

Shri Mataji: Yes, yes. I think so. There are many. Yes, there are many. All over the world they are, not only in India.

Question: Do you consider some Western religious organizations to be genuine?

Shri Mataji: They are all genuine because they believe so, but they don't create genuine effects.

That's the point is. You may believe something is genuine in ignorance. For example, you may believe that a particular diamond is a real diamond, because they are ignorant about jewelries. But when you want to sell it in the market you find out that's not so. That's what it's happening to our religions now.

The thing is all religions have to seek within themselves and get their Self-realisation, which they are not doing. They, too, are having buildings. They, too, are having organizations. They, too are having, what you call, big

market places. All that is all coming to economics again, I think, or to politics, at the most, but not to God.

Question: How is that there are Gurus meanwhile that won't come into the West? Why did you come to the West?

Shri Mataji: Me?

Sahaja Yogi: The ones that, there are many that won't come to the West. Why have you come to the West?

Shri Mataji: You see, because I'm the only venturesome person, I think.

Journalist: Sorry, what was that?

Shri Mataji: I said I'm the only venturesome person. But apart from that, I must tell you, it was so arranged that My husband got elected to this job in England, elected by 134 nations, four times unanimous.

Question: What do you think, how long have you lived in the West now?

Shri Mataji: No, I don't live here much. You see, I go to India also. I've been travelling quite a lot.

I've been to India, I've been to all the places and I have to go about with My husband also. I've been to Russia, I've been to China, all over the places, Argentina, every place.

Question: Apart from the material circumstances of life, what do you think is so different between the West and the East? Just forgetting the material circumstances, what do you think is different about...

Shri Mataji: Western people? Question: And the Eastern people.

Sahaja Yogi: Other than material aspects...

Shri Mataji: Now, they are very honest, very honest.

Question: Western?

Shri Mataji: Very honest. They are very honest. Really, they are honest. No doubt about it. And about themselves also they are very honest. And tremendously *[UNCLEAR]*. You see, the Indian real Gurus, as you may call them, are even frightened of Indians, leave alone the Westerners. They think they'll be crucified or their throats will be cut. They... see, they have been tortured also, I must say. One fellow, General Forbe, his legs were broken and hands were broken because, you see, there is a big struggle between the reality and unreal things. Because these people are having a business proposition. You understand that. Is a very big business organization.

So if anybody says anything against it, then they can pay people to get after you. They can kill you. They can do anything they want. It's a Mafiā. It's not easy to face these horrible people. They are all multimillionaire.

Question: Can you some thing similar experiences *[UNCLEAR]* which they tried to charge You or...?

Shri Mataji: They tried, but doesn't succeed. Yesterday only we had a meeting and there were two boys from this TM, I think paid by TM, whatever it is. They tried to be very funny and I said... the whole public got after them; they run away. They said, “Now you can't have it *[UNCLEAR]* in the *[UNCLEAR* major] policy, you have got now.

So you can't have, so let us have it, at least." They tried.

It's all right. I mean, I expect also.

Question: Just tell us something of your Yoga school, it devolved from....

Sahaja Yogi: It's not a Yoga school. You get your Realisation and you then become a person who becomes a realised person. You just...

Question: But it started from... through the influence of...

Sahaja Yogi: Yes, not influence. I got my realisation when I went to India. I've been looking. I've been to all these false Gurus, all these places where I saw some shocking things happening and I was absolutely shocked and disillusioned. I was about to come home, but somebody had given me Mātājī's telephone number. She was in India at that time from England and I went to Her and I thought, “My goodness, this is all so very different." I started to feel incredibly peaceful and joyful and amazing things were happening inside me, which were very wonderful and it all seemed so normal. And yet so...

Shri Mataji: Health wise. First of all he improved health wise.

Question: What was your trade?

Sahaja Yogi: I'm a doctor. I mean I was very skeptical.

Question: General practitioner?

Sahaja Yogi: No, I've trained as such, but I've been practicing in natural health because I am a bit disillusioned with the medical side and many of my patients have been going to India on these spiritual pilgrimages and coming back worse. And I wondered why because I was reading all these books that were saying these great Gurus and they were speaking about Christ and Mohammed and Kṛiṣhṇa and all these things. And they were coming back in a worsened condition.

So I thought the two things were a disparity.

On one the hand, they seemed to be those spiritual masters. On the other hand, these people were coming back. But they had a very good rationalisation. They'd say they were purifying themselves or they were cleansing themselves, or they were going through some Karmas or something like that.

So I couldn't sort it all out.

So I went to India. I stayed there a few months. And finally I met Mother and it seemed so logical, so sensible and so scientific. I mean, the degrees with all the medical science. It underpins medical science.

Shri Mataji: I've also studied medicine.

Sahaja Yogi: It was quite incredible. And now it just seems so easy...

Question: Do you do some Yoga practice that as part of your daily routine?

Sahaja Yogi: Meditation in a very simplified form. When you feel these cool vibrations on your hand and above your head and over your body, you know that you are in meditation. That's it.

Shri Mataji: *[UNCLEAR]*.

Question: You do some Sūrya asana?

Sahaja Yogi: Not many. Just a few only if you got a specific problem.

Shri Mataji: You see, it depends on. It is very scientific. It depends on where you have a problem.

Say, for example, you have a problem in your stomach. Now you have to do certain exercise four times for short time, till you get rid of it. Or maybe that you have to say certain mantras for that to excite or to awaken that part

within you into liveliness. That's how it is very scientific. But gradually you know it, so easy it becomes. The whole thing becomes so easy because when you are expanding towards the periphery, the whole thing becomes complex. But when you integrate towards the center, then everything is very simple. You have to deal with simple principles. And once you know how to manage that... for example, balance. Balance in a person is very... balance in a person is not very critical in, say, in medical science. While we have one medical science, then we have psychologists. You have this and that. You have one doctor for one eye and another doctor for another eye. Here it's one person who is the one who cures you. He diagnoses you, he gives you Realisation, is everything. The laboratory is the complete instrument with human beings and this is created by God within you. Beautifully, it's all there just to be connected to the mains. That's all. It's already there. I mean, nothing fantastic for Me, because I knew it is there.

But once you get it you are amazed how you have started working it out. Because we are not aware of ourselves. Every one of you can get it. Everyone.

Question: How did you develop the Self-realisation? Were you born with it, or...?

Shri Mataji: I was born with it.

Question: So, from the day you were born you knew it?

Shri Mataji: Yes.

Question: When did you know that you had been born with it? When did you discover it?

Shri Mataji: You see, it is like if I ask you a question when you did discover you are a human being.

You won't be able to say it. It's simple as that, you see. I was quite aware of it.

Question: When you say Self, meaning I know I am a human being. What you mean by Self-realisation?

Shri Mataji: Everyone can get it. As long as you are a human being, you get it; that's all.

Sahaja Yogi: It's a higher level of awareness than human awareness. You are not using your thinking brain. You are not using your emotional brain. You're using what is basically the All-pervading Power of God, the unconscious about which you...

Shri Mataji: That is reflected within you.

Sahaja Yogi: You've spoken about it.

Shri Mataji: See, it is reflected within you as Kuṇḍalinī, we call it. In Sanskrit language it is called as Kuṇḍalinī. But this also word is so terrifying to people. Those who have read about Kuṇḍalinī, they get a fright. She is your Mother, the one who has to give you the rebirth. Now there are people who have written so many such big books without knowing where the Kuṇḍalinī lies. Imagine! Absolutely waste.

Now you can see it in some people pulsations of the Kuṇḍalinī. You have also got it on videotapes some of these things when you saw on some people, where there were obstructions, the pulsations *[UNCLEAR]*.

The pulsations, you can see, sometimes this triangular bone, sacrum, just pulsating.

But imagine this thing was called as sacrum, means sacred. And I asked the Greek people. I said, “What did you call it sacrum?" They said, “We had a report, with the Indo-Aryan group, much before Alexander went to India and they told us that this bone is the sacred bone."

Sahaja Yogi: If you burn the bone, the bone is so ossified that it's the last one to burn.

Shri Mataji: Yes, the way *[UNCLEAR]*.

Question: You worked with Gandhi, didn't you? What are your impressions with Gandhi?

Shri Mataji: What are My impressions? Question: Yes.

Shri Mataji: Oh, He was a very great man, very much needed at that time and if he had survived, he would have supported Sahaja Yoga out and out, no doubt about it. If he had survived, he would have supported Sahaja Yoga out and out.

Question: How much contact did you have with Gandhi?

Shri Mataji: It's quite a lot. As a child I was very close to him and he used to call Me Nepali, because according to My features were more Nepali, My complexion was Nepali. He used to call Me Nepali. And very affectionate towards children, very affectionate. Otherwise he was a hard task master himself, towards himself and towards others. But a very kind gentleman as far as the children were concerned. And you could even overrule him by sweetness. I mean, supposing he says, “I don't want to have any juice just now” you can say: “Bapu, have a little bit; otherwise, we won't have” or something. He would just melt away.

So sweet inside.

Question: Have you seen the film version of this?

Shri Mataji: Yes, I've seen.

Question: What did you think of it?

Shri Mataji: The film is very good. I mean, it is very good.

Question: Is it accurate?

Shri Mataji: Yes, yes. It is very accurate, but in some ways, you see, I would say that, for example, Gandhiji, you see, was an Indian. And the Indian style of talking is rather different from what you people talk, because you are very intelligent people and sharp witted. You see, you know words, you are very well read, so you say a few things in a very sharp way. Immediately you answer in a way that is very, I should say, acute, absolutely. But he was an Indian so the Indian, you see, doesn't say such a sudden, it doesn't spring with such a sudden intelligent remarks, you see. They are gentler people I think. They speak in a gentler way, in a little round about way.

Sahaja Yogi: He couldn't sit on the floor.

Shri Mataji: That also you could find out that he couldn't sit properly on the floor. That's why...

But that's not so important. What I felt was that...

A person: It is in the film. I'm not *[UNCLEAR]*. It's in the film.

Shri Mataji: That's one thing about him and the essence of it is, you see, is that whatever was, it was such a short time to bring forth such a deep thing. I think he has done full justice except for one point that Gandhiji never wanted to provoke. He never used these sinister methods of provoking others.

He was a very genuine person, you see. And I think that is little bit lacking. He didn't do it to just to, you see, with

a mind that should provoke others. No, he wouldn't think of such a thing. It was just a thought that if he has no other way out, because you don't know what times we had. I mean, in this picture he couldn't show anything. It was very oppressive time for three hundred years. Can you believe? So to talk of anything was impossible.

My father himself went to jail many a times. My mother went five times to jail. Of course, later on he was Member of the Constituent Assembly Parliament, everything. My brother is also a Minister of Steel now in India, in the Cabinet. But that time it was so difficult, very difficult. They used to torture people much more than it's shown there, individually. They used to hound us.

Question: Do you know Mrs. [Indira] Gandhi? [At that time she was the Prime Minister of India.]

Shri Mataji: Well, I like her.

Question: Do you... have met her personally?

Shri Mataji: Yes, I have met her once or twice. But I wonder if she remembers Me now. You see, she's a very busy person. I mean, she is the solution just now for us. You can say it.

Question: What do you think are the immediate problems facing India at the moment?

Shri Mataji: If they take to Sahaja Yoga, they can be also *[UNCLEAR]* because it also gives you material peace. It also gives you material blessings. You see, we have too much black magic and all that in our country. It's very heavy. And once you get into those things, you get to poverty.

Question: Just on that point, Mother, a couple of years ago an individual was talking about Selfrealisation and

was inclined towards so-called group miracle cures and so on. I notice in the press release there's quite a heavy accent on cures. Have you done that specifically to perhaps reinforce your message or get your message across?

Shri Mataji: Which one?

Sahaja Yogi: He is saying that there seems to be an emphasis in the press release on curing.

Shri Mataji: No, no, I did not. Did you feel that way? Oh, God, I'm not doing that. Really.

Sahaja Yogi: Has your emphasis changed is his question? Question: What I am saying is the *[UNCLEAR* vibe/line] I get is that two years ago that you won't emphasize...

Shri Mataji: No, no, never, never.

Question:... but the press release that support your trip here indicates the more... other side of it which, of course, has opened a little more skepticism.

Shri Mataji: It is a by-product. Curing is a by-product of Self-realisation. You see, Self-realisation is most important. You see, body is not interested in curing every Dick, Tom and Harry. Say, for example, Hitler wants to get cured. Should we cure him? It's better cure for him is to go to hell, at least for one life time and then come back, see what people have suffered.

So it's never accented never on curing at all and I, out of compassion, you see, because it works. I work out *[UNCLEAR]* important. I don't know why you felt that way. I don't know what they have given you. I have no idea as to what they have given you and what is accentuated but

as far as I am concerned, for Me Self-realisation is the main thing. That's My job.

Sahaja Yogi: In fact, Mother takes interests away from curing at the, Public Programs.

Shri Mataji: I tell them not to cure anyone. I said if they want to cure, let them work on My photograph. Let the photograph take all the bhoots. You don't take any load of curing.

A person: Perhaps you'd have rather talk over the situation with your public relations people.

Sahaj Yogi: We don't have any.

Shri Mataji: We don't have any publicity, nothing. They do it on their own, spontaneously. They will realise if they are making mistake and put it right next time. I don't know what's happening and all that. I don't know anything. They're doing on their own. Let them learn. They gradually learn. You see, better ways of curing and all that. Let them learn. They'll all learn.

Question: Can we just clarify that do you claim that you can heal or cure?

Shri Mataji: I do not claim; I do it. No question of claiming, you see. I do it. I've done it. You can do it also. Everyone can do it. This Doctor Warren has done. He's cured so many people.

Question: And you said it can be done through the photograph. Would you explain that?

Shri Mataji: Yes, it is surprising, you know. Myself I was surprised, as you are, that My photograph has also got vibrations and people get cured with photographs. In your country only when I came, the press was very kind

to Me. The reason was there was a lady who was sick for four months. And they said she has got...

Sahaja Yogi: Cerebral aneurism.

Shri Mataji: And one another disciple of Mine took My photograph and put it under her head. And she started getting all right in the sense that she started opening her eyes.

So the doctors got frightened.

They said, “Even if she gets all right, she will be damaged. She won't be able to walk." But today she's perfectly all right. Not only that, but she is very hard-working Sahaja Yogini also.

Question: How does it work?

Shri Mataji: It was in...

Sahaja Yogi: How does it work? How does it work from the photograph?

Shri Mataji: From the photograph? The photograph is a real image of Myself, you see and this, My body, has got a coefficients which emits vibrations. Same happens with the photograph. That too has the same coefficients. Of course, it hasn't got the other dimension, but it also emits the vibrations because of the coefficients being the same. Say, even if you take Christ's photograph, it's not real because it has come out of the unconscious, all right, but that's a lot of imagination put in. Any photograph, if you take of any person it is like that. But there are so many things I've seen which have come out of the Mother Earth, they emit vibrations. Like Stonehenge in England has vibrations.

So many places like that have vibrations, but not so strong as Mine, because I'm a living person.

Question: What is your idea of God?

Shri Mataji: My idea... It's not only idea but it's the truth I can feel about God. God is difficult to put it in words *[UNCLEAR]*, is the witness of the play of His Power. He is separated from His Power and He's just witnessing the play of His Power. And the Power is creating, is protecting, nourishing the creation and evolving it. Till this play is up to the animal stage, everything is under the control. But to give it a greater freedom they have to give first freedom to human beings at the same time.

So this freedom was granted so that you learn what is your mistake, what is your right thing. You decide it. You develop yourself with that. You create a balance within yourself. And then you ascent to the Spirit, by which you know God's power flowing through. This is all the game. It's in short I'm telling you.

So this God is the witness of this play. He's the Father, you can say and His power is the Holy Ghost. And He sends His Son on this Earth to redeem the people, to play a very important part, Christ, in our lives. And all other Incarnations, all of them have a meaning and a place within ourselves. Christ also has a special place within which is the gate of the limbic area.

Question: So you are a Christian, as well as being an Indian?

Shri Mataji: I'm not a Christian. In the sense that I do [not] belong to the Church. Neither I'm a real Hindu, Christian, everything, because they are all based on the same principle of God. See, these are all flowers who

were on the same tree of life. But people plucked it, saying, “This is mine. I am that. I am that." And then the flowers became unreal and dead. That's why people think Christianity is failing, Hinduism has failed you, Islam has failed you. It's not the progress. It's not the Incarnation. It's we by possessing the... We cannot possess God. We cannot possess religion. We are in religion, means religion is our valency. Just like carbon has valency of four, we have a valency of ten. That's in this part of our being where the attention is. And if we are balanced people, if we live in moderation, the ascending is faster. But even the extremists of extremists have got Realisation because grace is flowing very generously, I should say, to achieve it. Even alcoholics, you see, come to Me in an alcoholic state, become overnight wonderful people.

A person: Overnight?

Shri Mataji: Overnight. You'll be surprised, overnight. There are druggists and chemists and smokers.

Question: Chemical *[UNCLEAR]*? Chemical nicotine?

Shri Mataji: Yes, yes.

Question: Do you consider yourself to be a saint or a prophet?

Shri Mataji: What is the relevance of this question? I just don't understand. Everyone of them are asking, “Do you consider...?" If I was not considering Myself I would have worked like this. Do I think I am a thief? Or what I think Myself? You see, it's a funny question, isn't it? You just tell Me. I don't understand the relevance. Because everyone of them are asking this question to Me, “Do you think...?" Is this, what is this? I must be thinking

something about it. I must be aware of Myself; otherwise, I won't take up this *[UNCLEAR]*. See now, I have a husband who loves Me very much. I have a very comfortable house of My own. I have My own children and grandchildren. And I don't get anything out of this except that I have a satisfaction that I'm sharing My joy with all of you. All right? Now, unless and until I'm aware of Myself do you think I will do such a thing? Anyone of you will do this thing without getting anything out of it? Can anyone in this world can do such a thing, tell Me, without any purpose? Question: Well, I think somebody just called you the greatest living saint and...

Shri Mataji: Yes. I mean they can call Me anything, you see. But what I'm saying that, you see, asking these questions... Supposing I say, `Yes, I think so,' then you'd say, `She is very ego-oriented.' All right. If I say, `I don't think so,' then they'll say, `She's diffident.' You see, it's a very funny thing, you know.

So it's like a... is the question that is irrelevant. Unless and until I am aware of it, why will I do this work? Question: I suppose, in the West we think of science with high halos around the head.

Shri Mataji: Yes, you can see that also if you become realised Soul. You do. You'll see that. Many see that. I will show you one photograph. Have you got that? You just see this photograph. Can you explain? A person: Sorry?

Shri Mataji: This photograph... I'm sitting in a village, outside. And these, seven times, this light fell on Me. Have you seen Christ pray in that garden? A person: Yes.

Shri Mataji: And this is the photograph. You see. There are many other things people have seen in My

photographs. There's one photograph where they have seen lights coming out of My fingers, My toes.

They've got these photographs.

So for you...

Question: Can't this be a reflection from the glasses?

Shri Mataji: No. This happened seven times. And when I put down My head, none of them could see at that time. There is no reflection. Ask a photographer if he can explain. All artificial Gurus would try this trick, you see.

Question: I'm understanding you began teaching Self-realisation *[UNCLEAR]* in 1970? Is that right or...

Shri Mataji: No, not Self-realisation. I give human realisation. I understood human beings at that time. They are very complicated, I must say.

So many permutations and combinations and I had to study them thoroughly. Because My father himself was a realised Soul and he told Me that no use talking about God, saying anything about Him. It will become another Bible, another Gītā. “You have to find out a mass Realisation method. It has to work on masses." And also you have seen any discovery which is not used for masses, is wasted. And he said, “Otherwise, same thing will happen. You will be crucified or they will kill you. You'll be finished." And I knew that I've come for this work, to achieve that.

So I had to study, work it out the method by which en masse evolution could be achieved. And when I did it, I would say it was My human realisation in the sense that I found an opportune time to start.

Question: Will you continue to do this travel around the world until you die, or...?

Shri Mataji: What is it?

Sahaja Yogi: Will you continue to travel round the world doing this work until you die?

Shri Mataji: It's very futuristic. I don't think of My death so far. As long as I can do, I'll do but if these people are realised, then I think they'll give Me some rest sometime, you see. I must also have some rest. Now I am sixty years of age. How long do you want Me to live? It's for you to decide. If you take over then I will not live.

Question: You spend more, most of your time in London now, I believe.

Shri Mataji: Yes, because My husband is there, My family and he is a very busy man himself.

Question: But where do you come from originally in India?

Shri Mataji: Beg your pardon.

Question: Where did you live originally in India?

Shri Mataji: Originally near Ahmadnagar [in Maharashtra] is where our dynasty.

Question: Are there no other big cities near... is that near a big city?

Shri Mataji: It's a, it's a district place. It is not a very big city, Ahmadnagar. It's very near...

Question: What is the biggest city it's near?

Shri Mataji: I lived with My husband in Delhi because he was with the former prime minister, Lal Bahadur Shastri. He was his Secretary.

Question: Oh!

Shri Mataji: Yes. And then I lived, he went to Tashkent also with him. He was throughout with him.

And then I lived in Bombay [Mumbai] because he was Chairman of the Shipping Corporation of India. For years together I lived in cities. I studied in Lucknow, in Lahore, in Medical College. That's how I lived in cities. But originally My family, all of them, come from this place, Ahmadnagar. I was born in a small little hill station, which is on the tropic of Cancer.

Question: Mother, is reincarnation is part of your kind of philosophy?

Sahaja Yogi: Is reincarnation part of your philosophy? Reincarnation.

Shri Mataji: Of whom? Question: Of everybody. When we physically pass away...

Shri Mataji: Yes. You mean human being? Question: Yes.

Shri Mataji: Of course. Of course. Of course.

Question: Perhaps you could put into another situation. For the mysteries of life there are many people who appear beyond sincere and work hard, who suffer enormous tragedies or if they are people *[UNCLEAR]*, I can name a couple of them, who seem point through that not necessarily *[UNCLEAR]* follow human beings. There are reasons for attached spirits or something else.

Shri Mataji: Going to false Gurus is very dangerous. It's extremely dangerous. It is not superficially dangerous. You see, money I don't mind because if they are thugs, all right. There are so many thugs.

We have Mafiā. We have all kind of things. It doesn't matter. Let them be thugs. It's not so simple as we think.

It's very deep. You see, they can bring forth all the diseases which are incurable diseases.

Say poliomyelitis, cancer, heart attacks, all kinds of diseases which are absolutely incurable, beyond our condition. Then depressions and then stresses within us. Also they can bring quite a lot of them, epilepsy they give, abnormal behaviour. Even in the plain if I am sitting, I find some people are doing like this, like that. And most of them have been to this TM. They have paid thousands and thousands of pounds to achieve that kind of a funny thing, funny this center by which their necks came out like that, they are all the time twitching themselves or jumping.

Sahaja Yogi: He asked about spiritual possessions too, Mother. They asked about spiritual possessions.

Shri Mataji: Of course, this is spiritual possession. It is spiritual possession. They did not...

Question: And do you have a method of driving away that spirits?

Shri Mataji: Yes, yes, I do. I do try. You see, even...

Question: So that's the key to solving many of these diseases.

Shri Mataji: Yes, yes. Of course, of course. Because, you see, the cabbages are better sometimes than this. Poor things, you know they are so suppressed, that even if you show then a garlic, they are frightened and they are troubled. Garlic, can you imagine? They are afraid of garlic and afraid of onions. I mean, what are they made? Some are just sex points, without any sex acts. Horrible pieces. They are neither human beings, nor animals.

Terribly possessed, no doubt. They can be cured, absolutely. We have cured so many like that. You can make so many... You won't believe that they have been like that. There's one gentleman here, that you can see it...

Sahaja Yogi: He was a flyer in TM.

Question: What's a flyer?

Shri Mataji: You see...

Sahaja Yogi: A leviter.

Shri Mataji: Because they levitate, so-called. Sitting on a floor you have to jump, you see. And then you think that you are flying. And then you get possessed. And they just start, sitting down. They just come out of their seats, you see, as if somebody just ejected them out. This is supposed to be flying.

Question: *[UNCLEAR]*.

Shri Mataji: Beg your pardon...

Question: You ruin hysteria.

Shri Mataji: Oh, horrible things. In one of our ashrams, one fellow came because he went to a barber shop and he was having a...

So he had to spend some time waiting outside, you see. He saw one magazine there. It was written about Sahaja Yoga, in a magazine for Yoga. They are not supposed to read anything else. They are bad. Everything is secret. It's all Mafiā style.

So poor man, you see, hesitatingly took that thing and took that Yoga thing to read. And there was My picture which said that, “If you feel Cool Breeze on at this picture, then know that you are a realised Soul." He tried

to put the hands and in the barber shop only went and took *[UNCLEAR]*. He got such a fright that he telephoned to our ashram and the gentleman who was on the phone was also not a TM but another type and he asked him, “Are you feeling hot?" He said, “I am boiling this side." He said, “Have you done TM?" He said, “Yes. But how do you know?" He said, “We know." Then he came down. But when he came down there and these people just took My name and the fellow went into such a contortion and started barking like a dog that all the Sahaja Yogis got a fright and they sent Me a SOS that, “Mother, please, come to our help!" and I was going to have lots of people for dinner and I said, “What's happening?" He said, “There is a fellow who came here and he is behaving like this and we are all frightened of him." Then I told them what is to be done to pacify him. But this fellow today is a very big Sahaja Yogi in London. He was a manager of a very big estate company. He lost his job, lost his money. He became penniless doing this TM.

But now I'm told this Rajneesh is coming to your Australia to bless you all. This fellow Rajneesh who is ousted from America...

Sahaja Yogi: The orange people, they are called.

Shri Mataji: The orange people. He is trying to come here, so be careful.

Sahaja Yogi: The government is already writing about this regulations...

Shri Mataji: He has bought only thirty-six Rolls-Royces and three airplanes, I don't know what his ambitions are out of the Australians.

Sahaja Yogi: He has been thrown out of India, now...

Shri Mataji: Not thrown out, he ran away...

Sahaja Yogi: He ran away, sorry. He had the deportation order in America now. And here he is coming too.

Question: What's his name?

Sahaja Yogi: Rajneesh.

Shri Mataji: These orange people, you see.

Question: What is bad about Rajneesh?

Shri Mataji: Horrible.

Question: But what?

Shri Mataji: You see, what he does, he makes you into a sex point. He has mass sex, mass sex, you see. More...

A person: Some people think that's all right.

Shri Mataji: Yes, those who like it go there and become mad, that's all. That's all. You pay for it.

We have a film. I think we have a film. We can show you. See, somebody has taken secretly the film of his work.

Sahaja Yogi: One of them, who is disenchanted.

Shri Mataji: One of them. He took a secret film of what they do inside. And that was released in London, called as, `God Who Ran Away'. And with that they showed this mass thing and all that.

So what he does he makes people absolutely impotent. They become impotent and *[UNCLEAR]* because he possesses them at the sex points and talks about sex all the time, so that they are so restless that they become mad. And they give him money as much as he wants, you see. He has told so many women that he was their husband in previous lives so they gave all their ornaments to him.

An Indian lady gave all her jewelry to him, very expensive jewelry.

So his brother and her, She was a widow, Her brother and her brother-in-law came to Me with her that, “Please, Mother, cure her." I asked her, “Why did you give?" She said, “He was my husband in previous life." I said, “Who told you?" She said, “He told me." I said, “But why did you believe?" She said, “I also feel the same." I said, “But what the husband whom you married, from whom you have children, who has given you all these jewelries? And why should you give it to this man whom you never married?" “No, I believe! What is wrong?" She was absolutely in complete possession of him. And no one knows where she is now. No one knows.

Question: There are some other cults in Australia and parts of *[UNCLEAR]*, including the Moonies and Hare Kṛiṣhṇas. What are your opinions on them?

Shri Mataji: Now Moonies, of course, you know all very well. I need not tell about them.

Question: You don't approve the Moonies?

Shri Mataji: Of course not. You see, when you become a Sahaja Yogi you start loving your parents, loving your children, loving everyone. You solve your problems. You don't hate anyone. You don't run away from anyone. On the contrary, if this thing happens, this is anti-God activity, absolutely anti-God activity that you get out of your families completely; you have nothing to do with anyone. This is absolute anti-God.

The another sect is our great, you call them, Hare Rāmas. And the first basic mistake they make is to say that vegetarianism is to please to God, taking Kṛiṣhṇa's

name specially. Because Śhrī Kṛiṣhṇa, in Gītā, the first chapter is very outset, He told Arjuna that, “You have to kill humans, leave alone animals." Then he says, “How can I kill, because they are my Gurus and they are my relations?" So He said, “You have to kill them! To achieve a higher goal, you have to give up your lower goals." This is what exactly He told. Then later on it was written in the Gītā that vegetarianism leads you to God. I don't know how. Because they said that the people who are left-sided, emotional people, eat more meat, which is scientifically not true. Those who are morbid people, those who are left-sided, means who have got what you can say conditioned people, they seldom eat meat. The people who eat meat are the Rajasik people, are the people who are more aggressive, more active.

So the inactive people eat less meat because protein acts as an activity.

So it's scientifically also proved. But they don't understand science or anything. These people are told that, “You must not eat meat." Finished. That's the end of it.

Now in India, out of poverty, so many people are not eating meat. By not eating meat, if you go to God, then everybody else was wrong because Kṛiṣhṇa Himself used to eat and Rāma Himself ate. Even Buddha ate it because He died because He...

A person: Buddha ate meat?

Shri Mataji: Beg your pardon...

A person: Eat..., ate meat?

Shri Mataji: Yes, He ate and He died because He ate a raw..., by mistake, a raw meat of a pig or a wild boar, a wild boar, of a wild boar.

So He was eating... and in India only the so-called Brahmins don't eat. They're called Brahmins. Because they thought this is the best way of befooling people. But not that I am for eating meat or eating vegetables. It depends on your temperament, what sort of a temperament you have. Supposing you are very aggressive is better to eat vegetables.

A person: Carrots.

Shri Mataji: Yes. Grass. But if you are non-aggressive and you get conditioned very easily, suppressed type, then you better eat meat.

Sahaja Yogi: I'm afraid we're going to have to finish it there. Those who want to, can see Mother privately for an interview, if you want to. That can be arranged later.

So can we wind it up or are there any...

Shri Mataji: Only one point I'll say about them that, what these people are doing in India is something so shocking. I went to many places, in the district places and the people like you, the newspaper people, came and said, “Mother, why are you carrying these people in the villages here? We have had enough of them." I said, “Why? What happened?" They said, “We have so many beggars now let loose. These people are now walking in the villages, you see and begging. And they are torturing everyone. Because our villages don't have so much money to look after them. At the beginning, of course, they tried." And they all bombard Me with questions that, “Why do you carry these people? They'll will also come

here as beggars." “No, no” I said, “they are all employed people. They are not beggars. Don't be worried." They can't believe it. They said, “Now, they first came as aggressors and now they are coming as beggars and troubling us." And a person is begging at your house...

A person: The hippies!

Shri Mataji: Yes. Hippies and these, also these Hare Rāmas. This is their special job and you said that, you see, they say they are saints.

So they said, “We can't even eat our food properly because they are standing at your door step asking for alms” you see. Whatever we have we give them *[UNCLEAR]* from you? A person: *[UNCLEAR]*.

Shri Mataji: Imagine! And they think they are leading a very saint life, you know. Only eating vegetarian food, they think they are very saint people. God's people are never beggars. They must have self-esteem and self-respect. If they feel insulted, then they should give up this profession.

Sahaja Yogi: Those who want to see Mother further, see Iain. He's at the back there and we'll take a step further then. Thank you very much.

A person: Thanks very much.

Shri Mataji: Thank you very much all of you. Thank you very much. I hope you convey the message so that many people get their Realisation and you don't have any more diseases, anything left in your *[UNCLEAR]*.

Sahaja Yogi: There's another thing. Mother is speaking tonight and tomorrow night and Thursday night at the

exhibition hall, exhibition building *[UNCLEAR]*. And She gives the experience after the program.

Shri Mataji: And it acts. The main thing is it acts.

Sahaja Yogi: She actually gives the experience of Self-realisation.

Shri Mataji: Yes, I do, I do, yes. It has to act. That's the difference between others and Me, at least. That much one can see clearly. It immediately changes you. Yesterday we had one cancer patient of liver. We should follow it, that case up. Now doctors have told him, “Within one month you are going to die” you see and I told him, “All right." I made him sit with his left hand toward Me and the right hand outside. He started feeling much better and healthier. And if he is cured, that's the truth.

Sahaja Yogi: And it's happened many times under medical supervision.

Shri Mataji: I've also cured our president, Sir, Mister Sanjeeva Reddy [former President of India]. If you want, you can write to him and find out about his cancer.

Question: Where is that person that had cancer that you saw in Australia?

Shri Mataji: Here in Adelaide. He came only yesterday and he felt very much better after that.

So many people felt better.

Some people had stomach troubles and some people had frozen arms. Everybody felt better. Their arms opened out, automatically.

Question: When you claim cures like that do the medical professionals oppose you?

Shri Mataji: No, I have many doctors who are My disciples now, many doctors. You see, there are so many things still left to the doctors to do. I am not interested in patients. But if they come to My program they get all right. *[UNCLEAR]* I don't go to hospitals.

Sahaja Yogi: Challenges too much within our fabric of knowledge.

Shri Mataji: No, but they won't be angry with Me, I'm sure, because they are overloaded with patients. They won't be so angry.

A person: It's very true.

Shri Mataji: You see, I am not interested in curing, but if they get cured, what should I do? Automatically they get cured.

Sahaja Yogi: Certainly the people that develop their Realisation get better. There is no question about.

A person: *[UNCLEAR]* again. *[UNCLEAR]*. We got one camera. That's what people have to do.

Hold out their hands like this.

Shri Mataji: Yes, just that. And put their both feet like this.

A person: I see. And hold their hands. That's the way.

Shri Mataji: Yes. It might work out.

A person: All right. We're just getting a shot, you see. You spread fingers, or fingers together?

Shri Mataji: Just like relaxed, you see, as if asking for something.

A person: Yes.

Shri Mataji: You will yourself start feeling. They are shaking a little. That means you work very hard.

A person: Yes, too hard.

Shri Mataji: On your nerves. Now they'll soothe down. See, the shaking is coming from too much strain on the nerves, specially the right side is shaking.

A person: *[UNCLEAR]*.

Shri Mataji: You have to forgive. You have to forgive. Forgive, forgive everyone. Just forgive. Just forgive. Still shaking. This shaking has to go; then it will work out. I'm giving your balance, raising your left side, the emotional side. The right side of your action is being fulfilled. Close your eyes. Are you feeling peaceful now? A person: Hmm. Did my hands stop shaking?

Shri Mataji: Yes, It has a little bit, still it didn't stop. *[UNCLEAR]*. Better now. We over-do things, isn't it, which you should not. Now better. See, it stopped.

A person: And how long do I need to sit here like this?

Shri Mataji: Are you feeling the Cool Breeze in the hand? Are you feeling anything cool? A person: I feel relaxed.

Shri Mataji: Relaxed? A person: Yes.

Shri Mataji: No cooling in the hand? I see, I can see the pulsation is here, now, in the center of your head. Just pray. Takes hardly anytime. Still you are shaking, you see. All right, just say, `Mother, give me my Realisation.' A person: Give me my Realisation.

Shri Mataji: Again.

A person: Give me my Realisation.

Shri Mataji: Once more. Once more.

A person: Give me my Realisation. Give me my Realisation. Give me my Realisation.

Shri Mataji: Better.

A person: Give me my Realisation.

Shri Mataji: Are you feeling the relaxation? Light, you feel light. You feel lighter.

Shri Mataji: *[UNCLEAR]*.

A person: Hmm.

Shri Mataji: You have to forgive. It's too much work. How many years you have worked like this? Days in and days out worrying, for what? Everything is done by God. He does all the work. Now it's better.

A person: I feel tingling in my hand.

Shri Mataji: Tingling is not a bad sign. But it means it just started. It is moving all right. This is all right. Is it all right? This one is all right. This is still tingling. But this stopped shaking. Better. Better now. All right? It works. It works. It works. Now you can't think. Just watch Me. You can't think.

A person: I can think.

Shri Mataji: When you want you can think.

A person: Oh, yes.

Shri Mataji: But now you can be beyond thinking also.

A person: Oh really? What's...?

Shri Mataji: That's it. No worries. All right? A person: All right.

Shri Mataji: Feeling the cool? A person: Let's do the interview and then see if I relax out.

Shri Mataji: Oh, yes, yes. You will. You will relax much more.

A person: Will it be like Chris? A person: Mother, this is for people watching now. What can there be in this for them?

Shri Mataji: What is?...

A person: What have you to say to the people who are watching this on the television on the moment?

Shri Mataji: Those who are watching at this time, they have to just spread their hands like this towards the television set and see if they feel any Cool Breeze in their hands. If they feel it, they should know that this is the Power of God's love, is the All-pervading Power about which everybody has talked.

The time has come for all of us to achieve it. This is the epitome of our evolution by which we will found out our Selves, our Absolute, our meaning, our purpose of life. The first time you feel the All-pervading Power, which is doing all sorts of living work, like transforming a flower into a fruit. All this is done by God. What we do is the dead work, is transforming dead to the dead. But God does all the living work and first time you start feeling this Power and then you have to learn how to use it for doing living work on this Earth.

Question: For the people who extend the hands towards you now on the television set, can I expect Self-realisation?

Shri Mataji: Yes, of course.

Question: And from there is a by-product health?

Shri Mataji: Yes, health, of course. They can...

Interviewer: Healing?...

Shri Mataji: Yes, of course. But they have to see which hand is heavier, which hand is not heavier.

They might get, all of them, spontaneously, Realisation, but they have to come to Me to know how to maintain it, how to understand it, how to give it to others. Because God is only interested in those people who are going to work as lights. We do not keep enlightened lights under the table.

So such people will get their Realisation very fast if they desire it. Desire is very important.

Question: So there are some people watching at this very moment who are receiving that?

Shri Mataji: Yes, of course. It's all over, it's all-pervading. It's like your ether through which they are seeing the television now. In the same way God's Power is everywhere. You can feel it.

Question: And it doesn't have to be that these people will be with you. They can do this by extending their hands towards the television set or the photograph.

Shri Mataji: Yes, My photograph is there. That's sufficient to work it out. That's sufficient to work it out. But they have to come to Me to decode it, what it is, how to feel it, what's the problem is. Because at the very first outset, I've seen, it rushes out and the whole thing you can feel very fast. But then it goes back to the problems that you have.

So it is better to see that you learn all about it. And you don't have to pay anything, nothing of the kind. It's very easy. It's nothing difficult or complicated.

A person: All right. Thank you very much. All were happy with that. What we do? We got enough? Another person: One more shoot.

A person: There will be one more shot.

Shri Mataji: One minute. It was probably more than that.

A person: It was a little bit more all that. Now we'll better check if they are both back shaking again.

Shri Mataji: Still shaking. See what you are doing to yourself. You must learn to relax.

A person: Hmm. Working too much.

Shri Mataji: Yes, too much. You are working to hard. You can clearly see. Why should they shake? You are a young man, I'm an old woman. See now how much they are shaking. Just see this. This is not good.

A person: At best, learn to relax a little.

Shri Mataji: Now you have to use My photograph. That's the best way to relax. You can put My photograph in front, put a light before it. Put your hands towards the photograph. Put both your feet in the water and little salt. The whole thing will go in the water. And ush it out that water. You find everything all right. He's got it, I think. At the top of his head, he's got it, but his hand are heavy. First we have to talk to all kinds of people also, you see, catch from them as well. Do you smoke? A person: No.

Shri Mataji: Hmm. Then it should not happen. It's only nervousness.

A person: Hmm.

Shri Mataji: Better. You're feeling it. Yes, is there. Yes, is there. Little balance I put within you.

Too much working with your brain and very futuristic and a speedy person. All right? Now, better.

A person: Yes. I thank you very much for talking with me.

Shri Mataji: Thank. I hope you'll communicate to the people. Let the Australians get this. This is their right to have it.

Sahaja Yogi: *[UNCLEAR]*.

A Person: Yes, sir. She did tell us *[UNCLEAR]*.

Sahaja Yogi: Thanks a lot.

A Person: All right. Thank you very much.

[At the end of the press conference, it starts raining.]

***Contents: 1983-03-08*, Public Program, Day 1, Melbourne, Victoria, Australia**

I bow to all the seekers of Truth.

We have to understand that God has created us as human beings with a purpose. But in those modern times when we don't even believe in God, or on a, in a creator, or any such energy that exists, it's very hard to talk of God and to introduce him to be the one who has made us human beings. But even Darwin said that if man has come so far he will have to go a little further to understand himself. I would suggest that one has to only understand one point, that whatever we have so far known, has been the knowledge of the tree but we have to have the knowledge of the roots. To get the knowledge of the roots, we have to become subtler than what we are.

This awareness, this human awareness, cannot take us that side. For example, you are all listening to Me very

intensely, but if I say “please take your attention inside” you'll say “how, Mother it's impossible.

How do we take our attention inside?" It's only possible when something happens within you that your attention is drawn inside, then only you will come to know that you are a beautiful instrument made through ages.

All these centers that are shown here represent your evolutionary process, one by one, how you evolved through ages to this stage of evolution and now after evolving, after the human stage, what do we have to do? So we come to right conclusions about ourselves first of all, that we have to become something more, something has to happen to us. Now so far in our evolution whatever has happened has happened in our awareness, Sanskrit called *[UNCLEAR* Chaitanya], means a horse can go through a dirty lane, a dog can go through a dirty lane, but a human being cannot, he just can't bear it. He'll vomit, he'll refuse, he'll not accept at any cost to pass through something very filthy.

So our awareness towards dirt, filth, towards beauty has definitely got a new dimension and this new dimension that we have got is not sufficient enough because still we have not understood why are we here. Why all this has been done to create us into such a beautiful personality. What is the purpose of this creation and in this confusion only we really fall into the traps of not understanding that there must be some power that does it.

It is very easy to deny the power of God because, who is there to challenge it, or who is going to say that, how dare you deny.

Supposing you have a policeman. He's elected by you, so you cannot overthrow him, or you have to listen to Him. But God is not elected by you, He is appointed by Himself.

So as He is there you can always say whatever you like about Him. But the same thing is to understand that actually human beings don't do any work which is living.

We cannot transform one flower into a fruit, even one. What we do is to take some dead things, make buildings, make beautiful furniture, make these carpets, all man made, every sort of thing and then we start thinking, “Oh, we are great." Even the science can only find whatever is available or can be seen through these eyes, or felt through these senses. It cannot go beyond it and even if it sometimes goes like the auras and all that they see, they cannot explain it. For example if, if there is any doctor, they will understand that, doctors are honest on this point, that acetylene and adri... adinaline adrenalin [aciticoyline and adrenaline], two chemicals which are chemicals, just chemicals, react differently in the body and they say that the mode of action of these two we cannot explain why it is augmentation or why it is relaxation. They admit it.

So many things we have not been able to explain. Now if I say this is a beautiful instrument and it is fantastic to believe that we are great, I would just give another simple example that if you have to come to this room and there is no light, I just tell you alright, push that button and you will get lights everywhere. No, it happens, it becomes a fantastic thing for a person who has never seen electricity, who has never known

anything, who has no knowledge of electricity, that only you press one button and you get it! But behind all this organism, behind all this working, all that is done, there is a big history. There are lots of people who have worked to achieve this. People have sacrificed so much to achieve this, but we are taking the benefit of that as, today we are enjoying electricity. How many people must have died discovering it. How many people must have sacrificed their life for disc..., for discovering the use of it for the masses.

In the same way we must understand that maybe that we are something fantastic, reach a conclusion that we have to just feel it. And unless and until you feel that greatness within you, you should not just deny that you can achieve it, you have to achieve it. Actually, if you do not achieve it you will fall short of your evolution.

Today in the world if you see every where I go there are so many seekers, so many seekers, such a time was never there before, say about fifty years back we did not know the word `seekers', people did not believe that there are seekers. But today you will find so many seekers all over the world, they have gone to all kinds of other alternative things, they have tried to find out if they can find truth by altering their lives by doing this or by doing that. The reason is they are not at all satisfied with what they see, they're intelligent enough to see that it's not the end of our lives and we don't live just for insurances. Now, then one starts thinking that if these are the seekers in this world, why so many have come on this earth. This is a special time already predicted

thousands and thousands of years back, in every kind of prediction they have talked about you.

There was a book called NĀdi Granth written, you can't say how many years back but was revised only three hundred years back by another person called Bhujander. Now this NĀdi Granth, is written by a person who is actually the starting point of astrology in India, the one who started the whole astrology has been started from India and this is the man, Brighu, who did it. And he wrote this NĀdi Granth, in which he has described, according to him, he said it in Sanskrit language but was again translated and brought to up to date level, that in 1970 something will happen, a personality will come on this earth who will give realisation to thousands of people by a Sahaja method, it's clearly written down you'll be amazed to know that it is so, because we have a book, in that book all these prophecies are written and what will happen, the Kuṇḍalinī will rise and people will get their realisation.

To Indians Kuṇḍalinī is not a new knowledge. Of course, there are some people who went from, ah, other countries and tried to study about Kuṇḍalinī. Now when such people come to India they do not reach the roots at all, they are just caught up by people who want to make money out of them or to mislead them, it's a big market there for all such things. And now when these people also came, specially the Germans when they came to India they were caught up into such mess and they were given books which were nothing but just the opposite of what Kuṇḍalinī is, it's about the people who are doing Tantrism and Tantrism is a system in which people do anti-God

activity, with anti-God activity you get all kinds of horrible experiences of God and the Kuṇḍalinī and they have described all of them as if they are the real effects of Kuṇḍalinī. Is like the knowledge of a naive villager coming and putting his hand into the holes of, ah, a plug and saying that electricity gives you a big shock.

So it is even worse than that because Kuṇḍalinī never gives you trouble, She is your mother. She's settled down here in the triangular bone, as you see is called as sacrum. Now this sacrum bone is, sacrum means sacred and when I ask people that, how is it that this bone is called as sacred in Greek? When I went to Greece, I asked the people “why do you call this a sacrum?" Then they told Me that they had a *[UNCLEAR* report] long time back, before Alexander went to India and there was a *[UNCLEAR* report] between Indo-Aryan groups and they told that this bone should be called as sacrum. Now imagine that this bone specially should be called as sacrum and no other bone, so this bone has got this three and a half coil energy settled down inside there.

Now some of these books that I've read, such big books written on Kuṇḍalinī, some of them say the Kuṇḍalinī is here, somebody says in the nose, somebody says somewhere else. Means that just, just using the ignorance of people to print something, write something and just mislead them to make some money out of these books.

So far I've not written any book, I am sorry I've not yet done any that work so far, but anything can be written in the book. Whatever is written in the book is not the truth and you should not accept it, how much does it take to

print a book? You people are living in such an advanced country you know it hardly takes anything to write a book about anything especially about God and his work, because even you will be amazed, that Hitler used to talk about God, Napoleon used to talk about God. All these horrible people used to talk about God and sometimes they believed that God was in their favour because they thought they were rather successful.

Now these books or whatever they have told you, is not true. This is the truth that the Kuṇḍalinī lies in your sacred bone called sacrum. You can see the pulsation of the Kuṇḍalinī at the time when the Kuṇḍalinī is raised, not in everyone. If you have got a blockage in that another center that is there or the opposite *[UNCLEAR* upper] center. Then this Kuṇḍalinī, because this is the pure desire of becoming one with God. This is the purest desire we, which you have and when it is awakened it makes a effort, a tremendous effort, but I have seen some people have Kuṇḍalinīs which are just hurt like a beaten up snake, you see, it just toss, it tosses itself on all the sides and tries to get out but it cannot because the gentleman, or the seeker, who has got this Kuṇḍalinī within himself, his own Mother, has hurt Her so much that She cannot raise Her head, She is very tired and She wants the supply of more energy to rise.

So when people are here I have to tell you one thing that it's nice that you have come for realisation, you should take it! But you can't demand it, you can't demand it. For today I found one gentleman was just shaking before Me like this all the time, so he said “Why am I shaking before you?" I said “Because your nerves are out, you are a

nervous person, that's why you are shaking. All your nerves are out, I have to steady them otherwise the Kuṇḍalinī won't rise and you won't feel the Cool Breeze, because Kuṇḍalinī is now attending to those nerve centers which are absolutely over-done, they are absolutely fagged out and tired." He's a young man, about twenty five years, I am an old woman, but I said “Look at My hands I'm not shaking, why should your hands shake like an old man of eighty years all the time? You must think about it, why should they think, ah, should happen." So this is what it is, that some people get it. Most of them get it but some cannot get it. Now the attitude should be little different from what you have towards anybody else. Here you have to get something out of Me. You have to make use of Me. Not that I have to use you for any purpose whatsoever.

It should be clear-cut to you, that you are asking for something, you deserve it no doubt, it's like you go to the bank alright, there's a banker sitting there, if you have some money in the bank, you can go and talk to him but you can't be rude with the banker, you have to say alright, “I have got this money with you, please may I have?" Now the Grace of God is so gracious that it gives you many for much more than what you have really reserved in the bank, I can see that working out so well.

So we have to understand that we are made in our own glory, God has made us a fantastic thing. We are a great instrument that has to receive its blessings and as this instrument is put to the mains, once you put to your mains you will be surprised how fantastic you are. It's amazing how people are not aware of themselves. It is

amazing how people do not know how precious they are to the Divine. Human beings are the epitome of this creation, forget the moon, forget the sun, forget this earth, everything is nothing, it's at your feet. You are the highest that God has created and the way we fritter away our life for nothing at all, for superficial things, is something very, very surprising, we are not at all aware that how much the nature has worked for us, to make us human beings and once you realise that you are the spirit, realise doesn't mean that you just realise through a mental process.

It is a happening within you which takes place. You become that. And once you become that you'll be amazed that your becoming will prove that you are really the epitome, you are the meaning, you are everything and without you the creation has no meaning at all. It's like a tree which has now the flowers and they have to become the fruits, otherwise the tree has no meaning at all. But whatever we do mentally is artificial. Because it has no roots attached to it, it has no moorings to it. Now your, say, your politics or your economics, all is artificial but in that also you can find a lot of truth. For example, economics says that wants in general are not satiable. Individual wants can be satisfied. But wants in general are not satiable. Means this matter cannot give us satisfaction. If it could then we would have been satisfied with one thing, but we buy one thing then we buy, want to buy, another thing and then we want to buy another thing and still we are the most dissatisfied souls ever living on this earth.

Now economics another, then politics; we can see is that people talk of say communism, they talk of socialism, they talk of democracy, of capitalism. Is all so artificial to Me, is just a play of human beings because when you say you are a capitalist, what is your capital? This you can't take with you, it is of no use, you don't want to share it, what is the use of such a capital? While I would say I am a capitalist because I have all the powers within Myself and I am the greatest communist because I can't live without sharing it. I just can't help it. You see people can't understand Me. They think: you are a nicely married lady, your husband is such a nice person, ah, is such a nice gentleman, he loves you so much, he cares for you so much. You are a grandmother, you are a mother and why are you doing all this and running about everywhere talking to people? They can't understand this communism which is so important to Me that I cannot get My joy without sharing it with others. Is something which people have to gradually take in and once they take in they become themselves.

It's My job that I have to give you what you have. It's your own, I do not do anything about it, is your own; all you are built in that way. Only thing what I do, like a candle which is enlightened can enlighten any other candle which is ready. But some people will escape saying, “I'm not ready." Now, you let Me find out if you are ready or not. That's another side of it. “Mother you are, we are sinners, we are not ready." Now you let Me do the job for you. I may be able to put the candle right. Why do you condemn yourselves? This is the other side of it.

Sometimes people get into ego moods and sometimes they get into such a superego mood that they say" Mother, oh, we are no good, we are sinners, we have done this, we have done that." Now forget it.

If I don't know the job then I better not do it, but I think I know it, I have done it, so let Me do it and let us see if I can give what you have because that is supposed to be God's promise that you have to get your resurrection, that you have to become Self-realised, that you are to be born again and all this has been done within you with this aim and is not to be wasted.

I don't know how many in Melbourne are going to get it, how many are going to get in Sydney, that's besides the point, it depends on how much you care for yourself. But wherever I go I will try My level best to do it. Now how I cure people and what happens; actual curing is not at all My job, it's just a by-product by which you get cured completely. Because once you get your absolute and you get to the source which is all-pervading which is, which starts flowing through you, then your problem is solved. You never get exhausted, you never get upset, it's all solved. The whole energy works it out.

So the compassion that people talk of "that we are very compassionate and we are very peace loving" and all that is so superficial.

This is the compassion that it works. It works, it doesn't talk, it just works. This is the peace that exists, that you feel is expressed within you and without. A person of that calibre if he stays with other people who are turbulent, who are, ah, volcanic, who are violent, they become

peaceful. It works, that's what it is, you must know that whatever people are saying to you, it must work.

Like going to other Gurus, to other people, you should know that it has not given you any power of your own, leave alone whatever they have to say about Me, I am this, I am that, I am that, forget it. What I am saying, what are you? You have to receive your own significance. You have to understand your own meaning and if it works in you then it's alright. That's what you should ask anyone if you go to and say that “can you give me my own powers, not your powers?" You may be very great and you might be doing something. But people are so ridiculously superficial, so ridiculously superficial that a person if he buys 58 Rolls-Royce out of the money, of loots that they have out of these, ah, people who go to them, we think “Oh! he has 58 Rolls-Royces." He, such a man can impress these English who could not be impressed by anything else. If he has a big *[UNCLEAR* cavalcade] or a big procession or these 58, ah, looted, ah, Rolls-Royce on the road, then people say “Oh! what a Guru he is, he's got 58 Rolls-Royce." Yes, you won't believe and he wanted to have the 59th one and he went away to America. And he wrote a letter saying that if you give me the 59th I'll come. The poor boys you see, they suffered, they ate only potatoes, they starved themselves, they have, they are 50,000 still in the UK, absolutely cabbages, lost people, absolutely lost. You can't talk to them, they shake when you go before them, they can't understand that it is all finished there. Nothing, they are all lost people and if you go and tell them “How can you get a Rolls-Royce for a Sādhu, he's a

Sannyāsī he says, how can you give him a Rolls-Royce?" So they say “We have got the spirit” means some spirit has possessed them you see, “we have got the spirit and we have to give just metal. What's in Rolls-Royce? Is metal." But why don't they think, why does the Guru thinks that this metal is precious you see, we don't use our brains at all when you go to Gurus, surprisingly.

If he says I will make you fly, alright at least you should ask the Guru to fly. Why not make him fly and see if he can fly or not. At least minimum of minimum that he should do isn't it? But that we also never do, we just accept it. Because he has a big, ah, organization and he has a big publicity, because you can pass through seven rooms to reach him and all that, he creates a feeling and then you think `Oh, it's great to fly,' and if somebody says that go and ask that Guru to fly, people don't like it. They don't want to hear anything about it and then you pay thousands and thousands of pounds to them, you end up as penniless people, as epileptic people and you can't understand what wrong it was. You didn't use your brains. You didn't use your brains I would say, I know. I must condemn all these devilish people who have ruined so many seekers because they are seeking truth, they are My children, they're My own I know. I feel very sorry for them, you don't know how much I want to work that I should save all of them, but I also should tell you that this is your mistake, you misunderstand, you don't know that you can't pay for your realisation, you can't pay for God. Christ was bought for 30 Rupees. Is a very good example to understand, he was bought to be killed. Another example is that when people were selling some

things in the temple he took a big whip and whipped them absolutely in a great temper; who, who said on the cross that “Please God forgive them for they do not know what they are doing." But now it is so sad that if you do like that you won't be able to forgive yourself. Christ may be, but you may not be able to forgive yourself for doing all these mistakes and committing such horrible injuries upon yourself and troubling your Kuṇḍalinī to that extent.

This Self-realisation you have been seeking for ages, many lives. You have been seekers for many lives and the time has come, this great time of resurrection, the great time of your judgement. At this time you should take it, take it up that you have to be Self-realised. Only, this is My message to you, I hope you will understand it.

May God bless you.

I would like you to ask Me some questions because today is the first day, but ask relevant question.

Some people you see just ask questions, just to show off. Then I would say they should take another hall to give a lecture there, but normally, ha ha ha, yes, yes, some people start giving another lecture to Me, you see and instead of My lecture I have to listen to their lecture which has no relevance to it.

So I would request you not to waste others' time, be civil to them and ask questions which are relevant to the subject.

Thank you very much.

Warren: Right, any questions? Each night Mātājī is going to be speaking here.

Shri Mataji: Keep the cane on one side. [Laughter.] Warren: Each night Mātājī is going to be speaking here, She'll be talking tomorrow night about the centers that lie up to the heart and the next night the centers that lie to the Sahasrāra, in particular the Chakra of the Sahasrāra.

So, any particular questions about the individual centers within us.

Shri Mataji: You can ask...

Warren: She'll be explaining on a day-by-day basis.

So any questions thus far? Question: I want to know if having a vertebrae in the spine out of place interferes with the rising of the Kuṇḍalinī? Warren: [repeats question to Shri Mataji].

Shri Mataji: It does, to some extent it does, definitely it does, but we can put it right. The vertebrae can be put right and the Kuṇḍalinī can be brought up. It does.

So many things do happen, if you have, if you are a person over read, if you have read too many books and the books are in your head I have to empty that also. [Laughter.] Warren: I actually do this work as a profession and I find that if the subtle center is fixed, the spinal problems just disappear. I used to have three and four adjustments a week, to correct my spine and now I have none at all.

So first fix the subtle within us and then the gross part, the spinal misalignments and so on, will just get better.

Question: Do you feel there can be a difference between marriage that people can be married on earth in a seemingly holy way but there is really a difference in the

marriage itself, you know, in the getting married, so-called marriage?

Shri Mataji: I think there...

Warren: I'm not too sure, but, earthly marriages which seem to be OK, but, are you saying a mis-marriage of souls?, Perhaps, but maybe there is some sort of mis-marriage in some way of souls of those same people. Can there be a perfectly `normal' as we call it, earthly marriage and perhaps a mis-marriage of souls?, in a heavenly sense.

Shri Mataji: You see the spirit in every being is perfect, everybody's spirit is perfect, there's no imperfection with it but some people have a more reflection of the spirit in their character and some people don't have. They have more darkness and more we can say, outwardly or materialistic you can call them, or you can call them the over, romantic type, any sort of thing which is outside. But doesn't matter we have seen people who have been married before, they said they are maladjusted. I would say 90% such marriages are now doing well. But maybe, there could be terrible difference also between the two persons as you say is possible, but that is to be seen. Just now you should not worry about it. If there is any maladjustment, it might be put right, if it doesn't work out then you have to work out the correction as far as possible. See it is said [Sanskrit] is that which we can do the work, we can work it out as far as possible but if it doesn't work forget it, that's it.

But once you are a realised Soul you become so congenial, so tolerant, so understanding. Actually your being itself corrects another person. But maybe some

people can be such gone cases, that whatever you may try they may not come back.

So it is not important to worry about those things, we'll see later on how the thing is and how it has to be worked out, alright? Question: Could you please explain more about the realisation process when it comes out of the top of your head.

Warren: Could you explain Self-realisation and in particular how it manifests on your hands and how it comes out of the top of your head.

Shri Mataji: It just comes out, [laughter] you see how do you explain, how does a primule of the germ of a seed comes out. It's like that. It's a living process, as I said, the Kuṇḍalinī rises and when She enlightens all other centers She passes through them and then when She comes up here at this point, [puts Her hand on the Āgñyā Chakra] this point is very important in human beings is bestowed or, we can say that, it is governed by the deity of Lord Jesus Christ and He sucks in these two institutions called ego and superego. By that there's an opening made and the Kuṇḍalinī just jets out and you can feel it coming out of your head. This is the actualisation of baptism, it's not something artificial that you take water and put it on somebody's head and say that you are baptizing, here the child is screaming with that baptism.

So it's an actualisation, it's a living process, how it works. But while rising of course lots of things happen like, ah, the Chakras go into various moods, ah, they try to sustain the Kuṇḍalinī, they try to keep it there, all these things happen.

These happen when the Kuṇḍalinī is awakened, not before that. That's why like somebody talks of Rāja Yoga that you cut your tongue, push it back and do the *[UNCLEAR* kayjari] and by that you can raise your Kuṇḍalinī and it is absurd, you see. Like the car has not started so you move the wheels and the car will start. But when the Kuṇḍalinī is rising this tongue is little bit pulled inside no doubt, automatically, you don't feel it also, slightly it is pulled inside and is released again, but by cutting this tongue and putting it back do you think the Kuṇḍalinī will rise? Is so superficial, it's so artificial and that's how they have done all these things. Even now, for example Haṭha Yoga that we do, is, of course Haṭha Yoga is ashtanga is, not only one we call as Yoga is standing on your head. Is not the only thing it is ashtanga, *[UNCLEAR* that main thing] and in that also Īshwari pranadha means establishment of God is the first thing. Because before the Kuṇḍalinī has started if you start doing any exercises you will be harming, you may be harming yourself. Because you don't know where is the problem. Supposing you have a problem in the stomach and you are doing the exercises of the nose, what's the use? You will spoil the nose as well as the stomach is already bad.

So it's very indiscriminate. It's very scientific. The mantras are the same thing, where you say which mantras, what Chakras are catching, which deity is to be awakened, we must know all the signs that we have and everybody knows, there is no secret about it.

There is not a thing, you come here inside and you pay, pay me 300 pounds and I give you a mantra, alright that mantra you are not to tell anybody because that mantra

means nothing you see. There was a fellow who paid 300 pounds and I asked him what was the mantra and he said “tinga." Now if you tell an Indian he will just laugh if he hears, what it means, it means this [puts Her thumb up]. Can you imagine, such nonsense and don't tell anybody, it's a big Mafiā. Don't tell anybody, just keep quiet, if you tell anybody then, because you are found out. You cannot give one mantra, is a, another, ah, funny idea people have that you just give one mantra to somebody. Of course I mean if you have a problem at a particular point one can say that at this time you say this mantra to clear out but then later on you don't go on with it. Then you do the one which ever you need, require. Isn't it? Is as simple as that.

Supposing you are suffering from some trouble we take medicine for that particular thing and then when we are suffering from another trouble we take another medicine for that particular thing. We don't go on taking the same medicine whether it is anything.

So it is a very scientific knowledge which you will pick up in no time. Eight days are sufficient to learn the whole of Sahaja Yoga. Once you get your realisation, that's the main point.

Question: Does meat eating interfere with all this process?

Shri Mataji: What is it? Warren: [repeats question].

Shri Mataji: No, no, no, not at all, but you see, you have to understand what sort of a personality you are. If you are the right-sided personality then you should not eat meat, you should take to something milder you can, you can, I call them grass eating, you can do. But if you have

say, you are left-sided person, then you have to take meat. You see, I would say in general that Australians should not eat so much meat as they eat, they eat meat too much. They should take more vegetables. But Indians should eat some meat because otherwise they'll become cowards.

So it is what sort of a personality it is. I don't know from where this idea has come that vegetarianism is going to take to God. In India most of the people are vegetarians because they can't afford it you see.

Question: No, no, no, I don't think that our attitude here is to take to God *[UNCLEAR]*.

Shri Mataji: Ah, yes, but it is not important for everyone. What I'm saying, as it is we have to understand, we have to be discreet, we have to understand who needs what. Everybody need not take to vegetarian food. Every body need not take to non-vegetarian food. It's the prakruti as they call it, is the nature of the person. You must find out what is the nature of the person. If he, supposing he is suffering from high blood pressure and other things like that he has to take to, ah, food which is, ah, which will control his, I mean which will give him a, another side. Means he should stop eating meat, some things like that. Alright, so he, he balances himself. To balance himself. The whole food is a theory, is to be understood through the understanding of your being first of all, what sort of a being you are and what is lacking in you is to be supplemented.

So we just can't, ah, say that now so many people now, in doctors if you go to them they'll say “cut down your sugar” general. But is absurd! Sugar is very important for

liver. If you don't take sugar I don't know what will happen to you, you will become like sticks, you see, absolutely like sticks. If those people who are right-sided if they don't take sugar at all I don't know what's going to happen to them. They will be very irritable, hot-tempered, absolutely stick-like people. They'll hit you like a stick, you know.

So that's something, a general statement like that is very dangerous. Just not to have, but what is the science behind it? Carbohydrates are very important for the body, especially if you are thinking too much, if you are a futuristic person, if you are right-sided it's absolutely essential that you must have sufficient carbohydrates. We have treated so many liver patients with sugar, so this kind of a general statement even, sorry for it, I must say that doctors should not feel hurt, but is a very general statement doctors also make. No doubt about it, without going into it to find it. It's very easy to say “now you all should stop sugars." Why? Our forefathers ate sugars, they were healthier people than us, I tell you. All of us are sick now, this way or that *[UNCLEAR]*. If physically you are alright, mentally we are out. If we are mentally out, then we think that physically we are alright.

So we have a satisfaction I think, both are just the same.

So we have to be discreet in anything that we do. It cannot be a fad, it cannot be an `ism', it cannot be a hard and fast line. You see all made for you, God has made everything for you. You must understand what we should eat, what will suit us. That is to be found out on a person, what sort of a personality he is. In our Sahaja Yoga many people take to vegetables and many people

have to take to meat eating. And by that they will improve their health very much. He is one who was suffering from high blood pressure, God knows how many things. He just dropped it like that and he keeps low on meats I think.

Question: *[UNCLEAR]*.

Warren: Do you find that more people today are sicker, in general, than they were fifty years ago.

Shri Mataji: No doubt.

Question: Why?

Shri Mataji: Because a time has come, to see, this is a time you are born for it. Many children are born realised these days, so many children. Now we have in our ashram, about nine children, very beautiful ones, all born realised, absolutely they are. You can talk to them better than you can talk to, ah, even a very well educated person. When I talk to them I just find I am just one with them.

So this is the time, the resurrection time, this is the time that is the last judgement and that's why so many have taken birth for their judgement, alright? Question: *[UNCLEAR]*.

Warren: She's asking whether more people are sicker today than they were fifty years ago. But I, the question is obvious, I think medical science and statistics have proven this, so I don't think there's any question there.

Shri Mataji: No, no, but what's she saying, physically? Warren: You want to know why, she wants to know why...

Shri Mataji: Why they are physically sick, is it? Your judgement... You see they are physically sick because

they have lost their roots, they have gone to extremes and imbalances. We cannot go to imbalance, you see, religion is to keep yourself in balance. There are ten religions in the human being, like ten valencies, as carbon has four valencies, we have ten valencies about which all the primordial masters who came on this earth have taught. Like Lao Tze, like Socrates, we can say Abraham, Moses and many in India also. They came and told us that we should keep the balance. Balance of our life. Keep in the center, for the ascent. If you are not balanced you cannot ascend. But people have gone to extremes. They are faddists. Whatever you tell them, if you tell them that see, now you are not well, so you do something, they will do it so much that they'll outwit everything. They'll always go to the extreme of everything.

So, that's how the problems are there. But doesn't matter. But moreover we are sick because we are seeking.

Because we are not satisfied. We feel unhappy, we can't sleep, we don't know why we are living. Is the other way round. We are not seeking because we are sick, but we are sick because we are seeking.

Question: Why is the Kuṇḍalinī identified as the female form?

Shri Mataji: Why...

Warren: [repeats question].

Shri Mataji: Because it is the Power of God and God is regarded as He and the Kuṇḍalinī as the Mother. He as the Father and the Holy Ghost as the Mother. She's the Holy Ghost, so because He's the Father, we have to have

a lady with Him so we call Her the Mother and one should not feel bad about it, men should not feel bad at all because you all had a mother. You could not have come on this earth without a mother. You just can't help it, that's how the nature is. You have to accept the fact. Mother is a surety isn't it? Yes please? Questioner: [tells Warren a question].

Warren: Do you have a Guru and at what stage did you receive Self-realisation?

Shri Mataji: I neither have a Guru nor I want you to have a Guru, you better become your own Gurus.

Secondly I've been born like that I never got any realisation or anything I just got realisation, I should say human realisation when I understood what was the problem with human beings, I worked on the, all permutations and combinations of human beings because I wanted to have an en masse medium by which I could give realisation to thousands of people because any discovery which is made and is not brought to that level, it is absolutely detrimental to the growth, for example ah, you see Jesus was crucified, why, because he was alone, only for his mother, nobody knew what he was and that time he could not achieve this because you all were not there at the time and also other people you know how the saints have suffered how every prophet has suffered because they could not create a mass understanding of it so at a certain point it has to become a mass thing. In the tree of life there are only three or four flowers in the beginning but when it grows when the blossom time comes then so many flowers are there and they become the fruits.

So I, I just saw that this is the time I have to do this job, so you would call it My human realisation when I understood human beings of course even now sometimes I get shocked the way they behave I mean I just don't understand, but I think now I understand them.

Warren: For those people who can't quite understand that answer, don't think about it too much.

Shri Mataji: Theres another gentlemen who was asking a question.

Warren: Mother has to be somebody special but find out for yourself that's the best way.

Shri Mataji: You don't worry about Me, you worry about yourself [laughter], I must be someone alright even if I'm not doesn't matter if you are going to get it why not have it. The gentlemen there...

yes please.

Question: *[UNCLEAR]*.

Warren: No, tonight she just gave an introductory lecture tomorrow night and the next night she will cover completely the subtle body.

Question: *[UNCLEAR]*.

Warren: The whole system.

Shri Mataji: But You shouldn't come late tomorrow.

Question: What if you can't get the three days.

Shri Mataji: What is she saying...

Warren: If you can't get the three days and you seriously want to settle into it, the film is being taken.

Shri Mataji: But why are you worried... let us see for the present why should we be in the future? You will get it, why not? Why, what makes you, what makes you think if

you don't get it, you are not going to miss it, we have people here, we have luckily an ashram, a beautiful place, you'll like it, can go there, they will give.

Question: What's the first step to Self-realisation? Warren: What is the first step to Self-realisation?

Shri Mataji: There is nothing like first second, it's not a course you see the Kuṇḍalinī it's an awakening within us which takes place which is like a living process alright so the Kuṇḍalinī rises and shoots off here [puts Her hand on Sahasrāra] now some people feel the Kuṇḍalinī wobbling down there down below [puts Her hand behind her back] some people feel it in the stomach some people feel it here [puts Her hand on center Heart] some people feel it here [puts Her hand on center Viśhuddhi] but most of them feel it here only [puts Her hand just above the Sahasrāra], jutting out like Cool Breeze.

So you just can't say what is the first step, depends on how it rises.

So everybody doesn't feel the same way, so I can't say that this is the first stage, alright of course first you feel thoughtlessly aware, you become thoughtlessly aware, first thing that should happen to you when the Kuṇḍalinī crosses this center [points to Her Āgñyā Chakra].

When it comes out of it you start feeling the Cool Breeze here [puts Her hand above her Sahasrāra] and you start feeling the Cool Breeze in your hands, you start feeling the Cool Breeze around. That's the second stage when it can do but some people really are so great that they become absolutely doubtlessly aware, what we call as Nirvikalpa. They achieve that, some of them are really they are just there, they are so beautifully made that

they just become that, there's no question left in their minds. But they become so powerful I'm amazed sometimes how they become so solidly understanding themselves.

So there are some people, I know, who are very, very great and they just start emitting vibrations, they start giving realisation, they start, ah, curing people, they can do it! So don't condemn yourself in any way, that's first condition in Sahaja Yoga.

So should we now have Realisation? Those people are sitting very much behind should come in line with others, will be better idea. Yes, just move in, as much as possible, nearer.

Warren: If you just slip your shoes off it helps you to.

Shri Mataji: Yes, it is much better, because this Mother Earth helps you. Better to take out your shoes, will help. If some people want to sit on the ground also it's alright, but you should not be very far away because, it's better to attend to them, alright? If there are chairs here, yes.

Warren: There are plenty there.

Shri Mataji: Mm Good.

Warren: There are plenty of chairs here.

Shri Mataji: The children can come here, come along, come and sit here, there's a lot of room for the children. Children are the best, I'm very happy see them, here. Alright, come along, sit down, sit down.

Please come along, look at their confidence. Sit down. Aah, great.

Warren: Just slip your shoes off, huh?

Shri Mataji: Just slip off your shoes alright? Great people, mm, you too, you too, yes please, take out his shoes, just help him, you see, look at him, how he's alert. There are so many children as I told you are realised Souls. And we have to understand them. Alright.

So now you have just put your hands towards Me like this, simple, put your both the feet on the ground.

Touch the Mother Earth with your feet. Just. And be relaxed. You are not to do anything that will make you tense. Means, if you have anything tight here, or tight there, just loosen it. Do not tighten your body also too much, don't push back your head, or push forward, just be in a relaxed way, sit straight.

Put your hands towards Me like this.

And as I said the first condition is to say that `Mother I am not guilty,' at least sixteen times. Is a punishment for people who feel that way. Before we start, let us tell ourselves that we are not guilty because I am talking of God Almighty. He is the source of all Joy, but He's the ocean of Love, He's the ocean of forgiveness, He's the ocean of compassion and what mistakes can we commit? So don't start with your guilt at all. You are all God's people, you must get your Realisation.

So just tell yourself, closing your eyes, in your heart `Mother I am not guilty,' say sixteen times is the best way because there are sixteen petals here and this is the center gets blocked if you feel guilty. Please close your eyes and don't open your eyes till I tell you. Now, just close your eyes, see. Do you feel the Cool Breeze in your hand? The children? Yes, that's it, the children are already feeling, it's all born-realised.

[Aside:] Look at that. We should have brought our children also, so sweet they are.

Are you feeling? Good. You are all realised Souls, that's why you've come here. Now, the left hand, as I said, is the power of desire so you put it towards Me, left side. That means you have to desire your Realisation. Keep it comfortably on your lap, it's alright. Now the right hand represents the power of action, so we have to use right hand to symbolically suggest our desire through this action. First of all put your right hand, don't open your eyes, please don't open your eyes at any cost, that's important because if you open your eyes the Kuṇḍalinī won't rise above Āgñyā Chakra. Now put your right hand on your heart. Don't worry about anything whether you are going to get it or not, but just put it, put little, sit a little straight, you should not, ah, slouch down, yes. Put your, please put it on your heart. And now say in your heart, that `Mother, am I the Spirit?' Ask a question. Because Spirit resides in the heart. Just ask a question, `Mother am I the Spirit?' Ask three times.

Now put down your right hand on your stomach, on the left hand side. Now this is your Guru principle, is your master principle, which has to be awakened.

So you say, ten times, `Mother, I am my own Guru, I am my own master.' Just assert it, it's there, you just have to say it before Me. `I am my own master.' If you have been to some Gurus or anything it will be all neutralised within you.

So just say `Mother, I am my own master.' Because these Gurus, actually, kill that Spirit in you, kill that principle in you. Please say it ten times.

Now again raise your right hand to your heart. And now with full confidence in yourself, because as you know, you are the temple of God. Say that `Mother I am the Spirit.' Say it twelve times, `Mother I am the Spirit.' [To Warren:] Just on the Void, put your hand. Alright. You use the light behind Me, put that.

Now, raise the same hand, higher, onto the forehead. We have missed one center where you had to say `Mother I'm not guilty' because the Spirit cannot be guilty, it is sinless. But here at this point you have to say `Mother, I forgive everyone.' Now some of them said that `Mother it is difficult to forgive.' But it is a myth that you are not forgiving. It's absolutely myth. You are doing nothing to that person who has harmed you or to those persons who have harmed you, you are just harming yourself.

So just put your hand across, hold it tight and say `Mother, I forgive everyone.' Hold it, just press it a little bit from both the sides. Hold it properly and just press it. Squeeze in, I think, towards the center, so that all extremes will disappear in the center.

Now put this hand on top of your head, near the Fontanelle bone area, where you had a very soft bone as a child. Try to press it with your palm, try to press it with your palm. It's quite heavy still. At this point I can't cross your freedom.

So you have to say `Mother, I want Realisation, please give me Realisation.' You have to ask for it otherwise I cannot force it into you. Say it seven times please.

Warren [aside to Shri Mataji]: Still some Void.

Shri Mataji [aside to Warren]: Void and Āgñyā.

Now you raise the same hand, for a while, on top of your head and see if there's a Cool Breeze coming in. Just move it forward, backwards. See if there's a Cool Breeze coming out? Good? Alright. You can change over now. Don't open your eyes, but change over see from the other hand. Put the right hand towards Me and put the left hand on top of your head and see if there's a Cool Breeze coming in. First you will feel it on top of your head and then in, on your hands.

[Shri Mataji blows twice,] You can always change your hand and see. Once this hand, once that hand. But don't open your eyes, but put the other hand towards Me.

[Blows once.] [Aside:] Mm? Warren [aside to Shri Mataji]: It's very *[UNCLEAR* good/cool].

[Shri Mataji blows four times.] Now, if you have felt on your head just try to put your hands towards Me and see that, if you are feeling it in your hands. Further. You are seeing at the back, now see it in front. Now, in the hands you might feel it, just try in your hands.

You may raise your hands, high up, like this, you can open your eyes and raise your hands like this.

And ask a question that, `Is this the power of God? Is this the power of Holy Ghost? Is this the Cool Breeze of the Holy Ghost?' Just ask the question. Are you feeling it? Something happening in the fingers? You'll feel very relaxed, first of all. Extremely relaxed. Alright? Now just see if it is happening. In your hands. Just see in your hands, put them back. Alright? Is there now? Not yet? How many of you are feeling the Cool Breeze in the head? Please raise your hands. Is good? And in the hands? Only in the hands. Alright, it will work out. Now

keep your eyes open. I'll tell you another way how you can raise your own Kuṇḍalinī. You just watch Me and you do the same. You put your left hand near, towards your Kuṇḍalinī like this, while sitting down. Let's see. Now, sit little erect, alright? Now. And then, this right hand is to be used like this, you put the right hand across, front, below, back, up. Like that. You move the right hand like this. Just start moving it. Now bring it higher, over your head, put it high and just turn it, give it a twist and tie it up. Try again please. Put this finger, hand, in front like this, with a right hand you start moving in this manner, which is a clockwise manner, just start moving, move it properly, that's very important. Keep one hands, steadily moving. Now give it a twist again, and, one other knot. There are three powers, so for the third power we give three knots, not putting down our hands. Now let's do again. Now put it up. Tie it up once, you don't put down the hands. Again, give it a twist, knot, another one, nicely, now see if you are feeling the Cool Breeze. Feeling? You can open your eyes. Now more people must be feeling Cool Breeze in their heads, it's so high as that, some people are feeling, yes, true, you can feel it higher, lower, anywhere, just see. If you don't feel it you have to say, I, `Please give me Realisation Mother,' that's all. You have to ask for it, that's all. With your full heart. It's there. Alright? Good. You just ask for it. Just for the asking! Because that's your own right. Alright? All the children have got it, beautifully.

So May God bless you All, I'll be here tomorrow again and I'll tell you about the imbalances we have, how we create them, how to get over them. In two lectures I hope I'll be

able to cover lot of things, but as you know, knowledge is like an ocean and I don't know how many lectures so far I have given, thousands and so many are on the tape and you can listen to them, about various dimensions of our spirituality, what is the Spirit, how it manifests, what is the creation, everything is there, you can come to our ashram, which is a very beautiful place and can listen to it, you can borrow from them and enjoy it for yourself. Tomorrow I hope to see you again and day after, so I establish this Realisation with you. I would request you to bring some salt, sugar and water tomorrow, which I can vibrate for you, which will be a good thing to take ah just bring little bit, not much is needed, just to vibrate. Thank you very much.

Warren: I think tonight we'll let Mother go home. She's had a long day...

Shri Mataji: Ha Ha.

Warren: And take the chance of meeting Her tomorrow night...

Shri Mataji: I'll meet everyone, individually, tomorrow, because today they fixed Me up with everything, ah, television, radio, this, that, I was rushing everywhere see, and, I came in the morning by plane and you know what it is like.

So if you could excuse Me today, tomorrow I will be definitely here for longer period and I'll meet all of you individually and also if you have any questions, it's better that you write them down, in the p, in the paper and bring it here. Another thing I would suggest that you must take the books, have you got them.

Warren: Yes.

Shri Mataji: Books, but don't read them tonight because again your head will be off. But you can take the photograph, and, ah, you can put your hands towards the photograph with a light before you, because photograph has got vibrations, it has the same coefficient, it gives vibrations, luckily, you see, it's very good.

So if you put your left hand toward the photograph, first, with a light, you will start gradually feeling the Cool Breeze, right hand outside like that, you see like an outlet given. The whole thing that's wrong there, passes out of this hand. Then you'll put your right hand towards the photograph and the left hand outside. At this time, before sleeping if you do it, you can have a, a little basin of water, in which you can put some salt and put your feet in it so the water sucks in problems within you. It's very interesting to use all the five elements. We are using light, we can use the water, every sort of thing is to be used, just to give us proper balance.

So, I hope you take the photograph and do the *[UNCLEAR]* tonight and don't discuss about it, talk about it, because you cannot understand it, with this limited brain, it's an unlimited space where you have gone. Thank you very much, May God bless you.

Warren: As you leave tonight, for those people who would like to follow it up we are very happy to let you know where we meet each week, so that you can learn about Kuṇḍalinī, about the Chakras and develop your Realisation.

So give to the person standing at the back your address and telephone number...

Shri Mataji: Why don't you tell them address now, no harm.

Warren: No, certainly.

Shri Mataji: And the telephone number it's better if you write it down also give your name but also...

Warren: We have the ashram the center is at 1267 Burke Road Kew.

Shri Mataji: again.

Warren: 1267 Burke Road Kew it's very easy to get to right there's two tram stop practically on the doorstep. However that address is written or it's stamped on the bottom of a sheet that is enclosed in the little booklet that we have at the back at the hall our phone number also is there it's 801696 you're very welcome to come and see us on Sundays at the moment we're planning to have a workshop where you are all welcome to come and spend time with mother and she'll be able to talk to you more closely and show you in more practical ways how Sahaja Yoga how this Kuṇḍalinī awakening can work within you um when mother said bring salt sugar and water it's to bring a small quantity of those particular substances because they can act upon our subtle body because they embody some of the essences that we have within ourselves just a small quantity in an opened packet you know so that it is easy so it is easy to reach ok.

And just for your own sakes as much as anything what often happens is you know it's quite hard to even comprehend what's gone on this evening ok you've come along, you've been given realisation and you know it's way beyond our own comprehension as to what's really

happened and it's so easy to go away and think oh no they were telling me stories it couldn't possibly be true it is true, believe it we can help you find that out and establish it within yourself and just to help you if you can give us your names and addresses I'm certainly not forcing you to do it or anything like that but if you can do that then we can keep in touch with you and help you establish it further.

Shri Mataji: After all you must know that sometimes it may take a little time of course it works instantly but something wrong inside then it takes time so give more time to yourself, a little patience with yourself as I have patience with you you must have some patience with yourself and just try to understand that this has to work out that's very important if it has not worked out it will have to be worked out.

May God bless you.

Contents: 1983-03-09 **Pūjā, 1267 Burke Road, Kew Ashram, Melbourne, Victoria, Australia**

I congratulate all the Sahaja Yogis of Melbourne [the city of Melbourne was named after the British Prime Minister, William Lamb, 2nd Viscount Melbourne, who took his title from the Lamb family home, Melbourne Hall in Derbyshire, England] for doing such a wonderful job of this ashram [the building housing the ashram had previously been a nursing home] and working it out with such dedication. Dedication is a very great rewarding effort. Nothing can be more rewarding than dedication, it's so joy giving and peace giving and satisfying effort or work you can call it. When it comes from the heart, with

love, when you try to do something, it works out beautifully and it shows its aesthetics, expresses and anyone who sees that can see that it is done out of dedication. Example of dedication is Ajanta and Ellora Caves are. These were the people who were worshippers of Buddha. Of course they were not realised Souls as you are. They were just worshippers of Buddha and they wanted to have their moksha, nirvāṇa, of what you have got already. But they worked in that cave with such attention and such love that even when they were not in Yoga, when they were not in union with God, they were so much blessed that in that dark caves where we cannot see with our normal eyes, we can't even see those things with ordinary lights, you have to use very strong lights to see that, in those days it worked out, in those dark caves, such beautiful murals, paintings, reliefs, statues, every sort of thing, that it is surprising how they could do it. When we walk in, we have to use very strong lights and because of these strong lights, that is fading now.

But we can see the dedication that they had to God. They did not believe in God, but to Lord Buddha so that they can get their moksha, their Self-realisation. Maybe, so many of them are born again today to get their realisation and they might be some of the Sahaja Yogis that we are meeting them in Maharashtra, those who worked for Lord Buddha to express their love and dedication.

So dedication takes away all the wastage interest like how much money we are going to get, what is our certificate, whether it's going to be used in the world wide range or not. All these things are finished. You just

do it for doing's sake. And you don't feel at all, at all, any pinch or any, what you can call the screwing up of your energies but you just float. This is what dedication is and this dedication comes when you realise that you are a Spirit. It's much better because that is the place where Śhrī Kṛiṣhṇa has said, ananya Bhakti , when there is not the other, you and your God, in between there is nobody else ananya. Nobody else. You and your God are one and that is the best time when the dedication works. That is the Bhakti , that's what He said that, “If you give Me flower, if you give Me water, or if you give Me leaves, I accept everything." But when it comes to His giving, He said we should get ananya Bhakti [devotion to the Lord]. This is the blessing of God.

There's one of the sayings about the Goddess is that, Ya Devī Sarva bhooteshu, Bhakti rupena samsthitah, “The one who gives us that dedication, that sense of dedication, You are the one who resides in everyone with that sense of dedicating." And it is such a joy that cannot be expressed what this is, that one you feel when you are dedicated.

This morning, you all got up, all ready, all the children are happily dressed, everything was done. I saw everyone busy getting everything ready and working it out so beautifully. It's something so loving as if the Mother Earth gives flowers for the worship of your Mother. You yourself in your dedication look like flowers, yourself like lotuses. It's so great to see this work being done, with such attention, with such care, with such love.

Melbourne I think is a word called from mala [dirt or impurity] born, we can say born out of mala and that is

the name of the lotus, that it is born out of the dirt and the filth. Mala is the dirt or impurity.

So this beautiful thing has come out of that and you can see that this place was inhabited by people who were really in a mess. And out of that mess you have created such a beautiful thing like this ashram. And is so much one with the name of Melbourne that this is a place is created by you people like a lotus comes out of the pond which is full of dirt and filth and then this lotus fills the whole atmosphere with such fragrance that everyone forgets about the mala. They just think of the Mātājī Nirmalā Devī which is this flower and this is what I felt about your ashram, the way you have done it with understanding, it's so good with such a lot of beautiful things and admirable it is really, to see how your dedication has done.

Warren: There's a lotus for you there, Mother.

Shri Mataji: I've seen that in the morning also. Beautiful. I told her that it will have fragrance. I can see so many lotuses sitting before Me. It's so beautiful.

So this is all in dedication you see, this comes out of that mala just for the worship of God. And this Kamala [lotus] out of the mala, it is called as Kamala it means the one which is created out of mala. Same is the name of Melbourne I think, the way it is said.

I don't know how this name has come Melbourne, but you can say Mel-born, can be mala born, could be Kamala like that. And it is really this place has become like that. Let anybody else come and see this and they will be amazed, how the whole thing is so beautiful, so comforting, so vibrating and so assuring.

Now, we have already started doing such good work in Australia and I'm sure you are going to get lots of people for your ashram to stay here. And also you might get lot of people also to work on them.

But you have to be rather careful when you admit them here. You must see first of all how they work it out. You first work them out outside, see how their Chakras are, how they are, how their behaviour is and how they are attached to things.

Once you find them all right, then you can have them inside, but be careful. You'd better send Me their photographs. Let Me see for Myself if they are all right, because you might get some very good people, if you are lucky enough, you will get as you have seen some very good have come already. Such nice, solid people. I'm so amazed to see these new people here that you can't believe that they have been in Sahaja Yoga only for such a short time and they are so good and so beautifully placed there. I hope you'll get more like this, many more like this of the same value, same quality and something good will come out of all their entry into your ashram. I bless you for getting all the best people of Melbourne to be in your contact, of very high level spirituality and seeking and purity and simplicity.

I find the people in Melbourne are very simple people, are extremely simple and very expressive. The simpler you are, you are much more expressive. The more complicated you are, the worse it becomes. And for your Mother is difficult to understand something who is complicated. See, it can go round and round and round, so I like when it is a very simple expression of their love

and joy that I can perceive it so clearly and it gives Me a great love like the ripples of the shores. They return back in the same way from My heart also joy is rebounding again towards you. It's a kind of a beautiful rapport where nobody gains, nobody loses, everybody elevates oneself that's all.

Sort of a thing is so different that it cannot be explained in any analogy. Dedication to Sahaja Yoga, your purity about it, without asking for any gains, asking for any advantage. Just working it out because now you are the Gurus. You don't have to ask anything, you have to just give. The more you give the more you'll get. I don't mean that you have to give any money or anything but you have to give more love.

The more love you give the more love you'll get and that is how it is going to work out for all of you.

I'm sure a day will come when we will become extremely powerful in every place in Australia. Now we have chosen only four centers and we have to work it out in a proper way without going into quarrels, fighting, back-biting, all these small things and selfishness. Specially with children it happens, “It's my child, it's my child” like that. Try to share. Try to understand others also. If you bring sweets for one child, it should be for all of them. And also with food, also, don't try to keep back anything because children will also learn these bad habits, you see. Nothing to be kept back. Tell them how to share, that's something one must learn, to teach the children that they must know how to share, how to be gentle, how to be kind, how to be adjustable and not to be fussy. If some child is

fussy, try to treat the child, because it's a disease which must be got rid of.

So all these petty things if you just now to look after, then you'll find your children are great because they are born realised. And it's such a blessing to have born realised children because God's attention is specially on you because they are born realised children, so you must have full idea as to what is to be done with them, how to look after them, how to give them full nourishment of spirituality. You yourself should be so good that they should see you as a foundation and they should try to follow you. It is not so much the precept of Sahaja Yoga which is important, one must know is the practice because precepts are great, you know I'm there, but the children are going to see you, not Me so much.

So it's better that you also practice Sahaja Yoga in your everyday life. And one simple word one has to remember is that you love your Mother and your Mother loves you. In the same way, you must love others. But there's one thing that gives you the real idea of love, is discretion. Spoiling somebody is not love. Ruining somebody is not love. Love is that which elevates you, takes you higher. False sympathies, identifications, always spoil the lives of people. But discreet love and love is the thing that gives you the power, love itself gives you that wisdom to be discreet. Love itself teaches you how to be discreet. In a beautiful way we have to be discreet, not to be harsh, angry, in a temper, but in a proper, artistic way you must know how discreetly you emit your spirituality to your children, to your friends, to your surroundings, to Sahaja Yogis and to the whole world.

But first step your attachment should be with Sahaja Yogis. Never try to find faults with Sahaja Yogis as far as possible. But if one person becomes too much, then all of you should oppose him and see to it that he is out of this place. But there could be few mishaps like that, maybe some people, one person like that may go out, then whosoever it may be, if he is harmful to Sahaja Yoga by any chance and if you find there's something going wrong, you should see that that person goes out of the circulation of Sahaja Yoga.

He goes out of Melbourne is the best. Such a person should get out of this place and should go to another center where he should be tried. That's how you can shift people who are little funny and misbehaving.

For example, now as you told Me about some other center, send that person to Sydney or some other place to get corrected. If it doesn't work out in these four centers, then that person should get out of Sahaja Yoga. That's the only way for the time being, get out of it. Stay out. Or maybe from one center to another center when you send that person ask him to get out of Sahaja Yoga, go and stay somewhere else, get lost. Maybe that person will be all right because the negative forces are mostly entering through the people who are weak, who are low level or who are attacked by possessions and things like that.

So, because you know the water always goes towards the low level. In the same way negativity always flows to the low level people and these low level people try to drag other people who have gone higher because they feel jealous of them. If you find any such thing, then best

thing is to ask such a person to get out of the ashrams, to go and stay somewhere else or go away from the city for some time and then return back, so they realise what it is without Sahaja Yoga and what it is in Sahaja Yoga.

So they get full idea as to what they are doing.

Sometimes, you know, Sahaja Yoga can be very much taken for granted because you get every blessing.

You see you get Yoga and kshema [welfare]. You get children, you get beautiful houses, you get all the food, everything is organized for you, God does that. But then you take it for granted and then you start thinking, “Oh it's why this, it's why that?" That time one should know that it's not true, you must know it is God who is helping you in every way. We should be grateful to God for all that. But supposing if such a thing enters into anybody's mind, then such a person should not get to those ideas and try to distribute them to others. It's like a disease again. Such a person should get out of the ashram. Go and see for oneself what is it outside. What is it without Sahaja Yoga? How you meet people, how they treat you, what's your situation there. Then you'll realise what Sahaja Yoga is, how great it is, how much it has helped you and how God is kind to you specially, because those who are outside do not know these advantages of Sahaja Yoga, these blessings of Sahaja Yoga.

So as you go out you will see them how they are. How funny they are, how absurd they are and then when you come back you'll realise the value of Sahaja Yoga.

So one should not accept all these ideas because it takes then a very long time for a person to come back, very long time. Once he goes out of the circulation, he goes

out. As I've told before, many a times, that we have two types of forces working, centrifugal and centripetal. By centripetal force you are taken inside the Sahaja Yoga. You are brought in with your Mother's love. But there's another force which is always equally working is the centrifugal which makes you get out of the circulation of Sahaja Yoga and you go at a tangent. You see, when you are moving something, say a stone or something, fixed with a thread or with a rope and you are moving it, suddenly you find the same thing which you are controlling from the center just gets out in a tangent.

In the same way, it happens in Sahaja Yoga and once you go out it's very difficult to be picked back and to put back into circulation. And such people are always suspected, never trusted and it's a very difficult thing. It doesn't work out for months together, sometimes years together. It's a difficult thing.

So I would suggest that even if you have certain doubts, you'd better keep them away.

Try to fix your nails higher and higher and try to cling on to them and cling on to them because Sahaja Yoga is something so miraculous and so great. The whole thing is so great that it is not possible for human beings to conceive what they're achieving. You have really entered into the Kingdom of God. But you cannot conceive this still with your brain that what you have got, so must know that the greatest of greatest has happened to you. And to keep it up you must try to achieve higher levels and higher levels of spirituality and forget all that, forget other things, just try to go higher and higher with your dedication to yourself and to Sahaja Yoga. I bless you

again and again for a higher ascent in your being and a deeper enjoyment in life. May God bless you.

How beautifully they have done everything. I can't help it, it is so beautiful... Let them relax, let them relax, you see children would relax now because it's so much in the vibrations. Let them relax, don't you worry. Let them relax. Let them do what they like. That's all right. And whatever they are, they are angels. They're all angels, really they're angels, you don't know. All right.

Question: Shall we worship You as Śhrī Gaṇeśh first Mother?

Shri Mataji: Yes, yes. It would be a good idea.

Question: Then as the Devī?

Shri Mataji: It's a good idea. This is such a nice idea I tell you. It has never struck Indians. We have so much of marble in our country. [Refers to a raised footstool of some kind:] It's a wonderful idea I tell you. [Asks for Her watch.] It never starts before eleven. It's always a trial, today My sarī was not ready for Me to wear. I didn't know what to do.

***Contents: 1983-03-09*, Public Program, Day 2, Melbourne, Victoria, Australia**

I bow to all the seekers of Truth. May God give you wisdom and understanding about the truth and about Himself.

Doctor Warren just now brought out a point that if somebody is doing this work in a split of a second, even on the television when it was only one minute, if it works out, then there has to be somebody special.

All this kind of talk is not necessary in India, because Indians are well educated in spiritual matters. They know what is the Shakti is, what is Kuṇḍalinī is. They know the Chakras. They are very well equipped.

They have got the names of the Shakti in which it is said so.

So to them it is not to be told and requested.

But in the West, though such great saints have been born, such seekers are born, they have forgotten the knowledge that they had, perhaps, of the power of God. And that's why I find the sensitivity of people is not towards understanding the reality, but more they take to artificial things.

Perhaps the more we are in contact with machine, we become more akin or close to machine. We try to understand everything in a machine-like manner, but not in that sensitive way, that people had once upon a time. Even at the time of Christ, except for few Jews who didn't like Him because they wanted to have their own money-making propositions, they crucified Him. Even the judge who judged Him, his wife could understand that He was a saint. And the people around Him, who were simple people, all of them knew that He was something saintly. Even at the time of Śhrī Kṛiṣhṇa and Śhrī Rāma, it has happened. I agree that many saints have been crucified, have been tortured, but not by the general public, by general people. It has been done by people who were in power, or who were prophesying some sort of a religion, who thought that their religion is in danger because they were making money out of that religion. These are the people who did all these atrocities and they brought forth

this kind of calamity or this kind of torture to the great saints who lived.

But today is just the other way round. The public is not sensitive enough. That's a very hard thing to feel that the public itself is not understanding what is the truth and how to come to the truth. Yesterday in short I told you, first of all we have to be honest people if you want to find the truth. Is a simple proposition that we have to be honest about it, that we should know that we cannot purchase the truth.

Secondly, the truth is what it is. Whatever are your own conceptions about truth is not the truth. Is your own idea, your mental projection.

Truth is what it is. It will be for ever and ever. And truth cannot compromise for you. You have to compromise for the truth. It is the other way round thing, that you have to compromise for the truth.

You have to understand that so far those concepts you had, relatively if they are not near the truth, then you have to give them out. It's a very strange thing that you great people who are seekers, are born in various countries, in so many countries, I find. And then at this juncture, when it is not because there is so much sickness and all that. But is a special time also. Is a time of resurrection. Is the time of your last judgment. At this great times, that people should lose their sensitivity to reality. It is amazing how people take to artificial things.

So many things people have done just because they could not see through. That's why I requested you yesterday, you must come to some logical conclusion. You must use your brains and understand that reality, if

it lies within you and if it is a living process of your evolution, then it has to be done in a way that is not done by human beings, because no living work is done by human beings. It cannot be done. We cannot transform one flower into a fruit, leave alone a human being into a spirit.

So, it has to be done by the same process which has made us human beings and the same process that is living force of God's love, of living God's love, should do the job.

So it has to be spontaneous. You cannot achieve it through your efforts. Actually, those who tell you like that, that “You have to achieve it through your efforts” or, “You have got your Karmas. You have got to suffer” and all that, are just giving excuses. They don't know how to achieve it. They are just giving excuses. You must understand that if you have got that power within you, it has to manifest spontaneously.

For example, some people may not get realisation. May be little bit, very little bit percentage, I hope, may not get it. But that is nothing wrong with Sahaja Yoga. There must be something wrong within you, physically, mentally, emotionally. There must be something wrong.

So we have to correct it and we have to see that you get your realisation in a proper way and that it is achieved through your own understanding, in your own glory. That you should know that you have got your realisation.

This is the only difference between the evolutionary process so far from animal to this stage, that human beings will be aware of their realisation. They will know all about it because now they have become masters, that

they are not doing things automatically. They will know that this power is flowing through them and they will also know how to handle it, which can be decode through Sahaja Yoga. And you have to learn the technique of operating God's laws, which are tremendous and wonderful. You believe it or not: God exists. His loving power is all-pervading. We have never felt it before. I agree there, you have never felt that His All-pervading Power is everywhere. You have felt the ether, through which we receive the television and other communications, but you have not felt that subtle power, which is all-pervading, not only but that, but is the subtle of all these gross that you see. But the time has come, very precious time, that you have to get it.

So all your other identifications, I am sorry, you have to drop them. You have to just become your self. Whatever you have gathered in life time, all kinds of concepts and precepts and all that, forget it. Just think that you are a human being and you have to get your realisation. That's the most important thing. All the rest of things are of no use.

So I would request you first of all, in all honesty, try to be the spirit. And if you become the spirit, try to understand the path of progress in your spiritual ascent. Now to come to the point of this subtle instrument already created within us, to come to this point we have to understand, as I told you yesterday that this is the knowledge of the roots. Whatever you have so far, is the knowledge of the tree. But you don't have any knowledge of the roots. Many people have told Me, “Mother, what Christianity has failed. That religion has failed. This

religion has failed. How can it be? If there is God, how can it be?" I mean, there are communists also in this world who deny God completely. But is not that the religions have failed; not the prophets have failed; not the incarnations have failed. It's the people who represented them, wanted to make something of their own, of their own concept, of their ideas and the whole thing has become such a market place, that I just don't understand. How can you sell God? How can you sell His ideas? There is no business about God.

Now this one is the great instrument that you have within yourself. Yesterday I told you that you need not accept Me as a sort of a conditioning on your mind. But as a scientist, keep an open mind. And this is the hypothesis I put before you and when it works out, you have to see if it is all right or not. Now some of you who might be doubting about it, or thinking that, “Oh, it's all another story” or things like that. They can go ahead with it because Divine is not interested in such people. Divine is only interested in people who are honestly seeking the truth.

So this center that you see the first of all, is a very important center. I don't know what he has told you about it, but is called as the Mūlādhāra. It's the center of Mūlādhāra, center of Mūlādhāra. Mūlādhāra itself is that triangular bone, which is a very small triangle. You cannot see it clearly. We should have expanded it to show you, which contains in itself the power of Kuṇḍalinī. Is the power of that energy, which I told you yesterday, is the pure desire to become one with God. All other desires are not satiable.

That's why this is the only desire that has to manifest. Otherwise, you are not going to be satisfied with your life. Now, this pure desire exists in that triangular bone and you could see it also when you raise the Kuṇḍalinī, is pulsating there just like a heart. But not on every person. Not on every seeker. Only those who have a problem with the other two centers, you can see with your naked eye, the pulsation of the Kuṇḍalinī. When there is such a pulsation of the Kuṇḍalinī, we have to know that these two centers are in problem in human beings. And these two centers are, the higher one is called as the Nābhī Chakra, which means the center, the subtler center of the navel. And this center manifests outside, what we call the solar plexus. In the medical terminology is called as solar plexus. But that's the gross thing. This is the subtle center which is in the medulla oblongata in the spinal cord.

Now this is a very, very important center within us again, which was created since long, when we were seeking. First, as animals we were seeking food. Then also we were seeking our evolution. Because animals also sought their ascent from a one unicellular animal to a multicellular animal, like all the quadrupeds are or the mammals are. How they arrived it, is no one can say because the power that worked for it, lies in the central path of this central Nāḍī called as Suṣhumnā Nāḍī.

So first we were seeking the food. Then we were seeking the shelter, as you go by in the history. Then as we evolved more and more, we started seeking our joy in, say, economics, in possessions, then in politics, in power. Then we evolved much more and we thought there is no

joy in all these things. We have had enough of it. Specially the affluence helped you a lot. Because affluent people get fed-up of materialism and the plastic mountains that they have created. And they just want to have something simple in life.

At this stage then they start thinking of their spirit. They think, “How is it that we are not yet satisfied? How is it we are so restless? What are we seeking?" Some of them know what they are seeking.

Some of them don't know what they are seeking, but even if they know what they are seeking, they don't know how it will happen and what should we expect. That's a very important thing where I find Indian people are better equipped.

But you have another great equipment, that your desire to seek is very strong, is extremely strong and you go like a bull at it. I have seen people who got realisation and they were running so fast towards it that even after getting realisation they would not accept that they have sought it. They would not stop, you see. Like a bull is running very fast, you see, even if you offer him something to eat he won't be able to stop at that point. He goes little ahead then he looks back, “Yes, that's it." So he comes back. It has happened with so many people who have done a kind of a Guru-shopping, I would call it, it's a habit. They take a bag in the hand with little money, go round in the shop, “Now which Guru is available?" So they go to one Guru, “All right, no good, hopeless." Then he goes to another Guru, third one. And Sahaja Yoga is a temple somewhere away from that market.

So that habit is also formed in human beings of seeking that even being introduced to Sahaja Yoga and even after becoming the spirit feeling the All-pervading Power, still they don't want to stop, because the inertia is too much. And it's still they are going on. But after some time, they reverse back. I've seen many things like that happening in Sahaja Yoga in every place I went to. Specially in England is very common that in first shot they just can't believe it, “How can it be? It's not so simple." Because then their ego is finished. They have found it, “How can it be? We can't do it by ourselves." So they forget about Sahaja Yoga for a while. Then the Kuṇḍalinī comes and tickles them all over. Again She comes and clears them all over. Then they start thinking, “What's happening to me?" And then they come back to Me and say, “Mother, I must say there was something that had happened.

But I, just I was too fast. I was too speedy and I just didn't get the glimpse of it." All right, settle down now.

So that's one thing is always common and it's all right. It's excusable; this doesn't matter. You take your own time. I am not in a hurry. But Divine is. Divine is in a very great hurry and the work has to be done in a very great speed now. It is very important that we have to move in a very tremendous speed.

So this seeking within us is surrounded by this ocean of illusion, within ourselves. This ocean of illusion comes to us because of our ignorance. We see things which do not exist. For example, there is a gentleman who comes to us. He is very sweet to talk to. And after sometime we find that we are missing our purse.

It's gone. He was very nice, very well-dressed. Then how is it he's vanished? Most of the bank robbers are very well-dressed people. And the way they do it, it's surprising, how they befool. Very intelligent people also, by their dress, by their methods and the way they perfect themselves.

So what happens that you cannot make out reality and this illusion is in everything we have and in that illusion, all the time we are lost. We feel that, “This is the house I have made. What a nice thing I have done. Such a great thing!" But if you look at it, after all, this is all dead from to the dead. You make a chair; then you think, “Oh, I've made a big chair." Now this chair is all right, but tomorrow you won't be able to seat on the ground, if you are sitting on the chair.

So like many illusions we have about things, material things also. Say now, if I have, say, a beautiful carpet, like this one. It's not mine, thank God. But supposing it, I possessed it, then I have to go to insurance company. I have to look after it. I should bother now, “Have you given it back to me or not?" But if it is somebody else's, I am enjoying it very well and without worrying about it. But the idea of possessions also come in. Then there is an idea of relationships also. All these are such great illusions.

They just open out, absolutely open out, as soon as you find the light of spirit in your attention. Like in this room when you enter in, you find it's dark. You catch hold of a chair. You will say, “The chair is the room." Somebody will say, “This pillar is the room." Somebody will say something else. But supposing you just push a button,

the light comes in. Then you understand what is this room, what is the relationship with each other. The whole integrated knowledge about this room comes to you, when there is light. And this is what one should understand out of enlightenment. But the illusion is, people think, that when they are deluded, they are rising.

The other day somebody asked Me a very funny question that, “Is schizophrenia, is it a step to enlightenment?" Now can you imagine? But then I heard that there is a very big book written about this by some gentleman who says that, “You have to become mad to become a self or a spirit." Can you imagine such a stupid thing? It has not happened in any evolution of ours and why should it happen now that we are human beings, so beautifully created, that we have to become mad to become something higher? I have not heard of any mad person who becomes higher by becoming mad, so far. But this kind of a theory is going on.

So you can imagine, how there are delusions and how there are illusions and there are sources of these negative forces which are giving you all the time the waves and waves of this illusion that you live in this illusion.

So is doubly crowded, is doubly blackened and that's how if people cannot find the truth, I am not surprised about it.

Now this place is called as Bhava-sāgara, is the ocean of illusion in which we live. And we are seekers.

So this one is bestowed upon by ten valencies that are within us, because we must keep our valencies all right. Even if you are in the, say, ocean, our ship should be

seaworthy. Then any kind of illusion is not going to deter us if we are seaworthy. But seaworthy means, we must know if there is a fog, how to move in right direction. We should know how to overcome all the hazards of all kinds of storms and all knowledge should be built-in within us. And that built-in knowledge is, this Dharma as they call it, is a religion within you; not without, but within you, which are ten valencies. As the carbon has four valencies, it has ten valencies.

So we have within us already a built-in system which gives us this guideline. But the illusion is such that in that illusion we develop another problem and that is we never listen to right people. The right people are the ten Primordial Masters who came on this earth. They have had many other masters also, not that they were not right. But major ten Primordial Masters came on this earth and they gave us complete knowledge as to how to balance ourselves and keep to ourselves as human beings. But then the question can be asked, “Why this balance? For what? Why should we have this balance?" First of all, to keep a good health. Secondly, to have a very good nature. Thirdly, to live like a human being with others and not like donkeys or like lions. It is a balancing thing which gives you a proper balance to have a proper society, a proper *[UNCLEAR* kind of/coined of/coiled-up] life, in which you lead a normal life.

And you are not on your own, by which you are in relation with the whole.

Now you see the relationship is from there to the whole. But last of all, this balance is important that you should achieve your ascent. Any aeroplane which has got only

one wheel will not fly. Though it has to fly in the air but it has to have two wheels; it has to have a balance. An imbalanced thing cannot fly up. That's why we have to have the balance. And that is why these Prophets have taught us the methods of how to balance, balance ourselves, keep ourselves in balance and don't go to extremes.

But whatever they might try, whatever they may say, we just go in the opposite direction of what they have told us. And we really go into an extreme condition of fanaticism or some sort of a torture to ourselves, or some sort of a great harm to our being. That's human nature. That I cannot explain. Why so? Why they are anxious to ruin themselves, this is beyond Me to understand, because God has tried His level best to make you happy. He has tried to give you everything, but if you are bent upon ruining yourself, what can you do? You see the sun is shining and is giving the sunshine to everyone, but if some leaves want to get inside the mud, what can the sun do? I mean, it is like, `Come, bull and hit me,' sort of a process people take to. I don't know why they take it. This you may be able to explain better, but to My simple mind, I just don't understand.

So these things happen to us by which we try to ruin ourselves. Now the first of all, as they said about the curing part of it, which I must talk to you about, because it is not such an important thing in Sahaja Yoga, there is no, no accent on curing. I mean, we don't say that, `We cure this and cure that.' I mean, it's not a hospital going on here, nothing of the kind. It's just that if you get your realisation, as a by-product you get well. That's it is. But

you see suddenly people ask you questions, “Can you cure this? Can you?" I don't say, `I cure it.' You are going to cure yourself through your own ascent. It can work out through Sahaja Yoga. And then it becomes a headline for everyone, “She can cure this disease, She can..." It was surprising that even in the television they had put Me as a healer and I was amazed to look at Myself.

What is this they have put it? So they make out of you whatever they like. In Sahaja Yoga, it is not the healing that is important, it is becoming is important. That you become the spirit is important. You have to become the spirit.

Now, for example, I'll tell you one small thing here, how imbalance causes so many troubles to us.

There is another center here down below, if you see, is called as the center of Swādhiṣhṭhāna, which gives aortic plexus as the gross manifestation of itself. Now when this center goes into imbalance, it goes round and round this ocean. Also it can retract. It can go further. What happens? Now this is a center for our future and for our creativity when it comes to the right. And when it moves to the left because it has got a step, like a lotus it moves. And if it comes to the left, it acts for something what we call unauthorized, anti-God activity.

So another one is also unauthorized, because when we say that, “I am doing that” then it is ego, is created in you and which passes into that pouch there in the head like a balloon and you form a big institution of ego in your head. On the other side is this one, where it comes to the left or any conditioning that takes place, that people say, “Don't do that and don't do that” and all

kinds of conditionings through any kind of teachings, that creates another institution is called as superego.

Now when we go to the extremes of anything, how problems are caused, example of that I will try to give of one center, because there is no time for Me to cover all the centers. Take this Swādhiṣhṭhāna Chakra. It has a very important work to do, is to transform the fat cells of the stomach for the use of the cells of the brain. Brain also is made of fat cells and when a person thinks, this special Swādhiṣhṭhāna Chakra converts the fat cells for the use of the brain. Now, when you think too much for the future, you think, think, think. I mean, people are mad with thinking.

Some of them did tell Me, “Mother, you cut my throat, do what You like, but stop my thinking." It has become another inertia sort of thing. They just go on thinking. They just can't stop thinking, whatever they may try.

So when this process starts of thinking, then what happens that this Swādhiṣhṭhāna, poor thing, goes into a great speedy process of transforming the fat cells. Now it has some other work to be done. Now this is going to the extreme, to think about everything. Sitting down they will think that now they have become the Prime Minister of Australia, so what should they do to correct. I mean, there's nothing like an election. Nothing has happened, but they are already thinking for the Prime Minister. If they are driving on the street, they are thinking for all the Police Department. If they are building one house, they'll try to find faults with another house so that he should not have done, while the house they are going to make might collapse. But all the time the idea is to see

and think about everything else that doesn't concern them.

So this heavy load on your head makes it a big ego there. Apart from that, ego which is a horrid thing, which can make you absolutely stupid, but apart from that, it makes this poor Swādhiṣhṭhāna Chakra work so hard that you neglect other important things in your body, the organs like your liver. Such people have very bad livers, those who think all the time, plan all the time. They will plan. Even the ladies will plan all the cooking. Imagine, ladies planning all the cooking. It's absurd! Because you go to the market, you have planned for the fish and there is no fish in the market and you are upset because you can't cook fish. But why did you plan? Whatever you get, you bring it home and cook it. That's the best way.

So this planning business also goes on too far. When we go to the extremes it so happens, that we make this work too hard and we get a liver trouble. Then we get also the pancreas out of gear, because pancreas has to work, has to be worked though this Swādhiṣhṭhāna Chakra. When it is out of gear, the disease you get is diabetes. The simple thing as diabetes. Now in India if you go and see the villagers in India, they take at least five spoons of sugar; otherwise, they don't think it's a tea. For tea, they must have five spoons of sugar and they never, never suffer from diabetes. But in the cities, where the people even just touch the sugar, they get it back in their urine.

So something wrong with the city people. And what is wrong with them is, that they are using this Swādhiṣhṭhāna Chakra all the time for thinking and thinking and thinking.

Now another disease that one gets out of it, is the disease of the spleen, which is a very serious thing.

Spleen produces red blood corpuscles according to the necessity of the person. Now, any emergency arises, it starts producing more RBCs. Our life is such that we are always in emergencies. Everyone is. Whether he is a shop keeper or he is a minister, everybody seems to be very busy. Now, in the morning first of all to read newspapers, is another curse. Because you read newspapers, you hear, `This is burnt. That is finished.

So many died.

Somebody in the aeroplane finished off,' maybe our relations are there, so you get a real pain there in the stomach. That's done by this poor spleen. It goes into a big process, into a very big mechanical production of RBC starts. Now when that happens to you then you don't know that you better keep the spleen now at least little rested for other things. But just then you will ask for a breakfast. You will get into the car, with a breakfast in your hand eating that. And there is a jam in the way and then you are screaming at, because you are late. All sorts of things happen to us like that and we go on creating emergencies for ourselves. For what? What are we going to gain out of it? With this hurry and scurry what have we achieved? So this spleen goes out of order. It does not understand the crazy person. It becomes crazy itself. And it starts producing red blood corpuscles, this thing, that thing. Now you become vulnerable to a horrible disease called as leukemia. Of course, it is triggered by something else, about which I may be able to tell you, today or tomorrow. But you are just vulnerable for a

disease called leukemia where just doctors will say you may die within one month or two months. That's all they can say about leukemia.

Now such a person doesn't realise that, `I have brought this disease upon myself by being like this.' We are human beings. We cannot rattle like tins. We have to live like human beings. The way we rattle ourselves morning till evening is so dangerous for our being that we must have a balance in our lives. We must learn how to rest. And rest is also another problem. Then they will go to the sea, burn themselves up, completely extreme. I don't know why this fashion has started from where. Must be somebody must have put this into the ideas. You see, this is a very recent one. About twenty years back nobody bothered about sunbathing. Nobody knew about it. When, you see, I just don't understand also the psychology of the West when they don't like black people, they are immigration problem, why do they want to become black themselves? They tan themselves. There are tanning companies, this, that, all kinds of things have started and that's how they, you know, you get the disease called cancer of the skin, which is a very serious disease. And this beauty fashion is also for whom? I mean, I just don't understand that in India people think that you are very good-looking people because you are fair and here you think Indians are better because they have got darker skins.

So whatever we have, we are not satisfied with it. But it's not so important that we should kill ourselves with this suntanning to that extreme.

So that sort of an extreme you do it with this Swādhiṣhṭhāna Chakra and you have problems of this kind. But also your tension can rise if you use too much of this Swādhiṣhṭhāna Chakra because your kidneys also become poor things. They don't know how to adjust to your madness. They way you lead your life, you don't think you are a human being. You think you are an supersonic aeroplane. Then poor kidneys don't know how to work you out. I mean, you are made by God, not by human beings who have made supersonic aeroplanes, this, that. And the supersonic aeroplane doesn't think. First of all it saves its energy because it doesn't think. First of all when you think, you are spending most of your energy and actually the way you spend your energy with an extreme way, you develop all these horrible diseases.

Now what happens actually when you start doing too much to the right or to the left? Now, the right side is a thing where people become extremely fanatic, very disciplined. All military people, you see, hot-tempered. You can't just go near them. If you go near them you will get nothing but heat coming out of them. They are very hot-tempered people, angry people. They lose their temper. You just can't talk to them because if you say a word, they will box your nose. This type of people are so many in this world, you can't imagine.

So many of them are, I have seen. I am amazed how they exist with themselves. Why don't they box themselves sometimes? They might be. They are full of anger, frustration and all kinds of bad feelings about others and about themselves. All these people, all this kind of people, come up when you become very austere. You

say, “Oh, I will have no indulgences. I am absolutely living on a shoe-string and eating just two leaves per day." Such people will thin out and they will look like mosquitoes. But I don't mind their looks, but the way they bite you, is the worst part. And they are sometimes regarded as the beauties. Then God save us from the beauties, because if they become the world beauties or whatever beauty contest, you see, so, models, this, that, then they are lost people, absolutely lost to any senses.

They become really stupid.

Now this kind of extremity comes to the right side. The left side comes when you indulge into something like drugs. Now people might say, “What's wrong in drugs?" It does such a damage to you. It does. People may not believe it, but it does. It does finish you off on your left side. As the alcohol may finish off your liver, the left side is completely jammed by the drugs you take, because you move more towards the left.

And the more you move, you go from your subconscious to the collective subconscious and then you are attacked by negative forces and that's why it attacks your brain also. Such people can just become gradually into a state of just like cabbages and they would not even realise how it is happening.

So all these things are harmful to us. Indulgences into anything can make you left-sided. Eating too much, there is one person eating two leaves, another is eating so much. See, all these extreme behaviours, as I said, create a very big problem.

Now how cancer can be caused, we have to see. Then I will move to other things. That, supposing this is the

center and this center has got left side and right side. At every emergency, both the sympathetic nervous systems which are expressed by these two Nāḍīs go into action and when too much action starts, what happens, the relationship is broken. And the deities, who are controlling these, go off to sleep. And when the relationship with the whole is broken, when it is broken, then you have no control from the main, you can say, from the whole and the cells become on their own. When they become on their own, so individualistic, they become malignant. For example, if it happens in the stomach, you will find the liver will become so big. Or if it happened in the mouth or nose, the nose will become so big. The rest of has no chance. It's a very ego-oriented stuff. It goes increasing, increasing. And also if you live with an ego-oriented man, you can become also ego-oriented. Hitler is one of the examples of that, how he made people ego-oriented and so stupid. Actually so horrible by his own great ego that he developed.

So these cells also become like that and they make other cells also malignant and that's how the cancer is settled. Now to such a patient, what have we to do? You have to try to raise his Kuṇḍalinī. By giving some power there at that point, you can pacify. You can give some additional, as you call the petrol, to the exhausted one. And gradually when it is done, it comes back to its normal *[UNCLEAR* ways/phase].

Then you put the Kuṇḍalinī through it.

So it makes an ascent and keeps it in place. It awakens the deity in that center and that center looks after the gross side of life. That is how cancer can be cured. It's

true that Sahaja Yoga has cured cancer of so many people and some people in ten minutes have got rid of their cancer. Ten minutes, is a fact. But that doesn't mean that I am going to cure everybody's cancer, by any chance. It is not so. You see, the trouble with people is, they say, “Do you claim you can cure cancer?" I say, “I don't claim. But Sahaja Yoga can do it." “Then you must cure this cancer." I said, “Why? Why should I cure? Are you paying Me something? Have you called Me here? I have come My own. If I want I will; otherwise, I will not." You see, it is like a aggression of this kind on a person that, “You must show how you can cure." Why should I show? I don't want to show it.

Like I had a very big lecture in the medical college, medical institute in India and of course the Vice Chancellor was very much impressed. But some of the doctors they came and they said, “Mother, we will give you four patients of cancer and you cure them." I said, “I have no time. I am very busy. You better ask them to come to Sahaja Yoga, get their realisation and cure themselves. I have no time for that. I am sorry. I am busy with other work." So, then they said, “All right. Do you have any file of the patients you've cured?" I said, “I have none. I have no time for filing." It just flows. It just works. What am I to write down everywhere? This is it. I have cured this x, y, z, for what? I have no clientele. I do not have to cash it.

So why should I do it? It's just flowing. Those who want to have it, can have it and can work it out. But you cannot force Me that, “You must write down and...", for what? What is the purpose? I am not running a hospital. I don't

have to have a credibility on that, if I cure or not. For that doctors have to get their realisation first. If they don't get their realisation, I am not bothered. If they are really bothered about cancer, or any other disease, why don't they take their realisation and help their patients? They can.

But the patients who are not interested in God, God is also not interested in those patients. It's common sense. God has the greatest common sense. The lights which are never going to work out, which are absolutely useless, you are not going to repair them, will you? No human being is going to do that.

What's the use of repairing a light which is never going to work out? So God is also like that. He has such a lot of common sense. He is not going to waste His energy for these things.

The most important thing today is not to cure people but to give them realisation; to redeem them, to evolve them, is the main part. You can be counseled, you can be told, everything explained, you can be brought to logically conclusion. But the aim is to get your realisation and not to worry about your illness.

Illness will disappear gradually. It has happened with so many people and it should happen with you. But it should not be a condition, that you come to Sahaja Yoga as an obligation on us that, `We have come to Sahaja Yoga, you better now.' That's not so, because, as you know, we have no organization. There is no organization that we have. You have to come humbly to it and it works out.

God is the ocean of compassion, ocean of love. He is the one who is so anxious that you all should enter into His

kingdom to occupy your great seats as His children. He is the Father of the Fathers. He is the most loving Father you could think of. Then when we challenge Him like this, He doesn't like it. We have to enter into His kingdom in a humble way and He will definitely bestow His blessings on all of you, because He is the one who is so anxious. I Myself amazed at the way He is blessing people. Imagine six thousand people before Me, they just get realisation. Can you imagine such a thing happening? I have seen Myself. It's happening.

So many things are happening today that is evident that God is very gracious, as well as He is wrathful. He is a wrathful God for people who do not take to Him. He is wrathful. And that's why one has to be careful. If you lead a life on your own, “What's wrong?" `What's wrong' is one of the philosophies people have, then you have to pay for it, this way or that way.

So as a Mother I have to tell you that, “Why not?" When you have got everything. You have got the spirit within you. Is the power is within you. Everything is there. Why not get your realisation? Why succumb to this useless ego which is not yourself? You are not your ego. You are your self. You are your spirit. And that spirit, when it comes to your attention, you become such a wonderful person. The whole thing is lost. Like a lotus rising out of the mud, it covers the whole of that pond and its fragrance fills the atmosphere with such beauty. That's what happens to you when you get it.

So why not have that? This is your own, within your self and the Divine is so anxious. I don't know what is the missing point.

Today, I am sorry they have today called Me after this program for a radio and I am going there. I don't know how many people are going to attack Me on the phone. You see, all kinds of things they say on the phone. But I told them I will not receive the phone. You better receive the phone and let Me know. Because all these things are subject to, I find that people use it for just call sometimes, for not expressing anything good but for expressing something that's inside them anti-God, absolutely anti-God thing. I hope today they will behave themselves and it will be a good time for them that they should enjoy the bliss of God. I must thank for people who rang Me up to say that they received their vibrations on the television. And that they telephoned to Me and they found out My phone number, because My phone number was not available. And it should happen to all of you today, that you should get your realisation.

So the first intense feeling should be that we should get our realisation, somehow we get it and then we will talk about the rest of the things.

Yesterday I gave a lot of time for questions. And today I think we have very little time. But still I can allow you to ask two-three questions and then we should go ahead with the procedure of realisation.

But too many questions are not needed. What you need is your realisation. Actually, if you ask too many questions, sometimes the realisation doesn't work out. Not to frighten you but I tell you, because your mind starts working. You have to, you see, take it beyond your mind.

Tomorrow I'll tell you about that great Chakra of Āgñyā, which is bestowed upon the deity of Jesus Christ. That how, when the Kuṇḍalinī rises through it, how He sucks in these two horrible things called ego and superego and how you become thoughtlessly aware and you come in the present. And you become, when it comes out of your fontanelle bone area, the real baptism takes place and you get connected. You get connected with the whole and you become collectively conscious. You become. Again I say, it is actualisation. It is not just talking that, `We are all brothers and sisters,' but you just become it, comes in your awareness. And you start feeling the other person on your fingertips, yourself, on your fingertips.

As Mohammed has said, “At the time of resurrection, your hands will speak." He has spoken more about this time than about the doomsday. But all the Muslims are talking about the doomsday only. I don't know why they are waiting for that before this.

So first the resurrection time has to come because in all graciousness and kindness and compassion of God, He is going to give us a full chance to achieve ourselves, because this is His creation. He is anxious to do it. He doesn't want His creation to be destroyed.

So, may God bless you.

Contents: 1983-03-09 **Talkback Radio Interview 3UZ with Barry Everingham, after 2nd, Public Program, Melbourne, Victoria, Australia**

[First quarter of an hour was not recorded.] Barry Everingham: Thank you George. Joan? Is Joan on the line.

Joan: Yes.

Barry Everingham: Now you want to speak to the Mātājī about the curing of alopecia? Joan: Yes I do.

Barry Everingham: We'll, we'd better explain to the listeners what it is: it's the falling out of hair in clumps. It's not baldness.

Joan: Well yes that's...

Barry Everingham: Is that right? Joan: It's areas of baldness.

Barry Everingham: Areas of baldness? In men and women? Joan: Yes.

Barry Everingham: Are you a sufferer of it? Joan: Yes I am.

Barry Everingham: Well here's the Mātājī now Joan.

Shri Mataji: Hello. See there was one gentleman from Australia who had the same problem. He was cured. And you can come along and get your realisation. After realisation it will all work out. All right? Joan: What do I have to do?

Shri Mataji: Nothing. You just come along and see Me.

Joan: Do I have to bring something along or come?

Shri Mataji: Just come and see Me.

Joan: Where was it again? Barry Everingham: Now tomorrow night Joan, it's at the Exhibition Building, do you know that, in Nicholson Street, Carlton.

Joan: Yes.

Barry Everingham: At 7 o'clock.

Joan: It's a very big building.

Barry Everingham: Well whereabouts is the...

Shri Mataji: It's the main hall.

Barry Everingham: It's the main hall.

Joan: The main hall? Barry Everingham: Yes.

Joan: Yes.

Barry Everingham: That's at seven o'clock tomorrow night.

Joan: And there was a Sunday one? Barry Everingham: Yes that's at 1267...

Joan: 1267.

Barry Everingham: Burke Road in Kew.

Joan: Burke Road.

Barry Everingham: The Mātājī is telling me that you're welcome to stay for lunch.

Joan: Thank you.

Barry Everingham: All right? Joan: Yes, thank you.

Barry Everingham: Well I hope you'll come along and meet Her.

Joan: Thank you.

Shri Mataji: May God bless you.

Joan: Thank you.

Barry Everingham: Thank you and goodbye.

Joan: Goodbye.

Barry Everingham: our telephone number here at 3UZ forum. Les is our next caller.

Barry Everingham: Hello, Les you want the Mātājī? Les: Yes I'd like to, thanks very much.

Barry Everingham: Well here She is.

Shri Mataji: Hello.

Les: Hello.

Shri Mataji: Yes? Les: Is this, would this be a form of Yoga?

Shri Mataji: Yes. You see it is Yoga in the sense that it is spiritual Yoga, by which you really get the union of your Chitta, or what you call the of your attention, with the Divine.

Les: Oh, I see.

Shri Mataji: with the spirit. Is not the physical Yoga and the way we practice physical Yoga today...

Les: Is spiritual Yoga is it?

Shri Mataji: Yes, you become one with the Divine.

Les: Oh I see.

Shri Mataji: All right? Les: Thanks and what time is the meeting on Sunday?

Shri Mataji: It's at seven o'clock.

Barry Everingham: Oh, Sunday morning is at ten o'clock.

Les: Ten o'clock?

Shri Mataji: Yes and another one is at seven o'clock tomorrow evening.

Les: Do we, would we, would I have to bring anything?

Shri Mataji: Nothing, but I think it would be nice if you were to come tomorrow at seven o'clock.

Les: Tomorrow? Barry Everingham: That's at the Exhibition Building in Nicholson St.

Les: Yeah, that's the top end of town.

Barry Everingham: OK? Good. Thanks Les.

Goodnight. We'll just...

Les: Thank you.

Shri Mataji: Goodnight.

Barry Everingham: take a commercial break here on 3UZ. It's... to 11 on 3 talkback radio (327)...

Good evening Helen? Helen: Good evening.

Barry Everingham: You want the Mātājī? Helen: Yes please.

Barry Everingham: Here She is.

Shri Mataji: Hello.

Helen: Hello.

Shri Mataji: Hello.

Helen: Hello.

Shri Mataji: Yes? Helen: Mātājī, I've read in the Bible, in John's gospel, where Jesus said that, “These things I have spoken to you while I am still with you, but the Counsellor, the Holy Spirit, whom the Father will send in My name, will teach you all things." Mātājī, I'm wondering if You're that person?

Shri Mataji: I must be. Isn't it? Don't you reach, reach a conclusion at that point? Helen: Yes.

Shri Mataji: All right, thank you for this. Thank you very much.

Helen: Thank you.

Barry Everingham: Our telephone number is 347 3477.

Mātājī, we're getting a lot of calls from people who want to know how you can cure them. They want to speak to you and say, look I have TB or I'm an alcoholic, or I have diabetes; I smoke; I'm a homosexual; they're saying all these things, now can you cure me? Now I gather you don't want to speak about the method.

Shri Mataji: No, you see it's a simple method as I said, that you have to become your Spirit. That's all it is and I'll explain to them tomorrow morning how you achieve your Spirit and once you achieve your Spirit you get cured, that's the point.

Barry Everingham: Of whatever is wrong?

Shri Mataji: You can't say that everyone will be realised, everyone will receive the thing; but most of the diseases get cured, so far I've seen most of the disease got cured. But there's no guarantee about anything.

Barry Everingham: Right, well now until we're ready to take a few more calls let's go back to the Hare Kṛiṣhṇa's because a lot of people in Melbourne witness them in the streets and in their communes. What basically do you find the matter with them?

Shri Mataji: Basically, they're nowhere. You see because by singing the songs like that of Śhrī Rāma they spoil one center of Śhrī Kṛiṣhṇa. They spoil the center which belongs to Kṛiṣhṇa himself is Viśhuddhi Chakra. He resides in that center. They don't know the center they are ruining, by all the time saying his name. First of all, you must be connected with him. Kṛiṣhṇa has also said “Yogakshemam vahāmyaham", first you get your Yoga, unless and until you get Yoga there's no use. Because if you are not, say, connected with the telephone, if you use your telephone are you going to achieve anything? We are nowhere if we go on using that telephone. On the contrary, you spoil the telephone. In the same way they are spoiling their telephone which is to be connected with Śhrī Kṛiṣhṇa.

So, first they must get their Yoga. Even about Bhakti , about devotion, Kṛiṣhṇa has said these things are like flowers, leaves and water, if you give me I take. But while giving He said, “I want ananya Bhakti ." Now this is a very diplomatic word, because Kṛiṣhṇa knew that people are mediocre, so he played a little diplomacy with them because they, you cannot handle them straightforward.

So he said, “Do ananyaBhakti ” means when there is not the other. Means when you have united yourself with Śhrī Kṛiṣhṇa Himself.

Barry Everingham: Are the Hare Kṛiṣhṇas a force to be reckoned with in India? Are there many Hare Kṛiṣhṇas in India?

Shri Mataji: You see they are all imported people. People ask Me all funny questions about them.

They said that now our rich people used to give some sugar to the ants but now because we are producing a lot of ants in Maharashtra, there are lots of sugar in Maharashtra, there are no ants left, so now they have imported these ants from outside. That's all right let the rich look after them, but they are penetrating into the villages.

Barry Everingham: It's the same as the Hare Kṛiṣhṇas?

Shri Mataji: Yes they are the same.

Barry Everingham: We have a call from Mary. Good evening.

Mary: Good evening, how are you tonight? Barry Everingham: Fine, thank you. You want to speak to the Mātājī? Mary: Yes I heard you just say a few minutes ago that alcoholism can be cured.

Barry Everingham: Well yes Mātājī claims that.

Mary: Well, I don't think it can. I'm a recovering alcoholic and I think you can only arrest it a day at a time. You can't cure it.

Barry Everingham: Did you hear that? Mary: What did.

Barry Everingham: The lady said that she is a recovering alcoholic.

Shri Mataji: Oh, she can be completely cured.

Barry Everingham: But she says her program is cure a day at a time.

Shri Mataji: No, no, no. It is overnight sometimes.

Barry Everingham: Did you hear that Mary? Mary: Yes but I find that very hard to believe.

Shri Mataji: It's really fantastic, I must say. Do come over.

Barry Everingham: Do you want to go to one of Mātājī's meetings? Mary: I wouldn't be able to get to them to be honest.

Barry Everingham: What about Sunday?

Shri Mataji: Sunday morning.

Mary: Yes I know where it's at, Yes. Barry Everingham: You've got the address? Mary: Ah, I've have the address.

Barry Everingham: Well I hope... 00h I'm sorry here's ma...

Shri Mataji: I'm just saying this is the address of our ashram.

Barry Everingham: Yes.

Shri Mataji: So they can always come there.

Barry Everingham: You can go that address any time and be given help.

Mary: Yes, but I still think, you know you can only arrest it a day at a time, sort of.

Barry Everingham: Well perhaps Mātājī would like to expand on that. Mary says she believes it can only be helped one day at a time...

Shri Mataji: She has to believe in herself little bit more.

Barry Everingham: Do you believe in yourself Mary? Mary: Yes.

Shri Mataji: Well it's all right.

Mary: I believe in AA too.

Barry Everingham: In Alcoholics Anonymous. Right well if they're doing good well stick with them.

Goodnight.

Mary: OK then.

Barry Everingham: Ah Sue, good evening.

Sue: Hello.

Barry Everingham: You want the Mātājī? Sue: Yes.

Barry Everingham: Can you hear this lady Mātājī?

Shri Mataji: Yes.

Barry Everingham: Can you speak up please? Sue: I was wondering if you can do anything to help handicapped children?

Shri Mataji: They can be helped, they take some time that's all. But you have got this address of My ashram? Barry Everingham: She has a center at 1267 Burke Road Kew.

Shri Mataji: Where you can come and they can help you. It takes little time but they can help you.

Barry Everingham: Are you there Sue? Sue: Yes.

Barry Everingham: Can you explain to the caller why it takes a little time?

Shri Mataji: You see, because they are handicapped from childhood and it's a second nature with them, so it takes a little time.

Barry Everingham: But they can be cured.

Shri Mataji: They can. We have cured so many of them like that. They have to have patience a little bit with them.

Barry Everingham: Do you have a handicapped child Sue? Sue: Yes.

Barry Everingham: Yes, well perhaps you should.

Shri Mataji: You should try.

Barry Everingham: Go to 1267 Burke Road Kew if you're inclined.

Sue: Yes.

Barry Everingham: All right? Sue: Yes. Ta.

Barry Everingham: Thanks a lot, Bye bye.

Next we have Kosa? Hello. Is that how you say your name? Kosa: Kosa.

Barry Everingham: Kosa. You want to talk to the Mātājī? Kosa: Yes.

Barry Everingham: Hello, what do you want to say? Kosa: I, I think you're way out.

Barry Everingham: She thinks you're way out.

Shri Mataji: Yes, I am.

Barry Everingham: She says, She is way out.

Shri Mataji: Thank you for saying that. May God bless you.

Barry Everingham: Are you still there, Kosa? No, she's gone.

Here is Bill. Bill? Bill: Yes, it's directed to the person who rang in a little while ago.

Barry Everingham: To Mary.

Bill: about alcoholism, she said she found it very hard to believe that an alcoholic could be cured as Mātājī said overnight. I am a Sahaja Yogi. I was an alcoholic for eight years. I used to drink at least a bottle of scotch a day for eight years, you know that was minimum, finished it completely, overnight. It just, the desire just left straight away.

Shri Mataji: Well I never knew. Yes it's true he's such a wonderful man. I never knew that he was an alcoholic.

Bill: And other people too. There's a woman here who was an ex-heroin addict. Again, those things can be cured and can be cured permanently. It's been three years since I've had a drink. There's just no desire for it there at all anymore. It's gone. You get something much greater when you have the connection with the Spirit.

Barry Everingham: Well, that's a wonderful story and thank you for telling us Bill.

I think I must say here at this point that the Mātājī is here at 3UZ as our guest and Her views do not reflect the views of our station, or us.

So if you just bear that in mind. I hope you don't mind me saying this.

Shri Mataji: Oh, no, no.

Barry Everingham: Sometimes people think we have you here for some other interest in you. We'd just like to make this very clear.

Shri Mataji: Oh, yes, yes it's true.

Barry Everingham: Oh I must share with you here, everybody who's listening, a picture that has been given to me. I've seen this before. It shows the Mātājī sitting on a platform. It's taken in India and it's a coloured picture and it's a very attractive picture, but the amazing thing about it is that She is sitting in a ray of light. Now, I was shown this picture at the weekend by somebody who is a photographer and they told me that it was sent to one of the photographic firms and they ran it through whatever scanners or whatever they have and there's no explanation for it. Now I'll just say again it's Mātājī sitting in a ray of light, perhaps She can explain how it happened. Mātājī, what's your explanation for this phenomena, phenomenon?

Shri Mataji: God is miraculous isn't He? How can we explain a transformation of a flower into a fruit? Like that when there is a Divine personality, many things can happen like this which cannot be explained at this level, but they are to be treated just like miracles, I think, for the time being. Later on we'll start understanding them gradually.

Barry Everingham: And you understand that do you?

Shri Mataji: Yes, I knew all this was happening.

Barry Everingham: But nobody else did?

Shri Mataji: No and they just photographed it somehow. It was happening when I put My hand up and it stopped;

also when some people photographed My feet there were flames coming out of My feet and hands and everything. There have been so many such photographs.

Barry Everingham: Well it's extraordinary. We have another call. Ross. Hello Ross. Oh dear Ross is gone.

Hello Kathleen, you said you'd ring back.

Kathleen: Yes I did.

Barry Everingham: You want to speak to the Mātājī? Kathleen: Yes I would, very much.

Shri Mataji: Yes what is it Kathleen? Kathleen: Good evening to you.

Shri Mataji: Good evening.

Kathleen: I'd like to ask you what qualifications you've got.

Shri Mataji: What qualification I have? Kathleen: Yes.

Shri Mataji: I have none. On the worldly level I have none I think.

Kathleen: Well then what can I talk to you about?

Shri Mataji: What kind of a doctor? Barry Everingham: No she said, what can she speak to you about...

Shri Mataji: About? Barry Everingham: Kathleen wants to know as you say you have no qualifications what she can talk to you about.

Shri Mataji: I am a Mother, that's all.

Kathleen: So am I.

Shri Mataji: Good. Then we are on the same point.

Kathleen: But what I'm asking about is, you know the qualifications. You know I've got qualifications.

You've got qualifications haven't you?

Shri Mataji: Which qualifications you mean? Kathleen: Well, what are you talking about then.

Shri Mataji: I've no qualification, I told you. I don't believe in human qualifications. There is no need to have human qualifications if you have qualifications from God. All right. What qualifications Christ had, can you answer Me My question? Kathleen: But wait a minute now what are you preaching to me about?

Shri Mataji: I would like to ask one question of you, what was the qualification of Christ? Kathleen: Well, I'll tell you what the qualifications I've got. The qualifications is the people that I love.

Shri Mataji: The people...? Barry Everingham: The people that she loves are her qualifications.

Shri Mataji: Oh that way. Then I have many. You would be one day one of them.

Kathleen: In great respect to you: with respect to you, as my, my if I were sitting in your chair I think I'd do a better job than you, love, because I don't preach to God. Everyone belongs to God, we don't have to have someone sitting in a chair with you, love and you know I don't know what you're talking about.

Barry Everingham: Well, Kathleen, I'll explain it to you at some other stage my dear.

Kathleen: But now, now Barry...

Barry Everingham: I'm afraid we...

Kathleen: Now wait a minute Barry.

Barry Everingham: Yes.

Shri Mataji: She's very aggressive. Your qualification, you're an aggressive person, that's what it is I think. You forget it. Forget it.

Kathleen: Forget what?

Shri Mataji: Forget this question because you are just in an aggressive mood.

Kathleen: No I'm not.

Shri Mataji: Yes you are. You don't want to listen to anything you see. What is your love doing? Is it working out something? I don't talk of love, but My compassion works. Does it work, your love? Does it? Kathleen: I tell you what. I've the greatest love in this world that anyone can have. Don't you worry about that.

Shri Mataji: All right. Then let others say about you that. You don't give yourself a certificate.

Barry Everingham: Thanks a lot Kathleen.

Now we have Ross. Hello Ross? Ross: Yes, I'd like to talk to this lady.

Barry Everingham: Yes, here she is.

Shri Mataji: Hello.

Ross: Hello. Look I can't come to any one of your places because I'm a paraplegic and I'm in a wheelchair.

Shri Mataji: You're in a wheelchair? Ross: I can't get there.

Shri Mataji: You can't come to My ashram? Ross: No, no, I don't go very far at all.

Shri Mataji: All right. In all...

Ross: I've got a disease called *[UNCLEAR* Badgers] disease.

Shri Mataji: All right. Now what we can do; you send us a letter with your address and I'll ask some people to come and see you all right? Ross: All right, thank you.

Shri Mataji: Thank you very much.

Barry Everingham: Now Ross do you know where to send the letter to? Ross: No, I don't really.

Barry Everingham: Have you got a pencil and paper handy? Ross: Yes.

Barry Everingham: Well you send...

Ross: Just a moment.

Barry Everingham: Yes, while Ross is getting the...

Ross: Yes I've got it.

Barry Everingham: Oh, you're right. You send a letter to 1267 Burke Road Kew and just mention in the letter you rang the forum for some information.

Ross: Yes.

Barry Everingham: and you were told to drop, write the letter and somebody would come and see you.

Ross: Good. Thank you very much.

Barry Everingham: OK Ross and thank you for your call.

Ross: Goodnight.

Barry Everingham: Goodnight. We're due to go to a race but they're running late so... Anybody who wants to ring in to speak to the Mātājī well you only have a few minutes as She's leaving us at eleven o'clock and we're having a race in the meantime. I'll just repeat that address again for you where Her center is. It's 1267 Burke Road, Kew and there's a meeting tomorrow night at seven o'clock at the Exhibition Building and also on Sunday at ten o'clock. Now let's get back to talking to

Mātājī and I've got some wonderful pieces of paper here and I'm in a mess as usual because I got to be tidy and when I'm tidy I never know where I am. Now you knew Mahatma Gandhi as a child?

Shri Mataji: Yes I knew him all My life, till he lived, I mean till he died I knew him very well. The last time I met him just one day before his death...

Barry Everingham: Oh, excuse me, just as it gets interesting we're going over to a race but we'll be back. [Race.] The forum continues now with Barry Everingham. Tonight's been one of those nights. First of all we talked about politics and I asked you not to while we had the Mātājī here and then the Mātājī had to go and we had to turn a lot of people away who wanted to speak to Her. But before, for any of you still listening I've been asked to tell you Her center at 1267 Burke Road in Kew and there's no charge.

Contents: 1983-03-10 **Radio Interview 3DB, Melbourne, Victoria, Australia**

Question:... Right now. Actually to be more specific, She's in the studio with me right now... Shri Mataji and we're going to talk to her. Good morning.

Shri Mataji: Good morning.

Question: How do I address you, do I call you.

Shri Mataji: Mother, you can call it, it is better to call Me Mother.

Question: All right thank you, Mother. Mother, now you are India's living saint, do I stand or do I sit, or...

Shri Mataji: Yes that's what they say Question: India's greatest living saint and founder of the worldwide Sahaja

Yoga. Mostly when we think of spiritual leaders, we think of men, but, quite obviously you're a woman.

Shri Mataji: Yes I am. I think this work can only be done by the Motherly love and compassion and patience and men can't have that much patience. I think a Mother was more needed at this time.

Question: Men don't have patience, Shri Mataji?

Shri Mataji: I think so, women have more patience, specially Indian women are known for their patience. I don't know about the women here. If they are copying men then they may not be also having equal patience.

Question: What makes Indian women so special where patience is concerned?

Shri Mataji: They are brought up that way. They are told that you have to be the bearing power, you have to be like the Mother Earth, so they develop that from their very childhood.

Question: To be referred to as India's greatest living saint, that's certainly an honour. How did that come about?

Shri Mataji: You see there are so many living saints in India and they have told Sahaja Yogis about it, that She's the highest of all. But I've nothing to claim, nothing to ask for because it makes no difference to Me.

Question: You're travelling the world and You're here in Australia at the moment to bring your message to people in our country. What is the message that You want to pass on to us?

Shri Mataji: I have to say that within us lies the power by which we can become ourselves, that is we become the

Spirit. That's what we have to achieve in our evolutionary process. And this is the epitome of our evolution. Unless and until we become that, we are not going to be people who are satisfied, people who are secure, people who are emancipated. We cannot solve any problem on this world without becoming the spirit. Because human beings are still in an awareness which is, is transitory. It has to be somehow or other transcended. Once you transcend it, then you will find that you are all one and belong to the same great primordial being. That's the thing that should happen to all of us; to feel that we are part and parcel of the whole.

Question: Well it sounds all very simple. How do we do that?

Shri Mataji: It's very simple again, as the living process is, every living process is simple. That everything is built within you and once you just get your awakening through any enlightened soul you can understand this very well.

Some enlightened soul has to give you enlightenment. Like a light which is enlightened can enlighten any light and that enlightened light can enlighten other lights.

Question: Yes and I understand that, but isn't that what all other religions have as their message too?

Shri Mataji: Yes, I am here for every religion. They are all one, there's no difference at all in them.

They were just flowers on one tree of life which were plucked by different people and they're saying, “This is mine, this is mine" and that is how they have made them ugly and dead. They all belong to the same truth. I am here to prove them. Each one of them.

Question: You have been doing your work and spreading the message for a long while haven't you?

Shri Mataji: Yes please.

Question: In fact, since you were a child when you were recognized as a special person by Gandhi in fact.

Shri Mataji: Yes, I think he did.

Question: How did he come to recognize?

Shri Mataji: You see My father had taken all of us to see him and he [Gandhi] suddenly picked Me up and he said, “I would like to keep the child with me." That's how I stayed with him when I was a child and then I grew up and whenever I had time, a chance, I used to go and see him. Even before his death, one day before that I went to see him and I had a daughter of mine, a little girl and he was very happy to see that.

Question: How old were you when you first met Gandhi?

Shri Mataji: Seven years of age.

Question: Seven years?

Shri Mataji: Yes.

Question: So you were recognized as a great child at that time?

Shri Mataji: Yes.

Question: You, ah, have you, have you seen the movie `Gandhi' by the way?

Shri Mataji: Yes, I have seen it. Yes.

Question: Did you enjoy seeing the movie?

Shri Mataji: Very much. Very much. I mean it brings Me back all the memories.

Question: So it must be a fairly accurate recreation.

Shri Mataji: Yes, quite, quite.

Question: Of Gandhi? It is said that over the years, Shri Mataji, you have in fact caused some miracles to happen.

Shri Mataji: Yes, for human beings it is a miracle but not to Me. Yes it is, it is. It looks like miracles also.

Question: Well, what are some of the things that we would think were miracles that have happened?

Shri Mataji: Like I have cured many people of their diseases and all that in a very short time. Or else, once it happened in London, it has happened many a times in India, but once in London a boy fell down from a bridge and he saw Me coming down and curing him and then he told the newspaper people about it and they couldn't believe it, but they published it in the newspaper and next day he saw My photograph and he said, “This is the lady who came and cured me." And at that time when all this accident took place I was Myself addressing a meeting of about five hundred people in the town hall.

Question: What actually did you cure him of, if he fell off a bridge?

Shri Mataji: You see, he fell down; he had all fractures and things; he was unconscious.

Question: And how did you cure him? Did you touch him or...

Shri Mataji: Just, I touched him because in the unconscious you see if it is a universal truth, in the unconscious you can move about. Unconscious is like the ether you have.

Question: You talk about Sahaja Yoga. Can you explain that to us?

Shri Mataji: Sahaja, `Saha' means with, `ja' means born. It is born with you. Yoga means union with the Divine. It doesn't mean those acrobatic things we do. It really means union with the Divine; and also Yoga has another meaning, that, the deftness, the technique.

So, first you have to get your Yoga, to be one with the Divine, to feel the All-pervading Power of God's love and then to learn the technique.

How to work it out for others and for yourself.

Question: There are meetings that, um, your organization and the people that have brought you to Australia, have organized and, oh here that are. You will be at the Exhibition Buildings tonight in Melbourne at seven p.m?

Shri Mataji: Yes please.

Question: And you invite people to come along and see you and listen to what you have to say?

Shri Mataji: Yes please.

Question: What do you do at these meetings?

Shri Mataji: I first bring them to logical conclusions, as to what to expect for Self-realisation, then I explain to them the knowledge of the roots, the knowledge of this force that is within us. And then I also ask them to put their hands towards Me and by that they can feel Cool Breeze in their hands. Yesterday there were three hundred to four hundred people, most of them felt Cool Breeze around them through their fingers and it was a great experience.

Question: And that will happen again tonight, at the Exhibition Buildings?

Shri Mataji: Yes, please.

Question: And also on Sunday at ten o'clock at the center, Warren what is the center's name? Warren: It's the Sahaja Yoga center.

Question: The Sahaja Yoga center at 1267 Burke Road in Kew. And that's on Sunday morning at 7 o'clock. But tonight the big public meeting which everyone is invited to go along to is at the Exhibition Buildings at seven p.m. Shri Mataji, thank you for being with us this morning.

Shri Mataji: Thank you very much.

Question: And for explaining to us why you're here in Australia and I hope your time in Australia is very enjoyable for you and certainly worthwhile.

Shri Mataji: Thank you very much, very kind of you.

***Contents: 1983-03-10*, Public Program, Day 3, Melbourne, Victoria, Australia**

To all the seekers of truth I bow. Doctor Reeves has spoken rather strongly today. I think he's a very great Australian to have that kind of a wisdom to see through the nonsense and the mockery that people were inflicting, on simple naive seekers from abroad. It requires a great intelligence and common sense to see through that. But the greatest of all is the desire to do good to others, to be touched by the agonies of others, to be upset, what others are suffering. This is the biggest thing that really brings you to the right point of understanding. What he said is absolute truth. I've been to all these Gurus to find out what they have been up to. And they've been telling everyone that “She was my disciple." Another said, “She was my disciple." I just wanted to find out what are they doing to these people.

How are they grabbing them and what are they managing? I knew the Divine path, I knew the holy path, the pure path, but I didn't know the path of the crooks, of the antichrist and actually I had to find it out Myself. And that's how I went to all of these people in a garb that, I've come to learn, they never recognized Me. What you do and all those things.

And that's how I've been able to find out methods in the permutation, combinations of your barriers, how to achieve en masse realisation. In the beginning of My life I started with normal, common people, intelligent people, educated people in all walks of life. I had to go through various types of phases in which I met all types of people and I could, through My subtle methods, find out what are the barriers. But the worst of all, which concerned Me the most of all, was that the great seekers of the ancient times have gone into such mesmerism, into such ego-pampering processes that how will they retreat back? It was a big concern to Me.

I have tried after getting so many normal people first to Sahaja Yoga, then to these combinations. I must confess that it is not easy to give realisation to people who have been to those Gurus. Day in and day out I have to work out the permutations and combinations of barriers, of terrible barriers within them.

It's not a easy thing, but, thank God, I have achieved it by My own love and concern. Still I must tell you those who belong to some Guru are very difficult people for realisation. Last year in Melbourne we had about I think fifty people like that and it was impossible to give them realisation and they even tried their level best, they

found it difficult to get it while a drunkard could get it in no time, an alcoholic could get it in no time, a prostitute could get it in no time. Can you imagine? What harm is done within yourself that, it is not easy to give them realisation. And even if they get realisation, because they are so ego-orientated they fall back. They mock, that's the only thing they can do. They're least bothered about their own realisation. They are not bothered. They're identified with that idea that they belong to some sort of a cult and they always try to be with them.

Even in Perth we went, then in Adelaide I found these, some of them are paid by Gurus to come and disturb us. To that extent these people who are seekers of God are going down. They've no eyes, no sensitivity to feel what is the truth is. And they're not bothered about their own well-being. This is the worst thing, that is happening to them. It's a thing of concern. Every time I have an interview anywhere in Australia, or America, anywhere they ask Me such questions that why not your government stops these things. Why not your government do something about these people. They have amassed so much of money.

This Muktananda now, we have learnt officially he has got sixty thousand rupees worth of diamonds and both the disciples are fighting over that. Still, you see it is impossible for people to assert that whatever has happened has happened, it's a naiveness we went into. Let us get to the real thing. They just can't think of it. And, anything that Guru says they listen to it not even logically think about it. Moreover if you talk to them they don't know anything about reality.

Now as you have seenWarren, then you have seen William, there are all these Sahaja Yogis are equipped with complete knowledge about Kuṇḍalinī and how to give realisation and how to cure people, what are the problems. I mean William, I have never told him anything about it as such. But he has given realisation to so many people in your Melbourne.

So you start manifesting your own powers and you don't live on some sort of an ego that you belong to some cult or anything, but you belong to yourself. Every individual becomes a beautiful flower, that's what we have to expect within ourselves. That's what really you are seeking. Not to be called into this Guru or that Guru, but your own Guru within yourself, is your Spirit. Is the Shiva's Spirit within you. Today of course he has already told you about these three centers which I would like to deal with you.

The first center that I dealt and the second and third are very important, but these higher centers are playing a very vital role in our being. The one which is the heart center is looking after the security of God's children. When a person sees something horrible this center starts pulsating fast. Till the age of twelve years the sternum bone which is placed in the ribs here, as you know, creates antibodies to fight any invasion within, whether mental, emotional or physical. These antibodies get distributed till the age of twelve years throughout your body. And when this sternum gets the message it starts shaking and it conveys, communicates, through no nerves or arteries or ways any connection known so far, to these antibodies that they should all fight. They fight

the disease, they fight also the things, what you call possessions. They also fight your own mistakes. That's why this is a very important center within us.

If a lady is an insecure woman, if she feels insecure then this center is always in a pulsating mood. And that's how it makes all the antibodies very tired, because they're all the time in a state of emergency. Also these cults have used this method of putting people onto emergency. Give them exercises by they jump, jump, jump or something like that. Now you can ask any doctor, this kind of jumping without any support can create impotency in a personality. Now this is very physically used method by these people to make them nervous by making this center move very fast. Now when these antibodies are tired they become absolutely numbed down and they cannot find any strength to fight any aggression. Now in everyday life also if some lady as I told you is nervous and she has problem and she's always afraid then what happens that this system start exerting itself too much, ultimately it gets sick and then she can develop a disease called the breast cancer.

This breast cancer is very common nowadays among women in the West. Because the motherhood of the lady is challenged. This center is bestowed upon by the deity of Mother of the Universe. And when the lady finds that her motherhood is challenged then she starts feeling very nervous, this center goes into over-activity and then she developed this cancer of the breast, troubles of the breast, all kinds of such troubles because the antibodies have become now very weak. On the left hand side of this center is the center what we call as the left Heart

center. But beyond that is residing the Spirit, in your heart, in the organ, separated from everyone. The Spirit is the reflection of God Almighty within yourself. And the Kuṇḍalinī is the Holy Ghost which is the power of God, which is the Primordial Mother, expressed within you as the Kuṇḍalinī.

So we have got within us that power, Shakti and the Shiva, sitting in your heart.

So this Kuṇḍalinī has to rise to give you realisation. The baptism, the real baptism. Not an artificial one.

Now it can happen in the person is a problem. It used to happen. What knowledge I am telling you is not the knowledge of today. Is the knowledge of very, very ancient times. Fourteen thousand years back Mārkandeya, a great poet in India, has written about it. After that there were many other poets who wrote about it, till in the sixth century, Ādi Shañkarāchārya very clearly wrote about the Kuṇḍalinī in his *[UNCLEAR]*. Nobody has said so far from those ancient writers, the Kuṇḍalinī gives you any problems, or She makes you dance, jump and all that, is all modern nonsense. Traditionally nobody has said so.

Sixth century is the time when Ādi Shañkarāchārya incarnated on this earth. Buddha got his realisation without doing any dancing or anything. You know for definite.

So this new idea of all these happenings are done by a generation of these horrible people in these last fifty years. I would say there has been a holy trinity as well as a unholy trinity. These people preceded the others who were to come to execute what they wanted to do. These

antichrists had two types of things, because how to neutralise also the writings of the ancient times. Like Freud was one of them. There are some more. They came down like this and wrote some things to uproot human beings completely, first of all, from reality. And then another lot came in for using that as a written thing for them, because writing is something great and then preaching what these people have preached using that as a base, to express themselves.

You see all hand-in-gloves knowledge. But if you read any ancient book which, many are not translated because nobody's interested in that. They diverted all our attention from the sublime to absolutely wretched life. And this uprooting has taken place because these are antichrist activities. They are all joined together, they never talk against each other, that's one thing great about them. And Christ has said that Satan is not going to talk against his own house. They praise each other, meet each other, I have seen them behaving like that. Give them presents. This one gives presents to another. Big fraternity exists between them. Great fraternity, no problem within. But the real saints in India who are living in the forest and Himālayas, into the hills and dales I should say, hidden away from you people, are just quite aware that these are antichrists.

The first thing that happened when these people started manifesting themselves, India is very good at astrology, so as soon as their birth date came in they just cast their horoscope and said, “Now let's see what's in their horoscope." So, most of them changed their birthdates also. Nothing consistent. And when you ask them why

you're not consistent, they said change is the way the life is, but that is life.

You are talking of something eternal. How can eternal change? It's very difficult to make people take to eternal life than to make them take to just mundane life. You know that. Now see there's a show on today how many castes there are and how many people there are to see that. But to take to real life, it takes time, otherwise why is it all the great saints and all the great prophets and incarnations were tortured by human beings? Why did they torture them? So this is one of the things one has to realise, that the Spirit resides in your heart which is the Sat Chit Ānanda as they say, is the one which is the truth, which is the attention and which is the joy.

Now first of all we must understand what is attention. What is God, who is an attention. What does that mean. God who is the attention means, God knows about everything that's happening. He's aware of what is happening in this world. He's the only spectator of the drama of life which is created by His power, the Primordial Mother. He knows each and everything about us, whatever He wants to know, He can find out. There is no problem about it.

So He's the knower and He's the knowledge too.

So when we become realised we have to know, through our awareness we have to become collectively conscious and this is a very important point which we must remember. It's not very difficult to understand that you have to become something more. Only by wearing some dress or putting something in your neck what do you become? Some people tell Me, “We lead a very good life

Mother so it should be all right." But good life is according your concept. Even according to the Divine concept if it is a good life, for what? Everybody will ask, for what, why do want to lead such a religious life, for what? What is the need to have such a life, one should ask oneself, why to lead such a life which is so conditioned? The answer is, you have to have balance to ascend. If you do not ascend what's the use of building up this balance within you? The purpose is to ascend. If you cannot transcend, then, this is just a binding, your mental projection, that you should lead this kind of a life and that kind of life. Is just your mental process.

But when the Spirit ascends then all the religions are born with you. They get enlightenment, you just don't do things which are wrong. Just don't do it you, you just don't like it, as we have told you that there are people who gave up their drugs and things overnight. Is a fact. Because as soon as this happens the enlightenment brings forth complete new awareness which refuses to have anything that is not good for this body. You just have the things that are good for your body, for your life. You don't have to fight with yourself that, `O God, how will I give up?' In the morning, you say I will not drink in the night but in the night you drink.

So in the beginning there is no need in Sahaja Yoga, today to say that don't do this and don't do that. There's no need at all. Once it is enlightened within you, you just look after yourself. But when the Spirit starts coming in your attention you become collectively conscious and you know. You know, again.

It's not mental projection. You know about yourself. You know what centers are catching on your fingers, you can feel fingertips. You can say, you know on your fingertips. And you know about others also. And also if you really learn the complete technique which is very easy to learn, within a week you can learn it, you can help another and yourself very well to rise above this level to a higher level. People have all kinds of fears these days. It's a very abnormal situation. They don't have any joy. Only fear. They live with fear. They were telling Me this person who cannot live out in the space, there's fear of even building bad oxygen, then they have fear of germs touching them and all those things are there. They have lost confidence in life.

By awakening of this center within you, you become absolutely a normal person. You have no fears.

Because nothing that is wrong can attack you. You are well prepared for it. There's a strength within you which really makes you very confident. That's why this center is very important for us to know that this center gives us that strength, that confidence. The other day, every program, they ask Me another question, “What do you think about Australians?" Which is a very, very common question I've found.

I said that they're great people, very nice people. But they lack only one thing is complete confidence in themselves. They haven't got that confidence that they should have. They are not aggressive people.

They are not bothered about aggressing other territories or anything. But a kind of a diffidence is still in them

which they should get rid of. Completely. You are the people who belong to God.

And why should you have any diffidence about it? But this diffidence is completely finished when you get this center awakened within you. To get this center awakened you have to do nothing. The Kuṇḍalinī herself rises and if you have any problem in that center she comes back again. She rises with a greater force and hits there, opens it out and awakens the deity of that center so that you feel very confident. Today if you see, Doctor Warren so confident, I must tell you, he was not, he was quite diffident. He thought you all are going to beat him when he tells you all these things. But today he's a changed man.

Now we have on the right hand side of this is another part of the center which we call as right Heart.

This center is the father's center and the left Heart is the mother's center.

So if your fatherhood is challenged in any way or also husband wise we can say that. If the husband is not loyal to his wife and is playing tricks with her, he gets this into trouble. But physically he feels it very much because he gets asthma from her. Asthma one develops, but this is more the center of the father. If the fatherhood of the person is not all right.

For example if a girl has lost her father and she has never seen him she might develop asthma. If the grandfather had asthma the child might develop asthma. It comes from the father's side. Anybody who has asthma problems should know that there is something wrong in the fatherhood side. Maybe the father is sick and you are

worried, maybe you are a good father, but the son is not all right so you are suffering, anything like that, you see could be responsible for this asthma. But if the deity here is awakened you can be all right and you can get rid of your asthma, quite all right. On the left hand side is the center of your mother. If the mother has died very early such a person is a nervous person and such a person also doesn't trust anyone. He can become secretive by nature, sulking type. He may not open his heart to anyone because he doesn't trust anyone.

Some people who have no mother whom they have not known may become extremely cautious by nature because they think they have to look after themselves, extremely cautious. But with Sahaja Yoga you can awaken this center and you become a complete personality, without any fear, without any nervousness and without any malice to your parents. Actually after Sahaja Yoga, I have found, many people who have just forgotten their parents, have been very angry with their parents, given them up, would not forgive them, went back to their parents. We had a French girl in England who had not seen her mother for eighteen years and the mother was alone, a widow lady, but after realisation, she has a tremendous feeling. She went back and looked after her mother and also started doing Sahaja Yoga there.

It's a very, very common thing that you start expanding your heart to others. You start loving other people, you start understanding them. I know of a man in America, I gave him realisation and he said, most surprising, “I went to the race this time. I said this would be the last time I

go to a race and there I find my uncle and I wished him and he was amazed, he looked, started looking at me, because I had not wished him all these years at all. He just started, he was quite amazed at my attitude. And now he has become a great friend of mine." So the friendship which is a pure friendship, is not homosexual and all nonsense, but a pure friendship based on pure relationship develops. And then you don't feel insecure.

In a society where even a mother's love is challenged one would feel extremely insecure in a thing like that. If a mother has to love the child she has to think, “I hope there is no bad feeling in my mind." In America it happened. There was a little boy of eight years, just a little boy of eight years and her [his] mother said that he has started taking lot of drugs and things and these drugs have created a problem for this little boy of eight years, can you imagine? So I couldn't bear it, I just took the boy to My heart and I kissed him, he said, “Mother, this is never done to me by my mother." So I asked the lady, “Why didn't you do this to your child? He's only eight years of age, doesn't he love your care and your expression of your love?" So she said, “Mother I feel guilty." I said, “How?" “Freud has said..." Freud was a perverted useless fellow. He died of cancer, look at his life. These psychologists when they come in contact with other people who are suffering from pathological troubles, they are pathological cases and when they deal with pathological cases, they don't know how to protect them. Jung has said about it. Then they catch those diseases among themselves and they start generalizing this for everyone. They have generalised. It's an absurd

thing. In Rome there was a girl who came to Me she said, “Ah psychologists, horrid, horrid, horrid." I said, “What happened?" “They're telling me I have bad eyes towards my father. I felt like beating them." Is all absurd things, you see to create, this is antichrist, to create a feeling of enmity, that everything is perverted, polluted. It's so pure.

In India nobody can understand this. Thank God these Freud and all these people just touched the periphery of India and it's like an elephant.

So nobody is there and nobody believes it.

So I have to tell you this that there is no such thing as polluted relationship or bad relationship. Is all pure relationships.

We must understand we are not animals. Even animals have got sense, so do you think we won't have the sense of purity within us and holiness within us? So all these ideas also drop out completely and you develop a personality. You live with others. In the ashram now we have many girls, boys, they're all are like brothers and sisters. There is no problem on that.

Now we have the other center which we call as the Viśhuddhi Chakra. This is a very important center which is bestowed upon by Śhrī Kṛiṣhṇa Himself. The right Heart by Śhrī Rāma and left Heart by Umā, or you can call Her the wife of Shiva; while the Center Heart is bestowed upon by the Mother called Jagadambā, who is the one who helps people to cross this ocean of illusion and to protect them. This is the Divine Mother. The other day you were asking Me about Divine Mother, this is one of the glimpse of Her.

So now the other center which we have here is very important center, called as the Viśhuddhi Chakra.

This is the center Vishuddha. One is shuddha means `pure' but Vishuddha means `absolutely pure'. This has got sixteen petals as we have got the cervical plexus expressed in the gross which has also got sixteen sub plexuses. It tallies with medical science completely. Now this Viśhuddhi Chakra is bestowed upon by the deity of Śhrī Kṛiṣhṇa. Śhrī Kṛiṣhṇa is the one which is the evolution of the Viṣhṇu Tattwa from there upward to the state of Primordial Being. He's the one who resides as the Primordial Being, as the whole, as Akbar. When Mohammed Sahib talked of Akbar he talked of Śhrī Kṛiṣhṇa. This is the finger [shows both index fingers] which represents this center and He said, “Put these into your ears and say `Allah hu Akbar' you get in connection with the Virāta." Now what Sahaja Yoga does is to make you in contact with the whole. It makes you in contact with the whole. It's not that it limits you but it makes you one with the whole.

So one must understand that what you have to achieve in your realisation, is just not talk of Śhrī Kṛiṣhṇa, just singing about... which is absurd. People don't understand that in Oxford St we find people with all these nonsensical things going on; begging, asking for alms. I feel it's such a insult to Śhrī Kṛiṣhṇa that people in His name are begging.

But is done in all religious movements that people beg in the name of God. There is no need to beg.

First you equip yourself with the blessings of God then there is no need for you to beg at all and begging is

against God's realisation, against Self-realisation. You must have self-esteem. That's one thing very important. If you do not have self-esteem you cannot get realisation. Why should you go on the streets and beg is absolutely absurd, is a showing-off thing which is of no use to yourself. By doing this you are really corrupting the name of Śhrī Kṛiṣhṇa. But, if you take the right path, if this center is awakened your hands become connected with the Primordial Being and you become, your hands become collectively conscious. Medically they accept that the extremities have got something to do with the sympathetic nervous system. That far, no more than that.

But in Sahaja Yoga you'll be amazed that the vibration starts flowing through your hands when you take the name of Śhrī Kṛiṣhṇa. And these vibrations, when you want to find out what are these, then you'll be amazed they're relayed to your centers within yourself. Even if you get ten children who are realised Souls and tie their eyes and ask them about a person who is sitting before them what's wrong with him they will say one finger or this finger or this finger or two fingers. Because you can feel the charring, you can feel sometimes a kind of a heat.

Sometimes you may feel the numbness. If you feel the numbness on your fingers then you must know the person has to die.

So many things you can know, all the permutations of these seven centers and this one. One, five and six and seven.

So we have seven centers.

To understand about the centers first you must get your realisation, that is important. In the beginning you'll find the vibrations are coming, going, coming, going. It is not steady. First you must steady yourself.

Then you can find out, from your hands, what are the centers catching because these vibrations are nothing but the Power of God is flowing through you. They understand, these vibrations, they coordinate, they are life's force. They're the one who create all these living things like they are the one who sprout a seed, they are the one who transform the flower into a fruit. All living work is done by these vibrations which is called as Chaitanya, Om, Rūh, Cool Breeze of the Holy Ghost and All-pervading Power of God. That starts flowing through you, first time you feel them. Yesterday many people felt it and people were very happy that so many felt it because that's a sign that here many people are going to get realisation. You don't have to go anybody, you just have to practice little bit and find out. You become such an expert. One person in India who got realisation has so far given realisation to at least ten thousand people in a village.

Many villages. He's a very ordinary man. We wanted him to come but was a kind of a visa problem, so he could not come. He's a very simple farmer and he got his Self-realisation and he knows so much about Sahaja Yoga that you be amazed, he has not been to any university, to any college or anything, but he is so knowledgeable. Because once you have these vibrations they guide you.

So the Spirit sitting in your heart guides you and tells you what is right and what is wrong. If you have to ask a

question, `Mother, is there God?' If you ask this question immediately there will be a tremendous flow saying that it is there.

Now how to understand that these are the vibrations of God, also this question can come. We can judge them relatively. For example in one of the programs in Poona people invited Me to speak in a place which was owned by Brahmins and they opposed it, they said, “She's not a Brahmin so we will not have Her here." So they said, “All right, we will publish in the newspaper, because Her name has gone in the newspaper, we'll tell them that these people are so Brahminic they don't want to have Her." Of course they didn't want to have that bad name so they said, “Let's have Her." These people never told Me what happened. Suddenly I said, those who are Brahmins, come down.

So four or five came and sat before Me, these are Brahmins without knowing the Brahma.

So I said, put your hands before Me and they just started shaking like this and going back. I said, “What's happening to you?" They said, “Mother, you are Shakti that's why it's happening to me, to us” but I said “What about the others, it's not happening to others." So they turned round and said, “Look at these, they are also doing like this." I said, “Ask them from where do they come." They went and asked them, they said, “We are coming from the lunatic asylum of Thana." So these fanatics who believed that they were Brahmins were reacting the same way as these lunatics and they believed that they were Brahmins. They were not supposed to touch anybody. There were untouchables

people and there were, the one that gave them realisation was from so-called untouchable, a shoemaker. Now he's become their Guru of all these Brahmins and he's teaching them about God.

So this center gives you the power to be one with the whole. It has many powers but the main power it gives you is the power to be one with the whole and to have all the powers of that deity within you awakened so that you can become aware and make others also aware of it. Those people who talk too much catch on the right Viśhuddhi. Those who do not talk at all catch on the left, those who feel guilty catch on the left. Those who think they are all right and aggressive, catch on the right, it's like that.

So this has to be understood in the right perspective, that if you misuse this center what happens to you, so how you should give yourself a balance to improve that.

But the best part of Sahaja Yoga is this, that when you give them realisation they're separated from themselves. They'll come and tell Me, “Mother, my Āgñyā Chakra is catching." So if you ask them, “Really?" “Yes Mother, very much." That means they're suffering from too much ego, but can you imagine anybody saying, `Mother, I'm suffering from too much ego.' Because you are separated from yourself you see your ego, the big balloon like thing, you say, `Mother, please remove my ego.' That is how people talk to Me. They will tell Me, “Mother, I talk too much. That's why my right Viśhuddhi is catching, you better cure it, I must stop my talking too much." So you start correcting yourself because you get separated from yourself, you become the Spirit and the rest you see. Like

I see My sarī, if there's a spot, I would like to clean it, I'm not identified with the spot.

So that is how it happens, you are no more identified with yourself and you start seeing the faults with you and you try to correct it. That's how you become a beautiful person by your own attention, not by anybody else, it is you who has to do it.

Now we have a very important center here called as Āgñyā Chakra. This is bestowed upon by the great incarnation of Lord Jesus Christ. We have no idea as to how this incarnation has come on this earth because if you just read Bible it is a little bit of Christ. We see they allowed Him to live only for about four years to talk to people, within four years He was killed, so He had no time to tell you all about it.

But He did the job what He was supposed to do and which He achieved in His lifetime but if you read some books in other scriptures like Devī Māhātmyam where the Goddess was the one who created Him and how She created and what She did to Him and everything is given in detail and in every detail, you'll be surprised, is the life of Christ. Only thing there He's called as Mahāviṣhṇu and not as Christ. But even the name of Christ comes to Him from the same heritage which I was telling you, that His name was Yeshu not Jesus, because in the Bible I get Myself confused when I read that Anna was not Anna it was Hannah. John was Yohan, every name has been corrupted in the English Bible.

In the same way they have corrupted Christ's name, Yeshu into Jesus, actually some people called him Jesu. This is the name given to him by Śhrī Rādhāji, the one

who was the power of Śhrī Kṛiṣhṇa. She's the one who gave Him this name because She was very much indebted to the foster mother of Śhrī Kṛiṣhṇa who was Yeshodā and that's why She called Him Yeshu. Yeshu is the word in Hebrew language and we call Yeshodā as Yeshu, also some people in our what you call in a country language, call her the same thing as Yeshu. You know that Y's and J's are sort of brought together like `Yugoslavia', they call it as Jugoslavia.

So his name Yeshu comes from that and that's how He was created as a special one, in the Devī Māhātmyam it is said that Kṛiṣhṇa has said that you will become the support of the universe.

Now in India people were seriously waiting for Mahāviṣhṇu to come and tell them, that Mahāviṣhṇu has been born. But the people who went to India they had Bible in one hand and pistol in other hand or a big gun or maybe a huge big cannon and that's how they entered India and they said that you must get converted. Now what is a conversion, God only knows. You can take a donkey and put a thing on that [indicates across forehead] and you're Christian. You don't become a Christian. That's how they spread Christianity throughout India which was all absurd type of Christianity. I was also born in one of the Protestant Christian families. My father was a realised Soul, My mother was another, they were very learned people and My father told Me, “God, look at this now, what are these Christians doing to Christ." And he was the one who fought for Independence, he went to jail, My mother went to jail and he was member of our constituent assembly, parliament and all that but

Christians only started recognizing him when he became a member of something or a mayor of a place. They had no other idea of a person that somebody has spiritual endowment or any sort of a spiritual powers. Now, in our family we were very much with Gandhiji, all of us, we sacrificed a lot for the country and My father decided to marry us all out of community, not among Christians, because he thought these Christians are so much worshipping these missionaries, they would even pray for their health, health of their dog and health of their umbrellas. It was such a wretched condition of these Christians in those days, I mean so dedicated they were to these missionaries. The missionaries were only busy converting people.

Now this Mahāviṣhṇu Tattwa, the one who was born as Christ was never understood, never told, they never read anything about it and never found out.

So Indians believed that so far Mahāviṣhṇu is not born and so it continued with the idea that we have to still go on because in the principle Mahāviṣhṇu it was written that not only You will be the support of the universe but You will have such purity within you, because He is the Omkāra, He's the Chaitanya, He's the vibrations, that's why He could walk, that's why He was resurrected. That it was said that when His Advent will come He will cross this path, this is the cross, the resurrection part and by His advancement He will be able to suck in the ego and superego within you, the Karmas, the conditionings, the ego in you, by which people will get their realisation.

So Indians continued with the idea that we have still to pay for our Karmas, Mahāviṣhṇu has not come, because

of misrepresentation. Once I told them that Christ was Mahāviṣhṇu you see thousands are getting realisation because they believe in Mahāviṣhṇu, they of course respect Christ very much but they did not know that He was Mahāviṣhṇu. If He's Mahāviṣhṇu it's perfect and that's how He was enlightened and the people got their realisation in no time because they're educated in Him, they know what it is you see.

These missionaries just read some Bible in some schools and all that and came down but they did not know how to correlate the whole thing. You see it cannot be truth just in Bible, it has to be everywhere and that is what happened when they came down and they told us something which was not Christ.

Now this thing happens to us also, that when Kuṇḍalinī rises, Christ is born within you here, He's awakened within you and when He is awakened, ego and superego both are sucked in and you get a space here and when you get that space here the Kuṇḍalinī shoots off and that's how you feel the Cool Breeze on your head. I have given at least seven lectures continuously on Christ in a church called as Unity church.

It was again the unity and fraternity of all the horrible people, they were preaching about Rajneesh, at least Rajneesh is a antichrist, anybody can see. When Christ had said, “Thou shalt not have adulterous eyes” to that extent His purity has gone, how can you accept Rajneesh as a Guru for any spirituality? But they had books from all kinds of horrible people. They had no books which were ancient books with them, nothing, no knowledge of any kind. Indians don't depend, the real Indians I mean, not

the westernized pseudo Indians who have been to Cambridge and Oxford but those who are real Indians don't depend on these books, they think it's all trash that has come and will go away. It has no meaning and they had all these books put there to destroy really the unity within us, lies, when you become collectively conscious.

All this work has been done in the ancient times, as Mohammed was one of the prophets who came out of the ten prophets, Moses, Abraham, Lao Tze, then we had also people like other prophets, Socrates.

Recently in India the last one we had the Sāi Nāth, not the Satya one, but the Sāi Nāth who lived who was representing this great principle of Primordial Master.

So this is the story of your evolution. The last is the most important center is the Sahasrāra which is open today, open from 1970, fifth May, that we can feel the Sahasrāra opening out. About this center also if you go to My center you'll find many, many tapes which will explain to you this center, the only thing is that all the seats of all the subtle centers within us lies along the line like this and all the centers are within us. This is the Āgñyā Chakra and that's how it moves. This is the Viśhuddhi Chakra, this the Heart, this the Nābhī, what you call the solar plexus, then we have got in the center here is the Mūlādhāra and around it is what you call the Swādhiṣhṭhān. That is why when the Swādhiṣhṭhān goes out or you can get diabetes, you get blindness, blindness is due to the fact that your Swādhiṣhṭhān is not all right.

Many people get blindness, when their eyes open can be cured by Sahaja Yoga. In Geneva I cured a lady in ten minutes time, it's all due to possessions that you get in.

Coming to the Āgñyā Chakra one has to say that all these Chakras have movement on both the sides. One moves to the collective subconscious, another moves to the collective supraconscious.

Now if at the Āgñyā Chakra you start moving like that in the collective subconscious you start seeing all the dead things, like great deities, or you can also start seeing, past you can say. If you move to the right then you start seeing colours and also you start seeing lights and all those things, with LSD also you can do it, if you take LSD. Many who used to take LSD and were suffering from coma just came to Me and they just never saw Me, they just saw the lights.

So that is not the right thing to see Me as light or as some previous deity. Is to see Me as I am, is the present.

So we have to be in the present. Sahaja Yoga brings you to the present moment by which you enjoy every moment of life in its all dynamics and that's how you become a dynamic, loving affectionate, relaxed personality. May God bless you all, thank you very much.

Three days have been very good. I would expect you also to come on Sunday morning, not at seven o'clock as he said, but ten o'clock Sunday morning to our ashram which he will tell you the address. Please come along and you can also have your lunch with us. I hope we will be able to cook something of all of you because this your Mother's house and in a Mother's house you must at least eat your food. That's what it is, it's very personal, it's very intimate, is not like the Guru sitting on the seventh story and all everybody bowing to him, is not like that. It's absolutely personal, individual and everybody is

given full proper attention and respect in Sahaja Yoga. May God bless you.

Today we'll not have any questions because we have had too many of them before and wasted lot of time. Let us have it without questions, without asking anything you can get your realisation.

So tell your mind to ask questions later on. Once you have got realisation you won't ask so just tell your mind which is working all the time and giving you some ideas, tell it to wait because by thinking you have achieved nothing so far. By mental conception you have not achieved anything because after all this mind is a limited thing and you have to be triggered into unlimited space and for that if you think you cannot reach there.

So actually first thing that happens to you that your thought stops when the Kuṇḍalinī crosses Āgñyā and when you feel this Cool Breeze you absolutely get calmed down and relaxed. Yesterday was a great experience for people. I'm sure today also it will work out the same way. You have to do exactly as I tell you which is a very simple thing, you don't have to do anything great, just take out your shoes because this Mother Earth helps us, just take out your shoes.

Just take out your shoes, sit comfortably, if you have anything tight on your body just remove it, but keep yourself comfortable. Put your hands on your laps, one thing is you have to be comfortable so that during the process you don't feel any uncomfortable feeling, so please just put both the hands towards Me first of all, just hands like this. Now you have to close your eyes. Please don't open your eyes because if you open your eyes the

Kuṇḍalinī won't cross the Āgñyā Chakra, so please don't open your eyes till I tell you. Is nothing is going to happen, there's nothing to have any fear, everything is going to be all right, but I must warn some people have a habit of showing off and they start going into a funny contortions and that's not needed at all, here. It is something that happens inside, Antar Yoga. Nothing happens outside, it happens inside so you be sensible and wise. Take your realisation is the best thing you can do to yourself and to anybody else.

So put both the hands towards Me and just close your eyes. Just close your eyes, all of you should close your eyes, even if you have spectacles you can remove because it also improves your eyesight, so remove your spectacles. Sit very comfortably, don't worry about others, just now you have to think about yourself.

Now left hand as he said is the power of desire so put it left hand on your lap towards Me, that is not to be removed. Only use your right hand to raise your Kuṇḍalinī on different Chakras on the left hand side throughout.

So we put our right hand on the heart with full confidence. Now, as I've said, you have to have confidence. On the heart, if there's anything in your pocket you'd better take out and if it's a coat or anything put it inside, put it on your heart, press it a little bit and say with full confidence, `Mother, I am the Spirit.' Feel no hesitation in saying that you are the Spirit, you are not the body, mind and this ego. You are the Spirit.

Close your eyes, all of you, keep your eyes shut, even if they're not shutting press them a little, they'll shut down.

They must relax. Don't say mechanically, with full confidence I said. Please say, `Mother, I am the Spirit.' Now put down this hand on the left hand side, on the left hand side of your stomach. Now this is very good for you because the principle of Guru resides in the stomach area.

So you put your right hand on the stomach on the left hand side and press it a little bit with your fingers, fingertips. At this point you have to say ten times, `Mother, I am my own Guru' again with great confidence and understanding and respect for yourself, with all your self esteem, `Mother, I am my own Guru.' Please put your left hand straight towards Me, both the legs should be straight on the ground, little apart from each other. Now you raise your right hand now upward again to your heart position, put it on your heart again and now twelve times you have to say, `Mother, I am the Spirit.' Now put the same hand on the left hand side of your neck, right hand on the left hand side of your neck on the left Viśhuddhi as we call it, at this point sixteen times you have to say, `Mother I am not guilty' because you have been feeling guilty for nothing at all. Sixteen times, there are sixteen sub plexuses, you have to say sixteen times with full confidence, `Mother I am not guilty.' Now raise this right hand onto your forehead, after saying sixteen times. At this point you have to say, `Mother, I forgive everyone' because you know this is the center of Christ and Lord Jesus Christ has given us a prayer which is the mantra which is the chanting of this center is, so you have to say, `Mother, I forgive everyone' because if we do not forgive others, God is not going to forgive us. Without

feeling guilty you have to say, `God forgive us because we forgive all those who have done harm to us.' Without feeling guilty again I'm saying, without feeling guilty, with all confidence. The guilt is too much in you people. What is the guilt for, you see, what are you guilty of, as I've said yesterday God is the ocean of love, ocean of forgiveness, ocean of compassion. Trust Him. Not to feel guilty and say that, `Mother I forgive everyone.' Now put this hand on top of your head, on top of your head where it's a fontanelle bone area which was a soft bone in your childhood and try to press it. You'll find a little heat coming out. Now raise the hand little higher, about four inches and see if there's a Cool Breeze coming out. If not, change the hand, put your right hand towards Me and left hand on top of your head, otherwise also you can do it. Again, change over, again and again and see if there's a Cool Breeze coming out. At this point you have to ask for your realisation, I cannot cross your freedom, so you have to say, `Mother, I want my realisation, Mother I want my realisation, please give me my realisation' anything like that.

Now you may open your eyes and put your hands like this, just like this. All of you put your hands and ask a question in your heart, `Mother, is this the Cool Breeze of the Holy Ghost, is this the Brahma Shakti, is this the All-pervading Power of God?' The breeze you are feeling is not the breeze from any air conditioner or anything, is the breeze. Now put down your hands and see for yourself. Again I'll tell you how to raise your own Kuṇḍalinī, please follow Me. This will take about two minutes more but it will help you to establish yourself.

We have left hand in front of the Kuṇḍalinī like this and you have to move the right hand up, forward, lower, backward, like that, you have to move. Now, start it off. Keep your eyes open, start moving your Kuṇḍalinī. Just see how I'm doing it.

Now, take it up on your head, take it up on your head, stretch your hands up there and give it a twist.

A nice twist and give a knot to your Kuṇḍalinī, because your hands are now powerful, you are working through your hands. Now again start it. Do it again. But do it properly, you should do it this way as I'm saying it to you. Not the other way round. Now take your hand up there, give it a twist, again and give it one knot. For the third time you have to give three knots because of three powers. Let's do it again please. Do it with full understanding that your hands are powerful, there is power flowing through your hands. Only thing that you want, that it should be established. Now one, two, three. Now see in your hands, how do you feel? All right. Those who came for the last two days definitely are feeling. Even people who came yesterday might be feeling, most of them. Those who have come for the first time may not be but doesn't matter, it is going to work out. You are all going to come and see Me on Sunday. I'll be very happy to meet all of you.

Now if you have any personal problems, you can come and see Me just now. Thank you very much.

But not for a long time. It's already nine o'clock, so for about half an hour I'll be here. Thank you very much. But when you come on Sunday please bring some sugar, salt and oil with you and water. Not too much, little bit. But

not so little also, bring at least half a kilo, or quarter of a kilo.

Contents: **1983-03-xx Shopping, Myers Departmental Store, Melbourne, Victoria, Australia**

[On the first floor, Shri Mataji tries all shows and none of them fits Her Feet.] Yes, the reason why I have a tremendous difficulty with shoe fitting is because My arch is too high and that was he result of the churning of the ocean.

Contents: 1983-03-12 **Morning Conversation, before the Sea Pūjā, Melbourne, Victoria, Australia**

Shri Mataji: Why don't we go to the sea today? We could have a Pūjā there.

[Later on:] When does it rain in Melbourne? Peter Brownscombe: [replies that mostly in summer and winter].

Shri Mataji: That is not good. It is a sign of imbalance. It should rain in spring and autumn. That will change now.

Contents: 1983-03-12 **Sea Pūjā, Shoreham, Melbourne, Victoria, Australia**

You won't be doing a Pūjā to Me today, I will be doing a Pūjā to Śhrī Gaṇeśha Myself.

[Later on while calming the sea:] I was born from the sea, that is why she is reacting so much.

[At the end:] Now Australia will have no problems with draught.

[Afterwards, looking at the city of Melbourne:] Too much negativity. It is looking very black over there.

Let's try and get rid of some of the negativity before the program tonight.

Contents: 1983-03-13 **Workshop and Conversation with Sahaja Yogis, Practice of Sahaja Yoga is More Important Than Precept, Garden, Kew Ashram, Melbourne, Victoria, Australia**

Sahaja Yogi: They are just asking questions, Mother.

Shri Mataji: What kind?

Sahaja Yogi: Just practical.

Shri Mataji: Practical? That's good, practical questions are very good.

Sahaja Yogi: Would you like to talk to them for a while?

Shri Mataji: First I talk to them and then ask the questions.

I am overjoyed to see you all here. Actually the whole night I was working on Melbourne seekers, that they should come today and should establish their realisation very well.

Now we have to understand few things about Sahaja Yog very clearly and there is no compromise on these few things that we have to accept. Because, as I told you, Truth cannot compromise for you, you have to compromise for Truth.

So the first is that Sahaja Yoga is not just a precept, is not just a precept: it is practice. It is not just a mental idea. Now you got realisation, all right, but it is not sufficient. Even if you think that you got realisation so, now, you are all right, you become the Spirit, all right;

but still it is more a mental conception than a real identification.

So it is not that if you get you realisation and you start the awakening of your Kuṇḍalinī, starts very well. Still it is to be understood that it is the practice of Sahaja Yoga which is more important of the precept of it.

There are many people in India who can't read or write, who don't have all these mental activities as you have and are not so complicated as you are [laughing]; some of them are aboriginal people, just living in the villages, very simple people. They get realisation, they feel the joy much faster than the complicated ones will and they just start working on it.

You have to work it out. This is not the compassion that speaks, talks, elaborates and advertises, but it works. Sahaja Yoga is a thing that works, the religion that works. And this is what we must understand first of all, that it is not the talking, it is not the precept that you are a great soul: you have to become.

Not that you are not, you are. But you have to be aware of it. More light has to flow into you.

Definitely you must be something special to get it, no doubt. But you must allow your lamp to be cleared out, cleansed, so that more light is given. And it works wonders for people who honestly want to ascend in spirituality.

As I told you before also that it is a concept that many people have that Sahaja Yoga cures people. It is not true. It is just as a by-product it may cure you; just as a by-product.

So one must understand the blessing has come to you only because you are a seeker, you have done a lots of good in your past life and this life also and that God has chosen you to be in His Kingdom.

But it cannot be demanding, you cannot demand, you cannot demand anything from God, He has to give you, because He knows what you deserve. And He gives you much much much more than what you deserve. I mean, I have seen people who have been in Sahaja Yoga that after one year they start asking, “Mother, what did we do to deserve all this?" They just can't believe it. I said, “Must be something, you must know there must be something that the blessings have come to you." This is one thing that one has to understand that you cannot make Sahaja Yoga compromise for you, you have to understand all the techniques and things about Sahaja Yoga.

Now the thing could be that you may start doubting, you see, so that's what we have people who are doubting about it and doing all kinds of things; you see, in the beginning, they are rather slow movers.

So we have to sort them out to begin with, because the second stage of awareness is doubtless awareness: you are doubtless about yourself, doubtless about the working of Sahaja Yoga, doubtless about God's existence, doubtless about His Laws. You become absolutely doubtless, not mentally, it's a state, it's a state of your being by which you achieve lots of results and you really become powerful: you can see your compassion so powerful, so discrete, so understanding, so forbearing. And you are amazed of yourself, you really become a

saint in the real sense of the word, that you become humble, flowering, beautifully, not taking anything aggressive upon yourself; and you are really in the Kingdom of God that you feel that you are looked after, protected, guided, blessed, every moment you walk along.

And that's the state everybody should aspire to reach this doubtless awareness; and unless and until you reach that state, we don't call you Sahaja Yogi, you may start calling yourself, but that's left to yourself. There are not sort of... we do not have sort of certification, or things going on; or we do not give any written certificates to people, nothing of the kind. It is you who have to certify yourself.

So gradually people grow up into beautiful beings. They start having their self esteem fully established, understanding themselves.

But practice of Sahaja Yoga must be done without thinking too much about it. First you just try it, more trying, because if you start doubting, I tell you, your progress will be much less.

So first, just like a scientist, to try to accept one by... there is nothing that has to be done, you do not have to pay Me anything of course, you do not have to do any acrobatics or anything.

But for example a small thing like My photograph, you see, many people say, “Why Your photograph?" So “Use your photograph" I say, if that works out, you see. It is something surprising: that's how people are challenging Me “Why Your photograph?" “Why don't you use yours? I will be very happy, use anybody's." but doesn't work out,

what to do now? It's My photograph that works out, but even if you do not like it, you have to use it, what can I do? Is as simple like that, you see; but in that I do not gain anything from you, I do not want anything from you, nothing material that you can give Me. But you will enjoy, you will enjoy My love, you will enjoy. It is all for your own enjoyment, everything is done.

And this is a special time we are born in, we have a special responsibility.

Today we had a lady who came, her husband came and they were saying that “We had a son who was very well equipped and he went to one of the Gurus and he got completely ruined." And this particular Guru ne need to be rather careful about, it's this Rajneesh fellow. His disciples are rather difficult. They come to Sahaja Yoga, all right, but they are very extreme type of people. They come with a great force to Sahaja Yoga, again go back; so all those who have been to Rajneesh and have taken his initiation, have to be extremely careful.

All of you who have been to Gurus must know that they will be again and again attacked.

So you need to be rather patient with yourselves as we are with you and must know that you must assert your will power a little bit, to come up and shed off all that was screwed into your head... and you paid for it, you see. Forget it.

Some time people say that “We have paid for it, so better have it." That's not the way.

You'd better through it away. It is horrible, you have bought a snake on your head, on your neck.

So just through away all these things that they have put you on.

You all forget it and become your Self, first of all and become your own Guru. Ask your vibrations, develop your vibratory awareness and grow with it.

Some people will find also that their vibrations are not showing very good results, some of you will find that kind of thing. And when you find that your vibrations are not working out in your hands and things, you should not get worried about it. Maybe your Viśhuddhi Chakra is not all right. There are ways and methods to improve your Viśhuddhi Chakra, by which you know the exact mantras to be said and how to improve it; and we also vibrated oil and all that, you can apply here. And also there are other methods by which you can improve your sinus. And if you have any problem with the Viśhuddhi because of oversmoking or anything, there are so many ways which you can call the Grandmother's medicine, simple simple things which will work it out, should try to clear out.

So whatever center is not working out, you should get after that and don't worry about the centers that are good because those who are good are good.

So we have to look after the centers which are in trouble and try to improve our centers and complete being has to be brought into the balance.

Some people have some centers so badly off that, despite the fact they have all the centers all right, because of one center, you see, they are in imbalance.

So, first thing in Sahaja Yoga is to establish a balance.

Now certain things about morality and all that, I do not want to talk to you; gradually your self will realise what is good for you and bad for you. But in Sahaja Yoga you will be given a proper guidance as to what is to be done, how to lead a life and how to have a normal, good married life, how to have children, how to look after them, how to get to your parents.

So the social side also you can learn very well by which you really feel happy. But the main society that you have is of Sahaja Yogis. Of course you do not have to cut off from anyone, you do not have to give up anyone. But you grow among Sahaja Yogis, these are called sajñānas, you see. `Sa-jñāna', the people who are the followers of Truth.

So once you come together, it is a collective happening and it works out more collectively and it helps you much more. But if you say “Individually, Mother, I can do it” it does not work out. In Sahaja Yoga, I have seen, you do not go too far. You all have to work it together, you have to meet. Luckily, you have a very good ashram here. You all can come and meditate and take a proper health from these people.

God has already blessed this place so much. And when I came to Melbourne, I stayed in a very small little house, with, I think, two bedrooms and some sort of a thing like that. And this time I find a big, huge thing given to you and they may start here also a nice school for small children here. Your small children can go to that school where they can be looked after well, they won't have any complications.

And everything can be done at a much better level than what you find in the mundane life.

Everything has a meaning, spiritual meaning, everything in life has a meaning! So you should try to find out whatever is good for your ascent and for your nourishing of your spiritual being! I hope next time when I come, all of you will be great Sahaja Yogis and will be great people! Individually everyone will be working out on many people and we have to change the face of Melbourne completely! May God bless you all.

Contents: 1983-03-13 **Departure, Airport, Melbourne, Victoria, Australia**

Alright now? all the problems are now finished..... I'll see you all in Sydney.

Contents: 1983-03-14 **Śhrī Devī Pūjā, The Individual Journey towards Collectivity and Bliss, Sydney, New South Wales, Australia**

Now we all have realised by this time, that within us lies the peace, the beauty, the glory of our being.

There's an ocean of all that. We cannot seek it outside. We have to go within, what they call `in the meditative state' you seek it, you enjoy it.

Like, when you are thirsty, you go to a river or you go to a ocean and try to quench your thirst. But even the ocean cannot give you sweet water so how can anything that is spread outside give you that deep thing that is within you? You are trying to find it outside where it does not lie. It is within us, absolutely with in us.

It is so simple because it is your own. It is within your reach, just there.

Whatever you have been doing: going out to find the joy, the so-called joy, the so-called happiness, the so-called glory of worldly powers and worldly possessions, you have to reverse it back the whole thing.

You have to project within yourself. It was not wrong that you went out, it was not correct that you went out. You shouldn't feel sorry for what you have done so far. It was not the correct way to get to the real joy of life, the real glory of your being.

It has worked in so many people that you have entered into that subtler understanding.

Some people are only at a mental level maybe, doesn't matter. Maybe, some are only at a physical level that they can feel it, doesn't matter. But you are on the correct lines, you are moving correctly.

Try to meditate. Meditate more so that you reach your inner being. And this inner being, is the vast Ocean of Bliss, which exists in every one of us; *[UNCLEAR]* that vast glorifying flood of light that floods everybody's inner beauty.

So to approach it, you have to go within yourself by denying things which are against it, against your movement.

Sometimes the wind can be very, very strong for you to misunderstand that the glory of God is within but turn back. Every moment remember that your movement has to be inward.

When you move inward you forget the ideas of your outer glories. A person who is of a very base nature thinks that if he makes [a] lot of money, then he has achieved joy but he has not; he's the most unhappy person, if you go and see him. He's worried about small, small things of life. And you must have heard that people who are very rich are kleptomaniacs. They are worried, they are very miserly. They are worried about a needle here and there. A little thing missing, they get upset. They have so many habits that they can't live without it.

So riches have brought always a curse on human beings.

So those who seek only the riches cannot enjoy them.

Then there are some better people who think that by ruling others, by getting power, we can achieve a very great position in life. They too assume, fail. You have seen what happens to them; people don't even want to talk about them.

Now there are people who get attached to someone, to one person or to the family, to their children, to their relations, very common in India, that's also not the way you can get to God. That's also so limited. Keeps you hanging round them and wasting your energy completely.

But if you enter into your being fully, then all these things have such meaning; everything has a meaning then. In a sense [that] if you possess anything and if you're that kind of a person who is supposed to keep possessing: he never possesses, he's so detached. He's never possessive, he's so detached about it.

But he can play around because he's so detached. He can create a drama out of it. He can play with the

possessions and teach lots of lessons to people. He's so detached, so generous. He enjoys his generosity.

The whole thing becomes so different, so dynamic. All the beauty that is created by human beings, as possession, is exposed before you and you start enjoying all those things without possessing them. You understand the myth of possession.

Same with your powers that people have over other people. Those who try to make money out of Sahaja Yoga or want to have a kind of a privilege over Sahaja Yoga, it can be very subtle, this can go very far. This subtlety goes to this extent that I've seen people try to save money on account of Sahaja Yoga. That's also the attention is on money. To make money or to save money, to make a business out of Sahaja Yoga is all absurd, but if you say so I say, “Alright, go ahead for a while, try. You'll find that Sahaja Yoga is no business!" Of course Sahaja Yogis can work together, can do some business, but Sahaja Yoga is no business: is business of God, where you have to give everything that you have. Not to be attached to anything, not to be attached. There's no money to be paid as such, but all your heart has to be poured into it. If you cannot pour your heart into it you cannot achieve that.

Same about power: some people think that they can even overpower Sahaja Yogis, impress them, control them. Such people are thrown out of Sahaja Yoga completely. You have to enjoy the power of love, that people see you as their protector, as their help, as their support, as their friend, than somebody who is a dominating personality. You have to be a father head and

not a demonic destructive force which is always threatening everyone. Such people will be thrown out of Sahaja Yoga in no time. You have [are] found out. I have no sympathies with such people! Never! That will bring you down. In no way [should you]. Keep your self aloof from them. Otherwise when they are thrown away as tangents from Sahaja Yoga you might get out with them, so be careful.

Then those people who waste all their time just thinking about their family, this thing, or those who have never thought of their family also come to Sahaja Yoga. This is a very subtler ground on which they can loose their attention to their Spirit. They spoil their children, they spoil their husbands, they spoil their wives. The whole attention goes in a wrong way and it becomes a very important issue with them, how the marriages are successful, how the children are this thing that thing. They don't leave it to God.

They have to leave it to God. We are all Saints. You have to leave every thing to God.

In the beginning in Sahaja Yoga everybody says, “My husband is like that, my wife is like that, my brother is like that, the children are like this. Mother look after them." Alright, in the beginning is all right but when you grow you must get out of it.

It's an individual journey towards God when you meditate. And when you reach there, then you become collective. Before that it's an absolute individual journey within, absolutely individual journey.

You should be able to see this that, in this journey, nobody is your relation, nobody is your brother, nobody

is your friend. You're absolutely alone, absolutely alone. You have to move alone within yourself.

Don't hate anyone, don't be responsible. But in meditative mood you are alone. No one exists there, you alone. And once you enter into that Ocean, then the whole world becomes your family, the whole world is your own manifestation, all the children become your children and you treat all people with equal understanding.

The whole expansion takes place when you enter inside your Spirit and see through the eyes of the Spirit. There's such calm, such peace, such bliss exists within you.

You have to be ready for that journey. That journey is alone in your meditativeness. And the more you find something in your meditation the more you want to go and distribute it to others. That has to be. If that does not come into you, then it has not worked out. There's no purity, there's some sort of a bias. In that individual pursuit, whatever you find you want to enjoy it with others, you want to give it to others. This is the sign of a person who has been really meditative. The one who is meditative and has not been able to distribute what he has found, is cheating himself and cheating others as well. Because that joy that you receive in your meditation has to be distributed, has to be given, has to be shown. It should flow in your being as a light radiates from every illumined lamp.

You don't have to take a vow to say that, `This is an enlightened light.' In the same way, a Saint should not be certified that he is a Saint. But the depth you achieve within yourself spreads all over. It is such an action and

reaction. The more deeper you become the radiation is much more. And a simple person, very ordinary person, uneducated person can be like that. We have you know, one gentleman called Varick in Bombay, he's an old man and he's so deep. He radiates. People depend on him. He radiates love.

He's so meditative. You don't have to spend too much time on meditation but, whatever you spend time, whatever you gain, has to be visible outside: how you radiate and how you give it to others.

That's the quality of the Saints you have to be. Unless and until you become deeper we cannot save other Sahaja Yogis and we cannot save those who are not Sahaja Yogis. You have to rise higher and higher to pull the whole curtain up. Those who try to rise higher pull the whole thing upward and they give a pull to everyone who ascend with them.

So just try to keep your aim clear-cut. You must understand what is your aim in life as Sahaja Yogis.

Now you are changed people. You are no more people who have to deal with possessions or worry about them, about mundane things, about your livelihoods.

You are no more people who have to worry too much about your health and things or your personal lives. You are not also about your jobs so much, that's not important. And last of all not to worry about your family, children, husband, wife and find a pocket for you to hide into it. Because the only thing where you can really hide yourself is the love of God, where you can really get the great restful, blissful, feeling of his complete protection.

Sydney has done very well before and is progressing better, but the pace is not as it should be.

So we have to think of new ways and methods how we can spread this. But first you must assume your positions as you are. You must assume that you are all Saints that you have to do great work. Not the ego part of it but the manifestation of it. Every one of you has to decide for oneself. I'm sure it's going to work out and this time My visit is going to help you a lot by understanding what is the best to spread this light all over.

May God bless you.

***Contents: 1983-03-15*, Public Program, Day 1, Maccabean Hall, 146, Darlinghurst Road, Darlinghurst (eastern suburb of Sydney), New South Wales, Australia**

But before we come to right conclusion about our seeking, we have to understand that truth is not a mental action. If your mind says that `this is this,' it need not be that. It is our everyday experience in life, that mentally, when we try to establish something, we find after sometime, that we have not been absolutely correct about it.

Whatever is known to us is already there. But whatever is unknown, even about that, if you have preconceived ideas, that `this is the unknown, this is God, this is Spirit,' then it could be that you are very much away from the truth. But scientifically, if you have to approach any subject, you have to keep your mind absolutely clean and open, that it has been said by many great Saints, many great Gurus, that we are to be born again and that we

are the Spirit. Are we to believe in them or not? Perhaps, we should reach at least this conclusion that they did not take any money from anyone and they could not have been fake people, they did not do it for money sake.

So, if we have to be born again, to reach the right conclusion we should know what should happen to us. For example if you certify that I am a reborn again, then it is misleading. Supposing that I certify myself that I am the Prime minister of Australia, do I become? I have to become! So just by taking a certificate we are cheating ourselves and avoiding opportunity to be born again.

So to be honest is the first way we can really be the seekers of truth. If we are not honest and if we have preconceived... *[UNCLEAR]* and want to stick to it, I would say that it is rather difficult.

But logically we should come to a point where we should understand, that what should happen when we deceive the truth. In our evolutionary process, what has happened to us? Actually, our awareness has been enlightened in new dimensions that lead you up in our evolution. And animal does not understand filth scented. You can take a horse through any dirty but a human being is very sensitive he has to close his noose, or sometimes even refuses to go through that.

So in our awareness something has to happen.

And that is not some sort of an abnormal thing. Like some people, I was told, have written books where you have to become mad to be reborn. I mean in what evolutionary stage did it happen? Did the fishes become mad to become the higher animals? When did it happen that you had to become mad to evolve? It's a wrong idea

that people give because they can only make you mad, nothing else. And you like it, because one way they pamper your ego by saying that you can pay for that. Secondly they all give you a feeling that you are something different. To be something different is not to be evolved. You have so many mad people in this world. We have so many epileptic people, we have so many people who jump all over the places. There is nothing great about it. Whatever you can do easily is to jump or to shout, to scream or to misbehave, all these things are very easy for human beings to do.

But if something has to happen from the Divine and if it is a Divine process, then something should happen within us, which is not in our reach, which is something that is beyond the human reach. That has to be the Divine thing.

So we must understand that in our seeking, what we have to see is a higher dimension to our awareness. In that dimension you have to become something, like you have become a human being. You are no more a monkey, you are a human being now. In the same way, you have to become something.

In Sanskrit language, a Brahmin, who is a realised Soul, the one who knows the Brahma, the All-pervading Power, is called as `dvijaya', born again. And also a bird is called as `dvijaya'. A bird is first born as an egg and then it is born as a bird. There's complete transformation. You don't have to certify a bird that it is no more an egg. It just becomes, you see it through that it becomes.

So those who are honest and those who are really seeking, must know that you have to become something.

It's not just that you become mad or you become like some sort a funny freaky fellow, but you become really something that is in your awareness.

Now if you have to go through science, you'll find out that Jung, who was a realised Soul, who got his Realisation much later and then he defied Freud, has clearly said that if a human being evolves, he'll have to become collectively conscious. His consciousness becomes collectively aware, meaning that you should feel others within yourself, on your fingertips.

Mohamed has said at the time of Resurrection [Qiyamah] your hands will speak. Your hands have to speak. Now the hands have no tongue to speak, so what happens? It is accepted in the medical science, that the sympathetic nervous system is expressed in your seven centers on your fingers, but they don't know which are where and how it is, they cannot put it. And they are all disturbed. But they say there is a sympathetic connection with the fingertips.

So in your awareness, it has to happen, by which you have to be more alert, more noble, more dynamic, more beautiful, more loving, more understanding.

So something has to happen to your central nervous system. It must be apparent that your are just feeling something more in your central nervous system.

Now, what people are enamoured this, that, if they see some people dancing madly, they feel enamoured, is the sign that you have not been able to understand. We have seen Christ, we have seen Buddha, Mahāvīra, Kabīra, Nanakar [Guru Nanak]. We had Lao Tze and so many others. Did they behave like this? Did they become mad?

We have got Moses, did he become mad anytime, was he mad anytime, behaving like a mad person? All these new theories have started I think, fifty years back, or about sixty years back, that people believe in these new theories and they have forgotten all the traditional things that have come to us, our heritage. And we depend more on these nonsensical things, which has no moorings at all! Because the people who are supposed to be the founders of all the religions, have never behave like this and why this new type of things that has started, that people are behaving in this manner and accepting it, to be as very normal thing.

So all the seekers must know that you have to become the Spirit, means you must feel your own powers. It is not that you feel the powers of another person, now he is a person who brings down some diamonds for you, so what? Logically you reach a conclusion: do you want diamonds or do you want your Spirit? You can buy them in the market. Why do you need a Guru to do that kind of a job? There must be some juggler all kinds of these spiritual juggleries are on and when I came here from Perth,..., Melbourne and here, everywhere, all the people from the medias have been asking Me that why these Gurus have come from India and they have ruined us like this. They have so many rules, like this and that and that [laughs].

I said thank God that now, at least, you have realised it. But I went to America and told them long time back that these people are going to come and be careful about them. It has been already told about it, but people did not want to follow it. They thought that it is better that

you accept a Guru, live with him and then, when he goes to heaven, means hell actually, you'll be there. Now we are very happy that the awareness is coming to the seekers, that a lot of them are realizing that they have not found the truth.

If you are reaching that conclusion that you have to find the truth within yourself, then Sahaja Yoga will work wonders.

Now, our evolutionary process has not been anything which is dead, it is a living process. There is a force within us which brings forth our evolution and living process cannot be activated by mental activity.

For example if you put a seed in the Mother Earth, it sprouts by itself. By saying that `you'd better sprout now' or by saying that `it has sprout' you'll have just mental satisfaction of creating an imaginary image.

But actually, it has to happen. The happening has to take place. And this happening is build within you.

That has to happen within your being and is already you're destined for it. As he has told you, that lies in the triangular bone, which is very *[UNCLEAR]*, you can't even see them. I think it is drawn very small, we should really enlarge it and show, that is the triangular bone within us which contains this force called as the Kuṇḍalinī. Now regarding Kuṇḍalinī you must have read many books also.

In India, I saw some books I was amazed, written by mostly foreigners, such big books and they didn't know where the Kuṇḍalinī was in the stomach or in the nose. Such confused people need not have written, if you are confused, better not talk about it. You see, if you are

confused about something, what's the use of talking that this was the confusion, I got a choc [shock] and I got a heat and all this, then why are you talking? You don't know anything you have no authority.

So you have no business to talk about it. That means you are naive or you're being, just being absolutely a person who is uneducated about it.

Why should you talk when you are not an authority, not only talk but write? And books after books have been written by people who have no authority to write these books. And that's how they have created another myth that Kuṇḍalinī awakening is the most dangerous thing and one should not *[UNCLEAR]*.

Now imagine? What a mistake it is! Who is the photographer? So, what is the advantage in this kind of spreading news that Kuṇḍalinī awakening, which is the epitome of your evolution, which is what human beings have to achieve in their life, that's the aim of their life, to be the Spirit. And Kuṇḍalinī is the only way it happens.

So why should people talk like this and say it is dangerous to have the Kuṇḍalinī awakened? Because, why they are doing it, because they are under some anti-God activity. Because they are not with God, some sort of a sinister Satanic force which is telling these things to people that you should not have your Kuṇḍalinī awakened. Imagine, it is like saying that you should not enter into the kingdom of God. If that is the only way if you have to enter into the kingdom of God, why should you frighten the people about it? There is nothing frightening about Kuṇḍalinī awakening I can assure you.

I've had, as you know, I've been working for years together and so many people have got Realisation, en-mass and nobody has got any problem like that.

Sometimes of course you feel little heat in the body, sometimes, you feel little heat in the body; sometimes a little shaking in the body. If there is a problem in the body, if your nerves are steel *[UNCLEAR]* and anything, the Kuṇḍalinī when she rises, she little bit shakes you but it settles down. It settles you down completely and you feel absolutely blissful and peaceful. No problem is created I have seen so far which can be called anywhere near danger. On the contrary, when Kuṇḍalinī rises, she gives so many by-products, to begin with. Of course, she is the power of pure desire. The only desire that is pure in human being is to be one with the Divine. All other desires are not pure because they do not give you pure joy. You think of anything, you want to say have a car.

All right; work for it, try your loving best to achieve that. Then you have the car and you want to have something else. If that was your pure desire, it would have given you complete joy and satisfaction, it is not so.

So matter is making you run from one to another, but doesn't give you joy.

So the pure desire in a human being, is this great desire to be one with the Divine.

If you do not accept it today, you will come tomorrow. You'll have to take it, because nothing is going to satisfy you unless and until you receive the truth, you become one with the Divine.

People make, I've seen people deny for the time being, “I'm not ready” that's another style: “I'm not ready" and

all sorts of things people say. But I say: “Let Me decide" why are you worrying? “Let Me decide if you are ready or not, what is the problem is, it can be worked out." I've really worked for years together to know all the permutations and combinations and the problems and the valence you have. And it is not going to take any time for you, it's very simple, it's a living process, it is not going to trouble you, why should you have fright about it? So this is one side of Kuṇḍalinī awakening. The other side is when people think that it can be done by themselves. It cannot be done by yourself.

Somebody has to do it for you and then once you get it you can do it for others. Now for example, a candle which is enlightened can only enlighten another candle; by itself a candle cannot enlighten. But for that you have to have a real person, a person who knows everything about the Kuṇḍalinī, the one who can awaken your Kuṇḍalinī and not a person who is already chocked by *[UNCLEAR]* and who just talks about Kuṇḍalinī or he makes people jump all over the places.

There is a Guru in India who used to give Kuṇḍalinī awakening and where this doctor Warren went first of all. And they all were jumping and saying `ah, ah, u, u, i, i' and he got such a fright he said he thought it's a lunatic asylum; he ran away from that place and came to Me; he said: “No Mother, don't give me Kuṇḍalinī awakening because I'm afraid." I said, “That's not the way, that's not!" That is hypnosis, a kind of hypnosis and that hypnosis will create problem and not your Kuṇḍalinī, she is your mother and she is waiting for days together, for ages together, many lives she has waited for the great

opportunity to give you your second birth. But so far, you have not allowed her to do her work, because mentally you have put all books in your head, or all Gurus in your head, or all kind of ideas in your head. And she poor thing is waiting for that, to manifest your second birth. And that is a big problem, how to make people understand that by mental activity you cannot raise the Kuṇḍalinī.

I may give you lectures after lectures, not necessary that your Kuṇḍalinī will rise. But it will rise when I pay attention to it. And if you get your Realisation, you can also make it raise trough your attention.

That is done through the power of Chitta, Chitta. But you must have your Chitta Shakti enlightened. If you are not an enlightened person, you cannot do it. Can you do it by paying attention to somebody, raising the Kuṇḍalinī? You can see the position of the Kuṇḍalinī in many people, those who have got problems in their centers, like the second and the third center. You can see it very clearly, what happens and you can see it pulsating, it's just like a heart, the bone pulsating like a heart. You'll be amazed to see that the bone that looks like a stiff thing is pulsating. You can even see, say, see the raising of the Kuṇḍalinī, but if you have a stethoscope, you can hear the `lap dack, lap dack' way up; this is called as Anāhata, means without percussion, the sound without percussion and you can feel it on top of your head, so the same thing raising which Kabīra has said, “Only, shimu sharaka" means on the silent peak of your brain you start first feeling the Anāhata, means the sound of `lap dack, lap dack' here in your heart, you start feeling it here [on

top of the head]. And when it breaks that area, the fontanelle bone area, which is called as `Tālu', you just feel the Cool Breeze coming out of your head.

Now, this you cannot do. You can jump, dance, become mad, take drugs, take alcohols, he... grow your beard or cut it off or anything that you want to do, but you cannot make the Cool Breeze coming out of your head. And that is what is the proof that it's a living process that does this. Unless and until that happens to you, you try everything else it's going to be a big problem.

As I was telling today to the television, many sincere *[UNCLEAR]* was the problem with us, with Australians, when you say they are naive. I said: they are naive because they don't know what to seek.

That's one point, they don't what they should ask for, what should happen to them and they are attacked by people who are here just to make money, it's money making proposition. Imagine, people have maid millions and millions of pounds through you people; it's such a multimillion big enterprise and it's done on that level. And you people are enamoured by these things because it appeals to your brain some way or another and I don't know why, because it appeals to your ego perhaps. The lady asked Me: “if it is so simple Mother, then why is it people don't take to simple things?" Now, see today I came first of all here, at seven o'clock and they said there are very few people.

So I went round and I came back. I said: “That's the trouble, they don't want anything simple." But whatever is living is so simple. You cannot explain it mentally. You put, as I said, a seed into the Mother Earth, how it

sprouts, how a flower becomes a fruit, all these things you cannot explain mentally. It's a living process done by the All-pervading Power, which is the love of God and that activates and works it out and naturalise which you cannot by your mental process understand, nor can you do it. You can't transform one flower into fruit.

So this is what one has to understand, that is has to be a living process within us. And the living process is spontaneous. That is why we say `Sahaja': `saha' means `with' and `ja' means `born'. It's born with you, it's spontaneous. Like your breathing is born with you, like your pulsation is born with you, like everything which is born with you, you take it for granted, it exists. In the same way, this Kuṇḍalinī is born with you. And this awakening is also your birthright, as a human being you have the right to have this awakening within you and you should have it and you must seek that.

But, because of no education on this point, perhaps, traditionally, we are not educated to understand.

Christ came on this earth, when he wanted to explain all these things he had to go away and he lived only for four years to talk to people and in that four years the way people behaved and he way they never accepted him, it was impossible to talk to you about Kuṇḍalinī. But in the Bible it is written, I will appear before you like tongues, even in all the Torahs it is written, I will appear before you like flames of tongues. Now, what are these flames? These are the Chakras which are within us, when you see them, they look like that, the flames, you can see them clearly. But it is not the seeing the that is important, it is being; people think that if you see the light, now you

become the light. If you see the light [shows the ceiling], you become the light? It's simple, simple thing you can understand: you do not become a light if you see the light [shows the ceiling]. You have to become the light and when you become the light what happens, that you act like light. Your power acts like a light. When you are there people can see how to walk, they know how to understand the difference between a carpet and a chair and a human being. The discrimination is there. When there is light, you discriminate and you start understanding that the truth is this and this is untruth.

So when the Kuṇḍalinī rises through your Fontanelle bone area the first blessing you get is of good health. That's a minimum that should happen, but it's a by-product. But I don't want to emphasize more on good health because tomorrow we'll get all the hospitals drooping on My head, that's what I don't want. You have to be first the Spirit and you have to be the doctors and you, yourself, can treat your body as well as the body of others this is a minimum that should happen, that you become a healthy person.

Now what does that? Within us lies a power which is the evolutionary power, in the center and it is the power which we call as the power of Mahālakṣhmī, is the power by which we sustain our own character, by which we become human beings, from carbon, where it is four valences, as human beings we develop ten valences. We become eligible for our ascent through this power to begin with, because this is a power that gives us balance.

In the gross it expresses itself as parasympathetic nervous system. Now, what is parasympathetic nervous

system is? That it gives a balance to your sympathetic nervous system. Now sympathetic nervous system is the gross expression of the two other powers which are around us. One is the power of desire and another is the power of action. These sympathetic nervous systems come into play when we want to use them. For example if you want to run fast, so when you are running fast, these two powers come into power, that they give us the force to run fast. But what is the thing that brings it back to normal? It's the central power that brings it to the normal or gives it balance.

So this balancing force is the one that is responsible for your ascent. If you are not yet balanced, the same force will first balance you. Because of imbalances, so many diseases are caused, there is no and to it. Apart from that, those people who go to extremes, to the left and to the right, also can develop horrible diseases. Those who go to the left side develop mostly the psychosomatic diseases, like cancer, like *[UNCLEAR* all...] and incurable diseases.

And imbalanced people develop, say, blood pressures and diabetes and all the problems of the organs in the stomach. And the people who are too much right-sided, who are too much speedy, who are thinking of the future all the time, they develop problems of the heart and also the problems of the physical side.

Those who indulge into too much physical exercises and all that, also develop the problems of the physical side.

So it is all our doing that we gets it, mostly, or may be of our parents.

For example somebody asked Me that “how is it Mother, that leukemia is caused in the people who, children also?" They are born with it. I said the mother must be a very speedy woman. If the mother is speedy, hectic, her spleen is working in a hectic way, she sets in, in motion the same kind of a spleen that the child should have. And if that happens, the child develops a kind of a spleen which is hectic and starts producing RBCs [Red Blood Cells] which are not with the main and not in proper shape. And these are vulnerable to cancer and things like leukemia. Because at this stage, something triggers it and that triggering takes place because of an extreme behaviour of a personality which I'll explain to you tomorrow.

But in any case, physically, you feel fit, mentally you feel fit, mentally, because your extreme behaviour disappears. Mostly we take to habits; any habits we take to is, the reason is because we get bored in life or we are fed up or we are very unhappy or we are disturbed about something or we are shocked. Under the circumstances, we take to it. But supposing the reverse happens that you feel settled, you feel blissful, you feel happy, you feel cheerful, you feel on top of the world, naturally everything drops of. When you have got the highest you don't want to indulge into all these things, which are sensational, for the time being, work out for a short period. But you start enjoying that is what is eternal within you, flowing all the time. Stress and all that also disappears. Because supposing, I give an example always of a car which is about to finish its petrol, everybody it is in a stress, the car as well as the driver is

worrying that the petrol is going to finish. But supposing by some chance, you are connected to the mains and all the time the energy is flowing into you, then, then you have no worry, you have no worry and just you get over all these things.

People have a very great, I should emphasize, so we can say all the time a kind of a cocks in *[UNCLEAR]* from all the sensational practices of the society. And this quite upset us, all the time the way we are, all the time we are stimulated by these sensations.

Now with Realisation what happens, the Spirit doesn't take note of all this stimulus, nothing of the kind, it is not bothered about these things. It is just witnessing the all play as a drama and a joke and it doesn't take anything into record and doesn't react to it as human beings do. And that's how the stress stops, drops out.

On the contrary, I have met some people who have been doing all kinds of things, their hands were going like this and feet were going like that, all sort of contortions and I said “why are you doing it?" They said “we have been to a Guru and he said your stress is coming out." Now if the stress is coming out and if this is the state of the stress [laughs] when are you going to end this up? It is not possible, you must understand! You see what I feel when I talk about these things people just leave Me and go away because they get angry but I'm for you! I'm for your good! I'm saying, just understand, that how can stress get out, by this kind of a nonsensical thing happening to you, you're getting mad! This is not the way the stress has to get out, but you have to get over the stress. And that is a very simple thing to understand, that is you are

standing in the water, the waves start coming to you, coming and going and you are afraid of the waves.

But supposing by any chance, the state becomes that you become seated in a boat, someway or another, you raided up to that part that you are in a boat, then you enjoy the same waves, from there and you don't mind any kind of things. And this is the state one has to achieve. Unless and until you achieve that state, all your Guru, all your money is of no value, nothing of the kind. But this should not upset you.

Because many people also take a view that we have paid for it, so we'd better go through it. I mean if you have paid for the poison, will you go through it? It's simple thing like that because you have paid for it, better not go through it, because it's dangerous. You must see what is happening to the people who are going to these Gurus, or to these cults, or to these clairvoyance and all that. What is happening to them? Are they transforming? Are they getting any of their powers? Have they become peaceful people? Have they finished their seeking? They think that they have done it? If not, then no use going to a place like that. But human mind, I don't understand sometimes, like they see a person coming out of a pub, falling in the dirty lane and still they walk in the same pub.

So I can't understand why people do all these things. But, mainly, we have to know that, one day will come when we'll face ourselves and that time, we'll ask a question that: “Why did I not use my wisdom to understand that these are not the things I was asking for. What I was asking what the ultimate, the truth." Those who talk

about love of God, power of God, it's very easy because, you see, you can read any book and start talking, then it's “Power of God, power of love and all that.'" But it must act. If you talk of compassion it must act. It is not just I say that I'm compassion and embodiment of compassion, so what? You may be embodiment of compassion. I can gather some money from you people and start a hospital here and say I have treated so many people here, you give Me a big prize for, it's nothing. That's not the way the compassion acts. Compassion acts in the same way as the sun shine acts. If you are near such a person, you remember that somebody touched Christ and something went into that person. Christ said: “Somebody has touched who's sick." [Luke 8.46: “Someone touched me; I know that power has gone out from me."] The person got cured. The compassion must act, otherwise it has no meaning, it's just talks, advertises that you are the love power and all that. It's not so.

Something has to happen that is not also madness or any kind of a crackpot behaviour but by which you keep your transformation. And that what you should ask for, for the reality and not for unreal and in reality, you'll be amazed, you will see where you stand as far as you are concerned and others are concerned. What is the reality position? That you are the part and parcel of the whole, you start feeling that you are part and parcel of the whole. And when that happens, there is no compassion that speaks. Because supposing this finger is paining, automatically I press this finger. I just press it, because it is, it is paining

and I just feel it because it's me, it's Me there so I just do it.

So that's how the compassion acts, it doesn't think it is doing any obligation to anyone, that this finger should pay anything to me. It's mine, it's myself, how I can I not touch it and put it right.

In the same way it happens that you become part and parcel of the whole. And when you become that, you just act as a part of that whole, with all its powers. And that should happen to all of you who are seekers.

Normally Sahaja Yoga is better for people who are not extremes by nature, who are centered people, that's very good, it acts very well on them and helps them in many things. Also those who are in extremes are also brought *[UNCLEAR* drown] in the center, because Kuṇḍalinī is a movement in the central path and you are paying attention to Me and I say `you pay attention to yourself,' you cannot. But when Kuṇḍalinī rises she sucks in your attention inside like an incident or happening within and then the attention, even if it is on the extremes, is sucked inside. And when it is sucked in, it just rises out. One must know lots of things happen when it rises. It just doesn't rise just like a primule rising up but lots of things happen within your body. Lots of centers go into different kind of banghas and all that, it happens.

As a car starts, lots of things happen in the inside machinery, in the same way, when the Kuṇḍalinī starts rising, lots of things happen inside, but very smoothly. Because you are fantastically, beautifully and delicately made, with great care.

It's not easy to destroy Kuṇḍalinī, it's not easy, but I've seen some people have got very sick Kuṇḍalinī, some people have bleeding Kuṇḍalinīs I've seen. And of course, if they are devils, they may not have Kuṇḍalinī at all. But it is not easy to destroy this bone also. If you burn the body of a human being, this bone is the last to be burnt and requests very high temperature to burn it. That's why people call it a sacred bone, But when I went to Greece and I asked people “why did you call it sacrum?" They said “because we had a rapport with a Hindu Aryan group much before Alexander went there and they told us this is sacred bone. And we found out that when you burn the body, this bone remains still there.

So we thought, must be something sacred about it." Now tomorrow, the day after and after that, we're going to have three more programs. Today, in a general way, I've spoken to you because they said “just give introduction to Sahaja Yoga, what is Sahaja Yoga is and that's why I've told you that you cannot pay for it, it is effortless, it is spontaneous, it's a living process and through the grace of God it works. And by this happening, you get your transformation. And you become something else that what you are in your awareness; you become a more powerful person, a dynamic person, you start feeling another person." It's a fact. You can ask somebody who must come now all the way from Perth. And when he came to Me, he was in a big problem because he had been to Guru, these things and he realised that he made a mistake and that he could rectify but now he is rectified and he could feel this Cool Breeze actually on his head and all over.

So this is the thing one has to understand that you must honestly ask for the truth and not for something that has been told you before.

This is what it is, it should happen to you, that has never happened before and cannot happen through human effort.

So tomorrow, the day after and after that, we have three more days. One day I will talk about Chakras, tomorrow and then these three powers and last day I'll tell you what is to be done after Self-realisation, how to keep it up, how your Spirit is your Guru and how it teaches through your vibratory awareness, how you understand what is right and hat is wrong. I think that is how we'll space it up and we'll work it out.

But today, we should try to have a session of Self-realisation also and it might be, might work out very well.

May God bless you.

If you have any questions, I would like to have the questions because it's important if you have any sensible questions. But, I don't know, some people say “in this book it is written, in that book it is written or this one says like that." Please, don't do that. Because all these books have given you nothing, so better forget about them.

***Contents: 1983-03-16*, Public Program, Day 2, Maccabean Hall, 146, Darlinghurst Road, Darlinghurst (eastern suburb of Sydney), New South Wales, Australia**

[Introduction by Warren.] Aside: Can I start now?

I bow to all the seekers of Truth.

As I told yesterday to you that the Truth is what it is. It will be what it will be. You can not change the Truth for your adaptation, or for your mental projection, or for your own convenience. It will remain whatever it is.

The first point of Truth is that it establishes itself despite all kinds of *[UNCLEAR]* or all kinds of forces which are anti-God. Second it is that it caters for the honest seekers. It's like a little root coming out of the seed, goes round and round, fixes itself onto the source. The third is that it may shutter some of your ideas, it may upset some of your convictions. But when it appears it is such a great joy that absolutely you are lost in the ocean of that enjoyment. You forget everything that you have lost. You are happy that you lost that dirty boat of yours, that hanging and everything that you had and now that you have become one with the Ocean of Joy.

The Truth is your Spirit. It is eternal. It is the expression of God within us. Because you have not been able to achieve.....

Contents: 1983-03-17 **Talk to Sahaja Yogis, Burwood Ashram, Sydney, Australia**

[In the morning, Shri Mataji told of Her decision to speak openly to the world on Her being the Holy Spirit but left the time a mystery:] Perhaps tomorrow [***1983-03-18***] night.

[It happened on ***1983-03-17***, St. Patrick Day.]

Contents: 1983-03-17**, Public Program, Day 3, Maccabean Hall, 146, Darlinghurst Road,**

Darlinghurst (eastern suburb of Sydney), New South Wales, Australia

Warren:..... Ladies and Gentlemen, Her Holiness Shri Mataji Nirmalā Devī.

Shri Mataji: To all the seekers of Truth I bow.

Warren had said something today which I've been trying to avoid all these years because I thought it was not advisable at this time to talk so directly to human beings. Because as soon as somebody says such a thing, a snake called ego comes up. Or else people try to harm the cause. They don't want to hear about it. This has happened with all the great Incarnations.....

[Outside, while leaving the Hall:] I come out of love, I come for you.

***Contents: 1983-03-18*, Public Program, Day 4, Maccabean Hall, 146, Darlinghurst Road, Darlinghurst (eastern suburb of Sydney), New South Wales, Australia**

To all the seekers of Truth I bow.

I must say Warren has done a good job. Ah... perhaps we don't understand that the situation is quite deferent in the Western countries. I don't have to.....

***Contents: 1983-03-19* Talk to Sahaja Yogis, How To Bring Up Small Children, Picnic in Lane Cove Park, Sydney, New South Wales, Australia**

Shri Mataji:... Children are very happy in the nature. They are so full of joy, children are, just see.

Sahaja Yogi: They've all been down in the mud, in the river.

Shri Mataji:... Look at them, the children. How they feel one with nature immediately, you see.

... liquids, like soups and things.

Question: One month old

Shri Mataji: Perhaps you should start. A little bit soup, it's all right. Nothing wrong *[UNCLEAR]*.

Warren: Strained.

Shri Mataji: Strained, absolutely strained, that's what. But, little soup *[UNCLEAR]* would be good for them.

Warren: Some barley water, some barley soup and,

Shri Mataji: Barley water is very good. Barley water, or you can start with juices, if you like and then go to soups and then to, I mean, they, the system must get used to it, that, you see. Gradually you must bring round children, you see. Not suddenly the heavy foods.

Question: Adrian is six months. He hasn't had anything yet because we got the message that you said that it was six months that they should have food for the first time.

Shri Mataji: Who is this? *[UNCLEAR]*.

Question: *[UNCLEAR]*.

Warren: Clear, liquid.

Question: But, you know, that's the way we,

Shri Mataji: No, no, no, no, no. Food means solid food.

Solid food. You see, what, you can give them rice and dhal cooked together, make it very, because it will train up the system properly. First you start with juices. Then come to soup and then come to solid food, in the sense that it is semi-solid. You can cook rice and dhal together, make a kitcheree. She knows that, how to make it. Thin it out and give it to the child. That is only *[UNCLEAR]* but not

this dhal. Moong dhal. Moong dhal, moong dāl and rice, you can cook together and start with that, after six months. Food means, when there are solid parts.

But you said *[UNCLEAR]* solid parts? Question: Yes.

Shri Mataji: Important.

Warren: And water.

Shri Mataji: And water, you should start immediately. After a month you should start water, boiled water, you must. But I saw yours are getting, isn't it? Your child was having water all right? What is her age? Warren: Ten months.

Shri Mataji: Ah, ten months, achcha. But when you started? Warren: At what age? Question: They always had water, right from the very beginning Mother.

Shri Mataji: *[UNCLEAR* All right, they had] water. That's good. They can have water. Now what else you wanted to know? Question: The baby's waking at night, Mother. What do we do to get them out of waking up at nighttime?

Shri Mataji: You see, there are, because they're wet, in the night. That's why they get up, isn't it? Or for no rhyme and reason.

Question: Yes, for no rhyme or reason.

Shri Mataji: All right.

So what you have to do is to massage their body with oil and massage their head with oil and put a lot of oil in their heads, you see and then put some powder and clean it up. Give them a massage in the night. They sleep very well. They won't get up. In the night you should give them a massage in case they are restless in the night or

something like that, before sleeping. You give them their last meal, say, about what time is it, their last? Eight o'clock, or six o'clock? Question: It depends on their age. Gabriel and Luke have their dinner at about six o'clock. Adrian has, he goes to bed at about, last meal at about seven thirty, eight, eight o'clock.

Shri Mataji: All right.

So, what you do, six o'clock, you give him one feed, all right? And nine o'clock, another one. You can feed him one more in the night, so they won't be hungry, but in between you can give a massage on the body. Say, about seven o'clock you can do the massage. All right? So 7:30, then, he goes to bed. Nine o'clock in his sleep he must have, in his sleep and then in the morning he'll get up at about five, that's all. Very simple. Five or six. But I think you people don't massage the body so much as prescribed. You have to massage it twice in the beginning, twice: one in the night; one in the daytime. All right? Now what else? Warren: When do they stop breastfeeding, Mother?

Shri Mataji: Ten months. Gradually, they should take to bottle. Ten months they can stop, then twelve, you see. In India they used to stop after three years. Nobody is bothered, but it's better to stop it by ten, eleven months or so.

Warren: If they don't get the mother's milk, say, they have to cut it short,

Shri Mataji: Of course, of course. You should take to bottle. No harm in giving them bottle milk.

Do it properly. But you see if you do not give them nipple in the mouth of the child, of the bottle, from the very

beginning, or say about one or two months or three months at the most, they won't take it easily.

The best is to give once, one feed, at, say, three months. Start giving them one feed. When the child is sleeping you give one feed, when the child is used to the nipple. You have to understand the child has to get used to everything. Then they easily move. But otherwise is problems? Question: Yes, yes, Mother. They were started at six months but then they just don't want to eat the food that we've given them.

Some of the other babies, that have been eating solid food for a while,

Shri Mataji: But the food is not tasty.

Question: It's not tasty.

Shri Mataji: You must make it tasty and you see, you must put proper salt. Salt must be properly put and a little taste must be made, little bit of butter, little bit. You see, you must make it tasty.

Otherwise the food is not tasty. They don't like it, on the tongue, just like us.

Warren: Tell them, Mother, in Sydney, they must have salt in their food and they must have,

Shri Mataji: Oh, this is a very funny idea, not to have salt. Do you all suffer from high blood pressure? Warren: In Melbourne they refused to put any salt in food,

Shri Mataji: You see, without salt you cannot do your respiration. Ask any doctor. If there is no sodium chloride in your blood, you see, your respiration will go down. These things are essential for *[UNCLEAR]*, but not too much of everything. Salt is needed for food. I mean, these are

all funny ideas that are coming up, but the worst thing is that you are so naive, just look like children. I mean, if anybody tells you, `Don't take salt,' just the, they know you must be coming from lunatic asylum. But if you are suffering from high blood pressure, or if there's a problem of diet or something, then you fix. Salt is very important for teeth, for everything. To feel relaxed, is the best way to reduce the blood pressure. What else is there? Warren: There's also a belief that if you give children sweet foods, as a small baby and child, that it will grow up and have blood sugar problems.

So they give very sour, sour lemons, sour fruits,

Shri Mataji: You see, I told you that, you see, that how blood sugar comes in because of diabetes, isn't it, not because of sugar. It comes only because of diabetes. Diabetes comes because of thinking too much. If you make your child educated all the time, you want him to think and do this very well in the school at the age of five years, if you want him to do `O' levels, then what is it? So you see, you want to make the child into a competition. What is left over by *[UNCLEAR]*. Take it easy. Let the child study, as well as grow normally.

Warren: Is it wise for the baby to sleep in the same bed as the parents? And up to what age, Mother?

Shri Mataji: It's very small to face. Not every time. It's not proper, you know. I don't approve all the time, but little bit while and then the child must sleep in the, always be sleeping in his bed. Always, sleeping in his bed is the best, but in the same room, not in some other room. But then you should take the baby with you when you are nursing or anything. For a while, that's all. But mostly the

child should be in the bed. It's not only the parents who should sleep in between the *[UNCLEAR]*.

Warren: Until what age should young children be kept in the same bedroom?

Shri Mataji: I mean, you are now My children sleeping, so what can I tell you? You see, you are different type of people. We don't undress ourselves immediately. That's the problem. I hope Sahaja Yogis are not sleeping like that. Please don't sleep without clothes. The bhoots will enter with you. You must wear your clothes when you're asleep. I'm telling you, don't sleep without clothes. The bhoots, that's the best way the bhoots enter you. What is the need? I don't understand.

Question: Mother, some of the babies have been experiencing a lot of pain while they're cutting their teeth, while their teeth are coming through.

Shri Mataji: There's a very old medicine, called treatment powder, treatment powder. Write it down.

Warren: Yes, I know that one.

Shri Mataji: Get some ivory ring. They're very good for teeth. Ivory ring.

Warren: Teething ring.

Shri Mataji: Ivory ring. You get them in India. You get your plastic ones. You get ivory ones. You get some of these. These are very good for children.

Warren: Albert, you'd better get them. Ivory ring, ring. Teething ring.

Question: Mother, another question. What do You think about dummies for the baby?

Shri Mataji: Dummies? Question: Yes. You know what dummies are? The little rubber thing shaped like a nipple, to an extent, and,

Shri Mataji: You see, they might develop their, their teeth are coming out if you have too much of that.

Question: Yes, if you give too much, but a little bit of, maybe to settle the baby down to sleep.

Shri Mataji: *[UNCLEAR]* all right. A little bit is all right, but try to put it away. It's the best is to give Viśhuddhi treatment and not have it. Otherwise the teeth will be very parallel and you will have a lot of problems settling them back. Little bit you can give that. They are called as dummies, are they? Question: Dummies, they're called, yes. Dummy nipples.

Shri Mataji: Oh, all right, no harm.

Warren: They want to know about toilet training, Mother.

Shri Mataji: What is that? What is that?

Warren: How to stop the baby from wetting the nappies and using the pot, basically.

Shri Mataji: About at the age of only two months or three months, you must start *[UNCLEAR* putting or touching] the bottom of the baby to a pot, you see. Keep a little pot like that and try to, say, make some sounds [shhh] like that and all that. The child starts doing it and he gets used to the touch, you see, of the thing. Then he knows, that's an impulse, you see, in him, that acts as a message and you can do, very simple.

Question: Very early, then?

Shri Mataji: Very early you must start it. Very early. You see, Question: We don't do that.

Shri Mataji: I think because *[UNCLEAR* you have these *[UNCLEAR]* or, you haven't tried this yet].

Warren: Freud, Mr. Freud said we shouldn't do it, Mother.

Shri Mataji: Why? Warren: It'll give you a complex.

Shri Mataji: What? What is a complex? A complex? We all Indians do it. We don't have any complexes, I think. The one who has given the real complex is Mr. Freud himself. What complex is *[UNCLEAR* kya hoa].

Warren: All this nonsense about how you were toilet trained and if you, if you, it explains why you behave in a certain way when you're grown up and according to how you sat on the potty and, really, it's true, Mother.

Shri Mataji: You don't even know what you see. What a thing you are bothered about.

Question: Another question, Mother.

Shri Mataji: That's why you people are very addicted to bathrooms also. We are not. You see, we are there hardly for five, ten minutes, have a bath, get out of it, you see. Addiction comes from that kind of a thing. You're very bathroom concerned. That's why.

Warren: All this grafiti business *[UNCLEAR]*. Grafiti, writing on the walls, all this stuff. It's all coming from that.

Shri Mataji: You said, writing on the walls? You know, the best thing if you are constipated, take a newspaper, you see and have it used. That's how I feel some people have treated them. They say, “You get constipated." I say, “Read a newspaper in the morning." That's the place you should read the newspaper, actually; nowhere else. That's the *[UNCLEAR* big] word. Nothing else, you know. I would do that when I don't get any chance or anything. I

would say that, better read the newspaper, in the bathroom. That's the place, because such filth in there. No, no, no, no. I tell you he must be a sweeper in his last life. Must be something wrong with Mr. Freud, I think. Must have been a sweeper.

Warren: Twelve years ago in England, Mother, there was a man called Doctor Alex Comfort who's basically a descendant of Freudian psychology who said that you should have contraceptives available in the marketplace for children to buy as from the age of twelve.

So that's how far we've gone.

Shri Mataji: From what? Warren: Contraception, you see, you know the,

Shri Mataji: Oh, I see! You see, another joke. I thought it must be for constipation.

Warren: Maybe that, too. That's instead of the newspaper.

Shri Mataji: Boys don't even understand these things.

Warren: They do here, Mother, in the west.

Shri Mataji: In the west? Maybe here they are over grown. You don't allow them to be natural, putting all these ideas into their heads. Twelve years old! Question: Mother, I have some more questions. What should the mothers do about constipation in the baby, babies?

Shri Mataji: You see, they should not have constipation themselves.

Question: Well, they do when they're on the formula mixtures.

Shri Mataji: *[UNCLEAR]* we have so many ways of removing in India. Like you take that ajwain *[UNCLEAR]* and all that,

all the time when the *[UNCLEAR]* lax or raisins, dried ones, raisins, like raisins, with fruits, with the orange juice. Orange juice is very good. And also milk, boiled milk in the night.

Question: Cow's milk?

Shri Mataji: Mm, very good.

Question: That's another thing, Mother. When they're weaned from the mother's breast, are they weaned onto cow's milk?

Shri Mataji: To what? Question: Cow's milk.

Warren: From breast to cow's milk, or from breast to formula mixture?

Shri Mataji: I mean, really, cow's milk, because these formula nowadays, I don't know what, Warren: It makes black stools, it's very,

Shri Mataji: If you get cow's milk, better is to remove the cream, put the water in it and boil it, remove the cream and that's the best for the children. But boil it together, not separately. Always boil the milk and the water together, never separately.

Warren: So all these mothers on formula should transfer to cow's milk?

Shri Mataji: Uh? Warren: All these mothers who are feeding their babies on formula, on this mixture, on this powdered stuff, should change to cow's milk?

Shri Mataji: This, I mean, if the children can digest cow's milk, that's the right thing, if they can digest it. But you must know what is the amount of water you should put.

Warren: Proportion.

Shri Mataji: Because it's more natural to take to cow's milk.

Question: *[UNCLEAR]*.

Warren: Well, you're supposed to be feeding them off the breast.

Question: If you can't feed them off the breast? Warren: If you can't feed them off the breast that's when you go to,

Shri Mataji: No, but what we do then, if it's for some time, you can take formula because might be it is better according to their age group but, say, after ten months they can take to cow's milk, all right. But little bit one thing you should start by the time they are about three months, before they are conscious.

One time. One feed. Is she giving one feed at least to the baby, or not? No, not yet. No, no, not her. I'm saying, Barbara! Barbara, is she giving one feed to the baby? Barbara: No, Mother. Only breast milk. Only breast.

Shri Mataji: You should start now, all right? Otherwise again he'll be very angry with the bottle.

Question: He is, Mother. I've tried him on the bottle before. He doesn't like it.

Shri Mataji: So, better start earlier always. One feed you must have earlier. Say, one month, you can start, because children here are very adamant style, you see.

Question: Yes, Mother.

Shri Mataji: What other things? Question: Medication for children, Mother. A lot of Panadol's given to the baby.

Shri Mataji: Panadol? Question: Yes, Mother.

Shri Mataji: For what? Question: For temperatures or irritabilities, teething, when the baby's crying or upset.

Shri Mataji: I don't think Panadol is a very good cure.

Warren: It contains, it's aspirin, isn't it? No, Paracetamol.

Shri Mataji: It can make the child very bad later on *[UNCLEAR* without effects].

Warren: Liver problems?

Shri Mataji: Oh, really? Not good. You see, for, say, a child is *[UNCLEAR* irritable] or anything, you see, you should find out what is exactly the trouble. Is it due to the stomach *[UNCLEAR* trouble or problem] or anything? Then according to that you should give. But there are natural things that you should give to the baby and not unnatural. Say, child has got a diarrhea. All right. A simple method is to boil this fennel seeds and milk together. Boil it. Keep it ready and give that with little sugar or candy sugar and give that to the child twice, thrice. *[UNCLEAR]*. Simple things like that, I can give you so many medicines. Very simple. You should see why the child is sick. This Panadol is something like a sleeping pill only.

Question: Yes, it is.

Shri Mataji: That's very bad.

Question: Another question, Mother. One of our, Warren: What about Gripe Water, Mother? Do you use that?

Shri Mataji: The baby is all right, but what about the mother? Mother has to take it *[UNCLEAR* out now, or as well] for wind, what you can get here. You must be having some medicines for wind? Warren: Oh, just the usual ones, Mother.

Shri Mataji: *[UNCLEAR]*.

Warren: What do you use? Question: Is it water, water or the Gripe Water has *[UNCLEAR]*? Warren: It's fairly innocuous, isn't it? But, do they boil the alcohol off it?

Shri Mataji: What is that? Warren: It originally has some small volume of alcohol.

Question: Yes, four percent.

Shri Mataji: What is it? Question: Four percent alcohol.

Shri Mataji: In what? Question: In Gripe Water.

Shri Mataji: No, we don't use Gripe Water for the children at all. We give this ajwain water to the mother. There's another way is to, ajwain is the only thing I know very *[UNCLEAR]* because, I'll find out for you if there is something else you can use.

Question: Should the mothers have a diet avoiding wind-producing food?

Shri Mataji: Ah, of course! They should not eat rice at all. They should not eat rice. They should not eat anything that is grown under the earth. Potato, also, they should not. Anything like that. Rice, potatoes, all these things must be avoided.

Question: Yes, Mother.

Shri Mataji: You don't know these.

Warren: No, we're very basic *[UNCLEAR]*.

Shri Mataji: Rice is never given to a woman who has got babies, till about ten months. She must avoid eating rice.

Warren: So, any wind-producing food should be avoided in the mother.

Shri Mataji: Everything that comes from the Mother Earth, in the sense, from the bowels of the Mother Earth

and also milk. Milk gives wind, very much. Milk *[UNCLEAR* gives it] but milk boiled in a iron pot, could be made out of steel but not the stainless one, the other one, doesn't *[UNCLEAR* use or it].

Question: Milk boiled in a steel pot, cast iron, cast iron, doesn't give wind?

Shri Mataji: So you should boil that milk with the water, whatever it is, together in an iron pot.

Question: Yes, Mother.

Shri Mataji: So, milk should not be taken like that by mothers direct, at all. If she has to take milk, then take it with some sort of a porridge or something, at the most. She has to take milk, no doubt. But she should take it with the porridge, or the fresh *[UNCLEAR* figs or foods or fruits] or something like that.

Question: Yes, Mother.

Warren: What about nappies, Mother? Some of the nappies make their legs go out at forty-five degrees.

Shri Mataji: Oh, that's horrible thing that you make the children wear *[UNCLEAR]*. Very handy, but it's very bad. This girl has suffered so much. Even now she has problems, see? It's plastic stuff. But we don't use plastic stuff. We use cotton ones, nice cotton ones and we put little, what you call, absorbent cotton.

Warren: I think we call them annelette napkins here, Mother.

Shri Mataji: And then we remove the cotton. If the napkin is also wet, we remove the napkin. It can be washed. You see, we can have about twelve or, say, twenty-four, shaped like that. It's very simple, how to make it. I'll

show you. This is the *[UNCLEAR* shape or way], shape the napkin.

So you, get a soft cloth, some sort of a *[UNCLEAR* emollient] or something. In India you get such a lot of, very nice *[UNCLEAR]*. Now, what you do is to make it like that. All right? Now, *[UNCLEAR]* not a thing like this. It's for a little baby. But you can have soft toweling *[UNCLEAR]*.

Question: We get, we get soft toweling. The way, many of us do it that way.

Shri Mataji: All right! And then you must wash them. Hardly it takes any time for you to wash.

And in a day you take about, in the beginning they are small and you need more number. Later on, you don't need them but you don't have all these problems of the plastics for the baby and the child is allowed to breathe. His body grows well. Otherwise, they have, the backside is so pushed in, funny figures and you also have what you call the legs going like that.

Warren: Your hip joints go,

Shri Mataji: Very bad. It's very wrong and should be avoided.

Question: You mean the disposables, or do you mean?

Shri Mataji: The disposables are not good thing. Only if you are going out somewhere, see? This kind of a cloth is the best. This is a soft one. This is very good. Still, for a little newly born is still smaller.

You see, we don't want to seal it, not to seal it at all. It's hard. You see, just take, open it out, just like that. We don't seal it *[UNCLEAR]* like that. It's too big. For a big child, is all right. All right? Now, that's all. Even if you want you

can put like this for a big boy. Here a little fold, but normally, for a little baby, small.

So the child is allowed to...

***Contents: 1983-03-19*, Workshop, Burwood Ashram, Sydney, Australia**

Warren Reeves: Well, he still feels as though, even though since realisation, he still feels as though the effects of the drugs are still there in the sense that he gets the same experiences. Is that true? He gets the same experiences as if he was still on drugs.

Shri Mataji: Uh hm. Why don't you sit here with your left hand towards Me, right hand outside *[UNCLEAR]*? What about? Who else? Warren Reeves: Who else was on drugs? Does anyone know?

Shri Mataji: You are better now. [UNCLEAR.] It is there in the thing. It is better. Put your hand absolutely outside in the, in the, absolutely there. Now put your hand out. You are *[UNCLEAR]*? Question: Yes, Mother. I've been on drugs.

Shri Mataji: Hm.

So? You too feel the same way? Question: *[UNCLEAR]*.

Shri Mataji: You are feeling all right.

Question: I don't know, Mother.

Shri Mataji: You feel that the drug effect has gone now? Question: Yes, Mother, I feel most of it is gone.

Shri Mataji: All right. What about you, Robert? Are you still feeling the drug effect on you? Warren Reeves: But you're still experiencing the same experiences as you are having at the time you are taking drugs. That's what you

said first. Or are you just experiencing something else? Question: It's just like a,

Shri Mataji: Heaviness.

Question: I can't seem to break through to get the clarity.

Shri Mataji: *[UNCLEAR* I've seen someone/I think some] *[UNCLEAR]*. Now, who? What else? Question: *[UNCLEAR]*.

Shri Mataji: You have to take salt, lot of salt. You see? Now, give him salt, vibrated salt. Now, who else is there? *[UNCLEAR]*, But you don't have the same types of experiences now. Is thoroughly heavy.

Question: *[UNCLEAR]* I feel it sitting there.

Warren Reeves: It's just like a fog, he describes it, Mother.

Shri Mataji: All right. Now? Question: I'm having the same type of experiences, Mother, but it's just that,

Shri Mataji: Heaviness? Question: Sorry?

Shri Mataji: Just a heaviness? Question: No, my desire means my spirit, it goes towards drugs like a *[UNCLEAR]*.

Warren Reeves: He still wants them. He wants to go back to it and he has done since realisation.

You don't mind me saying that? Since realisation, he's had one or two, gone out and gone back and he's trying to fight it and he's not really succeeding.

Shri Mataji: Now, you put your right to the left. That is the way. Put your right to the left. You too. No, with your right hand. Put your right hand. *[UNCLEAR* You too do].

Warren Reeves: Everybody notices that he uses the left. Use your right hand.

Shri Mataji: Mmm. With the right hand.

So you are raising your will power. Is there any movement in your head? You find anything moving in your head? Watch Me. You have to watch. You have to see Me. Come here. Just come here. At the back. You have to give a bandhan on My back. You just watch Me. And what else? He has a problem? Him? Question: I'm still taking insulin for diabetes.

Shri Mataji: You still have diabetes? You have still diabetes.

Question: I have had it for ten years and I'm still taking the same amount of insulin.

Shri Mataji: Have you been coming for your blood sugar? Question: Yes, I have *[UNCLEAR]*.

Shri Mataji: Have not come down. What have you done for it? Question: Well, I work on my left Nābhī and basically I'm *[UNCLEAR]*.

Shri Mataji: You put your left to the right, left to the right.

Question: *[UNCLEAR]*.

Shri Mataji: *[UNCLEAR]*. Come. I'll just help you. Come here. Sit down there.

[Next section of the recording is a repeat of the section above starting with “You still have diabetes."] Keep your eyes open and watch Me.

Question: I have had eczema for quite a long time. I've had it for quite a long time, *[UNCLEAR]* itching, almost drives a person to distraction and it's really hard to control.

Shri Mataji: I was telling you there is a liver problem. Are you going in for a liver treatment? And you should go on a diet. No fats, nothing, just a regular diet for liver and do

that for a month. You see? Go for a liver treatment completely. *[UNCLEAR]*. Now, liver diet is the best. That's because of My feet here. You use that. You have to use the thing according to the nature of the problem. You see, right-sided you use cool treatment and when it is left-sided use hot treatment.

Question: *[UNCLEAR]* Mogodon, with heaviness on the forehead and side of the head as if I could fall asleep when You're talking and *[UNCLEAR]*.

Shri Mataji: Come along. You have been with Dennis? Ursula? I can see the effect. Also when you talk you talk like him. You see, you better stop using your hands for *[UNCLEAR]*. Dennis is one person you should forget. Those who have been with Dennis must beat themselves with shoes every day. That's how you get rid of it.

And put your hands right, has an effect.

[Person singing/chanting.]

Shri Mataji: Who's there? Question: Mother, nothing *[UNCLEAR]* on the part of the media *[UNCLEAR]*.

Shri Mataji: I'll do it, little louder. Now *[UNCLEAR]* like this. You are left handed or right-handed? Put it with your right hand under My feet *[UNCLEAR]*. A little apart, a little away from here. Put your both hands. *[UNCLEAR]*.

I must tell you there are certain things of protocol. When you talk to Me you shouldn't put your hands like this, talk to Me like this. You see, that's not the way. Normally, if you see, Indians always fold their hands, talking. You see, it's not the way to talk to Me. It's not proper, you see, the way you talk here, also. I think you people use too much of your hand. Otherwise, there's no need to be using all

the time like this *[UNCLEAR]*. Looks horrid *[UNCLEAR]* some time. And then you, some of you talk to Me, you go on like this. That's not the way to talk. Is a sign that you are not normal. In a humble way you must talk. All right? This is a protocol. One must know best is to talk with folded hands.

Now, in India they don't call Me Mother at all. Not at all. Like, “Mother, *[UNCLEAR]*” “Mother, come there." That's not the way. They say, `Shri Mataji', all of them. Nobody calls Me, have you heard anybody calling Me Mother? They have to learn these better methods for Sahaja Yogis because that helps them. All right? So, one has to talk with great grace and understanding, because you know Who I am now. The best thing is to use the proper way of addressing. All right? The more protocol you have, the better you will be. You will really benefit very much more, because as you address Me, the deities are so alert. They see you how you behave. Very important to be humble. Deities are there, watching all the time and they want to see what is your reactions, how you behave, your protocol, everything. You are seeing Indians, how they talk. They have to say something, put eyes little lower, their face. They know Whom they are talking. Even on the phone, Modi was talking, calling Me, `Shri Mataji'. Shri Mataji is to be said, not Mother, Mother, Mother. It's not right. All right? For Sahaja Yogis, because it's important now. New people will be coming; they learn from you.

All right. *[UNCLEAR* May God bless]. It's better. How are you *[UNCLEAR]*? Question: *[UNCLEAR]*.

Shri Mataji: Huh? Question: *[UNCLEAR]*.

Shri Mataji: Without My photograph? Question: No, no, not with Your photograph.

Shri Mataji: Then, OK, how did he give you? It's *[UNCLEAR]* who has given you. You never think he has given you. All right? You have given realisation. You lose the power of giving realisation. It's so bound together. What am I to do? They're all so bound together. You have to recognize. You have to honour. That's how you're going to grow. It's something so innate, everything bound together.

It's all right. You can't talk like this to people who are coming for the first time, second time, third time, all right. But you are Sahaja Yogis, all right? You are into it. You have gone to India and you've seen how people are there. Now, it's much better. *[UNCLEAR* It's true]. Formerly, they never really understood it. After going to India many people have realised.

Even artists. Like, this is a very famous artist, internationally famous, a man before starting his program how he bowed before Me. Humility is very important, for your sake and for others. The one who is humble will receive the most. Little bit should be *[UNCLEAR]*. Got it from him. Horrible. The protocol you will gain. I don't lose anything. Whatever is eternal is eternal. That's not going to be lost.

But it's you who has to strive to gain more, isn't it? *[UNCLEAR]*. Come along. [UNCLEAR... Let's cut his hair]. Come along. That's how they hide.

See, look at this forehead. You see it so clearly.

Forgive, forgive, forgive.

All right, much better now.

Come here. Come. *[UNCLEAR* Hannan], you should keep it. It's better. Cleared out? Question: *[UNCLEAR]* a question I would like to ask You. Have I been given my realisation?

Shri Mataji: No.

Question: *[UNCLEAR* I do not know].

Shri Mataji: Have you got the Cool Breeze in your hands? Are you feeling a Cool Breeze? Question: Not in my hands, and,

Shri Mataji: In the head? Question: But last night it went through the right side and down through my back foot *[UNCLEAR]* my body.

Shri Mataji: All right. Take out your, this thing, what you have. Let's try *[UNCLEAR* the feet, or to feel]. All right. Come along. Put your both your hands. You have to, you have to come on your feet, on your feet. *[UNCLEAR]*. All right. Let's see. Relax. Put out your hand.

Warren Reeves: Put your hands out. Put your forehead on Her.

Shri Mataji: Forget it. Done. Also, Robert. Where is Robert? Come along, here, both of you. Now, you come this side. It's done now. We have been to all? Better give them light *[UNCLEAR]*. Now, better? *[UNCLEAR]*. We should not. That's the point. I give you something special.

Warren Reeves: Ekādaśha Rudra, Mother. They have their hair down over their face like veils.

So many times we have asked him to put his hair up.

Shri Mataji: Which David is this? Warren Reeves: We tried.

Shri Mataji: David, why do you put your hair? Doesn't look nice. It's horrible. Your face is, see, out of proportion

[UNCLEAR]. Better cut it out. It's no good. All right? You must listen, also. You must obey. You see, by obedience, you cut off your *[UNCLEAR]*. You must know that Your Mother knows *[UNCLEAR]*. What She says, She says for your good. See, that one thing you must know. Whatever She says, is for your good. All right? That doesn't look nice at all. Better remove it and put it properly.

Keep your forehead open.

[UNCLEAR hand with them]. Could you try some cloth? These are nice. *[UNCLEAR]* it's all cotton.

That one is very rich. That's more expensive.

Contents: 1983-03-20 **Workshop, Ashram, Sydney, New South Wales, Australia**

You have to know that you all have been seekers before this is not the first time you have been seeking.

So already you have reached a certain state where you feel and you are aware that something more has to happen to you, you are already ready for that, some of you have really taken birth in this time just for this.

So, because I'm not going to talk of your past, past is over now, we have to think of the present. One has to know that all of you, got Realisation, some people have certain problems, on their different centers as I told you, different types of problems people have.

Because of these problems, the Kuṇḍalinī goes back to its attention because Kuṇḍalinī has to look after your problems. She's your mother so she goes there, attends to that problem and again she rises. But only thing you have to learn, how to make her rise, how to cooperate

with her, how to understand your own problem and give additional help to solve the problem.

Now you will be amazed that you just get rid of your false identifications with yourself. You become absolutely detached from that, because you start talking in the language of Chakras and centers. You start saying that this center is bad, that center is bad, this is not alright Mother, that's wrong with me, that is wrong with me, that's all. You don't say I've cancer, you don't say I'm mad, you don't say I'm egoistical.

You just say: `Mother this center is not alright, that center is not alright.' Depending on the quality of your centers, the Chakras, as they are, the ones who really are the channels for the energy of God to flow in. Regarding them, you have to be careful, how your Chakras are. Are you clean or not? Some of you will find Cool Breeze flowing alright in the hand, but may be, one Chakra is catching. On one Chakra you will feel the heat, or you may feel the numbness, you might feel also a kind of a, we can say a kind of a tingling on certain fingers.

Now wherever there is tingling, you must know there is a kind of a struggle going on between those Chakras and the Kuṇḍalinī.

So you should just try to help your Chakras, to awaken them and also must know that every one of you are part and parcel of the whole. You are awakened, you are awakened to that part and so you have to be more careful. Because if you suffer from some Chakra, I can feel it. But if others, those who are not realised, I don't feel it at all, I'm not bothered, There can be any number of devils or anything, doesn't matter to Me. But if you

people, who are realised Souls, have a slight problem immediately I know that you have this problem, My attention is diverted to that.

So you must understand that the attention is all the time there to look after you, to give you a better guidance, your Spirit is all the time working. But you must learn how to take the guidance from your Spirit that's the main point; so nobody is lower or higher as he said. I've seen some people who were declared as drunkards, this, that, overnight, there are finished [with that], they are perfect people, not only, but very good Sahaja Yogis.

So, you see, all these clouds have come on the sky of your being in this life time, doesn't matter, makes no difference, but your past is great, that shows.

So you don't have to worry as to how far you are where you are, there's no degree or anything to measure it. They must be all aware already, otherwise you would not come to Me, first of all. And to get Realisation itself, is very big.

Now there's a very good seeker I know of, who came to Me and he got his Realisation but he did not feel it on his hand, because he has a very bad Viśhuddhi. And with a bad Viśhuddhi Chakra, you may not feel it in your hand, doesn't matter, but you'll feel peaceful, you'll feel joyful. And you can feel it on top of your head, or others can feel it. Gradually your fingers will start improving and they will give you better results.

For example, people who do hard work with their hands, also their fingers can be numbed, so we have to use certain methods, like looking after our hands. This body now is a temple of God so we have to look after it in a

way, respectfully, not for the way the, you see, the prostitutes, when they want to sell their body they look after their body. No, but respect, with respect to our body.

We have to look after ourselves in a way that we should keep good health. And to keep good health in Sahaja Yoga, there are thousand and one things, which you have to know, which is very easy to understand and which will be told to you for no price at all, nothing. It is the Divine that is anxious that you should get it, that you should settle down, that you should enjoy.

So you don't have to be so anxious about it.

These anxieties must be given up, just try to understand your centers.

Now many of you who did feel the Cool Breeze. But may be, after some time, you may lose it, doesn't matter. You'll go up and down, like that, doesn't matter. It does not mean that you've lost it, not at all.

Now supposing you try a method, a simple method, that you first put your left hand towards My photograph, just now you can try and right hand on the Mother Earth, let's see.

Right hand on the Mother Earth, that's why I wanted to have it in the open, but doesn't matter now, this rain is good for you for the farmers, let's have it.

So now put your left hand like this and right hand, those who are sitting can put up like that [towards the sky]. Like this. Back [the back of the hand towards Shri Mataji] Right hand like this, right. Not left, right.

Sahaja Yogi:... the ground. No like this.

Shri Mataji: Back. Yes, right hand.

Now what we are doing, the left hand side power, is the emotional power. Now if you have an emotional problem, say, somebody has been taking drugs, he's a left-sided person.

Some drugs are, LSD and all that right-sided, but most of the drugs take you to the left side. Gurus are left-sided part. Most of these problems are mental problems, are left-sided problems. But the problem of the intellectuals is right-sided, futuristic people is right-sided. People who are running the rat race are right-sided, you see, that kind of over activity, that kind of things. On the contrary, those who have taken to drugs are left-sided.

So first try with the left, let's see.

Now put your right hand on the Mother Earth. Put your right hand on the Mother Earth.

Now, put your left hand towards Me.

Gradually, you'll find it will start flowing in you left hand. Is it flowing? Put your right hand on the Mother Earth, because the Mother Earth takes away; you see, you are just earthing it, put it on it, touching it, touch, touch it, you see, you are earthing yourself, is a very simple thing.

Now left-sided problems easily go to Mother Earth, it's true, but the best is to have a light. Now, say, if you have a candle, candle is the best, for left-sided problems, candle is the best thing to take it.

Because left-sided problems, we can say, are cold problems, or problems which arise from coldness. You see, a person who becomes inactive.

Now see.

You just put your left hand towards Me like this and right hand towards a candle.

You'll be amazed, sometimes, the candle starts burning `tac' and drop like that and sometimes it creates such black smoke that, if it is next to a wall, you might find the all wall becoming black. It's very interesting to see how the candle reacts, but you must have a photograph in front. And there should be a candle in front of the photograph and one candle like this to take it out.

Right, now, see better? All right? You'll feel it's going down. You'll feel from your head, you'll feel, you see, the pressure is going down.

Better now? Like this. Put the hand like that, back side, not towards Me, like that yes, yes. Now.

Hum. Now put left hand, if you're sitting on the ground, it's better to put towards Me, left hand.

It's coming, it's going, it's working.

It's like the energy, you see, that is coming through the photograph, it's pushing it down towards the light and the light burns it off: light gets awakened, by you. It's surprising but it does.

It's better now? See. We work out, we feel it. You will feel it yourself, there is nothing to certify. You will feel yourself. Put your left hand towards Me, left hand towards Me like this, yes. You all will feel it yourself.

Now people who have been to Gurus, who have sort of schizophrenic attitude, who are moody people, frantic, fits, they get all sorts of these, to extreme to the least you see, who are emotional, some women who cry too much, hysterics, all those things can be controlled by this

simple method of putting left hand towards the photograph and right hand towards a candle.

See, it's working out? You'll feel the movement in your head you'll feel...

Sahaja Yogi: Yes.

Shri Mataji: Feeling it now. No?

Sahaja Yogi: So, it's not there.

Shri Mataji: Now with the right hand up, those who are running the rat race, you see big people who think they must earn money and all, they are running in the politics and all that kind of a, another madness they have. You see, that's also a kind of madness, you see. [Laughs.] So for such people who are having a high blood pressure because of that, they will have diabetes, they'll have liver trouble. Now even for any organ, you see, any organ you take, say heart, in Sahaja Yoga we have for every organ, two types of nature. One is the one that is lethargic and another that is overactive.

So supposing you are an overactive person, then if you are an overactive person, you are studying very hard or thinking about the future or planning something, then, you have a heart which is overactive. Or you have an intestine which is overactive. The liver is overactive, the all system is overactive, you'll have high blood pressure and all the problems of high blood pressure, constipation, all these things go hand in hand in one personality.

Then, another personality could be a lethargic. A person who has a lethargic heart, may get a, has to get a bypass or something like that, because the heart doesn't pump. You may have a lethargic intestine, such a person might,

whatever he eats you see, just goes to the bathroom, sort of a thing or may be a lethargic liver. When you have a lethargic liver then you might get allergies. Allergies are caused by lethargic liver.

But, if you are an overactive person, if you are overactive, then the same liver which was giving you these allergies, will give you nausea, a feeling of a sickness, migraine and vomiting, emesis.

So there are two types of livers also. We have two types of kidneys, two types of, everything is two types.

So if you are a lethargic person, if you have a lethargic problem, then what you have to do is to use the light. For all the lethargic troubles, best is the light, to use the light for lethargic troubles, this is left side. And for the right-sidedness, you can use the Mother Earth. Mother Earth is the best or water and salt.

So water and salt is very good for people who are suffering from an over-activity. Now how do you do it? It's good for both, but specially for them. Like you have to put both the hands, first towards the photograph both the feet in the water, with little salt. Now if you are feeling the vibrations coming in both the hands, equally the same, it's alright, you don't have to worry. But supposing, one hand is more and one hand is less. The hand that is less has to go before the photograph, always. The hand that is less has to go towards the photograph and another one has to go out. And you'll be amazed, the movement of the thing, you will feel within yourself these bandhans will be moving like that. And you can feel it, that something is moving in your head, you are getting relaxed. And gradually, you'll become a

master, you will know how to handle this body, absolutely, you'll become a master. And when you become master, people have become masters in eight days, in eight days. Once you become a master, then you can handle other bodies also and help other people. It's as simple as that.

So forget about the past, now the present, we have to be in the present.

Is there any other question now?

Sahaja Yogi:... about mantras...

Shri Mataji: Mantras, yes. Now, we have got different centers and all these centers have got different deities. As I told you, Lord Jesus Christ is here [shows the Āgñyā Chakra], Moses is here [shows the upper part of the Void, a bit on the left], Kṛiṣhṇa is here [shows the center Viśhuddhi]. We have a chart of that.

We have books which will be given to you. Now, we have to make, you see,

Sahaja Yogi: Excuse me. [Sahaja Yogi brings a big chart.]

Shri Mataji: Yes this is the chart, you see, it's beautifully done, this one is very clear-cut.

Now on different Chakras, we have different deities, come forward, you come forward and see, all right? All right, just let him see. You can pass it on.

Sahaja Yogi: May be there's another chart.

Shri Mataji: Another chart, all right. We have books, you see, why not give them books?

Sahaja Yogi:... They can have the other books.

Shri Mataji: Open the books, you have got the chart in the books. Can you see? Now gradually you see, we are

trying to get a bigger place for you and we should really meet in a hall again. When are you going to,

Sahaja Yogi:... they can meet here first until we get a hall.

Shri Mataji: Yes if you want, we might not be able to get but you can meet here. You can always come and find out. Now, what is it? There are books. Now, I'll show.

These are small books just meant for the beginner, you see.

Now here, this is all given in short. Now this is the chart you have to follow, you can pass it on...

Give this to that gentleman also he wanted. Ah, you've got.

Gentleman: I got it here.

Shri Mataji: Oh I see. You also take. Now.

So the mantras are according to the Chakra that is in problem. Supposing your Nābhī Chakra is not all right. All right? And if you start saying the mantra of this one [shows the Āgñyā Chakra] is no use.

So you must know what center is catching, from your fingers. Now you can make out here, in this chart if you see on this side, we have got written the numbers according to the centers. On this side, if you see it clearly? Now these are the numbers of the centers, all right? So then and also here it is written in this chart, what are the different deities.

Now, all these deities should be first understood, where are they and when you have to say the mantras, what you have to do is call *[UNCLEAR]* it into a proper Sahaja Yoga mantra, so have you given that?

Sahaja Yogi: It's not in these books.

Shri Mataji: But they will tell you.

The pattern has to be like this, which says, whatever is the thing is, is woven into the complete, I mean you are to be recommended, isn't it? Somebody has to say.

So you have to say that I am the one who has given you this knowledge.

So just you have to use that particular thing which they will give you, the pattern, which is very simple. And you have to use these names of these deities, different deities according and gradually you'll be amazed it will work out. But when you come here, they will tell you, it's very simple, it's very simple. But you must know where the Chakras are.

First of all, you must become sensitive.

So I would suggest that you must start using olive oil for your fingers and for your toes, you see, rub it nicely, make your fingers sensitive. Because of various things, our hands have become gross, you see. To feel it better, use some nice olive oil, massage it nicely. And sometimes, if you wear the gloves in the night, they can soften it also. You must soften, soft hands are better. And the nails should not be very long, not very badly cut, sort of things you see and they are to be properly done.

So that when you use on others, they should not feel hurt with your nails. But for yourself also, you should not have very, right hand specially, because you'll have to use it like this here [gives a bandhan], say, you have a [problem of] Viśhuddhi Chakra, then you'll have to use your Nābhī Chakra like that [using the middle finger].

So what, actually, is the matter with you, is to be first heard.

So first you have to understand yourself, what is your problem, what you are suffering from and then, how to correct.

If you could find out how to correct it and what is your problem, then it is the easiest thing, is to find a mantra to improve yourself.

All right? It's very simple. Now you have met Me only a day back, I should say, but you'll be amazed the knowledge you will have now about yourself, will be tremendous.

So first is Self-realisation, means you know yourself. Once you know yourself, you start knowing others, because we are all collectively conscious.

Those who are realised Souls become aware of others.

So first of all, if you want to see your own vibrations, you have to put yourself into bandhan like this, as I told you, like this.

Now, let's do it.

Put your left hand towards Me.

Sahaja Yogi: Like this towards Shri Mataji... [does the bandhan].

Shri Mataji: Now, these are your vibrations, whatever it is, now check, see now. Which finger is burning? See, carefully. Now this is left Nābhī. Now which one is burning, be careful.

Pay attention.

Which one? New

Sahaja Yogi: *[UNCLEAR]*...

Shri Mataji: May be he is constipated, is he? Does he get constipation? New

Sahaja Yogini: *[UNCLEAR]*...

Shri Mataji: Yes, it's the liver, sign of liver, you see and also constipated.

So he is more a right-sided person, because right side is this thing.

So he has to put left to the right, like this. All right? New

Sahaja Yogi: I'm just warm *[UNCLEAR]* and *[UNCLEAR]*... what could that mean?

Shri Mataji: You have a heart [problem].

New

Sahaja Yogi: It's allergy *[UNCLEAR]*.

Shri Mataji: You put your right hand on your heart.

New

Sahaja Yogini: *[UNCLEAR]*... Rather warm.

Shri Mataji: Warm? All right, doesn't matter and the other one? Nothing. All right.

So put your left to the right. Left to the right.

Sahaja Yogi: You take it, when She says left to the right, what you're doing is not just this one, put you are actually lifting the left side.

Shri Mataji: And taking the grace from the right.

Sahaja Yogi:... because you're balancing.

Shri Mataji: And taking the grace, you see [doing a bandhan] on the right, because right side is showing nothing. If the right side is showing nothing, then what you are doing, you are lifting your left which is slightly

showing and you take up and bring it down, with your right hand. Left to the right.

Sahaja Yogi: If you got problems on the right side,... you take from the left side and over the top and bring down the grace into the right side... Then it's the opposite, it's as simple as that.

Shri Mataji: If she's not, if you are not feeling at all on right hand, then you have right hand problem. You're not feeling any vibrations, hum? And left hand, you are feeling what?

Sahaja Yogi: Slightly warm on the left side...

So he has to go from right to left. Just do it yourself now, get into balance that's the object of what Shri Mataji is saying.

New

Sahaja Yogini: Can we change hands?

Shri Mataji: Yes you can, you change hands.

Sahaja Yogi: Just to repeat it... bring down the grace into the right side...

Shri Mataji: Right to the left. You take your right hand and put it like that.

Sahaja Yogi: If you got it in the other direction... you go the other way...

Shri Mataji: Did you come to My program before? New

Sahaja Yogi: No.

Shri Mataji: That's why. Just it has started, you see, you have to get your Realisation first of all, all right? You come here. We'll have to work it out, first of all, as your Realisation has not worked out, that's why. It just started. Hum? Let us work out. If the Realisation works out, then

only you can feel it properly. That's why. Right side, not at all, so I was wondering why.

Are you feeling? [To someone else:] Good. Left hand what are you feeling? Cool breeze in the left hand and not on the right. All right.

So what you do is to left to the right. [Shows once more.] No, with the right hand.

New

Sahaja Yogini: Oh, yes.

Shri Mataji: Gradually when you practice you will know. Better now? Good? [Shri Mataji answers the same questions again and again.]

Shri Mataji: How are you feeling now? New

Sahaja Yogini: How long does that type of things...?

Shri Mataji: Split of a second.

New

Sahaja Yogini: How long will it last, balancing yourself?

Sahaja Yogi: How long will the balancing last you?

Shri Mataji: Last? I mean there is no timing for it. It can last you for ever, but if you are a very wobbly type, it may a little bit drop on, but you have to know how to do it, you see? Now, we can say we are driving a car. Now, how long will it last there? As long as you keep it. You are driving this car [shows Her body] all right? Now, what is it? Are you feeling the balance now? New

Sahaja Yogini: I? Yes.

Shri Mataji: Good, then it's good.

Sahaja Yogi: When it becomes imbalanced, that's when you correct it.

New

Sahaja Yogini: So, just trough the day, you just have to...

Shri Mataji: No, no, no, no, no, no. Now, if you're in balance, there is nothing wrong, it's all right, perfectly all right.

Sahaja Yogi: Can you get it when you haven't had the Realisation. You mean the balancing?

Shri Mataji: Have you got your Realisation? That is the first, that's the first thing. Otherwise you have not entered into the kingdom of God, isn't it? First thing is to have your Realisation and then, now, put your hands towards Me. You got the Cool Breeze in your hands, are you feeling? Start, close your eyes. What about you? No.

Sahaja Yogi: Those who haven't their Realisation, put their hands up please.

Shri Mataji: You come forward. I think best is and the rest of the Sahaja Yogis can see. Come along.

Now these people can be taught by Sahaja Yogis how to give Realisation, you are all right, three of you, go ahead. [People move.] And the Sahaja Yogis can meet them and talk to them. Sit down, sit down.

[GAP] [Shri Mataji holds a candle in front of Her face.]

Shri Mataji: Are you feeling? Do like that with your eyes, do a little bit. Just press them, press your eyes hard, any hard, thrice. Hard, press them hard, thrice. All right? Not yet? It will come. It will work out. Watch Me, watch Me here.

[Shri Mataji still holds a candle in front of Her face, then in front of her right hand and the new people are send to another room where Sahaja Yogis will work on them.]

Contents: 1983-03-21 **Birthday Pūjā, Overcoming the Six Enemies, Sydney, New South Wales, Australia**

It is so great to be with you people today on this auspicious day, to be with Australians who have proved to be very good Sahaja Yogis and who have progressed in a very speedy manner in their spiritual life. It gives Me greatest pleasure to be with My children here.

As you know, I have so many children all over the world, apart from the ones whom I actually physically gave birth. We have to think of all those today who are away from us, thousands of miles, praying to God Almighty for their spiritual ascent. One has to only pray for the spiritual ascent because as you ascend you get all the rest of it; because you do not ascend you do not get what is needed. That is why there are problems and even today I had to solve some problems before I could come to Pūjā.

But if you decide that we have to ascend spiritually within us then everything that you have to receive, all the blessings that God wants to shower upon you, to make you the citizen of His great Kingdom, where you are no more judged, you are no more chastised, you are no more put to any test and where you will reside in eternal love of God and in His glory.

I could not believe about ten years back, that within ten years I'll be able to achieve this result. We should not judge the progress of Sahaja Yoga in relation to other plastic Gurus. Even to create one saint will require thousand lives to pass through and so many have become prophets, it is a very big thing for you. Let us

forget about what dents we have within ourselves. We have to know that we are prophets.

This assumption has to be established, that we are prophets.

If you could just assume what you are, what you have become, you will emit the glory of God. Like a flower when it blossoms, it has its fragrance, which flows automatically; but it is only human being who have freedom even not to assume, to dramatize, or to assume what they are doing. Even if they have become prophets, they still linger on with what they are not, in imagination and are still frightened or still ego-oriented. It is falsehood. It is not your true nature. It is like acting in a drama, becoming the actor. Like somebody is acting like Shivaji so he becomes as if he is Shivaji. The whole lifestyle, everything changes, he becomes Shivaji. But the same person if he is acting like Hitler, he becomes like Hitler. Both are artificial. Artificial they become.

Now when you are really prophets, you find it difficult to be the real person what you are, but artificial, which has gone back, which is no more there, all finished. The sinner is dead. The egoistical is not there.

The frightened one is gone forever. You are a prophet. Rise in the glory of that personality. People who are not prophets, who are not Godly, who are doing anti-God activities, can assume to be prophets. But those who are really prophets, do not want to assume the situation that they are. As soon as you assume, you become that.

We must today get over this kind of a play our mind has been doing so far. All falsehood has to drop out.

Of course as I said, I could never have dreamt that in ten years I will achieve these results, with so many devils around us to entice you. I am afraid it must go to you people also, that despite all hurdles and problems you had, you have ascended, ascended so far and have become beautiful prophets. You are so transformed that little more, just to assume what you are, will make you feel so sweet.

I talked to My granddaughter, elder one and she is just a little girl, only eleven years of age, but she told her mother, “Now I can't talk to Nani [grandmother] because She's a Goddess. How can I talk to Her? I feel shy." At that age! While in her own life, as they are saying: She is top in all the class. She is the editor in a magazine in her school. She is tremendous. And she is so humble that she told her mother, “I feel shy to talk to Nani, She's a Goddess, how can I talk to Her?" And Rustom told Me that there are vibrations emitting from her. That is how you have to grow.

First of all, you have to know you are prophets and you must know that I am the Holy Ghost. I am the Ādi Shakti. I am the one who has come on this earth for the first time in this form to do this tremendous task. The more you will understand this, the better it would be. You will change tremendously.

I knew I will have to say that openly one day and we have said it.

But now it is you people who have to prove it, that I am that.

Christ had disciples who were not even realised Souls and they have spread Christianity, whatever it is. Under

such circumstances that Christ was crucified and they were left high and dry, just twelve people struggling but they put it up. They were very humble people. Their quality was they were extremely humble and they knew the difference between them and Christ and the Mother. Also they knew the difference between them and the others. And they took to lives which were pure, illumined by the name of Christ. They were not realised Souls. They cleansed themselves and kept their lives beautiful.

So Sahaja Yogis cannot afford to have these six enemies. First of all, temper which really does not behove compassion. Replace temper with compassion.

Today is 60 birthdays and we have to just fight only six enemies within ourselves.

Second is, which you have most of you have done, is to retract your attention from perversion. Most of you have done it. Your eyes are better now, steady. But still you are egoistical. Vanity. Still people are jealous, competitive. You still have some lurking materialism. A new thing that is coming, you are getting attached to your families.

So we have to change it now in a different use. Same thing can be used for doing God's work.

They can be used as the six hands of Sahaja Yogis. The first one is the anger. You have to be angry with yourself when you do wrong things and not to feel guilty but angry with yourself for doing wrong things. Guilty is the best way never to get rid of it. It is like a storehouse kept for personal archives, locked up. I have suffered a lot because of your guilty business, very much. And they come out one by one.

So you have to be angry with yourself when you feel guilty: `How can I feel guilty? Why did I do such a thing? I'm not going to do it.' So develop your anger against yourself and not against others. And anger could be reserved for the day of war. Otherwise when the war will break out, all the Arjunas will drop their weapons and it will be said that “Arjuna was a great warrior, till the war started." So we are not going to waste our energy in warring with things which are just like shadows. Not to fight the shadows.

Sex, perversion, has to be diverted towards your family, your wife and you have to respect your chastity now. The whole thing becomes nothing but chastity. Lead a chaste life. Not to be like a dog, but like to be like a human being. All that attention has to become chastity, which is your power, which is your protection, which is your connection with the Divine. Not forced chastity but a chastity of balance and understanding. With your family, with your wife, in a very chaste way you can live.

Same with women, it is more for women I would say, that they should not join hands with other men who talk against your husbands, or who teach you against your husbands. All such men should be thrown out of Sahaja Yoga who try to tell women against their husbands. This is a very sanctum sanctorum place where you should not interfere against the husband. Nobody has right. If there is any problem, you should let Me know. It is a sign of stupidity.

Then the vanity must be made into pride. You should be proud that you are Sahaja Yogis, really proud. Raise you heads with pride that we are Sahaja Yogis. Pride is never

oppressive. It is a glorious thing to be proud. But vanity is, actually pride is nothing but the expression of self-esteem. Begging, borrowing, mimicry, all these things come from the less understanding of yourself.

So vanity should be the pride and the pride should be the expression of self-esteem.

Self-esteem is very different from ego. One is reality, another is complete artificiality. Men now should behave like men and not like women, docile, like cows to be tied with a rope wherever their women want them to. They have to lead the society. For the women's right in India, the women never fought, it is the men. They never fought. It is the men because men are also the fathers, the brothers and they are concerned about the well being of women. Women seldom fought there, because they knew once they start politics of this fighting with men, there is no end to it. This is basically, they knew they have to live with men, they cannot fight them. But men themselves fought. Even in America, it was Abraham Lincoln who fought for the liberation of women, not women.

So you have to be, not egoistical, but proud. Proud that you are Sahaja Yogis, proud that you are born at such a time when you have to carry on the duties of God's work. That God has chosen you, so that you should come up to that level. Like some people I find suddenly become morose, recluses, in Sahaja Yoga. They will never be forgiven because God has given you so much. Supposing somebody gives you a diamond, you are proud, you put it on and show off. But when you have been given your

Spirit, you should be proud and not to behave like recluses.

Some people feel “I shall not do any job now. I'll not go out. I'll sit at home and meditate." There is no place for such people in Sahaja Yoga. `I can't do this.' The word `can't' should go away from the dictionary of people who are supposed to be Sahaja Yogis. You just cannot say, `I can't do it.' So the self-esteem will give you that kind of a dynamism which is needed for Sahaja Yoga, a discreet dynamism, a wise dynamism. I will not have to solve your problems any more.

The quality of competition and jealousy should be brought round. There should be competition between yourself, the one what you were and what you are. Who wins? Whether you are past or present. Your present should go fast, faster and faster, leaving this past behind as much as you can.

There should be no competition between Sahaja Yogis in acquisition.

Sometimes I have also seen competition in shouting, screaming and being harsh to others, there is a big competition on. Let us have competition in compassion, in mildness, in sweetness, in beautiful behaviour. Who is more cultured? Who is more gentlemanly? Who is deeper? Keep somebody, an ideal before you like that whom you think is a very gentlemanly person or a lady who is really like a lady.

But on the contrary, if you have a lady who behaves like a man as your ideal, that is also not all right.

Or a man who behaves like a woman, that is also not ideal. Or the other way round: a woman who tries to

show that women are different from men and women must get this... in Sahaja Yoga there is nothing like women and men, that women must get this and men must get that, because you are Spirit. But the cover that you have, the body that you have, the light you have, the lamp that you have is a different thing and to keep the light on, a woman has to be a woman and man has to be a man. As I yesterday told you that an apple should not try to be a mango and mango should not try to be an apple. It looks nice to be the best apple and looks nice to be the best mango.

So the recluses, those who say that “you have to get out of it” behave really not like human beings but I think like, I do not know what animals do that way. Like when you get your doles you cannot become indolent, you cannot. As far as possible, I do not like people taking doles, not a sign of good Sahaja Yogis. You all should be hardworking, you must have qualifications, you should be good people on top of everything. Good students, good cooks, good mothers, good fathers, good administrators, from where are we going to get these people? We cannot be dishwashers, can we? So the competition between women and men must be stopped. Women must have their own place and men must have their own place. And women must know that men are their hands. If you are the Shakti, they are the machines. And do not kill your machines by shouting at them, by screaming at them and by putting them down, making them diffident. You will have no place.

We have to encourage them to do God's work. You have to support them, look after them, because they are the machines, they are the hands and you are the power.

Of course if these hands go against the power, they will suffer.

So there should be no competition between children and you, my child and his child, there should be not such competition, take out your mind from there. There should be complete sharing.

So the competition should end in sharing. How much we share? How much can we share? See drunkards cannot sit and drink alone. They have to have some people to share. The thieves must have ten people to thieve. But when it comes to the nectar of God's Love, how can we alone have it? Cannot enjoy, there is no enjoyment at all in it.

So let us be gentle and kind with each other. The people who are going to enjoy the nectar should have competition in sharing that nectar by which they get more and more of that: Who shares more? Who is more generous? Materialism should be taken to its beauty. You can have one thing done with your hand. That is much more beautiful than running after money, counting money, you become crackpots really, those who count their money morning to evening are real crackpots. They always lose money. There is something wrong with their brains.

Count your blessings. See life, the beauty in matter. How life has worked. See a wood, I see the pattern it has created on wood, the life. But it is not morose. It is not dead. It is not insipid. It is bubbling. You can see in art,

you can see in all that is beautiful, the reflection of God's creative power and the joy that he wanted to emit for your happiness. While you become slaves of matter, he never wanted anything. You are the masters.

Last of all is the attachment to your children, to your wife, your, your, your... Whatever is mine is not `I'. My house, that is not `I'. My this, my, my, my, must be given up, mamatva is to be destroyed.

Instead of that, you should say `we'. `We' is a good word. I so many times say `we'. And people start wondering what they, somebody asked Me, “Mother, when you say `we', what do you mean? How can you make us feel that way, that we are all one, the way you say `we'?" I said “Why not? You are part and parcel of My body. Aren't we `we'? Do I separate My finger from My hand? If you are part and parcel of My body then I have to talk like `we' because I'm conscious of this collective being sitting here." So we have to talk like `we' and not `I, my' and when you have to address about yourself, speak it in a third person. Like you can say, `This Mātājī Nirmalā Devī is now going to London.' Really it is true because this body is going there but My heart is going to remain here.

So to say that I am going is not true, if I am Ādi Shakti where am I going? I am going nowhere. I am everywhere. Where can I go? There is no place where I do not reside. And if I have to go such a place, is Hell only where I do not want to go.

So, what I say that “This Mātājī Nirmalā Devī is going now, leaving Australia. Tomorrow I'll be leaving." So what happens? Just this body has to move, that is all. Like that, you start saying about your body. This mind of mine, this

mind of Mister So and so. It is better to address yourself as Mister or Mrs. or Miss. “So Miss, will you please get up now?" Better address yourself. Children talk like that, like a third person. You will be amazed, you will see the joke behind the whole thing. You will know how to laugh at yourself. “Oh, so, Mr. come along, now he's behaving like this." And you will really become a master of yourself because you know how to handle this baby. It will give you that sense of maturity.

So to say this is my child, this is my wife, of course you have to look after your wife and your children because they are your responsibility but do for other children more than you would like to do for your own child.

So this complete identification with your children, overprotectiveness, will give you trouble. You have to believe that your family is the family of your Father and your Mother is looking after it. If you think you can look after your family by yourself, go ahead! So do not be overprotective. Do not be too worried, too upset about your family.

And keep a very sociable temperament so that your children also do not become like you. Tell them how to share. If one child has fallen off, ask other children to help. Form plays in which you should show how a child who is coming, who cannot walk properly, how other children go and try and find out methods how to help him to come out. Teach them through dramas, through stories, through various things, what is goodness is. You must help even without the idea of help. It is a pleasure. It is a privilege. It is a great honour that you can do. You must change your ideas completely.

Many people have a habit to serve your child first, is absurd, absolutely very vulgar, shows bad breeding. Must serve others first and then your own family. Keeping something back for your children, hiding some food for your children, is all a sign of a person who is like a kupamanduka, means `a frog who lives in small well'. Get over it.

Try, men, to form your own group of men. And women should form their group of women. There should be no instruction to women from men too much. It is not proper. I have discovered so many funny things. I cannot understand how these things work out. But it is because one side you feel your family is too much, your husband is too much, you must be absolutely secluded from all the rest, or on the other side it is that you give up your husband completely, he is no good, the marriage is unsuccessful and stick on to something else which is supposed to be a something, higher goal of destruction.

So both things are not good. You must stand for your husband or wife or for your children, when it is right. But obviously you should not do it. Apparently you should not do it. If you tell your child, “All right, I understand, but I don't want to do it in the public." People should not also know that he is your child. The way he mixes up with others, stays with others, shares with others, that is how a Sahaja Yogi should be.

You know as for Myself, I have not even given realisation to My children, so far. Can you believe it? Leave alone the knowledge of Kuṇḍalinī. You can teach them. I know I can give them any time I want.

I have not given them time at all, no time to them. If you see, how much time do I spend with My own daughters? Very little time. In the whole year, this year I was there for three days with them.

So the relationship at this time is the most important is of Sahaja Yoga and Sahaja Yogis. I have seen some Sahaja Yogis write to their parents, to their mothers, to their brothers, much more than they write to the other Sahaja Yogis. It is very amazing, to their fathers but not to other Sahaja Yogis. You must start writing to other Sahaja Yogis. Those who have lived in London, how many of them are writing to people in London? Have they made any friends or anything? Nothing of the kind. They are so busy with their own problems, they are not bothered to create that bondage of love. As if they have no interest in Sahaja Yoga. They stayed in the ashram in London. How many of you are writing letters to them, to London people? How many letters do you write? Now you have met them in this program. How many of you are writing letters to them and keep in contact? How much does it take to write a letter? Nothing.

I hope as soon as you go back today, you all should write letters about today's birthday, how it was celebrated in a beautiful way. Not to your family, not to your people, but to others. All of them are all over. You know how they are. You write to them because you know they are heads of the thing. Like if you write to Gregoire. Or you can write to Ruth in Italy. You can write to Genevieve in Geneva. You have met all of them. You should write! Ladies must write to ladies and men must write to men. Arneau is in Lausanne. Why not write to him? He is there.

Now do you know that his wife has to go to America for a delivery? We should know about each other very intimately. About how many people I know so many things, all the details. That is how: you must flood yourself with that love.

Tomorrow you go to America or to any one of these places. You have there your brothers and sisters already established. Write to them about your Mother, what you think. You only write to Me sometimes but never to each other. Do not write too big letters, to Me especially, but write nice sweet letters, poetic letters, they will feel happy. It is like sending flowers. Taking ideas from there, it will be a very good idea.

Thus we will overcome these six enemies and make them your slaves and use them for your purpose.

Then they will become great things. They will be your assistants, then they will be your commanders of your army. They will be your decorations. It is all in your hands. With wisdom, you have to do it. At this time, at the age where I have reached, I was always there, same age. I have been always mature like this, child like this, just like a young girl and an old woman, all put together, every year, every time. But I have definitely matured in understanding human beings. I have definitely have got better understanding and maturity as far as My knowledge about human beings is concerned because they are, when I was born they were strangers to Me, just strangers. Imagine that Ādi Shakti should say this but it is true! Despite I have created you, I was absolutely a stranger. But now I have grown. I have understood you

very well. I know you are My children. I know how much you love Me and how much you are close to Me.

[Aside about a child:] Why is he crying so much?

Sahaja Yogi: He wants to go to the toilet Mother.

Shri Mataji: Let him take away.

Sahaja Yogi: He wants me to go with him. I am trying to tell him that he should go himself but...

Shri Mataji: Let him go, this is the thing you see these children are very obstinate I personally think.

Sahaja Yogi: He wants me to go with him. That's the thing.

Shri Mataji: That's bhootish isn't it?

Sahaja Yogi: Yah.

Shri Mataji: You can't say let him go. He won't listen. Better go. See. All right take him down.

What to do, you see, they are very obstinate. The bhoots. Such a big boy can't go to the toilet. Just to disturb him, that's all.

You must really slap him now, if you give two slaps now, his bhoot will go away. Two slaps are needed.

Next time he will not do that. You see at this time you must slap, not very hard but let him know that you do not like it. Bhūts can sometimes can go away only with slapping, I have seen, especially with children it happens. Two slaps on the face and they are all right. Because they are bhoots you see and they have to go away.

Now whatever I have said to you yesterday for children, be careful! You have to make your children assets and not liabilities, on Sahaja Yoga.

So try to train them up properly. Bring them up. They deserve a good hand, to handle. In the beginning, you have to be very strict and punish them if they do anything wrong so they know what is right, what is wrong. And once they grow up, you will be amazed what an asset they are.

Some of them are very good children but if the influence of the bad children comes up too much, they might spoil the good children also.

So better encourage children who are good, who have been very sweet.

So I think of My young age, of My childhood and the dream, how it has come true. Whatever I have dreamt is beyond My imagination. It is done now. As far as I am concerned, you do not need Me much any more. I have told you whatever was needed for your counseling. I have taught you the methods, how to redeem others and comfort them. You know everything. Now just become masters in this art, forgetting your past. You are all great people, all of you.

So in next year, I should see you sitting on this seat, not in My lap, on your own, teaching your children. Let the second generation start now. The first generation is ready. Now the second generation has to come and you have to look after the second generation. I want to be a real grandmother of very grand children. That is a special privilege and real promotion and maturity.

Look at this [rain is pouring down]. He is going to flood your Parramatta [a river in Sydney]. Because I have said now “I'm the Holy Ghost." Everybody seems to be overhappy and joyous.

So thank you very much for having Me here. And think of all the Sahaja Yogis, all round the world, all of them. Today I think we should send some telegrams, about twelve telegrams if possible, to all the centers, saying “60th birthday of Mother was celebrated with great joy. She sends blessings” or something.

They will be very happy. But according to Indian's method, it is a 61st because the day I was born, that was also a birthday. That was a real birthday.

So they call it 61 and we are going to have a big program in India also.

You are specially favoured people and I hope you will favour Me specially too. This year, I hope all of you are going to take up a new role and a new style of life where you become mild people, not docile men but mild people and docile women. Women have to be more docile, domesticated. They look nice. They will become gentle. They will smile better. They create such joy. We are here to create joy and not to enjoy some rights which are artificial, to create joy. How much joy do we create? How much joy do we give to others? So today on this great occasion, we have to feel our joy within our heart. Very deep down within us lies that source of joy.

So we have to go deep down within ourselves and feel the joy of this sixty-year-old Mother of yours that I have within Myself. Go deep down. It is there. Enjoy it and then give it to others.

Like a fountain of joy you should give.

May God bless you! Declare to all the nations now, that “I am the Holy Ghost and I have come for this special time, that is the resurrection time." [As the Pūjā ends, heavy

rain pours down and with a beautiful smile Shri Mataji looks out at it and says:] All nature is washing My feet.

You see, all the devas and deities are rejoicing My birthday today.

***Contents: 1983-03-23*, Public Program, Kuala Lumpur, Malaysia**

I bow to all the seekers of Truth.

I know what Doctor Warren has told you, was quite shocking, but I didn't know how was going to announce it in Kuala Lumpur. It's all right in Australia where I've been many a times before and there people started asking very direct questions about Me, that, “How is it Mother can do such a thing?" So far nobody has been able to do a thing of this kind where everyone gets Self-realisation. We were so much pestered that ultimately I said, “All right in the last lecture you may tell them about Me." And it so happened that we did felt an amazing feeling that people really were convinced because they were just at that point where they were wondering, “How can that be? How they have become so powerful? How they are manifesting their own powers? How is it they know that what is to be done?" It's all written down and comes to you. They just could not believe it and they used to wonder how is it that what they have got has become so practical, so simple and so much in their own power.

So far so many of them have been to other people, to other Gurus, to other masters, to the churches, to other all kinds of people and what they said that, “Nothing was under our power, you see whatever they said we were doing under their power, but we never felt our own

power, it's the first time we are feeling our own power, under our control, completely we are the master of the whole thing, then we must know who Mātājī is." Under these circumstances then I had to say, “All right." Of course this is too much of a thing for people to bear and I have been overcautious.

Now from 1970 I didn't talk about it openly to anyone till people got into Sahaja Yoga much deeper and much deeper till they reached a certain stage which we call as the doubtless awareness. In that stage people can give realisation to many people, can cure any kind of disease and can achieve lots of spiritual heights in such a way that they manifest it, that their compassion which is just a conception becomes active and they can see it actualizing their own powers. At that stage where they become so much one with the Divine that we used to tell them about Myself, but not to everyone. Because truth is a very difficult thing to digest. Like Christ came on this earth and He just said that, “I'm the light, I'm the path” which He was. But people refused to accept it, they crucified Him. For what did they crucify Him? What crime did He do? On the contrary, He cured lot of people, He helped everyone, He talked of God.

There's nothing wrong but surprisingly these were the priests who crucified Him. They're the ones who supported His crucifixion. The reason for that was that they could not bear the truth.

Somebody has to do this job, it's a job of tremendous patience and tremendous work. We have to raise mountains; it's easy to say that Kuṇḍalinī is raised Sahaja, means simple way, very spontaneous, but that

spontaneity doesn't exist in human beings. They're very doubting type, you see, egoistical, they start thinking about everything and the Kuṇḍalinī, poor thing is also is so much hurt and she cannot rise.

So it's not an easy thing to raise. Actually sometimes I feel I'm raising some mountains after mountains the way people are, specially in the West and when people are westernized by their contact with the West, these people become so difficult and they have such a big ego just like a stone on their head. It's not easy to overcome all these hurdles. Despite that it has worked and now I'm sixty years of age and in My own lifetime I've been able to see the result of it and I'm very happy about it.

Last time I told you that you cannot pay for God, you cannot pay. You cannot pay for your realisation, you cannot commercialise God by anyone, whether it's a church or anything, you cannot commercialise it.

It has to be free because everything that is Divine is free. But people who pay them, you see, get nothing, you cannot get anything because these people have nothing to do with..., if they had something they would not have charged you money. They have nothing to give you, they make you run up and down, do all kinds of circus and you think your ego is so strong that you have paid for it, so better go through with it. And people don't want to give them up at all till they are absolutely finished and fagged out. That's what it is.

I've known people who are ruined by these Gurus to such an extent that they end up in lunatic asylum.

But they would not give them up whatever one may try.

So I'm so fed up with them that anybody comes from a Guru I tell them that you go back to your Guru and better not be here because you cannot drag a man on to a boat who wants to go into the mouth of a crocodile. If you drag him away, again he puts his foot in the crocodile, so what can you do with such an obstinate personality. You see, he wants to get himself destroyed; how far can you work out with him. I tell him, “My child, you have to come in the boat and save yourself from this crocodile." But to him the crocodile seems more attractive, he goes to the crocodile much more.

So under these circumstances we find it impossible to give them realisation first of all and if you don't give them realisation then they think, “Oh, nothing, you cannot work on me” as if it is something to be boasted of. We can understand also that people how they think about realisation.

In Poona once we had some people, about five, six people sitting down before Me. Actually I didn't know who they were; they were the priests, Brahmins and rather against Me, I didn't know that and when they put their hands towards Me they started shaking very much.

So I said, “Why are you shaking so much." So they said, “Mother must be you are real Shakti, that's why we are shaking." So I said, “But others are not shaking why should you alone shake?" “No, no the other people sitting there, they're also shaking." I said, “You go and ask them from where do they come." So they said, “We're coming from a place called...", but a lunatic asylum, is a famous lunatic asylum there. “We are coming from that particular lunatic asylum which is meant for very, very

serious type of lunatic people and we are coming from that and that's why we're shaking before you. You better get us all right because one lunatic who came to you got cured." I said, “All right." Now I said, “Now see relatively if you understand what you are, the way these people are shaking you are also shaking in the same way." But they would not accept that at that time.

Later on all of them had become great Sahaja Yogis, today you'll be amazed how they are working for Sahaja Yoga. And they have taken a vow that, “If we are really priests of God, we must correct all the priests who are doing these things on commercial lines." And they have really taken a vow, they have taken most of the temples now, in charge of the government and they have said that, “All these people who are making money in the name of God should be given just some sort of a pension or some sort of a little pay for their work that they're doing in the cleaning and all that, but they cannot charge any money from the pilgrims who come there for the pilgrimage." And that's how they try to save so many people who have been hurt and absolutely looted by so many priests who live in those far-fetched temples. And that's how if you go on from temples to churches, churches to mosques and mosques to everything. Everywhere what you find nothing but artificiality.

God is one, no doubt but He has many aspects and the aspects of God must be understood in its full form. Once you say, “God is one” doesn't mean that He's just Rock of Gibraltar, just one piece lying somewhere. He is a living God who has eyes, who has nose, who has a liver, who has a heart, who has a brain. All His aspects are there

and out of them, the one which is the stomach evolves, evolves to a high position. Even the cells of the fat of the stomach evolve to become the fat cells of the brain.

The other day I had told you about the Swādhiṣhṭhāna Chakra, how it works and how people go to extremes and fall in problems.

So now we have seven Chakras built within us which you can also read from the books and find out, because last time I gave you a full idea about these Chakras that are within us and how these Chakras work out. In the book also we have given the different Chakras but in short I'll tell you.

The first Chakra is the Chakra of your innocence, it's the Chakra which is your basement. If you have lost your innocence, if there's no chastity in your life, you are a difficult person for realisation. This is the Chakra which is bestowed upon by the great deity called Śhrī Gaṇeśha. He later on incarnated on this earth as Lord Jesus Christ on this Āgñyā Chakra, on this cross. Now this Chakra is so important like it is all the excretion that man does, sex and all the things are done through this one because it looks after the plexus called pelvic plexus which manifests this action within us of excretion. Now this excretion takes place because of this center being alert. If the center is not alert you have problems on this.

Too much indulgence into wrong things is against God. And also of a life that is not moral sexuality is against God, immoral sexuality is against God. And you can see the result of that, that how many people today are developing horrible diseases. We do not know how many people have got secretly those diseases within them.

Apart from that in America I would like to tell you that among young people who came to see Me, sixty-five percent of them were impotent or were suffering from some sort of a disease like that, in America.

So you can imagine how terrible it is to go against Him. This can create terrible disease and people do not know how it works and once it happens doctors will just tell you, “You're just suffering from an incurable disease, we cannot cure you." So this is one thing one should know that the Kuṇḍalinī is placed above this center, that means it is not that it has to pierce through this center. Only this center is down below to protect the Kuṇḍalinī, the Mother, the Gaurī; the Mother who resides within you, the virgin and this center looks after the protocol of the Mother and informs this Mother what you have been up to. I have seen people who have such horrible Kuṇḍalinī as if it's a kind of a beaten up personality, *[UNCLEAR]*, trying to come up and just helplessly feeling absolutely sick. It is sometimes when I think of those days when I saw these people in a row having to this Guru, that Guru and to see what's going to happen to these people, their Kuṇḍalinī is there, frozen, finished, what to do with them, how will I give them realisation.

And this is today also I see some of them do have these problems and I feel so much concerned that so many people who are seekers of God, who are seeking God are just going down the drain because it's all mental projections that they accept. It's through their mental projections they think, “What with this? What's with that? What's wrong?" So those people who told us that this is not to be done did not tell us because they just wanted to

have a *[UNCLEAR]*, they told us because they were the people who were telling you the truth, they stood for the truth. But those who are today are talking all this nonsense, new style of religion they have started condemning all others are the people who are just commercializing, trying to make money out of your weaknesses, they want to make you weaker people and weaker people.

And you too do not want to understand that you're seekers out and out. Today if you miss this chance you will never get it again so as a seeker you must seek the truth and not the misguidance and the wrong doings of these people.

Now this one Chakra I have told you about is important and sex does not play a part in our evolution, it does not. Sex is just for a married life, for a good married life, for a honest married life and is for producing children. Those who do not lead a good life like that and are, you can say, wrong type of people do have a weak Kuṇḍalinī because Kuṇḍalinī feels absolutely incapable of rising if this center is not all right. Even if it rises it is again sucked back.

So this center if it is strong it works out very well.

Doctor Warren has told you that he has seen six thousand people getting realisation, not in the cities, not in the cities, in the villages. Because city as it is, ego is too much and we have had such a great influence of all these horrible people who have destroyed the Dharma, the sustenance of human beings so much to such an extent that it's not possible to give realisation to so many people, even if they're there, six thousand people, if

anyone still had six thousand people out of which I think very few got realisation.

The reason is they are not yet ready for their realisation or maybe that they have been indulging into anti-God projections of their minds.

So God is a person who understands everything, one thing and He's also a wrathful God. If you want to do what you want to do or what you like to do and you say, “What is wrong in this?" then He will tell you, “This is wrong” and at the time of realisation you're judged. At this time one knows what centers you're catching, where is the problem is and how you have been dealing with yourself, everything is judged at the time because this is the Last Judgment. This is the Last Judgment but in a judgment as you know you are judged and you are elevated, you become the Spirit, when you become the Spirit you enter into the Kingdom of God and you become a total personality. You become a complete personality, you become a completely integrated personality. You do not become an abnormal person, you do not have to wear some sort of a mark on your head and walk about say that, `I'm a realised Soul.' The whole being changes into such a beautiful thing that you're amazed to see what has happened, how it has happened and how you have become a different person altogether like an egg becoming a bird. Real transformation takes place. If that does not take place then one must know that you're not yet fully realised. The transformation works out but you have to work it out alongside with it and see that you're completely transformed.

So today instead of telling about all these Chakras I will just tell you that the first is called as the Mūlādhāra Chakra which looks after the pelvic plexus which looks after the excretion. In the second Chakra is the Swādhiṣhṭhān Chakra which looks after the mental side and the physical side whatever we do, action that takes place to this Chakra and also it manifests outside in the gross aortic plexus. On top there is another Chakra called the Nābhī Chakra which manifests outside the solar plexus by which our food is digested and all the viscera in the stomach are looked after and also the Swādhiṣhṭhāna in combination with that looks after all the viscera within us and our balance.

Balance is the one we have to achieve in our sustenance. Sustenance is like your valency as a carbon has four valencies you too have ten valencies. And these ten valencies must be adjusted. If Mohammad Sahib has said, “Don't drink” He was not a man who would tell you lies. Why He said it, “You don't drink” because drinking spoils your liver, it spoils your awareness. But I don't say that, I don't say you don't drink. When you get your realisation you'll drop out, you'll not drink because you will be drinking the nectar of God's love, then you won't drink yourself.

So I'm a Mother, I have other tricks of giving that *[UNCLEAR]*, it's not the way these people directly said no use, if you tell, “Don't drink” then immediately they'll go to a pub. “If you said don't drink then I'm going to drink ten bottles” and die, that's what it is. But if you said, “Don't, you can drink", but later on you find you just cannot drink.

I've known people who have just stopped drinking completely. You become a beautiful man, after getting your realisation because you are beautiful and you are a radiant personality.

I'll tell you about the third Chakra, the most important thing about the third Chakra is that it is for your seeking. Through this Chakra you seek. First you seek your food then you seek your shelter, then you seek your powers, you seek your love, all sorts of things and emotions also join to find your love and all that and then you seek ultimately God. You find there is nothing in all these superficial things, these parties and politics and all those things that you have been doing is just useless, there must be something beyond. Then that is the time you're caught up by these fake Gurus and you get lost in that. How they work out I'll tell you later on.

Then on top of that is this another Chakra which is called as the Mother's Chakra. This Chakra is bestowed upon by the Mother of the Universe who looks after you, gives you security and if this Chakra is spoilt then you get a problem like breast cancer and all other things. I used to tell people that women should not smoke at all. It's the worst for women, of course men also should not smoke because they'll get the throat trouble, they'll have cancer of the throat. But when I told the women, they said, “Why? We have equal rights. We have equal rights to kill ourselves and cut our throats." So I said that, “Because you are more sensitive and you'll have breast cancer." Yesterday, the day before yesterday, we read in the newspaper that in America the president of the cancer research has said that women who smoke will definitely

get not only throat cancer but also breast cancer. And I Myself have said it many a time but they used to fight because men have no breasts so they cannot get it. But these women fight for equality all right but cancer does not know that. Cancer says, `If you're a woman you better get it,' that's what it is.

So women should not smoke at all, men also should not smoke but after realisation they just cannot smoke and they just stop it.

So I don't say don't smoke because men will just run away.

The problem is when someone tells you something people don't like it but actually I'm not here to take anything from you; to give you something, something that you have within yourself, is the Spirit and you have to take it because it is your own, to *[UNCLEAR]* your bank, you have come to your banker, he will know what you have. I have to just stand in between to give you what you have cashed inside and I have to just pass that to you as your cash. It is multifold, whatever you have put in the bank has grown in multiples now so you will get such a lot you can't imagine. But you have to have a banker standing before you, you don't get angry with your banker do you? Then why should feel hurt when they say Mother has to do it. It's a thankless job I tell you, the real thankless job which I'm doing. I'm a very happily married woman, I've got My children, My grandchildren and I'm not doing it for anything but because I cannot enjoy My life without making you enjoy your life. That's the only thing is because only the compassion that is within Me doesn't allow Me to enjoy the life of that

spirituality which you all can enjoy very well, very easily and that's what one has to do.

Now on top of that is the other center, here we can go in a slow or fast way which is the Chakra is a very important center and is a center called your collectivity, for your collectivity. When this center is enlightened your hands become collectively conscious. You start feeling the Cool Breeze in your hands and in your hands you can feel what's wrong with you and what's wrong with the others. Because these fingers are shown there are on that side also. You can see very clearly, are showing all the centers that you can feel.

So on the left hand side is the emotional side and right hand side is your side which is doing the action, all physical and mental action and these how you recognize the left hand side you feel the left centers and the right hand side you feel the right centers and this is how you decode them and you'll find ultimately that it's a fact. You can immediately verify it and find out for yourself. If you find some lady is suffering here and you ask her, “Have you been to any clairvoyant or some Guru” she'll say, “Yes." If she's suffering here then you can ask her that is she overactive, is she thinking too much, she'll say, “Yes." And that's how you can find out the patients what they're suffering from also then you'll have to learn how to cure them of their troubles, apart from this you must know how to raise the Kuṇḍalinī and give them the ultimate that is their Self-realisation.

Now after that you will see on top is a very important Chakra, Āgñyā Chakra where I said Lord Jesus Christ is crucified there, you can say, because these two

institutions of ego and superego, are *[UNCLEAR]* each other very gentle here and to pass through that the Omkāra itself, the *[UNCLEAR]* as they call it or the Chaitanya or the Rūh or they call it the Cool Breeze of the Holy Ghost. The son of God has to come down to get crucified so that He could prove that He is settled within you in that part. Now this is a center between the pituitary and the pineal bodies, a very subtle center which people call as third eye, but you don't have to develop an eye, you have to see through the eye. Actually when you see the eye means you're not seeing through the eye.

So those who see the eye are outside, those who see something are outside. You have to go from inside and see yourself outside and not to see yourself outside in. This is what many people do not understand; if they see a cross they think they've become God; if they see a light they become..., they have become great. To see light is very simple, you can see this light, what's so great about seeing a light. But have you become the light? You have to become the light and that's the point people miss that you have to become and not to see something.

This center is important because this is the center of light and this controls your ego and superego, it also controls your eyes, it controls many things, like it controls, if you are possess by a, some negative force or anything it will show on this center. And it will show also a person who is overactive, who has insomnia, who cannot sleep, who cannot relax.

Sop we have two sides of this center, here and there, one controlling the ego, another controlling the superego.

On top of that we have the last and the most important center which is called as the Sahasrāra with one thousand petals are there. These one thousand petals can be seen if you have a transverse section of the brain you will see that it's created like petals and even if you have a cross section you can see the petals going like that, just like the petals of a lotus and if you cut it also you'll see that there are. Now the quarrel is whether nine hundred and ninety eight or one thousand, this is what the doctors will quarrel, that's not important. There are one thousand, if we have not discovered two, we'll discover them later on.

But first of all discover yourself, have the light within yourself and then discuss these small little dogmatic things which have really ruined the world completely.

Now on top of that is the one that has shown, is the place which we call as the Brahmarandhra, is the point where the Fontanelle bone area is where you feel a kind of a softness when you are a child which pulsates. Then this area gets covered where the ego and superego meet and it becomes calcified. Then you develop your `I'-ness, you become Mister I, Why, like that. But when the Kuṇḍalinī rises, first you hear there in the head a kind of a sound, you can also see the rising of the Kuṇḍalinī in many people who are not normal, who have some problems. But mostly if they're normal people it just rises fast and it breaks through here and you can feel the Cool Breeze coming out of your head very clearly.

So many of you who are here have felt it, have felt it in the hands also.

So now we have to progress further with it, little more I would like to tell you about the sides that we have. The body that you see here is of a normal human being. Now a human being has a left and a right side.

So left side of a person, the blue side, left side of a person has got the power which is called as we call it the Mahākālī power, but you can call it as the power of desire, the desire by which we exist. And then you go beyond desire, you start imagining things and all that, you go into another area because that is the subconscious area, you start going into subconscious area. And beyond that if you go, you go into the area called collective subconscious. Now this area is very dangerous because all that is dead from your creation within you which accepted by doctors that there is an area like that within us, which is built-in within us since our creation. Now cancer according to them is caused by triggering of our being by proteins called Protein 52 and Protein 58. Now these proteins enter into our being from that area known as collective subconscious.

Now this collective subconscious is a very dangerous area where people enter into through the forcing of the Gurus or by mesmerism or they try to push them through some extra activities and things like that they put into and the people are pushed into the left side, these are pushed into left side they can get anyone of these diseases like mellitus and so many of these, like cancer and leukemia, all these things come from the movement towards the left side. It's not only the Gurus, even if you go to, say, a cemetrey for quite sometime or if you're under a shock and then you meet somebody who takes

you to a cemetrey or if you have some relationship with the dead or clairvoyants or these ESP and all these things, all parapsychology give you this side.

So all these people are absolutely taking a very dangerous situation. If they're vulnerable, if they're overactive people they're already vulnerable and if they're vulnerable and attacked by something from the left side they are absolutely there for cancer, waiting for it. Though cancer is built-in within us every moment we can say because of the sympathetic activities of the left and right side but the parasympathetic, the central one is always trying to neutralise it. Like if you are running very fast you can increase the rate of your heart but you cannot decrease it, it happens automatically.

So the one that increases is the sympathetic which can use and the one that brings it to the normal is actually the one which is parasympathetic which a part of autonomous and this `auto' is nobody else but our Spirit. If you go and ask doctors what is autonomous they will not be able to tell you because auto means Self, now where is the Self, where does it reside and that's what we have to find out.

The another area is the supraconscious area on the right hand side and if you enter into too much into your right side, means you're thinking too much for future, going for future, very futuristic and all that, you might enter into an area called as supraconscious. Such people see visions and things and they can predict things about future, they're good predictors and they can also be very cruel people. They become very dry and cruel people and an example of that is Hitler. Hitler used the

supraconscious powers, he mesmerized people with such ambitious people and that's how he could managed the Germans to behave in the most brutal fashion the way they did it. It would have been impossible for any normal person to accept what Hitler said but he was so much using these powers and he used Tibetan lamas for that purpose because they too deal very much with supraconscious powers. And that's how he had a Tibetan lama with him throughout and that's how he managed it, the supraconscious attack.

Now the lower part of it is the hell I can say where people can pass into the hell that is called as the absolutely a base rotten stuff from where you have risen. But a hunan being who does not follow the human balancing processes does not become an animal, he becomes worse than an animal with the brain of a human being and the whole body like an animal, so it's a horrible combination he becomes and they become what we call in Sanskrit language, the Pishāchas, Rākshasas and other people of that kind who are devils and these devils can be born again and again and they try to become, this time I find they have all become Gurus and they're trying to misguide all the seekers because that's what their job is, to establish their own kingdom and not of God. And that's what they're doing and that's what they're expert in and they have managed so many people that you can't imagine.

And these people are now falling into such traps like I went to Australia the government is worried.

Government says when they go there they become penniless. They come here they are brainless, they are

like cabbages, they have no money left with them and some of them end up with drugs and most of them are now going to lunatic asylum. Within ten years they start *[UNCLEAR]* reason of what they have been doing in *[UNCLEAR]* and they told Me that, “Why not your government take it up” that they should look after these Gurus and tell them to behave. I said, “You see, we cannot tell any government to be that idealistic, it is you who should look after your people and see what they're doing, why they're going there, who are their Gurus and how they're spending their money." They said that under the circumstances that we are all free countries, we cannot do, such are the laws. I told them that laws are not for you, you must know that you are for the laws, you can change the laws. Because this is a new thing that's happening in your country. They said fifty percent of our young people are just living for them and there're all going to India, spending all their money and people have got sixty thousand, seventy thousand crores of rupees in their banks and they have got Rolls-Royces, aeroplanes, this and that but these people don't see and think, what to do? So I said, “Now I cannot suggest what you can do about it." But as far as Indian government is concerned, what can they do? Because they are not asking you to import them, they are not asking you to spend money on them. It is you who are going and spending money on them, you must keep a little watch on your people who are going there. But every government is so much worried today about these people and they don't know what to do with them and the more they're worried the more the people become adamant and they say, “What,

you are going to pass this law, I'm going to break it." That's what it is and people are really going towards destruction.

So one has to understand this left side and right side very clearly that if you become right-sided you start seeing visions, seeing lights and all those things. If you go to the left side you start jumping, like a dog you may bark, you may bark like a, absolutely like a ordinary bitch, some sort of a thing that you do which is absolutely wretched and useless. I mean something that you just cannot think that a normal human being would do. First of all they do is that they give you no self-esteem.

They give you an ego, all right, they can tell you, “Go naked." So you will say, “How can that be?" “Oh are shy, you are absolutely shy and why should you be shy, you must get over it, what's wrong in that?" So they pamper your ego. But that is not self-esteem. “Why should I become naked? I have My private life. Why should I become naked?" This sense of esteem is finished, once the self-esteem is finished you can start taking to all their ways and things and they become like that. And they do all kinds of things like *[UNCLEAR]*, they said things people do that's unbelievable, that human beings can be like that.

And there has been so much unholy attack on the children of God, on the seekers who are so beautifully *[UNCLEAR]* on this earth for this great occasion where you all have to get your realisation and they're permanently finished and permanently killed by this horrible thing.

So it is not a mental thing, it is not a mental conception. Compassion is not a mental conception. `I love you,' has no meaning because mental conception today, `I love you,' and tomorrow, `I hate you.' But compassion is a thing that acts, that just flows and it just works. You don't have to do anything about it. For example now you must have know that I have told many people, I have but I don't have to do anything about it, it just flows, it just works out. Gradually everything goes all right and it works out.

So I don't have to do this to tell you mentally to think you're all right or some psychological treatment, nothing of the kind. It is just like sunshine. If it is compassion, it has to be just like sunshine, so the idea that if you talk of compassionate thing and give a very third-rate sermon on compassion and love and this and that. That doesn't that such a person is loving. It's not at all, it never means that, it means that such a person is trying to put up a show which doesn't exist. If a person has compassion, it must act.

Christ was once touched by some sick person and He felt it and He said some energy had flowed into that person, that's what is compassion. That's how it should happen but that doesn't mean that Sahaja Yoga is meant for sick people, not at all. It is meant for people who are healthy, who are courageous, who are honest, not for people who are dishonest and who are cowardly, who have no brains to understand things which is meant for really special type of people. And that special type of people, they may not be kings, they may not be queens, they may not at high positions, they can be at a very ordinary level, but

there are many I found out, so many, thousands of them are there who are really special people of God and Blake has called them the men of God will become prophets and they will have powers to make others prophets.

All these prophecies that have been made are to be proved today. All the religions that have been created by these great incarnations are to be proved today. All their integrations and their correlationship is to be established. All that can be done through Sahaja Yoga. I know it has to work out. You people have to really understand that you are the Spirit and I have to tell you something about the Spirit also today because in such a short time I don't know how much I have to tell you. Moreover, for the last twenty-one days in Australia I've been speaking everyday to so many people and looking after them, giving them realisation and after that I was very anxious that I should again revisit Kuala Lumpur because last time I saw the response was very good and they were such nice people who got realisation and such nice good people who got realisation and are working it out further.

I was really amazed how this place which I visited, actually only the second time and the first time I couldn't meet so many people and only the second time there're so many people who came in, they got their realisation and they felt so much better and have grown so much in such a short time. It was so amazing and so joy-giving. I said, “I must go and see these Kuala Lumpur people." As you know that I've had really a hard time all this time and I may not be free for you people, for next day but I would request you that anyone of you wants to know more about Sahaja Yoga or anything you can always go to your

center, find out from the people who know such a lot. There's nothing to feel bad about. Tomorrow you'll become a master, when you become the master you can also tell people.

So you should keep your ego outside as you should keep your chappals and shoes outside. You should not carry your ego inside because if your ego is there then nothing can go into your head, it is like a slab of stone on the head.

So you keep your ego outside, you are coming, you have to learn something, to know something, to gain something.

With this idea if you come to Sahaja Yoga you will progress very fast and you will really become a master, a real Guru of yourself. You don't need any Guru because your Guru is your Spirit.

Now what is the Spirit? Spirit is the reflection of God Almighty, while the Kuṇḍalinī is the reflection of the power of God. The power of God is called as the Ādi Shakti in Sanskrit language and Holy Ghost in other languages. Now this is the power of God which manifests within you as the three powers, as I told you. But there's a fourth power which is the complete desire, pure desire within us. First of all the desire power gets into there, is pure desire and this pure desire is the representation of the Holy Ghost within us. This pure desire is to become one with the Divine. Unless and until it is manifested, a man cannot be happy, cannot be satisfied. With all other desires you can never be happy, you can be partly happy, then unhappy. But by this you become the joy,

you become the joy, then there is no two sides to it, there's no happiness and unhappiness in joy.

So the first quality of the Spirit is that it is joy, it is joy. Now joy is something that is to be experienced and to be felt, not to be described.

Actually sometime today when I was coming say, for example and I saw the cloud jutting out of the beautiful tree cloud, such a beautiful, as if some islands have come out, such a beautiful scene. The whole joy started trickling down My head absolutely and there was a Sahaja Yogi with Me, he also felt the sane way, the whole thing is trickling down, the whole being and filled Me up completely and I was absolutely thoughtlessly watching that beauty. That's what happens to you when you see something great, something really Divine you start just getting that feeling within yourself. You don't jump, you don't shout at it but just the soothing feeling you get within yourself, actual soothing feeling within yourself. Even in Sahaja Yoga when you are sick and all that when you try to take vibrations you'll be surprised the soothingness comes as if some soother has been put on your body. The whole thing soothes down your brain, soothes down your nerves, you become so relaxed absolutely that this Doctor Warren was a patient of very high blood pressure but after his realisation he forgot about his disease because the whole nerve, everything gets completely soothed with this immense power that runs on your being, this power of your Spirit. Now the power of Spirit, one is joy. The another great thing, I cannot describe Spirit in such a short time. I don't know how many lectures I have given about it and you can

yourself listen to those because we have those tapes here already in this place and you can listen to them and you can understand what it is.

But one of the, another special quality of the Spirit is that it's the collective being within us. It is a collective being, means that we say that, “You're my brother, you're my sister” but it is still a mental projection, it's not a collective being but you become a collective being, then you become the Spirit, means you start feeling others within yourself. The others who are not other, as if this finger feels this finger, in the same way you start feeling others within yourself and because this Spirit which is the collective being gets awakened, it's not yet in our consciousness, it's not in our attention. When the light of the Spirit comes in our attention then you start becoming collectively conscious and this is what happens to you.

First thing that happens to most of the people is that they become collectively conscious.

Now Jung has said that next evolution has to be where people become collectively conscious but I don't know how many people understood him because there're very few who follow Jung, most of them follow Freud because it is easy to go to hell, take two running jumps and you are there. But to go to heaven you have to work hard and you have to be confined to many things and that's why people don't want to bother about people who talk about heaven. But hell is not such a simple thing to live, hell is not a place where you are planning to go. The creator has not created you to go to hell and get yourself destroyed. It is He who is going to look after this creation, it is He who is anxious to give you realisation, it is He

who is working it out so much and that you should just open your hands towards Him and get it to yourself, that's what it is, just open your hearts and open your minds and just get it because He is anxious to do it for you.

Now the last is about Spirit, third thing is that He is, as I said, He's joy and He's collectively conscious, so that your attention becomes collectively conscious, that you start feeling others on your finger tips, sitting down here you can feel anybody's vibrations and you can say what is he suffering from, what is his problem, what is the way we can help him. Also you will learn through Sahaja Yoga and you can help him sitting down here you can help that person because you enter that ether of God which is within everyone.

So once you are there just like a radio receives messages through the ether the messages you can receive about others, what is happening to other people when you are sitting down here. It is much more than this but in a short thing I would just say that you become collectively conscious.

The third great quality of Spirit is that it is absolute and because it is absolute it is not relative you jump into a life that is absolute. There is no relativity, there is no alternative. You see, these vibrations will tell you always the truth, nothing but the truth because Spirit is the truth and it's *[UNCLEAR]*.

It is the truth.

So when you want to know about somebody, `Now how is this person?' The vibrations will tell you. Another person who is a Sahaja Yogi will say the same thing. Even if you

have ten children and tie up their eyes they'll tell the same thing that this person has this problem or this problem or this problem. Everyone will say the same thing because truth is one and that's why you just say, everything says the same and there is absolute collectivity among Sahaja Yogis.

There's no quarrel, no fighting, nothing. It is said that helium when it is heated up every molecule fights with each other. There's a big commotion there but when it is cooled down it becomes collective and starts moving in the same direction. In the same way what happens that everything that you do becomes nothing but your vibratory awareness because you get a new awareness, a new dimension by which you can judge others. For example if you want to know, `Is there God?' If you have to put your hands like this and ask the question, you'll get a Cool Breeze in your hands. If you want to know about Me, if I'm the Holy Ghost, all right you ask the question, put your hands like this, ask the question and you'll get a Cool Breeze coming. But if you want to ask about somebody who is a thug or who is a false Guru, you ask about him and you'll not feel anything, on the contrary you might get some blisters. There are many Gurus who have given Me blisters also. I have been touching some people and they gave Me a blister in My hand. Such horrible Gurus people have created, they're nothing but just burning Satanic forces. They're trying to destroy all God's work and we are playing into their hands though we are seekers of truth, though we are seekers of God we are playing into their hands listening to their third-rate talks about God and third-rate talks

about divinity and love. They cannot do anything, they've never done anything, they have never given realisation to anybody, to anyone. They have nothing to be, except to take your money or do something like that.

Now the quality of God as I said is truth but all this put together of the Spirit that is His love. In love, if you have love, it's truth then you know everything about another person. But love that we know of is not the love. The love of God gives you all the knowledge of a person, it has that power built in itself that it gives you all this knowledge that you want to know about another person whom you love. The love need not be that you love that person in the mental way but you just extend your attention to that person and the love will tell you what's wrong with that person, what he has done, how to help him and you go all out and work it out, hours together you work it out and try to help him.

But there can be some people who take you for granted, many people I've seen they come to Me, three hours they'll sit down and just work on them, cure them and I said, “Will you come to the meeting?" “Now I have no time, I have to go to a party." Where did I have time to be with this woman? It was just a waste I think. This is what it is, your priorities are so wrong.

So then she'll develop some other disease tomorrow she'll come to Me she'll say, “Now please." She will definitely because you are not yet totally all right. You have to become the Spirit in a full way. You have to work it out that you become totally a Spirit, completely the master and then not only that you'll be perfectly all right, you'll enjoy your life, you'll have all that is within yourself

to give you complete feeling of *[UNCLEAR]* and complete feeling of Her glory. But that security and that openness of your heart that you will give and give and give to others, no money, nothing but this love of God, these vibrations, the Chaitanya that flows from you.

So for this short lecture whatever it is, I'm sorry that I've to make it very short, just I came back and I dropped here just to see you all. May God bless you, I hope you will understand your importance in this area. We have not much support in Singapore I think because the people are very funny, we haven't yet been able to do much. Now here on this side, on to Bangkok, on those sides also, I have not been able to build up much. On the other side if you see Malaysia is the only place that I can say I can put down My foot here.

So this is the beginning and those people in Malaysia if they become wise enough and if they understand that they have to sustain Sahaja Yoga here. You are the ones, if you do it you will be responsible for all these nations around here and that's why I say that you should take up responsibility upon yourself that in Malaysia you'll establish Sahaja Yoga in a proper way, in a perfect way so that others will come to Malaysia, it will be a center for them to come down to you to learn about Sahaja Yoga and take this to their own countries to create a very, very beautiful aura, a beautiful atmosphere for them to live because the world has to change.

The time has come for the world to change, only through the transformation of human beings the world is going to change. And it is working out everywhere in every country except for this area which I tell you, Singapore,

you people, Bangkok and others surrounding countries I've not been able to do much.

So I request you to be steady about it. If you can manage it I'm sure we can spread it from here, a nucleus can be created here. For this you don't have to spend any money, nothing has to be done, there's no need of spending money or anything but simple thing is that you have to establish yourself. That's the only thing you have to do, is to have full faith in yourself, confidence in yourself and to get to your realisation.

May God bless you, thank you.

[Kay McHugh is worrying about packing and serving breakfast.] Come here. [Puts Her Āgñyā finger on her Āgñyā and twists it.] It's a myth, looking after Me. You're not really looking after Me at all.

Contents: **1983-03-2x On Future School**

[On the auspicious occasion of Her 60th birthday, Shri Mataji announced the project of starting an International Sahaja School primarily for the children of all the Sahaja Yogis. The site for the school is about an hour and a half drive away from Bombay, midway on the Bombay Poona highway. It is off the main road, situated on a hillock facing the majestic Maharashtra plateau. A little stream sings along to provide the drinking water.] [Questioned if the school would be run along the pattern of old English

schools, Shri Mataji replied:] I don't want any soft ladies, I want strong, grounded, hardy Sahaja Yogis.

Contents: 1983-03-28 **Birthday Celebration, Concept and Reality, Ajwan E-Ghalib, New Delhi, India**

[Doctor Nagendra Singhji delivered his address in the form of Stuti (praise) of his SadGuru and Divine Mother.] [Mr. Venugopalam mentions that, he too was a devotee of Lord Kṛiṣhṇa, but it was Shri Mataji who gave him realisation and not Lord Kṛiṣhṇa.]

I bow to all the seekers of Truth.

At the very outset, I would like to thank *[UNCLEAR* revered] Doctor Nagendra Singhji for being so kind to grace this occasion. Actually I have always treated him like My Jyeshtha [elder brother of husband] and find it difficult even how to express My gratitude the way he has been kind to get this time, come over and talk to you about Me, whom he had known for so many years.

The day I knew him, I knew that he was a very very great soul. But as is in the bureaucracy, you are not supposed to discuss religion. Neither you are supposed to discuss anything that lies beyond your job.

But when I was studying minutely the various permutations and combinations of human problems, I was really always very much encouraged to know that there are people like him also. His greatness you will know very soon; and his sister about whom he was saying, herself, is another very great soul and the time I spent with her, I was really so much enamoured and encouraged to see such a learned personality. Like her brother she knew so much of beautiful things about God

and beautiful things she said from `Raghuvansha' and Kālidāsa.

I found Myself very lonely always, where I could not talk of God and His greatness and His kindness for human beings in the company of people who were doing work other work than of God. It was such a solace and such a hope that people who apparently appear to be in the charge of helm of affairs, are also in charge of the helm of affairs of God [Dr. Nagendra Singhji and his sister]. A day will come, when they will take up their new roles, when they will become aware that it is God who rules them, it is He who does it, it is He who has created everything and it is He who enjoys everything.

For this awareness, as you have very kindly said Sir, it's important that you have to be fortunate seekers. The seeking ultimately has to come to human beings. Because all that is done through mental projections and conceptions has one good point that it is always exposed and comes to an end. Every set enterprise of human beings only moves in a linear way and at a point it drops down. That is why, all our conceptions and all our ideas are challenged after some time.

In politics when we talk of communism or of democracy or capitalism, we are talking of a concept but not of Reality. For Me, I am the greatest capitalist I think, because I know My powers and My properties and I own them. I am the greatest communist, that despite having everything in life, I cannot enjoy My life without sharing it. `Every' moment of it, `every' moment of it.

So the meeting point only comes when all these ideologies become one at the lotus feet of your Spirit.

Spirit is the only thing that is at the center and at the periphery if yon look at things, they look as if they are separate and different. But if you can approach somehow into that state where your Spirit resides, you will be amazed to see that everything integrates, everything coordinates and there is no difference, say, in Mohammad Sāhab, Dattātreya, Rāja Janaka or Shirdi Sāi Nāth. There is no difference in their principle, if you can just get your Spirit. But this is a very major step for human beings. It is a very major step for human beings. Because they want to live with concept and not with reality. This is one of the problems which we have faced throughout in Sahaja Yoga, all of us have faced it.

Even about compassion we have a concept. For example, if some body has a hospital and goes to the hospital regularly and treats some patients and does not take money, we think he is a very compassionate person. This is also our concept about compassion. Actually when reality expresses itself as compassion, then you don't do anything about it. For example, to say that I raise your Kuṇḍalinī, also I don't know if I do that. Because you are all ready, you are all like candles. I am a candle which is enlightened and if this candle enlightens another one, I do not think I have done a great job. Because if I am enlightened and then if you are ready and if I enlighten your candle, then it is just done. This is what reality is. There is no question of having any humility about it, but that is a fact! I really do not do anything. You are all made ready for this purpose. God has prepared you like this and you just have to accept yourself and if this works

out in a simple straightforward manner, you get your realisation.

Many people think that I have cured people so I have done any sort of a good deed or may be some obligation. But to be very frank, that is also a concept. Because what do I do to a person? When I cure that person, I don't do anything. The reason is: when “I feel that I am yourself, you are a part and parcel of Me” it is not *[UNCLEAR* that/feel] from my brain, but actually it is in my `central nervous system', `actually' I feel, that you are a part and parcel of Me. When Doctor Sāhab's sister was sitting next to Me, I `Myself' felt the pain within Myself; because her body is part of Me and I am part of her. And I asked her, “Have you got a pain in this portion?" She said, “Yes, how do you know?" I said, “I cannot tell you at this stage, but you will also know the same way." So when nobody is the other, then where is the compassion? Because supposing this finger is paining and if I try to rub it, am I doing any compassion to this finger? Because it is a part and parcel of Me.

So, the difference between the reality and the concept is this: That with concept we develop egos or we develop another system by which we feel obliged or anything. But with reality you just do it. It just works. You start speaking in third person. Like you say, “It does not work out." “It works out." What is this `It' that is working it out? Then you realise that you are working for that great power of God which is His Divine Love, which is all-pervading, which is doing all living work and you have become part and parcel of it.

Same thing I found about the concept of ego, which has gone to such an extent that in the west if you go, you will recognize it much more than you recognize in India. Because we are very good at hiding it.

We may be very egoistical, but in our every day-to-day life we are extremely humble to express it.

If you go to a party, simple thing I will tell you and if you don't drink, every body will say “why don't you drink, you must drink” or they force you, go on forcing you. You say, “Baba, I don't drink." You have to tell `some' lie. You have to tell for this, to hide this thing from others, to achieve a greater goal, you have to give up some lower goals, of telling lies also. You have to say that `Doctor has told me not to drink.' `Oh! forget the Doctor.' Then if you say that `Now you see, the problem is I have allergies, I get into trouble.' Somehow, you escape. But if you even `once' say that, “Why do you drink?", Then: “You are a matron. You are very ego-oriented. You are very interfering. You are trying to show off." See the concept of ego is just...!, To be virtuous is a problem these days. If you are virtuous, everybody will attack you. But if you `even' mention about virtue, you are out for a crucifixion, or you are out for poisoning, or something people will do. Because of the concept of ego.

But in Sahaja Yoga, ego is not a concept but a reality. Because when a person becomes egoistical his Āgñyā Chakra catches, so he comes to the Sahaja Yoga center and says, “Now see, my Āgñyā has caught up." He says, “I am suffering from ego disease." Openly, without feeling shy about it! Because it is like a sarī which is now become black, so I better get it cleaned. He is not

identified. Concepts give you all misidentifications with `everything'.

So when it comes to reality, all this misidentifications just drop out and that is why I have seen people transform so fast. I mean, you cannot believe it, how people transform.

Now as Doctor Warren has told you that in west, we have lots of seekers, but the Western civilization is the civilization of the tree. They are growing without their roots. While we Indians know about the roots, we are not bothered. They are not at all in the knowledge of their roots. The trouble is, they have become so ego-oriented that their concept of ego makes them forget that they have roots. Even to accept that they have roots, they find it impossible. Under these circumstances what happens, that the ego itself reacts on itself. And that is why all the Western societies today are collapsing under that pressure of ego.

But if you have to talk to them it is not possible to tell them. For example, in Sahaja Yoga we believe in a moral life. In a moral life, where you are married to a woman and lead a `very' moral life. But we don't talk about it till you get your realisation. After realisation automatically you accept it.

But by chance if you say that you have to be moral, then they just get after you. They say, “We have achieved our freedom and this Victorian Lady is telling us some out of date things and why should we accept." So the concept of ego itself is so funny that they do not know that they are catching on their Āgñyā Chakra.

In this great assembly of realised Souls, which is a very very great thing, to have so many saints sitting around, you know that the ego means the catch of the Āgñyā Chakra and it is a reality.

Somebody may say, “I have no ego." Alright you have none! Because better not say. But supposing he is a realised Soul, he will say “Mother, I have got my Āgñyā Chakra catching, you please take it away." Because it becomes a reality to him. And when it becomes a reality, you must know you are enlightened.

If it is all darkness, you do not see. But when there is light you start `seeing' what is wrong with you.

You start seeing that we are sitting under one roof. `Any' problem to this hall is going to cause problem to `all of us'. And that is how you become `collectively conscious' within yourself.

This is also another concept people have. In the United Nations and everything I have seen, that it is only they are working on the concept which they got it from their Unconscious. But in reality they haven't got it on their central nervous system, as you all have got it. They will say, “All right, you are brothers and sisters, we must help the nations, we must do this” and all that. But when it comes to reality, when it comes to the working of it, you find they do not do it. They just do the other way round. Now, you cannot explain, you may write books after it and you may write dogmas and you may write many articles about it. But actually they just can't do it, by temperament, because they are not Spirit.

But when you becomes the Spirit, the Spirit, being the collective consciousness itself is the reality, the concept

becomes your awareness. In your chetanā you start feeling others `within' yourself.

So what is there, from Canada or from Australia, I feel when these people meet the way they love each other, the way they enjoy each other. When these Westerners go to the small villages in India, the way the villagers just embrace them and the way they become one with each other, we have never seen people going into politics, fighting with each other or saying lies about each other. But just a meeting of these people, like a huge family! The whole system of joy giving and enjoying, is `so' beautiful that even to watch that itself is like watching a very beautiful drama of Kṛiṣhṇa's Leelā.

I have seen this happening in all the parts of the country. When people come from across they may be Muslims, Hindus, whatever they are, the friendship and the love and the fondness to do for others, is so great that people are surprised that how can it be that these people who are living together like this are so much helpful to each other, so much loving to each other. They never quarrel, they never talk against each other. There is no question of people who will try to cut each other's throat. Because the competition is in loving more, the competition is in giving more, the competition is in understanding. There is no problem in the society of Sahaja Yoga.

Sir, you will be happy to know, though our society is not so large. Compared to this universe, ours is a very small society. But you will be amazed we `never' have problems which normal people have. We are really abnormally normal. Because we have no angularities, we have no problems. People have become so honest, so

courageous, so bold, so loving, so giving, I am Myself sometimes, I feel so enamoured by this expression of love and the waves of this ocean of love expressed all over the world.

Even if you meet `one' single Sahaja Yogi somewhere, you will be amazed the way he leads his life. And the way he is so beautiful, that he impresses people immediately. Though some people do try to trouble him. But God looks after Sahaja Yogis, is a fact. And Sahaja Yogis all of you know, how He looks after and how He just tries to protect you in a very simple and beautiful way.

To know God `itself' is `such a great' blessing, because He is the God Almighty. The God who has `all the powers' and all the loved ones. He is our Father, He is waiting for us to enter into His Kingdom, to enjoy that peace and beauty of His Being, because He has created us and He wants this creation to come up to that.

Today, the great day of Holikā Dahana, where the symbolism of this occasion is that the Satanic forces were burnt by the innocence of Prahlada. And that is what we have to remember, that when the Sahaja Yogis take to innocence and complete dependence on to their vibratory awareness, which is the indication of God's Manifestation through them, they are `completely' protected and even a Satanic person like Holika could not burn him [them]. And this is the day today, we have to `recognize' that as Sahaja Yogis we stand no dangers in life. We are fearless people, but we are humble people, loving people and anxious to save as many as possible. To raise the whole humanity into another awareness, in the process of your evolution you have to achieve, for

which you have to work hard. As TukāRāma has said very clearly: “Yfieryā gabādyāche Kām nohe", This is the work of the Great Virās. Only the courageous can do it.

Because you know, how sometimes one has to face this world, the difficulties and criticisms, and how people try to insult you and trouble you, where you have to keep your peace. As realised Souls, I congratulate you very much.

So many realised Souls are sitting here today is the greatest honour for any Mother.

My age is now quite a lot, as you know and I `never' felt ten years back, that within ten years I will see `so' many people being realised. My father, as I told you, was a very great soul and he himself had told Me that unless and until you find out en masse method of realisation, you should not talk about it. Because unless and until it is en masse, people are not going to recognize God, nor they are going to recognize any saints. But today, when it has become the reality, when it is no more a concept; God is no more a concept, it is the reality, the joy and happiness of your Spirit, Sacchidānand Sthiti [the state of Truth, Attention and Bliss] is just manifested and I am enjoying all that.

I do not know how to thank you for organizing the birthday of your Mother. Normally people don't think of the Mother in Kali Yuga, they say. But I must tell you, there is one person sitting before you, Doctor Nagendra Singh, who was a great devotee of his mother and his mother was a realised Soul, a great realised Soul. I met her many a times and I always made it a point to see her. And her children have got that from her.

And this is what one has to recognize, that in this world there are `many' people who are basically very great Spirits. Only thing you have to approach them, find them out, understand them and discover them.

Now Sahaja Yogis are not so much upset as they were about ten years back. Now they know that there are many people in this world who understand Sahaja Yoga. But that is not sufficient. We have to give realisation to many, thousands and thousands of people have to get realisation. This is to prove, when you celebrate My Birthday, that this is not any more a Kali Yuga but Krita Yuga has started and that Krita yuga has to be finished now to bring the Sat Yuga, on this earth.

To My great country India, I bow, because She is a Yoga Bhūmi. And as Indians, you have a `special' advantage, because as I told you that Ashtavinayakas, all are here, all the Jyotirlingas are here, all the Ādi Shakti's Pīṭhas are here, all the three and a half Pīṭhas of the Kuṇḍalinī are in Maharashtra. All of you know all about it. But there is something more we have to get from the West and that is the great Saints that are born in the West. It is most surprising that they are `very' saintly and once they take to Sahaja Yoga, they really dedicate themselves and they think there is nothing more needed to be done.

This is what their life is. The way they have worked in Australia, I was amazed! There are five centers, they have started and every center, is doing so well, that it is amazing to see how these people, Warren got his realisation only two years back, can you believe it! And he took Sahaja Yoga to Australia and today you find `so many'. In a hall, I spoke, there, were four to six hundred

people. Not only that, but all of them who got realisation `settled down' in Sahaja Yoga. Absolutely settled.

So the same way one has to feel. Though you being Indians get realisation very fast, no doubt, much faster than them. You have much greater facility, because of your `puṇyas' [works of merit] you are born in this Puṇya Bhūmi. But still, one has to know that in Sahaja Yoga you `have' to work out in such a way that this Sahaja Yoga becomes a Mahā Yoga as predicted by Gñyāneśhwara.

I am sure with all your love and affection for each other, for Me, `and' for the whole humanity, in My lifetime I will be able to see that you have achieved that great state within yourself and without, that people would say that the Mahā Yoga has really been accomplished by Sahaja Yogis.

May God bless you.

Contents: 1983-03-30 **Birthday Pūjā, Birla Matushri Sabhagar, New Marine Lines, Churchgate, Mumbai, India**

[First Bhajan, `Bbhay kaya taya Prabhu Jyachare', was sung.] That was My father's favourite song.

Many people have always asked Me that why God created this Universe. Of course, we are not supposed to ask questions to God. It's easy to ask questions to Mātājī when She is giving a lecture. But God is a person who is beyond questions. And why He created Universe is something like why I wore all these ornaments. As I am not habituated of wearing ornaments, but I have to do it. I have to do it just to please you people, or we can say that God created this earth, just to please His own

children, just to make them happy, just to make them enter into the Kingdom of God, to give all that what He has got.

So He had to create this creation in such a way that He could create His own image, reflect it and make it enjoy itself. It's a very mutual appreciation, as we call it, andolan. Whatever He does for us, is for His own pleasures. But the beauty of it is that your pleasure is His pleasure. And the other way round is, His pleasure should be your pleasure, too.

Once that becomes the fact that the pleasure of God becomes your pleasure, you enter into that beautiful arena of heavenly joy, swargiya Ānand. Only if it is one-sided enterprise or one-sided effort, it gets lost. Human efforts are one-sided, but God's efforts are such that they cannot be enjoyed unless and until they are reflected by.

So whatever He has given us we cannot count them, we can only say they are blessings, because it's an abstract way of saying things. That is the blessing of God, that He has given all the blessings. It's an abstract thing, because we cannot count, we cannot give it a form, we cannot say what He has done for us.

And when this joy of His creation is felt in our heart, once we start enjoying that joy within ourselves, then it becomes a complete picture. When it is complete you cannot describe it, because it is not relative.

You can just enjoy it. And that is how the depth of enjoyment is described, that at that depth, what are we to say? We are lost. The drop has become the ocean and the ocean has become the drop.

First the ocean becomes the drop and then drop becomes the ocean. And then the ocean tries to become the drop. It's a beautiful system of give and take, which can only be appreciated by people who have tasted the nectar of the beauty of God's love. It's very easy to say there is no God. It's the easiest thing to say. But it is even easier to enjoy God than that. Is the easiest thing to enjoy Him because He is so available. He is so anxious. The whole purpose of creation is to give you joy, to give you happiness.

As today when I had to go to the bank, I was wondering, “I have never worn these ornaments anytime in life and today as the time has come and I have to wear." I just thought of it, “It's just for My children." If I have to wear them, what does it matter? Just to make them happy, what does it matter? If they feel happy, then My happiness is complete. But you felt for Me, that I should wear, itself shows that you wanted to see them on Me. Is also such esteem of your very subtle Bhakti , very subtle love for your Mother.

In these modern times, to have such bhaktas, itself is a big blessing for Me.

So as you say, “Mother, bless us” I say, “You also bless Me." You have already blessed Me by this beautiful arrangement you have made, the way you have put yourself, surrendered yourself for this great Pūjā. Because all is such an interdependent process. You do the Pūjā. I can't do the Pūjā. You have to do the Pūjā. When you do the Pūjā, the Chakras are awakened. Mine are awakened, but in you they are awakened.

Now how to explain to people what is the importance of Pūjā is. If you have not tasted the fruit of a Pūjā it is impossible to explain. It is at a higher level only one can understand all these things. But so far whatever was done was at such a lower level by such low type of people that everything became absolutely unholy. It was all unholy doing and because of that unholy doing God himself is unhappy.

So He has created this Universe to create realised Souls, not to create useless people, not to create people who do not believe in God, who do not believe in higher life, who do not believe in leading a life of purity. He never created this Universe for them. They are just existing, just like dead people. They are not living people.

So those who believe in God, those who worship Him with all purity, are actually, in a way, giving blessings to God because it is so pleasurable for Him to see that they have understood, that they have felt it, that they have liked it.

Sahaj Yogis also, some of them have problems, doesn't matter. But as long as the desire is pure, your Kuṇḍalinī is pure, as long as you feel you that you have to do your ascent in a proper way, in a surrendered way, everything is going to become a complete beautiful picture.

And to create this elevated Kingdom of God within our heart and without, one has to know that God's efforts are absolutely complete. He has made you.

Now only little less is there. It's from the other side. He has created this universe so beautifully and after creating that beautiful universe, that universe has to reflect God fully. That's all.

So the fifty percent job is done. Only other fifty percent job you have to do. You should not worry if there are people who are not interested in Sahaj Yog, those who are not going to do meditation, those who are not going to do Pūjā, those who do not enjoy this higher life. Just don't worry about them. But you must know that you are special people and that you have to create the nucleus, the complete body of that part, which is going to complete this work of great faith.

Today I am so enamoured that the speed of everything has come down to zero for Me now. Nothing is moving. There is no gati in Me now left, so enamoured and overwhelmed by your celebration, by your kindness, that I just don't know how to express Myself. All this is suggestive of such tremendous depth and gratitude in your hearts for something I have done nothing whatsoever. I have done nothing, because I have not achieved anything in life Myself. I was what I am. I will be the same. I have not done any tapasya or anything. I have not walked even an inch to achieve My goal. It's you who have prepared yourself, who have come closer and closer, just like a ready lamp, a Dīpak and got yourself ignited, enlightened yourself, because of your preparation. It's only your own doing, which has given this light everywhere.

You know very well that light cannot spread in vacuum. It cannot spread. If there is vacuum, light cannot spread. That's why without the Sahaj Yogis, I have no existence at all. I don't exist. My whole existence is here because of you. I have no meaning. I have no work. I don't do any work at all. I am the one who is the laziest and who

doesn't do any work whatsoever. It's only you who have achieved it.

It is you who have raised yourself. Actually, your birthdays must be celebrated, instead of Mine, because neither I am getting old nor young. I am just the same. There is no difference in anyway.

And I think it should be the birthday of Sahaj Yoga which should be celebrated today.

That we can say today, that it is about twelve years some months that Sahaj Yoga was started on a public basis, though I started it long time back, I don't know how many years back.

So, at this stage we have to understand that Pūjā is an abstract achievement which can only be experienced and all of you should sit with that feeling that we are going to achieve nothingness within us, egoless, egoless-ness, emptiness, cleansing, so that the light of love should flood all the areas within us. And that is only possible when, of course, the Chakras are to be awakened. That's going to work out and also that you should open out your hearts completely. Not to doubt anything, not to think about anything, but just open your hearts, just receive it, with complete faith and understanding.

You have people from all over the countries, so many countries. All the world is represented here. I feel that already we have touched every corner of the world. On this day only thing we have to declare that let Sahaja Yoga become a Mahā Yoga in its full way. That everybody in the whole world should recognize that Sahaj Yoga is the only way people can rise in their evolution and a new world can be created. And this kind of a development,

which is a collective development, which is not of outer world but of the inner world, which generate the roots of this creation into a new dimension, into a new personality, because by that time, the roots would have reached the source, source of this Divine Love, of this All-pervading Power of this Brahma Shakti.

Today I would request you, that you all should take a vow, that all of you will try to bring more people to Sahaj Yoga and try to save as many as possible through all your efforts. That's the only thing if you can give Me on My birthday I'll be very much thankful.

May God bless you all.

***Contents: 1983-05-04*, Public Program (Hindi), Sane Guruji Vidyālaya, Mumbai, India**

Man doesn't know that in all his desires he is only in search of God. If he is running after materialistic thing, still he is searching God in it [though it] may be [that] his method of doing so is wrong.

For example, if a person runs after money, he may get it but with that money bad habits come, children go on wrong habits, then the person thinks `why did I earn this?' When he goes from here [when he dies] he goes open handed but if he finds God in this birth he finds his Ātmā and then this search takes a beautiful form.

.....

***Contents: 1983-05-05* Sahasrāra Pūjā (Hindi), Sahasrār Ke Upar, Gorai Creek (30 kms NW of Mumbai), Maharashtra, India**

On behalf of all of you, I thank the Sahaja Yogi organizers of Bombay who have made these arrangements and on My own behalf also, I thank them a lot. This is a beautiful place they have chosen for us. It is also a gift of God that at this time the thing about which I was going to speak, sitting under the same trees, the talk of Sahasrāra is taking place. Fourteen years ago or we could say already thirteen years have passed and now the fourteenth year has started this great work of opening the Sahasrāra was accomplished in this world. I have told you about this many a times, on every Sahasrāra day, as to what had happened, how it was done and what is its importance.

But the fourteenth birthday is very important, because man lives at fourteen levels and the day he crosses over the fourteenth level, he becomes a complete Sahaja Yogi. Therefore, today Sahaja Yoga has also become Sahaja Yogi. Like this, God has created fourteen levels within us. If you simply count them, then you know that there are seven Chakras within us; besides these there are two more Chakras, about which you do not talk much. They are the Moon Chakra [Lalitā Chakra] and Sun Chakra [Śhrī Chakra].

Then there is the Haṁsa Chakra.

Thus there are three more: seven plus three make ten. Then there are four Chakras above the Sahasrāra.

And about these Chakras also, I have told you, Ardha Bindu, Bindu, Valaya and Pradakshinā. These are the four. After coming to Sahaja Yoga and after your Sahasrāra has opened, you have to pass through these four Chakras, Ardha-bindu, Bindu, Valaya and Pradakshinā. After passing through these four Chakras,

only, can you say that you have become a Sahaja Yogi. And if you see from another angle, we have to cross fourteen stages to reach up to Sahasrāra; if you divide them then there are seven Chakras situated on Iḍā Nāḍī and seven on Piñgalā Nāḍī.

When man makes his ascent, he does not do so in a straight direction. He comes first to the left then to the right, then again to the left and then again to the right. And when Kuṇḍalinī ascends, She also does so, dividing Herself into these two. The reason for it can be understood if I take the example of two ropes. These two ropes together, side by side, in the process of going up or coming down cross over twice.

[Shri Mataji explains the rising of Kuṇḍalinī along Iḍā and Piñgalā Nāḍīs; making four loops, two each in opposite directions, (clockwise and anticlockwise) at every Chakra.] ***198x-0000*** Original Drawing on the Raising of Kundalini published in Nirmalā Yoga, Issue 22 (Jul-Aug 1984), p.11 When Kuṇḍalinī ascends, you see on the Chakra whether the left is caught or the right is caught.

Although Kuṇḍalinī is only one, but on every Chakra you see both the things, thus you know whether left is caught or the right. Thus, within us, if each Chakra is divided into these two, left and right, then seven two's are fourteen.

So, within us, first of all, fourteen stages have to be crossed before reaching the Sahasrāra. And if you understand this, that these seven [main Chakras] and seven above [Sahasrāra], then in this way, also, a path of fourteen is created.

Therefore this number fourteen is very important in Kuṇḍalinī Shāstra [Science], very important. It's a very

important thing. We should fully understand that we become entitled to the blessings of Sahaja Yoga only after rising above these fourteen stages. We should unceasingly march forward and get completely dyed in it [in its colour]. Rājana, birajana, these words I have told you many a times before also; but today, specially, we should understand, on Sahasrāra day, what is rajana [to reign, to be the master] and what is birajana [to assume].

Now, you are sitting, you look at these trees. This is the tree of shrīphala. Nāriyal is called shrīphala.

Coconut is called shrīphala. Whether you have ever thought about it or not, I don't know, but it is a thing to be really thought about, `Why is it called shrīphala?' This grows along the sea coast and nowhere else.

The best fruit grows at the sea coast. The reason is this, that the sea is the Dharma. Wherever there is Dharma, only there, the shrīphala blossoms. Where there is no Dharma, shrīphala will not grow there.

But all things are contained in the sea. All sorts of cleanliness, dirt, everything is inside it. This seawater is also full of salt, it has salt in it. Christ had said that, “You are the salt of the earth” which means that you can enter into everything; you can impart taste to everything. Without salt man cannot live. The Prāṇa Shakti [Life force] that we take in, if we don't have salt within us, then even that Prāṇa Shakti cannot work. Salt is the catalyst. And this salt fully organizes for us to live, to live in this world, to live in the Prapañcha. Without salt man would be of no use.

But when this tree rises towards Param'ātmā then it leaves all the salt below. Everything is left behind.

And then the sunlight falls on these trees and with the falling of sunlight, the sap of its leaves and the sap of the whole tree is sucked upwards because evaporation takes place. Then this water flows upwards through the trunk. Leaving everything it crosses those fourteen things and on reaching the top, shrīphala is formed [the coconut fruit itself]. You are that same shrīphala. And it is essential to offer shrīphala to the Devī. Without the offering of shrīphala, the Pūjā is not considered accomplished (sampanna).

Also shrīphala is made up in a strange way. There is no fruit in the world like the shrīphala. No part of the tree goes to waste; each and every part of it is used, from its leaves down to everything is used.

And of the shrīphala [fruit] itself, each and every part is used. You can see that the shrīphala is also like a human being's Sahasrāra. Like the hair we have, the same way shīiphala also has hair. This [Sahasrāra] is the shrīphala. This has hair on the outside for protection. The protection from death is provided to us by the hair. Therefore hair has been given great respect; hair is a great and very powerful thing because they protect you. You are protected by them. And inside this, like we have cranial bones, that too you see, that inside the shrīphala there's a hard kind of a covering on the outside, like this. After that, inside us, grey matter and white matter, these two things are inside us. In the shrīphala also you see white matter and grey matter... and inside that is water, which

is like the cerebrospinal fluid inside us. Inside that also there is water, that is the limbic area.

So this sākṣhāt shrīphala, itself is if, for them [trees] this is the fruit, then for us, this [brain] is the fruit.

Our brain is the fruit of the whole of our evolution. Whatever has been our evolution to date that, from amoeba, today we have become humans: we have got all that as a result of this brain. From the brain, all this, whatever we have got, is through this brain. Within this are all kinds of powers; of all kinds. Within this is collected all the wealth that has been received by us.

Now, the Spirit resides inside this heart and after Sahaja Yoga its light spreads within us in seven layers from both the sides. That can happen only when one's Sahasrāra is open. Till now, we have been doing the same job with our brain. Before realisation, ego and superego, through these two, whatever work is to be done, that we do; nothing except this. Ego and superego or you can say Manas and ego. With the help of these two we do all our work. But after realisation, we work with the help of our Spirit. Spirit, before realisation resides within the heart, it's absolutely separate as a kshetragñya (witness). Its job, whatsoever it may be, just to witness, it keeps doing. But its light is not in our attention (Chitta). It is separate from us. It is not in our attention.

After realisation it comes into our attention first. First it comes into the attention. And attention, as you know, is in the Void. After that, its light comes into the Truth, because with the entering of light into our brain [as the brain gets enlightened] we know the Truth. `Know' doesn't mean that we know through the intellect, but

know in reality, sākṣhāt, that, this is the Truth. After that its light is seen in the heart. The heart becomes profound. The heart starts expanding, it starts becoming vast. Its power of love starts increasing. That's why it's called Sat-chit-ānand: Sat, Chitta and Ānand [Truth, attention and bliss]: the Truth within our brain, attention within our Dharma and joy within our Spirit. These start getting enlightened.

Its light spreads gradually at first, this you all know. Its light grows slowly and slowly. It's a subtle thing. It's very subtle at first because of the gross setup we live in. In that setup it becomes difficult to catch hold of that subtle but gradually that hold also develops. After that you start to grow, to progress.

With the opening of a single curtain of Sahasrāra, the Kuṇḍalinī comes up. But its light does not start spreading all around just then. The Kuṇḍalinī has just come up and you have saluted the seat of Sadāśhiva.

Within you the light of the Spirit has started flowing hazily but it has not yet fully blossomed in this brain.

Now the surprising thing is that if you want to spread it through your brain you cannot. Now a perfect balance of our brain and our heart will have to be shown.

You know well, that when you work too much with your intellect, heart failure occurs. And when you work too much with your heart, the brain fails. There exists a relationship between them, it already exists; it's a very deep relationship. And because of this deep relationship, when you get your realisation, their relationship has to become deeper. The relationship between the heart and this brain should be very deep.

The moment it gets completely integrated, your attention becomes completely Parameshwar swarūp [one with Divine]. This very thing is also said in Haṭha Yoga that mānas [superego] and ahaṁkāra [ego] both get dissolved [laya]. But just by telling like this nobody is going to understand. How can the dissolution of ego and superego be done? So they get after superego then they get after ego. If you beat down the ego, the superego comes up and if you beat down the superego, the ego comes up. They just cannot understand that: What is this madness? How will this go? How to win over the superego and the ego? There's only one door for that: Āgñyā Chakra. By working on the Āgñyā Chakra these two, ego and superego, get completely dissolved. And as soon as they get dissolved the heart and this brain first establish a complete concord. But the oneness doesn't come. It is this oneness that we have to achieve.

So your heart, that itself, becomes the Sahasrāra and your Sahasrāra, that itself, becomes the heart. What you think is in your heart and whatever is in your heart that alone is what you think. When your state becomes like this then any kind of doubts, any kind of disbelief, any kind of fear, no such thing remains. Like, when a person fears, what is done to him? He is taught through the brain: `Look here, there's nothing to fear. Look, you were afraid for a useless thing. Now take a light and see.' Then, although he understands through his brain, still he fears.

But when both the things become one, you try to understand this point, that, the brain through which you think, which makes your Manas, understands and takes

care of it. If that brain itself becomes your Manas this means, just imagine, that there's such an instrument which has an automatic accelerator and brake; and both are one. Whenever it wants, it becomes the brake and whenever it wants, it becomes the accelerator and what's more it knows everything.

When such a state comes you become the complete Master. Such a state we should definitely achieve.

Till now you people have progressed a lot; you have reached quite a high level. Definitely now it should be said of you that, now you have become shrīphala. But I always talk of what is ahead because, if this [coconut] tree is to be climbed then, have you seen how people climb it? If you ask a man to climb and watch him then you will see that he wraps a rope around himself and keeps hooking that rope higher on the tree. When that rope is hooked higher up then he climbs up with the help of that rope. In the same way, as we climb, our own rope has always to be kept hooked higher. And only when you learn this can your climbing be very quick. But mostly we keep hooking the rope lower. Even after coming to Sahaja Yoga we hook the rope lower and say that, “Mother, we have made no progress at all." Now, how possibly can there be any progress when you hook the rope in the opposite direction and make arrangements for coming down? While coming down you do not even need to hook the rope. You just loosen it a bit and, zoom, you will come down! That arrangement is already made for coming down. It is for climbing up that the arrangement has to be made.

So, to become something, hard work has to be put in. And to lose whatever has been achieved, no hard work is required, you can easily come straight down to the ground; there's no question about it.

If you understand this point then you will realise that you must always look upward. If you are standing at any step of a ladder but your gaze is fixed higher [you can climb]. Then if this person is higher than another person but he is looking downward, he will come down. This is why sometimes even very old Sahaja Yogis come down. People say that, “Mother, he was such an old Sahaja Yogi; was for so many years with you; did this, did that." But they were looking down so what can I do? If their gaze is downward they come down. You should always look upward.

Now even to see this fruit you have to look upward. Even their gaze is upwards. The gaze of all these trees is upward. Because they know that without keeping their gaze upwards, neither they can get the sun nor get this work done and nor can they become shrīphala.

Trees should be very well observed and understood. You can learn Sahaja Yoga very well from a tree.

These are very great Gurus for you. Like, when we look towards a tree, we should first observe how it settles its roots. First, it takes care of and fixes its roots. And to take care of and fix its roots what does it do? It keeps penetrating and going deep into the roots. This is our Dharma, this is our attention.

Within this it keeps going deep. And with that attention it sucks that All-pervading Power. This is an upside down tree. It's better to describe like this. These roots start

sucking the All-pervading Power and, after sucking this, after all what has it to do? Then its sight goes higher and this way that shrīphala is formed. Your Sahasrāra is also like this very shrīphala. It's extremely dear to Mother. And this very Sahasrāra should be surrendered to Her. Many people said to Me yesterday that, “Mother, we feel the cool vibrations in the hands; also in the feet, but not here [Sahasrāra]." Who presides there? Just know this and the coolness will come from here.

And the One, who is sitting there is the fruit of all things. The roots of this tree, fixed in the soil below, they are also born out of it. Its trunk, its hard work, its evolution, all this in the end becomes that fruit. Everything is inherent in that fruit. You put that fruit in the soil and again the whole of this thing will be born out. It is the meaning of everything. It is the ultimate of all.

In the whole world, whatever work of God has taken place until this day, whatever work He has done, its whole complete form, the form of its fruit is our Mahā Yoga of today! And who is its swāminī you know! So, at such an auspicious time you have come on this earth and received this.

So you should feel blessed and, becoming like this shrīphala, you should be surrendered in offering. The fruit is only removed from the tree when it is mature; otherwise it is useless. Before it is mature it cannot be offered to Mother.

Therefore develop maturity. Give up childishness. Till childishness remains you will keep sticking to the tree. But for offering, what is the use of the fruit which is sticking to the tree? Only when it is removed from the

tree and then offered is the Pūjā considered accomplished.

So, to help you understand Sahaja Yoga in a very great symbolic form sākṣhāt shrīphala itself is standing before you. It is indeed a great blessing that, here, today, all of us have gathered and in this great celebration all these trees have also given us company. They are also resounding (nadita) with all the things; they are also vibrating (spandita) and they are also listening and dancing to the same rhythm.

They also understand the special significance of the whole thing. In the same way you also have shrīphala in you. Fully mature it. There is only one way to mature it: that you must have concord with your heart.

The important thing is to become one with the heart. There is no difference between the heart and the brain. From the heart we desire and from the brain it is fulfilled. When both the things become one, only then will you be fully benefitted.

Now for common people Sahaja Yoga is a very secret thing. They are not going to understand because their daily life is of that level only. On that level they move. But your level is different. You must live at your own level. When you look towards others, mostly it is with compassion because: What are these poor people? What is going to happen to them? Where will they go? They don't understand. What is their state? On what path are they going to land up? Understanding this, you people should try to understand that, if, by explaining to them, they can understand Sahaja Yoga it's very good; try to help them understand. But if they do not bother, then

there's no use of breaking our heads before them. There is no use of breaking one's shrīphala. Keep it safely protected. Its job is much higher. You have got it for a very much higher purpose and keep it at that higher level and only on attaining that accomplished, wonderful, unique state can you consider yourself blessed. Therefore, there's no need to break our heads for meaningless things.

There's no need to argue with anyone. But your own state must be maintained and you must not come down. Until this happens, the full surrender, which was to be achieved within you, you have not achieved in Sahaja Yoga. Whatever was to be imbibed, that has not been achieved. Whatever growth was to occur, that has not been achieved. Whatever was to be your mastery and full growth, that hasn't been achieved and you got caught in a misconception. Therefore on no false premise should you think that, `I have become some great Sahaja Yogi' or anything. When you become very great, then you bow down and you keep bowing down automatically.

Look at these trees. The breeze is blowing in the opposite direction. Actually the trees should be bent towards this side [the land] when the breeze is flowing in this direction. But in which direction are the trees bowing down? Have you ever noticed that all the trees are facing that direction? Why? The breeze is coming from the sea and pushing them, even then, why are the trees bending towards the same side? And we don't know how much further they might have bent without this breeze! Because they know that the sea is the one who is the giver of everything. Being reverent and extremely

humble, they are bowing to it. And the one who is the giver, that is the Dharma, the Dharma which is inside us. When this gets fully awakened, starts fully manifesting, only then will the shrīphala inside us be so sweet, so beautiful and so nourishing. And then the world will get to know from your life itself what you are and not from anything else.

Now, fourteen times you have celebrated the birthday of this Sahasrāra and how many more years will you celebrate? But till this Sahasrāra day, whenever you celebrated this birthday, your Sahasrāra has also been opening and growing, along with it.

To accept any kind of compromise, to loosen hold of your Self, in any matter, does not behove a Sahaja Yogi. A person who is a Sahaja Yogi should bravely make his path and move forward. Any number of obstacles, the relatives, the family, this, that, all such ridiculous diversions, they have no meaning. These have been with you a thousand times. In this life you have to achieve something; and by your achieving it, if the others also get it, then they are blessed; it is their good fortune. If they don't get it will you pull them up by your hands? It is like this, that if you go to the sea and have huge stones attached to your feet and you request the sea, `Look, Sir, please swim me across.' The sea will reply, `First remove those stones tied to your feet, otherwise how can I carry you across?' To your feet you have tied these huge rocks. It is better to get rid of them and if you can't cut them off, then at least do this, keep yourself away from them. All these types of things that you have tied to your feet you must break them and rise higher. Tell them, `Go!

Whatever you want you do, but have nothing to do with us.' Because there are so many more such badhas and attaching these unnecessary badhas as well is of no use.

Look at the way these trees hold such a heavy fruit so high. How heavy is this fruit, it has water inside. It holds this fruit high. In the same way you have to hold your head high and while holding it high, remember that the head should be respectfully bowed towards the sea, the sea, which is the sign of Dharma. It has to be reverently and humbly bowed towards the Dharma. Many Sahaja Yogis do not understand at all that, unless and until we have fully settled in the Dharma, we just cannot be Sahaja Yogis.

They go on committing all kinds of mistakes. For example many people take tobacco, smoke cigarettes, drink liquor; keep doing all this; and then they say, “We have not progressed in Sahaja Yoga." Then how can that be? You yourself are after your own life.

There are some small rules in Sahaja Yoga; very simple and straight forward ones. You have been given the power to follow these. Bring them fully in your daily observances, in your behaviour. And the biggest thing that is expressed in the bowing of the trees is to be reverently, devotedly, humbly bowed and to make that love shine through from within. Everything that you have received from the Divine, while surrendering that love to the Divine, we should keep in mind that we have love towards everyone.

Finally, it should be said that the brain or the Sahasrāra in which there is no love, there I do not reside. Only the idea of love should occur in the mind. And what is to be

done to manifest and radiate this love? If you reflect deeply, you will know that I am saying the same thing that: how can we fill our hearts with love? We should only consider that: `Whatever I am doing, is it in love? Is this being done in love? All that I am doing, is it in love? Is everything, my talking and all my activities are being done in love?' You can even beat someone in love; there is no harm in that. If there is something false we can beat the person; there is no harm. But is it happening in love? The Devī killed so many Rākshasas out of love. Even they were loved. And so, in order that they may not further deteriorate from rākshas to mahārākshas and also because of the love for Her bhaktas, in order to save them, She killed the Rākshasas. In Her infinite power (anant Shakti) also, is the expression of love only. That which is benevolent (hitha) is love.

So are you expressing that sort of love is for their benevolence? This has to be understood. And if you are really doing that then you have accomplished and established that thing about which I have been speaking, namely that concord which should be achieved.

So that concord has been established within you. There is only one Shakti [Power] which we may call `love'. And it is only love that shapes all things to become beautiful, shapely and fully organized. That which is just dry thought has no meaning. And you know that dry thought comes only from ego.

And the second thing which comes from superego may well make it look beautiful from the outside but it is quite hollow inside. Therefore, one thing is dirty but dry, the other thing looks beautiful but is incapable of giving any

joy (nīras), is absolutely hollow. One is without joy and the other quite hollow.

The concord between these two is not possible to be attained in any way because they are in opposition to each other.

But after realisation and after coming to Sahaja Yoga, all contrariness is lost and the two things which appeared to be in opposition to each other seem to become as if they are two parts of one thing only. And this happening should take place within you. Only the day when this happening takes place within us, can we accept that we have fully celebrated the 14th birthday of our Sahasrāra.

May God bless you.

On this auspicious occasion: on My own behalf, on behalf of all the Devatās and on behalf of Param'ātmā, infinite blessings (anant ashirwad) to you all.

[Dusk was approaching and many Sahaja Yogis had left for the journey home when Śhrī Mother appeared, dressed in a simple white cotton sari with red designs. She walked sedately and solemnly towards the sea. Following Her were Sahaja Yogis carrying garlands and coconuts from the Pūjā which they gave to Grandfather Ocean.] [Śhrī Mother stopped some distance from the retreating tide. She bent down and began to create a Gaṇeśh in the sand and then ornamented it with flowers and kumkum. She moved a few paces forward and then stood quite still, with an intent expression and looked out to the sea and the sunset-reddened horizon. Great power and majesty emanated from Her. To some present it felt as though the Ādi Shakti was ushering out forever the

dying embers of Kali Yuga and invoking the ocean, Dharma, to assert itself.

The image of Śhrī Gaṇeśh lay in the sand, a symbol of the advent of the age of truth, innocence and wisdom.] [Shri Mataji called upon the sea to wash over us all. We chanted the mantra to `Samudra Devatā', the God of the Ocean, asking His blessings. Several Sahaja Yogis saw the wave coming inward to the shore and leaving steps in the sand as they retreated. Then the sea came rushing up to Śhrī Mother, flowed past every one present and encircled the Gaṇeśha. The Evening Star, Venus, the Devī's own sign, was seen high in the twilight sky directly opposite the Devī, Our Most Benefficent Mother. At this auspicious moment a basket of marigold was brought to Her. Spontaneously, many took turns to kneel in front of Śhrī Mother to wash and adorn Her Feet. At these moments yet more miracles occurred, for whenever a devotee touched Shri Mataji's Lotus Feet, Grandfather Ocean responded by sending wavelets to wash over them.] [The time of Our Blessed Mother's departure arrived. We, who had been so privileged and fortunate to witness this sea ceremony, wandered homewards down the lane lit only by starlight. A car drove by and a beloved voice called out:] Why are you walking? There's a truck waiting for you.

[Despite the fact all public transport had ceased at sunset. Our Great Mother, Mahā Mātā, ever nurturing Her children and caring for our welfare, had attended to the smallest and most mundane detail: our transportation home.]

Contents: 1983-05-00 **Newspaper Interview before the up-coming U.S.A.**

Tour with Stan Bostock published in Zireus on May 1983 The aim was to talk to Shri Mataji Nirmalā Devī about her forthcoming North American tour. What happened was something that is only now, a week later, starting to make sense.

I telephoned the number Shri Mataji's followers in New York had given me and found myself, an hour later, knocking on the carved door of a five storied terraced house in London's classy Knightsbridge district.

The door was opened by a young Indian who ushered me into a reception room as ornate and rich as a jewel box. Furniture covered with rose silk, tables inlaid with ivory, carved and gilded wooden screens, pale pink crystal chandeliers.

I heard Shri Mataji before I saw her. “How are you? How is America?" Then the lady appeared, short, plump, with long dark hair falling free and a smile that chips away all the defenses.

Tea was ordered and I was asked to sit down.

Before I could get the first question into gear Shri Mataji asked, “Do you know what the Chakras are?" I mumbled something about subtle energy centers along the spine. “That's right” she said and tapped the base of her neck with her index finger. “This one is called the Viśhuddhi. In the universe the Viśhuddhi is North America. Australia is the lowest Chakra, the Mūlādhāra. India is the Kuṇḍalinī which can link all the Chakras together” she traced a line from the base of the spine to the top of her head, “but America is the Viśhuddhi, isn't it? Such an important

Chakra." Shri Mataji then touched the red spot in her forehead. “This Chakra” she said, “is the Āgñyā. It is presided over by Lord Jesus Christ, isn't it? The Āgñyā is forgiveness. It shows that the spirit cannot be destroyed, just as Christ could not be destroyed, but rose again, didn't he?" Shri Mataji quietly contemplated the risen Christ for a moment, then jabbed her fingers towards the base of her neck again.

“The Viśhuddhi, its presiding deity, you could say, is Lord Kṛiṣhṇa. The Viśhuddhi stands for diplomacy and sweetness and self-esteem and communication and collectivity, like your Abraham Lincoln, he stood for collectivity. Abraham Lincoln was a saint, did you know that?, a realised Soul. You have had many great men. Roosevelt now, he said, `poverty anywhere is a threat to prosperity everywhere.' So clear he saw it.

So clear. America is so great. It is protected by Lord Kṛiṣhṇa's discus." Shri Mataji held up the index finger of her right hand and twirled it. And I swear I could see a bright glittering disc whirling round.

“As long as that discus is there” she said, “America can never be invaded." “Could that protection ever be withdrawn?" I asked.

Shri Mataji shrugged expressively and raised her eyebrows high. “Perhaps” she said. “If the land of diplomacy stopped being diplomatic, the land of communications communicated bad things, the land of sweetness turned bitter, then yes, perhaps Lord Kṛiṣhṇa might withdraw the protection." Suddenly she laughed.

“On my tour I shall tell everybody how to stop that from happening." I asked Shri Mataji if she was visiting North America just to sound such a warning.

“There are seekers of money, seekers after power, seekers of physical gratification” she replied, “and then there are people who have done all those things and are now seeking the truth, seeking their spirit, seeking God. There are many, many seekers of truth in America. Great, great seekers. Oh so great. I want to meet them. Show them how they can get what they have been looking for for probably ages. Lifetimes even. Their Self-realisation." “What is that exactly?" I hadn't yet asked one question from my carefully prepared list.

Tea arrived. Shri Mataji Nirmalā Devī, the spellbinding visionary, turned into Mrs. C.P. Srivastava, the attentive hostess. Did I have the right amount of sugar and milk? Would I have a biscuit? [It urned out to be a cookie.] “Self-realisation” said Shri Mataji, “is the Yoga, the union. The joining of the microcosm to the macrocosm, you could say. The raising of the energy in each of us, called Kuṇḍalinī. (There is no English word for it. You should invent one. There is a good job for you: invent a good English word for Kuṇḍalinī.) The linking of that energy with the all-pervading energy of God, that is what Self-realisation is." “What exactly does it do?" I felt a fool at the naivety of the question.

“It brings about a change in awareness. You feel it as a Cool Breeze, cool vibrations, you could say on the top of the head and on the hands. It is an actual happening! Not self-certification. Not saying `I am born again!' or `I am this or that!' You actually become! If you desire Self-

realisation and you get it, then you become collectively conscious, truly sweet and truly diplomatic. A true blue American, you could say." And the joyous laughter flowed into every corner of the room.

I asked Shri Mataji if she was the only one who could grant this Self-realisation. “Oh no” came the reply, “once you have it you can pass it on to others." “But it all seems to start from you” I said, “Why you?" Shri Mataji's face became serious. “As far as I know” she said, “I am the only one who can do it en masse. Once, in India, 6,000 villagers got it at the same time. But if there is someone else who can do it, then I am only too happy to retire. I am sixty years old." (At times she looks half that.) “I am happily married. I have a beautiful house as you can see. It would be good to settle down and stop all this travelling round all the time. But until I find someone else who can do it, then it is up to Me, isn't it, to meet the seekers and let them know how to gain this gift that is their own, their right, this Union with God." “Could I receive this gift?" I asked. Shri Mataji's eyes danced. “Put your hand above your head” she said.

I did as I was told. There was a faint, oh so faint coolness on my hand. I looked round to see if there could be a draft coming from anywhere, but there was no air conditioning and the windows were closed.

“You feel it?" I nodded, tentatively.

“That is the beginning. Perhaps while you were drinking your tea you said to yourself `I'd like that experience,' and..." Shri Mataji snapped her fingers, “... you got it. It can only happen if you desire it.

Give me your hand." She took my hand and started tracing a cross over the palm.

“You think too much” she said. “Your mind is busy, busy, busy, thinking away." From that moment on it wasn't. It was hardly thinking at all. “Too much thinking can give people diabetes. It is not sugar that causes diabetes, it's thinking. We can cure diabetes. After realisation. And this new thing AIDS.

After realisation we can cure that too. With realisation you become your own Guru. You can diagnose your own problems and those of others and you can cure them. Anybody with their realisation and the desire to develop their spirit, can cure and be cured." At this point a wave of most pleasant well-being swept over me. It wasn't a trance or a hypnotic state (I've experienced those), it was a feeling of deep peace.

I regretted my next question. It caused the smile to fade from Shri Mataji's face. “How much are you going to charge Americans for this experience?" “It is part of evolution” she replied. “It is a gift of love from God, who is the ocean of love, the ocean of compassion. How can you pay for that? God does not understand money. How can yo pay for your evolution? Did you pay to become human from amoeba? Did you pay to stand up on two legs? Anyway, why would I want money? I come from a wealthy family. My husband is Secretary General of the United Nations International Maritime Organization here in London.

I do not need money. I do not accept money." Shri Mataji let go of my hand and smiled.

“Better now?" she asked. I nodded. “That is because your brain is not so active. You are more balanced, more centered, more relaxed. Have some more tea?" I put my hand above my head again. The coolness was still there. Perhaps even stronger.

“There are so many great seekers in North America" she said. “I so want to meet them." Now, almost a week later, when I sit down quietly, that sense of peace and relaxed happiness returns.

I am hoping it won't go away.

Contents: 1983-05-12 **Talk to Sahaja Yogis, How to Talk to New People, Friends Meeting House, Hampstead, UK**

I bow to all the Sahaja Yogis and all the seekers of truth, may God bless you all. Is such a great thing to be back home with all of you and to see you here blooming with joy and happiness. That's the fate of a Mother who has so many children, that she goes from places to places leaving some children behind but looking forward to meeting others.

Somehow that compensates for the separation.

Today I think we should start on a very subtler ideas about Sahaja Yoga, because you people have understood it on the other plane of mechanism that works it out, the Kuṇḍalinī, the Chakras and all those things. But we have to see what is the problem that faces actually human beings and why we make such mistakes in our seeking. Is a very important thing to understand, because unless and until we understand why we really make mistakes or others make mistakes we can never forgive them and we

might have a kind of a high handed attitude towards others who are now coming to Sahaja Yoga, thinking that, why did they do like that and why did they commit this mistake and they could have done better. But I personally think that if you look at yourself you will know that you also committed mistakes. Everybody has committed mistakes.

Some have committed more mistakes and some have committed less. But what is the reason why human being has been committing mistake? That's what we should look into it. The first and foremost thing is without getting, [Aside:] Come along here you can sit there is a lot of space here, come along. Move out, move out you can sit in the center, come along, come along, come along not to feel shy there's lot of space in here. I think you'll have to have a bigger hall now Matha? Yes come along, come there's room here you can sit down here, come along.

So sweet of you. Thank you very much, so very kind of you thank you, thank you.

Please make yourself comfortable come along.

So how are you? Congratulations and God Bless. Are you all right there all of you? Now those who have got Realisation and those who have felt the Cool Breeze and have matured in Sahaja Yoga know that automatically you drop out many things, automatically. Now why do we do it, you see, why do we drop things? Even I don't ask you for it, you just drop them, why? The reason is the light of the Spirit within ourselves empowers us to see that this is wrong. Like as we have got eyes, once we have eyes we know whether we are going to fall here, or

we are going to slip, or what's going to happen. In the same way, when you get this vibratory awareness it is not an awareness only of the fingers, is the awareness of the whole being and you just drop out everything that is against your Spirit. I don't have to tell you. But without Self-realisation what happens that reality is just a myth. It's only a mental projection with which you live. You project your mind and you think this is reality. You can call anything as reality. Any hallucination can be a reality, any theory can be a reality, any absurd ideas could be a reality. I mean all religions have taken that form now, it's very sad. But all religions, which came from truth and from reality, are nothing but mental projections and they're very far away from reality. You can only feel, understand and assimilate reality if you are a Self-realised person. Unless and until this Self has expressed itself or manifested within yourself, the light has come into you, how are you to manage? Whatever you try is a mental projection. Like many people who came first, “Oh, we believe that we are born again." All right, now how can you challenge it, if you believe into something? “I believe" is the one of the great sentences we use. But what is that I that believes? That's that ego. That's not your Self, because you have not yet felt the Self.

So to feel the Self is the most important thing if you have to know the reality.

So you must excuse all others who have not felt the Self, who have their own mental projections. They might look like fanatic; they might look like stupid people. They may look like to be very high handed or maybe you might

think they are these ego orientated pseudointellectuals and all sorts of things. But all that is mythical because that plane on which they move is mythical itself. Whatever you know through your mental projection is imagination itself.

But Spirit is the reality and to know the reality you have to be the Spirit. And once the Spirit starts shining within you, you just drop everything like hot brick. Like I would say, as I've many times told you, that in our human awareness we know what is beauty is, we know what cleanliness is. For a dog he doesn't understand cleanliness. If you don't give him a bath he'll be quite happy, actually to give him a bath is a problem. But to a human being, you see, what is a sin or what is wrong? Sin is nothing but whatever is against the Spirit, is sin. Even fear is a sin. Any such small little sins or the big sins, all are nothing, but they are all against the Spirit. But if you have not felt the Spirit whatever you do will amount to something like anti-Spirit, because you don't know what you are doing. Now the prophets have tried their level best to tell you that you must keep your balance, you have to follow a certain religion as they call it, or as we call it Dharma within yourself. But that to for what? Why to have the balance within you? People will always say, “What's wrong?" “What's wrong if we are not in balance, what's there? What's wrong in drinking?" I never said don't drink before Realisation. After Realisation you yourself drop out.

But they say, “What's wrong, why does he tell us like this? Why should we listen to them?" Why the balance? The balance is needed for the ascent. Unless and until

you have a balance how will you ascend? Imagine an aeroplane without any balance. Say a wing is missing, will it be able to take off from the ground, cannot.

So for the ascent it is necessary to have the necessary balance.

So they said, “Keep in the balance." But even when we're just told simple thing to keep to the central path, to lead a life of balancing yourself or moderation in your life, in that also the moderation part of it they have made it an extreme.

Everything has been made into an extreme, because religion also they want to follow through their mental conception. That's why you find all these religions is a mess. But I would not blame them for that because they had no other instrument to go ahead and they wanted to go ahead. They had no other way to proceed further so they used only one engine they had was this mental projection. And they made all these various projections and that's how they are so diversified and separated from each other.

But as soon as your Spirit shines, then, everything drops out by itself because it is beyond mind. Spirit is beyond mind, I don't have to tell you anything that you must have balance, you develop a balance. If you don't have a balance you'll just get vibrations in one hand, other hand will be just cold or will be hot, so you start giving your balance. But I don't say that give a balance means following a particular religion or anything because if I say that half of you may run away. The beauty of Self-realisation lies in secretly working out within you, everything that is virtuous, that is beautiful, that is joyful,

secretly, it doesn't tell you. For example now supposing somebody has an imbalance on the right hand side. Very intellectual fellow and thinking for the future and futuristic man you see, forgetting all his past. Even there are people I've known they have forgotten their names and the names of their wives. But they are so futuristic. For such a person if you tell them don't think about the future, he can't do it because he's put his attention like this. The whole ego portion has gone that side and he's all looking forward to the future. But if you put him somehow or other, in a state where his Self-realisation takes place then immediately he will say, “Mother, my right hand is burning and there's nothing in the left hand." So you start talking on a very mundane way, not in a very subtle manner like all the philosophers talk.

All right that means your right is not getting proper vibrations, so you raise your left to the right? Now for an intellectual he can't understand, “What is this raising left to the right. I have read Bhagavad Gītā, I have read Bible, I've done Koran, I have done this, nowhere written left to the right. What do you mean by this kind of a nonsense, you see that you have to put your hand just left to the right and you get the balance?" I cannot appeal to a mind which has been thinking about God, religion, everything, all right.

So the secretive working of the Kuṇḍalinī is such, that She goes in that portion where you need help. She works it out and She raises you and gradually She transforms you.

But if it is not awakened, if it has not yet touched the Sahasrāra, means if it has not touched the feet of your Spirit, it may not be interested, it may not be interested.

So the first and foremost thing is to raise the Kuṇḍalinī and to let Her at least once know that She has touched the Spirit. Then She has interest, otherwise She hasn't got any interest. That's why you must have seen some people who come to Sahaja Yoga and just drop out. The reason is the Kuṇḍalinī Itself is not interested.

So the foremost duty of every Sahaja Yogi is, first of all, not to be angry or annoyed with people who have done lots of wrong. But be very kind to them and gentle because they are just seekers of truth. How can you be angry with them? Already we have lost so many of them because of their stupidity. But we must try to salvage as many as possible.

And then the second duty of every Sahaja Yogi is to slowly steadily to convince the person that he should become the Spirit. Of course you'll meet so many who will be self-appointed people they'll say, “Oh, I've already met the Spirit, I am the Spirit. I'm Christ." They can say anything, so soothe them down a little, bring them down and raise their Kuṇḍalinī, but don't leave it half way, must touch the Sahasrāra. I have seen some of the Sahaja Yogis, even in India I've seen, they just give up. They'll sit down, “Oh Mother forget it, we don't want to do it, it's like a mountain we can't raise it." But we have to work, that's what we have to do is to work it out. Raise the Kuṇḍalinī, pierce through the Sahasrāra and then Kuṇḍalinī will work it out.

It was a question asked to Me, “Mother that we gave Realisation to so many people, out of that only about thirty percent people are coming up the rest are lost." The reason is you have left it half done.

So this is one of the reasons why we have lost some people and there is no connection still established. Now those people who come to Sahaja Yoga you have to really work hard on them. Instead of arguing with them, because what will you argue is all mental projection. On what point are you going to argue with them because that is not going to give them the light of the Spirit.

So somehow or other work it out in such a way that they feel light of the Spirit, then talk. But we think that if we talk to them it will help.

It's not question of conviction, is the question of happening, is question of becoming, which is important.

Unless and until they become, what is the use of argument, there's no law court here. There is no debate going on, there is no election. There's nothing of the kind, it is something that has to happen to all those people that they should get their light of their Spirit. And once they get it, then it is very much easier for you to talk to them and tell them about it.

The philosophy of Sahaja Yoga is extremely simple. Is the simplest of all philosophy you can think of.

Is a very simple philosophy, is that, once you get your Realisation you start feeling for the first time, the All-pervading Power and forget everything else. Once you get that feeling of the All-pervading Power only you have know how to manoeuvre it, how to work it out and how to use it for your own growth. It is made easy, it has to be

as it is the most vital force that has to take place in the realm of spirituality.

Now thank God, many Gurus are exposed. Thank God many myths that were working out are being now blasted. When I was telling you people about the promiscuousness and all those things, that this will never lead you to God but to hell, I remember when people criticised Me to be Victorian. I mean people have ideas, which is a very Victorian ideas and also saying that Mother is very matronly and all sorts of English language you see, that they could use about Me. But now you see, what have recently I've told, thank God there have been a film showing the diseases we get by promiscuous life. The right sane attitude towards life definitely helps you very much. But thank God, the grace of God is so great that once you get Realisation you become such a different person that everything drops out. You are really a transformed personality and so that one should know whatever was the past is finished now, is no more there. The egg is finished, is the bird. And whom to blame, whom to talk about is the bird there, now let the bird find its own wings and fly. Once you understand this simple thing of Sahaja Yoga is that we have to make every one feel the All-pervading Power of God, to begin with. Unless and until they have felt it we have not to accept them as realised Souls. They have to feel it.

Now of course as you know if the Viśhuddhi Chakra is not all right they may not feel it in the hands.

But still no use if you tell them that according to us you are a realised Soul but according to you, you are not feeling. You see because the mind is working. Instead of

feeling a little disturbed about it, upset about it, they may just think that, you see, it's just a make believe or a psychological stuff and I didn't feel it, I'm a person of great will power, that attitude, yes, many feel like that.

So they can be lost. For now as our Sahaja Yoga is increasing everywhere in the world, we have so many good Sahaja Yogis in England now. They are sensible people and uniquely placed in this great country. And they have to understand that wisdom is higher than intellect and discretion is higher than debating. Take a very kindly and a compassionate attitude towards the rest of the people and then work it out that they should somehow or other, feel this subtle force of God's love. Then gradually try to bring them round and teach them what you've got. Is easy to blame their ego, it's very easy, to say, “Oh, they're ego orientated, throw them away” very easy to say that. But that's not their mistake. That's not their doing. It was because they never felt the Spirit before. Whatever they have they have used that instrument whether ego or super ego and they have built up their own self, in that kind of a fort. But this barrier can be broken very easily as soon as they get their Realisation.

I found the same thing in Australia. When I went there so many came back, so many. And now we have everywhere quite a lot of people. In every ashram now we have coming at least thousand to two thousand people. We have five centers now and it's working out very well. Same thing is in England, we can work it out. But I told them the same thing that reality is a different thing and a mental projection is a different thing. You still

do not talk on that level to these people. Because you just increase their mental projection and their barriers within them and this has helped them a lot. And you'll be amazed that those people who were lost have come back to Sahaja Yoga and are growing very fast within themselves.

Now for the new people I have to tell, you have to have patience with yourself. You have to have patience. As I have patience for you, I have love for you, I am here only because of you. You also must have patience for yourself and full confidence in yourself that you'll become the Spirit. If you have these two things, I'm sure it will work out. It is going to work out. Once you get your Realisation you have to work out on other people and gradually you will be amazed that it will grow and it will convince you and you will know that you have become the realised Soul. But the realised Souls are very simple people.

If they say, “I am a realised Soul” nobody can believe them because there are no horns around them. No Gurudom around them, nothing of the kind, they're extremely simple people.

So what is going to help you is a simple attitude toward yourself and toward these Sahaja Yogis and towards Sahaja Yoga that you have come here to become the Spirit. We have to gain nothing from you. There's no clientele as such, there's no money proposition, nothing. It is you who have come to the Ganges, to take the holy water, it is you who has to take it. We are here to help you. If that attitude is developed I'm sure, with your cooperation, we can change the face of this world. And as William Blake has said in this Hampstead, “We have to

build up Jerusalem here." May God bless you all. Any questions you have you ask? [Aside:] This is not a loud speaker. I think I better present you with a loud speaker. What happened, you presented one to India why don't you get one. Further conversation about the speaker.

Any questions to request Me?

Seeker: How can one who is new this subject distinguish between what is psychic phenomena and what is actually the manifestation of the Spirit itself? *[UNCLEAR]*.

Shri Mataji: is good idea. May God bless you.

You see when they say they have felt the Cool Breeze the psychic people they are telling lies, simple as that. Because the Cool Breeze of the Holy Ghost, that you feel, has not only the Cool Breeze it has its own powers. For example, now I say there is a flame here, all right. Now if there is a blind man also if he puts his finger round there he will know it's a flame isn't it, because he can feel the heat. In the same way this Cool Breeze is just to feel this Cool Breeze but is a dynamic stuff. You can, when you get this Cool Breeze established within yourself, you'll be amazed that under your hand the Kuṇḍalinī will pulsate, it will rise and you will feel the Cool Breeze of another person. With this Cool Breeze you can cure diseases like cancer and many other. With this Cool Breeze you can give balances to people. Everything you can do with this Cool Breeze, is tremendous. If you have any, say question, any question, supposing you are a realised Soul, you want to know about a Guru if he is real or not. If it's a psychic thing you won't get anything. You won't know why psychic people are all going to parapsychology, is all wrong, it's a horrible stuff. This

parapsychology is one of the worst things that can happen to a human being, but they don't know what it is. There's nothing absolute about it. But the Cool Breeze is the one that gives you complete absolute idea. Like you want to know is there God? Ask a simple question like that, `Mother is there God?' You'll get a Cool Breeze. Now it's so, discrimination is so great and so precise that supposing you want to know about a Guru how he is, supposing he's a devil then you might get even blisters on your hand. You might even get tremendous heat in your hand and vibrations will stop completely.

But supposing he's half way then you may not get such bad effects but there won't be any breeze at all. But supposing he's a realised Soul, for William Blake for example, I don't have to ask I know, but unless and until you really feel that Cool Breeze in your hand in a real way, also it's coming out of your head then you should not believe that you have got a Realisation, you should not believe into it. Now they are many psychic cases I know who told Me, “We have always felt the Cool Breeze” because they cannot accept it, just say and their Kuṇḍalinī just frozen there. Nothing of the kind, I'm getting terrible heat and just praying if this person goes away for a while will be good rest for Me. And he says, “No, no but I have felt the Cool Breeze." All the time he's telling Me lies. “I have always felt the Cool Breeze everywhere." But the Kuṇḍalinī is down below you can feel it yourself, you can see for yourself. If the Kuṇḍalinī is not here how are you feeling the Cool Breeze? You cannot. Is a phenomena as a result of something it's not just a phenomena of the Cool Breeze. But when the

Kuṇḍalinī rises above the Sahasrāra then only you can feel the Cool Breeze. I've seen many people like that. They don't want to accept, oh that I've got all this.

But supposing there are people who are born realised. There are people, some people who feel the Cool Breeze. Now you have to differentiate between them and the unreal people. There can be some people who are born realised. But nowadays we have decided not to tell them that they are born realised because, those who came to us we told them they're born realised, their ego suddenly inflated like this. You see absolutely gone cases and we lost them. Because you see, if you are a born realised it's nothing great, nothing great, because so many are realised. Supposing you get Realisation today all right, so you'll be a realised Soul, but you're not a Sahaja Yogi. Sahaja Yogi is a person who not only is a realised Soul but he knows all the technique of this Pure Knowledge. He knows all the laws of the Divine happening and also he knows how to handle the Kuṇḍalinī. Sahaja Yogi is a knowledgeable person the one who knows all about it. Who knows all the permutations and combinations, who knows how to manoeuvre it and everything about it.

So he's you can say a boy who enters into the first class. He just knows one plus one is two. But say a professor of mathematics, there's a big difference between the two.

So even if somebody's a born realised it's better not to tell him that you are born realised because he suddenly thinks he has become a professor. Imagine a little boy thinking that he's become a professor. It is very detrimental to him as well as to others.

So best thing is to get the Cool Breeze in the right sense, in the right way and understand that it works, it must work. As you see how do you make out a real note and an unreal note? The real note it works.

So it's not a myth it's a reality, again I say it's a reality. Supposing this is an artificial thing it won't work. Anything that is artificial doesn't work, all right? You go to this Madame Tussaud's place and you'll find so many people sitting looking exactly like us you see, but they are not living, all right, you understand My point? So you have to master it, know it fully. You have to master it and understand it. You see unless and until you understand it to that extent, you cannot reach any conclusion, all right and we have to work it out. May God bless you.

Is not only thing that is Cool Breeze, where is your Kuṇḍalinī, whether it has risen or not, if the Cool Breeze is coming out of the head. Only a Sahaja Yogi can say, nobody can say that. I've seen many people who get even the Cool Breeze coming out of their head they cannot feel it because their hands are not sensitive. Only a Sahaja Yogi can say, is true. But that doesn't mean that a Sahaja Yogi is something out of the blue, is just like you. Only thing is he has grown into a new awareness, which you are going to grow yourself.

[To seeker:] *[UNCLEAR]*.

In Sahaja Yoga there are so many ways and methods how we work out all the help from all the elements, how we work it. For example, this gentleman say for example, I find his left side is overloaded. You can ask the Mother Earth to take away the problem. Just put left hand towards Me and right hand on the Mother Earth, you can

get cured, you will feel better. Feeling better now? Just wait, have patience. It will work.

Any other question? You must see that the person is transformed. They may say anything the person must be transformed.

He must become a saint. And the saint is not a person who calls himself a saint, but a saintly person is that one who drops out all nonsensical things, automatically. Nothing sticks to it. As they say, “The lotus leaf you see, if you put water on the lotus leaf the water drops out, nothing sticks to it." I think in England at least seventy percent or maybe say sixty percent people have been drug addicts, Sahaja Yogis, you can't believe they were. If not addicts they were something like that. I used to call them druggists and chemists, but they're different today. Any other question please? Question: Is the artificial raising of the Kuṇḍalinī dangerous?

Shri Mataji: Yes first. You see the trouble is, those who have written about it have no authority. I have said about it many a times. Like say a villager comes to the city and puts his hand in the plug you see and gets a shock and says electricity is very dangerous, all right, is like that. But Kuṇḍalinī is your Mother. You have only one Mother and She has only one son. It's your individual Mother. You don't share it even with your brother or sister. She's your Mother. She doesn't trouble you at all. She's your the greatest well wisher who's born again and again with you waiting for this time, there's no question. But those who are unauthorized harm the Kuṇḍalinīs of thousands of people. People have seen that. Because you see that's My nature perhaps that I can do it. But then people feel

very hurt you know they can't understand why should Mother do it. I said, “You better do it. It's good I should retire, I'm sixty years of age is better for Me to retire, you should do it." But if you are doing so many things, you know I don't know how to drive, I don't know many things that you do. I know one thing, how to raise Kuṇḍalinī.

So if something is difficult and is done easily means that person is a master of that. And if that person is a master doesn't matter there are masters of everything, all right.

So far I haven't seen anybody suffering because of Kuṇḍalinī and should not. But it's not an easy thing for many people because I met some saints this time and they said, “It's only You who can do it Mother we can't." There's a fellow called Gagan Gadh Mahārāja, a very old man and he lives in a forest on top of a hill and he's come to Me also. And he has many disciples and one of them he told him to do this and do that you see, the balancing part of it and he did all those things for fourteen years. And suddenly in a program in Kolhapur he just came to see Me and got his Realisation. He was shocked that, “Fourteen years I've been doing all this and I never got it and how is it in a short time I got it?" So he went to see Gagan Gadh Mahārāja so he told him about Me. He said, “She's different." So that's how it is and I feel rather embarrassed to talk about it, all right? May God bless you.

Question: How do you relate Your experiences or what You are talking to us about with traditional yogic practices?

Shri Mataji: Very much so. Very much, it is the most traditional thing, you see. Because the yogic practices

you do here is some sort of a, I don't know what to call it, but it's like just a wee bit of it you've have taken are doing that, that's not yogic practice at all. You see Patanjali Yoga, which was practiced thousands of years back, when people led a different type of life. When the children went to school with the Gurus, who was a realised Soul. Nobody who was not a realised Soul was called a Guru. And the children had to lead a very celibate life because according to your university, you see, you're called as your Gotras.

And you could not believe it today, say My Gotra is Shandilya. Shandilya was the muni of My family. I can't marry a man from the same Gotra even today. Thousands of years have passed since then, Shandilya lived about forty, fifty thousand years back, but even today I can't marry a man who belongs to the same Gotra.

So the celibacy you can imagine, that from one university you could not marry. That's how they lived a life and then they went, after five years of age, they went to those schools, they lived there and they came out of that in complete celibate living they were. And then they got married and then when they had children they sent them back, like that the system was. But if you read Patanjali Yoga the first thing that Patanjali Yoga said that, “Īshwara Pranidhana” means the establishment of God. First you must establish the Spirit. It's like we have not yet started the car for example, all right, it's very logical.

Now I'm coming to Hampstead, I don't know the way, supposing and I don't know which way to go. Now supposing I say that all right now I have to go to

Hampstead, from the very beginning I'll turn to the left and not to the right, can I do it, no? So when the Kuṇḍalinī rises then only you will know which Chakra is catching what is your problem.

Beforehand supposing you are doing any, at random, any exercises. Say example, the way people are doing these days Yoga, so-called, it has nothing to do with Yoga. You see these exercises when you do, you are not aware as to what are your problems. You don't know what you are suffering from and what particular asana is needed for a particular type of a Chakra, which is blocked, all right.

So what you're doing is indiscriminate, taking medicines without understanding. But the practice of these things are a very minimum part of the whole of Patanjali. First is Īshwara Pranidhana means when you establish the Spirit. Īshwara Pranidhana means the establishment of the God. Once you have established that, then the Kuṇḍalinī starts moving and then you know where to stop, where to turn, how to do. This is real tradition, but the last fifty years, you see, all sorts of nonsensical people have come up. They've changed this, changed that and is logical, is logical you see. Supposing you are suffering from Āgñyā Chakra all right and you are doing the exercise of this Chakra you will spoil this as well as spoil this. There's no logic, there's no understanding, nothing. You see this is just physical exercises because people want to become actors and actresses I think.

Seeker: [Mentions the eight limbs of Yoga the whole astanga going through the niyama and the asanas, Prāṇāyāma, pratyahara to try to work toward Samādhi.]

Shri Mataji: All those things you see, no, no it does not, it does not, it does not. That's the other way round you see, this is the problem. You see what happens that, unless and until you get your Realisation you have no entry into yourself you don't know where you are going. This will never work out. On the contrary, all those who have done Haṭha Yoga catch on their heart center very much, because the whole attention is on the body. Because the attention is on the body the left Heart catches. Just now I have been to one organization where I met three of them.

They all had their left side absolutely frozen, so they said, “Mother what should we do?" I said, “You must sing the praise of God. Forget, you have become so dry like a bamboo now, fill it up with the love of God." Forget it all your asanas and everything, just like, you see, dried fishes. There's no emotions left. It's such an imbalance, ha and tha both the things, they've not said only ha, ha is the Sūrya Nāḍī they said ha and tha. What are you doing about tha, nothing? So you are doing ha Yoga, all right. You have to do Haṭha Yoga but, without Īshwara Pranidhana, without Realisation we also do, not that we don't do, whatever is needed that we do. For example, now when I went there I told them what should be given to a person who is suffering from mental diseases. He said, “All this for mental diseases, also all these for egoistical people, also all these for liver patients, also all these for, I mean it's horrible." I said, “How can that be, on the contrary to a mental patient if you make him bend forward he'll suffer more, he must bend backwards. A person who is ego-oriented should bend forward." They

changed of course, I mean they're sensible people as well as I'm concerned, they believe in Me, they think in India of course I'm accepted as some sort of a, something like that. But you see these are little, little things they don't know.

Supposing a person is ego-oriented, right-sided person as we call it. Right-sided person if he tries to bend backwards he'll become even worse. And a person who is a superego person, suffering from mental troubles and all that has to, not to bend forward at all, he has to bend backwards. Because they're two types of people, there are actually three types as you know. The people who are, I mean, in vulgar language we can call it masochist and sadist but they are extreme cases, but I'm saying that style. We call them Tamo Guṇis and Rajo Guṇis.

So the Rajo Guṇis the sadists, if they become more like this, God save the world, see the point? And the emotions are drained out of such people, there no feelings left, no emotions, nothing, zero.

I met one dentist who came and he said, “Mother now I have become a Sthita-pragñya." I said, “How?" “I have no feelings. Nothing happens to me. You see my child is sick I'm not bothered." What a nice man you are. “I have no feelings. My mother calls me I have no feelings. I am living somewhere alone." I said, “All right." I said, “Is that the way the saints have lived? They have been worried not only about their people but about everyone." There's no love. There's no love in the modern Yoga, no love. Is only the love of God, can be only felt through Spirit. You have to have a balance. Is very one sided, extremely one

sided. One side is those who are singing the devotional songs and the other side are *[UNCLEAR]*.

Both are equally mad I tell you. Both can be equally mad. Come to the balance, again you have to come to the balance, otherwise you cannot enjoy Sahaja Yoga. Sahaja Yoga is an enjoyment, enjoyment of your balance, of the beauty of God's love and the truth of His work. Everything has to be enjoyed, all right.

You just work it out.

Have you done Yoga very much?

Seeker: Sorry?

Shri Mataji: Have you done lot of Yoga?

Seeker: Reasonable. I do follow the Buddhist practice which is based upon...

Shri Mataji: Now Buddhist also! Now I'll tell you about Buddhism, all right? What are Buddhists doing? Is true about everyone Christians, Hindus, everybody. Just because you asked about Buddhist I must tell you. Where is Buddha placed within us do they know? Where is Buddha? Buddha is placed within us at a point...

Seeker: Well, yes...

Shri Mataji: And what does He control within us? We have to know this knowledge of the roots.

Unless and until you know the knowledge of the roots how will you know about the tree? You cannot treat the tree on its leaves or branches you have to go to the roots. And first you find out the roots within.

Buddhism is so superficial now, that I Myself amazed and Buddha must be thinking, oh God from where it has come. He says “Buddham sharanam gacchāmi." What is

Buddha? Is an enlightened soul? Buddham means the one who is enlightened. “Saṅgham sharanam gacchāmi" means to the collective being. Saṅgham means the collective being. “Dhamam sharanam gacchāmi." Dhamam is the balance within you. How many Buddhists know about it? They don't know even where Buddha is sitting on their heads. And what I find most of the Buddhists that their center of Buddha is finished. Buddha has disappeared from them once for all.

He controls our ego and he's settled down here on the head on the left hand side. We can prove it on Kuṇḍalinī. Supposing somebody is following Buddha immediately people will know that you are a Buddhist because there's a catch here. And then some methods are there to awaken Him, if you awaken Him your Kuṇḍalinī will rise otherwise it won't, all right? So you must know the knowledge of the roots.

We should not just depend on Buddhism or any `ism'. That's what I'm saying.

Seeker: Yes, it's just the thing You said in the beginning, I mean I agree...

Shri Mataji: Yes, you see we have to have the complete integrated knowledge of the roots, which nourishes, isn't it?

Seeker: Are you advocating a system or a practice to get closer to these roots?

Shri Mataji: No, no, no, no there is no system about this. There is no system no practice, no courses.

Actually it is spontaneous. I'm talking of your evolution. Your evolution comes through a living force of the living

God. You cannot have a course in that, can you have? How do you sprout a seed? You have to just put it in the Mother Earth it sprouts by itself, is built in. In the same way within you it's built in and it sprouts, that's all. There's no course. Maybe you may not get it today you'll get it tomorrow, some seeds sprout faster.

Seeker: I see the Buddhist tradition as growing out of a yogic insight.

Shri Mataji: No, no, no, you are sadly mistaken about Buddhism. The trouble is with the Western people they're so fed up with Christianity that they think Buddhism is going to solve the problem. They are just like any other Christian church, take it from Me. All these lamas should be hanged by the nearest tree, I tell you. Horrible people they are, horrible. You should see their vibrations. You know this Dalai Lama when they're sitting next to Me, I was invited to the Prime Minister's place, I just couldn't bear him. And the Prime Minister Lal Bahadur Shastri himself was a realised Soul and he could feel it and he said, “Is he very hot?" I said, “Yes." Is in Hindi he said, “He's an extremely hot fellow." He said, “All right, you get on the other side” he made the foreign minister sit here.

You won't understand, just now you don't understand. Even a little child who is a realised Soul will understand, but you won't because you're not yet realised, this is the point. The difference is you are mentally understanding. I have a grand-daughter she was hardly five years of age when My daughter and the son-in-law went to Ladakh, it's an interesting story. And there was a lama sitting you see like this and everybody was touching his feet. This

little child was a realised Soul, she couldn't bear it any more, when the father went and touched his foot she just stood back and she said, “What do you mean by shaving your head and wearing this big stuff you think you are a realised Soul? Why are you making everybody touch your feet?" Just she stood up. And My son-in-law felt quite embarrassed and he told that he's not even a realised Soul why do you touch his feet. You won't understand, even a little child will understand, you won't understand. Realised soul is a person who can feel it.

This is what Buddha has said, that's the traditional thing, he has said, “First of all seek yourself." Buddha didn't talk about God. Why, because he thought if you talk about God again another religion will start. He just said first of all, as I say, “First of all seek yourself, get your Self-realisation. Nothing else but get your Realisation." All right that's it.

So better have it, better have it. You see you have Buddhism there's nothing like `ism' about Buddha these people are mental. To have it means to get Realisation.

What tradition are they following, carrying that ring like this, like that, mad kip people, horrible. Is that what Buddha did? He sought His Realisation. He didn't do all these nonsensical things these lamas.

And they even beat people and do all kinds of things, horrible cruel people. Thank God there out of that Lhasa. You should see the Tibetans now they're sitting on our heads like parasites in India and we had a parliament question on them. You see they look very attractive because you are fed up with your Christianity, that's what. Don't believe in all these please whether they're

Hindus, Christians or Muslim, all are just the same. There's no difference. You become the realised Soul first of all. You have to be the Buddha, all right, that's what I am saying as a Mother.

And then they started another one Shambhala business you see. This is another new thing. Taking everybody to Gobi Desert to get Samādhi. Walk in that Gobi Desert even one mile you'll get a Samādhi permanently. [Laughter.] You can't even get a glass of water there to drink, My child. What things they are preaching, you don't know, all nonsense. In Spain some Spanish people have started this nonsense.

They are recruiting people to go to Gobi Desert. I mean what is going to happen to them? Think of the Gobi Desert, is one of the worst deserts of the world. Can you imagine going to a desert, how will you reach God? You have to seek Him within yourself. He's within, all right? Question: Mother please tell us about the dangers of misusing mantras by religious sects.

Shri Mataji: Mantras, all right, dangers of mantras? You see mantra is a thing by which you awaken the Deity within you. The Deity, which is on this Chakra. Now here the Chakras and we have deities. On these we have to awaken the Deities.

So, a person who is awakened himself can only tell you what mantra to be said, isn't it, a simple thing as that? The one who has no eyes, what can he tell to another blind person? So first an enlightened soul, who knows about Chakras can only tell you what Chakras are catching within you. But the Kuṇḍalinī should solve. Supposing you are just now caught in your Nābhī Chakra

and I tell you that you say the mantra. Not that you, but the realised Soul should say the mantra and awaken that. Maybe the Kuṇḍalinī has gone there, so from there you have to come here. You have to see the movement of the Kuṇḍalinī. Like a car is going now, very simple, the car is going so we come to a toll gate, all right. There we have to pay the toll. But where the car is going and then there is a toll gate you pay there to a particular toll gate, isn't it? Like when you are going you see, [Aside:] I've given up tea. I have, just given up. Just take it. Sixty years I thought I have drunk too much of tea. But that doesn't mean you should give up. [Laughter.] So you see the thing is the movement of the Kuṇḍalinī will only tell you which Chakra is catching, all right, otherwise you will not know. Unless until you move the car, before that, how will you know where the car is going to get the toll. Can you pay it before the car starts? So what happens, if they give you a mantra mostly people don't know what they're doing. You see it is a big enterprise. Giving mantras is a very big enterprise. Like they have given mantras, which I was amazed to hear, if you tell some Indians, they'll be laughing at you. What they say is a great secret and the mantras they gave was, one was I heard, was `tinga' means like this you show to someone you see this is `tinga', in Hindi language. There is nothing like `ing' in Sanskrit Language. Another mantra I heard was `inga'. `Inga' means the tail of the, the sting of a scorpion, can you imagine that could be it. And then, where is the director of the flying squad, is he there? He's hiding there at the back. Now what is the mantra for they gave you

for flying? What tubes? Who is there? Come along where is he?

Sahaja Yogi: Bronchial tubes, Mother.

Shri Mataji: Bronchial tubes. Bronchial tubes, bronchial tubes, they paid six thousand pounds for getting that mantra for you. [Laughter.] Just imagine this bronchial tube is one of them. Then they'll give a mantra of Rāma. Take a more sensible thing, they might give a mantra of Rāma. But Rāma where does He exist? Supposing I want to give a mantra of Buddha, for example. Where is Buddha? Are you catching on Buddha or not, is the main point. Where are you catching? Where is Rāma? Rāma resides in what part? Is it necessary to give this mantra or not? They don't know anything, no knowledge of any kind just at random. At the age of six years to twenty years give the mantra what is it, `pinga' then another one `tinga', another `ringa', according to the age, not according to the Kundalin where it is. Now what is the danger of that, that's the main point is. That supposing they give you a name of Rāma, they are not awakened people they are not connected with God, they are not authorized. Now you go on saying Rāma, Rāma, Rāma, Rāma, Rāma, Rāma, Rāma, Rāma, Rāma like that, you see. The other way round you say mara, mara means I'm dead, I'm dead I'm dead.

So you go on saying a mantra Rāma, Rāma, Rāma, now what happens that you are not connected with Rāma at all, because you are not a realised Soul, neither the Guru, the one who has taken three thousand pounds for giving you this Rāma mantra, is a realised Soul.

So when you are shouting like that Rāma, Rāma, Rāma, who will come to your help will be somebody dead as Mister Rāma somewhere. He will come to your help and he'll possess you. With that you may start thinking because you get an added personality and suddenly you feel you see you get more powers so-called.

Like Gauguin if you go on saying Gauguin, Gauguin, Gauguin he might enter into you. You might start painting something and after that finished you have no energy left because one horse is riding two men. But the worse thing that happens to you by saying mantra is that you develop a terrible dent in this very important center called Viśhuddhi, specially the left Viśhuddhi. And then they are frightened. If you ask them, “What is your mantra?" “Mother I won't tell you." “Why?" “No that is not to be told." All secrets in God's vision, in God's realm there should be no secret at all, everything should be known, everybody should know what is what. Why should there be any secrets, I can't understand. For example everybody will know those who are realised Souls, where you are catching, what is your Chakra, they'll tell you. Everybody will say the same. Like one day one gentleman came he said, “Why are they all coming and asking me `How is your father?' " I said, “Because your Rāma's Chakra is catching." That's exactly the mantra you will take.

So your Chakra is caught, that is the one that the name they give you because you're insulting the deity and this Viśhuddhi Chakra, by which you say also is caught up and from there it goes as guilt to the left. If you should try to correct a person it acts as a guilt and he gets a

problem on the left hand side Viśhuddhi which is a very, very big problem.

Seeker: Japanese religious sect gives Buddhist mantra called Nam-myoho-renge-kyo.

Shri Mataji: Nam-myoho-renge-kyo, I know. You see Nam-myoho-renge-kyo is a great thing, but not by these Japanese people. Japanese less said the better. I met the person called, his name I have forgotten.

He was the head of the Zen system. Now see Zen is Sahaja Yoga. To be realised is to be Zen. But this fellow had a frozen Kuṇḍalinī just like that there just sitting settled down.

So I told him, “Sir with very humble understanding I would like to say, that are you really a Zen?" He said, “I'm teaching Zen, but I'm not." I said, “Why?" He said, “Altogether from the sixth century till today, only up to the eight century we had Kaśhyapas means realised Souls." Only till the eighth century and after that what followed was this kind of people who had the Kuṇḍalinī just settled down there. But at least he was honest. And he was suffering from a horrible disease for which he came to Me.

So I said, “At least you do not propagate now Zen, because you are not a Zen." You are a Christian, are you? Ask anyone who is he. This artificial baptism is not Christianity. Is the real baptism, raising of the Kuṇḍalinī. Is the Kuṇḍalinī piercing through? Are you a Muslim? You are not because you are not a Pīr, you are to be a realised Soul first.

So imagine all these people who are teaching all these things are not authorized at all. But they'll come round, I'm sure.

Question: I was interested in Your comment when You said Nam-myoho-renge-kyo is fine but not any Japanese...

Shri Mataji: You see now I'll tell you. It is very simple to understand, you understand one point which you are missing all the time. Is this that supposing there is a constable standing there and he says, “Go this way” all right, we have to obey him otherwise you'll end in jail he's authorized, isn't it? But supposing I go and stand there and say, “Go this way” they'll put Me in jail. They have no authority from God to do it because they are not realised Souls. The same mantra becomes a great mantra when it comes from an authorized person from God. But the same mantra becomes a sinful thing when it comes from a person who is not authorized, who's just commercialised it.

Seeker: [interrupts].

Shri Mataji: Is it gone into your head what I told you, that you are to be authorized by God? That is you should be Self-realised. If you are not Self-realised you have no right to give any mantras or anything, do you follow this point, simple point.

Seeker: Sure.

Shri Mataji: Now that's all.

So you get your Realisation, that's important, which you should. But I don't know how it works out, you see that is

not My guarantee. If it works out well and good, may not work out today.

So better put attention to that, it's important.

May God bless you.

Is there any other question now? Put attention to that, that is important. But one thing more, when you follow them you never ask questions. I had one lady from a lama she came down from Norway, she was horrid, absolutely horrid.

Her vibrations were, what was her name Gavin? Gavin: Pia.

Shri Mataji: Pia. She came to My house I said, “Baba! How to raise her Kuṇḍalinī, Baba, dreadful." And she was thinking no end of herself and arguing, arguing with Me throughout and all that. I said, “How did you happen” I mean she has been to this lama. I said, “What happened?" She said, “No, he wrote to us that I can't live in an ordinary house you have to make a marble floor.

So first we all starved ourselves, within one year we collected money made a marble floor for the fellow.

So he came and was sitting on the seventh step and we were first one year we had to just go and bow to him just like this." One thousand and one time can you imagine everyday and “I've done that course." But I said, “Didn't you argue with him?" She said, “No." Then I said, “Why are you arguing with Me?" Of course I like that you argue because that shows you are free to argue, I've not mesmerized you, but must see the sense.

How do we accept Buddha, let's see. Have you seen Buddha? Have you met him? Have you met anybody who

is a Buddhist who says he can give Realisation? But then why are we the pleaders of Buddha whom we have never seen, who has gone away, we don't know anything about Him. Why? Because I am living He is not. When He was living there were people who were asking about other people.

So better be in the present and get it your Realisation, all right, that's what it is. That's what happened with Buddha he couldn't give Realisation to anyone whatsoever. Sāriputta, Moggallāna, all were wasted people. Same with Christ. Because when Kṛiṣhṇa came they said, “What about Rāma?" When Rāma came they said, “What about Dattātreya?" But where is Dattātreya now? Rāma is standing here why not get it from Him.

So everybody failed. They said, “They are talking about the past only." What about the present? You are sitting before Me, I am sitting before you, have your Realisation. Why argue about it? If there's a diamond and if I say you can have it free will you argue? You understand diamond better than our Spirit. Always we did that but this time better not miss it. I'm telling you better have your Realisation, it's important. Of course Buddha plays a very big role within us but first get your Spirit otherwise it has no authority. The knowledge of Buddha has no authority within you unless and until you become the Buddha yourself. All right, now let's have it. At the end of it I would request you to have your Realisation.

Put your hands like this towards Me just like this. Better now, relaxed, all right, nice. Put your hands like this. It works, it works that's the point is, it should work, isn't it? Now close your eyes, please.

Just close your eyes, you have to keep your eyes shut that's important because when the Kuṇḍalinī rises above the Āgñyā Chakra if your eyes are not closed it will fall down, so please close your eyes. There's no mesmerism that's why you have to close your eyes. Just keep your eyes shut.

[Aside:] Take the baby out, please.

Just sit comfortably don't move, don't make any gestures nothing, nothing outward. You have to be inside, it will work out inside. Nothing should work out outside. Just keep quiet. Just put your hand towards Me. Whatever has to work out will work out inside, not outside. Don't open your eyes but don't fix your attention anywhere, keep it loose, just keep it loose, don't fix it at a point, please. Don't try to fix it at, some people are fixing it at the point what we call the Āgñyā Chakra or anything. At the most you can put your attention on top of your head. But don't try to fix it anywhere keep it loose, absolutely loose. Now with your right hand, which is the hand of your creativity or the action power, you have to use the right hand to express your action and the left hand is a desire.

So you have to put the left hand towards Me for the desire but don't open your eyes, just on the lap you can keep it comfortably as it is and you have to just move your right hand but keep the fingers straight. Straight fingers toward Me and move the right hand as I tell you.

No, on the lap left hand on the lap and the right hand I'll tell you how to move it. Now put the right hand, no left hand toward Me. Sahaja Yogis should see left hand towards Me now move the right hand.

Left hand on your lap comfortably, please put left hand on your lap. Left hand on your lap, yes very comfortably.

Now the right hand you have to put it on your heart. Heart where resides your Spirit. Now in your heart you have to ask a question to Me, `Mother am I the Spirit?' Just put it on the right hand side.

Those who are very much on the left but actually it is on the left hand side is the heart. You see those who are putting it too much toward the left should put it at the proper place of your heart is on the left hand side. Now press it with your fingers. And just ask a question, `Mother am I the Spirit?' Say it thrice, ask a question with full confidence.

Now please put this right hand, don't open your eyes, on your stomach on the left hand side again.

Lower part of the stomach and push it and ask the question again to Me, `Mother am I my own Master, am I my own Guru?' Because you are and this Spirit is your Guru. But when you are asking Me a question, `Mother am I the Spirit?' you have to ask the second question, `Mother am I my own Guru, am I my own Spirit?' Because the Spirit is the Guru, which is awakened within you, when you get your Realisation.

So you have to say, `Mother am I my own Guru?' Say it ten times. Ask the question ten times. The times are according to the Chakras.

Keep the left hand the same way and now put again the right hand on the heart. And now you assert with confidence that, `Mother I am the Spirit,' which you are. This you have to do it twelve times, twelve times. Ten plus two, twelve times you have to say, `Mother I am the

Spirit.' With confidence, with full confidence you should say, `Mother I am the Spirit,' full confidence.

Now take this right hand across to the left side of your neck, left side of your neck. Again was I said left Viśhuddhi. Because the Spirit is immaculate, absolute, it never does any mistakes so there is no question of feeling guilty.

So you have to say sixteen times now that, `Mother I am not guilty.' Say it sixteen times, again with full confidence, because we're talking about God Almighty who is the ocean of love, ocean of forgiveness, ocean of compassion, sixteen times.

Now again raise the left hand without opening your eyes, to your forehead. Across your forehead, across your forehead and hold your forehead in your hand, right hand, left hand being towards Me. At this point is the Āgñyā Chakra where you have to say that, `Mother I forgive everyone.' Now some of you might say that I cannot forgive is a very common thing people tell Me. But when you don't forgive what you are doing is to play into the hands of people who try to harm you.

So you just say, `Mother I forgive everyone.' With full understanding, without any reservation, `I forgive everyone.' Unless and until you forgive everyone how can God forgive you? So let God forgive you for your mistakes what you have done in your ignorance but don't feel guilty about it. Only you just say, `Mother I forgive everyone.' Now put this hand on top of your head, right hand again where the soft bone was there when you were a child. Press it with your palm that portion and move it in a clockwise manner. Press that palm and move

it in a clockwise manner. Now at this point I cannot cross your freedom. It's your freedom, which I respect, you have to say that you want realisation.

So, here you have to say, `Mother we want our realisation. Please give us the Realisation,' otherwise I cannot cross.

So please say this seven times.

Now you can raise your hand and see if there is a Cool Breeze coming.

Some people might be getting the heat coming out of their heads. Raise it higher to see if there is a Cool Breeze coming out.

So many of you are still feeling guilty, is a wrong thing. I've told you not to feel guilty. Just see if there is a Cool Breeze coming out. Now you can take another hand, left hand and see with your left hand. You can change over and see if there is a Cool Breeze coming out. Not very much higher say about four inches higher. You can change over another hand.

You just see if this gentleman has got it, Ruth see his. You got it, you feeling in the hand also, not in the hand. He's got in the hand, you got it, it's very subtle.

It's a subtle thing. You are coming from a gross level to a subtler place.

All right, you have to do that left to the right.

Put your hands toward Me still, see the Sahaja Yogis will help you now. Once you become Sahaja Yogis you have to help others, all right. They know about your Chakras.

Is he all right? All right try to help Matha? See this gentleman, no. Left to the right, put him left to the right. Is he all right, all right? Not yet in the hand.

You just watch Me without thinking. Can you do it? Got it, got it she said she's a Sahaja Yogini. What about him? Got it, see there.

[To someone in Marathi.] See the new people please. No, no don't stop yet put *[UNCLEAR]*. Put it left to the right. [To someone in Marathi.] Viśhuddhi, Nābhī.

[To someone in Marathi.]

Contents: **1983-05-xxWorkshop, after a Public Program, London, UK**

[Shri Mataji is working on a gentleman from the front, while two other Sahaja Yogis and Luis Garrido are working on him from the back. Shri Mataji asks them to raise his Kuṇḍalinī and later on to give a bandhan to his Sahasrāra.] What catches can you feel? [One by one, the three Sahaja Yogis enumerate the different catches but none of us mentioned the catch on the Nābhī.] You mentioned so many catches but none of you was able to feel t catch on the Nābhī Chakra and this is the main catch for this gentleman. Do you know why none of you could feel it? Sahaja Yogis: No, Mother.

Shri Mataji [to the three Sahaja Yogis]: That is because the Nābhī Chakra is also your main catch, so much so that you can't even feel it. Do you know why the Nābhī Chakra is your main catch? Sahaja Yogis: No Mother.

Shri Mataji: Because none of you has married yet. Do you know what's to be done? [The three Sahaja Yogis are looking a bit serious but Shri Mataji is smiling:] It looks

like have to find a nice wife for each of you. [Laughter.] [Shri Mataji enquires about this gentleman's profession.] Gentleman: I am a priest.

[Shri Mataji explains to him that the idea of celibacy as the best way for spiritual ascent is a misguided belief and this was causing an obstacle at the level of his Nābhī Chakra. The priest comments that he was bound by his vows, to which Shri Mataji replies that She is not suggesting or encouraging him to break his vows but that the wrong idea that celibacy is the only or the best way for spiritual ascent was the obstacle at the level of the Nābhī Chakra. After this his Kuṇḍalinī rises strongly and his face is transformed.]

***Contents: 1983-05-20*, Public Program, To All the Seekers of Truth, Caxton Hall, London, UK**

To all the seekers of truth. We are seeking truth, reality, not hallucinations, not imaginations, not our own mental projections. We are not being yet able, many of us who are seeking understand that reality is what it is. It will be the same; it has been the same. We cannot coin it for ourselves. We cannot organize it and we cannot think about it. We cannot put a mental projection of our own as to, `This is the reality.

This is not the reality.' Today only I was reading with great surprise an article about snifing the glue that people are doing. I mean, now this is the last they are snifing now, petrol, all sorts of things. Well, why, why are they doing it? Because for some sensation. But they said that when you do that, what happens that you start believing that whatever you are doing is right. That's

exactly is the point today. Without snifing also there are many who believe like that. But whatever their ideas are about God or about spirit, about seeking, is the right thing and they don't want to see what reality is. They just want to reject their ego, their imagination, to believe that this is the reality and then they just are convinced that they know everything. With such people, what to do? How to tell them that reality is something very different? Now what happens when we put our mental projections like that? We can see things, we read books, we form our own ideas. It's a very dangerous thing that can happen to human beings and that is, your ego start bloating, becoming big and big and big without your knowledge. A person who has an ego does not harm himself at all. He harms others. He doesn't harm anyone as such but he harms in a way which can be very deep hurting. He'll say things which will hurt a person. He'll do things that will hurt. Nations after nations can be destroyed with this ego, like Hitler did.

So when you put your mental projections like this, “I can do it. I can find it. I know. I know. I believe” then this ego, you see, grows in your head. If it was only your head, nothing to bother, but it grows round your heart. It grows round your heart and your heart becomes like a stone. You cannot feel anything that is real. You cannot understand what is real and what is unreal. All this discrimination is lost completely.

I went to Bangalore and there were some very ordinary people working in gardens and things like that.

They saw Me and they recognized Me. Not difficult. One lady came and told Me, “My son has gone away for two

years. He was only fourteen; now he must be sixteen and I know You can call him back." I said, “How do you know?" She said, “We know Who you are." Just seeing My face, can you imagine? Such sensitivity they had. I said, “All right” and the boy came back after two days. But look at their quality.

The whole level of sensitivity is lost with this ego.

When Rāma went to jungle, as you know he was sent away, everyone recognized them, who were in the jungle leading a very normal life. But today it is getting worse and worse and worse. We have no eyes to see. We have no sensitivity to understand. We have our own images built around us; such barriers.

We have lost all sensitivity to reality, to goodness, to divinity, to love, to affection, to compassion and that's why it is so difficult. It's very difficult. Even when we say we are seeking reality, it's kind of a big announcement of the ego. But there are many who do believe we have found the reality, we know reality, we have full conception of reality and this is what it is. If suppose tomorrow Christ comes, who is going to recognize Him? Not you, not the people who are living in the cities, not them. But when He goes in the forests to simple village people, they will, because they haven't lost that. They are still there in the center.

This ego develops with so many things, money, one thing.

Sometimes the belief that we are moneyed people also can. Power, I mean, as soon as somebody becomes a minister you should say he is completely changed. His face is changed, his style is changed, his talking is

changed. They've forgotten what life is like. There's no fun in their life, no fun at all, just like dried fishes. Better not go near them, otherwise you will get the stink of their ego.

This is what is the problem today, the present day. Sahaj Yogis get upset about it. “Why, Mother, people don't progress in Sahaj Yoga?" First they have their own conception. You tell them, “This is Sahaja Yoga” and as you have to tell somebody this is reality, say you say this is diamond, then you have to also remove all the obstructions which are on top of that, to show you that this is reality. The wisdom lies in understanding; what it is let's see for ourselves. That's the soundness of a character if you have; at least you will settle down and try to see what it is. Instead of that, people just get angry. “Oh we don't believe it." But you don't believe it, what? You haven't got the sensitivity to know what to believe, what not to believe. But it is even much more dangerous than that because when you have to seek, because that's your nature. You have been seeking all your lives, not this life. I mean, you come again to seek in this life which is a special time. You are always enamoured by something that is unreal, that appeals to your ego or to your superego. Means a person, if he can somehow or other give you some sort of a sensation or some sort of mesmerism, you think, “Oh, this wonderful life. I feel so happy. I was very high, just like getting intoxicated." But what have you achieved, is the point, by that? Like if you take some sort of a, this glue business, I don't know what happens today.

Somehow I have been reading three articles on such things.

Something like cocaine they said is the modern trouble now; drugs are out; now the cocaine. With all of this intelligence, with all this knowledge that you have gathered, if you have to end up your life with cocaine and glue, where is the wisdom? When you have to select something for your life, for the fun of your life, for the beauty of your life, what do you select? Something that is going to destroy you? You see others are destroyed; still you go to it. This is the danger of this horrible ego which we have created of our own. But it may also take you to people who will pamper your ego. For example, somebody says, “All right, in this hall if you have to come, pay hundred pounds; otherwise, you cannot enter." You'll be surprised this hall will be filled completely by all the big wig cast will be standing here. People will be just sitting here. It's just as if they are going to races. Who pays more? The competition.

In the elite society you will be surprised. The talk is like this, “Who is your Guru?" “What are you going to do this time?" They said, “I have tried this. I have paid about five thousand pounds. Now I think I'll have to go somewhere with ten thousand pounds." It's really, that's the talk they have and they talk like that.

If it was only stupidity that you achieved through your ego, it's not so dangerous, but discrimination is completely lost and you always, you are enamoured more by unreal things and with little understanding, with little intelligence you can understand. Very little is needed. You don't have to read books to understand, but

that simple common sense of a village folk you don't have.

Like, I remember My granddaughter once went with her father and mother to a Llama. She is a released soul, the parents are not and this Llama had shaved his head completely and was sitting with a big robe.

So, first everybody was going. She was looking at him. She couldn't understand what this fellow is up to because everybody was touching his feet and then father went and touched his feet and then the mother went and touched his feet. She couldn't bear it. She was only five years of age. She just put back her hands like this and stood before him and said, “Why are you such a hypocrite? You are not a realised Soul. Just by shaving your head and by wearing this dress you become a realised Soul?" She just stood before him, five-year-old child. And the parents were rather embarrassed and the fellow didn't know where to look when she said, in Hindi they say `pār', “You are not even pār. How are you sitting there and asking everybody to touch your feet? What right have you got?" And then the parents got embarrassed and said, “You shouldn't say like that." She said, “I would not have said if you had not touched his feet." See, the five, year-old child and otherwise she is a very mild, sweet person. She stood up.

But somebody comes as Llama, finished. If somebody is coming here Llama for us, he is the greatest.

Then he tells us that you have to go to Shambhala in the Gobi Desert. We are all packing our things going to Gobi Desert to die there. What else? Is there any Nirvāṇa written that Gobi desert? This is what it is happening to

the seekers who have been seeking for ages and ages and they have come on this earth deliberately to get their realisation and there they are ending up their lives in Gobi Desert. But if anybody tells them, “That's not the thing. That's not the reality” then they get very angry. “Why should you criticise?" But main thing is, you have to find it for yourself. You have to understand that the power has to work through you.

Just like blind, you see, going under a cover. If somebody says three thousand pounds, all right, then six thousand pounds, all right, then ten thousand pounds, all right, just walking towards the hell. That's what it is. You can't pay for God. You can't pay. You can't read about it. You have to experience and the experience when it is yours, you become part and parcel of God Almighty. You become the power.

Perhaps very few human beings realise how delicately, beautifully, for so many ages God has worked on human beings to create you today and the seekers are a special category of people. But modern times are the worst times and the best times because all kinds of negative forces are working now. First they have built up your ego and now this ego is fed by people who are ritualizing and after that you have lost even the concept, the idea as to what to find. This is the situation of today's seekers.

England is doing well now. I am very happy about it. I had to work hard but English are still sound people. They have been able to see through the truth of Sahaja Yoga. They have been able to absorb, but when you say, “I have to go to America” I shudder. I really tell you, I shudder, because they have become so shallow now with

all these Gurus going there and all kinds of ideas that they have, even witchcraft, they have, I mean they have accepted all that is wrong. One can understand indiscretion but discretion only going towards all that is wrong, all that is anti-God, all that is anti-life, is some sort of a negative attraction or fraternity, I don't know what to call it.

While the mental projections are so built up that's it's a very big barrier. Now, how do we break that in Sahaja Yoga? We should try to understand how we break this ego and superego barriers within human beings. Not by lecturing you, it cannot work out through lectures, nor by any kind of brainwashing or anything. We can at the most prepare you to open your mind, that's all, but one has to understand that human awareness is not yet complete.

Through our human awareness we cannot understand God, only through our spirit; we have to become the Spirit. Every gospel, every scripture, every religion has said, “You have to be the Spirit." That means anybody can say, “Now we have become Spiritualists, or we have become spirit." This is another identification one can have. You have to become Spirit, means the quality of Spirit must manifest through you, through your attention, through your awareness and through your personality. If it is not happening you cannot just brand yourself, like, I can say, “I am a Catholic” or, “I am a Hindu or a Muslim." It's not like that. You cannot just put a label to a person saying that, “Now, I am a person who is a Self-realised person." It is your being which has to express that. You have to become. Just by accepting mentally that, “I am

such and such” I mean, they play all kinds of tricks. They'll give you a name, you see, Shivanand and Dayanand and all sorts of Dhondananda” as we call them and they go on the streets and say, “Oh, I am such and such. My name is such and such." I mean, even if you call yourself donkey you don't become donkey. Then how can you become a realised Soul if you call yourself a realised Soul? You are what you are, but you have to become and that becoming is a living process of a living God. It's not a process where you start jumping, dancing. No, it is not. It's a living process and we cannot do living processes.

It's done by nature, spontaneously Sahaja, by God.

So the process of realisation is the awakening of the Kuṇḍalinī which lies in the triangular bone about here...

[Aside:] Can you come and show someone? In the triangular bone you see this lying in three and a half coils. This is a energy that is resting in the triangular bone called as sacrum. Greeks knew it was a sacred bone; so, they called it sacred. When I asked them they said they had a report *[UNCLEAR* within] years long, long time back and they discovered that this is a sacred bone.

This sacred bone lies within you and a sacred energy also lies unharmed, absolutely waiting there.

Now this is the energy of your pure desire. I don't know if you have any idea of purity left in the modern times. You eat anything, it is contaminated. You smoke something in the air; so, you contaminate everything. You hear music which is contaminated. Everything is contaminated.

So, the sense of purity is only existing in that Power of ours which is a pure desire, not a perverted desire, or not a spoiled desire, or mixed-up desire, but a pure desire to

be one with the Divine, to be in the Yoga, to be united with the Divine Power that is all-pervading, the power of love of God. That's the purest desire we have because all other desires have no meaning. Whatever desires we have otherwise, you know, never give us satisfaction.

We jump from one to another. But once this pure absolute desire rises within us, it should rise as an energy. Then we have no other desire. Then the whole situation changes. When you are facing Me you are desireless, but then you come and sit with Me and watch others, whole situation changes. You become Self-realised. When this desire awakens within you, passes through six centers, crosses through this center, then you start feeling the Cool Breeze coming out of your head. Now, this nobody can do. Can anybody do like that? All these Gurus make you jump, pay them money. Tell them, `We'll give you thousands pounds if you can really put the Cool Breeze out of our heads,' or even ten thousand pounds if they want, even millions and billions of pounds. They cannot do it because they are not authorized.

So this is what it is that we have to ask of reality, the Cool Breeze of the Holy Ghost. This is the reflection of the Holy Ghost within us and that we have to feel on top of our head and then in our fingers it should grow. Then we should say that the Spirit has come into our attention, into our central nervous system because we are feeling it now. That's how we have to believe. But that's not sufficient. That's not the end of it. As you know, so many of you, you have to work it out. Now why this working is needed? Because there are lots of impurities. Not to feel

guilty about it, whatever has happened has happened, but there are impurities. This is your rebirth. When the bird comes out of the egg, a little bit of egg is still sticking on to him; so he has to clean that away and then you become a different personality altogether.

Then the reality can be understood because you are that which can see the reality. You have become the Spirit. Without becoming the Spirit you cannot see the reality. You cannot understand the reality. Before that, as I said, it is your own mental projection; it's your own hallucination, imagination. The entire concept is a myth.

You will discover that very soon when you become that. But what's the harm in becoming that because for that you have been seeking? And that is what one should understand that, “I have to become. I have to become that special being. I have to be the Spirit. I have to be the instrument of that Divine Power. I have to understand all the working of that Divine Power. I have to purify myself. I have to cleanse myself through that Divine Power." Some people ask Me, “Mother, it's very difficult to awaken the Kuṇḍalinī?" I said, “Maybe for some; not for Me." It's true. It's not for Me. But why not for Me? That, I don't want to tell. That, you have to find out for yourself. It's true. It is easy for Me, no doubt and it will be easy for you also. You'll be surprised.

Actually, Sahaja Yogis are very humble people; you have no idea how humble they are. The other day they had somebody in Bombay [Mumbai] who came to see Me and he told Me, “Mother, there is one Guru, who is a real Guru, I should say. I have been with him for fourteen years and he has been making me do this and do that,

fourteen years and one day I came to a program I got my realisation and now I can give realisation to others.

So I went and saw my Guru and I told him, that, `How is it that you recognize Mother? You know about Her. You talk about Her and you took fourteen years just to cleanse Me and I haven't got my realisation. Now, here I am. I can give realisation.' " So he said, “Better not talk about it. Now you better give realisations to others. I can't. You are specially blessed." It's a fact. But Sahaja Yogis are so simple, so humble, they are better than all these Gurus put together, but they won't say anything. They have become and all of you who are here for the first time, the second time, all of you have to become. But you have to have patience with yourself. We have patience. We have love, compassion, everything, but you must have love for yourself and awareness that you are not an ordinary person. You are a seeker, a special category of a person. We can't work on mediocres. You are men of God as described by William Blake. You are that. Now, if you want to waste your life in snifing that glue, what are we to do? Or you want to pay some sort of a fraud personality, what are we to do? Except that we can only pray for you that you should come back to right path and get your wisdom back so that you get your realisation. That's the only thing we have to do is to give you realisation so that you also know how to give realisations to others.

There are so many myths working. Like, one lady told Me, “Nobody can do anything for anyone." But why not? If by getting realisation you become what you have to become, why not? Why have these barriers before? You

give these explanations beforehand. Like, you tell somebody, “All right, now tomorrow we would like to buy, say, a particular type of a thing." So, the person, she says, “All right, let's go and find out” normally, “Let's go and find out, to be open." But ego is there; so, the ego says, “But it may not be there." I mean, if it is not there we'll not buy it; simple as that. But why before buying that, or going there, why give such an explanation as that, that it may not be there? That is what it is, that you have to get your realisation. You have to become what you are. You have to understand how it works. It's all your own.

Supposing all your treasure is locked up in a bank and I am a banker and you come to me. Then I have to give you your keys and I have to tell you how to open your treasures and what do they mean, isn't it? That's My duty. But if I doing that duty people ask Me, “Why should you do it?" “Because I am the banker." “So, why are you the banker?" Better go and ask God, why am I the banker. But can you become the banker? You cannot, but when you become, you will become. When you are not, you are not.

When you'll be appointed as a banker you'll be acting as a banker, too. Is as simple as that.

So you get your realisation and you understand those who have got it have got it. Even you will be surprised. Once I gave realisation to one gentleman. He never came to Sahaja Yoga, as such and he didn't become much.

So one day he went to see a judge, a justice in the high court in Bombay [Mumbai], who was a realised Soul, too, Mister Vaidya.

So, Mister Vaidya asked him, “Do you know Mātājī Nirmalā Devī?" He said, “Yes." “Did she give you realisation?" “Yes." “I know." “How do you know, sir?" He said, “I can feel it. Of course, it's very mild but it's flowing." Still the Divine is working. But why not go up with it and why not help the Divine? Why not make the best out of it? A little bit cooperation and understanding and willpower can give you everything that you have. It's all your own and you have to have it.

I am very happy to come back to London now to talk to you. I think London and England as a whole has very sound Sahaja Yogis, very sound, sensible, wise, hard-working Sahaja Yogis and the youth of England are really the best today in the West. They are not shallow and they are not such wobbly things like Americans and they are not bound by the idea of death like the Switzerland people are. Since people are on one side doing Sahaja Yoga and on the other side planning how to commit suicide. And they are not miserable like French are. They are so miserable that they want to drink away their life and indulge in prostitution because they are extremely miserable. They don't want to laugh, you see. They think to laugh is a sinful thing, but all other sins you can commit. As long as you don't laugh, it's all right. Should never have any fun in life. If you have fun you should do all the sins with great seriousness. Then it's all right. It's no sin. It's a funny idea of detachment they have developed.

So we have Italians who are both very emotional and very good at recognizing Me, but to understand Sahaja Yoga little more soundness is needed. They'll settle down

very soon, I think, but basically they are very sensitive people, very sensitive. But sensitivity is not sufficient. You must have soundness behind it.

Even if you are sensitive and you recognize Me, you must have that soundness to understand the immense advantages of Sahaja Yoga, the greatest dynamics of Sahaja Yoga. This is the solution of all the problems of the world, believe Me.

Today I had to attend a dinner on a ship and I was chief *[UNCLEAR* or state] I should say, no guest, chief guest but I just told My husband that, “Today, please excuse Me. This is God's work and nobody can do that but Me. I have to do it; so, please excuse Me." He said, “It's all right. It's all right." Normally he would not because I was one of the, I mean he was a chief guest, I was his wife and I was supposed to be there and on the ship, you see, everything, but when I said, “This is God's work. God's important” he also feels the importance of this work.

So if you have that intelligence, basic intelligence, also you can see how important it is today.

I am happy today; those who are new will get their realisation, but not only getting their realisation.

You have to keep in a way that you proceed further, grow further. You have to have patience; you have to understand it in a very sound and a wise manner. You have to have your wisdom completely intact and give a chance to yourself. Just don't discard it, “Oh! I haven't felt it", as if some people are proud of it.

If they haven't felt it there's something wrong. They have to feel it. I am sure this will work out today and add to

our Sahaja Yoga people which is the solution of all the problems, of all the problems.

In India there was a speaker called Mister Barbay who invited Me to his speech in a village he had gone in a district place. There was a big crowd and he was addressing and, of course, he is a Sahaja Yogi, but still not such a great Sahaja Yogi, I should say, because he started saying that, “We have certain problems in our country. We have caste system and we have all these things. There's a big problem. Like, in other countries they have race problems and this, that and we have also these problems within us that we talk of different castes." So I said, “There is a solution for it. If you are reborn your complete birth is changed.

You are no more English, no more American. You are no more an Indian if you have a caste system. You are a Yogi. You are a realised Soul. You have no caste. You have no religion. You have no race. You are beyond it, that's what” and he was surprised. I said, “That's how you'll solve the problem." This human life is like that. It gives you identification: you are English; you are rich; you're poor; you're this; you're that; you are Indian; all sorts of identifications; you are a king; you are a minister; minister's son; and governor's son; and all those things. But once you become a Yogi you are a Yogi because there is no unreal thing existing any more with you. These are all unreal identifications. They just drop out.

So many people in this country have taken to lives which are alternate lives, as they call it and also their dress is changed, everything changed but from outside. And by

that they felt that they have achieved a kind of a change within themselves, but it's not true; it's not true. The unreal must drop out. The whole unreal must drop out. Once it drops out then only you become the real personality. By changing outside, nothing changes and that has to happen to all of you, to all the seekers of the earth. Sahaja Yoga is only meant for seekers and for nobody else. I am only interested among the true seekers and not among other people who are seeking power, seeking this, seeking that. Is all so artificial, absolutely artificial. About that, I'll tell you later on how these things are absolutely artificial. May God bless you all.

If you have any questions you may ask just for...

Any questions? Are you all Sahaja Yogis? How many of you have come for the first time? Raise your hands. Can you come forward, all those who have come for the first time? Set two lines you should have occupied. You all should get up. Douglas, I think you all should get up. Please be seated there. You let them be seated.

So now you can see how many are realised Souls sitting here and you have to just join their group, isn't it? Please make yourself comfortable there. Now what about here. Those who are Sahaja Yogis should go behind. Please come and join here.

Audience [from back]: We can't hear you at all.

Shri Mataji: Beg pardon? Audience: We can't hear you at all, can't hear you.

Shri Mataji: Really! Is that so bad? Oh God, what's the problem, Douglas, they couldn't hear Me? I'm sorry for

that. What? Douglas: *[UNCLEAR]*. We couldn't hear you at all.

Shri Mataji: All right, let's see what's the reason, all right. Please make yourself comfortable. Now get them there on the second seat would be better for all of them so we can look after them. You were feeling only the ego or what? All right, that could be one of the tricks of Sahaj Yoga. All right, let's see what happened. I also hear, I don't hear many people clearly. Unless and until you are a realised Soul, I find it very difficult to hear unless I have to ask somebody to tell Me in My ears. The frequency doesn't go into My ears, too, so let's see what the problem is. Now close your eyes. Put your hands just like this, that's all and take out your shoes if possible. Now the whole thing, process takes hardly any time. It's just a very short time, a split of a second, but if there are any barriers in between, then there could be a problem. It takes a little more time, doesn't matter. To err is human, isn't it? So it doesn't matter.

Whatever is the problem it has to be worked out. When it doesn't work out in you, some Sahaj Yogis will come round to help you.

Now I must explain to you beforehand what happens. They have got this power, this power flowing through their hands. And their fingers, as you see there, are decoding, giving messages, the fingers, about the centers where you have a problem.

So they exactly know where the problem is. Also, they know how to cure that problem; so, they use their fingers, their hands. They won't touch you but they will know and they'll try to correct you.

So not to get frightened if they just come and raise your Kuṇḍalinī or do something like that. There's nothing to be frightened about. Nothing is going to happen to you. You are going to feel absolutely blissful and happy. You just don't worry. All right, so put your, both the hands straight, just like this and close your eyes. Now you need not stretch your body too much, nor you should slump it down but sit comfortably with both the hands on your lap or on your legs like this, you see, on the thighs like this and keep your eyes shut. Please keep them shut. Whatever has to happen will happen inside; nothing outside. There is no need to jump or to say something or to make a face or anything. Let it happen.

Now there's one more thing, one has to remember that it happens spontaneously and your attention should not be fixed on any point, just...

Doesn't matter, there's nothing to worry about it because this happens spontaneously, your Kuṇḍalinī rises and you get your realisation spontaneously.

So, don't fix your attention anywhere. Just leave it loose, absolutely loose. Slowly you will find first of all that you are not thinking. One thing, that you please don't open your eyes till I tell you because the Kuṇḍalinī doesn't rise above the Āgñyā Chakra or the Chakra which is in the brain if you open your eyes. Please keep your eyes shut.

Now, the left hand of yours represents your desire and the right hand is your action. Now, I'll tell you how to use your right hand while keeping your left hand towards Me on your lap. All the time you have to keep your left hand with stretched fingers on your lap, while the right hand is to be used on different centers.

First of all, put the right hand on your heart on the left hand side and in your heart, not loudly, you have to ask a question to Me, saying, `Mother, am I the Spirit?' Ask this question thrice. Ask in any language, it makes no difference, `Am I the Spirit?' Now, the quality of Spirit is that once the Spirit manifests in you, you become your own master. You become your own Guru.

So, please put the right hand down on the stomach on the left hand side and just press it with your fingers, on the left hand side. Put your hand on the left hand side and press it with your fingers, little bit lower, yes. Now here, ten times, you have to say, `Mother, am I my own Master?' Now raise this right hand to your heart again and say now, assertively with full confidence, `Mother, I am the Spirit.' Please say it twelve times. It is according to the number of petals you have for your different centers. With full confidence, please say, `Mother I am the Spirit. I am the Ātmā,' twelve times.

Now put the right hand again on the left side of your neck. There's a center there, left side of your neck. Now, we have to know that the Spirit is without any blemish, without any guilt, Nirdosh.

So, we have to say at this point, `Mother I am not guilty. I am not at all guilty.' Forget about the past, forget it completely. You have to become a new life, so what do we say, `Mother I am not guilty.' You have to say that sixteen times, please. They have this problem. That's why they couldn't hear Me, all right? That's the problem you had, feeling guilty for nothing at all. Now say with confidence, `Mother I am not guilty.' Say that sixteen times. There's still a very strong one there.

Now, raise this hand if you have said it, to your forehead across. At this point you have to forgive everyone. You may say that it's difficult but when you do not forgive others you are playing into their hands and torturing yourself. Just say, `Mother, I forgive everyone,' from your full heart, sincerely. Please say, `Mother I forgive everyone.' Say it thrice. Put it across.

Now, put this hand on top of your head, resting on the head in the center. The palm on the head should be in the center where it was the soft bone in your childhood. A little further. It's not at the back side but further. Here, it is going to break. Just put it a little further. Still some people are having, just try to feel it. Just rub it a little bit with your hand. In a clockwise manner you can move it also. Just push the hand up on your head. Put the palm; don't open your, push it hard, little bit.

Now, at this point I can't force you to become realised. It's your freedom, so I respect it. You have to ask or you have to say, `Mother I want my realisation. Please give me realisation,' seven times, please.

Now, raise your hand and see if there is a Cool Breeze coming. You can change your hand also and see with the other hand. Put the right hand down and with the left hand you can see if there's a Cool Breeze coming out. You have to certify yourself first of all. On top of your head, about four inches on top of your head above. Just try to see if you are feeling any Cool Breeze coming out. It's very subtle. You can change your hands and see. It's very, very subtle and as we are going from gross level to subtle level our sensitivity is not so great. If you are feeling it then you can put down your hand, both the

hands. First you must feel it on top of your head and if you don't feel it then later on we'll see how it works out. But those who are feeling it will start feeling it later on... on their hands. You can change over.

Can some of the Sahaj Yogis see the people who have come for the first time? You can put down your hands on the seat, but don't open your eyes still. Keep both the hands straight. It has to work out. It will work out. Don't you worry. Can some of you come in from the front line, please? Bala, just see your neighbour. Has she felt it? Can you come in front? Facing them you can, Anna you can come facing them...

***Contents: 1983-05-25*, Public Program, The Fulfilment of Seeking, Lewes, UK**

That's all I should say are the ways of God *[UNCLEAR]* and His own and His Dharma the way He wants to use. We have been working in Brighton for quite some time and it has done lot of good to many people because I always felt that Brighton is a place where there are many seekers and they are seeking the truth very earnestly.

Their seeking has tremendous power behind it, but somehow or other they are misled. Like I have found so many lost in so many cults; if not the cults, then the drugs and all such things. These are all signs that they are seekers. They are seeking something beyond, nothing wrong with them because there was no alternative. They might have done some mistakes, they might have gone to a wrong thing but I tell you they are seeking the truth. They'll find it. That's what it is.

Now we have to understand that within us there is a power, which can fulfil our seeking. We are created for that. We are not seeking because just it's a fashion or just because we see some important people in the society are seeking, because there are some books which are writing about seeking. But the time is such that you have to seek. Also this time is so important that so many seekers have taken birth because this is the time you are going to get it. This is the time meant for that. There is nothing absurd about it. I mean, when you see some people as hippies or, say, if they drink too much alcohol or if they take to drugs, we start thinking that there's something really wrong with them. It is not. They are doing it because they are not satisfied. They are thinking that there must be something in these things that they should seek and that's why they are doing all these things in the name of seeking only. Because the urge is so great within us of seeking, that if we do not listen to that urge we don't know what to do with it.

Some people look strange, you see, to people who are used to a stereotype of life. They can't understand why they are so strange and start wondering what is happening to these people. But actually it is a very big force that is working through the time itself which is making them seek and seek and seek.

In our evolutionary process, we have come to the human level. Human level is such that we do not understand what is right, what is wrong. There are certain rules and regulations, of course. People have given that if you do like this, this will go against you; if you do like that it will trouble you. You may call it religious teachings, you may

call it any other type of teachings or some doctors may tell you or maybe some psychiatrist may tell you that if you do like this, it will have this effect. But this is all the discussion of the causes and the effect. But really, what we should know why, why do we do like that and why do we suffer. If we know how to overcome these so-called temptations, you can say, without doing anything about them, then there is no suffering of any kind.

So first of all, we must understand ourselves and that understanding, as I told in the afternoon today, can only come if you have the knowledge of yourself.

Now many people say that we must get Self-realisation. Christ has said you have to be born again.

So I have known some people in America, they have branded themselves, “We are born again." Finished.

Once you have that opinion about yourself that you are born again they think, “We are born again!" It's not your opinion that is important; is what has happened to you and when Christ has said you are to be born again, He could not have said for something artificial or something mental projection or something imaginary.

What He meant, or any other person like Buddha, Mahāvīra, all these people have said that you have to be born again. Now what did they mean by saying you have to be born again? Is it something that you just brand yourself or you form a cult, or you form a group or you follow some Guru, paying him lots of money? Can that be so? Can that be born again? It means that something has to happen to you. But happen to you doesn't mean that suddenly, say, if you say that, `Suddenly I developed

another nose,' or something. That kind of happening is external.

What should happen to you is something to your awareness. That's what we have achieved in our evolution, in our awareness. For example, a dog, say for example, a dog comes here and sits here. He doesn't know whether it is artificial or real. He doesn't know what are the colours. He doesn't know what style it is. His awareness is so low that he knows certain things, of course, which we do not know. For example, he can find out a thief for you. But the human awareness has, it has become subtler and subtler and subtler. It has reached a stage where it should become so subtle that it should know itself. And that awareness, we have to get it through our evolutionary process, which is a living process. This is what many people don't understand: it has to be a living process. Now, for example, if I bring a little doll and say, “Oh! this is a child, was born to such and such lady” nobody is going to believe it because it is not living. The childbirth is a living process. In the same way your second birth has to be a living process.

And now what are the qualities of the living processes, that we cannot manifest living process ourselves? Supposing we tell our finger to grow, will it grow? It won't. It grows by itself, spontaneously. If there is a seed you want to sprout you cannot do anything to it; it sprouts by itself. If there is a tree, it has got flowers, you just can't order, “Now come along. I tell you, you produce fruits." It won't. Everything has to work out absolutely spontaneously. And that is what is the living process. If it

is a living God who has to work it out then you cannot do it artificially. This we should understand.

I am told there are lots of churches. I was happy to know that there are churches here. But we must face one simple thing about it that by giving artificial baptism we do not give them second birth. We cannot. We must understand it's not just an artificial thing that, `Come along now.' I am coming from Theosophical Society or some sort of a theological school or some place and I say, `Come along. I give you baptism,' and you stand there and put some water on your head and I say, `You are baptized.' No, that's not. John the Baptist could do it. He had to be a real Baptist, not an artificial one, self-appointed, but appointed by God, because when he put his hand on the head of somebody, something happened to that person. And what was that happening? Is the second birth. Means what? In the Sanskrit language, a bird is called as `Dvijaḥ', means `born again'. A bird and a realised Soul is also called as a Dvijaḥ, means born again, twice born. Now, how a bird is born again? It's an egg first, born as an egg from the physical mother. Then the egg becomes the bird; so it's a twice-born thing. Now there is no similarity between the bird and the egg. Everything that is egg is transformed into a new personality and that should happen to you when you become twice born. Your personality should be completely transformed into a blissful, peaceful, happy, joyful, auspicious personality. Unless and until that happens to you, just by saying that, “I am a realised Soul” or, “I am a twice born” will be something like deceiving myself. And if you are a realised Soul, you will

never deceive yourself nor will you deceive anybody else, because you are a new personality and a special type of a personality which is absolutely living with absolute ideas. It's not on relative terms; it's in absolute understanding of the truth.

I have seen people who got realisation, you'll be amazed, even from your Brighton.

Some of them were, I call them druggists and chemists and they just left drugs overnight, overnight. I never told them.

I never tell anybody that, “You don't do this." But as soon as you are transformed the shell drops out and you become that beautiful person. I don't have to tell. I mean, you don't have to tell the egg that, “You'll become a bird." When it becomes a bird, you don't have to tell the bird that, “You give up the egg. You have become the bird now." So this is what actually should happen. It should actualise. The becoming should be actualised. It should not be some sort of an imaginary idea in our head that we have to be like this or this book says so or this gentleman says so.

That is how we are not facing the reality. The reality is what it is; it will be what it is.

So to face the reality what you have to do is to see for yourself. Whatever I may say also, you need not believe but you need not close your mind completely also, because otherwise how will I tell you what I have to tell you? But you must understand that whatever happens to you should be your own experience and understanding. Otherwise, it has not happened to you. Supposing I am blind. I can't see the colours and you say that I am blind.

It's all right. But when I open my eyes and I can see the colours, then I can always say that, “I can see. I can see. Definitely, these are the colours!" But only those who have eyes can see and when you see also the same thing, those who have eyes can also say that, “Yes, this is correct." But supposing the, another person is blind he'll say, “No, you're telling all lies." It is not so, of course, because his eyes are not open. But those who have got their eyes open can say, “Yes, this is it and this is what it is." So the first thing we have to do is to get our eyes open, by getting our Self-realisation. This is the first and foremost thing that should happen to us.

Now many people ask Me that, “Mother, it is said that you have to cleanse yourself and you have to work so hard. You have to sit in a closed room and do all kinds of things." To make it simple I would say, “You have done it all. It's done now. You have done it in many lives. Now it's over. Now better have it." To make it short or to make it long, one has to understand that the time has to come when so many have to get realisation. The time has come. And this is the time, the special time, the blossom time. And you are just ready to have it and you better have it. It is your right to have it. It's your own. As I said, I am just a banker. It's your bank here. I have to just cash your checks; that's all! Of course, there are some grace marks also given but doesn't matter. It works out. And it has worked with so many and should work out with all of you. But to make people understand that this process first happens instantaneously sometimes with many people, people get realisation. But as the people are naive, as what to expect about reality, they have not

known about the reality, then they start wondering, doubting this thing.

But actually what happens is so simple that within us is placed, you see, here in the triangular bone lies the power, which gives you realisation. This rises through these six centers, one, two, three, four, five and six. This energy, which is the energy of pure desire, pure desire, it is the reflection of the Holy Ghost.

This is the Holy Ghost which rises, slowly ascends, pierces through these centers and emerges through your fontanelle bone area where you really give baptism to people. But this area then becomes soft like a child. That's your second birth. That's why you become like a child. Christ has said, “Let the children come to Me” because you have to be like them. That exactly what happens to you that you feel, you feel it, the Cool Breeze coming out of your head. You all feel it. It's no question of somebody saying, `All right, you are realised, certified,' or, `You become this name and that name. You change your dress and wear that.' Nothing of the kind. It happens to you that you feel the Cool Breeze coming out of your head and you feel the Cool Breeze in your hands, that is, for the first time you feel that All-pervading Power of God, that all-abiding love of God. First time you feel it.

Now you may be amazed that, I mean, so many have talked about it and said about it and how is it that it didn't work out that time? One should say in the beginning of any tree, early life of a tree, you get hardly one or two flowers but when it becomes a big tree, then there are many flowers and the blossom time comes in and they all can produce lots of fruits and that's what it

is. The time has come. You are ready for it. You better get it.

Once you get it then you will be amazed to know that now you have become a collectively conscious personality. Collectively conscious personality you have become. Now what is that? For example, now, supposing there is a gentleman sitting before me and he is suffering from some disease. I can tell him, “You have this problem." Then he'll say, “How do you know? How do you know that I have this problem?" I will know because I can feel it on My fingers. You can see that clearly. The hand is shown clearly that these centers are felt on our fingers, I mean, we actually feel it and when you feel these centers on your fingers, these are five, six and seven and if you know what these centers are for, what they represent, what they manifest, then you start decoding it. And immediately you know that this gentleman has this problem. Say we met a gentleman and he had a problem. He had a problem on the right Heart, we call it.

And such a person may develop a little asthma. We asked the gentleman. He said, “Yes, I have." And if you ask him, “Have you some problem with your father?" he'll definitely say, “Yes, I have” because that's the center of the father. Even if your father is suffering or if your father is bad to you or in any way if you are not good to your father, any way, then you get this right Heart as shown there. The catch on that, which you can feel it on this right finger and immediately you can cure that also if you know how to cure it. It's as simple as that and that's how people are sometimes amazed when we tell them that

Sahaja Yoga even cures cancer, mellitus, all such diseases which are supposed to be incurable diseases.

But that is not the only thing for which we are here. We are actually here for becoming doctors ourselves. Not for curing but all of us becoming doctors and these doctors don't have diseases. These doctors don't have diseases. Only the doctors who come out of medical colleges can have diseases but the doctors who are realised Souls don't have any diseases. Christ cured people. He had no diseases.

So you have to then learn how to use this Divine Power, not only for curing but by this you give them their spiritual joy of their self, their being which is so limitless and so great that without that happening, I don't see how you can save this mad humanity.

They are just preparing now today, I heard, this MX [missile] they are now building. Now these Russians will put up something else. I mean, madness, absolute madness. See, think of a generation like that which is just set down to finish each other. I mean, to Me, you see, I am such a lay person in worldly ways that I am amazed. What's the matter with these peoples wasting all their money, time, everything, to kill each other? But it happens because just now they have not realised that they are the part and parcel of one being; they are the cells of one personality. Once they become aware of it that they are collectively conscious then all these problems and war will finish off. I once went to a village in India where a big leader had come and he called Me because in India they respect Me as a saint. He called Me just to attend his lecture.

And he was a Speaker of Bombay [Mumbai] Assembly. And what he said that we have a big problem in our country that we have caste system and by caste system, we really torture each other and it's a very wrong thing to have a caste system.

So he asked Me, “Mother, how by Self-realisation, how can you get over caste system"? I said, “Very simple." Because you get your caste, because you are born in a particular caste, all right? Or in a country like we are born in England so we are English. You could have been born in India. You could have been born anywhere. But wherever you are born, you become that. But after realisation where are you born? You are born in the Kingdom of God, where there is no custom or there is no problem of having a caste or any such custom of calling you by your nation or anything. You are born in a nation which is a universal nation, where there is nothing like caste system, nothing like England and nothing like India.

You are all born as yogis, as the people who are realised Souls. All your differences finish off. What is the difference left, then, because you have no caste system left, you have no national identification, you have no identification whatsoever? On the contrary, all your identifications becomes one with righteousness, with virtue.

You don't have any problem being virtuous because your virtues that are within you are enlightened.

Virtues that have been told, don't do that and don't do that, you don't have to tell them. It just gets enlightened. And the real true virtues which are eternal virtues just get enlightened within you and you just don't do things

which are not right. And it's such a tremendous act that takes place within you that you are amazed at yourself. Oh, is it me? But you are that beautiful. God has made you so beautiful. He has made you a human being, a special human being and also a more special human being because you are a seeker.

William Blake calls them the “Men of God." Men of God are the people who are seekers. Whatever mistakes they are doing, whatever they are doing, they are Men of God. They are special people who are seekers of God. And such seekers of God are special people of special category and what he says, he has described Sahaja Yoga hundred years back. He was a great seer of England, a very great seer. He said that men of God will become prophets and they will have power to make others prophets. And that's what exactly Sahaja Yoga is. I mean, he is so great; the amount of things he has seen about Sahaja Yoga is so great that one can't understand such a seer to see these things hundred years back.

We had one like that, Mārkandeya, about 14,000 years back. And I wonder it was the same personality was born in England about hundred years back to see clearly, even the places and things they have described. It's so wonderful that one can't imagine how he has been able to talk about it and what he said ultimately that one day England has to become Jerusalem. That's what it is. It has to become.

And that's how, somehow My husband got elected to this post and I came down to England and we are working here in England very well. And it's the right of English people to get what they deserve, to get their position, to

get their position in the kingdom of God, because as William Blake has said it also, all the sages in India believe that England is the heart of the universe, is a very important place. One has to work hard, of course. English people rather difficult, you see, to break them because they are rightly skeptical. I'm very happy that they are that way. Otherwise, there would have been all the horrible Gurus who have gone to America would have been settled here. Thank God they are not here.

But Americans are simple people, you see. They just accepted all those. “All right, welcome, welcome." You see, anybody having any extra qualities, whether they are Satanic or doesn't matter but, “Come along, come along” you see.

So all of them have gone and settled down there. But whatever it is, I have found that in England it has to work out. Of course, India is a place, as you know, spiritually very endowed, no doubt and that may be one of the reasons why English went to India and they had such an adherence to India. And now I find that fervor is still there and this special place is this small-looking country which is like a heart in the body but can do great things and I am happy that we could extend our activities from Brighton to Lewes and further on if we can move it. We have to give it to every seeker of England and till I live, I want that all seekers of England should get what they deserve.

May God bless you.

You see, in such a short time I can't tell you everything about Sahaja Yoga. As you know, it's such a vast subject and a new chapter of knowledge opens now which is the

knowledge of the roots, while you have the knowledge of the tree. But this is the knowledge of the roots.

So you have to keep your mind open and gradually learn all about it, which is very simple, but unless and until you get your realisation, you better not try to understand it through your mental process because mental process can take you up to a point but will not allow you to enter inside.

So better see for yourself what it is and then try to understand how to work it out.

It's all your own; it's your properties, your wealth, your glory. And that's all you have to know. What I just do is to tell you how to turn the key.

Now if you have any questions, you better ask Me. But like today somebody asked Me something irrelevant, long questions. It was such a waste of time.

So we must have something of a sense, a proportion what to ask and to give chance to others also to ask some questions. It's not only one person asking all the questions; won't be a good idea.

So I would request you if you have any questions, you can ask Me and then we can have the session of realisation. That would be a good idea.

Question: Does the experience you describe end all suffering?

Shri Mataji: Of course it does. No doubt. That's what it is. Absolutely, it does. And also don't believe that you have to suffer for it now. That's over, absolutely over. You don't have to suffer anymore.

That's a wrong idea, I don't know from where it has trickled down. Christ has already suffered for us, isn't it? You don't have to suffer. It ends up all your sufferings. No doubt. Kṛiṣhṇa has said it, “Yogakshemam vahāmyaham” means when you get Yoga, when you get your realisation, when you become united with the Divine, Kshema comes to you. I give you the Kshema. Kshema means the well-being, all kinds. You'll be surprised; even materially you are helped. Materially you are helped. Surprising! It works out. But I mean, you don't become Mister Ford. Of course, that's a headache! That's no help. But you become sufficiently, happily, settled down personality as far as material side is concerned.

Question: *[UNCLEAR* is it for everyone/is there enough to go round for everybody?]

Shri Mataji: Should be. It's for everyone, My child, but the world is so funny. They don't want real things, you see. That's the problem. We live with artificiality so much that we are more attached to artificiality than to reality. You'll be amazed. Look at these Gurus! One fellow wanted fifty-nine Rolls-Royce, you know, from his disciples, from England. He had already got fifty-eight but they starved themselves, ate potatoes, did all kinds of things and got one Rolls-Royce for him. And then the fellow came in to take the Rolls-Royce. And when Sahaja Yogis went and talked to them that, “Why should you give your Guru a Rolls-Royce? How can he take anything from you? How can you? If it is God's work you can't take any money from anyone, can you? Can you pay for God's work, for God's Love?" But they said, “No, this is very important because we just give him metal; he gives us spirit." Can

you imagine! Can you exchange metal for spirit? And spirit, what he gives is nothing but mesmerism. But they did it.

You can't understand these people when they are mesmerized.

There is one Guru who has got now six, I don't know how to say crore. Gavin, how much is it? Six thousand crores of rupees. It is a very, very big amount. What is it, Gavin? To calculate it is also difficult.

And he has got a air strip and he has got four aeroplanes. There is another one who has run away from India, nicely went to America. The Americans are such fools. They gave him twenty-three Rolls-Royces and three aeroplanes! And I went to Houston and one lady came and shouted at Me, “You don't come here, you Indian Gurus." I said, “Why, what's the matter?" She said, “This fellow” she took his name, “He has taken forty thousand dollars from me and this one." I said, “I have not taken any pie from you.

Why are you shouting at Me? Why did you go and pay him?" “Oh! He said he'll give me God." I said, “Then you got it. This is it. What can I do about it, you see?" Everyone should get it. That's a good idea. It's a very good thought, very good thought that everyone should get it. Why not? But they don't want it. You have freedom.

We went to the University today, Sussex University. They were hardly seven or eight boys altogether, all were playing outside those, I don't know what it is called, as those, what is it called, gambling, they were gambling in the next room. You see, they want to wile away their

time in gambling. Now, what can you do? How can you talk? And I know in that University there are many seekers but they think by gambling they will find God. What can you do about it? But I am happy about Lewes.

So many people are here.

So beautiful. Yes, My child? Question: I didn't really understand how long ago did this particular philosophy was available, came into being and how is it different from the more ancient concepts. How is it different from the older Yoga?

Shri Mataji: Oh! It is absolutely traditional. It's absolutely traditional. It is so ancient. This Sahaja Yoga is as ancient as anything else. It was fourteen thousand years back also there was this Mārkandeya was born. He has talked about it. Sahaja Yoga is the most ancient thing. But we had three types of movements in the seeking, all right, in India.

And now the Haṭha Yoga that you call, is also a nothing but Sahaja Yoga because in that we have got Ashtangas. There are eight things that you have to do. And in the Patanjali Shāstra which is the real origin of all the Yogas you do this today, there are eightfold paths. I mean, eight things you have to do, out of which the first and the foremost thing is Īshwara Pranidhana, means the establishment of God within you. Īshwara Pranidhana. And the thing we do these days, you see, so-called Yoga, standing on your head business, is one third of the eighth part when the yama niyama, when the discipline of the students is of a particular type. Means when at that time when they were practicing Haṭha Yoga in the traditional way, the whole system in India was like this that the

children would live with the parents up to five years of age. After that they would go to their Guru who was a realised Soul to that university and that university was called as the Gotra. For example, My Gotra is Shandilya. Now I cannot marry a man who is from the same Gotra, from the university. Even today when nobody has any university any more, they do not exist.

So that Guru was Shandilya, was the Guru of My, so many forefathers. You see, he lived about fifteen thousand years back.

Now his, I mean, we are supposed to be the members of that university. We cannot marry in the same university, means such a celibate life they lead, you see.

So that was called yama niyama, means those were the laws of those universities where people had to lead a life of complete celibacy and complete purity and the children of that university or students of that University were brothers and sisters, all right. And then the first thing when they had to do anything towards God they had to do Īshwara Pranidhana, means giving them realisation. And that was done by Sahaja, means spontaneous method. Sahaja means born with you. It is born with you spontaneously.

So it's the most traditional thing is to give realisation with this. The first one we read in the books about this is, of course, is the Indra. Indra was the king of all the Gods. And he got his realisation sixteen thousand years back according to the historical, I mean, calculations they have, but later on at the time of Rāma, his father, in-law, Sītā's father, gave realisation to one person called Nachiketa.

So, I mean, very few people got it, though, but the whole attitude of Indian life is that you have to take your Self-realisation. That is, should be the basic of your life. Everything depends on that.

So their music is based on that, their art is based on that, their clothes are based on that. Their whole pattern is based, by which you lead a balanced life to have the ascent of Self-realisation. But ascent is only achieved through Sahaja, means spontaneous, but is done by a Guru who is a realised Soul.

It's the most traditional thing, but how it was kept a secret because there were very few realised Souls.

So this third path, we call the central path of evolution, was not so much talked about. Though Mārkandeya, fourteen thousand years back, has talked about Kuṇḍalinī, about Self-realisation, but how it works out, they did not know. They kept it like a secret but we had another movement in which, according to Vedas, they tried to initiate or, we can call it, to awaken the nature. That one was done on the Veda side but Veda itself, Veda means to know.

Even I was happy to know that the motto of your university is what to be still and to know. It's Sahaja; is Sahaja. Now to know, know, means what? Know means that you should have the knowledge of the spirit in your central nervous system. The first, first sentence of the Veda is that by reading all these Vedas, if you do not know, then it is all useless. The first declaration is so clear-cut.

So the Vedas were used to awaken the nature. The result of this is the science today that we know about, how to

use the powers of nature of the five elements. And the another side was, what we call the left side movement, was that people were spending their time in Bhakti , in devotion.

So we had two types of movements, one towards discovering the nature's powers and empowering them and the another one by which to ask God to bless. But the third one was this giving Self-realisation. And which was extremely done with very great care and understanding of human beings. But today, it has become a mass thing; it has to be. After some time everything has to be for the utility of the masses.

For example, when electricity was developed, people didn't know much about it. Only few people knew how to do it. But when it became all right for masses to know, they had to tell the masses. If the people do not know about it, what's the use of discovering it? It's the most traditional thing, but only difference is today, many can take advantage of it. All right? Not in India, everywhere. Not only in India, everywhere. If you read Tao, same thing. Lao Tze has said the same thing. Zen is just the same thing. I mean, anything is the same that you have to become realised Soul.

You might say Moses didn't talk about it because Moses first wanted people to balance. You see, that was the stage for them to develop a balance in life.

So he talked about balancing. But Christ talked about it because he came for the ascent. Like every tree grows from the roots, then you get the leaves and then ultimately you reach to the stage of flowers. In the same way the growth of our evolution has been brought forth

by these great prophets who came on this earth, incarnations who came to this earth and gradually they built it up on these centers and you will realise that the first center is the center where we really became living things because that's the carbon where it was introduced into the chemistry and when the carbon came in, the life came in.

So the first center represents the carbon stage and then gradually every stage represents our higher awareness and higher awareness, till we reach this stage where you become a human being. But when it opens out, you become the ultimate, the absolute.

That was a good question. Any other question, please? It's all related; again I'll say that Sahaja Yoga is very much related to Haṭha Yoga. `Ha' and `Tha' means these two channels that we show here. `Ha' is the Sūrya Nāḍī, means the one which is the channel for our activity and the second one is the `Tha', is the one which is for our emotions. We use both these channels. But we know exactly what to use where.

For example, now, somebody is bending forwards and bending backwards; is not correct, because there are people of different temperaments.

For example, a person who suffers, say, from inferiority complex should never bend forward; all exercises should be done backwards. The one who has got ego should bend forward. You see, there is discrimination.

What we do in our Yoga system is that indiscriminately we take all the medicines, whether we are suffering from the stomach or trouble or any other trouble. We have to find out what exactly is wrong with us.

Once you find out the obstruction then you will know which asana you have to do, which exercise you have to do, how to raise the Kuṇḍalinī, how to remove the obstruction. Now, for example, I found out that so many of these diseases are caused by the disturbance of the first Chakra.

So many of these, even mellitus and Parkinson's and all these things, are caused by the disturbance of the first Chakra. Now if you don't do the exercise of the first Chakra, what's the use? You cannot help yourself.

So you must also know what exercise is to be done, what...

Put our steering on one side, God knows where we would have arrived! So when you start the Kuṇḍalinī, you know where to stop it, what to do it, how to raise it, what is the problem, at what center you have to do what. All right? So this is a thing you should see for yourself. Not just to follow something, stand on your head, do this exercise. You can land up with great difficulties, into great problems. We have seen people getting terrible problems with this Haṭha Yoga also, because they are just doing it without understanding anything. That's why I say that you must have the knowledge of the roots first.

Now, any other question, please? You can't even think. That's what has happened to some of you. Don't worry; that happens. Why it happens, I'll tell you later on but it happens; you just can't think, gone beyond thinking. When the Kuṇḍalinī rises above this center, this is the center of Christ, you can't think. You just can't think.

Even if you want to, you're just beyond thinking. And then when it breaks through, you see, then you just start

feeling it in the hands also. And then the power of your own spirit manifests. It's not My power or anybody's power; it's your own. You must feel your own power and not somebody else's power.

It's really fantastic, that's what you are feeling. It is because you are fantastic; you don't know what you are. Like a television set, you take to a villager and you say, “Now, just wait and you'll see all kinds of plays here and you'll hear all kinds of things” and they'll say, “Are you mad? This box, how can it do it?" You just put on the switch and it works out because all built in there. You are that fantastic. Only the switch has to be put on.

We can't believe ourselves, you see, because we really don't know how great we are. Actually, in Sahaja Yoga you are not allowed to feel guilty at all. Anyone of you are feeling guilty, please say in your hearts ten times that, `I am not guilty, I am not guilty, I am not guilty.' You are not to degrade yourself at all because here you have come to know that you are the temple of God. No, it doesn't mean that you know only through this but actually it happens to you. All right? Should we have the experience? Any questions now left? Let's start. We'll try. Now it's very simple. What you have to do is to take out your shoes as you have very kindly taken it out. Now, why? Because the Mother Earth helps us, you see. We have to take help from the Mother Earth.

Put both the feet on the ground just like that, like that, not very close but little, little further like that and both the hands like this, spread out but on your lap and be comfortable. You have to be comfortable but don't put

them like this or don't put them like that; just put them straight like this, just like this.

And please take out your spectacles because it will help your eyesight also. Now just now don't worry about anything. Everything is fine.

Now put your attention into complete freedom, in the sense don't try to hold it or put it in one place or pierce it through another. Just leave it alone. You see, some people have the habit of putting the attention to this and that, nothing. You just put both the hands on your lap, comfortably spreading the fingers like this. Open out, not like that. Open out and just close your eyes. Please don't open your eyes till I tell you, because when Kuṇḍalinī rises, when she pierces through this Āgñyā Chakra, as I told you that of Christ, the dilatation of the pupils takes place and if your eyes are not closed, it may not rise.

So better keep it closed till I tell you. Just keep it closed. Just put both the hands clearly like this.

Once this happens to you, you can enlighten another person because you get the power to enlighten other people. You can cure other people. You can give them realisation. But first, you must become capable. There is nothing to be afraid of. Keep your eyes shut completely.

As I told you before, you have to say in your heart that, `Mother, I am not guilty.' That's very important to begin with. Now at this juncture, you have to say in your heart, sincerely that, `Mother, I forgive everyone.' You must forgive everyone. That's very important because when you say that it is difficult, you must know that by not forgiving, you are playing into the hands of the people who have troubled you. You must learn. You must say,

`Mother, I forgive everyone.' Is very important. Forgiveness is the greatest weapon we have got, but say it sincerely from your heart that, `Mother, I forgive everyone.' Now as I said that you are the spirit. You are the spirit and you have to become that means your attention must be enlightened by the spirit.

So you may ask a question, putting your right hand on your heart, where the spirit resides, on your heart. You ask a question, `Mother, am I the Spirit?' You are, I'd say. You are. But you may ask a question if you are not confident about it.

Now the spirit within us is our Master. He is our Guru. He is the one who guides us. When the spirit starts shining in our attention, we become collectively conscious. By that our awareness becomes enlightened and the spirit in our heart guides us.

So we can put down this hand on the stomach, on the left hand side, on the stomach and we can ask another question, `Mother, am I my own master?', `Am I my own Guru?' You have to ask ten times. Which you are, you are your master if you become the spirit and the spirit is the reflection of God Almighty within us. It's a collective being within us.

Now you can put back the same hand again on the heart, left hand on the heart and very confidently you please say twelve times, `Mother, I am the spirit,' ten times. Now you put the right hand across on your neck on the left hand side again. As the spirit cannot commit any mistakes or cannot be guilty, say sixteen times positively that, `Mother, I am not guilty.' Put the hand on the left hand side. There's a center there which gets out of order,

left hand side on the neck where, when you feel guilty, this center goes out of order.

So you have to just say, `Mother, I am not guilty.' On the base of the neck, just base of the neck, just press it hard. You'll find it's quite hard for all of you because it's a fashion to feel guilty these days. What are you feeling guilty about? You see, here I am talking to you about God who is the ocean of love, who is the ocean of compassion and of forgiveness. What mistakes can we commit in His presence or against Him that He cannot forgive us? Sixteen times, please say.

Now put the right hand across your forehead, just across your forehead. Now here on your forehead, please. Put it on your forehead and you have to just say, `Mother, I forgive everyone.' This you have to say very sincerely. Only twice if you say it will work out. Just say twice, `Mother, I forgive everyone.' Just say that and it will work out. Just say that. Better. Much better now.

Now put this hand on top of your head, specially the palm touching the area which we call the fontanelle bone area or the soft bone you had in childhood and just rub it softly in a clockwise manner. Just move it, your head in a clockwise manner, little bit. Now at this point I cannot cross your freedom. You have to say, `Mother, I want my Self-realisation.' You have to say it. If you don't ask for it, I cannot force it on you. You have to say, `Mother, I want my realisation. Please give me realisation.' Whichever way you want to say, you can say that and then it will work out. You have to say it seven times. Why numbers, I'll tell you later on but just say seven times, `Please give me my realisation, Mother,' or, `I want my realisation,

Mother. Definitely, I want it.' Now you just see if you are feeling any heat or Cool Breeze coming out of your head there; just see.

If this hand is tired, you can use the other hand, putting right hand towards Me. Just lift your hand a little, about four inches higher than your head, four inches higher. See if there is a Cool Breeze coming.

Move another hand. Whichever hand you try, put one hand towards Me. Don't open your eyes. See now if you are feeling. Little bit higher. You have to have it about four inches higher, not very high, about four inches higher.

Are you? Good, good. Everybody will feel it but be patient with yourself. Not so high, just about four inches across the head like that. Just try like that, I think. You can change your hand if you want, if you are tired, but if you are getting in your head, on your head, I mean out of your head, I should say, then you can put your hands towards Me.

Don't be serious; there is nothing to be serious. It's just, now put both the hands towards Me when you feel there is a Cool Breeze coming out. Now it has to come out of you, in your hands also. This is the first time you feel this All-pervading Power, about which people have told, for the first time. You can ask a question. Ask a question, `Mother, is this the power of the Holy Ghost?' or `Is this the All-pervading Power of God?' In Sanskrit language, this power is called as Brahma Shakti. First thing it will happen will be that you will find there is no thought in your mind. Secondly, you'll feel extremely relaxed. Keep your eyes shut and don't think. If you are not sure, then

there are Sahaja Yogis who can help you. Those who are not sure can raise their hands and the Sahaja Yogis can help them, if you are not sure. That's it; just help him. Yes, just help him. You got it? Good. Great.

[Shri Mataji asks individuals whether they felt the Cool Breeze and she asks the senior Sahaja Yogis to help the newcomers with their respective Kuṇḍalinī status.] Yeah, it's great. Just enjoy. Are you all right now? Good.

Who else is not feeling it? There, can you come this side? Anyone up there who is not feeling it? You can come on the sides, you see. It's better to come on the sides. He's got it! You've got it, My child.

You've got it.

What about you? Daniel, just try this lady. Jyothi, you try, try this lady. She's got it. Great. What about this gentleman? Just got. Little Kingsley, can you see this gentleman? What did he say? Has he got it? What about this one? No? No, raise it. It's left to the right. Put him left to the right. He'll be all right. All right? Not so sure? He is not sure but what about you? Ask him to put his hand on his liver, this gentleman. Put him left to the right. Are you feeling it now? All right, open your eyes. Watch Me without thinking. Let's see. Just watch Me without thinking.

Put him left to the right. Anne, just try this lady. Has she got it? She has got it. Let her put her hand on the head. Hot, hot still. Left hand, left hand would be better. Left to the right. Now is he? Better, little less raise it I think, raising will help. Raise his Kuṇḍalinī. Tell them how to raise it also, those who have come. She felt it? No?

What's she saying? She felt it. These both have got it. It should work out.

Put her right to the left. Pedro, put her right to the left.

Seeker: *[UNCLEAR]*.

Shri Mataji: In the head? What about you? Can you release your neck a little bit?

Seeker: *[UNCLEAR]*.

Shri Mataji: Warm, all right. Doesn't matter. Left to the right you put it. What about him? Both! This one gentleman. Gavin, just see this gentleman, this one, this one here, this one. All right? Viśhuddhi, Viśhuddhi is there. You put your bandhan there on the Viśhuddhi. Better now? Are you? Good, good.

It will work out. That's Pedro from very far off who has come to help you here, isn't it. All right? She is good. She is good.

What about the lady who asked about the sufferings? She got it? Where is she? Has she got realisation? Did she get realisation? Nick, that's the one. She felt it in the hands?

Sahaja Yogi: Earlier on she felt it. She felt it earlier on, just not on her hands.

Shri Mataji: Mm, she's got it. Neck! Put your hand, I think. *[UNCLEAR]*. Just the neck. Just put your hand. There's a problem on your neck. Have you been smoking or something? What about you? She is, she has felt it. What's the problem? It should be only Viśhuddhi. Simple Viśhuddhi is there. Just put your hand. You see, these days it has been raining so that everybody got this trouble in the throat, I tell you. That's why they are not feeling it. You all have cold, isn't it? Throat trouble. In

Sahaja Yoga you have to wear an undershirt always, all right? Now, now better? Better. Gavin, let him feel it on his head, at least first of all. It is flowing quite a lot.

Hello, Olympia [Brown]. Come, come, come.

Olympia: I've got a biscuit.

Shri Mataji: Ah, now you eat it. I don't eat biscuits. I just eat *[UNCLEAR]* all right? See now they'll take your photograph. Now you are eating a biscuit it will show in the photograph. A big thing showing from here your biscuit now in the photograph. Nice place. Like it? Carol [Sahaja Yogini]: What can we give them to take away? Can we give them a photograph of you? The people here tonight.

Shri Mataji: Those who have felt the Cool Breeze can give them. The things that you have painted is all right. But those who have felt. But those who haven't felt don't give them, all right? *[UNCLEAR]*.

You've done this! *[UNCLEAR]*. Very good.

Where is your mother? She hasn't come. Why? Father? Carol: They've got people staying. [She explains why her parents can't come.]

Shri Mataji: It's all right. But they like this boy very much, did they? *[UNCLEAR]*.

Carol: They're delighted. They're so happy.

Shri Mataji: All right. That's all I wanted to find out. May God bless you. I'm very happy.

Carol: We're getting married in church on the eleventh of June at 3 p.m.

Shri Mataji: I won't be there. I'm sorry. May God bless you.

This is Carol. She is getting married. She's getting married to someone. He's there, you see. His name is, I've forgotten his name. He's from Portugal. Petro, yes. You know everybody's name, Petro.

Olympia: What's that?

Shri Mataji: It's water. You want it? Want more? Want more? Come along. Have it. All right? Olympia: Thank you, Mother.

Shri Mataji: Thank you, Olympia, for giving Me this. This one also, thank you, thank you. Bye.

All their fingers catching, is it? They are catching on all these fingers? Now what is it? Is he all right? No. He's a great seeker. You must give him. He's feeling? Feet? The hands are because of the Viśhuddhi.

What's the problem with the Viśhuddhi? He has some problem? Feet, he is feeling! Yes, I think so. What about you? Are you feeling anything? Madam, are you? A Cool Breeze? New

Sahaja Yogini: I have a lot of pain in my neck.

Shri Mataji: You have a problem on your spine? New

Sahaja Yogini: Not that I know.

Sahaja Yogini: She has a pain in her neck.

Shri Mataji: You do get. Can you come here? Can you sit before Me? Spread your legs. Just sit down facing that side. All right, sit down on the ground facing that side. I mean, spread your legs that way. Just sit comfortably, all right? You are sitting with your Mother; so don't have any formality. Can you take out this one for Me? What's it? I'll have to fix it up, I think; his also. Is he feeling? Āgñyā.

Turn him. Ask him to watch Me. There's Āgñyā.

What's she say?

Sahaja Yogini: She says, “I must come to Mother."

Shri Mataji: Now she's all right, isn't she? Ah! What's it? Better? Better now? In this country, must always have something, you see, around your neck. It's a funny weather here. It just pierces through your bones and hurts you there. See now, here it is. It's so strong; it's the obstruction. Still not there? Now where is it? Here you get the pain? New

Sahaja Yogini: I felt as if perhaps I was going to have the mumps.

Shri Mataji: Now will you please say that, `Mother, I am not guilty.' Just say that. [Shri Mataji gets the Yogini to say the afirmation seven times.] All right? Better now? That's it. That's the pain you have, of feeling guilty for nothing at all, that's all artificial. It's better. Better now. Much better? All right. Now can you leave your neck a little loose, absolutely loose, you see, into My hands? Just leave it loose. No, it's not loose at all. Just leave it. Not loose at all. Just leave it loose. No, no it's not loose. I have to break it a little. It doesn't matter now. I have done it now. It's better now? All right? What about him? Are you all right? Good. Got it. This lady? Good. Very good. What about the lady who asked Me a question? She got it? You got it? Did you feel the Cool Breeze? Did you? You felt it? New

Sahaja Yogini: Don't know but how *[UNCLEAR]*.

Shri Mataji: No, that's different but did you feel it or not? If you felt, unless and until you use it how will you know? But did you feel it? New

Sahaja Yogini: I think it's there.

Shri Mataji: Sure? I am not very sure. I am not really sure that you felt it. Did you feel it or not, is the point. Not the Cool Breeze. She's catching on the Sahasrāra. She's still catching on the Sahasrāra.

They are giving bandhans. Better now, madam. Vibrated, isn't it? Better now. Feeling better. I'll put it right. You are better now, much better. Little bit. She is much better now, left Viśhuddhi is much, are you better now? New

Sahaja Yogini: Yes, thank you.

Shri Mataji: Now you turn your neck. Let's see how far you can go. Good. Not paining now? At all? That's good. Now may God bless you. It's your own. Why are you thanking Me? For what? May God bless you. Be careful. I think you should put this. That's a cross?

Sahaja Yogini: It's an Om.

Shri Mataji: Om Better put it in the water for some time. All right?

Sahaja Yogini: Really?

Shri Mataji: Is important. Then I'll tell you what is to be done. Just put it in the water for seven days.

Sahaja Yogini: I feel really hot; got a headache.

Shri Mataji: Got a headache. Don't think about it, all right? Just don't think. Now just ask the question, `Mother, are you in my head?' Ask the question seven times. Better?

Sahaja Yogini: A bit.

Shri Mataji: Just say that again that, `Mother, you are in my head.' Ask Me the question seven times. Ah, released? It's feeling in the hand also you are. You are

feeling in the hands, aren't you? Yes, it's there, right! You're released! You shouldn't doubt you will get a headache. You were doubting? What is there to doubt? I am not wanting anything. I have come to give you something all right. You shouldn't doubt. If you doubt you will get a headache. Ah, better? Finished! Done. You are there. Now try to think. Let's think. You're lost. That's it, all right? Now don't doubt *[UNCLEAR]*. It might create little problem. May God bless you.

Now what's the matter, Simon? Left Heart.

Simon: No, center Heart, Mother.

Shri Mataji: Just come here for one minute. Now you turn round. Sit down with your feet straight.

Can I see? One, two, three, four, five, six, seven, eight, nine, ten, eleven, twelve, thirteen, fourteen, fifteen, sixteen. All right? May God bless you. Good, now who else is not getting? All right, come along. Center heart? Viśhuddhi. All right come along, come along, come here. Now relax. Sit down. Take out your coat, if you don't mind. Can you take out? Yes, please, if you don't mind.

Sit down facing that side. All right, be comfortable. Don't worry. Push your neck now. Hold your breath.

Hold your breath please. Now leave it. Hold your breath. Leave it. Again hold your breath. Now leave it.

Now in Sahaja Yoga you have to wear an undershirt all right, always. Better now. Now try to again hold your breath *[UNCLEAR]* like that. Now leave it, much better. Hmm. Very bad center Heart, very bad left Viśhuddhi. Now don't feel guilty. Just don't feel guilty. How are you feeling now? Better? Is she all right?

Contents: 1983-05-26 **Śhrī Buddha Pūjā, Brighton Center, Brighton, UK**

This time in there was no rain; we went to the sea in Melbourne. I told it will be great we go to Melbourne and we went to the sea and I made a Gaṇeśha and they made a Shiva there and they worshipped the...

so and they made a Kuṇḍalinī also there.

And see then they prayed and it rained and rained and rained. It poured you know, poured in buckets, poured in buckets. It was, I have never seen such rain before like buckets were pouring. And in one day four inches of rain in that Sydney, can you believe it! And the Pūjā was on inside and outside on My birthday buckets and buckets of water. It was a drought you know, they were so frightened.

Sahaja Yogi: We heard that the whole tent fell, Mother... [Shri Mataji laughs.]

Sahaja Yogi:... because of so much rain, Robert was telling us, Mother.

Shri Mataji: And you see the Sahaja Yogis enjoyed it so much, you see, they... how they have played a trick. And then the river got flooded and it entered into all the pubs and all such and washed off everything you know, brought it you see. As it went inside washed off the bottles and everything and all the bottles, some of the empty ones, you see, were floating, these plastic ones were floating and others sank down everything was washed up and was brought in. But only into the pubs they entered.

So in the newspaper was said that the rain was tremendous but the river was very discreet. And also this fire that broke out before I went to Adelaide. Adelaide had a very bad fire and what they described it was this...

[Aside:] can you put it there this one... on top of that like that.

... and they described that the fire was also very discreet and the balls of fire they saw rising on the hills and entering to some houses, avoiding some houses.

Some houses were completely burnt and some were not. And those people who did not suffer came to My program, said now we know why we were saved out of that.

And they could see the balls can you imagine, the balls of fire from somewhere, I mean, they don't know how the balls were formed. A big big balls like these, you see, were just rolling up the hill. And they could see, you see, balls rolling up the hill and going up, entering into the houses like that. They just could not understand what happened with the fire? But the best was the washing of the pubs because normally on the river side they have all these pubs you see [laughing] and they washed off all these what you call things used for, these tanning things. See they have those mattresses, sun mattresses and all that.

All everything was washed and brought inside [laughing]. I really enjoyed it very much and Sahaja Yogis were so happy with all that, very happy.

Sahaja Yogi: Jai!

Shri Mataji: They asked Me a question, why God is angry with us you see here in Adelaide. And Adelaide is just like Paris for Australia, just like Paris. Very promiscuous, all kinds of dirty things happen there, all sorts of horrid things take place there.

So like Soho it is, you see.

So it was Adelaide was chosen by fire, just burnt them off.

When I went to see the hills where it started, all black, all black hills, nothing was there, nothing.

No leaf, not a single leaf. And it was really surprising: this house was burnt, that was not burnt, this house was burnt, that was not burnt. You could see it so clearly. And when it was burnt, it was burnt completely. I don't know how they burnt even the bricks and everything, absolutely charred black.

It's very interesting the way sometimes the nature takes its respite. Like when I went once to Guntur, you see, I told these people that you shouldn't grow any tobacco there anymore. They were exporting all that tobacco to England, can you imagine! And they had, in the house you could find all English tiles and English... what you call, these old style big showers, you see such big big showers you see, *[UNCLEAR]* stand then the whole thing gets absolutely, like a torrential rain falls on you. All English. And tubs they had, English tubs, everything, in the house. Exporting that tobacco here, you see.

So I said, “You shouldn't do that, you should not have done it." So they said, “But you know Mother, we are giving it to English, not to Indians." I said, “Still you should not have done it. It's a wrong thing." [Aside to a

Sahaja Yogi:] Gavin, you are doing the same mistake as I have done, I think. Alright, it's correct. It's correct. You are...

So then what happened that I told, just I told them, if you grow like this it's not good. And whether they are English or Indians you are committing sins. You should not do like that, why you are growing this. I said you can grow very good what you call cotton here, like just like Egyptian cotton you can grow here, why do you want to do.

Some people took Me seriously and some of them got very angry. When I had gone there about fifty cars came to receive Me, but when I was going, hardly two or three people came to see Me because they were angry for it. I said now, I warned them that if you go about like this the sea is just next door and it will take a respite. It is going to be angry with you, listen to Me. And they were so angry with Me they didn't come to see Me off or anything because I told them.

Now what happens that, that same year there was a typhoon which entered into them which has never entered there. And all that was devastated. All their crops were devastated. They can no more grow, no more grow tobacco there. And in the meanwhile the government of UK stopped the import of tobacco from that place.

So it was doubly hit you see, doubly hit. But those who started growing the cotton were perfectly alright. Because all the salty water went into the soil and now they can't grow this thing. And they said they never had this kind of an experience. After that they came to Delhi

and asked Me, “Mother, You must again come, we are sorry for what we have done." And I said: “No, I didn't do anything, to be very frank. I'd never thought of any destruction." But you brought it as I told you that the sea will get angry. But they said, “It happened so quickly, Mother" [laughs]. I said not so quick because at least there were eight months for you to change your ways. Imagine! Just to export this tobacco's to you and get those tubs there.

You know, they have a kind of a inferiority complex, that if they live like English having tubs and things like that, then they become something higher personality. But for that to sell tobacco to you, just imagine. It's all showing up now, you will see that. Everything that I am saying will be showing up.

I was happy to learn that there has been a program about these horrible diseases which are caused by this promiscuous life and all that. I am very happy. Let people learn now. They used to make fun of Me and say that I am Victorian, this, that. Now let them learn what it means. Now everybody is quite alert.

In... You were telling Me, I think she told Me that in England there are ten thousand people who are suffering from this disease, can you believe it. Ten thousand people. And they used to call Me Victorian.

[Talking to Sahaja Yogis:] Gavin has arrived? Where? Just I say that hundred years life is, come along. You are also giving a Pūjā thing, you know, here. You can take that paper out. Now I think we should spread some other cloths here, some sort of a old towel or something or put one of the towel there, so that this portion is kept clean.

Sahaja Yogi: There's some water for you.

Shri Mataji: Thank you.

I didn't give you a silver thāli Gavin, isn't it? I must have given it to some other center, I don't know.

From that same shop where they were giving, you see, a hundred percent silver I bought silver for the Pūjā.

[UNCLEAR].

So all of them are here. Has Jane came? Has she arrived? No. Where is she?

Sahaja Yogi: She's still outside.

Shri Mataji: Alright. Call all of them inside. You can move forward a little bit I think, but why not spread here something just to...

Sahaja Yogi: She's just coming, Mother.

Shri Mataji: Did you see those lines, energy lines, eh? Just imagine. Eh? Zodiac lines? These are energy lines making the zodiac?

Sahaja Yogi: Yes.

Shri Mataji: I did not know that, I thought...

So what are the zodiacs signs? Which ones are there?

Sahaja Yogi: All of the twelve signs.

Shri Mataji: All twelve are there, in a circle?

Sahaja Yogi: Yes.

Shri Mataji: And you discovered these by a magnet?

Sahaja Yogi: I think we've found a lot of it by dowsing.

Shri Mataji: By dowsing.

Sahaja Yogi: Yes. Just with the...

Shri Mataji: With that? Or they find it by magnet.

Sahaja Yogi: Or they find it also by tracing the old lines of the boundaries...

Shri Mataji: Boundaries of what?

Sahaja Yogi: Waterways and... the boundaries between the...

Shri Mataji: But actually you see, if you take a magnet yeah? It will dip at the point you see? So if you follow that dipping then it forms a line. That's the best scientific method.

Dowsing also the same thing is, it's what is the magnet, you see. And the magnet when it [makes gesture as a magnet being attracted towards the earth].

You see at certain points the magnetic lines are strong, that's magnetism is the essence of the Mother Earth in expression. I mean the fragrance is, but the fragrance has the magnet, the fragrance comes out of magnet.

Now, this magnetism of the Mother Earth goes in lines, you see, it doesn't move in... only at the fragrant point it moves all over. But otherwise it acts in lines. And these lines you can find out easily if you use a magnet you see, a powerful magnet, move that magnet on the Mother Earth you see, you will find that it will start dipping down. You see, you move it and you will find out it's not dipping there and then you move it that side in the line. It's the easiest way because dowsing could be bhootish sometimes, could be.

Sahaja Yogi: Yes.

Shri Mataji: But are you sure it is done with dowsing, or...

Sahaja Yogi: I think it's a combination of different things. The one who has written the book has been...

Shri Mataji: Using dowsing.

Sahaja Yogi: Using dowsing as well as the magnet.

Shri Mataji: But dowsing can be challenged by science.

Sahaja Yogini: The one in Glastonbury was also discovered by an aerial photograph.

Shri Mataji: They photographed how?

Sahaja Yogi: They can see the boundaries of the fields made a pattern, things like that.

Shri Mataji: Fields!

Sahaja Yogi: Yes, it's all the old boundaries between different...

Shri Mataji: Old ones.

Sahaja Yogi: Yes.

Sahaja Yogini: Fields and roads and waterways.

Shri Mataji: Unconscious must be building up that way. And the old people that lived were much more sensitive, much more reacting to unconscious.

Sahaja Yogi: Yes.

Shri Mataji: Because they were not so artificial, but when we become artificial what happens, we get covered up with so many barriers and we cannot, we are not sensitive to the dictates of the unconscious.

And when you cannot feel the dictates of the unconscious, you see you start having again deliberations as I call it. Deliberations take you out you see, from that sensitivity.

But if you are natural and simple person then you are quite sensitive, very sensitive...

[Aside:] You can move forward, I think you come forward now, just come forward, come forward. You can, come on, yes, you can come. Actually new people should be in front, those who are from Brighton.

Would be better idea. Come forward. The Brighton people should come forward I would say, as much as... Gavin, you come this side, I think would be better. Because he has to... Now. Come along, sit down, sit down, sit.

You can keep it that side. Who else is there? Is somebody still outside? Nick, if you can... on the other side of Nick also some people can sit. It is a very nice sunny day today, isn't it?

Sahaja Yogi: Would like this window opened slightly, Mother?

Shri Mataji: Which one? That's ok. I think that one if you open will be better idea.

Sahaja Yogi: It's open, Mother.

Shri Mataji: Is open, it's alright. [Long pause.] Today is a great day to come to Brighton because is the day of Buddha's birth, today is Buddha's birthday, Lord Buddha's birthday.

You all have heard about his birth and that his mother dreamt of an elephant, a large white elephant, before the birth of Buddha. And then it was predicted that a child will be born in your family, who will be either a great saint or a very great king.

As in Sanskrit called Chakravarti means the one who is the ruler of whole world.

So the father got worried and he thought he must get the son involved the into family life, into material life and give him all the pleasures of life.

So he built a very special place for him, beautiful palace to live in. And where he got him married to a girl called Yashodhara, was a very, very beautiful woman, gave him all the pleasures of life. Everything that he could do to entice this boy away from asceticism.

Also you know the story of his going one day on the road. How he found three types of people and how he felt that “why a person should become old? Why should person suffer in life? And why should people die?" So all these three things put an enquiry into himself. And he started trying to understand why these things happen to human beings. With this the enquiry started.

So he reached a point where he could not bear anymore the comforts and the, all the attachments that were entangled around him by his father.

He had a son whose name was Rahul and he left the son and the wife in the search of the truth. Now, he started from a wrong end I should say for the search of the truth, because he wanted to know why there are miseries in the human beings. And so he started from collective towards the center.

When we see miseries all around us, many people have seen; they say: “What about others? Will everybody get realisation? Will everybody will have this?", you see. This comes from the wrong end I feel, because first of all we must know: are we alright? Are we, are we perfect? Are we full of joy? Have we received the absolute knowledge? If you start from this point is always better. Because he

started from the wrong point, searching it from the collective to remove the miseries of the people, he had to go in a very roundabout way.

So he read all the books and Vedas and this. He went to big pundits, to all the great knowledgeable people to meet them, to ask them the answer: “Why there are these three things?", that is, the roga [sickness, disease] is the health or miserable physical body, then the death and the old age. Went and asked so many people and they said: “You have to die because you are born." And then they said that “You have to become old because you are born like that. And you have to suffer because you commit sins." He was not satisfied with this answer.

So he went on searching and searching and searching and then he got tired, absolutely fed up.

When he went to a place called Gaya, very near Patna it is, I have seen the place and the tree. And he sat under a Banyan tree where he slept off, because he got so tired of his seeking. And after the sleep he got up and suddenly he got his realisation. And he thought: “the whole drama is over." Now his mother herself was Ādi Shakti, gave him the birth and She died just after the birth of the child. And he got His realisation.

Now at that time, that he got his realisation, there was nobody to tell him what it is [smiles]. That what it means, realisation is. Nobody to decode or talk about anything that was to be understood by him. But because of his tremendous seeking and such ardent desire that the Shuddha Icchā, the Kuṇḍalinī itself, rose, but of course the Ādi Shakti blessed him and he got his realisation under the Banyan tree.

Now, any incarnation which came on this earth had to samayāchār, according to the time, the need of the time had to act, firstly. Secondly, the need of the incarnation to come on this earth was first created in the human beings.

So supposing at a time when there was too much of ritualism, Brahmanism or priesthood and people were trying to take everything onto those artificial rituals and all that, an incarnation had to come on this earth to correct those ideas.

Like Kṛiṣhṇa came at a time when he said: “This is all leelā” Pūjā and everything he cancelled. He said nothing doing, no Pūjā nothing. We just have rās, enjoy yourself. It's all a joke going on, you see.

So he brought that concept at that time in the awareness among the people that the whole world is a leelā, is a play of God's own whims.

So you just enjoy it.

And that's how he created this a wonderful festival of Holi which we had in Delhi. I don't know anyone of you who was there for the Holi. No. You were there? [Smiles.]

Sahaja Yogi: Two years back.

Shri Mataji: No, but this time you were not there. Alright. You might get the pictures of that.

Alright.

So, in the same way, when Buddha came in, first problem was that he thought that is better not to talk about God. Because in his search everybody told him the answer was “Oh! It is God who does it. He punishes you. It is God who gives you this old age. It is God who does it." “But

what is this God after all? Why does he do it?" They said: “You better ask the God." “I mean, where is the God?" So everybody put every blame on God as usual.

Even that's done today, nothing so new and nothing unusual I should say.

So “this must be done by God." If you cut your throat God put my knife in my hand and He cut my throat.

So you see he thought better not talk of God, because everybody is going towards God.

Then the people whom he met, they said: “Now I have become God” He said “How?" He said, “I am God." “What, why?" Because he could mesmerize people, he said “I have become God." Just imagine.

So he thought that it is very dangerous to talk of God because people take God in the hand and use it for their own purpose. Always say: “Oh! This is what the God has to do. And it's God has done it and I am in connection with God and I will tell God." So he got a fright and he said that: “Better not talk about God because that puts the attention of people on ritualism, artificial things, they are building temples after temples and just doing all these horrible things, which one should not do." Like, if you go to the south you will find in the temples, they shave their heads of the ladies. They shave it completely and they have to... it's all cobbled along the sides of the wall, the walls of the temple.

And the ladies who shave their heads are just rolling along the sides you see, they have to do it sometimes 1008 times rolling, imagine. And the water is poured on them you see, God knows what is the ritual, from where it has come, you see.

So the poor women go on rolling, rolling, rolling like that and somebody is pouring water on them all the time, buckets after buckets. Her husband and her brother and all they're bringing one after another, you see, one is finished, then, other one... [gesture of pouring water]. Poor ladies rolling like that, on that muddy sort of a cobbled area. I mean I was shocked when I saw this. I said: “What's this?" And then later on, you see, they became modern so they started selling the hair you see abroad, so the whole thing became a big industry in Madras [Chennai] you see. The hair was made into these bouānt and all that you call it, you see [laughs]. And they sent to England and other places.

So, it's, I mean in the name of God ridiculous things were done, ridiculous things were done.

So he just thought better not talk about God, the first step is Self-realisation. He was a great Sahaja Yogi I must say. Because He said nothing doing, don't talk about God or anything, first you get your realisation.

That was the first condition. Establish it. Unless and until you have established your realisation, nothing doing.

So he just started his own method of propagating buddhi..., Buddha's knowledge or you can [say] Buddhism as they call it. Of course it became `ism' later on.

So all that he started with the idea that people should first become buddha. Buddha means realised.

Buddha is to know.

So Buddha means the person who has known, means the one who is a realised Soul.

So what he says: “Buddham sharanam gacchāmi” I bow, no, I surrender: `sharanam' means `surrender', I surrender to the buddhas, means to all the Sahaja Yogis. You all are buddhas, because you know. When you know, you are the Buddha. Now without going into all that nonsense of renunciation and shaving your head and wearing that dress and everything, you have achieved your realisation. It is a short circuit, or a short path. Why? Because he started from the other side. But if he had started directly from himself you see, it would have been better. You see, in practical sense I'll tell you how it is. Supposing you want to repair your house, so you have to have instrument for that house. But supposing if you are worried about all the houses of the world and you start repairing, neither you'll repair other houses nor yours.

So first you must practice on yourself. Put your attention to yourself, you see. Is also is a method by which you avoid seeing the point, seeing the reality that if you are not alright, how can you improve the whole world.

So when your attention goes to other things, you must know that there is something wrong with you first of all, which must be corrected. And that's why it took him so much time to go round and round and round. He had to give up his wife, give up his family, give up everything and get to realisation. Because by giving up everything he realised that it is he who should achieve. It is a very circuitous way. But you can just say: “does not exist anything, first let me get alright" that's Sahaja.

Now what happened, that became a method for people to achieve God. Many people think that you must suffer

like Christ to achieve God. You must renounce the world then achieve God.

Actually renouncing the world and all that is just a myth. How do you renounce the world? It is myth.

What are you renouncing? I mean in any case you can't carry this with you. Can you? I mean can you even carry I would say even a thread? Nothing. When you come you come like this you are born with closed fists, when you go the hands are like this, open.

Have you ever seen a dead corpse? He always has his hands like this, “nothing I'm taking." Just going like this.

So you don't take anything from here.

So this renouncing, this “I renounce that, I renounce that” “I'll give up this, I'll give up my wife, I'll give up that” has no meaning. Because it's a state of mind in which your being becomes... I don't know the English word for that, which doesn't stick to something, what is it called?

Sahaja Yogi: *[UNCLEAR]*.

Shri Mataji: No no no, you see any, any substance that does not stick to anything. Like we have all kinds of stick plastic.

Sahaja Yogi: Unattached, unattached.

Shri Mataji: No, but that quality. There's a quality of the temperament which does not stick to anything. Does not stick to anything. I mean, you put it here it will come out. You can say the soap or something like that.

Sahaja Yogi: Like mercury, Mother.

Shri Mataji: Eh?

Sahaja Yogi: Like mercury, just flows.

Shri Mataji: Ah, like mercury. But mercury also you can apply sometimes with heat, but this is something beyond mercury. Is absolute, which does not stick to anything you see. We just become like that; or you do wear this, you wear that, you have this, alright; you never...

The name of the Goddess is Nirmama. Nirmama, that for Her nothing is her own, you see, she does not stick to anything. She is in everything but She doesn't stick to anything. For example, now see the light here; it's not sticking to anything, it exists by itself. Doesn't stick to anything. This is the nearest you can say, does not stick to anything. Anything tries to stick it, you see, gets burned, that's a good idea.

[Laughter.] So this is what it is, is called an enlightened person, does not stick to anything. And whatever tries to come very close gets burnt off.

So such a person is not attached to anything, but that is not a mental thing that you can do, that: `Oh! I am not attached to you,' see, it's very common in this country especially, `I hate you.' But you can't hate anyone: how can you? And nor can you love anyone, because this attachment cannot give you both the qualities. You see, because you are attached to someone, you say that you hate, simultaneously you are loving that person. Because these are the dual qualities of attachment, see? So once you have attachment you have both things. One moment you hate, another moment you love, another moment you hate, then you love and you do not know what is the matter with yourself. But the thing is the quality of the mind is such that it is either getting attached mentally or either getting detached mentally. But actually anybody...

say you love someone very much, now you do not even die together, whatever you may try. You cannot die together. One person has to die earlier, another has to die later.

So the answer to his question that he asked was, why all these things are caused? So he said it is because of desire. Because of human desire these are all problems are caused. Like the death, like the old age or the sickness are caused by desire.

Now see how in Sahaja Yoga language how we should understand him. Is the desire as you know is the left side. Left side gives you death. When the left side is very much used you get to death, ultimately when it is exhausted. When the left side is out, desire, you also get sickness. And when the left side is used too much you get your old age. Of course the right side is the one which does it, but the left side is the originator. If you have no desire you won't go into the right side.

First is the desire, the starting point is the desire. He reached the point alright, but he did not clearly say what desire means? Desire means the left side. When we have the pure desire which is the Kuṇḍalinī then all these things are neutralised. When the Kuṇḍalinī rises, the pure desire, the real desire, the only desire it gives you the absolute by which you do not get old, you do not die and you do not get sick.

Because you achieve that which is eternal. It does not die. You become the spirit.

When you want to die you die, when you want to be reborn you are reborn. And you have that realised temperament within you. It does not die. That's what you

take with you. Now you take your realisation with you when you die.

So what he tried to say was to build up that we should not have any desires. Now because you see, his passage was like that. He went from one to another, giving up this desire, that desire, that desire, that desire, ultimately he came to Kuṇḍalinī.

There is a saying: Ya neti neti vachane nigamo avoochus when you go on saying `not this, not this, not this, not this, not this,' then you go to a point where you say then, what ultimately left is the desire which is the pure desire. The desire that is the Kuṇḍalinī.

Say for example you say: “I'll have a house. No, no, I'll not have a house. I'll have a car. No, no car.

No. I'll not have a wife. I'll not look at any woman. I'll have nothing to do with it. I give up this, give up that, give up that, give up that, give up that." Till you reach a point where you are at an absolute point and there you realise that the Kuṇḍalinī rises. But I think it is going too far: why not start from the Kuṇḍalinī rising, there. Is a simple thing.

So Sahaja Yoga is the other way round stuff: is that you better start from the Kuṇḍalinī; and neutralise all your left side. You see the point now? That's why Buddha was always regarded as an atheist. He was not, he was not an atheist. But as a matter of policy, he and Mahāvīra, they were contemporary. They decided let's not have the name of God anywhere near. Because once you start the God business, big philosophies are built and people just start claiming it. I mean they become that; actually anybody who reads Gītā becomes a, sort of a Kṛiṣhṇa,

Śhrī Kṛiṣhṇa himself, you see, the way he talks. People, I mean, can be shocked the way they talk. I mean, they are Śhrī Kṛiṣhṇa giving an advice to Arjuna you know, sitting on a chariot.

They behave in that manner you know, their style is like that.

I met one fellow called Chinmayanand and I was amazed you know, the way he was talking. I was surprised. I mean he was just behaving like Śhrī Kṛiṣhṇa, of course horrid looking, but he thought he was Śhrī Kṛiṣhṇa himself you see.

So that's what identification takes place with human beings when they start talking about God or his ways and others.

So he said, “Alright put that out, just talk about Self-realisation, that's the first step." And Mahāvīra joined hands with him.

It helped that time very much to all the people who were in the name of ritualism you see, they would say “It is very difficult you know. Hinduism is the most difficult thing. You have to fast on Sunday because of the sun, Monday because of the moon, Tuesday because of the Mars” like that went on and on. And when do you eat your food? [Laughter.] If you have to achieve God, then you have to take your bath at four o'clock and do this and do that and shave your head and then you become a Sannyāsī and you can't eat this and you can't eat that and you can't do that, all those things, ritualists they started. But he felt that supposing if you take to Sannyāsa, so half of your desires are finished. You are a

Sannyāsī, you are doing God's work and there is no need to have a family or anything.

So half of your desires are finished. If you have a family then you want to do something for the family, you have to look after your family and all that is to be done. But he did not realise that he was a realised Soul, others were not. You see if a realised Soul does that, it has no difference to him whether he has a family or no family makes no difference to a realised Soul because he is not attached. But to a person who is not a realised Soul, supposing he'll give up his car, he'll give up his house, go to the Himālayas. There what he'll do, he'll have a hut and have a barbed thing around.

Then he may think of a Georgian style of hut, *[UNCLEAR]* English..., because according to them Georgian style is unpretentious.

So we can have, after all we are Sannyāsīs. [Laughter.] That's typical; I tell you all our Western mind is behaving in that way if you see. That we should be unpretentious you see, it's very fussy, is the word they will use. If you put even a little oh it is very fussy.

They want everything to be plain, bland you see. But what about inside? Is filled with what, is all bottled up with all kinds of rums, this, that? But the outside should be absolutely bland. Food should not be, if possible just get it in its natural form. If not, don't have any taste in it. It should be so bland that any guest who comes to your house must starve, you see. All these funny ideas cropped up with that, of asceticism. Then we have other people like Shambhalas, who are going now to Gobi desert you see, they thought that this desert is not

sufficient, let's go to Gobi desert. [Laughter.] So they are now going to Gobi desert. All these absurd ideas came out of Buddhism and also Jainism.

Jainists went to other extreme in vegetarianism, because Buddha himself was not a vegetarian. Do you know that? He was himself not a vegetarian nor was Mahāvīra, you'll be surprised. Vegetarianism for them was a philosophy. It was not a sort of a thing where you don't eat meat and all. Because Buddha himself died when he went to one of his disciples who was a shikari, hunter. And the hunter had killed a wild boar. And he said that the wild boar has been killed just now and it will take some time to cook.

It's rather half done, you see. I mean, He being an Indian he could not eat that half-done thing and he got diseased of the, I think his liver or something got into problem and he died of that you see. I mean I cannot eat half done food Myself you see. This is half done now. Half done is a horrible stuff. But we eat because it is unpretentious you see, or some sort of a thing people have ideas it is not, it is very next to the nature you see this is what is coming. But is all deliberate. You are attached inside; outside if you behave like that you are not going to become that.

Like, hippies have an idea if they live like primitive people then they become primitive. You cannot.

Your brain is modern. Just by living, you see, wearing a wig like a hippie, can I become primitive? I cannot, my brain is modern you see. That's what people don't understand that we are too deliberate and all these deliberations can be only reduced if your Self comes into your attention. Otherwise, all these are just our mental projections.

So all the Sannyāsa and all these ideas came gradually, everyone who came on this earth, people have really made mess out of them. And Buddha's mess has gone to such an extent that if you see that you'll be shocked. It went into many formations. But I heard from My son-in-law that he went and visited some of the caves where the very early Buddhist, very early Buddhist lived. In the caves they were not supported by kings or anything so they had a bad time. And they used to live in the caves. And what My son-in-law told Me that in the caves there are writings in Sanskrit and Pāli and in Indian script, saying that it is the spontaneous happening that can bring forth the Self-realisation. He got that photographed.

So it's coming forward. You see so they knew about it, the Sahaja Yoga. They knew about it. But then as every religion has gone into a mess and lot of funny sort of, we can say, the funny sort of expressions also Buddhism has gone, it became mahayan, hinayan, all sorts of thing. But one of them was called as Viditama, who ran away from India, settled down in Japan and he started the Zen system of religion, which he kept to the spontaneous happening. That's one was preserved. Another was the Lao Tze style who did not talk of God and of Buddha, but of Tao itself: the energy or we can say about the Ādi Shakti.

So these two good things came out of him. While they searched back of the history of China and they found out the Ādi Shakti lived many years back there as Quan Yin. And that's how Quan Yin was established as a Goddess for many Buddhist.

Now then Buddha also got into another form because there was a big competition between Hinduism, Hindus of those days and the Buddhist.

So they wanted to form... for ordinary people it is very difficult to understand the philosophy.

So they thought that we should have Buddha expressed as he has been and he will be.

So they formed their, you see, as you say is a Maitreya is going to come, the future Buddha is BodhiSattva and they started making his statues and everything.

So they made Buddha as the God. They started using him to represent the Divine Power, giving Him forms and things and like that many things happened.

But Buddha himself was so much frightened of the ritualism that he they said “You should not worship anything, you should not build any temples." So you see, the loophole was found out: “If temples are not to be built, we'll build stupas." Now in the stupas they put the tooth of Buddha, of course that was sensible to do, I must say, but of course Buddha had said not to do it. And they put it there. He had two disciples called as Sāriputta and Moggallāna [Pāli names]. They were very good disciples of him. And their bones were collected after they were burnt out and were put in the stupas. That was something definitely sensible to put them there. Of course the bones and all these things should not be disturbed, because it's not good, it creates a problem for the body. But at least if they have put it there in the Mother Earth it would have been alright, but they put it in caskets. Now the first casket was made of gold, the second of silver, the third of iron, the fourth one of wood

sort of thing, to mummify those things. But that was a very wrong thing to do. Because if you go on keeping like that some parts of body of these great people, it can hamper their rebirth or their body which they want to again incarnate, you see.

But hair is all right, or nails are all right, but you should not keep the part of their body like that.

And this kind of thing gave another nonsensical ideas to horrible human beings. What they did that they thought that if you have to keep some part of the person who died like Divine person, why not we cut the hand of someone and like that.

So in Tibet and in all these places, specially in Ladakh you see, they used to cut the hands of the people when they died and big ritual for the dead and then they started going towards the dead.

So they started moving towards the left side. Most of the Buddhist moved to the left side, which was absolutely prohibited by Buddha, because he is on the right side.

He said “Cut down your desires. Do the Karmas without the desire." This was His idea. Activate your right side without the desire. This was His philosophy. But they all of them are left-sided. They have desires, not only desires but whatever they do, do it out of their desires.

Like, the worst is like the Japanese: they think that you can commit suicide in the name of your nation.

With this desire they will commit suicide. To save their country they can commit suicide. I mean it is absurd. He said whatever you have to do, do without the desire; which is a difficult thing for human beings. How many

there are who are doing it without desire. Whatever we do we do out of desire. Even at the subtler point: even when we do Pūjā we do with the desire that our vibrations will improve.

Can you think of a state where it is absolutely desireless? Only one person has that. There's no desire, desireless. The whole thing is done without any desire.

So there is no disappointment. There is no unhappiness. You are going to America knowingly that it is going to be a horrible experience [laughs] but it is a joke. Just going to see a joke. Without any hope maybe it might work out to be something tremendous; but no desires.

See, it is so desireless, the whole personality is, that even if I have to desire for something I have to ask you “you better desire” because I have lost the sense of desire.

So many times I have said “you better do it for Me." Unless and until you pray to Me I can't do it. That's why I ask you “write to Me a letter" because you see, I can't desire. I really don't, I don't do anything. Without doing anything, it is happening, so why should I desire? I really don't do anything.

You'll be amazed I don't do anything; I don't desire anything, nothing of the kind. It is working, I am just watching it and you are saying “Mother you are doing it” I am quite surprised. That is Tao. If you read about Tao it is said that it doesn't do anything. But everything works out.

So this is what he said, which was all Sahaja, that you have to be desireless and do everything. And he is the

one who controls our ego. Because if you have no desire you will have no ego either.

Ego is only built up when you have a desire to do something. That is you just do it for fun, just for joy, just for doing it. Then how will you build up ego? You cannot. Like an artist is painting just for fun and throwing it away. Creating something just for fun, that's what God is. Not with the desire to achieve something. I mean the desire is so gross, can be extremely gross. It can become subtler and subtler and subtler, that's a good way. But can be very, very gross also, like some people can believe that, you see “I should paint it because I'll get so much money, or I can sell it to somebody who may be the worst man but I'll sell it because I can get more money." That's absolutely the grossest of all, you see. That you can go to the most sinful things, I mean, I don't know: there can be even worse desires than that, can be very many. But on this auspicious day we should not think of them, which are there like that.

But minimum of minimum if you come, just do your Pūjā just for the joy of it, not with any desires.

Just for the joy. I mean, we are doing so many things like that: for example we enjoy each other's company just, just think of that.

You all Sahaja Yogis are enjoying each other's company: what's this for? Nothing at all, there's no, nothing. Just you are enjoying it without any desire, just for the enjoyment sake enjoyment. When that purity comes, you see, in our temperament, that we do everything without any desire, we have got rid of our ego.

The Buddha is awakened within us. That's what is the importance of Buddha: that he settled down himself in a place which is the most difficult place, that is on the left side of your head you see [touches left side of Her forehead].

Sometimes I have seen it projects here up to this point you know [touches from forehead to left temple], in some people. They get such a terrible pain you know, pulling it out from there, can't imagine.

So this horrible point which is, so funny it is sometimes, it can blow up like that you see, sometimes it can pierce through; it's a horrible one which all of you have developed quite a lot, you see and it takes its forms in different ways and methods, for that we have to say “Buddham sharanam gacchāmi” means we surrender ourselves to Buddha.

Then what does he say, the second one is very good: “Saṅgham sharanam gacchāmi” I surrender myself to collectivity, Saṅgham. Saṅgha is the collectivity. I surrender myself to collectivity. Ego goes down.

First of all Buddha who is sitting, who is the deity which is the enlightenment you say: “I surrender myself to Buddha." Secondly, you say “I surrender myself to collectivity." Egoistical people cannot surrender.

So “I surrender myself to collectivity” so we say “Saṅgham sharanam gacchāmi." It is to Virāt we are doing.

What is the third one? “Buddham sharanam gacchāmi, Saṅgham sharanam gacchāmi." The third one...

“Dhammam sharanam gacchāmi” “Dhammam sharanam gacchāmi." `Dhammam' means the religion, the balance. I surrender myself to religion which is essence of it. Or you can put it the other way round that: “Buddham sharanam gacchāmi, dhammam sharanam gacchāmi, Saṅgham sharanam gacchāmi." That's all if you have achieved it then we can talk of God, not before.

So these three things are to be achieved. We would put it in a Sahaja Yoga way like this. First of all “Dhammam sharanam gacchāmi” I surrender myself to my virtues. All desires can be surrendered to your virtue. It is virtuous to do like this? You can, if you are brought up that way you'll just not do it; you'll have no desires to do something that is not virtuous and righteous. You'll just not do it.

So “Dhammam sharanam gacchāmi." Then you should say “Buddham sharanam gacchāmi” means I surrender myself to my enlightenment: this is the second state when you are ascended.

Surrender myself to enlightenment. Enlightenment that I have got to my Spirit, is the Spirit who is going to guide me. No more my physical, mental, emotional nonsensical temptations. But what, is the Spirit. And thirdly, “Saṅgham sharanam gacchāmi" to the collectivity, to the whole, to the Virāt. This is the way we have to work it out.

So ultimately reach the same point: that let me start it from myself. From myself to others, not from others to myself. It's like treating the tree from outside, not from the roots.

But Sahaja Yoga treats you from the roots. First you get your realisation, alright? Then learn how to surrender yourself to your Dharma. Then you become collectively conscious. Collectivity is a temperament, is a sense of enjoyment that you get in the collective living. Unless and until you have that you have not achieved your ego.

So Buddha has played a very great role in our lives. And He is a very great, powerful force within us. I'm very happy that Buddha jayanti has fallen here in England, because as we say the England is the heart of universe. It doesn't matter if I say here, is there anybody Arab here? [Laughter.] I don't want to displease any Arab who is sitting here. [Laughs.] Alright. And if it is the heart, whatever you do here, will circulate in whole universe.

So if you can conquer your ego here, we can even conquer the ego of Mister Reagan and these Russians, we can manage that. But first start it here. It has to reverse back you see. Now they have to learn from you and you don't learn from them. When it will work out you'll be amazed. Ego is the only problem I always face, reaching their hearts. If ego is removed everything will be alright.

So for us the great mantra is “Buddham sharanam gacchāmi." These three mantras you must say everyday I think, to get rid of this horrible ego. Now any questions on Buddha you have? I have made it in a short way, the whole life history is very difficult.

[Pause. Shri Mataji rubs Her hands.] It is receding, ego. English are wise people, sound people. And they must understand this, that there is a very very important thing, that they should not lose these qualities. And

should try to fix their enlightenment in such a way that it circulates.

Any question? Gavin told Me yesterday it's Buddha jayanti, I was very happy because in England I have not talked of Buddha, but otherwise I have talked about him elsewhere.

[Pause. Shri Mataji keeps rubbing Her right hand.] So now, that's why I wore, you see, a Buddha shawl today: because it is suggestive of a detached mind which has no colour. And there could be a personality which is colourless. But you can have it covered with colours to make others happy.

So when you are a realised Soul whatever you do is natural, whatever you do. If I am wearing this now I am a Buddha, when I take it out then I am Ādi Shakti. It is not a drama it is a fact. But if you are not a realised Soul, before that whatever you do is just a drama. For example, this is an artificial thing, I put my hand there and nothing will burn. But if it is real it will definitely burn, whatever I may try. It's like that.

So if somebody is a real person, whatever he does is not a drama, is reality. That's how they say that She can take this form, She can take that form: people don't understand how can one person take so forms, can. If it is reality it can. Like the Mother Earth she is a reality and the sap that is coming from the Mother Earth takes so many forms. See her power: flowers, this fruit, different colours, fragrance.

So many things, is one Mother Earth is producing all these things. Because she is reality. The reality in her

can produce. But unreal things, whatever you make out of unreal things, they may look real, but they are not.

So now let us have the Pūjā. And for the rituals also He said, because most of them were unrealised Souls you know, they, that they whatever Pūjās they did was unreal, it was not real, had no meaning. It was giving no effect.

See, worshipping a person who is unreal or any deity who is unreal or those who were not real people, I mean realised Souls, what's the use of unrealised people worshipping Me? I mean, I wouldn't allow any unrealised person to worship Me at all.

You see, I always tell people, unless and until they are perfectly Sahaja Yogis, you know them they are good, please don't bring them for Pūjā. It's troublesome to Me, much more than to them. You see they also feel obliged as if you see, they are obliging Me, they think so, by worshipping Me, I don't know; but they do not know how much they are troubling Me by coming without realisation.

So the ones who haven't got realisation are really troublesome. They don't help Me.

So the myth some people have that if they come to a Pūjā before realisation, they'll get realisation in it, is not true.

You should not bring anyone who is not a realised Soul or who is not a Sahaja Yogi to a Pūjā. It's troublesome and that person also start doubting this, that, is better not to do such a thing. Because also such a person is half baked, so no use giving Me half-baked cakes and spoiling the half-baked cake also permanently. Because if you

take out the half-baked cake, see, is spoiled forever. I can't eat it nor you can bake it again.

So what's the use of bringing somebody who is half-baked? Alright? So from next time also this out of compassion you do it. I know you do it out of compassion, but this is not wise. Doesn't help Me nor it helps others. Alright? So from next time, also any time, you must find out a circular saying that unless and until you are sure about the Realisation of a person, that he's got his realisation, you should not call them for the Pūjā. They are no good for Mother and they are not good for themselves. Because they become, you see, doubting or something. You cannot really give them realisation after that, can you.

Do you remember your friend, had the same problem. Who was he? Nick or something.

Alright.

So now we can, Gavin, you can do the Gaṇeśha Pūjā. You can read the names of Gaṇeśha.

Now, I think those who have not washed My feet before in Brighton should come down. You washed My feet, no? Alright, you come along. Alright, come along. Can you put some towel here. I kept the towel.

Take one down.

That was happening, it was just coming out like that. They advertised and really... I mean, they are honest, they didn't told us.

Sahaja Yogi: I looked on the label. They had zinc sulfate in it. They had zinc sulfate in the description, in the soap, I would never use it.

Shri Mataji: Horrible. This *[UNCLEAR* name of product] is a sure short way to baldness. Very fast. [Laughter.] Absolutely. Shortcut. Anybody who is bald you ask him, he must have used it sometimes. Did you, Gavin? [Laughter from Sahaja Yogis.] That's it. It has got petrol. You see, they may not write, but from the smell you can know.

These tabacs are all horrid things. Tabacs are... actually this is tobacco, is the word tabac comes from tobacco. You see, here the cheating is of a very different kind. They have no consideration. This is real cheating, you see, to put petrol, petrol on your head. You are sure to become bald-headed. I'll tell you, best is that sapna, sapna oil *[UNCLEAR]*.

Sahaja Yogi: [Something about hairdressers.]

Shri Mataji: They are going to have no profession any more [laughter].

Sapna is very good, I think you all should try sapna, is very good. *[UNCLEAR]*. But sapna in the best, I think you should put that sapna oil on a Saturday night, put a bit on your head and make the scalp move a little and then you have your bath. Sapna, it's a homeopathic oil... I think there must be, a homeopathic shop if you go to. And also there is one in India we call *[UNCLEAR* Camphordine], we don't get here, it's very useful. It's very light. Of course jabakusum is also good if you can mix it up with coconut oil. Jabakusum. One bottle of coconut oil and half a bottle of jabakusum or just the other way round. If you mix it up and use that, it's very good. You can keep it in a tin bottle and use it. It's very good, jabakusum. You get it here, jabakusum. It's made

out of that red plant, now what you call that, hibiscus. Thank God you see we are not so good at artificiality in India. Really. Same with these, all these your Cami soaps and all these things. Really. They will give you a soap which will finish your skin. And then they will give you a cream which is even worse. It's a mutual understanding.

So you try, I could say that yellow colour sandalwood is good. It's very mild for the skin. It's very good for you.

So that chandrika soap was good but now they are also mixing up something *[UNCLEAR]*. You should use that, is a good one. Absolutely mild soap it is. Not the black one, the yellowish one.

Sahaja Yogi: Sainsbury's makes some good soap.

Shri Mataji: Which one?

Sahaja Yogi: Sainsbury's makes some good soap.

Shri Mataji: How can they? I must say... They are not good, you see, it must be some joke.

[Laughter.] Somehow they can't make anything mild, you know, they cannot make anything mild. Why can't they make something mild? The soap should be such that your skin must come out. Your washing, mouth-washing liquid is such that I put it on enameled work from vadaban, it was at least sixty-seventy years old, you see, we had. And as soon as I put it the whole enamel finished. Can you imagine, we got such a shock. All the enamel within us must be going out from the teeth also... [laughs and laughter].

All enamel of the thing came off and I was amazed, where it has gone. Completely dissolved. I wonder from where they made them, what they made them of.

Sahaja Yogi: The Pepsi Cola is the worst stuff for that.

Some dentist tried an experiment of leaving some false teeth in a glass of Coca-Cola overnight and in the morning it had disappeared.

They just dissolved, Mother. [General laughter.]

Shri Mataji: Coca-Cola or Pepsi Cola? Which one, Coca-Cola or Pepsi Cola?

Sahaja Yogi: Yes, one of those, but the problem was...

Shri Mataji: Pepsi, Pepsi might be. Because you see, Coca-Cola formerly was horrid, I used to feel terrible. But now I've tasted it, I don't find it so bad, they have changed something in that.

Sahaja Yogi: They took the cocaine out of it, I think, Mother.

Shri Mataji: But I used to feel terrible before, I would never touch Coca-Cola. But now I, it's alright.

Better take Indian tonic water, I think, there's something good about it. Or this Perrier water, whatever it is. Now good now, let's see this.

[Talks to a yogini who is washing Her Feet:] How are you? More in the right. Left is not good. Rub it hard. What did you do before Sahaja Yoga? What a horrible combination, rub it hard. Drug is one of the worst things, you must use oil for your hair. You must use hair oil, drop it like that and take it out, because I think is a some part of the brain just becomes dead. Hard, hard, hard. Yes.

... doing it but you feel you are doing it, then it's a double problem. I've seen it. When you are not doing it and you are feeling you are doing it, it's criminal, isn't it? But somebody who is doing it and not feeling it because that

person is not conscious about it, not bothered about it. It's too little to think that you are doing something. It's too little. Is a too small a thing, it's too low a thing to think that “I am doing." Would be such a ridiculous thing to say: “I have done this” you see, such a thing to be said. Isn't it? And such a person comes everywhere: “Oh, I did like this and I did this" you think, such stupid fellow what is he talking? It's such a ridiculous thing, I tell you, to say: “I have done it." So, after Sahaja Yoga you also start saying: “Mother, it's not working, it's not coming up, it's not there." You don't say: “I cannot do it, I am doing it, I am giving realisation” you don't say this. You just say: “It's not coming, it's not there, it's not in the hand” like that. You see, so you also start becoming a third person. You just don't take the credit for it at all. Only the joy of it comes to you, that's all. But you don't take the credit or *[UNCLEAR]*. That should happen gradually to all of us and happens, automatically, to start talking like that.

Today's Pūjā you must notice I've changed the mode completely, because of Buddha's influence, you know. He didn't want to have too much of Pūjā.

Alright, so now, what we have to do is to put something, a cloth, here.

***Contents: 1983-05-26*, Public Program, Day 1, Brighton, UK**

Today it's such a pleasure to be here again, in Brighton; and, slowly and steadily, I find Sahaja Yoga is settling down in this place. When I first came to Brighton just to visit, I felt there must be many seekers in this place, who might have been lost and always had a great hope that

one day they will be able to come to reality. Today specially is a very great day because today is the birthday of Lord Buddha. And in the morning, I talked to Sahaja Yogis about His great incarnation and how He came on this earth and He got His realisation and then how He tried to spread the message of realisations to others. Many people believe and think that Christ was an atheist... Buddha was an atheist, while Christ was a person, believer in God. And some people prefer Buddha to Jesus Christ. It's something very amazing is that... that when the people are born in the particular circumstances, they have to talk about things which are very, very important at that point of time. At the time when Buddha came on this earth in India, we had too many ritualism of Brahmanism and conditioning of the teachings of those money-makers and commercialisers who wanted to make money in the name of God and in the name of religion.

So, to neutralise all that, He decided not to talk at all, at all about God, about any particular religious ways, but He said that you keep to the middle path of life, eightfold middle path of life and that you first get your Self-realisation.

To Him it was very important that one should get Self-realisation. And that's what He wanted to give as a message and divert the attention of the people from the idea of God or incarnation, for the time being, because He wanted to show that Self-realisation is very important and that without Self-realisation you cannot understand God or Divine Power.

So He was not an atheist. He and Christ, I would say, were in a way contemporary, but Christ came later and Buddha came about five hundred years before Christ. They are so much related to each other, so much close to each other, so much identified with each other, as if they are part and parcel of one being.

That only you can understand when you get your Self-realisation. Christ has said: “Those who are not against Me are with Me." Who are “those" who are not against Him? Because we have no knowledge as to real the origin of Christ, from where He came, what was His origin, how He was created in the heaven, how He is the Son of God. Whatever we see today as a person who came on this earth to teach us about His father, God Almighty, we just believe into that part, which is a very limited part of Christ and Bible cannot contain that great personality. In the same way, Buddha has been dumped into very small dimensions. Only two persons realised it; they got out of it. One of them was Viditama, who went away to Japan and started the Zen system of religion. But even today if you see the Zen, which was nothing but Dhyāna, the meditation, Sahaja, spontaneous awakening, is reduced to the same level as any other preaching. I met the head of the Zen system. He was very sick and they brought him to Me because he wanted to be cured. And I was amazed that, not that he was a realised Soul, not at all a realised Soul, but his Kuṇḍalinī, which is the force which is going to give him realisation was all frozen. And he had no desire to become Self-realised. I talked to him, I was amazed. And I said, “How is it, that according to Zen you have to be a Kaśhyapa?" Kaśhyapa means a person who

is a realised Soul. That's the name of the university, as I told you yesterday in Lewes, is the name of the university is Kaśhyapa: those who have no university, in the sense, those who have the university of God.

So he said, “Oh, that's over now, God is not making anybody Kaśhyapas now. Only from the sixth to the eighth century, in two hundred years, there were only twenty-six Kaśhyapas, after that there were none. And I don't hope to be one." I said, “Why not?" He said, “No, I have no hopes about it, I'm just now appointed as the head of Zen, so I'm there, but we don't get Kaśhyapas these days at all." So with that he doomed all the hopes of all the people to become Zen, to become person who knows, person who is a realised Soul. This one was very shocking to Me because Zen is something so great. There's so much expressive of Sahaja Yoga. You cannot understand Zen unless and until you are a realised Soul.

Even Bible you can't understand, you can't understand Gītā, you can't understand anything unless and until you are a realised Soul. The second person who really emerged out of it, all this ritualism and all that that they had created out of Buddha's life, was Lao Tze, who preached about Tao. Tao is the all-pervading Divine Power. Power of love. When He talked about it, He explained about it and He started another group of people, who were to be given realisation. But that also today, I find, has become `Tao-ism'.

Everything becomes `ism', means `imprisoned'. It's not living, it's not there, it's just a thought of Tao people read. I have seen people... there's one gentleman in India who has written a complete book on Tao. He's not even a

realised Soul. What is he writing? I was just wondering, with his blind eyes, what is he describing, what colours can he describe? So you must know that you have to be Self-realised first. Then see for yourself. Then you will know whether there is spirit or not, then you will know whether there are roots to this tree that has grown outside, then you will know where there is God or not. Then you will know what these incarnations have any meaning or not. Just before that just to sit down and criticise is not a sensible thing. That's why Buddha... who occupies a very special place within our being itself, He resides on this side. This is the place where our ego is attached and He is the one who really controls our ego.

So this Buddha also is such a part and parcel, is to be understood only after you have got realisation.

Without that you are still incomplete. You are not that by which you will know. Like Kṛiṣhṇa has said: “Ātmāny evātmanā tusht.ah" [Bhagavad Gītā 2.55]. Through the Ātmā, through the spirit only you are going to know God. Not through with this mental projection, with these eyes, with these senses but through the spirit. And where is the spirit within us? The spirit lies in our heart and is the reflection of God Almighty. It's called as a kshetragñya, means “the one who knows the field of our action." The one who sees what we are doing, who is the witness of what we are doing. But He is not in our attention. That gentleman wants to come, please come. He is not in our attention. And if He is not in our attention, we do not know how to connect ourselves with Him to have a rapport with Him, to understand Him. That's why first this spirit has to be brought in our own attention. That's the

most important thing and because this is not with us, we are still incomplete, we make mistakes. Because the absolute thing that is within us is the spirit, while we live on a relative world. Today somebody comes and says to you all right. Just now, when we were coming, there was a gentleman who handed over a card to Me, about...

Something about Christ. He's telling Me about Christ, I really must laugh at it. But supposing tomorrow Christ comes and stands before you; will you be able to recognize Him, or will you crucify Him again? How will you recognize Him? How will you recognize Buddha? Have you got sensitivity to know who is Christ? It's very easy to, you see, to represent Christ, it's very easy because they think that, after all, you see, everybody has a right to do what they like. Even Hitler talked of God, can you imagine? Hitler talked of God! Everyone thinks he has got right to talk of God, to describe Him! But first of all you must know that no use deceiving ourselves, we have to get our Self-realisation. We have to know ourselves first of all.

Now, Buddha's attitude towards His attainment was that He was actually touched by the miseries of the world. He saw a person who was sick. He saw a man who was dead. He saw an old man. All these things worked on His mind and He started thinking: “Why these miseries are there?" So the whole search came through the understanding for others. That takes too much time because you have to go on neutralizing: “Not this, not this, not wife, not children, not family?" You go on negating, negating, negating; all your lives you go on, one after another. Doesn't work out. The other way is simpler, could be... which of course by

Buddha's attainment only has been made even better... all of them have done something for us within ourselves, that first we look after ourselves, find out about ourselves. Are we realised Souls? Are we Buddhas? Are we the people who know? Let us be honest. Then we have to know. Now, what is the way to know is the point. Now, if I say that you will know, in your evolutionary process. As you have evolved to be a human being, you will be evolved to be a realised Soul. But there's a little difference as to what has happened so far and what is going to happen later on.

So far, we have been evolved through a method which was beyond our freedom. The nature worked it out, the nature within us, the central force of evolution within us has brought us to this position that from amoeba today we are human beings. But at this stage, when we are human beings, to go further, there's a special mechanism. Like, till to make this instrument, we had to use other instruments to make it. Now, once the instrument is just ready, we have to just plug this one to the mains and it's done. As if you are made to be ready to be plugged to the All-pervading Power; and by some special, spontaneous method done by the living force within us, we have to be plugged to the mains. But the difference between a human being and other animals is this that human beings were given their freedom. At the stage of, say, Adam and Eve, if people would not have gone too far with their freedom, it would have been much easier to give realisation to people at that time. But when freedom is given, then people misuse it. Or, they want to

use it. They don't want to obey, because to obey means, they think, there is no freedom.

And that's how, when they started using their freedom, they had to do things which were wrong, which were anti-life, which were anti-evolution, without realizing what they were doing. When it reached the stage when people found that was wrong, they gave it up. Then another thing they tried, it was like an error being corrected. Then they corrected it. That's how human beings have been trying, experimenting with this, experimenting with that; and then they come to a point where they say, “Given up now, it's too much." That's the best point, I think, as Buddha had reached; He was so tired, lying down under a banyan tree and He got His realisation.

So now I am here before you to tell you what is the mechanism. You should not in any case accept Me fully, you should not. That would be wrong on My part and wrong on your part because you're free, you are free, not to accept or to accept. But you have to keep yourself open because this is a new category of knowledge which I am telling you about. About the roots, about which you do not know. You know only about the tree, but I want to tell you about the roots. The best thing would be, first and foremost, to be able to enter into the roots. But you cannot! As the human mind is, it wants to know everything about everything first of all. But see, here, if you have to enter into this room and there is no light, somebody tells you, “All right, press that button and you get all the lights." And you do it! It's all built in there, it's

just there. But if somebody starts telling, “All right, I'll tell you there is something called electricity.

Now, that was discovered such and such era, then there was this gentleman, who discovered this part of electricity, then we used the water power to generate the electricity and that's how there was a committee was formed" and the whole history about the Sussex electrical system. Then you'll say, “Now, we are fed up, now will you stop it!" It's like that.

So, if I have to tell you the whole history, it will be too much. Best thing would be to press the button, see the light, enjoy it and then you can know about it if you want to know. If you want to! It is just like that. The knowledge of the roots is greater than the knowledge of the tree. But unless and until you know how to become that subtle to enter into the roots, whatever I talk is Greek and Latin, or, for you people, I would say, is like Sanskrit language. But still, I'll try to explain to you few things that lie within ourselves. But by listening to that, I want to tell you, you cannot get your realisation. Whatever I may talk for hours together, you will not get your realisation. It's a happening that has to take place within you. Unless and until this happening takes place, you cannot get your realisation. And it's a happening which is to be experienced by you, not by Me. It is to be felt by you and by this happening you have to feel your own powers, your own glory and your own purpose.

So far, we do not know the purpose of human life, why human beings were created from amoeba stage.

But then you know what is the purpose of this life. I'm sure they must have told you something about Kuṇḍalinī.

Jason, did you tell them? Not much? Sahaja Yogi Very little, Mother.

Shri Mataji: Eh?

Sahaja Yogi: Very little, Mother.

Shri Mataji: What's he saying?

Sahaja Yogi: That he *[UNCLEAR]* very little.

Shri Mataji: All right.

So now here I would like to tell you something about it, which you should take as a hypothesis just now and try to understand. It's not very difficult, to begin with. And later on, as soon as you get your realisation, it's the easiest thing to do. We have within ourselves seven centers, placed in our medulla oblongata and in the brain. The first one lies below the triangular bone, which is called as sacrum and it's called as the Mūlādhāra center, which means `the support of the roots'. It is the support of the roots. And this center embodies our innocence. The second one... and of course it manifests outside in the gross, the pelvic plexus. Now, the second one is the one that emerges from the third one, which is called as the Nābhī Chakra, the third one; and the one that emerges from that is the second one, called as the Swādhiṣhṭhāna.

Now, the Swādhiṣhṭhāna Chakra in the gross, because these are subtle centers, in the medulla oblongata, but outside, in the gross, it manifests what we call the aortic plexus. If there are doctors here, they'll understand what I'm talking about. Now, if you go further, the Nābhī Chakra manifests outside what we call as the solar plexus. Above that is the center that we call as the Heart

center, Anāhata Chakra, cardiac center, which manifests outside the cardiac plexus. And it has got, again, the left and right side. Then we have the center at the root of our neck, which is called as the Viśhuddhi Chakra and which manifests outside the cervical plexus. Above that, here where you see the red mark on My head, this is just the window of that center, between the pituitary and the pineal body, where the Optic Chiasma cross each other in the center, is a very important center called as Āgñyā Chakra, which looks after our ego and our superego, which you can see there passing through that, crossing over like that. And on the top of that is the last seventh center, called as the Sahasrāra, meaning `one thousand petals center'. And that's the center... is just in the limbic area and when you pierce through that in the Fontanelle area, you feel the Cool Breeze of the Kuṇḍalinī, or the Holy Ghost, coming out of your head. This has to happen. You cannot give false certificates. You have to feel the Cool Breeze coming out of your head. You have to feel the Cool Breeze in your hands; that means you have to feel the All-pervading Power of God, of Love, which is called as Brahma Shakti in Sanskrit language and in the Bible is called as the Cool Breeze of the Holy Ghost. For the first time you have to feel it in your hands, in your central nervous system. Because the seat of your spirit is here, but the spirit resides in the heart. Once the seat is touched by the awakened Kuṇḍalinī, which is in the triangular bone, if you see, then you start feeling the first the Cool Breeze and then in the hand, you start feeling the Cool Breeze flowing from you. Thus you manifest the power of your spirit. It's a happening that has to take

place. It's a living happening. It's very easy to tell people, “All right, now you start jumping." You see, anybody can jump, what's so great in jumping? Or if somebody says, “All right, take out your clothes." What's so great? Or, “Colour your clothes in this way." Nothing so special, anybody can do it. But can you take out Cool Breeze out of your head? Your own head. And when you get it, you can do it to others. Even from the others? heads you can take it out. This is the way it has to happen, the time has come. This is a very special time, when so many seekers are born, so many of them, in millions and millions of them; and so many are lost also, because of various reasons, because of attack on them. From very childhood, a person who is a seeker is attacked. Ultimately, his ego can attack. He may have his own mental projections built in, he may have horrible Gurus, taking out money from him. And there'll be people... will be manoeuvreing them, there'll be people who'll be creating projection things just to engulf them. But to an Indian, it is easy, if they are Indians, of course; if they are uprooted people and all are westernized, then I can't say. But to a normal Indian, they know it is the Kuṇḍalinī awakening that gives you realisation. I don't have to tell them that this is so. They know. They are not naive. But in the Bible also it is written that “I will appear before you like tongues of flames” and actually, when you see the Sahasrāra, it looks likes beautiful flames in seven colours, most harmless, silently; like this flame but very longish flames and silently burning and opening out, very cooling flames.

Even this flame can give you Cool Breeze. It has happened with many; and how it works out, that we have to see. It's fantastic! It's too much to believe. First of all, we have no faith in ourselves, we don't know how can we get realisation so easily. People had to do this, people had to do that. But time has come.

You have done everything in your previous lives. You have starved yourself, you have roamed about, you have done all the tapasyas, the penance and today is the time for you to get realisation. And that's what it is. But why doubt it? You don't have to pay for it. Nothing is selling here, you know that. Nothing is selling. Actually, you cannot sell God. You cannot sell God! Those who sell are committing sins. How can you sell love? Love is not a salable quality. Then the love of God, how can you sell? But we are so attracted by commercializing and all that. Because everything is so commercialised. And so traditional now that, for people who says that you cannot pay for your realisation, they just can't understand how can it be. Get out of this, get out of it! And just know that commercializing is a sin if you try to do that in the realm of Divine. It's a sinful thing. Anybody who has done that is wrong. Christ had taken a big hunter and hit all those people who were selling near that church. That's what it is. Today we find in all the churches, all the temples, mosques and everywhere, are nothing but commercializing. But that doesn't mean that those people who propounded those great ideals to balance yourself on your Void as we call it, they gave you the Ten Commandments to balance yourself, that they were wrong, that they did it just as a mental projection. It's a

fact, you have to balance yourself! All of them tried to balance you, gave you a method of moderation. For what is this moderation? Is for the ascent. If you do not have balance in life, you cannot move. Imagine a car going on two wheels on one side. Even if there's a bicycle, you have to balance it. You just can't ride a bicycle if you don't know how to balance it.

So this balance was to be established and that's why they propounded all these great ideals for all of you. And all this is for your ascent and not to be just settled down with that balance. You have to ascend and that ascent is now very simple and easy because the time has come. As I told you yesterday, on the tree of life there were very, very few flowers to begin with. But today, at the blossom time, there are so many seekers. A special category, the flowers as they call it. They are flowers, no doubt; when they called them flowers, it was true they were flowers, but they went into wrong direction. They were definitely flowers to become fruits. And they will, God willing, all of them will have to become the fruits.

May God bless you all! I always ask people to ask Me questions, but that doesn't mean that you should go on taking time unnecessarily. And, also, mentally, I can just satisfy you up to a point because the mind cannot cross the barriers. It has to be triggered into a space of thoughtless awareness. And what you understand through your mind is only the signboard, which you can read; but you have to enter inside and for that, the ascent has to take place. That's important. The other day in the university there was only one person who asked many questions. And he was the one who didn't ascend,

the rest of them all ascended. It's very sad. And we have to work on him, of course; he is going to ascend because he wants to ascend. But the questions went on like that and such a waste of time. Because you are earnest seekers and truthful seekers, please ask questions which will help everyone. We have to be kind to everyone.

May God bless you! If you have any questions, please ask Me. Yes?

Seeker: *[UNCLEAR]*, is it dangerous to split a mental cord? *[UNCLEAR]*.

Shri Mataji: Now, can you tell Me what he's saying? Just tell it. I'll see, I have to be able to answer.

Sahaja Yogi: Is it dangerous to split thoughts?

Shri Mataji: No, no, no! We are not splitting it. You are sadly mistaken. That's not the point. You see, a thought rises as a reaction to something, all right? Rises and falls off and then another thought rises and falls off. In between the thought, there's a little space, which in Sanskrit called as vilamba. Now, the thought may come from the future, may come from the past, but when it comes, it goes to the past, all right? Now, what happens: that we see the rising of the thought but not falling of the thought. And in between the thought, this vilamba is the present. Now, if I tell you, `Be in the present,' you cannot. But you just go on thinking, thinking, thinking like mad. On the cusps of the thought you are moving, just like mad. But there's a realm beyond the thought, which is complete awareness and thoughtless awareness, where there is no thought. And thought is a great joy killer. I'll tell you how. For example, you are seeing these

flowers now. I am also seeing them. Now, I am seeing it thoughtlessly, you are seeing it with thought.

So the thought arises: “From what shop She must have bought? How much it must have cost?" Because thought is not joy. But I am just looking at it, without thinking. The complete creation of this, all the joy that is put into this, all the joy that has been created by putting it into this kind of a style, all that is silent is just entering into My being and giving Me that peace and the joy for which it was created. Is a barrier; actually, thought is always a barrier! But when you go beyond thought, it doesn't mean that you cannot think but you become a master. If you want you can think, if you don't want you cannot think.

But you are not driven by your thoughts. You see My point? It's like the thought is riding you, now you ride the thoughts.

Seeker: Can you prevent the thinking?

Shri Mataji: Can you?

Seeker: Can you prevent the thinking I have in my head?

Shri Mataji: Yes! If you want, you can just sit silent, in your silence enjoying it. If you want, you can think. But after that, whatever you think has a special quality. Because that thought that comes to you after your realisation is guided, enlightened by your spirit. Say, a thought comes to you. For example, you are sitting here and you see something in the darkness and you think this is a serpent. For example, you might think; you see, thinking anything is possible. There's no control.

So you think it is a serpent going and you are frightened of it and you try to save yourself. But supposing there is light. Then the same thought tells you, “No, no, it's not, it's just a rope lying there." With enlightenment, the same thought has a special quality. Because you see it in all its dimensions and understand what does that mean, what it is like, what is the absolute value of particular thought is. And you just give up. Whatever is not right, you just give up; whatever is right, you accept. Because you see it clearly.

So far, there is no discrimination. Now, a thought comes to a person that “Let me go and murder someone." This all comes from thought! “Because I hate that person, I must murder that person." All right? It's all hatred working. Now, you may obey that thought, somewhere and you murder that person.

And then, after the violence, the whole thing, the face changes and you become so nervous and everything starts. First thought takes you down there to kill the person and the second thought comes *[UNCLEAR]*: “Oh God, what have I done!" Both are wrong. But if you are a realised Soul, first of all you'll not hate anyone. There are ways of neutralizing the hatred in Sahaja Yoga. And neutralizing even the hatred of the person who hates you. Love's powers we have never known before. We only know the power of hatred, you see; the way we are producing MX [missile] and this and that, is nothing, is based on hatred and filth. If these people get realisation, I don't know if they'll ever get it, they won't produce all these horrible things, which is making everyone shudder. We have never used the power of love so far, but that

you cannot do it unless and until you have felt it, after realisation.

Seeker: Will you please tell us something of the technique?

Shri Mataji: Yes, I will. As I said... that it's a spontaneous thing, it's done as a living process, all right? Now, say, if I say that... what is the technique of sprouting a seed? That's a living process. No technique, you just put it in the Mother Earth, it sprouts. It's all built in. It's a Divine technique, by which it works out, first. But then you become the master of the technique yourself. Then you can do it! Because you enter into a new realm where you have the Divine power, by which you can do it yourself, you can manoeuvre it. But how you get your realisation? Is through the spontaneous process. And a very simple process, is like this: a candle which is enlightened can enlighten another light. If the candle is there and if the candle is in order. But this candle, if it's a realised Soul... that it can also correct, through its techniques, which you have to learn, through its technique, it can also correct the other candle which is not yet enlightened and then can enlighten. It can do everything! But the technique of that is to be understood very easily because you become a collectively conscious personality. You become, again I say, you become. You become another personality. Like an egg becomes a bird. That's how you become. Then the bird has to just learn how to fly. But how does a... what is the technique for the egg to become the bird? It's just to be put in the warmth of the mother hen. No technique, it's all built in. That's the Divine technique. But then you learn the Divine technique yourself, how to

do it. All right? So then, once you are realised, by very simple method, which is our job first of all, the job of the realised Souls, like the enlightened light, once that is done for you, then you have to do for others. Then you have to learn the technique. But unless and until you are enlightened, you cannot do any technique, because there's no power flowing. To start this, you have to put it to the mains, isn't it? Otherwise no use knowing the technique. If you don't know how to start the car, no use knowing how to drive.

So let us first start it and then you will learn the driving. Answered all right now?

Seeker: Having started, how long does it take to become realised?

Shri Mataji: No, you are realised at the start only. To begin with. It takes hardly any time. You get realisation first, in the sense that you become collectively conscious, you become empowered. But then...

it takes hardly any time for some people, only six, seven days they can become experts. That's all, that's sufficient.

Some people take some time, but depending on what obstructions you have in your centers.

If your centers are obstructed, then it takes little more time. But if they are not, it doesn't take much time. You become automatically endowed with that technique. Now here we have at least fifty percent who are Sahaja Yogis. We call them Sahaja Yogis once they become expert, before that not. At least fifty percent people sitting here are that. They're just like you, but there's a difference. If you see, their faces are glowing, you won't find any

pimples or anything on their faces; very soft skin, young looking, fresh; eyes are sparkling. They are over here. And that's how you become. You become the masters of yourself. Because you become the spirit! And spirit is the master because it guides you. All right? we'll work it out. That's a very good question! Why? Because you want it. That's a good question that really helps everyone. Should we have it now? All right. You have been requested to take out your shoes for a purpose, there's nothing to insult you or in any way to trouble you but to help you all. Because the Mother Earth, you see, helps you. We have to take the help from the Mother Earth, so we put our feet on the Mother Earth. We must know this Mother Earth helps us the most, so we have to put our feet on the Mother Earth, without much pressure, little apart, not very close to each other. All right? If possible, try to put the whole foot on the Mother Earth and sit comfortably. Now, if there is anything tight, you can little bit loosen it. If it is too tight. I mean, you should never be uncomfortable, because your attention goes... if there is any uncomfortable feeling, it goes there. Also better to take out your spectacles and things because it also helps your eyesight. It helps so many things, so better to take out your spectacles.

Keep it safe somewhere, so your attention is not sort of distracted by it. It's a very, very simple method which we have to use. First of all, as I told you, here you can see also, yesterday I told you that these centers are represented in our fingertips. Muhammad Sahib has said: “At the time of resurrection, your hands will speak." Very clearly He said it. And now this what happens: that your

fingers, they have got sympathetic endings here, that much, of course, the medical science also agrees, but these actually are your centers here represented.

So, five, six and seven. Here also five, six and seven. On the two sympathetic nervous systems, left and right, as you see here. The gross is the left sympathetic nervous system, but the subtle one is called as the Iḍā Nāḍī, which is the one which caters to our desires. The another one, on the right hand side, is the one called as the Piñgalā Nāḍī, which manifests the gross... channel which represents the right sympathetic nervous system, which is responsible for the creativity; is the action.

So one is for the desire, first we desire and then we act, so this is for the desire, for emotions and the right one is for the action.

So we use these hands gradually according to the obstructions we have on our different centers. But first of all we have to put the hands just like this: little bit open, very comfortably put on your lap; and you have to close your eyes. That's very important, you have to close your eyes. Just opposite of mesmerism.

Please close your eyes. Whatever has to happen will happen inside, not outside. If I say, `Pay attention to yourself inside,' it's impossible. But it will happen when some happening takes place and your attention will be attracted inside; and that happening is the awakening of the Kuṇḍalinī. Please don't open your eyes. If our eyes are open, the Kuṇḍalinī doesn't rise beyond a certain point.

Sometimes She doesn't want to rise at all.

So just keep your eyes shut and put your hands, fingers open, little, not upward but downward a little bit. Now, there's a little bit you have to pay attention to: don't have to open your eyes, remember that the left side is the desire. And the desire is the pure desire to become one with the Divine. This is the purest desire and that is represented by the Kuṇḍalinī, by this force, which is placed in the sacrum bone, or the sacred bone, in the triangular bone as they call it. Now, the desire has to be kept fixed; that means the left hand should to be kept as it is. Now with the right hand we have to work out the action of clearing our centers. First of all, please put your right hand on your heart, on the left hand side, because in the heart resides your spirit. It's better to put it under the coat. And just say... or, we should say, ask a question: `Mother, am I the Spirit?' Ask the question to Me thrice, in your heart, ask a question: `Am I the Spirit?' Thrice. This is an absolute question. You are! But at this stage you just ask the question.

You are the spirit, no doubt! But ask the question: `Mother, am I the Spirit?' Put both the legs properly on the ground, separated from each other little bit. Now take down this hand to the left side of your stomach, don't open your eyes, left side and press it little bit with your fingers. Here is the center of your guide, your master. Because the spirit is the guide and the master and as you have asked Me the question whether you are the spirit, you better ask another question here, saying that `Mother, am I my own master? Am I my own Guru? Am I my own guide?' Sincerely ask this question please. Lower down on the stomach, on the left hand side, lower

down. Yes. And put the left hand towards Me. Left hand should be towards Me, which is a fixed point, which is the desire that you want to become. This question is to be asked ten times, because of Ten Commandments. Or, there are ten petals to this center. Now again, raise your right hand to your heart position again, with your left hand at the same point. Press it a little bit and, again, with full confidence, please say for My sake, for your sake that `Mother, I am the spirit.' Just assert! You have to say it twelve times. `Mother, I am the spirit.' As the spirit is detached, is blemishless, it cannot commit any mistakes, it cannot have any guilt.

So raise the same hand, right hand, left hand keeping the same way, to the left side base of the neck.

To the left side base of the neck; it's very important, specially for Western people because they always feel guilty, for nothing at all. You are not to feel guilty! So, as you are the spirit, you have to say, `Mother, I am not guilty.' You have to say this sixteen times please. `Mother, I am not guilty.' You are the spirit and how can spirit be guilty? Don't feel any guilt about anything whatever you have done, the past is past. At this moment please say, `Mother, I am not guilty, because I am the spirit.' And what is your guilt after all, compared to the forgiveness of God's love? Because He's the ocean of forgiveness, He's the ocean of compassion, He's the ocean of love. Now raise the same hand. Put the left hand towards Me, that is important; you must keep the left hand towards Me on the lap, fixed. Say it sixteen times please. `Mother, I am not guilty.' Please say it with full confidence, is very important, I tell you. Most of you

catch on that center. Now raise your right hand above onto your forehead, across. Just put it there. At this point, you have to forgive everyone. Just forgive everyone! Everyone you have to forgive. Put it across.

Some people say it's difficult. It's a myth that we do not forgive, because what do we do when we don't forgive? So just say, `Mother, I forgive everyone.' Sincerely please say that `Mother, I really forgive everyone.' You have to just say it twice. But it is to be said from your heart, then it will work out. Now put this hand, after saying that, on top of your head, at the place where it was soft bone in your childhood, press it with your palm and just try to turn your head in a clockwise manner, pressing it. Just press it and turn it a little bit in the clockwise manner. Press it with your palm, press it with your palm at the point where it was soft when you were a child. At this point, I have to say, I am helpless; if you do not want to have your realisation, I cannot force it through. Because, as I told you, you have been given your freedom, which is respected.

So here you have to say, `Mother, I want my realisation, please give me realisation.' Unless and until you say that definitely, I cannot cross the barrier of your freedom.

So please say it clearly in your heart seven times: `Mother, please give me my Self-realisation.' Seven times please. Say it from your heart. Say, it, from, your, heart. Very sincerely, that's important. Earnestly you have to say that. Now raise your hand and see if there is a Cool Breeze coming out; or if there is a hot thing coming out: maybe some people will get heat first. You can change over the hand and see from the other hand and put the

right hand towards Me. You can see if there is a Cool Breeze coming in, or a hot breeze coming in. Why don't you see? It's there, it's there, it's there! Put your hand like this, right hand... like this... when... yes... also... and now you see. It's there? All right, gradually. Now you turn.

Again see another hand. Just try with another hand, you see? Again change over and see for yourself.

This will help you to get a balance. If you are feeling in your head, then see if you are feeling in your hands as well. Put your hands towards Me. See now if you are feeling in your hands. She's got it. You've got it, yes! If you put up your hands like this, open your eyes, just like this, you start feeling it in your hands: a little Cool Breeze or a movement downward. Start first feeling it. Are you? Good, good.

Some of you have a center caught up there. All right? Feeling it? Now bring it down and see for yourself if you are feeling it in your hands. Mm, very relaxed. Are you? Good. What about you, sir? Not yet? We will work out.

[To a Sahaja Yogi:] Just see? Now, there are Sahaja Yogis here who are sitting, who can help you also, those who have not felt it. It will work out, it is going to work out. It has worked in this lady: face is changed, looking so much younger. You too. What about you now? This gentleman, are you feeling now? He's got just a Haṁsa Chakra, this one. The one who came to Louise? Not yet? It's all right, it will work out. Now, don't lose patience. You must have patience with yourself. Please close your eyes, just close your eyes. It's going to work out. There! Now just watch Me without thinking. Let's see can you do it.

All right? What about these people? Aah, that's better!

***Contents: 1983-05-31*, Public Program, Going Against God's Will, Town Hall, Hampstead, London, UK**

From the very outset I would like to apologize for being so late today, but I realised that when something is very important, from God's point of view, all the negative forces work out their plans, how to delay, how to put obstructions, how to bring hindrances, how to deviate. It's very surprising. And, today I think would be best if I tell you about God's will and how we human beings try to go against it all the time.

God's will is extremely simple. He is Divine Love. He is Compassion. He's Ocean of Mercy and in His Mercy and in Compassion He created this world and then created human beings just to give them the highest thing in life, joy; joy which is [a] single thing, it does not have duality, like sorrow and happiness, like day and night. But how we are anti-joy and anti-God and why it happens, we'll have to see that.

Our awareness, as you know, grows through our brain, downward. And whatever starts growing downward makes us away from God, in a way. Ultimately we have to achieve God but first we go little bit away from that awareness, of being one with God, just to understand that freedom has to be used properly.

Without that training, without that education, [it's] no use giving freedom to human beings. You have seen the free countries, what have they achieved? In their freedom what have we achieved? Atom bombs to kill ourselves! I mean it is stupid, it's foolish, it's absurd, but we have

done it and we are proud of it and still we are busy how to make it even worse and worse and worse. This is how we move.

The awareness that was our own human awareness was given to us for freedom, to be tested, to be experimented, to be seen and then to have ultimate freedom, by which you become the Spirit. You have to become the Spirit ultimately. But as we start growing in our awareness, so-called, our concern is not for the Spirit. I would say, like a tree which embeds itself into its roots and the roots that we have are in the brain and then we start growing, upward, upward and upward, till the leaves are created, fruits are created, flowers are created [but] on the contrary, before reaching the fruit stage, what happens to us that we start creating artificial leaves and enjoying them. We take to artificiality. Once this identification of artificiality starts, we start going away from reality to negative thoughts, or to overpositive thoughts by which we make atom bombs and all that, so-called positive thoughts which are actually anti-God.

So there are two branches, really, in life that we branch off.

Some people like to go towards the left side of negative attitude by which they injured themselves, troubled themselves; [they] do all kinds of things by which they can die, in the most miserable manner, get all kinds of diseases upon themselves, torture their body, torture everything that they have. The another side is on the right hand side, where they move to torture others, to destroy others, to overpower others. Both ways we are away from God and His Mercy and His Grace.

The concern should be throughout towards the Spirit, then the movement is in the right direction. But this concern breaks up very easily in human beings because they are free to do it. In their ego they just break it, the connection they break it.

So much so that, when you develop artificial ways of enjoying life, then even the consciousness of God is lost; that He exists, that He has created us, that He's the One Who is running the show. We become so conscious of ourselves that we think there's nothing wrong. We do this, we do that, plunge into all kinds of problems and we don't understand that what we are doing is against ourselves and ourselves means against God, because God has created us. He loves us, we don't love ourselves. If we had loved ourselves, we would not have ruined our own body, our own systems, everything that we have, by saying, “What's wrong? Why not do it?" You must love this body of yours, this mind of yours, your society. Everything you have to love because God has created you in His love. But the `love' itself has becomes such a perverted word now. What is wrong in promiscuousness, it is love? If I tell that, “No it is not, because it is against nature. It gives you trouble, you will be in a mess. Listen to Me, it's not proper." Then people think that, “This Lady is very matronly, She is very old-fashioned, Victorian." But it's a fact! Why do things which will destroy? You can't create yourself; you can't even create a nose for yourself, leave alone the whole body. Then, why should we be anti-ourselves first of all? Then why should we be anti the society that we have created? Then against the whole nation that we have created? And nations and

nations and nations? What are they doing, these all these politicians today? Fighting for what? I just look at them, I can't understand what's the matter with these people, fighting to create more destructive forces, more horrible things to destroy innocent human beings? Those who are innocent are simply worried, they don't know what to do, they don't understand why they are to be dead tomorrow because some people have gone off their heads. And, those who have gone off their heads are sitting at the helm of affairs and we select them and elect them, all such people who are sitting at the helm of affairs.

That's how the negativity grows within us, we become negative. Both things are negative attitudes because they negate God. Negation of God is the first crime we have created. We are not afraid of that God or for Him. He's Compassion, He's Mercy, He's everything. But in His Mercy only He's going to destroy the world. He won't allow you to commit more sins against Him. He destroys even, otherwise, from within. What is cancer? What are all these diseases that are coming in our body? They are nothing but our own destruction forces that we ourselves have built within ourselves [which] are breaking. There is no fear from outside invasion, or from any star, or from any extra terrestrial attack, no there is not. It is within us. The attack is built within us, of which we should be aware. In the name of freedom we have collected within ourselves all the germs of our destruction. It is such a built-in process within us that we are not even aware that they are growing, that they are there. We are quite satisfied with ourselves, with our artificial life, with our so-called etiquettes and superficial mannerisms.

Innately within us there resides the Spirit which wants to enlighten you, which is anxious to enlighten you, to give you the peace, the bliss, the joy of your being. This beautiful lamp of yours which is being created, is with a great purpose. It has to be enlightened. Respect yourself! There is no `respect' word left in the dictionary today. Respect yourself! We have to respect this lamp which has the light of the Spirit, that it should be enlightened and let us be that lamp that shows the path of glorification of your being and in that light we can see God's Glory, too.

It's such a beautiful world He has created for us. Everything He has given us, but we in our ignorance and in so-called freedom have ruined so many things. It is sometimes shocking to see how people are going just towards hell directly. For a Mother, it is a thing of great concern: How to stop this pull? How to get them out of it? How to make them understand what is your worth, what is your value? You don't...

mustn't take human life for granted. It is a very precious life created out of many processes. With great difficulty it was created. Don't forget that you have to become the Spirit, without that your life is just a waste, the whole Creation is a waste because you are the highest in the creation, you are the epitome of the creation and what are you up to? We have to form nucleuses who will talk about Spirit now, openly about God. I was amazed to hear that in this country people don't like to talk about God. You cannot talk about God. As soon as you say, “God." “Oh nothing! God? That's religion. That's nothing to do with me." Can you imagine such a state of affair

where you cannot talk about your Creator? Either you form some sort of a closed, secretive organization where everybody can not enter into and say, “Now, we belong to certain cult of God." How can God have cults? Just think of it. How can He have separate churches and separate temples and mosques, how can He have? How can we become fanatic in the name of God? Can you imagine, this is what we have done to God! We have become fanatic.

There's a stone, a touchstone, when it touches anything it becomes gold. But there must be a stone, when it touches human beings they become like prisons. That's why there is so much fanaticism. It's a problem today. How to break this news and message that: you are the Spirit and you have to become the Spirit.

There is a Marathi poet called Namdev. Because My mother tongue is Marathi and thank God, I have been born in Maharashtra because it's a country of saints, thousands of saints lived in that country. It's the tradition, is so Spiritual! Spirituality is the tradition of that place where I was born in that Maharashtra, called `mahā' means the great and `rāṣht.ra' means the nation. I don't know why they thought of, but I feel that way, that the tradition is of spirituality, not of alcoholism or drugism or call any other `isms' as they are. But of spirituality is the tradition in that country where a very simple poet called Namdev, he was a tailor, himself was just a tailor, ordinary and he said, has written a very sweet poem, which I will just tell you, explain what he says. He says that “a little boy is flying a kite in the sky. He's looking at the sky, he's talking to his friends, he's

moving upward and downward and he's discussing things here and there but his attention is on the kite." Then, he says “a lady who is carrying her little baby, is doing the work in the house, she's giving water to her husband and she's also sitting down and cooking. Then she's getting up to wash something. The child is on her waist, resting but her attention is all the time on the child. There's a lady who is walking with a pitcher of water on her head. She's walking with many other ladies, they are all walking together laughing, smiling; young ladies talking to each other and discussing things, but their attention is on their Spirit, in the sense it is on that pitcher of water." In the same way we, though we have to lead a life here, of other things, it is absurd that we do not have our attention on our Spirit which is the giver of joy, the ultimate in life.

But as soon as you start talking about something like that, people think that it is something trash, not to be listened to. [It's] most surprising! They want to hear the same mundane things again and again.

You see, if it is a [political] broadcast by, say, Conservative Party or Labour Party, or another party, or any other party, they'll listen to it for hours together. It's such a mundane stuff. Every year you hear that. [In the 1970s and 80s in UK had regular political broadcasts on BBC television where politicians gave their policies.] But if somebody says that, “No, this is all artificial. You have something much more within you. Rise to that point!" They think it is something, “We have not come to hear all these things, what is this Mother telling us?" But now awaken and arise! On a different level we have to come

to understand that what these people have done so far and we have accepted it, we have taken it for granted all these years, has done no good to us. We have to rise above this to see there is, beyond the horizon, a star shining within us and that is our Spirit. People have talked about it, made another cult. Talk about God, made another cult.

This time I saw one thing in the BBC, they showed a cult which says, “We are doing God's work." Doing God's work? And, the ladies are tying up their thighs with thorns and things and hurting themselves, cutting their flesh. And the explanation is, just imagine in the name of God doing such horrible stuff! And the explanation is that, “You must have mortification." Why? Why should you have? “Because Christ did it." Are you Christ? And that means Christ, whatever He did is waste. Little bit of yours was needed to add. Whatever He's done is more than sufficient, because He was The Prince. And, if a Prince has to go through the mortification, it's a very great thing. Not for a beggar to go through the mortification: what is so great? He's already done it. He has worked for us. He's just to be enlightened within us and that's how we have to get to our realisation.

Now to sit down and to question is very easy. That's the easiest thing to do, is to sit down and ask questions. But best is to get to it, you get your realisation. That is the most important thing today. Of course, under the circumstances, as the human beings are, it is not going to work very fast. I am sure of it. I have tried My level best. Like mountains you have to raise the Kuṇḍalinī, really like mountains. You feel so tired and fagged out.

But then they don't want to appreciate it, so not to feel disappointed, not to feel hurt about it. Slowly and steadily I am sure, in your own eyes people will see the light. People will see how your life is transformed into joy and bliss and understanding. They will see how loving and dignified you have become and then they are going to believe that there is a better life for you.

The state is so bad for some people they see, as I told you, a black picture of the whole thing. They are so disappointed that they have given up. They have just given up, they said, “Now, we've finished with it.

We've done everything now. We don't want to do any more." I have seen in France many people are sitting outside and discussing that, “When are we going to have now the ten stars meeting together to collapse this world, once for all." They are discussing that, “Let us be finished soon now. We have had enough of it. Let's have the ultimate destruction, whether it was atom bomb or anything, let us be finished, had enough of it." It is so desperate. I can understand their desperation, those who are thinking about it, those who are concerned about it and bothered about it. No doubt one would feel desperate. Even the Sahaja Yogis sometimes get very upset and get extremely desperate and they say, “Give up Mother, just we're finished with it. Now, no more!" But I don't know how to remove My attention from the Spirit. If you can try, you try your level best to remove it; you cannot, now you are there.

So whatever it is, till the last breath of your life you will fight to save as many as possible.

So all those Sahaja Yogis who get very frustrated in certain endeavours, I have to say, you should not be frustrated. You have to keep your courage and understanding that, if you have feeling for others and if you really show your concern to them, they will understand you and will be able to get more and more people saved, emancipated and they will enter into the Kingdom of God. As you are enjoying, they will also enjoy. [The] only snag in the enjoyment is that you feel that so many are still lost. Doesn't matter.

That has to be made up. We have to work hard. We have to understand that there are negative forces which are pulling them down. They are ignorant, they do not know beyond this life, resides the eternal life of beauty and glory. But gradually I am sure it will work out. Specially for this meeting, they had lots of ups and downs and whole thing was very discouraging; but still, one must understand that God's work is blessed by God. He will render all His help, all His Blessings on you, to enrich you, to enable you to perform your Divine duties.

The time is passing. Very little time left now, it's running out and that's why the desperation is more in people. This desperation itself has brought forth the advent of Sahaja Yoga on this Earth and you should feel more stronger to fight these obstructions that you feel around and should work out the ultimate goal of this Creation.

May God bless you! I would request people to be seated now for a while, because we should try to get our realisation now.

One should have little time for oneself. There is no limit of time in Sahaja Yoga. Whenever the Kuṇḍalinī has to

rise, She rises. Maybe today, maybe tomorrow, maybe day after. Whenever you have to get your realisation, it works out. Only thing is we can expedite it, we can work harder to cleanse the path to achieve it, but we must make a start now and once it works out, then it is easy to handle it and to go further.

I am sure John must have told you about the Kuṇḍalinī. Moreover, you can take the books from here. There are little books published for the first people who are coming to Sahaja Yoga. It looks very complicated, it is not. Like the switch here, which can put all the lights to their enlightenment, in the same way there's a switch within you which is called as the Kuṇḍalinī and all this machinery is not to be bothered about. Once you get your realisation, the whole thing becomes very easy and you can get to it.

Of course, you know you can't pay for it. It's very low-level business to pay for it. People don't understand that: how can you pay for God's love? They can't understand, this is beyond their mind because whatever they have got today, even the air they have to pay for. And you cannot put in any effort, or you cannot put in any paying, or any troublesome things for yourself. Moreover, there is complete freedom for you. We cannot bind you by writing down a, sort of, in your name in the ledger and then making you a member and giving you a member card. There is nothing like that in Sahaja Yoga is possible, you can see it very clear, it is not possible. If you understand on what level I am talking. You are absolutely free to get your realisation, absolutely free to move further with it and even at that moment if you want to leave, you are

absolutely free to leave. There's nobody who is going to ask you to come back.

It is your own desire, it is your own wish and it is your free will that is going to be respected.

So nobody should think that we have a membership like a cult has, or there is any fear that if you get out of Sahaja Yoga, then these people will catch hold of our necks and bring it back.

So it is not so.

It is a welcoming place and also it has an exit door.

Some people just get through one door and get out, like a shuttle. No problem. It's alright for us. On the contrary, one feels relieved with such people, because if they cannot stick on they cannot get to Sahaja Yog. Like any tree, supposing if you embed it in the ground and start shifting from there, what will you do with such a tree? It cannot exist, it cannot grow.

So, it is your own understanding that you have to take to, your own wisdom. We cannot force Sahaja Yoga on anyone and neither we want to. Nor Sahaja Yoga is going to fall at your feet and give you false ideas. Whatever it is, you see for yourself and receive the blessings of your Spirit. Grow in it. Understand it fully and enjoy it.

This kind of state never existed in human life before. It's a very new world I'm talking about. Wherever you go, you have to pay and then God knows whether you enjoy it or not! But here it is within you, it's all within you, it's there, only thing is that you have to know yourself.

Now, in a ego-oriented personality there can be a question, “Why Mother should do it?" It's a thankless job,

I tell you. If you can do it, I'll be very thankful to you. It's really a thankless job in the sense that you feel so hurt, when you work so hard on a person, give him realisation, raise the Kuṇḍalinī, really work very, very hard; and then the person just turns out to be a criminal somewhere, you just don't know what to say. It's like a mother who gives birth to a child, looks after the child and makes it grow and then he ends up like a criminal. It's very, very saddening, but doesn't matter.

Now, I started My Sahaja Yoga, as you know, with six people. For four years, I was laboring with six people in England, in London, you can imagine! [Laughing.] Then we got the seventh one and then the eighth one. Then two ran away, so only six were left, you see. It was like the mathematical questions you get where you say, “A person came to work and he ran away second day; then another came, ran away after third day." Same thing! I used to wonder, “How can there be work and how can the work be finished, with these runaways?" In Sahaja Yoga also we have such problems, but also you should know that there are people who have felt it, their own glory and they have risen up to it and come up.

From England I have great hopes, very great hopes. As I said that England is the heart of the Universe, it is the heart of the Universe. Specially Hampstead is what we call the jiggery [sanskrit], is that muscle of the heart which thrills, it thrills the heart. Hampstead is even much more important, which gives the thrills, you see. And so I expect that we will have people of great poetic qualities and of great sanctity in this Hampstead and where a day will come that will see the glory of God's Love and His

Kingdom born in this Hampstead. To the people who do not know about England, the deeper side of it, it's just another country in Europe. To Me, it is not. To Me it is very important. And, that's why I have been working here for ten years. This is the tenth year I am working, I hope to do more for two years. While in India, I have worked hardly for two years, but there are thousands and thousands of Sahaja Yogis, while here we have about [a] thousand in London. That's a good number to start with.

So if you have any questions you may ask Me and then we'll have the session of realisation. But I have to make one humble request that you should not at the time of meditation leave the place and behave in a very absurd manner. That's not proper. You must respect. You must respect others who are trying to get their realisation.

So, it's better you leave earlier, otherwise you be civil to them and get your realisation also. It may work out today, quite possible as I have seen the other day in Brighton, they all got it in one shot. Why not in Hampstead? Which I think is a very great place, is a very subtle, special place in the heart of the universe.

So it should work out here.

May God bless you! Now, ask Me questions if you have any, without any fear, but not irrelevant, stupid questions, you understand that. It's not good. I would not like to waste time of people who have come to seek the Truth.

So, please ask Me questions if you have any or we will go in for the realisation.

No questions? Wonderful people! No questions at all? Yes, yes please?

Seeker: It's not really a question it's just I find it hard to hear what you are saying. Is there a way of adjusting the microphone or something? Douglas Fry: He can't hear at the back but unfortunately the microphone is at maximum so we're not able to get?

Shri Mataji: You can't hear?

Seeker: No. It seems to distort.

Shri Mataji: It's not alright? What did he say? I didn't follow.

Shri Mataji: You couldn't get any words to yourself, did you say that? Same with Me, I can't hear you. [Laughter.] It's mutual but doesn't matter. You see, even if you have not heard Me, makes no difference, nothing. Love has no language and this Divine Power has no language, alright? Did you understand that much?

Seeker: Not that much.

Shri Mataji: Did you follow Me even that? I am saying that love does not require any language. It is an All-pervading Power which is everywhere and, whatever may be the language, it makes no difference.

It is a silent language which will work it out.

I was surprised some of the Sahaja Yogis who went to India were very silently meditating when I was speaking in Marathi or Hindi. And, I was amazed how they were so attentive. They said, “Thank God! We did not understand, Mother, what You were saying, so we were not putting out mind into it and we were just enjoying the vibrations." Isn't it surprising that they would sit for an hour or so just listening to Me in some foreign language? Alright, doesn't matter, alright! What's wrong with your

thing, you see? Acoustics are wrong? What's wrong? They can't hear Me.

Douglas Fry: The microphone is as loud as it can be and I think there's probably a problem with the loud speakers themselves. Unfortunately we're not able to get to the controls. We can't get to the controls Mother like we can at Caxton Hall.

Shri Mataji: Alright? Sorry, for this, some sort of a mechanical problem. But doesn't matter, the mechanics in you are perfect. I don't know a word about this electricity business that you people have created, not a word. I don't know how it works, but as far as your Kuṇḍalinī is concerned, I'll work it out.

[Laughter.] There's no problem on that! Alright. The acoustics of this town hall may be wrong. Alright. Now, what should I do if they can't hear Me? Can you hear Me now, the gentleman, alright?

Seeker: I think [Shrī] Mātājī, one of the things is you have a soft voice and at the end of the sentence the voice disappears.

Shri Mataji: What about Sahaja Yogis, you heard Me fully? Sahaja Yogis: Yes.

Shri Mataji: There's a little difference, I'll tell you. I must confess to you very humbly, that when a non-Sahaja Yogi speaks to Me I find it difficult to understand, but if a Sahaja Yogi speaks to Me, is easier.

I must confess it's a little defficiency with Me, is that. That's why if anybody asks Me question, even in the first row, I'll ask some Sahaja Yogi to tell Me what's there, because My ears are, I think, little bit not so alright.

So it is with you people also may be that once you get your realisation. Now, the Sahaja Yogis are sitting at the back and they can hear Me every word.

So there's something wrong with this voice of Mine, because it doesn't adjust to your ears, for the frequencies, I think. Doesn't matter, it will work out.

Alright?

Seeker: The only thing is it's difficult to understand if you don't hear. Are You saying it's not important to understand?

Shri Mataji: No, it is important to understand, but not to think about it. Forget it. Forget it.

Don't think too much. Whatever you don't to have to understand, you better not understand because sometimes, you know, talking becomes a barrier and listening is another barrier and then thinking is the worst. Alright? [Laughing.] So, let us see how it works out. Alright? Let us see how it works out within.

You will gradually understand what purpose My speech serves, gradually, alright? I have to speak with a purpose, but what is the purpose? That you will understand little later if you don't mind, but just now you must understand the purpose of your life, that is your Spirit and get to it. Now is it clear what I said?

Seeker: That sentence, yes.

Shri Mataji: Yes, alright. Thank you. [Laughing.] Now, let us put our hands towards Me and Me towards you. Now, I think, you see, this also slips out. You see, I'm very bad at electrical things. I never know even how to open My radio. I am so hopelessly bad.

So, if I'm making mistakes, you should not mind because I am nothing so mechanical, you know. I don't understand.

So, what you have to do is to be relaxed in the sense that don't put any strain on your neck or on your body. But sit straight and no strain on the neck at all. Neck, we have strained too much.

So, leave it in the center, not too much at the back, nor too much in front, but keep it in the center because this neck has a problem. Alright? Now, you have to stretch you hands straight like this towards Me and close your eyes. That's all. You have to take out your spectacles, if possible, because it helps also your eyes. And, take out your shoes, if possible. One should not have anything tight on the waist or in the neck, little bit loosen. If it is not uncomfortable, that's alright. If it is comfortable then it's alright. First thing is you should be comfortable and not disturbed. That is the main thing and not to have any fears nor any guilt. That is very important not to have any guilt. Whatever I have said I have not said for you, so you don't have any guilt built in you. Just say, first and foremost thing, after closing your eyes that, `Mother, I am not guilty.' Say it thrice with full confidence. I request you to say that. Please say that, `Mother, I am not guilty.' Please! This is how you respect yourself. You have no business to condemn yourself because you are the temple of God.

Seeker: Mother I am not guilty

Shri Mataji: Just say it in your heart, but with full confidence, not doubting yourself at all. For My sake, please don't doubt yourself. Just say, `Mother, I am not

guilty.' And, forget about what you have done or anything, forget the past. I am talking about the present, at this moment.

So, just please say, `Mother, I am not guilty.' It's a very important thing.

Now, keep your eyes shut, please don't open them, because once the Kuṇḍalinī starts rising, you have to keep your eyes closed and the attention will be attracted inside and after it reaches the Āgñyā Chakra then you will become thoughtlessly aware. There won't be any thoughts but you will be fully aware.

So, please don't open your eyes till I tell you. This is one thing you have to do. That's all. Not to open your eyes till I tell you.

Now, the left hand should be towards Me, throughout. Left hand is symbolically indicative of your desire. And, the right hand is your action.

So we have to use the right hand to express our action. The first thing, as I told you not to feel guilty but I know you are all feeling still guilty because I can feel on your Chakras. Now will you please again say it three times, otherwise you'll be punished for thirty-two times or sixty-four times. That's the only punishment you have to have is to say, `Mother, I am not guilty.' Now, put the right hand on your heart. Heart. Here resides the Spirit, in the heart.

So with the left hand towards Me, open towards Me, you have to say, `Mother, am I the Spirit?' Ask a question, `Mother, am I the Spirit?' Now, you must know when you are the Spirit you don't need anybody to guide you because you will be enlightened by your Spirit and the

Spirit will guide you, because after realisation, you develop a new awareness by which you are guided through your vibrations.

So you have to put your hand down on the left hand side of your stomach where to say, `Mother, am I my own master? Am I my own guide? Am I my own Guru?' Anyone of these questions you can ask ten times. Establish your confidence first, that you are the Spirit which is above, detached and is the source of joy, complete source of joy. With confidence you have to ask these questions. I am here to answer them.

So, please ask the question in your heart saying, `Mother, am I my own master? Am I my own Guru?' Put your hand on the left hand side stomach. Here is the center for the establishment of your Guru principle, your masters principle. You are the master, as I say, of your body, of your mind, of your intellect.

You are not to play into them, but you become the master. You don't need any Guru. You become your own Guru. That's better now.

Now, raise your hand again to your heart. And now, with full confidence you say, `Mother, I am the Spirit.' This you have to say twelve times, because the center of the heart has got twelve petals.

So you have to say twelve times, `Mother, I am the Spirit,' with full confidence and respect of yourself, which you are. You are the Spirit, no doubt, but just assert! That is how we are clearing our centers.

Now, raise your right hand to your left side at the base of your neck. This is another center which gets caught up when we feel guilty. Now, those who have said that, `I

am the Spirit,' you must know that Spirit can never be guilty of anything. It is a sinless, beautiful, brilliant diamond within you. It cannot get contaminated by any guilt.

So, you have to say now here eight times, `Mother, I am not guilty.' For those who have always felt guilty can say sixteen times.

Now, raise this hand on top of your head and put it at the fontanelle bone area which was a soft part in your childhood and put your palm on top of it, on top of it, let it rest. And now move the head in a clockwise manner, pressing it down with your palm. Just press it down and move it in a clockwise manner.

If you do it from the side you'll do it better. Hold it from the sides, put your hand sideways, not from front, [then] you do it better. And now turn it, little bit pressing it down with your palm. Turn your hand, not your head. At this point, again, your freedom is to be respected. I cannot cross over it.

So you have to say that you want your realisation. You can say, `Mother, I want my realisation. Please, may I have the realisation.' Please say it seven times, just pressing it. You must touch your head. It's all hot, you can see that, the heat is coming out. You must touch it and press it down and see such a lot of heat is coming out. Now, seven times you have to say it.

After that you can raise your hand and see if there's a Cool Breeze coming in. This is the Cool Breeze of the Holy Ghost.

So you can ask a question, `Mother, is this the Cool Breeze of the Holy Ghost?' Every one of you, you can

change your hands now. You can use the left hand. Put the right hand towards Me, keep your eyes shut and ask the question, `Mother, is this the breeze?' All of you should get it, it's possible! Change your hands again, if you want to. You go on changing and see if there's a Cool Breeze coming out. It has to be Cool Breeze. First the heat will come also is a good sign that the heat is going out, all the heat with tension and all that, is going out.

Hmmm! It's working out. It's very subtle. We are moving from gross awareness to a subtler awareness of the roots, so naturally one has to pay attention to it.

Little in front, it is not at the back of the head but little bit in the front side. Try one after another and pay attention to it.

It's very hot today! Hmmm. Now, without opening the eyes, again put back hands towards Me, like this and see if there's a Cool Breeze coming to your finger tips to begin with. Just put both the hands and see if there's a Cool Breeze. Ask again the question, `Is this the Cool Breeze of the Holy Ghost?' Ask thrice. Means the Kuṇḍalinī, Kuṇḍalinī is the Holy Ghost.

How is the lady? It's alright. Don't worry, she'll be alright. She'll be alright. Don't worry, don't worry, she'll be alright.

Don't worry, she'll be alright. She'll be alright. I am looking after her. She'll come. She'll be alright.

Now, if you are getting Cool Breeze in the hand, you can also now see it, if you raise your hand. Open your eyes and raise your hand, slowly open your eyes, slowly. Raise your hands like this. Like this, as much as you can stress, let's see.

Yes. Are you feeling? Are you feeling the Cool Breeze? Are you feeling the Cool Breeze now? Those who are feeling should say, `yes.' Seekers: Yes.

Shri Mataji: Alright. Now just put your hands like that and see now if you are feeling the Cool Breeze.

Close your eyes and enjoy yourself. Just enjoy yourself. Close your eyes. At this time there are Sahaja Yogis here who will help you to completely establish the experience and to see if there are any obstacles.

Sahaja Yogis should do it very carefully without talking and raise the Kuṇḍalinī in some people if necessary in some people. Don't talk to them, don't touch them, just start raising their Kuṇḍalinī. Slowly try to do it. Keep your eyes shut, they'll work it out for you. Now those who have come for the first time and have felt the Cool Breeze raise your hands first of all. First time who have come and felt the Cool Breeze raise your hands higher. Yah, good. It's good.

So, please put down. Then did you see them? Can you work on them and see. And those who have not felt please raise your hands: at all, the Cool Breeze. For the first time who have come and have not felt the Cool Breeze, raise your hand.

Alan, behind you, the gentleman who could not here Me. Alright, then it's alright, he's done. Now just see the people who have not felt the Cool Breeze. Please raise your hands please... this one gentleman, this lady, this gentleman?

***Contents: 1983-06-06*, Public Program, The Essence of Sahaja Yoga, Holborn Library, London, UK**

First time that I have come to this area.

Alright. Now the... essence of Sahaja Yoga, I am sure Mister Govindram must have explained to you what it is. And so many of you are from Sahaja Yoga itself.

So I need not explain to you all the details.

But today we have to understand one thing that it's a very serious time we are born into, extremely serious.

And when we look at life we do not understand that if we miss this chance of our evolution, not only that we'll miss it for ourselves, not only that we'll miss it for England, or only for one country, but we'll miss it for the whole creation. The trouble is, in the name of God, in the name of evolution, in the name of higher life, so many spurious people have come up that it has become impossible to convince anyone that there is something like Truth left in it.

Under these circumstances, one has to talk about Truth. And talking about Truth doesn't give you the experience of the Truth at all. Discussing about it will not give you, it's a different realm in which one has to go into, it's a new awareness which you have to get, to understand the Truth, for which I don't know how many are prepared and how many would like to know and even if they like to know, how many will get it.

So the problem is the other way round. It's not the problem that you have few people, it's not the problem that Sahaja Yoga cannot give you Realisation, it's not the problem that you will not know the Truth, but the whole circumstance is such, that whatever is false, whatever is spurious, whatever is silly, stupid, appeals to the masses.

Sometimes I feel I have developed a method by which I can give really en masse Realisation all over the world. Definitely I have. But the problem as it remains, the masses are not interested. It's only very few who really can keenly take interest into their evolutionary process and would like to come out of the ignorance in which they have been living. In all the ego-oriented countries it's very difficult to establish, that we are still ignorant, we have to know a lot. It's very difficult. Because they think we know everything, because we have been to the moon like the Russians say, “We never saw God, we went to the moon, we never saw God." It would be like saying that I have come to the third floor, I haven't seen God.

Where does God reside? Where it manifest within us? In what way it manifest, we don't want to see.

What we want to see is that through our effort, if we have not been able to see God, then He doesn't exist. This is the way our attitude is. But better say, `No,' to all that we did not know through our effort, because so far we have not known about Him.

So He doesn't exist.

So you turn round in a cave when you see the shadows of yourself, you believe in them only and say, `It never existed anything else, the light does not exist.' That kind of an attitude exists or is persistently I am facing. And sometimes, I don't know how to give them Realisation.

Now as I said, it's the other way round. You have to seek. You have to ask for it. You have to truly ask for it. Nobody is going to fall at your feet and say, `All right, you get your Realisation. All right, you have this for heaven's sake, just have it.' Because nothing is selling here. You

are so much used to the salesmanship, you see, you see, that we think that if anything is selling, people have to persuade you, to request you, ask you, you can save pounds, you see, for sale and all that. But nothing is for sale. That's a very difficult proposition to understand in the present atmosphere, where we do not know if you can get anything that is not for sale. But, I hope slowly and steadily, all of us have to get it.

Somehow, one has to work very hard.

Sometimes it's very frustrating and it's so stupid the way people react, that I just don't know what to say. Like the other day we had a meeting in Brighton. I was laughing all the time. But so saddening. A gentleman came to our program and he complained, he thought, he said, “I was videoed." See, who has got time here to put him for a video, who is interested in taking his photographs. I mean, he says, “I am a managing director." So what? In the presence of Divine, what is a managing director, what is a King, what is it? Just think of it. Who is he? What does he think of himself and he has complained against us. I hope he doesn't go to police for that. Even the laws are so stupid sometimes, I can't understand, how has he got any right to complain if you come to a program which is being conducted with a video on Me and if you are photographed, how can you complain? One thing I feel that on one side is such stupid, useless people, the other side are such great seekers.

And how to reach them? Like a diamond covered with lot of mud.

So much mud. It's all mud. In that to find out those diamonds, to dive into this mire of ignorance, to get out

these diamonds which are lost. It's such a concern, that I feel sometimes that this mud is going to cover their brains, their ego, everything and they may not receive their Realisation. They may miss this point.

Actually, Divine does not know what human beings have created. Really, I tell you, Divine has no ideas what nonsense you have created around. All kinds of nonsense you have created out of your ignorance, out of your ego, out of your choice that you had. I can't explain why people have created this kind of ignorance which cannot be broken, cannot be removed. Because they are so much identified with it. It's like a stuck-up stamp which cannot come out of people. And when such a thing happens you feel, Oh, God! The whole creation has been created, whole working has taken place, the human beings have grown so well, out of a amoeba they have been brought to this stage. Now in this modern times you find the human beings so stupid, so foolish and deluding others with their stupidity and foolishness.

How are we to approach the people who are true seekers? Have been seekers for ages? Those who have sought for years together, all their lives before, who are lost.

Sometimes it is very, very disappointing. But still, hoping against hopes, I hope we reach all the corners of this universe where we find all the people who are true seekers.

It is their right to know, it is their power to know the Divine. It's not for everybody because he's somebody is a managing director or a king or anything. What does it matter in the presence of God, they'll be pushed out.

They will not be allowed to enter into the Kingdom of God. Who will be allowed to enter into the Kingdom of God. Those who have known. Also, not those who just talk about God. Those who say that, “We are the worshippers of God, we have learned so much." They will say, “All right, go with your books to the places from where you have come." What have you to know is through your awareness, in your awareness you have to know. The awareness has to be enlightened. It is not, what you know it is human awareness, which is still at a point I say has to grow so much. First it has to be awakened and then it has to grow in its light. It's such a lot of journey we have to do even after Realisation.

It takes no time, sometimes, to give Realisation to many people. I know it has happened with so many.

But, they don't know what they have to achieve. It's such a horrible stuff is this ego is, that people don't want to see what they haven't got with them and what they have to hide, have and what they, they deserve. They are so identified with ego and satisfied with it, that they don't want to see that beauty that lies within them, the Spirit, the reflection of God's Love which is like the highest and the most precious thing that you could think. In this England, I don't know how many lectures I have given and how much I have worked hard. Of course there are results, no doubt. But it is so slow. Compared to the fake, compared to the artificial people, compared to the people who have made money out of you, those who have exploited you, have ruined you, Sahaja Yoga is working so very slowly.

I would not have been so much disappointed if it was at the time of Christ because at that time there were very few seekers. Actually even the fishermen who Christ collected, were not seekers. You are seekers of the Truth. And so many of you have taken birth just to seek the Truth. And where are we going? What are we doing about it? What are our ideas about the Truth? Can we have our own ideas, conception about the Truth? Is it not that our ego itself has given us lots of ideas? Is it not that we do not want to see the Truth? I meet all kinds of people in this country. I must say they are very highly placed, very great, somebody is a lord and somebody is a lady and somebody is another huge personality and this and that. But, they said, “Who wants to change?" I said, “Really. That's true." Because they think they are the greatest people ever born and they're going to take all their lordship with them to the heaven. They said, “Who wants to change?" I said, “Then, such a lot can be said on the point, but if you don't want to change, that's a full stop, complete full stop. You cannot talk to them." Now this, I must say is, only can work out with people who are seekers, who want to know, through their awareness, what is the Truth? You have to know your Spirit. Without knowing your Spirit, you cannot know what is the Truth. Whatever I may talk to you is a waste, complete waste because you haven't got that awareness today, to know what I am talking about.

So, first thing is, I request you to become the Spirit. Is simple thing as that. Like now I have to see into your skin for example, I'll have to use a microscope. And then people will say, `All right, to see through the microscope

you cannot see with your naked eyes.' All right. Supposing I want to listen to somebody's heart, then people will say, `Use a stethoscope, otherwise you cannot listen to somebody's heart.' All right.

You don't question that time do you, you just put it there and try to listen. In the same way, why not we do about the Spirit, why not we do what it is told to you, that you have to get your Realisation, that you have to become the Spirit first, that unless and until this awareness is enlightened by the Spirit, you cannot see. Is like telling something about the colours to a blind. You have to open your eyes, but this simple thing also people don't accept. The reason is people are very naive. They don't know, what is it and also they don't want to understand. Now as you see a tree standing there and so many trees are there, you must also know, that there are roots to it.

But somebody has told you there are roots. You may not believe into it, but why not see, is the point.

Why not see if there are roots or not? Supposing I say, `Whatever you are outside, you are much more inside.' So why not we see it? This is a simple question we should ask ourselves, `Why should I put any barrier to that seeing, if that is going to give me all the best in this world. If it is going to give me, even the inkling, of that beautiful thing called Spirit, why not have it?' You don't have to pay for it, you don't have to exert for it, you don't have to do anything, but you have to desire. This is the point I am trying to make, that if you do not desire from your heart, then God is not going to fall at your feet, now please desire for Me, is He? It's a simple thing like that and if you people understand that you have to really

desire it, because it's such a vicious circle I must tell you, that this Kuṇḍalinī is not here the picture, the Kuṇḍalinī is the pure desire within you. Is the desire which is not yet manifested, it is not yet awakened in the sense that it is acting, but it has not acted.

So, if so, how much important it is that you should have the desire to be one with the Divine, to be in Yoga, to be one with your Spirit.

The desire has to be strong, if it is not a strong desire you are challenging your own Kuṇḍalinī, you are anti-Kuṇḍalinī and then the Kuṇḍalinī won't rise. But what is this brain has achieved so far, just look at it. You must understand, what have we achieved by this brain? For example, this stupid managing director whosoever came there, just ask him what good has he done to anyone? What does he know about spiritual life? What does he understand about Christ's life? But if he sends a letter, the newspaper is very willing to write it down.

I mean look at the stupidity of the whole stuff. Without understanding that anything that has to go to the masses should be something sensible, from a sensible man, who is supposed to be an authority on spiritual life that he is talking about. What good this fellow has done, nobody reads that. But if I write something or any Sahaja Yogi says that, See, by coming to Sahaja Yoga we dropped down all our bad habits, I got cured of my cancer or anything, nobody wants to listen to Me. They think you are mad. But a man like that, if he writes, then they publish it.

So it shows very clearly that you see we are living with people who are really not only mad but are absolutely

foolish people, who have no sense at all as to how they have to live and how they have to move.

This is what we have come to know about so many people now, that sometimes you people have to take upon yourself to go into it and find out what is the Truth. It is you who have to find it out. You see, it would be something like that I say now, “This is a place where there are lots of diamonds” say, I say that, or, “This is a cave in which, if you move there, is a lot of say, gold." Now if the gold is not going to come out from there, is it? Simple as that. You have to go towards the gold to find it out or not. You have to go towards it, but here I'm not saying that you walk towards anything or do anything like that, just you have to desire and desire it from your heart. Is impossible for Me to work out Kuṇḍalinī if you do not desire, because the desire, the pure desire, is the Kuṇḍalinī. You understand My problem is now.

Pure desire is the Kuṇḍalinī and if you are against your pure desire, what can I do about it? Can I force it? You cannot push it out, you see, like a seed if you have to, if you want to have a seed sprouted, you have to put it in the Mother Earth, but you cannot take it out the bits of the seed and sprout it, can you? It's a living process and for this living process you have to have a pure desire. And if that desire is not there, I am breaking My head against stones, I feel.

So it is important that you understand that you must have that desire which is the highest. But if you are satisfied with things which are useless and nonsensical, then what am I to do with that? Now you just tell Me with someone who is interested in things which are

nonsensical, now how do you bring them round. I mean, there is no psychology that can bring them round, you see, because you have to have the desire to be all right. But this is something so innate, being the process itself is a living process and doesn't work out if the people do not have the pure desire. Now this written down since long. It cannot be changed, it cannot be forced, it cannot be sort of explained, or discussed, or argued, nothing can be done; it has to work out within you. Now even when you have worked it out on someone, you may not achieve the results. That's possible. You may, you may not.

So, when the situation is so difficult and where the children are also so adamant, then what can Mother do? Is to push them in. See, I am very much concerned, that this ego which is sometimes so selfish and so conceited, that it satisfies itself and it's very happy, it will not allow you to get to the, that point where you really stand, where you have all your powers, where you are the master of your being. It will not allow. The identification with the ego is so much, that's easy to take a bull by the horn but to take a ego-oriented man through Sahaja Yoga's practices is very difficult.

I am rather today in a mood of, I should say little disgust, I should say, but also the other mood comes on Me, of complete compassion and tremendous love. That somehow I should do something to bring sense into the heads of these people.

Something should happen to them because otherwise what I see is a complete disaster. It's going to come, believe Me, it's going to come. I don't want to frighten you like Mrs.

Thatcher does about Russians. That might be imaginary. But this is real and I am telling you it's going to come to us. It will come as diseases, self-destruction. But the greatest thing is the failure of the Divine Itself that it could not communicate with you people, who were made specially, who were brought to this Earth on this time, who have to have the Kingdom of Heaven. And suddenly you find they all dropped out of the sieve.

Sahaja Yogis also sometimes feel very frustrated, I know. But whatever it is, as far as I am concerned, I have tremendous desire now. But I am so desireless that this desire also may not work out. You see, I am a desireless person. Now what to do.

So I ask Sahaja Yogis to desire, that the people should have that great desire to become the Spirit. This is the greatest thing that we can give to our brothers and sisters, to the progeny, to the people who are children today, to this beautiful world. We need these beautiful lights and the beautiful time which they all have to enjoy.

I hope those who have come for the first time will understand My difficulty and will try to see that you desire only your Self-realisation and nothing else. Just desire that. I request you to desire your Selfrealisation and forget about everything, even if you are managing director or may be the King George the Vth, you see? Better keep all your *[UNCLEAR* shoes/issues] outside about it and just desire that you become the Spirit.

You see the difference between Me and Christ is here: He got so fed up that He said, Let Me be crucified. I mean, of course it was in the plan that He should be crucified also. But I mean that won't solve the problem now. I have to

see that you all get your Resurrection somehow. It's like a Mother's desire who wants to give a bath to the child and get him cleansed somehow, you see.

So whichever way you like, whether you like a chocolate or whether you like a little rebuking or whatever way you like, I am willing to work it out, but please at least desire that you have to have your Self-realisation.

May God bless you all.

I hope those who get Realisation will settle down with it seriously, understand it is your responsibility to know that you are born today here in this country, which is a special thing for Me and for Sahaja Yoga and that you should get your Self-realisation, understand it very well and digest it and go into it and become a very, very powerful personality that you have to be.

But even a small thing like that, they said, “You take out your shoes." Because, you see, shoes make you little bit tightened up. Even that much if you ask them, oh, they, as if I've asked a hundred pounds from them! Even that little thing they don't want to do and why are they here, I don't understand, all the way they come for what? You don't want to get your Realisation? You don't want to get the greatest blessing of the Divine? Then what am I to do? How am I to deal with you? You may be very well educated person, all right, a learned man, but you have not known so far. It happens with Gurus, it happens with everyone, they are sticking on to a Guru and they are sticking on to a Guru that cannot give up that Guru, whatever it is, is another kind of a ego because they think of, `All right, we have eaten the crow; so what if we have eaten the crow, we have eaten the crow! So, go

ahead with it.' This is another category of people who don't want to give up whatever is nonsensical.

Then the third category is another one who are just waiting, “All right, let the catastrophe come. We are just waiting." I mean, they told Me, “Mother, doesn't matter, don't You worry, we are waiting for the catastrophe. See, disaster. When is it going to arrive? You just tell us that. We are all anxiously waiting.

If it is coming, it's a very good thing, now we are reconciled to a situation like that." On the streets of Paris, if you go there, you find many like that, discussing, when are the ten stars going to meet, so that we are all collided and made into a jam. We won't be made into a jam, I must tell you, but something horrible which is one thousand times worse than what you are doing on the streets of Paris.

But this kind of attitude of three types of people, I don't know, I may, I'm thinking, now I have been in London for so many days and My going time is coming and I don't know what's going to happen now, because Sahaja Yogis themselves are desperate and they all want to settle down in India. I will not allow them to settle down in India unless and until they at least get half of the English people realised.

Yes, that's for very sure. If you think that now Mother has gone there, so let us take our baggage there and let us settle down in a nice little ashram enjoying yourself, nothing doing! You have to work hard.

You have to get at least half of the British people realised somehow; if you can't do it, you're not allowed to enjoy

any rest and I, too, will not be able to have any rest in My lifetime, if these things do not happen.

I hope you all understand My concern, My great concern and My love for British people here who must understand also their place in this great work of God, how they should come.

May God bless you all.

Contents: 1983-06-13 **Talk to Sahaja Yogis, Wedding Party of Ray and Chantal Harris, Flat, 52 Darwin Court, Gloucester Avenue, near Regents Park, North London, UK**

I'm sorry I'm late.

I couldn't find very much. I just found this present.

[When opened, it was a sandalwood box with four elephants on the top.] That's four elephants for your four children.

[Later on they had four children even if they wanted only two.]

Contents: 1983-06-13**, Public Program, The Attitude Has to be Earnest, Porchester Hall, Porchester Road, London, W2, UK**

When we say in the newspaper or in an advertisement that you come to such and such hall for your Selfrealisation, I don't know what people think about it Perhaps they think that it is another hocus-pocus or some sort of a cult or somebody making proposition. But there are some who may not think that way but they want to have their Self-realisation and they come here. But one must understand that the attitude which we have

towards ourselves has to be really very earnest. To raise your Kuṇḍalinī is not so difficult and to give you so-called realisation, also not difficult in the sense that you can feel the Cool Breeze of the Holy Ghost coming out of the fontanelle bone area. You can get your baptism. But I call it so-called because the journey later is the difficult thing. If the attitude is not earnest then you just loose it in no time.

So where the people are very ego-oriented, I should say, convex personality is there, it is even difficult to give realisation to begin with and even if you give realisation, to maintain it and to make them grow is even more difficult, much more difficult. Now sometimes Sahaja Yogis ask Me, “Mother, how is it that in India You may give realisation to thousands and they all stick on, while here when you give realisation to people they just come or go away, or are wasted as described in the parable of Christ of the seed, that some seeds just were lost in the rocks?" So why it happens here? I would not blame them but I would say that they have had no knowledge what Self-realisation is, how difficult it is. If you read Patanjali's `Yoga Shāstra' you'll be surprised how they were taught how to lead a good, righteous life after marriage. What was the relationship of a husband and wife; what was rhythm of sex life; how they should treat their children; how to develop their attention towards God every day. All these things are absolutely missing from the lives of people who have turned their backs to God. Now, whatever you may try, turn your backs to God or to yourself, to your spirit, it exists and it asserts its own existence in you. It does. Even if you try to defy it and

deny it, it comes up and so people are seeking and seeking. The tragedy of the whole thing is that very great seekers have gone in the West where people have no knowledge what is Self-realisation and what one has to do to achieve it and what a great blessing it is to have it. This is the biggest problem we face all over and now that I am going to America I will also get the same problem there. Now the thing is, people have full idea as to the value of a diamond. They know if the diamond with so many carats, it means this. If it is awless it means this. If it is purest blue then it means this. But they don't know the value of their spiritual life; they don't know what it is to be spiritual. Under these circumstances, naturally, what happens that when even they get Self-realisation they cannot stick on to Sahaja Yoga and grow further. Not that they lack in quality. I would say it is not so. I would not say that they are the people who are good for nothing; they are not good for spiritual life.

So all the Sahaja Yogis must have a very compassionate and understanding attitude towards them, that when they come to you they have no knowledge. They are not trained that way. They are not taught that way, by which the people in the countries where they have lost themselves in the material gains should again read some of these books into details and try to find out what kind of life human beings were supposed to lead and what kind of life we are leading now. Now the word there is yama niyama, is a word in the Patanjali Shāstras, yama and niyama. The niyama are the rules for yourself, what rules you have to observe and what rules you have to observe for others is yama, where, how to deal with

others, what should be your relationship to your wife, to your children, to other relations that are there and how you must respect particular things and to prepare yourself for Self-realisation, the ascent. All this balance has to be there if you are to ascend in life. Even to lead a proper good life you have to be like that. I tell you, if you go to India you'll find the country hasn't got any sanitation whatsoever, hasn't got all the food that you have, hasn't got any of your railways or any one of these your telephones as they are. When I go to India I forget that there are telephones existing. They never exist for Me there. Everything that is so dislocated, mismanaged, all kinds of funny things are there.

Sometimes there is a drought.

Sometimes there is a flood. All these things are there. Despite that, people are existing only because they know how to lead a proper life, to adjust themselves to natural things. Now the new disease that has come up in America, which has really upset Me very much and I know that it was to come because today, according to predictions it is not Kali Yuga anymore, it is Kruta Yuga. It's the time when things will happen, Kruta Yuga is when the spiritual powers will work. This is the time is already. You know that in our books it is written that the Kruta Yuga has started about sixty years back and that is how it is, that now the spiritual powers are going to be worked out. It's easy to say, “What's wrong? Who is God? We don't believe in God." You'll have to pay for that. If you go against the nature you'll have to pay for it. If you do things according to your own ego you'll have to pay for it.

This is the time that has come. This is for our good. This is not for our bad because it has been told many a times not to do certain things. Of course, in the Western countries where Christianity is followed is precisely told not to do this, not to do that. But then people say, “Why?" The only difference is that in the East it is explained why not to do this, why not to do that. What happens? It has gone into the details of it. But I must say here also people know that this is not to be done. But when you talk about these things, “This is not to be done" they will brand you as Victorian, or they'll mock at you, laugh at you, make fun of you. But when they face all these things happening to you then they don't know where to go, what to do and how to face up to it. This is the time where the spiritual powers are going to work out; they are going to prove the existence of God. They are going to prove the existence of Divine laws and their operation. They are going to prove all that is said in all the religions, their unity, their integration.

Everything is going to prove now today. Even if you say this many a times, many people will not pay any heed to it. They will say, “Oh, Mother is just brainwashing us." That's what people told Me when I came first to England. And I said, “This is not the life human beings should lead. Even for animals it is not suitable. How can you dare into these things and get involved into problems? Later on it will be showing their signs." But nobody was willing to listen to Me at that time and everybody was angry with Me.

They said, “This woman is matronly." There are certain words in English which are very condemning and the first

one of them is Victorian. If you are Victorian you are a goner, absolutely, that you are branded on; then you can't talk. But I would say even Victorian was better where there was some hypocrisy I agree. Hypocrisy is a bad thing. But shamelessness is much worse. If you become shameless the thing spreads like a fire. There is no protection. Hypocrisy is at least a little protection from the spreading of it and everybody today thinks what's wrong with you and I, when I came here, I had such a shock. I couldn't believe that human beings could go to that extent to ruin themselves. This is ruinous, absolutely ruinous it is and when a person like Christ who was nothing but purity said that, “Thou shalt not have adulterous eyes" to that extent, to that subtle extent of purity he talked. I was amazed how people have denied him completely and how all other people like Jews, like even Hindus here, Christians, every sort of people didn't think what they were professing, what they were claiming and what they were. Today again, one by one you will see more results of wrongdoings to yourself. This is because you have crossed all the limits of niyamas, how you should be to yourself. Everyone seems to be sick today, either mentally or physically. Why? Why are they mentally sick? This is the physical side of it. The mental side is, they can run into any sort of thing like witchcraft, like spiritualism, like any Guru who comes and talks about God, without finding out the credibility of it, without finding out what others have achieved by it. Not only that, but I have seen people after being harmed, very much, who have been tortured by these Gurus, who have been completely made beggars by these Gurus, still

profess, still fight for those Gurus, as if they have lost all their freedom, all their independence to fighting back. The other day one lady came to tell Me that she went to a relation's place, to stay with her and the relation was so funny that she wouldn't even give them full food to eat and in the house there was limited food and she would lock up everything and they really starved themselves, you see. And she, I knew her very well, so she telephoned to Me. I said, “You come along to My house” and just called her and I was amazed why these things happen in the life of that woman. How could she do it? She had no conscience.

Somebody starving next door to her. The reason was she was a drunkard. She used to drink a lot. Her husband used to drink. Now with the amount of money they earn you cannot drink. It's a simple thing, leave alone all the other side of it. And she was drinking, her husband was also doing. And they, whatever money they have, they don't eat much, they just drink and they were waiting for this woman to disappear because once you become enslaved to one particular madness like this, like drinking or anything, then you forget all your relationships with all your other duties that you have to perform. It's like one madman, you see, doing work like mad, has no consideration of relationships or any duties that he has to perform with others. Then also he has no time to think about the duties towards himself. He becomes such a dry personality that he has no conscience even and he just shuts up his mind from all that is gracious, all that is sublime, all that is compassion. He's just busy with himself. He wants to drink. He wants to drink, that's all.

Very seriously he'll say, “Yes, I have to drink now. I like it." So it doesn't matter if his dog doesn't get the food or if his children have to starve or if they have to work on the streets. He doesn't mind because he has to drink. Then there is another thing, like today I saw so many people enjoying cricket, I Myself can enjoy cricket very well and I understand cricket very well. But how much time do they pay to themselves in the sense they are just enjoying what is something entertaining. But what about the entertainment of your Spirit? Have you thought of your Spirit at all? Have you ever peeped into yourself and found out that there is Spirit, which has to be satisfied and entertained? And once you entertain that Spirit you don't need any entertainment. If you have it, well and good, if you don't have it, well and good. That is the highest type of entertainment. That is the highest type of enjoyment. That is the highest life that one can ask.

So all these things come to a level where, “What's wrong? What's wrong on this and what's wrong with that?" So the nature is now going to show you what's wrong, because intelligently you understand, rationally you understand, logically you understand it is wrong but still there is somebody else who says, “What's wrong?" So now, experiencing it you understand. That's the only way left for nature to make you understand now: experience it, suffering. There is another way is that you can experience your Spirit. Also it's possible only this Krita Yuga can do that, that you can experience the enjoyment of your spirit. Both things are there. When it does one thing, it does the other way also. It also gives you the experience of reality the experience of truth the

life that's eternal and that's what one has to look forward to. But enslavement has to be brought down to a proper shape, little bit. That also it does. I was amazed some people who had been drunkards and alcoholics, in Sahaja Yoga they came; next day they left it. It does that. Enslavement of any kind, of any habit, is detrimental to our growth in spirit. It is detrimental, but doesn't matter if you have some habits; they just drop out, as you have seen. Sahaja Yoga is such a kind, compassionate happening that it really makes you a different person who is a master of himself; no more enslavement. All this slavishness goes away. All this fear disappears. You become master of yourself and in that mastery you are the master of love, master of compassion, master of wisdom. This should happen to all of you. You are all due for it. You are created for it. You all have evolved for it. You have to have it.

But there are so many misidentifications in us with which we are drawn to wrong things, to things which are anti-God, which are anti-Spirit.

So many things are there which direct your mind to that because you have drawn certain conclusions about reality. You think this is the reality. You believe that this is the reality and you want to stick on to that. But that is not so. I tell you, you have to understand that reality is what it is. You should face it and enjoy it. Don't try to put your ideas on it. Don't try to organize the reality. It is what it is and once you decide within yourself, “So far I have not known and I have to know” with that humility you will get it. It doesn't mean that you have to surrender your money or anything, your self-respect or your

freedom. On the contrary, you have to enter into that area where there is supreme freedom, supreme freedom. You are not free. If you think you are free you are sadly mistaken because we are still slaves of so many things. But once a person is free he is not bothered about anything. Nothing can make him habituated to anything. Nothing. Such a person lives like a king whether he is in a hut or a street or in a palace. He's not bothered. Whatever it is he's the king. He doesn't want anything anymore. He gives.

He gives. He's so rich that nobody can give him anything. He gives and gives and gives. And only thing that it can do is to give; it cannot take anything. The capacity is such that he cannot take anything from anyone. No more these attitudes, how to save money, how to save your labor, how to save your chairs, your powers, your positions. Nothing will enslave you because you are the master of everything. Nothing is more important than your own spirit, which you enjoy, which manifests. It's so fortunate that you are born at a time when it is Kruta Yuga and you have taken your birth deliberately to get this realisation.

That's why you are here. But how many realise that you have to come to terms with many things? You have to seek the truth and not the untruth. You don't have to run after people who make fools out of you or those who try to pamper your ego or who put spirits in you and make useless cabbages. You have to become something greater, healthier, mightier and loving, affectionate, compassionate. That should be the picture of the

personality that has to evolve out of human beings. Otherwise we cannot save this world.

With the kind of people we have we cannot save. They are all compromising, they are all manipulating, manoeuvreing as if they are all getting drowned and everybody has to somehow or other pull out the person ahead of them to come up. All funny things happening also. That is only because we are so insecure. The insecurity will all go away once the light, the light of your Spirit shines. Let the light shine through and see your beauty and glory and your strength of that great power of love of God within yourself and then you'll be amazed what it is. As you know, Sahaja Yoga is not one lecture, is not two, can be hundreds, but the happening takes a split of a second. It should happen. Once it happens you can achieve your realisation in such a way that you won't even feel it. But afterwards you have to put in deliberations. You have to look after yourself. You have to respect yourself and go ahead with it. There's no use arguing about it. Even if you argue I can take you up to a point because this is a realm beyond the mind, because mind is a limited thing. We have to achieve the unlimited and for that a happening has to take place. We can't promise you that it will take place. If it takes place, well and good, we can help you in a way to achieve it but we cannot be sure that it will happen.

So be in a receptive mood and be kind to yourself and achieve your realisation. This is the last time I am speaking now in London. For quite some time I won't be here, maybe in November if I come for a short time. I may be in London, may be outside London, somewhere in

England. I can't say. I hope all those who are today should decide that if they have to achieve their realisation as a permanent blessing from God then they have to go further with it. You cannot just stop it at this meeting. You have to go further with it with greater enquiries. You have to go to different ashrams and centers that we have; you have to work it out. If you are a big man, like the other day somebody came was a managing director and tried to be funny, I said, “If you are a managing director this is not the place for you." God doesn't understand.

You may be the king. You might be the president. You might be anyone. God doesn't understand these man-made positions. God's positions are different and if you have to enter the Kingdom of God come as a humble person. Give up all your ideas about your big positions and big education and all that. Be a humble person. If you are humble then it will work out and not only that it will work out but it is the only chance we human beings have to change the whole world. There's no other chance I can see. I hope all of you will pay full attention to it and ardently, with full devotion, seek your self and its ascent and its establishment.

May God bless you.

If you have any questions you can ask Me today.

Question: Mother, could you please say something about the collective and the need for realised Souls to be together?

Shri Mataji: Oh, all right. That's a very nice suggestion. I would like to say something about collectivity.

So far as you know, in the history of spirituality people have got realisation. Many people have had it. One after another, many people got it but I would say one in a million, one in a ten million like that, because we have to have some people to talk about it, to begin with. We always say what was written in the past, you see, but those people who got realisation single-handed suffered a lot and they could not transmit what it was needed to be given to others in a way that would be accepted.

Now as you see, any discovery is made like that people can benefit individually. Every person can say, “Oh, I have got it.

So I can have it in my house” but it is of no value. It is of no value, I can tell you.

I would say a personality like Christ lived once. We have Christianity; what have they done about it? I mean, it's a sad affair. I mean, to think such a personality to come and what a great job He has done to establish himself on Āgñyā Chakra, what people have done out of this. The reason was he was solo; he was alone. It was not a mass thing. That was not the time because He had to establish this center. Without that it could not be mass, all right. It could not be an en masse realisation but he talked about, “You have to be born again” and all that. But the whole thing puzzled out because they could not get to the essence of it. One person of that calibre coming on this earth found it impossible to convince people and talk about it.

So one has to understand that anything that is evolutionary first happens to one or two persons only but then it happens to many people. Now in Sahaja Yoga

there's another problem apart from that, that it is happening to many people, is there, no doubt. Thousands are getting realisation, is no doubt. It's working out that way, that now the evolution has come to this stage, as I say it's the blossom time. Many flowers are there and they have to become the fruits. But now why is it necessary to have collectivity when people are getting realisation like that it's a very important point one has to understand. The thing is that now when you are getting realised what is happening to you? You are getting related to the whole.

Our microcosm is getting related to the macrocosm. Say your body is there and you are sleeping. First you get a little awakening. You open your fingers, all right. Then you open your, another finger. Now there is a little trouble on your finger and you can't see anything.

So you open your eyes and you bring your attention to your hands.

So that trouble may be all right but you need another hand to help you.

So you want the other hand also to be awakened to that point, like that.

So when the Sahaja Yogis are getting awakened more and more you see the problems that are facing us, we can solve them better because so many people are working out the problem. You understand My point now? Together! When we are together we understand now there is a problem. Now, I am going to America. I have gone in 1970, in 1973 [1972] first, I think. 1973 [1972] I went first. I was alone. I mean, I gave them very good lectures. We had very big halls built up and everything

puzzled out. The reason is the people who got realisation didn't have anybody to look after them. There was nobody to support them, give them assistance.

So they got lost. I mean, they are there, some of them are here and there. Now what has happened now? Today when I am going to America everybody is praying. In Australia they are praying. In India they are praying. Like attention, you'll be surprised some people are coming from India to go down to America.

Some are coming from Australia to go down to America.

Some are coming from France, some from Switzerland. They are all rushing to America. Now the job is in America. All right, so, like the attention you see, as soon as somebody pricks Me here, My hand goes there, My head goes there, everything works it out.

So the collective working out effort is going to solve the problem. But supposing if this finger is fighting with this finger, can I write anything? Or if they are secluded and alone, can I use them? All this body has to become absolutely in concord with each other. But so many are still sleeping. Those who are awakened at least must stick together. Otherwise Sahaja Yoga cannot work. Today I find it much easier to give realisation, much easier. I was struggling with six people for four years in your London. Four years, six people, but once they got realisation it started working faster and the more people we get, because the channel that is to be used is like nerves in the body. You become a nerve of that body which is awakened and once the nerves start working out together realizing that there's one force that is going through them.

All of you have to work it out together with understanding of the Divine. It works fast. Any person whose all nerves are at work will be much more dynamic than a person who is half-dead or is full-dead.

So you can understand how collectivity is important. Then another thing is that going to a very enjoyable part of it, that when the Sahaja Yogis are collectively there, they really enjoy. Because for the first time you start enjoying human beings, first time. Before this you never enjoyed. You enjoyed flowers, you enjoyed everything else, but not human beings. Pure enjoyment of human beings starts coming when you become fully realised. I'll give you an example. We went to Calcutta for one day and I was in a room in one hotel and there were three, four Sahaja Yogis in another hotel, another room and one gentleman came to Me for his realisation. And when I raised his Kuṇḍalinī, you see, they all got vibrated and they all rushed to My room to know what has happened, suddenly how is it we got such joy within ourselves.

They came to see and this man was there. He was a great soul and they felt the vibrations tremendously you see.

So it is not the happening of an individual. It is the happening of the whole. And the individual effort is going to be absolutely useless. It will be all neutralised. If you sit at home, do your meditation, it won't work out. You won't go very far because the whole has to come. I give an example that when you churn the butter. In India, I don't know, we don't do that way; we do very naturally, You put a little butter inside that and then again you start churning.

So the butter starts gathering round that butter. All of it comes together. But some particles are left out. They stick to the sides, stick to that. They are no more as butter; they are thrown away as buttermilk. It's as simple as that. You see, the more you gather together you really enjoy the spirit of friendship, spirit of mirth, spirit of love in pure form.

So far the love is biased. There's sex, there's lust, there's money, there's this, there's relationship. This is, “You are British; so I must love you” “Why, I am Indian; so I must love you." All these nonsensical barriers are there. There you love a human being because he is a human being and he is a yogi, speaks the same. Now today I have attended a wedding party and the bride and the bridegroom said, “We are coming to Paris with you, Mother. There are a hundred people coming to Paris because we have to change Paris." “But” I said, “you are recently married. Now better enjoy your honeymoon." They said, “What are we going to enjoy? We'll enjoy when our friends who are coming up there." Even if I tell them, “You don't come” they won't listen. They will enjoy their honeymoon there only. I never said, `You come.' On the contrary, I'm saying, “You go away. I will give you money to enjoy your honeymoon wherever you like." They wouldn't go, because they know where enjoyment lies, with their brothers, with friends and sisters.

It's absolutely so, I tell you, that the enjoyment of human beings has not been there. Now there are people who live in India, who live in Australia, who live here all over the places, but when the Sahaja Yogis go to India you should see them, the way the Sahaja Yogis in the

villages, the way they embrace them, the way they feel the oneness. Never they have felt like this for a white skin. If they saw a white skin they would just run away and hide themselves under this thing, you see and even now people are sometimes frightened to see a white skin in a village. They say, “Oh, God, they have come just to destroy us!" or something. But now that's over. Now it's a human being, a human being is coming. They are all human beings, for there is nothing like a black or a white or anything left now. It's such a love that comes and an understanding. That's only possible if you learn how to live collectively. And collectivity also teaches you where you are. Very important, it is. A person who has not lived collectively cannot understand. I have seen people who have their own families, living with their families. They are Sahaja Yogis, but once they come to the ashram they know they are not yet there. Because you have to adjust, you have to learn to adjust, you can't have private bathroom to yourself, private room to yourself. All right, you can have if you want to have but you should also know how to adjust. As you know, I live very comfortably Myself but if it comes to living I can live anywhere. I have no problem of comfort or anything. In the same way we are not barred from enjoyment because of all these things. The way we carry our bathrooms with us, we do not enjoy life. You see, you want to have everything absolutely first class that has, say, that even when we go to the picnic we take all the metropolitan with us. In the same way we cannot enjoy life.

We cannot enjoy nature. We cannot enjoy anything as long as we become just an individual, “Oh, I am the one

who is going to do everything." Last of all we must know by individualism we become malignant.

I don't say we become communist because that's another malignancy but by becoming individuals we become malignant. What is malignancy, that an individual cell takes up upon itself, “I will grow, I will grow." It doesn't know how to grow with the whole. It has no coordination with the whole. That's why you say it is a cancer. Cancer is nothing but is a malignant cell which is alone and is saying that, “I have to achieve. I can do it, I can manage it” and once it starts growing like that whosoever it touches, that person becomes the same. All these ideas, we are higher race or we are a greater people, we are moneyed people, we are something special, we are of this club, all this disappears. It's all nonsensical. We are identified with nonsensical things and making ourselves miserable and others also miserable. And then you give up all that. Suddenly you find, “Oh, what enjoyment!" You don't want anything. You just want to be in the company of Sahaja Yogis. I have seen people, ambassadors, very highly placed people, just getting lost with the Sahaja Yogis. The other day I had a businessman from Bombay. I took him down with Me to a place called Gurai and it was all in a mess in the sense there were no proper bathrooms, there were *[UNCLEAR]*. It was just like a God-forsaken place, I tell you and there weren't even places to sit down properly, only the beach and the palm trees and all sorts of thing was there. And the man got lost, absolutely lost. And he said, “I never wanted this day to finish. It is the only day I've really enjoyed myself with others” because there was such spontaneity, such

spontaneous love, such attention and such purity in that nature. To enjoy that purity you have to be in the collective. Sitting down in the room, you can't understand there is no reflection of it. You can't understand where are you, how far you are.

Collectivity is the most important thing and those who try to break the collectivity are doing anti-Sahaja work. We call it a-Sahaja movement or you can say a-Sahaja activity. You have to be one with the whole.

Those who have tried to separate themselves, all of them go down in Sahaja Yoga. Try to be one with everyone, to share and enjoy everybody's Spirit, because God has created you so beautifully. You are so beautiful and the enjoyment should not be lost because you have certain barriers, like some people can't take out their shoes. I mean, just imagine how much they are identified with their shoes. They can't take out their shoes. To that extent they are stupid. You see, all this kind of stupidity drops out once you meet really wise people around. To get rid of all these nonsensical ideas, which have really haunted your head all these days, you get rid of them and you really enjoy everyone, whether he is a doorman or he is the chairman. All of them are meant for you. It's nothing more than that. All that drops out and you start enjoying yourself. That's why collectivity is the only way I can work out Sahaja Yoga. I can't think I can work out through the people who are separated, divided. It is said, Christ has said also that? They said, “What have you to do?" He said, “When you love each other you have done the greatest justice to Me." It's true and when I hear the loving conversation of the Sahaja Yogis I feel the

happiest. That's the greatest happiness for Me that all of you should love each other in purity, without any return, only for love's sake you all should love each other and that is what it is. And also Kṛiṣhṇa has said, “Wherever people are there gathered together in the name of God, I reside there." So in that joy, so-called joy because we are all one, moving with one rhythm, with one understanding, with one language, so you all should always meet, call each other and have rapport with each other. It's so beautiful. It's music. It's poetical. You understand that? May God bless you. And see for yourself when you cut out your collectivity. Just abuse yourself at that point. That this is one thing you are trying to teach Me now. I am not going to listen to this nonsense. We are collective being otherwise also. I mean, we cannot, people cannot take even drinks without somebody being there. You can't take your food alone.

In so many things, I mean if you are not absolutely a recluse you can't live alone. Then in religion, in the seeking, especially in the realm of God, how can it be? You all have to be there. I think it was a very good question, rightly asked. This individualism must be given up. That doesn't mean you all should dress up like military people, that's not necessary, or you should all behave in the same manner, that's not necessary. Variety brings all the beauty but that doesn't mean that if I say it is east you should say it is west. That's the way you trouble Me. Isn't it, that you can't agree to each other? What's the problem with collectivity? I can answer your question. Must get out of individual limitations. I think everybody should for some time go and live in an

ashram. Is a good idea. But the ashram must be such where there is collectivity. In the ashram if they are fighting and quarreling there must be something in the ashram also. But I leave it to you. It's all freedom to you. You just decide yourself. I have not put any rules and regulations on you much because I want you to use your wisdom and put everything right yourself.

You are all very wise people but must have concord. Listen to others. Talk to them. Find out what the problem is. On small, small things people fight. It's a very wrong thing. Moreover, you have to have one person as a leader to whom you should listen to. If I find that fellow is useless I'll throw him away. You know that very well, throw him away, not in the way people throw away, but he'll just get out of Sahaja Yoga. You know that very well.

So there should be no problem but everybody should not try to dominate each other. That's the wrong idea. Try to change your attitude. As I would say, how far can you adjust? How far can you accommodate? Let's see that. You have to learn that from Me, isn't it? You must find out ways and methods of accommodating yourself with others. Just try to learn. It's not difficult. That's the whole attitude of life, is of competition and this and that should be changed. You must compete in loving, compete in doing good things, compete at working for others. Like I've opened the door, now I'll not take the phone. It's very common. I've washed the things this morning now then I will not wash in the evening. Then people start taking advantage as this. Let them take advantage; it is a disadvantage for them. Actually, if you see the other side, compete in service, compete in love, compete in

good things of saying good words, of communicating in a sweeter way that others feel happy, making others happy. Try to change your attitude towards others and you'll really enjoy, I tell you, you'll enjoy. That's the way.

You know if you say something to hurt someone and upset someone it must be upsetting you definitely.

You may not show but it must be because whatever you do to others comes back to you. Straight forward march, I tell you. It doesn't stay there altogether; it comes back.

So just try to be kind. You may say that the other may tried to harm you, doesn't matter. Nobody can harm you because you are the Spirit. Who can harm you? You are the Spirit.

So just try to understand the person. I tell you, after some time you'll find that person will become very soft.

So many Sahaja Yogis have become like that automatically. They all are here for seeking God, isn't it? So to help them you have to be patient. Give up your old methods and ways. I must tell you, to be curt, to be stern, to be angry, there's no need at all. I'm telling you from My experience. I've tried all these things. It works, isn't it? It does work. And you have to have faith in them and faith in their ascent, in their quality. I like people who praise others to Me. I don't like people who criticise others. Try to support each other, help each other and never talk about their past or anything like that; it's very sad.

Sometimes I've seen people are very hard and in anger they say things which one should never say.

It's not gracious. It's not in the mannerism of Sahaja Yogis. You should never say these things. Do I ever say anything like that to you about your past? When you write to Me, I know everything about you.

Did I ever mention those things to you at all? Then why should you say things of the past? I have heard these things people just rake it up and ung it back. I have heard this kind of thing that they bring it on other people. It's not good. One should be very gracious, very kind and understand that everybody has tremendous potentiality. Respect, respect and respect. Respect yourself and you'll respect others. I hope now you won't have problem of collectivity after this lecture and if you have you can listen to this lecture again and again and My special humble request that you try to curb down your angers. Automatically other angers will calm down. But if it is a non-Sahaja Yogi then you all should fight it together. All should join together if it is a non-Sahaja Yogi. Nobody dare torture you or trouble you. Those days are gone now. None of you will be troubled. These are all Satanic forces and they can work through you also. You must know when they give you such ideas to fight and to quarrel. Understand that this is anti-God. You are doing God's work. You have to move towards more understanding, more coordination. Because this is such a tremendous work and of such a sublime nature, we have to be sublime ourselves. All right, now is there any other question? It was a very nice suggestion but don't give Me such big suggestions that I have to speak for half an hour.

Question: When you are talking about being collectively conscious, that excludes the people who are not Sahaja Yogis and therefore the Sahaja Yogis are isolating themselves from the majority of the other people.

Shri Mataji: Oh, that's right. No, no, no. She says that when collectively Sahaja Yogis become one then those who are not Sahaja Yogi are isolated. It's not so. You see Sahaja Yogis have to be strong enough. Now take it like this that there are people, say, who are in the water and some people are in the boat, all right? Now the people who are in the boat are in the boat.

So they are in a way different from the people who are in the water. That's the situation, all right? Now the people in the boat have to save the people who are in the water, all right? So what I am saying that those who are in the boat must first of all be united and then with full strength pull them out. Why, this collectivity is just to pull out the rest of them. This collectivity is just to achieve their emancipation, their realisation, all right? It doesn't mean that they should exclude.

Actually the whole collectivity is to bring those people up. But you see there are lots of anti-God activities going on in this world. You know that. For example, there's a Guru who makes lots of money, right? And he has destroyed many people. Now they come to Me and they are safe.

So he may send somebody here paid for a job just to disturb us. Then the duty of all the Sahaja Yogis is to get together and see that, to tell him that, “You see, now you are doing wrong. Your Guru has done wrong to us and he is going to do wrong to others. Why do you join with him?" On that point everybody should be one. But if they

are not strong and if they are not one they cannot pull out others. You see, My point is like that. Not to exclude is all, collectivity is to include everyone, you see. All right? I mean to say, there is no specialisation in Sahaja Yoga, you see. It's simple. Everybody is a doctor of everything. I mean to say that all the Sahaja Yogis must want a strong group by which they achieve enlargement of Sahaja Yoga, getting more people in Sahaja Yoga, more people benefited by Sahaja Yoga, all right? Anywhere I have seen wherever there is collectivity, like I would say, Australia has the maximum collectivity, or India of course it has, but Australia, in all of the European countries, also the Western style through communities, Australia has the maximum collectivity and they have achieved the maximum results. Only in Sydney, today only, Warren told Me that the halls like this get packed for programs. Melbourne there is no room for new people who are coming and it's such a big compound I'm amazed. I mean, how many must be going there and it is because of collectivity and as soon as I went there it started gathering up. But before that people were fighting among themselves and many people ran away from Sahaja Yoga because they thought, “These people are fighting. What are they going to give us?" Maximum is in Australia, I think.

Then is Austria is having some problem there and as soon as the problem came in the whole thing became a very small group. Again that problem is over now. Positivity has come. The people have joined together.

Again it has flourished. It happens here also. We have seen. Why Labor Party lost? If they had not quarreled

they would not have been so badly off. It's absolutely a simple equation, “United we stand” isn't it? Is there any other question? All right.

So how many are new people today here? Can you raise your hands please? One, two, three, four, five, six. All right. Can I request you to come to the front seats? That will be better, will help Me, better to, because you are so much here and there, all right? Just come. Be comfortable. Just come along. Just be seated. Be comfortable. Now get some more chairs. Can you get some more chairs here for the front seats? Douglas, can you put them in a line? They cannot be lifted; they are fixed, are they? All right. Now for all the new people I have to say one thing, that you see you cannot argue it out. It has to work within you. It has to work within you. It's a happening. There is a force within you which we call as Kuṇḍalinī, which is the pure desire of becoming one with the spirit. All other desires are impure. That's why you are never satisfied. Now this desire is not yet awakened within us. This power of desire, or energy of desire, resides in the sacrum bone and it has to be awakened and when it is awakened, it rises, passes through six centers, subtle centers, comes out of your medulla oblongata into the brain and then, out of this part which was a soft bone in your childhood and you start feeling a Cool Breeze coming out of your head and a Cool Breeze coming out of your hands also afterwards. Now this is a living process as you cannot force a seed to sprout. It sprouts by itself spontaneously but you have to put it in the Mother Earth. In the same way it sprouts. It

sprouts spontaneously and when it happens then you have to see for yourself.

One can help because if there's obstruction on any Chakras, especially if the Nābhī Chakra is caught up, then what happens that on that center the Kuṇḍalinī tries to push and you can easily see with your naked eyes the pulsation or the movement of your sacrum bone just like a heart, just like a heart. These things you cannot manoeuvre. You cannot attain by effort. Is a thing already settled there within you and this has to be awakened. Now what we can do is to try to remove the hurdles that are there during the ascent of the Kuṇḍalinī. That's all we can do. But if it doesn't work out we can work out again and we can work out again. But you have to have patience with yourself and you have to have understanding that you will get your realisation. It's not so difficult. All of these people who are sitting here have got realisation and most of them are settled down with their realisation. They know what the Chakras are, what are the obstructions, how to remove the obstructions and how to raise the Kuṇḍalinī. All this you will also have.

All this mastery you will also have, but you have to, as I have said, you have to have that earnestness and that kind of assiduity by which you will achieve it.

So it is for us to raise your Kuṇḍalinī and it is for us to help you to achieve it. Then once you have achieved it and you have mastered it, it is for you to teach others and to give realisation to others. It is as simple as that.

So I am sure it will work out tonight and that all of you work it out. We should all cooperate with each other. Now some people who are frightened, I have to tell them

there's nothing to be frightened in Sahaja Yoga. Thousands of people have got realisation without any difficulty. Or those who are still discussing in their minds must stop it now because they have not found it; better prepare yourself to have the realisation. It is not to be paid for. You cannot put in any effort. Nothing can be done. It has to work out, all right? With this understanding let us see that few things, whatever I tell you, you try to cooperate with Me. One of them is a simple thing, is to remove your shoes. Please remove your shoes.

There's nothing in the shoes, you see. Remove the shoes. You become relaxed, a little bit more and also I feel that it helps the Mother Earth to suck in problems very well. It's a very simple method by which it should work out.

So I would request you to put both your hands towards Me just like this and close your eyes. That's all. Just close your eyes. You will also know why I asked you to put your hands towards Me later on.

So don't think about it. There are five fingers and seven centers all on your hands and when you put your hands towards Me the message goes to the Kuṇḍalinī and it rises. It's your own. Everything is your own. Only thing like one enlightened light enlightens another light. I am just enlightening you and then you can enlighten others exactly the same way. I would request you also to take out your spectacles if you have any because it helps your eyesight also. It helps your eyesight. Just take out your spectacles. Any other obstacle, anything that is little bit uncomfortable, you can reduce the pressure on your waist if it is very tight; anywhere you feel the tightness

you can loosen it. Put both the feet on the ground, little separate from each other because both feet have different problems are to be attended to differently. Now please keep your eyes shut and I would request you not to open your eyes till I tell you, because if your eyes are open the Kuṇḍalinī refuses to rise up to Āgñyā.

So please keep your eyes shut. Just with complete faith in yourself you just wait and it will work out. If it doesn't work out we'll try to tell you how you yourself can work it out by awakening your own centers. You have to sit quietly. Please put your right hand, don't open your eyes, please put your right hand on your heart. Because the left hand is the hand of your desire so it should be kept where it is now throughout. Only you have to move the right hand because right hand is the hand of action. Now at this stage you have to say, if you are wearing a coat put it from inside better, hand on your heart and left hand towards Me on the lap, comfortably. Now you please in your heart, with all sincerity you have to ask a question thrice, `Mother, am I the Spirit?' Now why say that you call Me Mother because you have to call Me Shri Mataji which is a tongue twister and I think it would be difficult.

So to make it easier, I think, call Me Mother. Please ask the question, `Mother, am I the Spirit?' Because the Spirit has to come in your attention; you have to become the Spirit. Many people think if you pray without being realised God will do what you want. He won't because you are not yet connected.

You have to be connected to God. That's why Christ has said you are to be born again. That's not an artificial

thing. It's a reality. Now as the Spirit is your guide it is your Guru. You don't need any guide anymore. Put this right hand down on the stomach on the left hand side again and push it a little. On your stomach on the left hand side put the right hand and left hand towards Me and push it a little bit and say, you must put your hand on your stomach, stomach on the left hand side and press it a little bit because there lies, the right hand, the right hand, take it to the left side and put it on the center on the left side. And now you ask a question, `Mother, am I my own guide? Am I my own master? Am I my own Guru?' Ask the question ten times because there are ten sub-plexuses within us. Later on your own Guru, which is your own Spirit, will guide you because you'll get vibratory awareness, a new dimension in your awareness. You become collectively conscious. You'll become again. It's not just a lecture but it is a happening. Please ask ten times, `Mother, am I my own guide? Am I my own Guru?' Now again put the same right hand on your heart and now you can assert by saying, `Mother, I am the Spirit.' Just say that on the heart, on the heart. Put it on the heart, the right hand on the heart where the Spirit is, where it resides, is reflected in your heart.

So just say, `Mother, I am the Spirit,' with full assertion. You have to say that twelve times. Now as the spirit is guiltless. It never commits sins. It is blemishless. It is absolutely spotlessly clean, sparkling diamond within you. You have to raise this right hand at the base of the neck on the left hand side. You have to move on the left hand side, throughout. The base of the neck on the left hand side. This is a very important center, very important

center for the Western people is through the neck, at the neck on the left hand side. You put it on your shoulders on the left hand side. If it's taken from the front it would be easier and press it hard and at this center you have to say that, `Mother, I am not guilty,' sixteen times, because if you are the Spirit how can you be guilty? But really you must say, “I am not guilty." Get away from all ideas that you have done this wrong or that you have committed this sin and that sin. `Mother, I am not guilty.' Say it sixteen times, please. You are not guilty; you are just thinking that. By thinking you are making yourself miserable. It's not to feel guilty about anything. Now raise the same hand on your forehead. Across. On your forehead across. At this point you have to forgive others. This is the center of Christ. He forgave the people, who crucified him. In the same way you forgive everyone. Forgive everyone. Please forgive everyone. People say it is difficult to forgive, but if you don't forgive and you should know what you are doing is, you are harming yourself, not the people, who have wrong So just say, `Mother, I forgive everyone.' From your heart. Whatever you are saying, is working out.

So please say, `Mother, I forgive everyone.' If you don't say it from your heart, it will have no effect.

Now put the hand on top of your head. Where you had a soft bone, press it hard with your palm. And just move it a little bit sideways, if it is easier, in a clockwise manner, your head your scalp, we can say. At this point it is the liberation point is the point, where you get your moksha, where you get your realisation. And I cant't cross your freedom. At this point you have to say, `Mother, I want

my realisation, please give me my realisation,' at least seven times. Say it seven times. A lot of a heat is coming out.

That's a good thing. Let the heat come out. Now raise the hand and see, if there is a Cool Breeze or a hot breeze is coming out. First the heat will come out. You can change over your hand and see with the other hand. With the right hand towards Me. With the right hand towards Me and the left hand on top and see if there is a Cool Breeze coming out. You may change again your hand whenever you feel like it, then change your hand and see, if there is a Cool Breeze coming out. He' s got it. He's a born realised.

No problem with him. Let him feel yours. Just feel. On top now. He has got it? Their certificates are correct. If they give you the certificate. You have got it, long time back. Have you felt it? Not yet. Don't open your eyes. Keep your eyes shut. It will work out. You can change your hands one by one and see for yourself. Put your attention there and see. You have to work it out yourself. Don't get disappointed and don't feel bad about it. Just go ahead with it. It will work out. Now I'll ask some of the Sahaj Yogis to come and see and help you. Please come along. At the back of these people, you know those who are sitting can you see for them, this little one can find out about everyone. Keep your eyes shut. It will work out. Don't you worry and don't feel disappointed. It has to work out. It has to work out. Did you feel the Cool Breeze? Good. You felt it already. Good. What about you? No? So, I promise you will get it. It will work out. Just try this gentleman. Now, don't think about it, just keep in

meditation. He's got it. The first one has got it. The second will get it. Now, what's your name.

Anna.

Contents: **1983-06-1x Quote on the Heart, before a Public Program, Paris, France (year not sure)**

[A newly realised gentleman is introduced to Shri Mataji before the, Public Program. He mentions that he travelled all over the world to meet Her.] You don't have to travel all around the world, I am always with you in your hearts.

Contents: 1983-06-16**, Public Program, Day 1, Joy Has No Duality, Place St. Germain des Pres, 6th arrondissement, Paris, France**

I bow to all the seekers of Truth. Since ancient times man has been searching the truth. He tried to search the truth in various forms of happiness and he discarded many a times because he found that happiness was not permanent. For a short time he felt happy with something and then he found it also gave him great unhappiness. Like a lady, she had no child so she used to weep and cry and she had a child who later on disowned her. Then human beings started seeking happiness by enjoying the power, the power over other men, the power over other countries, that also they were not very much satisfied.

Their children started feeling guilty about what their forefathers *[UNCLEAR* did]. Then the movement started seeking something subtler most in the art and music. That also had limitations. It could not give that

permanent joy to people. It is promised that one day you all have to have this permanent joy.

And then they started challenging all such people who have prophesized and who have been promising that such a day will come.

So many reached the conclusion that there is nothing like joy, the life is all the time to the cusp of the wave. Like two faces of a coin they thought happiness is always combined with unhappiness like day and night.

Despite all these conclusions human beings did not give up their search. They were seeking, they indulged into all kinds of enterprises, jumped into all kinds of dangerous things, followed all kinds of cults and Gurus but they could not find that joy. This joy resides within us in another realm of which we are not aware. At the human awareness we cannot feel that joy. Human awareness is only judged by our mental projections. All our experiences are based on our satisfaction, on our ego, on our conditioning. We project our mind, imagine something and start following that. All human institutions are nothing but projections of the mind, which is a limited mean. We are identified with different kinds of ideas or theologies, they are all mental projections. Or those who came from higher awareness also we dissolved them into these mental projections. Even the great scriptures were transcribed through this mental projection.

But this mind is a limited thing, which cannot enter into that subtle where we have to find the source of joy, the Spirit. As you know that if you have to study Microbiology or Histology you have to use a microscope. In the same way if you have to know about the Divine forces and the

Divine Love, how they act, you have to become first the Spirit. The mental projection is a very dangerous thing sometimes, because it forms a big barrier away, very much away from reality. To supplant it, this barrier, one has to forget the mind for the time being. But whatever is unknown is not Divine. If there is a mad man, he also has forgotten his mind but he is not Divine. Or a person who is possessed is also not a person with Divine understanding.

So one has to understand that when it is said you have to know it doesn't mean that you have to know through your mind, you have to know through your Spirit.

So it is most important that you have to awaken your Spirit within yourself. Now we have so many artificial methods by which we start believing that our Spirit is awakened. Like in India we have one custom called *[UNCLEAR* Iadupavit] where we say that this child has now become a Brahmin, means a realised Soul. Or we have among Christians the Baptism. It is not a real happening. It is just an artificial drama. In the same way they have in the Islamic ritual; same in the Jews. Every religion has this problem that they are indulging into artificial rituals. Now what is the real ritual? If we have to become the Spirit it is definitely an evolutionary process. If it is an evolutionary process it has to be a living process.

Logically that this real evolutionary process is beyond human beings. How did we become human beings from amoeba? Can you imagine we were all amoebas, so little, unicellular animals? And today we are human beings. What did we do to become human beings? Nothing, it is all a gift. The whole thing was so spontaneous and living.

So whatever has to happen to you, has to happen spontaneous. All the spontaneous things are living.

Nothing dead is spontaneous.

So what is the criteria to understand how we become higher persons? When we have become higher people than animals, we have a better, subtler awareness. That is in our central nervous system, we can feel many things, which animals cannot feel. If you bring a horse to Paris or to London or to any dirty place, it makes no difference to the poor horse. If you take him through a dirty lane, he will walk very nicely like a king. But human beings can't just step, even one, one step forward in that lane.

So the awareness of the human beings have to rise higher, that you have to become something much more than what you are. That is what is Self-realisation.

When you know your Self you must at least know what are you inside. Otherwise you don't know yourself. When we say: “I like this” “I like that" it is our ego, Mister ego that likes, or maybe our conditionings that like this. We don't know what we are using to like something. Even when we say: “I believe” mostly the politicians use the word “I believe." Now what believe? Is their ego, or their experiences out of their conditionings. But it has no absolute value. Like if there's a dirty thing everybody will say: “It's something dirty." As everybody who has eyes will be able to say what is the colour of this curtain. But when we talk about these things we are not talking of absolute things at all because there's so much difference of opinions.

So practically again we have to know something that is absolute and those who know that, all of them have to reach to that point.

All the chaos of the world and all the problems of human beings is very simple because they do not know themselves. One brain is fighting another brain. Nation *[UNCLEAR* ones] also some brains fight other brains. And this mind is surprising so horribly, tries to find out ways and methods of fighting only.

So there must be something God must have created within us, or the nature must have created within us, that we are not let into this transition period. We are actually in a state of suspension if you see that. It is such a problem that people don't understand also what is to be done to be right. Because of mental projections our life is absolutely relative. We live relatively. And also we discuss things relatively. There's not absolute to say that this is how many times. Like as a child I had learnt that in Paris there is a metre, which is an absolute metre and from that people can measure out how many times other metres are. And it is made of gold, which has very little expansion because of the coefficient is very low. Platinum, called platinum, *[UNCLEAR* sorry]. Platinum, ha. It's very little coefficient.

But the absolute has to be that, means it's not going to expand or going to become smaller, it is absolute. Now from science you will know that we cannot reach absolute zero, in temperature. We cannot achieve absolute vacuum. Now how are you to achieve our Absolute, if this is the situation with ordinary material things? So first we have to forget that we can [not]

achieve [it]. Now to say that also: “We have faith in God" or “We have faith in Divine and that will work it out" is also not possible. Even faith in God itself is a mental projection. If you ask any atheist he is telling it's only because you are born in a family, which was religious, that's why you have become like this, otherwise there is no God.

When Lord Buddha came on this earth he found the problem very intricate about God. Everybody was talking that they know God. And everybody's God was different and in the name of God they were raising wars.

So he decided that “don't talk of God anymore now." But everybody wants to talk of Him.

“Better not talk of God at this moment when they are not knowing about their Spirit." So He just talked of the Self, the Spirit. But He said: “Buddham sharanam gacchāmi” “Buddham sharanam gacchāmi” I surrender myself to Buddha. Buddha means the one who knows, the one who has the knowledge, means the realised Soul. In Sahaja Yoga also we go step by step. First of all we have to know our Spirit, not through mental projection but with a spontaneous happening, which is a living happening. They think that human beings cannot do it. Now what is that living process? Whatever I am telling you could be a mental projection of mind, again.

So you must take My words as a hypothesis UNCLEAR [to be there for] a scientist, with an open mind. And if it happens to you then you have to take it as a law.

Now I said that within us lies these seven subtle centers.

Some may say that it is not said in this book or that book; forget about everything now. There are these seven

centers, which reside within us, some in the medullar oblongata and some in the brain. Now these centers manifest outside, these subtle centers, the gross plexuses about which doctors know. These centers also control our endocrine system. They have a much deeper significance than the plexuses, which are only manifesting on a physical level. These centers also cater to our emotional being. They also cater to our mental being and they also cater to our spiritual being.

So whatever condition we are in, it is due to the condition of these subtle centers within us. These subtle centers that are placed within us, you can't see with naked eyes or through any human machinery.

They are energy centers and made of three types of energy within us, about which I'll tell you tomorrow.

But today we have to know that there are some centers within us and the most important thing is that within us lies a Mother, Her power, which we call as Kuṇḍalinī in Sanskrit language. Now this Kuṇḍalinī has nothing to do *[UNCLEAR]* something you come or whatever language you follow. It is called Kuṇḍalinī because kundal means coil. This is an energy within us. This is the energy of desire, desire which is pure desire. We have so many desires. We want to have a house, then when we get out we want to have a car, when we have a car we want to have a helicopter.

So as you understand economists said: “Wants are not satiable in general." Now actually when this desire which is the pure desire is awakened you get your absolute desire fulfilled and the absolute desire is to become one

with the whole. This desire is to become one with the Divine.

This Divine Power, I call It Divine, you may not call it Divine, but it is the All-pervading Power. We come in the garden and see so many flowers; we take it for granted. And when we see the flowers becoming fruit we take it for granted. How can flower become fruit? Can we transform a flower into a fruit? We cannot. But somebody, some energy has done it. That must be the energy, all-pervading everywhere. And remarkably it has such a nice discretion, for example a mango tree will only produce mangoes not apples.

So this energy which is doing all the living work of the world, all the autonomous work within our body itself, which has made us human beings from amoebas, this Power we have never felt before.

So when you get your Self-realisation, for the first time you feel that Power, that All-pervading Power of Divine Love. This you cannot feel otherwise. It is very easy to believe into something false. We believe more into false than into reality. That appeals to us much more. But reality is the one we should try to achieve. If we have to feel this breeze or this breeze of the Holy Ghost as they call it, then what are we to do? Some people think that we should go for a fasting or a vegetarian food or starve ourselves, or kill ourselves. Such people only can become thin and die, or become mad at the most. There is no need to torture yourself. This human body is made with great understanding. It is beautifully, delicately made.

It is made with great care, with a very special purpose, that you have to be the temple of the Spirit that the light

of Spirit has to shine within you. It is not for you to venture into all kinds of funny things that human beings are doing.

I don't know if you have heard about terrible disease in America called AIDS that has come. It is spreading very fast and it is the result when man has said: “What's wrong?" “If I cut my nose, what's wrong?" But can you even create one cell of your nose? We have no right to disturb this beautiful mechanism that God has given us. We have to respect ourselves, because you are the epitome of this creation. Only you are going to become realised, not the chickens. Let us be kind to ourselves than to others animals and things and to other human beings. That is much more important, because this is the precious flower that God has created to become the fruit.

Many people ask Me a question: “How is it in ancient times, people had to work very hard and only one could get Realisation?" In ancient times if you had to go from Paris to London you could never reach.

But today how is it that we are even going to the moon? Whatever has grown outside so much has to grow inside also. And the tree that is grown so big if it does not look at its roots it is going to fall up and can get destroyed. Same thing is going to happen to our modern civilization if it does not bother about its roots and try to develop those roots on which this tree is standing.

Also I must tell you when there is a Blossom Time there are thousands and thousands of flowers but when the tree is just planted you might get one or two. Today so many great souls have taken birth to become the fruits. That is the reason why we are having en masse

Realisation. Thousands of people are getting Realisation and settling into it. Today I have told you as an introduction to Sahaja Yoga, Sahaja means, saha means with, ja means born. It is born within and Yoga means union with the Divine.

So it is the right of every human being because this is born within you, to have the spontaneous Yoga. This is not a new method. Like a tree that sprouts, your Kuṇḍalinī also gets awakened. But in the older days it was available to very, very few people. But now the time has come for all of you to have it.

Tomorrow I will be telling you about the three channels and the three powers within us and about the Spirit that resides in our heart. I hope within these three days you all will get your Realisation. But the problem is that people again start putting mental projections on Sahaja Yoga also. Or they want to avoid themselves. They are afraid of the reality, they are afraid of themselves. I must tell you that you are the most beautiful thing. You have to just discover your glory within yourselves. Once you discover that, you forget all these thoughts, which make you so hopeless. After all we have to know that if God has created us, He has to *[UNCLEAR]* look after us also. And if He is God Almighty, He is the One who is going to save us all. Otherwise His creation will be destroyed.

Sahaja Yoga has worked wonders and I hope in Paris, if it works it will be a very great state for the whole of Europe. Around Paris we have many Sahaja Yogis but those who live in Paris, live in another world I think. They come to My lectures, perhaps they would like to have some mental projections here also. But I request you, you

better have your Realisation. Whether in Paris or anywhere you better have it. *[UNCLEAR]* and settle down in it. You will enjoy your own powers and the powers of the Divine.

You will know all the Divine laws expressing themselves within you. Then you will know that all the Scriptures of the world can be proved to be true. If a blind person tries to understand the colours it is so difficult to explain. In the same way unless and until you have Realisation you cannot understand any Scriptures. *[UNCLEAR* May, I say] God bless you.

May God bless you *[UNCLEAR* all tonight] and I hope tonight you'll start to achieve that Realisation but it is not like once you have achieved which you are permanently there, because you see people in modern times are very wobbling. And so many things have gone into their heads that they are lost.

So better find your Self properly. And for a change give some time to yourself.

May God bless you all.

If you have any questions, today being the first day, I will reply questions if you have, but ask sensible questions not like in this book it is written and he says so and... No quarrel any more. Just ask a honest question to yourself: `Have I found my Spirit? If not, let me find it.' Also I know you say: “I'll be finding out and finding out" but if I say: “It is just here why to go on with your seeking? It will just happen to you in a split of a second." There is nothing to be nervous about it. It's a beautiful happening because this is your Mother. She doesn't create any problem but solve all your problems, physical, mental, emotional.

Sahaja Yoga has cured cancer, the blood cancer, all kinds of incurable diseases. And I'm sure it can also cure this horrible disease AIDS. Once you become realised you can cure others also and give Realisation to others. Today I've met many people who are from around Paris, whom I've never met before, who are realised and nicely stationed in Sahaja Yoga and masters of Yoga. It was such a great joy for Me.

Thank you very much.

Question: What is actually the source of Sahaja Yoga?

Shri Mataji: Ah, it is something that has no source. It is sourceless.

Question: Is awakening ever accompanied by fear?

Shri Mataji: No. Never. I mean people have given you such horrible books about Kuṇḍalinī. I'm Myself shocked. When I read about it, I could not understand what are they up to. But supposing say, you put your fingers in the plug and then you say I got a shock, one would say that that was *[UNCLEAR* because] you do not know how to handle electricity. But it is much more. If a person who raises the Kuṇḍalinī has the authority from the Divine it will never, never harm whatever may be inside. But such a person himself has to be a pure person. If such a person is interested in your money and in your purse then it has nothing to do with God. You cannot purchase it, you cannot purchase God or Divine, you cannot pay for it.

So those people I think, who are trying against, it's really sinister to do such a harm to people. Of course in some people it does not rise that fast. If you have problems,

say if you have liver problems, then Kuṇḍalinī will go and show the pulsation at that point.

And some people who have been to wrong type of Gurus, or wrong type of cults may, may behave in a way that is very funny sometimes. We have had many funny experiences with the TM people, if they are sitting before Me and I try to awaken their Kuṇḍalinī they start jumping on their feet. Not all but some people, for a while, but then they settled down. And some people who are called as orange people also start jumping a little bit. It happens *[UNCLEAR]* reactions come to some people but doesn't matter as long as you are attentive, it works out, it soothes down. And sometimes people feel little heat on the hands, specially if you have a liver problem. And when the Kuṇḍalinī comes out it throws away little heat from your head, not much, but little bit. But ultimately Cool Breeze starts coming out of your head and you feel the Cool Breeze moving from your hands. But you need not worry to know all the permutations and combinations of these complications.

Question: What is the meaning for awakening Kuṇḍalinī?

Shri Mataji: That's a good thing. I'll just tell you after we start.

Question: Once you realise, once you feel that how the energy is awakened in you how to interpret the words of Christ: “Love thy neighbour as thy self, love each other"? Does it mean we can love each other totally?

Shri Mataji: Ha, that's the, that's the real question, I must say. That is how you love your neighbour isn't it? Because you become collectively conscious, not through

mental projection again but you just become collectively conscious.

So that supposing the gentleman, he asked Me a question, he has a problem on his throat. I can feel it on My hands that he has a problem. On My fingertips I can feel it, on the fingertips as they say. And that also if I know how to cure that problem I have to cure you. This is the exactly what Christ said, that you become collectively conscious. How could He tell to these fishermen what is collective consciousness is? So symbolically He said that: “You love thy neighbour as yourself." This is absolutely impossible, because it's a mental projection. You can love up to a point but not absolutely.

But when you become part and parcel of Me then supposing if this finger is troubling Me, I must rub this finger, otherwise I don't feel all right. And if I'm rubbing My own finger I do not feel anything that I'm obliging Me so I'm trying to do good to it. Because I love My finger as Myself. Only after Realisation you will understand what Christ has said. You know how we have been loving each other and every country has been loving each other. And what Christian nations are doing to each other. You can see clearly that they didn't understand the meaning of that. We cannot follow Christ unless and until we become twice born. We cannot follow anyone because it's again the same mental projection.

Question: How can you explain these masse phenomena of Realisation and at the same time the extension of human suffering.

Shri Mataji: Extension? Question: Of human suffering.

Shri Mataji: Extension? Question: The fact that the human suffering is becoming smaller, greater.

Shri Mataji: Unless and until it becomes like that, people are not going to take to something greater.

You see, human beings are suffering because of themselves. When they suffer they also start thinking of the remedies or they take it for granted. That's why Christ has said that a rich man cannot enter into the Kingdom of God, because the man who is materially very, very greedy, so satisfied with himself that he is not bothered about his seeking. Now should we have the Realisation? Question: Do you have a lot of disciples in India or only in the Europe?

Shri Mataji: Oh I have many, many more in India, thousands of them, but they are in the village.

Our cities are, say lingering with other Gurus who need money. As long as they will have money they would like to purchase the Guru, but they can't purchase Me. Still we have at least about five, six thousands Sahaja Yogis in Bombay [Mumbai] and in Delhi about six thousands or may be more. Because we are not organized. We do not have any written names or memberships or anything. It's a living organism, that's all.

Question: Are they all realizing *[UNCLEAR* Jogwa Sankoch]?

Shri Mataji: Ah, yeah of course. They are not only realised but they are mostly masters, otherwise we don't call them Sahaja Yogis. Those who just get Realisation are not Sahaja Yogis but those who know the knowledge of Sahaja Yoga are Sahaja Yogis. They could be small little children also.

Question: Do you have to become a disciple of Shri Mataji to have that...?

Shri Mataji: No, no, you all become My children. I am not a Guru. Actually I have to look after you and as a Mother you know it's a thankless job.

So it is nice to be a Mother and the Mother is always the person who guides the children whether to hell or to heaven. You don't have to become any disciples or anything. It is you, it is your own desire, it is your own development that makes you understand Sahaja Yoga. It has nothing to do with any formal sort of application or formal sort of an enrollment.

Question: Just being in front of You then one can become realised?

Shri Mataji: Of course, *[UNCLEAR* that's true]. But to, to become Sahaja Yogi you have to work.

It's truth.

Question: Shri Mataji, you've told us that all the human institutions are rather mental projection.

Shri Mataji: Yes.

Question: Would you say that how these people who are trying to create another world, a *[UNCLEAR* very good/better] world are going to create that? Are just using Yoga?

Shri Mataji: Yes it is so, I tell you. Everything.

Question: *[UNCLEAR] [UNCLEAR* through/true].

Shri Mataji: Yes something you see it is doing some good, but it is a mental projection in the sense that supposing those who are trying to do good, you see, to others... now, as I told you that I look after My finger, you see I'm

not doing any good to it, nothing; it's My own finger. That should happen to you.

You see that all these, I, I feel, you see, in early days I used to look at these people how they are. They are so conscious that they are doing great work, you see, they are very great people or... all sort of nonsense exist in their head, you know? They are not the people who really love in the sense that *[UNCLEAR]* depth because the love flows, you don't have to pay it just flows. You don't have to do anything it's just flowing.

[UNCLEAR Like/And] there's a big Ocean of Love, all right? And there is somebody who is artificially trying to *[UNCLEAR* console/control] you, *[UNCLEAR* putting] in the Ocean and let *[UNCLEAR* him enjoy/you measure] that's the thing? It is such a mental projection, I'll tell you how is it that. For example now there's a big problem between capitalism and communism. Now I would say I'm a great capitalist because I have all these powers available to Me and I'm the greatest communist because I can't enjoy them, I must distribute. Those who have no money call themselves capitalists and those who really do not distribute call themselves communists. Moreover, once you say that you are a capitalist then why do you ask for anything, then you are on top of the world, you are like a king? For example if you ask Me I can go and sleep on the street, I can live anywhere. I don't need any comfort. A realised Soul is a king for ever, he doesn't need anything; he's not a beggar of anything. These deceptive *[UNCLEAR* false] people how can they be capitalists? So all of them are just *[UNCLEAR* false/snobs]? I've heard of so many kings who were miser, can you imagine? And some

were kleptomaniac. How can you call them kings? Without self opinion *[UNCLEAR* you did self for conscious reason]. For a realised Soul they are not kings at all.

Now let it happen. Now how we do it? As you can see here these fingers it represent our seven centers, five, six centers, on the hand. And the same on the right hand side, we have five, six and seven. Of course the medical science accepts that these are sympathetic endings. They are all right because they don't know anything further.

So the left and right both combine together like this and make a center like this, as you see My hands. Now the third power crosses through this and gives you Realisation. But when She moves if these are not properly set or there is any problem, then it soothes that part of the center, nourishes it, improves it and dilates it. And then rises higher.

So when the Kuṇḍalinī is awakened actually what you do is to spread your hands towards Me like this. And all these centers can get the information and they inform the Kuṇḍalinī.

Somebody who's authorized is here and then the Kuṇḍalinī rises. At the end She pierces this area, which is called as the Brahmarandhra. This is the area of fontanelle bone where you had the soft bone in your childhood. Of course there's a big mechanism that works it out. About that I'll tell you tomorrow. And then you start feeling the Cool Breeze of the Kuṇḍalinī in your hands. Now Kuṇḍalinī is the Holy Ghost that is described in the Bible.

So you start feeling the breeze, Cool Breeze of the Kuṇḍalinī coming out of your head.

So if you little bit cooperate and understand Me in the sense you have to put your left hand towards Me and right hand towards you to begin with and then keep your eyes shut till I ask you to open. Take out your glasses also, please. If you have anything tide in your body little bit lose it. Put your hands towards Me like this, sit erect but comfortably, not pulling back your head or forward, just in the center. Don't try to fight with your thoughts. Whatever thoughts are coming let them come. Suddenly you'll find you have become thoughtless. Moreover you yourself can establish your awakening when I'll tell you how to use your right hand. Keep your left hand towards Me and both the hands towards Me just now later on I'll tell you how to put your hand, right hand on different centers on your body. Now keep your eyes shut, please. As your Spirit resides in your heart you have to put your right hand on your heart. Now you can ask Me a question by saying in your heart: `Shri Mataji, am I the Spirit?' If you cannot say Shri Mataji, then say Mother.

You just ask the question.

Now, bring this right hand, down on the stomach on the left hand side. And *[UNCLEAR]* there is the center of your mastery, or of your Guru. And in the Guru principle, Guru has to be awaken first of all. Because you are the Spirit, you are also the Guru, the guide of yourself.

So now you ask a question: `Shri Mataji, am I my own Guru?' or else `Mother, am I my own Guru?' Please ask ten times. Ten times because there are ten sub-plexus in the solar plexus and the same number of petals in the

center, navel center known as the Nābhī Chakra. Meaning the navel center.

So please ask ten times: `Mother, am I the Spirit, am I my own Guru?' With full confidence you must ask. Please keep your eyes shut. Because if you don't keep your eyes shut, your Kuṇḍalinī won't rise.

Now don't open your eyes please and put your right hand again on your heart and say it with full understanding and full confidence: `Mother, I am the Spirit,' `Shri Mataji, I am the Spirit.' Please say this twelve times. Now, please say this twelve times with full confidence. You are the Spirit no doubt, you are the Spirit. You have to just assume the situation. Your Spirit, which is the witness of the play has to come in your attention, in your central nervous system. It has to manifest through your central nervous system, enlightening your fingertips. The whole being is enlightened. Now, as you know, the Spirit is without any guilt. It is blemish less, spotless, immaculate.

So you should not have any guilt. This is a very common disease, specially with the French that they feel guilty for nothing at all. They do a wrong thing, feel guilty, as a vicious circle built in. Now to break the vicious circle we have to just say: `Mother, I'm the Spirit and I'm not guilty at all.' `I'm not guilty at all, I'm guiltless.' This you better say sixteen times.

And if you have the habit of condemning yourself better take thirty two times as a punishment. For this, same thing you put your right hand, raise it on the left side of your neck, at the base of your neck.

And now please say sixteen times: `Mother, I'm not guilty.' I'm talking about the Ocean of Love, the Ocean of Compassion, the Ocean of Forgiveness.

So now what is you can have, which cannot be washed away by that great ocean? So open your heart and say that: `Mother, I'm not guilty at all.' Joy starts pouring in. You are all still feeling guilty. What is your guilt after all? Please say sixteen times with all the sincerity and belief and faith. It's better but they still feel guilty *[UNCLEAR]*. Better now. Now put the right hand, left hand towards Me and right hand across your forehead without opening your eyes still.

At this time you have to say for this center that: `I forgive everyone. Mother, I forgive everyone. Shri Mataji, I forgive everyone.' Now some may think that it is difficult but what is difficult? After all it's a myth. If you don't forgive anyone you are torturing yourself for nothing at all. But if you forgive someone that means at least you are not playing into the hands of the other person.

So just say: `Mother, I forgive everyone.' Everything that we do in Sahaja Yoga is opened, there is no secret.

So is to be done openly and to say what you have to say, is that `I forgive everyone.' Now put the same right hand on top of your head.

Press your fontanelle bone area where you had the soft bone with your palm and turn it clockwise, where you had the soft bone and turn it clockwise. Now, at this point I cannot cross your freedom. If you don't want your Realisation I can't force. At this point you have to say: `Mother, I want my Realisation, please give me' or `Shri Mataji, please give me my Realisation.' Say it seven

times. Now see that you say it from your heart, for that your heart center it represented there, in that point. Now you can raise your hand about four inches and see if there is a cool or a hot breeze coming out. If not you try the other hand, by putting the right hand towards Me and putting the left hand there. Try with your left hand now. Put right hand on your head, then left hand on your head, putting alternate hands towards Me. First you'll feel some heat coming out. Raise with your hands, raise it a little and then you can feel it. You can change your hands and see. See these two. They'll be all right. Āgñyā is there. You will have to forgive, forgive them, forgiveness is important. Means the problem is center of Christ. Better now. Coming up.

It's *[UNCLEAR* verily unique/very minute].

So, now you put your hands down and see if you are feeling any Cool Breeze in the hands. You may open your eyes. You'll find you have no thoughts in your mind.

So without thinking we can watch. You put your hands up and see if you feel the Cool Breeze.

Now ask the question: `Is this the Cool Breeze of the Holy Ghost?' Ask this question thrice. Are you feeling it now? Good. Now bring them down, your hands, also you'll feel it. Now close your eyes. And it's very subtle. This is the first time you are feeling the subtle breeze and you are becoming subtler. You are relaxed and there is no thought as you can see clearly. Close your eyes and don't think and enjoy yourself.

Don't think. It will be there but you have to settle it down. Again tomorrow and day after tomorrow I'll work it out. And then you have to learn it how to raise your own

Kuṇḍalinī and others Kuṇḍalinī. We have our centers. It is all free for you to come there. Please contact the people who are in the center and develop your powers of Spirit. Those who are enjoying should enjoy it. *[UNCLEAR]*. It's tremendous today. Now don't doubt, please don't doubt. It's a very subtle thing and doubting will again make you gross. Just try to feel it. Also don't doubt your Self. Sahasrāra. It comes from both with some people.

Doesn't matter.

Some people have it on the right; some people have it on the left. Doesn't matter. In three days you'll be perfectly all right. Also bring your friends.

Thank you very much.

Contents: **1983-06-1x Quote on Dogs, Ashram, Le Raincy (13 kms E of Paris), France**

Sahaja Yogi: Mother, which dog is good?

Shri Mataji: All dogs are good [pause] except bulldogs [laughs]. German Shepherds are good, like the one she has [pointing to Vanda, the German Shepherd that was sitting among us]. See, she loves everyone.

Another Sahaja Yog: [asks about boxer dogs].

Shri Mataji: [says that they are journalists].

Sahaja Yogi: Mother, what about cats?

Shri Mataji: Cats are all right.

Sahaja Yogi: [asks whether cats are not negative].

Shri Mataji: No, no, cats are all right. But they have lost their powers.

Contents: 1983-06-18 **Havan, before Śhrī Lakṣhmī Pūjā, Importance of Pūjā and Havan, Paris, France**

I am so happy and joyous to be here with so many Sahaja Yogis and so many of them are very new...

not very new to Me, perhaps I have known all of you, thousands of years back.

You are sitting in the sun.

In Sahaja Yoga you all have to understand one simple thing, that you are the spirit. And whatever is not the spirit is not yourself.

We can compare spirit with the sun. The sun can be covered with the clouds, there could be superimpositions on the sun, but sun remains as it is, at this point. You cannot enlighten the sun. It is illumined by itself. Now, when the clouds are removed, the superimpositions are removed, the sun shines through the atmosphere.

So, our spirit is also is superimposed by ignorance. As long as there is superimposition, you can't see the spirit. And even when few clouds disappear the superimposition exists. One has to have a clear sky to see the light of the spirit shining through. There are many ways by which we can try to remove the clouds.

The first and the foremost thing is the assumption, the faith that you are the spirit and that the rest is superimposition. You have to assume that within yourself, after Realisation it should become very easy, that you are something much more, something very different from what you have known so far.

So, now the new situation arises, that you do not have a blind faith, but you have a faith that has come out of an experience.

So your intellect should not fight it. It should not try to challenge you. If it challenges and if you hear to your intellect, you'll again go down. Even if you get the glimpse of a star in the sky, then the scientist believe that there is a star.

So, in the same manner, even if you get the glimpse of your Realisation, you have to at least believe that you are also a spirit. You go on sticking on to that experience and keeping your attention on the fact that you are the spirit. Tell your intellect not to cheat you anymore. You can turn the face of your intellect by this.

Now your intellect will start working for the pursuit of the spirit. This is what faith means. Faith means rise to pure intelligence. Now, when you are seeing clouds removed to a great extent, still there are clouds.

So you have to use the wind to remove the clouds. Wind of the Holy Ghost. And that... you know, there are many ways of taking advantage of the wind. I hope the Italians understand.

So the wind comes from some other source, that is the source of the Holy Ghost, your own Kuṇḍalinī. And also you have in person the Primordial Kuṇḍalinī before you. Compared to many other seekers who came before you, I must say, you are very fortunate.

Because worshipping any vigraha, any... even a statue of self-created vibrations from the Mother Earth, people had big problems. They had to, first of all, do a meditation which was called as Savikalpa Samādhi. That means, in

that state you had to concentrate on such a statue, vigraha. Vigraha means the one which is a vibrating statue. And then, go on looking at that statue and trying to raise your Kuṇḍalinī.

And Kuṇḍalinī used to come up to Āgñyā. But the jumping beyond the Sahasrāra was an impossible task, because one had to go from form to formless and it was so difficult, to get out of form to formless. And even to concentrate on abstract or formless was another impossible task as the Muslims did, or many other people tried to do. Under these circumstances it was necessary that the formless had to take a form, so there was no more complication to you. As soon as you concentrated on the form, you became formless.

Like if you have ice before you and as soon as you start touching the ice, it melts away and you start feeling the cool.

So the problem is very easily solved now. Pūjā is one of the things by which you can excite the forms into formless. Now, your centers are the centers of energy. But they, too, have a guiding deity sitting on all these Chakras. They are also the formless made into forms. And when you do the Pūjā, the forms melt into formless energy and this formless energy then starts flowing and that, then blows the wind. And that's how this misidentification, superimpositions on the spirit are removed.

Now, you cannot think about the Pūjā. The whole thing happens in a realm which is beyond thinking.

So, you have to understand that you cannot rationalise the Pūjā. You should have the maximum advantage on

your Chakras. For that you must fully just concentrate on the Pūjā and how the wind is blowing. And the wind will see to it, that they drive out all the clouds.

So your only work is, or your only method is, just to concentrate on the Pūjā and witness. You are a seer.

Seer has double meaning. The one who sees only, just sees and is only knowledge, is a seer. Without any thought, without any reaction, just sees and absorb, automatically, spontaneously, is the seer. And so, that is the best way to perform a Pūjā. For Me sometimes it's burdensome, because there should be some parity between you and the deities.

Some balance must be there.

Here you are saying all the mantras and the deities are awakened and there you are, who do not want to receive anything within your heart.

So I am the one who has to store up all the extra energy that is produced in the body.

So it would be better if you all keep your hearts open and watch the Pūjā without thinking about it.

Today we'll reverse the method of Pūjā. First we'll do the havana and then the Pūjā, will be better.

Because by that we'll evoke the fire element, which burns away all the evils. When you wash My feet, you do the same thing.

And even when you evoke the fire, you do the same thing.

So today first we'll have the havana and then we'll have the Pūjā. Both are just the same. You can worship Me with water or with fire. The essence of fire is the glow,

tejas. All that is wrong, all that is evil is burned out and then the glow shows on the faces and the body of the seekers. And also atmosphere is charged with the beautiful vibrations when you have the havana.

So I think best thing will be to do the havan first and then the Pūjā.

May God bless you!

***Contents: 1983-06-18*, Public Program, Day 3, Place St. Germain des Pres, 6th arrondissement, Paris, France**

To all the seekers of joy I bow.

I already told you that joy has no duality. It does not have happiness and unhappiness. It should never be confused with pleasures. Because the pleasure that looks today the pleasure, tomorrow will turn into remorse.

The joy is absolute and eternal. It does not change. Only thing that, how far we have been able to allow the Spirit to shine in our attention and how far we have been able to get rid of our misidentification is the important point. Today I made an analogy of the sun to the Spirit. The sun is shining by itself, it doesn't need enlightenment. By itself it is there. But to get the sunshine in the atmosphere we have to remove the clouds, because the clouds are superimposing upon the sun. The clouds that are superimposing cannot engulf the sun, because sun is detached from them. Only the clouds can make the atmosphere dark.

In the same way when we have superimpositions of our ignorance upon the Spirit, then there is darkness in our life and we are in confusion.

As I told you the first day, whatever we achieve through our mental projections can create those clouds.

Also our conditionings can create these clouds. For example, say we are born in France.

So we think we are French. Then anybody who is not French is not good. Same with Indian, if they are born in India, they think the rest of the world doesn't exist.

Then these identifications start becoming even smaller and smaller and smaller up to this point that we say that we belong to this road, then to this family, then myself. All these misidentifications with the names, with the so-called powers, with the so-called ideas about our history, all these things are nothing but conditionings.

Also due to these two problems of Ego and Super Ego in the present time we are all the time jumping from our past to future, future to past. But we cannot stand in the present. Now, if I have to say that you pay attention to yourself within, you cannot do it. You just can't take your attention inside is a honest thing to say.

Here somebody may be dishonest by saying, “No, I can take my attention inside." But it's a fact that you cannot take your attention inside.

So this happening takes place, the awakening of the Kuṇḍalinī and that sucks in your attention inwards which is outside. Human attention is mostly outside and whatever it sees or it feels or experiences, it creates a thought wave in the mind.

So to understand yourself, your attention has to go inside. And that is why this Divine arrangement is within us.

This power which is the pure power of your desire resides in the triangular bone, sacrum, waiting for that moment when somebody who is authorized by the Divine itself can awaken it. The time has come today as I told you before that thousands and thousands, millions and millions, billions and billions have to get their realisation.

Fourteen thousand years back in India the originator of the astrology in India called as Brighu Muni has predicted that such a system will start in 1970. Actually he didn't write 1970 he wrote according to Indian calendar. But three hundred years back another Indian called Swāmī Bhujander transcribed it and said that it had to start in 1970.

Sahaja Yoga started in 1970. Also it was said that in this new method of Sahaja Yoga, thousands of people will get awakening of the Kuṇḍalinī in a Sahaja way, in a spontaneous way and that you will not have to work hard for it or to do any kind of penance, tapascharya. This was predicted so far as that that after some time when such yogis will be created on this earth that there will be no need of hospitals.

It has gone even further, it's quite a long thing but I'm just telling you that it has been predicted a long time back.

But only hundred of years back, a great seer known as William Blake was born in England. In a book called Milton, he has identified Milton with a seeker. And he has said so clearly about Sahaja Yoga that it is really surprising that such a seer was born in England. He has said that the men of God will become prophets and these prophets will have powers to make others prophets. He

has even given exact places where I would be living. First we were living in Surrey Hills. He has written that the first *[UNCLEAR* big fires] would be lit in Surrey Hills. And there's a second house which he has described, he has described it that it will be on the Tyburn brook, behind the Kensington Gardens. Now My, this house is exactly there.

Also he has described how he called them `Golden Builders" because the Sahaja Yogis have come and painted My house with gold somewhere in the *[UNCLEAR* business]. The first ashram of Sahaja Yoga was started in Lambeth's Vale where I laid the foundation for the *[UNCLEAR]* and it was a house bombed in the war. He has written that the foundations will be laid in Lambeth's Vale in a house which is broken down up to this limit: that her sinews will vibrate the Divine.

It's very remarkable the way this great poet has described Sahaja Yoga in England. He has retaliated against all industrial troubles and industrial problems very strongly. And he's lashed *[UNCLEAR]* all the crookery and the immorality of the people of England. And he had said that we have to build Jerusalem in this land of England.

Look at his aspirations and his understanding of the future! This is what is a seer. And you become a seer after your realisation. A seer is a person who sees but does not react, does not absorb. It just sees as a witness and the whole thing is like a play. He does not do anything himself, but his presence itself is auspicious and it works out goodness. It is difficult in these modern

times to talk about auspiciousness, holiness or Divine miracles.

When we believe in Christ we must know that He has shown so many miracles Himself by curing people.

But He did not do stupid miracles like taking out a ring or giving some sort of an ash into your hand. A seer can live in a palace or live in a hut. He is a king because he is innately a king, like the sun does not need any light.

This state can be achieved through the awakening of the Kuṇḍalinī and in India perhaps everyone knows about it. Even the Christians had this knowledge. As I told you yesterday that Kuṇḍalinī is to be awakened but as we have lost many things we have also lost this knowledge. But still in the Bible you find sentences like, “I will appear before you like tongues of flames." These centers are, they look like tongues of flames all living tongues of flames, but very silently moving.

And the last center that you see there Sahasrāra actually looks like a petal, many petaled, thousand-petaled lotus, but it is like many flames of many colours very silent sometimes closing down and sometimes opening.

But seeing the Chakra is not being inside the Chakra. Like you are standing outside this building, you can see the whole building, but when you are inside you just see the inside.

So those who have seen the Chakras have moved their attention from one sympathetic to another sympathetic and have gone out.

Supposing a tree is sick, so you cannot enter in to a tree's being through the leaves or through the branches, but you have to pass through the sap into the roots.

So no use treating any particular leaf or any particular flower, the best thing is to go through the roots.

So the Kuṇḍalinī is the root and the lower center than that which is the center of your innocence is the support of this root. This is the center of your innocence and this center is governed by a deity which is an eternal child. The energy of this deity is innocence.

Now the same deity incarnates on this earth as Lord Jesus Christ. He is described much better in the chapters of Mahāviṣhṇu of Devī Māhātmyam. When His father blessed Him that He should be born on this earth and that He should be the support of the universe, His father told Him and He had a very difficult task to perform. His body was made of the Brahma itself, the All-pervading Power. There was no earth element in it. No elements were there. Only this All-pervading Power, this abstract had taken that form and when He came on this earth the greatest task He had to do that He had to pass through that gap which you see where Ego and Super Ego are crossing as the position of pituitary and pineal body.

That's why, when He was crucified, His body was resurrected: because He had no body.

So crucifixion gave Him a position in our Āgñyā Chakra here by which He died and came out of it between these two very tightly crossing, these Ego and Super Ego.

So His resurrection is the message for us. On the Easter Day we give eggs to people as presents and we do not know is the meaning of that is. But actually in the Devī

Māhātmyam is described that first He was an egg, a special egg. And half of Him remained as it is, because He formed the lower Chakra and the half of it became Mahāviṣhṇu, that is Christ.

That is the same thing is that the egg becomes the bird by resurrection. And that is why the egg is given to us: to show that we have to become birds. In Sanskrit language a bird is called as Dvijaḥ and also a Brahmin, one who is a realised Soul, twice born, is also called Dvijaḥ. Because the bird comes out of the egg in one life time, so it has a double life, means it's a twice born. And also a human being first is an egg because it's a closed *[UNCLEAR* process] you can see the Ego and Super Ego [closing down].

And when the bird is ready the shell is broken here and out of the egg comes out the bird.

So a Brahmin, or a person who knows the Brahma, the All-pervading Power, is also twice born, Dvijaḥ.

That's the same thing is that we are to be born again. Christ has clearly said that “You are to be born again." I mean, there cannot be more clear statement than that. But what we do is to get some priest from some theological college who is not a realised Soul and he artificially puts the water on the fontanelle bone. The Kuṇḍalinī doesn't move. There is no awakening, you don't see any movement of the Kuṇḍalinī.

Nothing happens. Only we celebrate the baptism by having champagne. How we believe into such things! All this befooling is going on, but William Blake wrote very clearly that “a priest cursed me on my head when I was helpless." So this is what it is: that you have to be born

again to be Christians and for that you have to have baptism. [GAP] So to put it plainly it has to be a living process... Any Dick, Tom and Harry cannot put the hand on your head and say that you are baptized. Christ was born realised, but He took a baptism from John the Baptist because He was wanting to make people understand that they have to do the baptism also. This is called in Sanskrit as Samayāchār. For example, in no lifetime of Mine have I known English. I've never heard of French. But in this lifetime I know English and I'm hearing French.

So according to time, one has to act to tell people how they should perform this baptism.

I went to America and all the people I told them, “You have to be born again." So they started an organization saying, “These are born-again." All self-certificates. There is a big organization like that which says, “We are born again." How human beings accepts falsehood and so easily! They don't want to understand that how can you be born again just by certifying yourself? And once they form such a fanatic, nonsensical false group they become so violent and arrogant that nothing can change their ideas.

They are sure they are born again.

But if you are born again, you have to have some powers, you have to have some speciality. And what is their speciality is nothing. I asked one of them, “If you are born again, can you tell Me what's wrong with this gentleman?" He said, “I know, but I don't want to tell You." So foolish and so stupid the whole attitude is towards oneself! They have no respect for themselves,

they have no understanding that how God, with great delicacy, with great care and love, has create them as the epitome of evolution.

All these cults are the same style of nonsense that is going on. First of all you cannot organize God because it's a living process. Can you say that on such and such day, at this time, the flower will become a fruit with your watch, even if you have a Swiss made? Is an impossibility.

So how can you organize a living process of your evolution and the source of that evolution which is a living source? The biggest mistake is that people have organized God and organized religion. Now nobody can penetrate it. It is far away from reality. What it is that one must know that God is above us. He can organize us; we cannot organize Him.

So first of all we must drop ideas from our heads that we can organize God or this living process but we must know the source of that process.

Now, the source of that process is the central path that you see there. I told you yesterday about the left and right side, now today I will tell you in short the central path. That central path that lies within us is a very subtle energy. In the gross it expresses the parasympathetic nervous system. Whatever we have achieved in our evolution is expressed in the central nervous system. That means we can feel it on our physical being. But we cannot feel the existence of Spirit on our physical being so far.

So in evolution we have only come up to a point where now we have to have the final ascent.

So this gap, this bridge, is to be done through some triggering. Just like we have spacecrafts, there are cylinders placed into one each other, like first the physical should start the mental, then the mental should start the emotional, then the emotional should start the spiritual.

But when you start seeking the spiritual you find there is no way to jump above to become the Spirit.

So ultimately this Kuṇḍalinī triggers you into the Spirit.

So, so far, you have been made human being through the central path or the central power of sustenance. The Sanskrit word is Dharma for that dharayeti sa Dharma [“dharmo dharayeti iti" in Rig Veda]. Dharma means the one that sustains. Actually Dharma is translated as religion in English language, religo. But it means that as carbon is first created at that point, first point, part [Shri Mataji is probably showing the Mūlādhāra as the translator says in French “ce premier Chakra"], once the carbon comes into the play, the organic chemistry is formed. The life starts breathing. Then the other evolutionary stages take place inside the void. While the yellow thing that you see there, is the second Chakra, creates the universe.

Now, in evolution, if you reach the last stage you become the seeker. Those who are not seekers are very low to evolution. They may be kings, prime ministers or they could be any big Johnnies, but to God they are not important. When you are evolved to the maximum, then you start seeking your Spirit.

Such people are extremely earnest and very seriously thinking, “The end is seeking." They may seek in drugs,

they may seek in alcohol, they may seek in sex, they may seek in other such things which are called immoral, but despite all that they are seekers. And a person who is not a seeker and a very moral person is of no use. Even if they don't believe in God, they believe in Him because unless and until they say there is no God, when they say there is no God that means there must be God. It's like saying there is night means there is a day.

Such people, the seeking is so great that they do not want anything else but the last jump. They are not interested in any material gains or any position. They have had enough of it. But ultimately they want one thing: is their Spirit to shine in their attention.

Today in modern times thousands of seekers have come. I didn't say millions but millions is a better word. Yes, millions and millions, so many are there. And they are lost; some of them are definitely lost, I must say. We'll have to rescue them also. But these men of God are going to receive their realisation.

And I've met such wonderful people that one day they were lying in gutters taking drugs and second day they are here giving realisations.

Such tremendous personalities I've met that I'm Myself amazed. Many Saints are taking birth today.

All the Sahaja Yogis who are married have got all born-realised children. And this has to happen.

This is the time of our judgment, the last judgment. We are not going to be judged in a weighing machine. Only this Kuṇḍalinī is going to judge you. The great painter and seer, Michael Angelo, has written it large in the Sistine Chapel. Christ is standing, very strong personality

at the Āgñyā Chakra and He's thrown so many people down to hell. And the saints are passing through His hands and going above in the Kingdom of God. He is a great seer because he saw Christ as He was.

Christ was a very healthy, robust personality, but below the painting there was another bony *[UNCLEAR]* stuff *[UNCLEAR]* kept as Christ. It is sadistic to show Christ like that. Because they want to see that Christ was a miserable creature. How can a person who was just nothing but these heavenly vibrations could be such a miserable creature like bones? He carried the cross on the shoulders. Let anyone of these popes carry even for five minutes, then I would like to see how they would look. This has created a big problem in India. Indians were all waiting for the incarnation of Mahāviṣhṇu, but the missionaries who went to India with gun in one hand and Bible in another brought a picture of Christ so miserable and Indians could not believe that a person who is going to be born for the salvation of humanity could be like this.

They could not connect that incarnation of Mahāviṣhṇu has already come. It is said that when the incarnation of Mahāviṣhṇu will come and it will settle in the Āgñyā Chakra, then when He is awakened, all our Karmas, means conditionings and our Ego, Ahaṁkāra, will be all sucked because He would have suffered for us. And that is exactly what happens when Christ is awakened then these two institutions or these two bloated things just get sucked in. And then you find there's a space in your head and you find the Cool Breeze coming out of your fontanelle bone area and you get your real baptism.

That was the great task of Christ *[UNCLEAR]* and then at the cross He said, “I've done My work." His mother for Indian purposes was the incarnation of Mahālakṣhmī, the Goddess of the central path of evolution. But He did not talk about Her at all because He is bestowed upon *[UNCLEAR]* with eleven destructive powers of such *[UNCLEAR]* that nobody can withstand it.

If anybody would have touched His mother, He would have given up His drama and destroyed all the world, half way the drama would have finished. Ultimately He is going to come on a white horse. The Mahdi has to come, the Mahdi in the Koran and in the Indian scriptures it is described as Nishkalaṅka, means spotless, pure. And also in short form they call Him Kalki.

But when He will come on the white horse, He's not going to give any chance, any realisation, no counselling at all. He's not going to comfort you out of your diseases. And He's not going to redeem you to become realised Souls.

He'll be coming with eleven destructive forces of Ekādaśha Rudra and all His compassionate forgiveness will be a past history. You can see it His clear-cut picture done by Michael Angelo as I told you in the Sistine Chapel.

So this is the most important time today where the world is facing and we have to be aware. No use just saying that whatever *[UNCLEAR]* will happen, now we do not want realisation.

As today is My last lecture, I don't want to *[UNCLEAR]* on a subject like hell. I don't want to talk of it, but I want to talk about the Promised Land, he land where there is the rule of God Almighty, where your Father is sitting with His

both hands to receive you with love and give you all His powers for which you should not say, `I'm not ready.' It is for Me to decide. You please don't decide about yourself. Only thing I cannot do is to create that earnest desire in you. That is My limitation.

So I would request you to feel that earnest desire by logic.

See all the people whom you think to be very happy people and go and meet them. There was a lady who said about a particular actress, “I adore her; I wish I was her." She told Me that and next day this actress committed suicide. This is the thing we do not understand: that none of these people who are supposed to be the top successful people are happy. Let alone happiness, if you cannot get that, how can you think of joy? Today is the last day I'm speaking to you; perhaps after one year I will come back here. I would like to tell the citizens of Paris and France that they must think of their eternal life. They have really played havoc with their own lives and also they have taught many bad things to other people also. They should now enter into their roots and become great realised Souls and nourish this weak sickly tree of life through their vibrations.

Sahaja Yoga is taking a big stride everywhere and I'm sure many will be saved, but I'm worried about each individual is sitting here. I wish you could have the same love and respect I have for you. Please take your realisation and follow it up. Within one month you can become the master of your being. No slavery of any kind. For which you don't have to pay anything, don't have to work hard. You have to just swim in the ocean of joy.

.....

[Wrapped in a white silk sarī, standing before a white wall. Her black hair, rivers of night, on Her shoulders, magnificent. She spoke with immense power:] In the past, France has in many ways, given a bad example to the rest of the world. It is time that the people of France take to Self-realisation..... The last Judgement has started. Don't worry whether you are ready or not: this is for Me to decide. It is your Kuṇḍalinī who will judge you.....

[Walking out of the conference hall Shri Mataji, with a laugh and a gesture of the hand, exclaimed:] We have won Paris; it is done!

Contents: 1983-07-00 **Quote on Caesarean, Phone Conversation, Brompton Square, London, UK (month not sure)**

[Gillian Woltron calls Shri Mataji to let Her know that a baby to be born requires caesarean. Shri Mataji tells her to let the parents know that they should not worry.] After all, I invented all this technology to help you and anyway, I shall be there.

[The baby was born through a caesarean, without any complications for mother and child.]

Contents: 1983-07-16 **Quotes and Notes from Advice given to Sahaja Mothers, also from Nirmalā Yoga, Issue 16 (Jul-Aug 1983), pp.29,31, UK**

It is a very special responsibility, that of having children.

[During conversations with Sahaja Yogini mothers, Shri Mataji mentions that in the Western society, the children

are born with our ego and superego and this is the reason they are often born with little or no hair. In India, Shri Mataji tells us, the babies are always born with hair.] [Shri Mataji has also explained that God can protect the children from most of the harmful vibrations, but cannot protect them from the vibrations of the parents. Therefore it is important that the parents cleanse themselves as much as possible. According to our practical experience almost all vibratory problems the children are facing are those of the parents.]... It is very important that the mother's mental and spiritual health is kept clean and positive...

... Whatever is going on in the mind will affect the child. The mind has to be happy. You cannot be with artificiality or fantasy...

[During Pregnancy, it is very important that the mother's mental and spiritual health is kept clean and full of positivity.] [Shri Mataji advised reading books about pregnancy and childcare in order to educate ourselves in the absence of sensible parental advice which in a society such as India would be available (the grandmother playing an important role).] [Shri Mataji has advised a daily walk in the park or country throughout the entire pregnancy if the mother is fit and healthy and the pregnancy normal, This, Shri Mataji explains, will help towards an easier labour (This advice may indicate that it is helpful if the Swādhiṣhṭhāna Chakra is clear).]... Once the child has all its needs seen to [changed nappy, feed etc.], he shouldn't be picked up all the time as this encourages the ego to develop...

[The mother and baby should stay inside for forty days. Contact with non-Sahaja Yogis should be minimal during this period.] [After breastfeeding check if the child is full or not. The baby should properly belch after each feeding, even if he falls asleep.]... When taking the wind out of the baby, the hands should be moved in a downwards direction, from the neck to the base of spine...

... Avoid cold drinks and omit all well known gas producing foods if your baby is sensitive [beans, spices, garlic, onions, cabbage, etc.]...

[Sugar and boiled water can be given to the baby from birth onwards.] [It seems that many of our babies have experienced problems with wind and colic. Shri Mataji gave us much advice on how to treat and prevent this:] [-Ajwain treatment: Foment ajwain by chewing it yourself or by warming it in a dry pan. Place this on the baby's navel with a warmed nappy on top, holding it in place.] [-The mother should also chew ajwain: Quite a good handful several times a day. Another good way of taking ajwain is in a drink that Shri Mataji has shown us how to prepare: Use seven fennel seeds [called `saunf' (sweet cumin kind of seeds) in Hindi language which is taken in India after having food for digestion] and two ajwain seeds with sugar. Use this as baby's drinking water in a bottle. And the mother may also take it. In severe cases Sahaja Yogis have seen that increasing the amount of ajwain seeds can help.] [-When the baby is older, i.e., approximately one to two months, grips water can be given, say twice a day, but it must be boiled first.] [-Other preventative measures: (i) the baby should be

properly winded, even if he falls asleep and (ii) when taking the wind out of the baby the hands should be moved in a downward direction from the neck to the base of the spine.] [-If your baby suffers from wind problems, your own diet is very important while breast feeding, to help reduce this build-up of gases: (i) no rice should be taken; (ii) root vegetables and all things growing below the ground should not be eaten; (iii) no white flour or any produce made from white flour; (iv) milk should be taken with something like cereal, never on its own; (v) avoid cold drinks; (vi) also omit all generally well-known wind-producing food, e.g., beans, spices; (vii) good foods to eat are semolina almonds (sugared or plain), an Indian sweet called Rasgullah (sweet, white balls in sugar syrup).] [Babies are to be weaned at six months and fully weaned at approximately ten months. All food should be natural, no packaged or artificial food is to be given. Shri Mataji advises that the first weaning foods should be rice mashed up with sugar and milk. Do not start babies off on curd (yoghurt). Feeding bottles should preferably be made of glass.] [Shri Mataji has strongly advised us to feed on a regular basis from the beginning and to establish a flexible routine for the children. It has been stressed that, to a reasonable degree, they should adapt to our lifestyles and should not begin to rule us!]... Baby should be oil massaged daily as it is very good for the Chakras. Use an oil such as olive, almond, mustard or ghee or butter but not the proprietary baby oils, as they do not contain vitamins. Do not use olive oil on the hair, as this turns white. Massage

with the oil towards the Sahasrāra on the head, as if to `fill' the Sahasrāra with oil...

[Shri Mataji has insisted on the importance for the children of wearing l00% natural fibres. Only pure cotton should be worn next to their skin. Woolen clothes should be worn over cotton when it's cold. It is important to also cover the small indentation in the collar bone area. This helps to prevent from catching cold. Silk is not such a good fabric for babies.] [Regarding nappies, use cotton ones as they are much better for vibrations. However, in situations like seminars, programs or travelling where washing facilities are very poor, we can use the disposable ones as a temporary measure.] [To allow a good flow of vibrations, two-piece outfits are preferable to one-piece ones. The garment should end at the ankle. In cold weather, make sure the Nābhī Chakra is well covered and keep the head and feet covered. Girls should be dressed like girls, in dresses or Punjabi suits and boys should be dressed like boys.] [When bathing the baby, we should keep it warm. If the weather is cold, they should not be bathed so often. Shri Mataji says it is not necessary to bath every day. Daily oil massage is necessary.] [Do not pick the baby up under the arms as this can damage his shoulders and be very painful for him.

Hold him at the level of the chest.] [Brushing the hair should be done even if their isn't very much. Brush it from the front to the back on top of the head and upwards towards the Sahasrāra at the back and sides. This is to open the Sahasrāra and encourage the growth of the hair.] [Shri Mataji has advised us to get the child

vaccinated against childhood diseases, as this helps to strengthen them against negativity. If you feel that the child has been a little bit affected on vibrations by the vaccine, you can work on the left Swādhiṣhṭhāna with a candle.] [Shri Mataji has recommended that the children should meditate with mothers in the early morning from the age of being young babies.] [Regarding toys, these should be also made of natural fibre such as wood. Plastic toys do not have good vibrations and should be avoided. Shri Mataji has commented that it is better for the children to have fewer toys of better quality than lots of inferior ones.]

Contents: 1983-07-17 **Pūjā, God's Blessing upon Sahaja Yogis, Ashram Inauguration, Surbiton, UK**

... blessings to have such a nice place where we all can meet and do the work of God. Sahaja Yogis have to remember that we are here to do God's work and whatever blessings we get, these are just guidelines to know that God is creative.

I think the London Sahaja Yogis are real, really blessed ones, really blessed ones. The way they get one after another beautiful places to live in. And, we all should be very, very thankful for what God has been very kindly suggested to us.

I came here in the afternoon just to see the place. As I looked at these trees and the garden and the flowers, all of them are here specially, very specially to tell you that God is creative. We have to learn a lot through them: how they grow, how they expose themselves maximum to the rays of the sun, how they suck their nourishment,

all this is a great training for all of us. They are absolutely entirely surrendered to God and to human beings who are the epitome of this civilization.

So, it's such a big thing that we have a place which is unbelievably great and that we have to be very grateful. Count your blessings, count your blessings. There are still so many lost, so many who are going to be lost, but you are in the right path. This is sort of an advanced payment. [Laughter.] It's so beautiful and so sweet but one has to know, as I told you before, that we are not going to stay in the ashram just to make our life convenient and leisurely. That's not the way we should look at things.

If you have to live in the ashram, we have to discipline ourselves. You have to better yourself, everyday you have to rise. Certain rules and regulations of the ashram must be observed. There should be no idea of a democratic government where everybody has a right to vote and can demand what they want. On the contrary, it is the great privilege that you are supposed to enjoy the blessings. It's a great advantage for you that you are so fortunate to see these things with your eyes open, that God exists and He rewards.

This understanding should give you more and more courage and complete willingness to improve yourself.

This is the most important thing. Sahaja Yoga is of course as you know is for your transformation and an ashram is for your improvement.

So, those people who are going to stay here or those who are going to visit here have to relatively see how they are improving and growing. There are many things which

are going to come for us. They look material but they have an atmosphere of spirituality.

Try to settle down with yourself. Don't quarrel. *[UNCLEAR]*. He wants you to be comfortable. After a month you'll get all the Sahaja Yogis who have to stay here. We'll sort it out and then they will be allowed to stay here. Till then we have to see what people are coming from abroad, they must also have proper places to live in. At the most a month, some people would like to stay here, but some of you will have to be here to look after them, to give them all your help. Those who have car, who have time, should come down here and start it out. We have to organize it on proper lines. There are three Sahaja Yogis are coming across the oceans and one of them also to stay here. Try to make their stay comfortable. They are your brothers of great achievements and we have to respect them and look after them. I'm happy we have here from America another great Sahaja Yogi. Try to help them. Whatever they need, whatever they want to do, they want to go out, make arrangements, make it easy. If they want a car or anything, try to help them.

Secondly, you must keep it clean, look after it. You have entered into another arena now, on another level where your own comforts should not be considered, it's the comfort of others. Now, you are at a giving stage.

So, what are we going to give others, you have to see. Not what we are going to have “Oh this is not good, there's no hot water, there's this thing.", all you forget, you will not need anything.

So many will be pouring down. Who else has come for Guru Pūjā now? Apart from Herman.

You have come from where?

Sahaja Yogi: *[UNCLEAR]*.

Shri Mataji: Oh I see, good.

So, all those who are coming from anywhere else, you see, have to stay. And those people who want to look after them, you can have turns.

Now today is the... what is the date today?

Sahaja Yogi: Seventeenth.

Shri Mataji: All right! Modi is coming on the nineteenth, I believe. He's coming on nineteenth.

Anybody who is going to organize here, food and all that... Michael? Who else with you? Is David? Where is David? There he is. All right! So, I'll give you a check of thousand pounds which you can cash. Get all the ration and everything with some girls here.

I'm not going to pay. You have money in the bank. Now, don't get upset. I see some people frowning [Laughter.] I'm not going to pay anymore now. Finished! All right.

So, we have money in the bank and that money has to come handy now.

So, about thousand pounds I would like to sanction.

And, David you. Michael. Who else is here? All right. That's good.

So four of you put together, you decide what you want to buy. And, some ladies you need here to help. Who will be here? Kay? Who else? Those who are free. You, two.

Who else? All right for the time being. Two of you and four of these boys. The rest of you should not shift here, should not stay here. But once, you see, these people are over, finished with it, then you can shift here.

We'll see that. For now, we have two ladies who are willing to stay here and four gentlemen. All right? At least till the Guru Pūjā it'll be quite busy, I think, lots of people will be coming.

So, some more ladies who can spare their time for these three-four days should also raise their hands, I think, these three-four days. All right? Who else? What are you doing, Tanya? Tanya: I'm working.

Shri Mataji: You are working, won't be free. All right.

So about, say, three ladies are there.

So, three and four, seven people. Till the Guru Pūjā, we can manage somehow and then we'll see what happens.

Hello? It's all right. It's all right. *[UNCLEAR]*. The children are *[UNCLEAR]*.

So, those who are already here... who are those who are staying here? You are staying here and who? John, you are there, four of you. Four. Five. Five of you are here.

Six? Six of you. Who is in Chelsham Road now? What the girls are there? Michael you are not here?

Sahaja Yogi: *[UNCLEAR]*.

Shri Mataji: No, I think you come along. Till the Guru Pūjā, you see, you need here some people to really do the job. You may go to sleep there if there's no room, if there are too many people. I think we can manage.

Guru Pūjā is on the twenty-fourth only.

So, hardly there are three-four days. I mean, when will you go to Guru Pūjā? Evening? Friday evening or Friday morning?

Sahaja Yogi: *[UNCLEAR]*.

Shri Mataji: Friday? Friday.

So, you see, hardly anytime. Today is what... let Me see... Monday, Tuesday... four-five days. All right. I may also shift Myself. If the servants are here, no problem. They will cook for Me.

But what the gas is working here?

Sahaja Yogi: *[UNCLEAR]*.

Shri Mataji: Gas is not here.

So, how do we cook?

Sahaja Yogi: Gas has been disconnected downstairs *[UNCLEAR]*.

Shri Mataji: Is it?

Sahaja Yogi: Yes, I've had a look downstairs.

Shri Mataji: So, if you get the gas, then it's very easy. I can get the servants here. Then, I can shift Myself in a way. All right? If there are say, five people, you five people and three ladies, they can cook for you, no problem, all of you. But gas you must have. Without gas they cannot manage. The water is running there? Hot and cold, both?

Sahaja Yogi: *[UNCLEAR]*.

Shri Mataji: Just cold.

So, how will you have hot water? Is there an arrangement?

Sahaja Yogi: *[UNCLEAR]*.

Shri Mataji: All right.

So, gas connection if you can get it tomorrow... is it possible?

Sahaja Yogi: Yes, I can get the gas connected as well as I can get the hot water running.

Shri Mataji: Without that how will you manage, I just can't understand.

Sahaja Yogi: They'll have to do it tomorrow night.

Shri Mataji: Yes, of course! Is there an electric cooker here?

Sahaja Yogi: No. We only got one electric kettle at the moment.

Shri Mataji: No, you have to have the gas. Otherwise it won't work out. If they connect it tomorrow, the servants can come and start cooking. In any case, I'll ask them to shift everything here, whatever is possible, vegetables and ghee and all that. Plus, I'll give you money to buy rice perhaps we may need.

So, about four people: gentlemen would be five and ladies would be three. Five and three, eight persons. All right.

As soon as the gas is connected, they can shift here. That's the point is. Gas must be connected.

Otherwise, where will they cook? You see, there's no electrical cooker.

Sahaja Yogini: Mother, I've got a smaller electric cooker, just two rings and smaller than oven.

Perhaps it would be a start.

Shri Mataji: Start, we can!

Sahaja Yogini: I've got it in the car actually.

Shri Mataji: Is it? [Laughter.]

Sahaja Yogini: Because, we drove it from London to Brighton but we didn't unload it and so, we brought it all the way back but I couldn't understand why. [Laughter.]

Shri Mataji: Now, what do you say to that, *[UNCLEAR]*. I was wondering how is she got the thing... [Laughter.] So, we don't have to worry about anything whatsoever. But still we'll need gas thing, but for the time being it's good. All right, you shift it here.

Sahaja Yogi: *[UNCLEAR]*.

Shri Mataji: So, better do something with the gas also. All right? Because without the gas, so much cooking cannot be done. Partly, as she said.

So, better unload the thing and put it down there.

Sahaja Yogi: *[UNCLEAR]*.

Shri Mataji: Gas, on your own?

Sahaja Yogi: It will be better if we had a gas man there. [Laughter.]

Shri Mataji: You better go and tell them, `If you don't connect, we'll connect ourselves.' [Laughter.] I tell you, so many beautiful things happening.

So, we have to have that hot water started immediately as soon as the gas.

So, tomorrow morning what time, John, you think you can do for the gas?

Sahaja Yogi: Nine o'clock.

Shri Mataji: So, let him come here by nine o'clock? Then, you go ahead with him and get the man and get it done. All right. Douglas, I know you can manage. Douglas is really a daring person. The way he has fought all the TM bhoots, you see, they're all literally frightened of him. [Laughter.] You must see today's article in The Times. Did you read? Horrible article. Did you see the... My God!

You must see that. He was very upset, David Krall. He came down and showed Me the article.

It was horrible. They are already trying to advertise it and do all kinds of things and, there's somebody whom they have paid perhaps for writing. David can tell you. David, have you got the article?

Sahaja Yogi: *[UNCLEAR]*.

Shri Mataji: So, we are going to work on that. Horrible article! He was very upset, David. [Laughter.] All right, he is going to get the photocopy. Give it to Gavin. Give it to Gavin. Hold it with the prong.

[Laughter.] So shameless and so fraudulent! It's all falsehood they are talking; absolute falsehood.

So many people are levitating. Their Guru is levitating in the room. Everybody is levitating there, you see. All falsehood, they can disappear in thin air.

Sahaja Yogi: It's all Your work, mother. [Everyone bursts into laughter.]

Shri Mataji: And, seventeen thousand people are following... seventeen million or something.

Sahaja Yogis: Three hundred million.

Shri Mataji: Three hundred million. All false. All, I tell you, all falsehood. But, I tell you, these media people don't understand what they are up to. One has to write something to them that this all is false. Very disastrous! Horrible!

Sahaja Yogi: Media is skeptical of it... enlightenment, world peace. They had to have metal detector when they went to their head quarter. *[UNCLEAR]*.

Shri Mataji: We have our own detector.

Sahaja Yogi: Yes.

Shri Mataji: Isn't it? With our detector we found that you are devils.

So, once we have this then it all came so fast. Isn't it? Doesn't matter.

So, you arrange the first floor and the second floor for all the people who want to come. You keep the first floor for the ladies and the second for the men. All right? Not the other way round. Because there would be many who would be married with children. But most of them will be in Brighton, directly going to that. But Jason, have you been able to receive their information about when they are coming, how they are going, what place they want, how they want to be allotted? Jason: Some of them, Mother, yes. We have the French people, most of them arriving on Saturday while some going directly to the place on Friday. The Swiss people are arriving about 3 o'clock Friday afternoon. I think also, the Italians are coming about that time. Phil Ward is in charge of organizing shuttle and cars to bring them from the station to the seminar. The Swiss people and probably the Italians also would like to stay here Sunday night because their flight goes on Monday.

Shri Mataji: Oh, that's *[UNCLEAR]*. Also, you will be surprised that this is on your way to Brighton.

So, even if they are coming earlier you can give this address to them so that they can come here first. And, from here you can take some sort of a bus or something to take all of them together.

Jason: Yes, Mother. There's a green bus that goes from Heathrow Airport to Gatwick Airport that goes almost right pass the door... *[UNCLEAR]*.

Shri Mataji: But why not make one place for them to meet first of all? Some of them are coming from the back doors also or what? Are they coming from the Brighton side? Jason: Yes, Mother.

Some of them. *[UNCLEAR]*.

Shri Mataji: But if they are coming on a Sunday here or something, why not they come here? Jason: That will be after the Pūjā. *[UNCLEAR]*.

Shri Mataji: So how many will be here actually? Jason: On Sunday night, probably about fifty or so.

Shri Mataji: Fifty here? Jason: Just for the Sunday night but maybe there will be others... *[UNCLEAR]*.

Shri Mataji: All right.

So, for Friday how many will be here? Jason: Not sure... *[UNCLEAR]*.

Shri Mataji: [greets someone on the side].

Sahaja Yogi: Three Italians are coming on Thursday night.

Shri Mataji: Thursday night?

Sahaja Yogi: And Friday morning seven o'clock is arriving a group with...

Shri Mataji: Friday morning?

Sahaja Yogi: Friday morning. And they want to stay in the Ashram. I'll bring them here.

Shri Mataji: All right.

So, keep it Thursday. Say so from... it's going to be on. But I mean gas has to be there. As soon as gas is there I

can shift here. No problem. But gas has to be here. I'll bring the servants also with Me.

But after the Pūjā, after the thing Sunday we should find out exactly how many people are coming here, because Sunday night food can be cooked here for them. Isn't it? And, they go on Monday morning?

Sahaja Yogi: Yes, Mother.

Shri Mataji: That's it.

So, we can arrange that also. It could be arranged very clearly.

Nick, you have got this van till tomorrow? Nick: Yes, Mother. I should be able to extend it. *[UNCLEAR]*.

Shri Mataji: All right.

So tomorrow, why don't you send the van to Me? Nick: Yes, Mother.

Shri Mataji: All right. Then, we'll extend it. I'll pay for the extension.

Nick: There's no need for that, Mother.

Shri Mataji: No, no, no. One day, I'll pay for it. All right? So, you send the van tomorrow to Me and then extend it. Hmm? Yes, tomorrow if you send Me the van, I can send Debbie and if the gas is fixed, they can start cooking here. Even for... I mean you can cook for few people on that but ten people I don't know.

Sahaja Yogini: *[UNCLEAR]*.

Shri Mataji: Best is to have the gas, you see.

He has given birth. Hello! He has given birth. I mean not he. [Laughter.] His wife has given birth to a baby boy and you know they had very bad time with the twins that they had. It's horrible. Tenants had an effect on the baby

and the thing was delayed by about one week but the baby is very healthy, nine pound something and I have given him the name Janak, Janaka. I hope you are happy with the name.

He's a very sweet baby. All right.

Now, those who are coming from outside like... are you come from Northampton, Southampton? Who else? All of you. Where are you staying now? Where are you staying tonight? You'll go back? You won't come here? I mean, you are not going to stay till Guru Pūjā? You want to stay here?

Sahaja Yogi: *[UNCLEAR]*.

Shri Mataji: All right. All right, you'll go back to Southampton and then you will come.

So, how are you? How is your wife? Same? So, she is here or in Spain?

Sahaja Yogi: *[UNCLEAR]*.

Shri Mataji: She is in Cambridge. How is the baby? He'll come round.

Bohdan, how are you? How is your wife? So, for you four-five people who are staying here after getting the gas, you see, after getting the gas, again I say, you come and see Me tomorrow.

Someone having any problem over here you better stay with Me for the time being till we get gas. What about his food? Let him in Chelsham Road, I think till then.

If we get the gas tomorrow then there's no problem, you see. Then we will call you from Chelsham Road.

All right? Let him be there at Chelsham Road. Who's at Chelsham Road now? All right, *[UNCLEAR* Graham/] you are organizing there.

So, look after him. And, if we get the gas tomorrow then he can shift here. All right? How are you? All right? You wrote a very nice letter to that man, that newspaper fellow. Horrible.

Just imagine I never even asked anybody to take out the coat or anything. In general way I said you take out your coats. They have objection even for that. Can you meditate with your raincoat on you? Absurd, I tell you! How can these newspaper people be so stupid to write all that? I can't understand.

Yogini; Mother, sorry to interrupt You. There's been a very funny new development, because this horrible man's name has appeared in the newspaper again. In Brighton, this horrible nudist beach which makes us so sick, we heard some very good news. By Your Grace, they want to take away the nudist beach.

Shri Mataji: Nudist?

Sahaja Yogini: The horrible naked beach they want to take away. But, the man who would not take off his shoes before You, has written to the newspaper saying “Nudist beach is very good, everyone should take out all their clothes."

Shri Mataji: Except for the raincoat! Look at this stupidity! [Laughter.] Now, what do you say to these real stupid people, you know. Why not write a strong letter to editor of this?

Sahaja Yogi: *[UNCLEAR]*.

Shri Mataji: Why do they give him so much importance? Who is he? He is the Managing Director of what company? Better...

Sahaja Yogi: *[UNCLEAR]*.

Shri Mataji: Better write to them. All of you should do it. Stupid fellow! Stupid people live here, I tell you. What were you saying? John was telling Me something about you.

Yes, you communicated something to John? John, didn't you say?

Sahaja Yogi: *[UNCLEAR]*.

Shri Mataji: Paste?

Sahaja Yogi: *[UNCLEAR]*.

Shri Mataji: That is sandalwood paste to be made with a stone, that one. John, you know what he told Me he wants to know the name of the stone that is to sit on his head. [Laughter.] I said, “Stone!" I mean I'm quite strange but not to that extent. [Laughter.] I couldn't understand. I'm sorry for that. All right, this is the stone I was saying or any stone like this, anyone which you can rub. This is the thing, chandan, you can put it. [Aside.] All right.

So, with just this thing I said, that on the stone is I'm rubbing it. Show him that, Gavin.

Because of the heat, you see. Chandan is the best for heat. If you get blisters due to heat or anything, just rub this and put it on the thing, very good. Have you heard of any famous astrologer called M. K.

Gandhi, anyone of you?

Sahaja Yogi: Yes.

Shri Mataji: Have you? I've never heard.

Sahaja Yogi: I'm sure I've seen his advertisements.

Shri Mataji: He's telling others good things about Me.

That's Athena. Athena, now, what's happening? Now, slowly. What happened? One chana. I only had three of them just now. All right, how many do you want? As soon as I eat the chana, the Ganas are standing there. [Laughter.] The Ganas are waiting to have some. That's their share. All right.

Now, we will have the Pūjā and then we will have more chana. All right, sit down. It's all right.

Sahaja Yogi: *[UNCLEAR]*.

Shri Mataji: Have you read the letter of Patrick? What can I say? Very uncertain. Only good news is that one Mister Marwah who was going to do all our publicity work has been elected as the Mayor, Mayor of Los Angeles. That's a very big news and this may do something good, I think.

So, first I'm going to do all this in Los Angeles. Actually, I'll go to New York only to meet the Sahaja Yogis there. And, then I will... as the program is... you know the program, everything... I'm happy you could come because they are really worried about American tour. How they will take it, whether it will be successful or not? It will be! Let's look at these nice Yogis people... just look at them. Not worse person has seen them levited.

But they are telling all lies, you see. “There is very much better coordination of the body and the mind." Can you believe such a false story? So, I told him that you should meet this Doctor Fredick or what was his name? Fredick? Ah, Frenny.

You go and see him. Show him this article. You should say that we all want to protest. He himself will be very happy. That this is how he is going to cheat us, he is fraudulent. And, why not we all put together? Write a letter to the editor that, `You have no business to publicize such a person who has ruined the lives of so many.' Have you got that article of Madhu Dave... Madhu Jain?

Sahaja Yogi: *[UNCLEAR]*.

Shri Mataji: Activities in India... six thousand crores, ah? And, what David Praul told Me is this that so much has been written against him but there is no mention of it.

So, you take David Praul, you and Frenny and all these people put together. Make a very strong letter about it and let Doctor Frenny put it in. And say, there are people here who can really... thousands of people who can say what I'm saying. Get hold of him.

The doctor friend of Rustom, did you contact him? John, did you give him the address of the doctor? Did you tell them about it? I think Pamela was there. Pamela? Pamela: *[UNCLEAR]*.

Shri Mataji: What about that doctor? Did you tell him that he should come for the Pūjā? Then what did he say? Pamela: *[UNCLEAR]*.

Shri Mataji: What did he say? Pamela: *[UNCLEAR]*.

Shri Mataji: Hmm... See, all such like that Di, Lady Di or whoever she is... how is she now?

Sahaja Yogi: *[UNCLEAR]*.

Shri Mataji: So, why not take her help also in writing. Now, you see, Warren is coming, all these people are

coming, you can all put facts together. See this Doctor Frenny, all of you. And, tell him what he's doing and what sort of trouble he has given to others and how he has taken the money. You go and tell him very strongly. You, especially, we have to save others now. It's very important. Another thing he says that Atlanta someplace somewhere has all people have become very peaceful. Naturally, if you make somebody into a cabbage they will be. But the majority of the people, I mean the greater percentage of the people who are in Ireland and who are in Israel have become much more violent. One percent in Ireland and three percent in Israel. And, you see, how they are behaving.

So, this Atlanta we cannot find out but what about these two places? This Madhu... if you get his thing you can write down. He says that wherever his ashrams are nothing grows. Even the cows become barren. Or you can ask Murray how it was published. It was sent to us, I think.

Sahaja Yogi: Murray has that?

Shri Mataji: Murray has that so ask Murray to help you there. All right? Now, one thing you can catch on him which you can play about to say that he is anti-Christ. Whatever he preaches is anti-Christ.

Because he leads a life of licentiousness himself and you can give the example of Linda's things that was written. She has written it down. Then he himself is making money out of us and has got all the material things of the world at the cost of his disciples. He is an anti-Christ and there is no relationship of his work with Christ, first of all. And, secondly you can also put Karpur Gaurav and all

that are actually the worship of I think Shiva or something.

[Shri Mataji asks someone in Hindi is the Karpur Gaurav mantra is for Shivjī or not.] It is the Shiva's worship.

So, what they tell them is the idol worship of Shiva, put it down. But because they don't know any Sanskrit they go on saying. All right? Modi will be coming, he will give you the complete shloka. It's Shiva's worship.

So, that will go in the Christian mind here.

Then, another good news is: Rustom has said that in the Koran there is a description of Kuṇḍalinī.

They call it “Assas" and that at the resurrection time, the Kuṇḍalinī will be awakened by Mahdi. It's all there.

So many things in the Koran, he was saying that there are seven heavens, firmaments, through which human beings has to pass, one has to ascend through this.

But I was reading a book given to Me by one of the Sahaja Yogis in Brighton. It's very clearly said in that there are angels of the Mother and angels of the heavens and then seven of them and seven of these and everything. And, according to My calculation it is describing Monday as the sabbath, Monday.

Because as you go you see, the Creator is on the third day or second day. It should be on the third day.

It's the second day. First is the angel of the joy. And, that is Shiva.

So, it is Monday. Like that. Very clearly. And it is all written down, it's preserved and they have just taken it out and translated. Can you imagine? We have got now the scriptures to go with. Those books are with Me, two

of them. Can you get those books for Me, from some shop? Who gave Me that book? You gave Me, yes!

Sahaja Yogi: *[UNCLEAR]*.

Shri Mataji: Only through your University?

Sahaja Yogi: *[UNCLEAR]*.

Shri Mataji: You can? So, can you, two-three people buy that and go through it. And, you'll be amazed. I mean, that's the real Bible, you can say, about Christ. Even the Bible, which is written now about the ten commandments, everything this is related. Because that's the original one they found Out.

Can you imagine? And, these laws that were written in Bible at the time of Moses, which are called Shariat in the Islamic religion, are because the people had become so bad, so bad that they had to put such terrible, strict laws that anybody does that must be cut, his throat must be cut, his hands must be cut, legs must be cut. All this is only because of these things happening in those days. The people were so bad, so much on the decline that they had to change all that and they started this. This is very clearly written there. Better get those two books and prepare it in that line. It will be good idea.

All right. You want to wash My feet? This water, you can wash My feet. You go around and put everywhere here. Shining these days a bit too much. You see, when we went to Malmo, I said seven mantras for the sun and the sun came out. And since that day it's beautiful. All right.

Can you wash My feet?

Contents: 1983-07-22 **Cement and Moving Furniture Miracles, Brompton Square, London, UK**

[Same weekend, likely day, in which the miracle with endless cement happened; see 1983-07--23 and 1985-05--28,-29,-30.] [Some people were supposed to come and visit the Brompton Square House. Men were moving furniture.

Shri Mataji asked some three strong young Italians including Duilio to move Her solid wood bed and they were trying to push it but could not move it even a centimetre. They were at the foot of the bed on they knees and they pushed and pushed, but the bed didn't move. Shri Mataji approached the bed and just pushed it with Her knee and the bed moved.] [At that moment Duilio turned his head and saw Shri Mataji touching with Her knee the foot of the bed. The bed flew against the wall in the right position and the three Sahaja Yogis fell on the ground.] The Three Sahaja Yogis: Ah [in big shock and surprise].

Shri Mataji [laughed]: Well, after all, I am Ādi Shakti, so it's normal that I can push this bed! [On that same day, there was a big wardrobe for clothes. The men needed to move this cupboard and no one could move it. But when Shri Mataji just touched it with Her finger, it just moved easily. See also ***1985-05-28*** or 29 or 30.]

Contents: **1983-07-23 Guru Pūrnimā, Ṛitambhara Pragñyā, Part I, Seminar, Lodge Hill, UK**

[I will tell you a few things about meditation.] It is My immense joy to see all of you here from various parts of this world.

When your heart is so full, the words are too poor to carry the intensity. I wish you could understand that intensity through your heart.

It's all been arranged, I think, by the Divine, that we should meet here all of us in such a wonderful surrounding, in the Nature. That something great should happen to all of us. That we should achieve really something great this time. Now as the time is short, I will tell you first of all a few things about meditation now, then we'll have two more talks, I hope so.

Meditation is a very general word. It is not a word that explains all the three steps one has to take for meditating. But in Sanskrit language they have very clearly said, how you have to move in your meditation.

First is called as Dhyāna and second is called as Dhārana and the third is called as Samādhi.

Luckily Sahaja Yoga is a, such a thing that you get everything in a bundle. You avoided everything else and you got the Samādhi part. That's the beauty of it.

Firstly the Dhyāna. First when you have seeking, you put your attention towards the object of your worship. That's called as Dhyāna.

And the Dhārana is the one in which you put all your effort, concentrate all your effort. But this is all drama for people who are not realised.

For them it's just a sort of an acting that they do. But for a realised Soul it is a reality.

So the first, the Dhyāna, you have to do.

Some do it of the Form, another of the Formless. But you are so fortunate that the Formless has become a form for

you. No problem, you don't have to go from form to formless and from formless to form, it's all there, in a bundle.

So you concentrate, or think, of some Deity or some point for Nirākār, for the Formless, or of Nirākār itself.

It's also mental projection as long as you are not a realised Soul.

But once you are realised, you have to just think of Dhyāna, whom you are going to concentrate, or you can say, on meditate. But once you start meditating on a person your attention starts moving.

That is also possible after Realisation, though it's in a bundle, but some people have it part of it, part of it, like that.

So when you meditate, still your attention can get disturbed every moment. It can happen, depending on the intensity of your concentration.

So there are some Sahaja Yogis I've seen, they are cooking and there's another one who is meditating.

The meditating one will say, `Oh I can smell it is burning', so there is no Dhāranā. Dhār means a flow, a continuous flow.

So there is no Dhāranā. Dhyāna is there, but not Dhāranā. The second part of it is very important, that you have to put your attention continuously on to your Deity.

Then you develop a state, which is called as Dhāranā, in which your attention becomes one with the Deity. But when these mature, the third stage of Samādhi comes in.

Now for people who think that without Realisation they can do it, I think they are absolutely mistaken.

But after Realisation also, when the Dhāranā is established, you have to get to the position where you become Samādhi.

Now, what is that state? When that state comes into your mind, then whatever you do, the Deity that you worship, you see that Deity in your work. Whatever you see, you see the Deity giving you the show, we can put it like that. Whatever you hear, you find the Deity telling you the Truth. Whatever you read, you find there what the Deity would tell you.

So in that state, whatever you do with your eyes, nose and all these organs, all that becomes a kind of a manifestation of the Deity whom you worship, automatically. You don't have to think, `Now I must concentrate, all right. I will not have these thoughts, I have to now think about this.' It becomes automatically that. You read a book, in that book immediately you find what is good for Sahaja Yoga. If there's a book, which is anti-God, you discard it. Just call *[UNCLEAR* marina] there. But if you have a problem, you see that, `It must be for some lesson to me; that it is to teach me some experience.' It is the manifestation of the Deity itself. For example a lady feels she is going to have an abortion, take a position.

So one person who is not yet in Samādhi Avasta, or condition, will say, “Oh God, I'm such a Sahaja Yogi, I've done so much for Mother. I went all the way to Pulborough thing and despite that, see, this is the problem." But another would say that, “All right let me try. I'll go and tell Mother." On the photograph, or may be

telephone, something. And he'll find to his surprise, that it's all done, it's perfectly all right.

This is only possible if you are a realised Soul, otherwise not possible.

So the state that is awakened within you is called, is a new state of mind, in Sanskrit language it has a very beautiful name is Ṛitambhara Pragñyā. Which is a very difficult thing. Ṛitambhara Pragñyā.

Ṛitambhara means the whole, Dhār means a flow, a continuous flow is the name of the Nature. And that the whole Nature one feels, is enlightened.

I'll give an example, when a child is to be born, the mother start lactating, automatically. The Nature itself works out for the birth of the child.

In the same way, when this Ṛitambhara Pragñyā start expressing itself, only for Sahaja Yogis, nobody else, you are amazed how things work out suddenly. Ṛitambhara Pragñyā it works out.

Now the time is very short, but I'll give you an example. I came to Brighton and Jason said, “Mother let's have Guru Pūjā in Brighton." I said, “All right, have it. But you find out the place." So he went to the university, said, “The university people will help, but it's rather small and..." I said, “But ask them." But, “No, it's booked on Guru Pūjā." Then I said, “Then what can you do?" He said, “What to do Mother?" I said, “You try somewhere else just now, telephone to somebody else." So went through yellow pages, I don't know what and he telephoned and they said, “We have a place, a beautiful place and You come along [laughs] and have lunch with us." Just he came there, went there. He had a very nice lunch, they were

very happy. They were to accommodate everyone, they were very nice and he was amazed how everything has worked out so well.

So the Ṛitambhara Pragñyā has started working in your favour. You all tell Me, “This is a miracle, that has happened Mother and we don't know how it has happened." I'll give you an example, yesterday [***1983-07-22***] you we were doing something with cement and the Italian boy said that we'll need two bags of cement. I said, “You carry on, it won't finish." Even before I was leaving, they were carrying on, still not finished. Now cement of all the things, imagine! So this special thing is your own state, where you are feeling the oneness with the Nature and the Nature is feeling oneness with you.

So the Divine itself is expressing through Nature, through various happenings, through various incidents, the Love, the protection, the attention that the Divine is giving.

And there's no end to it. It just happens and people don't know how it happens. But that is what is the state of Samādhi.

But there could be people if I tell them, “Will you do this?" “Oh no Mother, the shop will be closed." Or, “They won't do it, that's not all right." They go on like that. And there are people who say, “No! Let's see. If Mother has said, maybe." I'll give you another simple example, very simple, absolutely gross, but it's there. One day Mister Srivastava, he takes one type of tea, very English! And he wouldn't like other tea, you see, so he told Me, “Oh God, we are finished with the tea and what to do tomorrow morning?" I said, “It's all right, let us go to the tea shop." So he said, “It is eight o'clock in the night and

what do you mean? They'll all laugh at us. There is no shop at eight o'clock open." That tea center. I said, “Let's go, what's the harm, I'm just saying let's go” but he said “What absurd things you are saying!" I said, “All right, absurd whatever it is, let's go." So I, he wouldn't listen so I told the driver “Alright, let's drive down." We went there and the lights were on. We said, “Ay! How is it the lights are on?" So we walked in, you see, very peevishly and they all were there standing, “Oh we've been waiting for you such a long time, you know and you are the last to come, just imagine!" So I asked My husband. He said, “I forgot we had a reception here." [Laughs.] And they said, “You are the last to arrive." And they said, `All right, doesn't matter but you'll have your presents." So they gave us two tins each of tea.

I mean, there are thousand and one examples like that. Today like some were trying to push the bed.

The three of them were trying, it would not push. I said, “All right, I'll push." I just put My Nābhī there, just, I didn't push anything, it just pushed, because of the Ṛitambhara Pragñyā. But this is not *[UNCLEAR* chamatkar] or anything. It exists in the Divine the capacity to manifest It's love, to show that you are the saints, you are the chosen ones of God. But you accept that situation first. But if you behave like all other normal people, “Oh God, shops are closed and that man is so difficult and I don't think it will happen", never happen.

But you must know you are saints, chosen and given birth by Me, The Form and the Formless.

So this Pragñyā is going to manifest, is manifesting every moment. Be prepared. Be happy. Welcome it and accept that you are there. The level is different.

Time?

Sahaja Yogi: Five minutes left.

Shri Mataji: Ah? Five minutes more. I shouldn't do anything that side [laughs]. All right.

Now the time has come for Sahaja Yoga to change it's level. We have to change. We have to go higher.

The level has to come up. But Sahaja Yoga is such a cosmopolitan thing that we have got the worst bhoots to the highest, on the same plate.

Now, some of them are round ones, which are the ego-oriented ones, who roll all the time. We don't know how to raise the plate, you see. If you raise the plate they'll roll down.

So you are frightened you have to hold them.

And there are some who are squares. And the square ones are carrying other squares on their heads, like bhoots.

So if you raise them they may all topple down, or maybe the bhoots might fall off, God knows.

But there are third type who are prisms, more like pyramids, who are nicely settled down, whatever level you raise them, they are stuck there.

So those who are at the periphery are a problem, definitely, for Me. Because in My compassion I cannot throw them out. And we have to help them to come out, by really now, telling them, that they have to rise. How long are we to wait for them? Everyone has to see that

the peripheral people are brought in properly so that they don't go out of Sahaja Yoga. Compassion is all right but not at the cost of keeping the level of Sahaja Yoga lower, never! We have to raise the level of people who are well settled in Sahaja Yoga.

So everybody must try to settle down and come up to minimum standards at least. Otherwise, I'm sorry many will be sieved out.

That's for the five minutes! I'll have another, I think, one hour or so, one and a half hour later on today.

Thank you very much.

Sahaja Yogis: Thank you, Mother!

Shri Mataji: I would say that somebody should translate it if possible. Is it possible to translate?

Sahaja Yogi: We'll translate it afterwards, Mother.

Shri Mataji: In French after? To be told them Ṛitambhara Pragñyā and all that. Later on you can translate. I mean those who have to go for lunch now should be English then. Then he can explain it, the first part, as you please. Those who are staying here, should not. Those who are come, should. It's wrong. The guests must be looked after, I mean, the other way round. Now we have to divide in two halves, but I would say those who understand English should go because then Gregoire can speak about this and somebody can translate also in Italian.

Gregoire: Śhrī Mother, I'm sorry, but it's already divided with numbers in two lots, so I think the first number has just to go.

Shri Mataji: Is it already divided? Gregoire: Yes it's already.

Shri Mataji: Organized! Gregoire: Organized. [Laughter and applause.]

Shri Mataji: Oh, I see. I didn't know who is here unhappy. Both of you have come?

Sahaja Yogi: Mother?

Shri Mataji: Only two of you have come?

Sahaja Yogi: Three.

Shri Mataji: Who is?

Sahaja Yogi: *[UNCLEAR]*.

Shri Mataji: Who?

Sahaja Yogi: *[UNCLEAR]*.

Shri Mataji: Good, good. Easier. Good.

So how are you?

Sahaja Yogi: I'm already all right.

Shri Mataji:... support Sahaja Yoga. Like Doctor Warren has brought a very good extract, I think.

Is it an extract? Just imagine! He was a catholic Christian church fellow who could say all these things so clearly and see so clearly. And this book, you see, that a book. But now Rustom told Me that he has found out in the Koran *[UNCLEAR* Ishelif] that the Kuṇḍalinī is resides in the triangular bone is called as “Assas." And at the time of Resurrection this will be raised and people will get their Realisation. Can you imagine? The second thing he said the same thing which has written in these books that there are seven firmaments and there are seven powers. Can you imagine? All that is described in the Koran and what are these Muslims doing and what are these

Christians doing? But even those who knew, the Hindus so-called, what are they doing, stupid. Everybody seems to be stupid. You can't blame those who knew and you can't blame those did not. They are just the same. It's very clearly written all about the seven Chakras and everything since the Patanjali. But who is seeking God? Bur these discoveries are coming up and they are going to substantiate and you are going to talk to this people about the kind of things they have been doing to the essence of religion. But these are all authentic thing. People want to believe into something that has happened. That's a good thing in a way because we have some certificates.

Nobody wants to ask any questions to Me? Because one third is missing so I would like to speak about general things later on. Yes, yes.

Sahaja Yogi: *[UNCLEAR]*.

Shri Mataji: Come here, I can't hear. Yeah.

Sahaja Yogi: Some talking about the man looks like a Muslim with a beard and in Buddhism they are talking Maitreya who is a fat man. Religions are talking about the coming of their own foramina projecting. What about this? But they are all talking about your coming.

Shri Mataji: You see, matter of these scriptures are mitigated and changed also. And the Buddha is of course is a laughing Buddha. They think of laughing Buddha. Then because it was Mohammed Sahib they think of a fakir. Because your mind is like a projector. And the film is what you have seen before.

Like Mohammed Sahib.

So the mind projects it and you get Mohammed Sahib as the image.

So whatever film you are using it depends on.

But whatever has happened never happens again.

So if you have seen with the film, say, for example, if you have made a film. It's made once for all. You do not make the same film, do you? I mean you are having `Mouse Trap' for so many days here, for example. But every time you see that acting changes. And every two-three years the actors also change.

So though the essence is the same going on the same thing is now going to be repeated, Mohammed's life is not going to be repeated, nor is He going to come in the way He came as a fakir. No. That has never happened in the history, why will it happen? So every time whatever has to happen has to be new, that's the style the Nature is. It doesn't want to bore you say with the same [laughs]. And that kind of life no more needed also.

And thirdly, as the seed grows first the roots have to fight a lot to embed the seed. And then shoot has to fight a lot.

But when the tree is there then it supports others, it helps others. It becomes a strong flowering plant or a flowering tree.

So the whole thing is changed every moment, which is no more the seed. But people want to see the seed again. Why? You identified, very subtle identified.

Christians are more identified with Christ than with Mohammed Sahib. Why? When the Muslims are much more identified with Mohammed Sahib. But why? Is there

any reason? They equally intensely identified for no rhyme and reason. None of Them gave them Realisation. They told the same thing. But why this identification so much with this? Now, when you are walking, you are thirsty, you see a river, whether it is the river Ganges or Jamuna or any other river, if you are thirsty you'll drink. You won't say, `Now I won't drink because the Ganges is not here.' Now supposing I, say, in England, “I will only have the Ganges water." Will I have? But they are mad people I tell you, even in India. I was told some people brought the water of Ganges and the clay from there to clean their hands here, from India. I mean they can do it.

This is what Sahaja Yogis must understand. That drop out your identifications with the past life. If you are born a Christian, all right, so what? Now you are a Sahaja Yogi. If you are born as a Muslim so what? Now you are a Sahaja Yogi. The second part, what happens to you, I'll tell when we have the second lecture. That as a Sahaja Yogi how things drop out automatically. All right? So these people are not the ones who are really following any religion whatsoever. They are following their ego religion. That's all. There's no religion in this kind of thing.

So all these identifications just should drop out when you understand. Only there's one way of convincing them is to show that all of Them who have died, who are no more here have said that Sahaja Yoga is going to come. That's the only way you can convince these hard nuts. This is the problem.

But surprisingly Muslims never talk of Resurrection. They are not bothered about Resurrection, they are only worried about the dooms, they are like French. French

are now thinking that Doom's days going to come definitely. I mean somebody asked Me, “Are You sure it's going to come or it's postponed?" I said, “Postponed. Forever" [laughs]. Very seriously, I tell you. Very serious people, ah? Asked Me that, “What do You say if Doom's Day is coming or not?" And they were quite disappointed because they are banking upon it [laughs]. This could be with anyone, I've just say French because they were French who asked Me, but could be anyone. I mean don't be identified again.

Like I was telling today that they show advertisements sometimes so horrible that they will show as if some miracle is going to happen and suddenly lot of ice will break, this will happen, that will happen and what will come out is a lager. I mean really from sublime to ridiculous, horrible. Just can't understand that. But I really laughed you know one day. There was a gentleman sitting and said, “Why did you laugh?" I said, “What is this sublime to ridiculous?" He said, “What do you mean? I like my beer." I said, “Sorry." That's it. The identification is like that, you see. Even ridiculous things start looking so fine if you identified.

I hope all of you are Sahaja Yogis here. But they are still doubting, Tomas is sitting. They will have a bad time I must say with a very powerful session. Now don't you worry. Don't doubt yourself, it's all right.

What about other questions? That was a good one.

Don't depend on their images. That's why these days most of the Gurus are keeping diaries. It's very easy to grow that, “I can't” but for any person to grow is all right

and you feel they don't grow they can put on one. To do become *[UNCLEAR* major] with them.

Sahaja Yogini: What happens with those people who got Realisation from You at Your programs, but they don't getting to Sahaja Yoga? What happens with them?

Shri Mataji: They don't grow, they advanced.

Sahaja Yogini: What's the meaning of that...

Shri Mataji: That's very bad too. They are seed, which has been sprouted and goes to waste, is a real waste. Because, which is not sprouted, may one day sprout. It's a real waste I tell you. But mostly they come back, quite do after come back. They go, come, like that, you see. There's no understanding about the graveness of this kind of a shallow behaviour.

They don't understand. That's why they behave like this. But then they get something horrible and they come to Sahaja Yoga. They go into problems and then they come, but the progress is so little. I mean the one who must have come with them goes much higher.

So what is the program in the evening? Now are you going to do it.

Sahaja Yogi: It's written on the program, Mother.

Shri Mataji: All right, it's all organized. If Sahaja Yogis organize I have to obey. [Laughter.]

Sahaja Yogi: Afternoon it's a writers meeting with the publisher.

Shri Mataji: What the meeting?

Sahaja Yogi: Writers, they set it before Your arrival.

Shri Mataji: What was it?

Sahaja Yogi: It says, “Writers connect their meeting with publisher, they knew You to be announced." Or be the general rehearsal in lecture hall.

Shri Mataji: But who were the writers?

Sahaja Yogi: It doesn't say it. Then it's a most spontaneous and unplanned event.

Shri Mataji: Gavin, are you writing poetry? [Laughs.] Gavin: No, it's written, Mother.

Shri Mataji: Who is writing, you? Yourself.

Sahaja Yogi: This is Jason.

Shri Mataji: Ah?

Sahaja Yogi: They're just writing it up.

Shri Mataji: They said that, *[UNCLEAR* Yuhabu se pare Isata], the Moses have written and the one who knows about Moses has written is only Isa means Jesus Christ. Ah, so what is it, spontaneously?

Sahaja Yogi: Spontaneous and unplanned events and preparation for Shri Mataji's arrival [laughter].

Shri Mataji: He is playing safe. All right, then.

Sahaja Yogi: Then 4 o'clock p.m., approximately...

Shri Mataji [laughs]: Good.

Same

Sahaja Yogi:... Shri Mataji arrives. This is subject to change.

Shri Mataji: All right, then.

Sahaja Yogi: Then is nothing until 7 o'clock.

Shri Mataji: Ah, then, nothing until 7 o'clock? That's the way. Now till I tell you tarry it like that, spontaneously. I've arrived earlier.

So, what you do now, you have your lunch and rest for a while. And then after the lunch about an hour or so you come along and assemble here. And you have a thing called this `Brain Trust Business'. Where were you talk to each other, have a report, ask questions, tell people, like that. Is a very good thing, you have appointed some people for that. Go about like that till you have your tea. Then after tea I'll take over. All right? But that doesn't mean you should not attain all the rest.

You all should sit down and talk. It helps a lot. And help each other. Ask questions and things openly.

And then after that is the dinner and after dinner what time is the tea?

Sahaja Yogi: There's tea as such, Mother. They fixed time is 7o'clock for that barbecue dinner and then the dance, singing and...

Shri Mataji: All right. And the tea in what time?

Sahaja Yogi: I think we can have it about open, there's nothing written down.

Shri Mataji: 5 o'clock? 5 o'clock. See, 4:45. Finish it by five, say, ooh? And let's start it 5:30 to 6 or 7. Then we'll have a barbecue dinner and after the barbecue dinner we'll have that music program. All right? Then tomorrow you can have dhāna, meditation in the morning and about, say, you must get up early. And after that I mean you can get your tea, I don't know whenever you feel like, I mean, I don't know what's the style is. And after the dhāna is over then you can come for your breakfast or whatever it is. And then you have again a little seminar sort of a thing. This is at 12 you go forth. Yes?

Sahaja Yogi: But tomorrow there's no staff here, there's not arranged much here.

Shri Mataji: Oh, I see. Then what. There is no problem. Tomorrow is the Pūjā day, so you need not have a seminar or anything, anything like that. We can start our Pūjā say, say, should be at 10 about and have a food after Pūjā. That's how we are after that, after that, after that. All right? May God bless you.

So can I retire now in My room? Thank you very much.

Contents: 1983-07-23 **Guru Pūrnimā, Ṛitambhara Pragñyā, Part II, Assume your position, Seminar, Lodge Hill, UK**

[First, Sahaja Yogis sung the following song to Śhrī Mother]: Bhaiyakayataya prabhu zachare (4) Sarva bhi saraghi prabhu mayexari (2) Purna jaya ji vachari (2) Bhaiyakayataya prabhu zachare (2) Jagat vichere upakara sauv (2) Parina jaju jag kachari (2) Bhaiyakayataya prabhu zachare (4) Ithi nirdhana paratra jacha (2) Sarva dhanacha sachari (2) Bhaiyakayataya prabhu zachare (2) Adhi vyadhi varana varati (2) Paya asha purusha chari (2) Bhaiyakayataya prabhu zachare (4) Thank you very much.

Somebody will translate Me or...

The song is written by a relation of ours. He was a convert to Christianity, but a realised Soul and he could never cope with the system of conversion and also the way the Hindus were treated among themselves, with the caste system and all that and he has written very good, some of the very good hymns, I should say, this is one of the hymns.

The song is something I really always used to sing in My childhood very much and the theme of the song is like this: The one who has got God, or the one who has owned the God, why should he have any fear? The one who moves about, or the one who goes about... I don't know what is the English word for `extensive travelling'. The one who moves about extensively, for the sake of God and for doing good to others, but he does not belong to this world, such a person has no fear. He stands above... the language, Marathi language you see, is a very, very intense language, I should say and it touches many corners when you say one word to it. It's like this one is: “Adhi Vyadhi Varana Varati Payi Asha Puruṣha Chari." It means: “A person of this calibre is standing above." His foot is above the sickness, the mental problems and the death itself.

But when you say that such a person has the foot on top of this, means also, you see, it's meaning is, that with the effect of his foot, it can get over it. It's a double language you see. Like such a person has his foot on top of all these three things, is the sickness, the mental problems and the death. The foot is on top of that. It means that such a person is above this. Thus, if you have somebody of this calibre and the foot touches the sick, or the mentally disturbed people, or the dead, such a person can raise them higher, can take them out of it. It has a double meaning.

So the whole theme works out this way: that the person who belongs to God, who owns the God, should not have fear, should not get frustrated. I needed it very much today. Because one side of course, is the joy of seeing so

many Sahaja Yogis, real Sahaja Yogis, not artificial disciples or dramatists, but real Sahaja Yogis of very high calibre and some of the people who stand on the periphery, have been on periphery for such a long time, that's, sometimes is dangerous for Me to see they will be destroyed.

At this time, you need a song like this and in childhood whenever I felt really desperate, I used to sing this song. It's a very touching song. All right? But word by word I could not. I'm not in a, sort of a proper mood I think.

So it's touched Me very much. This is Rutumbhara Pragñyā. I wanted it very much today.

So this morning I was telling you about this new awareness, Pragñyā. `Gnya' means the knowledge and `Pra' means the awakened knowledge. Which comes out of meditation, sustenance of meditation and then the Samādhi is the effect of that. It's a kind of a fruit ripening. When this ripens, then you get the taste, the sweetness of character and then you start seeing around, how the Nature, the Divine, is sweetly playing with you.

This state must be achieved. For every Sahaja Yogi, it is important that they must achieve this state, because unless and until you have minimum achieved this stage, you'll be still in a dangerous zone, which, as I told you, upsets Me very much.

So everybody must decide to reach a state where you everyday see the blessings of God manifesting.

That means you have entered into the kingdom of God. This is the kingdom of God, in which you are looked after, protected, guided and properly taken to the place of heavenly bliss. Through material manifestation, through

mental manifestation, through financial manifestation, through relationship manifestation, through so many things and also the natural manifestation by which you see the sun, the moon, the stars, the heavens and all the five elements help you. This state, all of you must achieve, all of you.

Again the word is `all' of you should achieve. And then only the higher ascent works out.

Now, “How to achieve this state?" is a common question. Now, the first thing as I told you today, that you are extremely fortunate people, compared to all the seekers of the world, who have been, who will be and who are. Because so many things are, which were used by seekers to overcome, you don't have to overcome.

For example they used to meditate, say, on some name of God and the attention would go on, say, repeating the name of, praying to that God, or thinking about that God and all that, but the whole thing would be mechanical and always they would jump into some sort of a low type of a siddhi, so-called, means they get possessed. Those people who start taking the name, say, of Rāma, you have seen so many of them, they start jumping and they start behaving in a funny manner.

So the attention instead of being, becoming concentrated, would become extremely disturbed, very disturbed and a funny attention, wobbly-type. And when they became wobbly and a kind of a leftsidedness came into them, they would go on enjoying it, just like a drunkard enjoys. Then such people would weep, cry, enjoy their crying, trouble others by their crying and they would not have power to overcome that.

So much they would be possessed.

Then another kind who were, say, ambitious people, like we have many scientists and these kind of people, ambitious people, they would get autohypnotized. Thinking no end of themselves, behaving in the most stupid manner and also they would get possessed and you can see people like Hitler and all sorts.

So many of these people today, who are ruling the world, supposed to be in democracy or, say, communism, or anyway. Most of them are actually the despots and that's why the chaos today. And a theme like nationalistic-spirit or something like that they would develop and try to take the advantage of people's right-sidedness and involve them into wars and all sorts of destructive things.

This kind of attention is possible for people who think they are very great, say, Hindus, Christians, mostly they are warring people. Muslims... Nowadays the Muslims are all warring, imagine, among themselves, that's the best part of it. And the Christians are all warring among themselves. And the Hindus are all warring among themselves. Like there are only two nations where there is Hindu majority, so-called, is one is Nepal and one is India and all the time they are quarreling. There's not one day passes without hearing some news of some sort of a quarrel, because Hindus won't use the swords, but a very cold-blooded quarrel is on.

So this is the situation. In the name of God, again I say, because they started on a very different level and their attention goes left or right and they develop those siddhis.

So what have we to do? First of all, by God's grace, as I told you, you all are realised people so your ascent is made in the center, which is a very, very, difficult thing, absolutely difficult, no doubt. But you should learn to keep in the center. But how to keep the attention in the center is the problem for many people who are still not above themselves.

Now when you meditate, try to meditate in a sustained way, first of all sustain it. Then you find that you are getting into the state of Samādhi, means at a state where you start feeling the joy and the bliss of God's blessings and then you start saying “O God, what a blessing, what a blessing and what a blessing." Once you have reached that state then you have to realise `Who am I?' Who are you? What are you? You are the Spirit. After establishing your sustained attention on the Spirit you'll develop a state where you'll be in a complete state of witnessing with joy.

Now those, say, who are here, can judge themselves very simply in a way. Those who tried to have the best rooms, they must have booked ten days ahead of time then must have done this, that, to get a good room. Those who want to have the best food, or the best time, tried to have a position, in the mind. Face yourself honestly. Sahaja Yoga is an honest endeavour. The best privacy for themselves. You all should face yourself.

Then the husband-wife, they want the privacy to themselves. This is not the time for husband-wife to be gathered or for you to talk loudly and move about and have fun. No, this is meditative time you have come for. Is very short time according to Me, because people spend

thousands and thousands of days to establish their meditative mood. But in this speedy life you have to have intensity to establish.

So get into meditative mood.

Some people feel that they have come for a proper holiday making and there's no sea here, so how will they have a swim, sort of temperament.

Those who are not so badly off, would be asking for more comfort, “I couldn't get food, I should have this, the best to be given to my child, or to my husband, or to my wife." `My.' It doesn't matter for one day or night you sleep, boys together and ladies together. If there are children, all right, but there's no need, for husband-wife to sleep together in this time when you are meditating all in one room, at all. You have come for a very special purpose here. You have paid for it! So be meditative. What I find, everybody was talking loudly. I didn't find them in that meditative mood. Everybody was thinking they are enjoying here, very much nice, good, you see. All these ideas are old ideas.

The Silence must be established within and without. I must say, for this, of course Indians are, they know all that so I would not say Indian qualities, but Australia. Australia, I stayed there in all these Ashrams. In Sydney we had fifty to sixty people living there everyday. I never heard a voice or even the movement of the foot till I was there, when I was there. And I was not there for a day or so, I was there for about ten, fifteen days. Not even the movement and the children crying, nothing, I never heard a sound.

This was one of the ways you can control your attention, that in My presence, what do you speak? What do you say? You must know the protocol part of it. Whom are you talking? You can't make fun, you can't joke. I can joke with you. You can sometimes smile, all right, or laugh sometimes, but it has to be done with a weight, Whom are you talking to. The reason is, I'm talking to you all this, because it's only all this rapport, all this behaviour is going to help you. I'm not going to be helped. I'm not going to be saved, I'm not going to get My realisation. It is you who have to gain something out of Me.

So try to settle your attention with that.

I've seen people who stay with Me sometimes.

Sometimes I deliberately call them to see what's the problem is.

Some of them who stay with Me, I find, become subtler and subtler and subtler and deeper.

And some of them start taking advantage, taking liberties, then taking a kind of a course of life which is so mundane and so stupid that I can't understand.

So this awareness should be within your heart, that the time is very important. You have come here at a very, very important time. And that when you are with Me, is the most important time, of that important time. Historically this is the most important time and take full advantage in the real sense of the word.

Some people think if they can get some money out of Me then it's a big advantage. All right, you can take it.

Some people think if they can take some of My time, they are at a very great advantage. All right you can, have it. Or some people think if they can take advantage of Me, sort of feeling ego-pampered or something, `I m a great lord' and some sort of a thing, you know, all right. But those who are wise take the best advantage and the best advantage is the growth within.

So the first awareness has to be that you are such lucky people that before you stands someone who has the control over all the centers, over all the powers or, say, who is all-powerful. How much advantage you have taken of that is the important thing.

Now where I stay there are two places you can say, in England and in India, mostly and the contrast I feel English and Indian thing is, in India the more I have stayed, they become more protocolish because they have old traditional training. But in England I find, people start taking advantage, making fun, joking. You cannot! You see, it is different to please, but it is different to be frivolous and shallow with somebody so intense. For example if there's a tin board and you take it under the Niagara fall, what will happen to the tin board? It won't be able to bear even the slightest shower of that.

So despite Rutambhara Pragñyā, like the sun today... You must have been upset yesterday, thinking that, `Now we have come here, we have to live in the tents and the water is raining,' I know many of you must have been. But the one who has achieved that state would not be, “What is there? If I've to live doesn't matter. I'm here for a special purpose. As long as I achieve that purpose nothing matters to Me.

What discomfort, what all these things happen to me, I have to achieve that purpose." Some of you people cannot see Me so closely, some of you are still not capable, doesn't matter. “What is most important is I should achieve that state, I have come here for that. Not for fun, not for food, not for comfort. Not for anything, but for achieving a special state where I become the Guru. What is my preparation for that?" We have to be extremely careful, because the attention of the Divine is not raising you directly. It is a balance. You are all the time in a balance, remember that and you have to be extremely careful how far you go with that balance.

So now, how do you develop? [Aside:] It's all right, don't worry, about the sun, I like it. I only called him this morning.

So how do you manage this attention? Now let us see what are the states of attentions are. Either your attention would be a cunning attention. Anything you see, you see from a cunning angle. Many people develop that in an ego-oriented society. And moreover if you are sort of possessed by cunning bhoots, then God save you and save others. Like the cunning attention would be that, anything you see, you start thinking “What advantage I can take out of this. How much money I can save” you see. It's very, very quick. “It would be cheaper this way." “If I go by this way I'll save some time” you see, `save pounds', `save time', save everything and save your own Self.

So just to save you are going on. The attention becomes cunning when you try to save money. Save here. Save there. With your own calculations. But if you try to save

the money spontaneously, actually there is nothing to be tried, just it happens that you save. But the cunning attention tries all the time to be smart about things. It argues, it gives explanations, “Is it better *[UNCLEAR]*?" These days it's such a cheap, cheap, cheap, cheap, cheap thing that you go mad really. Like I had a ticket to go to America. I said, “Don't give Me an expensive ticket, first class, or... I'll go by a cheap ticket." So they gave Me a ticket, of such a kind that, I would never have come back to London at least for a year and I would have lost in that American English, I tell you, somewhere.

So it's so much *[UNCLEAR* they] had worked out, you know, this into that, into that.

That kind of a horrible attention is useless. Leave it, forget it. With that saving also I've not seen anybody becoming rich.

Like you want, I want to go and buy some paint.

So we buy some paint. Then they think, “All right, if you bring it back, then how can we return it, what should we do, this, that." Nonsense. All the time the mind is on that level.

I'll give you an example, the other day we got some paint to paint the glass. See the subtle part of it, you see, in the gross there is a subtler indication and the paint was brought. And then, it was worth nothing, eighty p [pence] or something, all right, I mean I can afford it, so that's why I bought. If you can't afford don't buy! So they said, “Now we should return" I said, “But why? Now it's come out, now go and return. You spend so much petrol going there. If you want to calculate also it's stupid and the time you'll be wasting." “No but Mother, you see,

ultimately we save two p!" I said, “All right, now I'll save a lot of money and I'll show you how." I took that paint and painted many things which looked like glass, or which was stone-like and the whole thing looked so beautiful.

So the mind that is destructive is only calculating. If you have such a mind know yourself that you have to get rid of that kind of a calculation. Cheap, cheap, cheap, cheap, cheap, cheap, things you should just give up. Keep in the center. You should not be, of course, overindulgent. But you should not be also going for, all the time, for this kind of a calculation, because you are wasting your important awakened attention which very few people have in this world. Must know that you are realised Souls, you are not ordinary mundane type of people. You are special people and you are not to waste your attention in useless calculating money, `p' and this and that. Let's go ahead. What happens, let's see. I never calculate you know that, but I live very cheaply and you can also do that.

This attention, cunning attention, is also a very fussy attention. Here it starts saving money and then, there it is in the evening it must drink.

So all the saving of p, p, p, p, goes into the gutters of drinking.

Just sin. The sum total of such a personality is what? So this mentality has to be controlled. Specially for ego-oriented people are extremely calculating, most surprising it is.

But the people like Indians who are not calculating are not so rich. They are very generous, they always have

money for Sahaja Yoga. I have had never a problem of money with them, never, because they are not so calculating. To them, to do for others, not for yourself, but for others. To spend for others. If they have to come to your house: “All right, open your heart. Now this is the time to spend." Not for drinking and self-indulgence, but for the indulgence of doing for others. That's their practice and tradition.

So in this respect, you have to take to that tradition: “Oh they have come. Let's spend now. What can we do?" This is the main thing one should understand, those who are mostly self-indulgent are extremely miserly people.

So the attention which is cunning, is the worse attention, because you see, cunningness also cheats yourself. It is cunning with you and you think, “Oh I've been smart enough, you see, I've saved two p." But you have lost your soul. You are no more a Sahaja Yogi.

I'll give you an example. I told somebody that, “Keep the van down there, go by train, this van seems to be a horrible van." And there was a lot of a, you see, explanation, with both the fingers going on like this to Me, you see and I got so fed up with the bomb shells coming on Me that I said, to go ahead.

And the thing fell and the thing got spoilt or whatever it is, is out of order now.

So they had to do what I was telling them. Without the bomb shell, if they had listened to Me it would have been all right.

So your attention should not be on saving material things and worldly things and all that, but attention itself must be saved. Ask a question, `Where is my attention?' I've

seen in the programs some people are concentratedly listening to Me, but some people cannot.

Some are concentrated for a short while and some get disinterested after some time.

Some are looking here.

Some are looking there.

So how much attention you have saved is the only concern of a Sahaja Yogi.

Forget about others, they are all garbage cleaners, you see. Forget about others who are not seeking, who are not of your quality, but you are a quality.

Now what do you have to save? For example somebody is a king. He doesn't bother of two p being saved. I don't know Baba, these days, I can't say definitely! They must be also doing that kind of a thing, you know, but what is he bothered to save his grace, to dignity.

But for a Sahaja Yogi the most important thing is, you must save your attention. It's called as Chitta Nirodha. Nirodh, is saving of your attention. `Where is it going, It's such a precious thing for me. Were is it running?' Then how do you save your attention? Is through concentration. Concentrate. Try to concentrate.

Don't allow your attention to wobble. Gradually you will develop concentration. You can watch My photograph, it's the best. Concentrate, bring it in your heart, let it be integrated in your heart.

You are lucky people, you don't have to build up a photograph and then give it up because it is just a Avalambana, means it's just a dependence and then you

remove it. It's a complete dependence for you and a load for Me, of complete joy.

So when you are concentrating in Sahaja Yoga, absolutely fully in Sahaja Yoga, then you are controlling, saving, your attention. This is one type of people.

Then the another type of an attention, what we call, are the people who are sort of take a very negative attitude. The first are the positive, so-called, so-called positive, who are saving money, saving everything that is useless. Now the second type are the archbishops of all that is disaster, misery, mishaps, this type of an attention. If you read newspaper every morning you will have an attention like that. All the newspaper people have that kind of an attention, to find where is the disaster. I mean, in a sinister way, they feel happy there's a disaster. I've seen people, “Oh Mother, I came to the seminar but the problem is, you see, there was no water." The attention is in finding disasters within and without. “What happened?", “There's a disaster” “What happened?" “I lost the pin." Absurd, to have such stupid ideas.

They will cry and weep and make everyone miserable, “Oooh, I'm so miserable." “What?", “My husband doesn't talk to me” or “My child is not with me." Such people are extremely self-indulgent as far as their relationships are concerned. They make everyone like that, “Oh, the person didn't talk to me nicely and he was this way and that way." They feel hurt at the slightest touch and by that they think they are saving their emotions if not the material things.

Such people are very frightened people to talk to anyone and anybody says nice things also, they get a fright, like

this, they'll frown. The reason is they do not know what they have to save, is not their emotions at all. There's no need to save your emotions, you are protected. What does it matter if somebody says anything to you, you are above there, nobody can touch you! You are wasting your attention all the time by trying to save your emotions. There's nothing to be frightened of anyone, because somebody is going to say something, harsh word, that's why you don't want to do something. Such compromising people, so-called, have not understood Sahaja Yoga. There is no compromise in Sahaja Yoga at all. It is just like a diamond. Diamond will remain a diamond whatever you do, it's for ever and ever, it's like that.

So one has to understand that the attention should not be allowed to drift into this kind of an indulgence which is of a drunkard, that, they are the most miserable people, the drunkards are, just imagine. They'll be always crying, weeping and people would think they are very miserable.

So what you have to save at that time is your attention from such indulgences into useless expression of your fear about your emotions.

See now, today they sang the song. The song did fill Me. Completely brought out some of the expressions which would not spontaneously come out at this time. But the greatest thing it has done is to remind Me that, “You are God. You are not to get frustrated, You have to look after all of them and You are powerful when You talk." So such people should always keep a mirror and feel elevated. You are a Sahaja Yogi and the mirror, in the reflection, you should see Me and not yourself.

Sometimes I've an eye that really frustrated with Sahaja Yogis, very much. Then I just stand before the mirror and I say, “Now, come along. You are the one who has all the powers, who has all the Chakras awakened. None of the Advents had this. You are the one who has created this world and You are the one who has to save it.

So now, get up." Not to lose courage, not to worry. Only in the emotional things I sometimes feel that now I'll have to give up some of them, completely. They are My children, as a Mother, not as a Guru. For a Guru they don't have problem. And then the stirring up comes in, within Myself that, “No, even if I have to give up, doesn't matter, I have to raise, absolutely” and with that power it works.

So the reflection should be of Me, of something that is ideal before you, the one that gives you energy, like this song and not the reflection of a miserable person. Christ who's standing before you as in the Sistine Chapel and not some miserable skeleton which is even worse than you.

So create those images of your Mother which you should see in your emotions and rise. This is the second type of attention you have to control.

The third one is a very horrid idiotic one. The idiotic one comes from the second type, where the person is emotionally indulgent. That is the `A' of the third. And the `B' of the third comes from the first type, which is stupid.

So we have two types of people, one idiotic and another are stupid. But in Indian language there's only one word, specially in Marathi, is murkha. For them both categories

are the same, as if the circle meets at the same point. I mean English language in some ways is good at least it differentiates between the murkhas, like they can be stupid or they can be idiotic, you see.

Because of psyche being so confused here, that psychologists have brought out.

Some are schizophrenic, some are idiots, some are stupid, some are donkeys.

So this, the third type is the worst, is most frustrating for Me. They'll stick onto Me like leeches, they'll be saying stupid things all the time. Just can't bear an idiot, isn't it? They can bore a person. I mean all sorts of this put together is called as murkha.

So I don't want to analyze it, it's a bit too much.

So that kind of an attention you have, then you better keep quiet. Don't talk. Just listen to others what they talk, what they say. There are some people who will just go on talking, talking, talking, irrelevantly, uselessly, wasting their energy and such people are always friends of the cunning. The cunning and such people go hand in hand, because the cunning wants to befool someone and the fool wants to be befooled.

Like a king will have a jester, it's like that you see, these combinations work out.

So for such people the best thing is to keep quiet. Preserve all their attention, all their energies just for cleansing.

All this idiocity will pass away very soon if you try to preserve yourself. Don't talk, don't say things which are

stupid, which are idiotic, just keep quiet and watch others.

Sometimes such people can become very great vehicle of God's power, but if they do not take to stupidity and idiocity.

This is the type of people, three types I would say, but the fourth type are the people who lead a life of concentration. I mean a person who is working very hard, say, in the office, is a very remarkably successful person and this and that and that and that and that, is also very concentrated.

Somebody who works very well, anywhere, with a concentrated mind, is concentrated. A housewife who looks after her husband and children is very concentrated and a husband who looks after his family and his things in a very concentrated way. They know how to paint well, they know how to do things and their hands are deft and they know everything. But such people can have a very immobile attention, very immobile, like plastic, or you can call it, like rubber. At the most, to improve on it, we can say, like some of the things I have seen which you use for damp-proofing, you see, you just apply it, after some time it's just parched, into it. They just can't get out of it, they just can't. They can't enjoy anything. Unless and until you show them a file you can't talk to them. You see, if you have to talk to such a person, better take a file before you and before starting you put the file before you. If it is on the file only, they will see, but if you talk, they say, “Make a file." Very parched and they cannot enjoy life. There's no mobility, they cannot

be creative. They can be creative only as far as their style is concerned, but not the creative of the joy.

So that kind of concentration is there, concentrated effort people put in. Like there are people who are fanatics. They are very concentrated in their effort, extremely. That's how all these religions have spread, like Christianity, Islam, Hinduism and all that, because they had a concentrated effort of fanaticism, concentrated effort. If you read the letters of Paul in the Bible, you will see the concentration of it: “You go there and you go there and establish a church and do this" and “What you have done?" Very organized, very systematic, absolutely moving like a belt on a machine. And they all the time have that after effects of that movement. Charlie Chaplin has shown [this] in his picture `Modern Times'. I used to enjoy that very much, that he used to tie up a belt, you see, standing for about an hour and then after some time when he was released of the job, he used to go on like that.

That kind of an attention, that is concentrated, means stuck onto something. It's not that, it's not penetrating. Because if your attention doesn't become, by concentration, subtler and subtler, then it is not that but it is getting stuck and the stuck attention is of no use for Sahaja Yoga. Such people, I do not know, will never be saved perhaps.

So-called successful. They'll go with all their badges, everything and God will say, “Go back gentlemen, you are not yet been passed through the customs." There is another organization, which works much faster, much smarter way and a very specially efficient thing.

So these people will be just `stuck' people.

Now there are fourth type of people which are concentrated. They are intense, deep. They penetrate because they are living minds. Theirs are not dead, parched minds, they have living mind, they penetrate.

I watch sometimes, I ask some people what do you think of a particular person? Immediately I know, what they talk. If they just talk in a mundane way, “He is a fine person, he is a bad person, this thing, that thing” then I know what it is. Very superficial, shallow. But a person who sees the possibilities and the potentialities of it's awakening and the problems a person is facing, then I know that he is the one who has that concentration into the subject.

And the subject of Sahaja Yoga requires the maximum, maximum, penetration, because Sahaja Yoga, if you have understood, I don't know if you have understood or you are aware of it or not, but is learned through experience and through nothing else.

You have to experience and then believe into it. It is not that what I told you is a conditioning on your mind, nothing, you experience it yourself and learn. But those who have that penetrating intelligence, who have that penetrating love, emotions and those [who] have that penetrating movement of their understanding, they are the ones who experience, learn, experience, learn, experience, learn.

They do not allow their mind to play on them, “No, no, no. This mind of mine has got experiences of the past and is based on that. No, I have to take everyday a new experience and that experience must be silenced within

me, must be sustained within me, must be conditioned within me." Sahaja Yoga experiences are the good conditionings, “How can it be? I've seen it, I have faced it, I've had it. How can it be?" But for that also, to have the best experiences, first condition is of Rutambhara Pragñyā, where you should be of that level that you really get those experiences, otherwise you'll be just a mundane type of a person all the time and you may live with Me, but you will not have those experiences, you'll not have that blissful feeling, nothing, that joy.

So this penetration starts by your meditation and sustenance of the meditation and the Samādhi seed sprouting, manifesting the new dimension within. This sort of an attention, one has to develop, by watching the attention, Chitta Nirodha. As you watch your money, as you watch your road when you drive, as you watch your child when it is growing, as you watch the beauty of your wife, or the care of your husband. All put together, you watch yourself, your attention, where is it going? Where is it lagging behind? “What is happening to my attention?" Such people have no problems. You'll be surprised, that such people when they want to do something it becomes dynamic. They can work it out. Nobody has any problem and if there is a problem, which you are facing all the time, in you then know there is something wrong with you.

Something is wrong with the instrument. If you don't have a tin cutter and you start using a knife to cut a tin [it] doesn't work out. Then you'll say, “The tin is, something wrong with the tin” or something wrong with

you? No, it's wrong with the instrument and that instrument has to be corrected.

When the instrument is all right, after all, with all the powers you have, with all the blessings you have and the source of power behind it, everything should work out. It should work out. You have had experiences of things working out. You have had experiences of many of miracles happening before your eyes, but still the attention has not settled down with those experiences. Still `gatanubhavas', means the old experiences, continue. Old identifications continue. You still continue with that and the filth of that is still on your being. Change everything. Become a fresh new person. You are blooming out as a flower and then as a tree and assume your position.

Assume your position as the Sahaj Yogi.

So this attention must be brought round. You judge yourself, where is your attention and what is the point of understanding? What is the measure of understanding? It's very simple, I have to be pleased, because I'm the attention.

If I am pleased then you have done the job. But I cannot be pleased by mundane things, by any arguments with that, but only by your ascent.

So you judge yourself on that.

Whether you give Me a flower, or anything I'm only pleased when the essence of that doing has that height, has that special manifestation. You say, “I love you very much Mother." All right, you say, but I must see that love that you are saying, or doing, has that essence that gives Me joy.

It's such a mutual thing between us, you can't imagine. I can't live without you and you can't live without Me. It's so mutual. But from one side it is absolutely hundred per cent benevolent. Whether I get angry with you, whether I scold you, whether I pamper you, whether I say, “Don't do that." If I tell you, “Don't come very close to Me. Keep away” anything that I do like that, is benevolent to you. And to Me the benevolence is only one, that you should be emancipated, that you should gain something out of Me, that you should prosper out of Me.

Like the Mother Earth feels so elated to see Her manifestation into these beautiful green trees, it's like that. She's nothing. We stand on Her, we walk on Her. Where do we see Her? But She sees Her, in those.

It's a same sort of a situation. She is the one who changes all the seasons.

`Rutambhara' means the one, the attention, which changes the seasons. `Rutu' means the seasons.

So all the seasons are created by Her just to please us. But what do we do, to please Her? We exhaust Her, torture Her, take out everything from Her, pollute it, do all kinds of nonsensical things and then She gets angry.

The same thing that She is Love. In the same love She becomes angry and then you have volcanoes and you have earthquakes and all kinds of things happening to you. But of course your Mother takes time to get angry, takes time. That doesn't mean you take time. Look after yourselves, it's very important.

Suddenly you will find elevated.

Some people will just elevate themselves and others will be completely cut out.

So be careful, I'm warning.

So today is the day, previous day to this fifteenth day. And the fourteenth day, one has to become a killer. Killer of all that is ignorance, of all that is stupid, idiotic, all that is cunning and all that is emotional. Kill that part, become a Sahaja Yogi, tomorrow, to receive the blessings.

May God bless you.

Contents: 1983-07-24 **Guru Pūjā, Awakening the Principle of Guru, Lodge Hill, UK**

Today, you all have gathered here to do the Guru Pūjā.

Your Guru is a mother first and then a Guru. And that has given Me a greater help.

We have had before also many Guru Pūjās, mostly in England and you should wonder why Mother always somehow is doing Guru Pūjā in London.

The time falls in such a way that it is in Guru Pūjā. I am here during that time; I have to be in London.

So many years you have been doing Guru Pūjā in England. All things happen, if according to Ṛitambhara Pragñyā, then there must be some reason why Mother is here in England for a Guru Pūjā.

It is stated in the Purānas that the Ādi Guru Dattātreya worshipped Mother along the banks of the river Tamasa. Tamasa is the same as your Thames is and He Himself came and worshipped here. And the Druids, those who had the manifestation of the Stonehenge and all that, are

originated from that time, in this great country of Shiva, or the Spirit.

So the Spirit resides here, as in the heart of human beings and the Sahasrāra is in the Himālayas, where Sadāśhiva exists, at the Kailāśha. This is the great secret of we having so many Guru Pūjās here.

To culminate it today and do this special type of Guru Pūjā in the year of the Sixtieth Birthday of your Mother, is, has a special, very, very special significance because is the Guru Sashti, is the sixty years of your Guru has been celebrated today and that's how it's a very big occasion, that you all have gathered under the influence of again Ṛitambhara Pragñyā.

So all that has happened, has happened by the nature's own gift to you and everything has worked out so well because that was the desire of the Divine and the design of the Divine.

So the River Thames, which we call her as Thames, is the English have a method of making everything English. Like Bombay [Mumbai], they made it, Mumbai was Bombay, you see. Like Calcutta [Kolkata], like all other words was like that. Like Varanasi was made into Benares, River Thames, which was really Tamsa, was called as Thames.

Now from the name Tamsa, one should know that is a place of Tamo Guṇa, is a place where left-sided resided, since long.

So people were very worshipful, left-sided people, emotional type and they worshipped God more than that they went into Yagñyas and all that. And Dattātreya lived here and meditated on the banks of River Thames, that's

why Guru Pūjā here has to give us the great background for your awakening of the Guru principle.

We have to go to the roots of everything so that we understand the importance of it. Unless and until you know the roots and the traditions behind, you cannot understand the depth, the gravity, the intensity of any Pūjā.

Today we have gathered here to do the Guru Pūjā again. The reason is, we have got a Guru principle within ourselves, as I told you last time and also I have given elaborately the Ten Commandments as expressed within us, which are describing the different types of essences within us. The essence of Guru Pūjā has to be awakened within us, that's how we are having this program here.

Now, it is important that we have to establish the Dharma within us. Without the Dharma, you cannot have the ascent. And, as I have told you before that the cleanliness of your being depends on how much Dharma you follow, religiously.

At the time of Moses, it was worked out and all the rules and regulations were created for realised Souls. But as I read in one of the books, was very good, because, if I had said this, people would not have believed, that it had to be changed.

[A child is crying loudly.] I think during the speech, the children should not be here. It's better to take them out. After the speech, you can bring them along, those who make noises. Those who are quiet, is all right, but those who are making noises, better to be out. If they are going to make noises, better to be out or near the door so that if they make noises, you can get out.

So there is no disturbance. During the Pūjā is all right, you could be at the door or some place from where you can go.

So, the laws and regulations that were given to human beings were actually for the realised Souls who would understand. But, when Moses must have discovered the way human beings are, He must have changed them to very strict rules, because, with human beings as they are, one has to be extremely strict.

They can't understand anything but fear. If you have a stick in your hand, you can put them right.

Without that stick, human beings won't listen. They are only all right if there's a fear. Now, if you see today, the condition of all the nations, those who are having leaders or prime ministers or presidents, they are all people extremely strict, very dominating and very dry. And normally, people like such people. Even Hitler succeeded because of that nature.

So the character of a Guru so far has been of a very strict nature for people who are not realised.

Normally a Guru doesn't, a good Guru, SadGuru, he doesn't like to talk to people much. They throw stones, or they don't like to talk to people who are not realised. But, if they are realised, then these Gurus change their attitude towards the people who want to see them. There's a tremendous difference between a person who's a realised and non-realised in the protocol of God. A man may be the king or anything, he'll be asked to sit outside. It has nothing to do with what position you enjoy. As long as he's a realised Soul and not possessed, he's given the highest position. But if you are possessed, then also the

Guru will tell *[UNCLEAR* you/him] that, “You get out from here, first get rid of your possession and then come." And all these strict rules were there, that such and such person must be killed, such and such person must be given a punishment of cutting the hands, cutting the feet, even, even absolutely destroying the eyes.

This was done because they were not realised Souls. It was a great realisation of Moses, I think, that He took to the another kind of law, which is known as Shariat now and that's what the Moslems are following.

In a way it's good, I think, because people who are now normal people really deserve such a rule. But it should not be so fanatical that you cannot discriminate between a realised Soul and a non-realised Soul.

Now, the Guru within you will be awakened if you are strict with yourself. That's one point is very important. Unless and until you are strict with yourself, the Guru will not be awakened with you. People who are lazy lumps, who cannot sacrifice anything, who are very fond of comfort, can never be Gurus, take it from Me. They can be good administrators, they can be anything, but never a Guru. A Guru should be willing to live the way he has to live. He should be able to sleep on stones; he should be able to sleep under any circumstances. Not that the disciples should force on him, but it should be his own nature, that he can adjust himself. Comfort cannot crawl on a Guru. Now, those who want your Guru principle to be awakened must know that you should not ask for comfort.

Even for a thing like that, yesterday, you saw the dancing. One has to do real tapasya.

Intensive tapasya you have to do. You cannot learn even a thing like dancing, without going into a penance about it.

So a Guru has to go through a penance is an important. Sahaja Yogi need not go, but a Guru Sahaj Yogi has to do it. We have to have penances and the penance can be any kind of desire you have. Say, supposing you are very fond of food. Just don't eat the food that you want to eat. If you are very fond of sweet food, then eat something very bitter, raised to power 108. And if you are fond of some sort of a very, as Indians are sometimes, very spicy food, then eat so bland a food without salt. Teach your tongue to behave itself. It doesn't behove a Guru to put his attention to food. I have seen some of the Sahaja Yogis, they are all right when the food is there, quite concentrated. But when it comes to the program, they have no concentration. It's a sad thing. Such people cannot be Gurus.

They can be cooks, good, or could be food tasters or something like that. Will suit them better. But, if they have to be Gurus, they must learn to control their tongue and their desires.

I mean, fasting is a good thing for such people. Fasting's very good. All the time, they are worried, “What are we going to have for lunch? What are we going to have for dinner?" Such people cannot have their Guru principle awakened, neither they can be Gurus.

So please be careful.

The Guru must have control over the tongue. He must know when to get angry and when to be gentle.

He must know what to say when, how much to say. That's why many Gurus have been more effective by not speaking. Silence is the best way you can help others. But, when it comes to explaining Sahaja Yoga, you should speak. But I have seen, with some people, they are very eloquent when it comes to nonsensical things. But when it comes to Sahaja Yoga, they don't know anything about Sahaja Yoga.

So you have to be the master of Sahaja Yoga if you have to be a Guru. Not only in talking, but in your behaviour, in everything and the *[UNCLEAR* Karāmat], is the, I don't know if you use charismatic word, charismatic they call it. Or you say, “The one how to do it." How to raise the Kuṇḍalinī, how to put it at the Sahasrāra, how to break the Sahasrāra, all these things, you must know how to spend your knowledge, is *[UNCLEAR* bini Yoga] in Sanskrit.

Guru Principle is awakened in a person when he himself has achieved something. Imagine a half-baked Guru, going along, talking as a Guru. He'll end up as a disciple, ultimately.

So you have to be master of your own, but when the Guru principle comes in, you have to give it to others. It's a question of giving it to others, so you have to be at a higher level to give to others. Have to be at a very higher level. If you are attached to money, if you are attached to food, if you are attached to mundane things of life, you cannot give. Now, the higher state than that can be achieved, which is natural in Me, but can be achieved. Is that you don't have to have any dependence like that. That any rules and regulations. Like saying that, “I will

have no worry about food, I should fast, this, that." It all ends up when you eat, but don't eat.

That estate one should have. That, you are eating the food and if you ask, “Did you have your lunch?" “I don't know." “Will you have your lunch?" “I don't know." Absolutely indifferent to the problems of the body. “Where did you sleep?" “I don't know." “What did you eat, what will you have?" “I don't know." This kind of a state is called the *[UNCLEAR* Atiyetastata/Atīta] state, where you go beyond. And, whatever you do, you are doing it because it is to be done, without paying any attention to it. Is automatic.

Nothing is important, but this is before becoming Atīta, you have to tell yourself, “Nothing is important." You see, is *[UNCLEAR* Aveer/a will] power, as they call it, is a kind of a drama you have to put in, “Oh, nothing is important. This carpet is not important, I should try to sleep on the cement." First you have to do that. But after some time, it happens that you don't remember whether you slept on the cement or on a cot, “Where did I sleep? I don't know." That is the Atīta state. And that state is to be achieved now, by many Sahaja Yogis. An estate where you go beyond. Say there is somebody who is before you and you have to get angry, “All right, you give me, left, right, left, right, nicely" and then, you're smiling next moment. “Did you get angry with that person?" “I don't know, did I?" Like Buddha once said something in one village and there was a horrible fellow who got up and said lots of things to Him. And, when He went to the next village, the fellow felt that, “Oh, I should not have done that." Left Viśhuddhi perhaps.

So he went down, he said, “I am sorry, Sir, I have said so and I should not have said it. I didn't know You are the Enlightened One, so it happened, so You forgive me." He said, “When? When did you say?" He said, “In the last village." “Oh, everything in the last village I have left there alone. I don't remember." That is the Atīta state you have to get.

So, even not to feel it, is not important. These identifications, when they drop out completely, then you are doing things in *[UNCLEAR* a Karma/akarma] state. Where, like sun is shining, it doesn't know it is shining. When the vibrations are flowing, you don't know it is flowing. Already it has started working in you. You are surprised, you raise the hands and the Kuṇḍalinī is rising. You don't know you are raising the Kuṇḍalinī actually. How do you raise it? You don't know, that's it. That state has already started, Atīta, in you, but get it established in every walk of life, everything, that you go beyond. And, if you can manage that, that's the highest that you have to reach.

Now, with the Incarnations, it's very different. It's the other way round. Everything is the other way round. They don't have to do any tapasya, They don't have to starve, They don't have to tell themselves.

Whatever They do is the Puṇya. They don't have to collect Puṇyas either. If They kill somebody, it is Dharma. If They hit somebody, it is the Dharma. Nothing They do wrong. They are Absolute, Immaculate. If They deceive someone, They cheat someone, it's perfectly all right. Because, for a higher goal, you have to give up the smaller goals.

It's justified in our day-to-day life, you'll see, that, when you are defending your country, there's an enemy on you, if you have to defend your country, you can slay him. You can cheat him. Diplomatically, you can befool him. Is allowed. Why? Because, for a higher goal, you have to give up the smaller one.

But, for an Incarnation, it is always the higher goal, He's not bothered about smaller goals at all. He doesn't have to wait, think, rationalise or to train Himself, or do some drama or anything, it's all done.

Even the movement, every movement, every movement of an Incarnation, has a ripple in it which is for the good. There's nothing, not even a moment is such, which is not for the good of the world.

So the Incarnation is a very different thing. That is not to be achieved, that has to be. Now, for example, the Incarnation is the *[UNCLEAR* boddha], is the Enjoyer. He's the Enjoyer of everything. Many people, say, have created, now we have a carpet here from Turkey. These carpets were created by Turkish peoples, some time back, for an Incarnation to see.

So, the Ṛitambhara Pragñyā will bring it round in such a way that at least I see it, or I have it.

So that their souls will be blessed, so that they feel nice.

Like Michelangelo has made that not for popes, I can tell you this one. And not for all the rubbish people who go there. Neither Blake did all that work for the useless people who want to go and see nude artists. It was all done for the Incarnation to see. That's the way they are blessed the most. Because they are beyond. Nothing touches them, nothing is important. But it's not rational

or anything, that they have trained themselves, but it is automatically like that.

Like Śhrī Kṛiṣhṇa had to marry sixteen thousand women. Can you imagine, in those days of monogamy, He would be prosecuted hundred times. The reason was He has sixteen thousand powers and He was to be born with those sixteen thousand powers on this earth. And five Elements became His queens. He had to do some justification to have them around, and, as I have now Sahaja Yogis whom I have, I mean, given realisation, so, automatically, I am your Mother, is established. But for Him, there was no way out but to marry His sixteen thousand powers. And so He married, but He was never married. He was a bachelor, out and out, all His life, because He's Yogeshwara and He's a Brahmachari, who can marry Him? So, for Them, all these worldly things are just a drama, has no meaning at all. It's just a drama. A person who is not an Incarnation should not try to be. That's not the right of a human being. Like a policeman standing on the road, if he puts his hands right, left, we follow it. But you ask some madman to go and stand there, he'll be arrested.

So, for normal people, even you are a Guru. You shouldn't allow them to touch your feet. Only an Incarnation's Feet must be touched. And nobody else's feet must be touched. Of course, in some *[UNCLEAR]*, like, as we have in India, the custom to touch the feet of the father; but because the father is a representative of the Father in you, that's why. Or the Mother. But that's symbolic. But, in reality, you are not to surrender yourself to anybody else but to an Incarnation.

Also, if there's a teacher in your *[UNCLEAR* room, any art] or in any way your master, you must touch his feet. Even to take his name, you have to pull your ears. But nobody who is a human being should make touch your feet, especially the Sahaja Yogis should not. Nobody should ask anyone to touch your feet. As an elder, you may, that's a different point. But not as a Guru. It's a very dangerous thing, once you start it, you know what it happens, with so many, they are just gone out of Sahaja Yoga.

So, to develop the Guru principle within you, first of all you must develop yourself, fully. Now, how to develop yourself for Guru principle, one must see. We have got the ten principles within you, as I told you before and we should develop these all ten principles in such a way that we stand out from others.

Yesterday, as I told you, that when we do *[UNCLEAR* Dyandarna Samādhi] and achieve the blessings of the Ṛitambhara Pragñyā, then put that whole thing onto different areas, as called as Desh or Bhūmi.

How you spend them is the point, is through mantras. Cleanse it through mantras. Cleanse it through your attention. Every day, you must know which Chakra to be cleared out. You must know about yourself, where is the problem, how it is to be cleansed, how we have to clear it out. Do not take it for granted.

Many people who have got, say, left-sided problem, they will just bring them lemon and chillies and think, “Mother has done the job." I can only do the job temporarily. But if there's a vacuum, again you'll suck in.

See, these vacuums within you feel hungry again to have some more.

So, to take out that vacuum is your job and, for that, you have to religiously get after all your defects.

That's the most important thing for all of you.

And try to put full attention to all these different Deshas, is the nations, they are called as. And once you have cleared it, it is enlightened, is full of light, then you call it Pradesh. Means the desha has been enlightened. Once that has achieved, then you have reached a point, you can become a Guru. But still you are not a SatGuru. To become the SatGuru, you must achieve the state of Atīta.

The Atīta state is such that a person who is not a good man will tremble before you. A man who is a liar, who has cheated others, will lose his tongue. A man who has adulterous eyes, who is a man without any control over his mind as far as the women are concerned, or men are concerned, such a person will have shaking in his eyes.

Some of them will shake. Those who have been possessed will be shaking very much. They'll be all exposed before the light of a SatGuru. When you achieve that, you don't have to fight them. They will themselves be exposed and you won't have to do anything about it. One day I was told that there's a servant, lady servant, who is a very possessed person in the family.

So I said, “Get rid of her." I went to the airport. On My way, I stopped at that house and the maidservant just walked in, you see and there was a big gutter flowing, I mean, not a gutter, but an open sort of a thing. And she saw Me and she fell in that. I said, “Oh God." So, I told the driver, “Take the car a little ahead." And she fell in. It

happens. I was travelling by plane one day and a gentleman in France started just jumping.

So a Sahaja Yogi asked, “Are you from TM?" He said, “How do you know?" They said, “We know." So, I sat back. It may be they may all have, a day may come when they might start jumping like that, or a pilot might start jumping. It's a big problem for Me. [Everyone laughs.] Even the lights, you enter into any church and suddenly you find all the lights going up like that. Even in big banquets, I find, when I am sitting there and suddenly everybody comes and sits down and all their bhoots come round, they start jumping and the people start looking, “What's happening? Is there fire or...?" So many things can happen like that. There was a gentleman very much possessed in a war and we were going to a ship and there was a little platform on which we had to first jump. And the platform started going like this, like that and the fellow didn't know what to do, you see. He didn't understand why it was doing so.

So, when you reach that state, you don't have to argue or do anything. Even if you lift your eyes, it happens that the person gets into problems. Or there could be some ego-orientated people; they'll melt down.

First you have to do the drama of a Guru. Dress up in a way which is simple, you have to behave in a way which is very gentle, because you have to attract them. “Come along, come along, come along." That's advertising. Advertising department. And once it is done, that drama is done, it can be exposed very soon; they'll find out that you are no good. You are just a dramatist. Once the

drama has been done, then, very cleverly, you can bring out your real self before them.

So first, you don't show them that you are a real hard taskmaster. Never. First use all your sweet qualities. The more they are difficult, the more I am gentle with them. Then they come inside. Then you put to the mill and you can cure them.

First, prepare them. First of all, sometimes, they are so frightened, they are so nervous, they are so upset.

Sometimes, too much of ego.

So, be gentle. Gradually, they *[UNCLEAR* stay then...] themselves also in your company and then, even if you hit them, they are all right. That's how it has to be done, very cleverly. And if you see the way I manage My Gurudom, you can also *[UNCLEAR]*.

But the key to Guru is patience. Complete patience and complete dependence on God Almighty. That's the key. Complete patience. First you tell them that, “This should be such." But they will not accept, they'll argue. “How? Why?" This, that. “All right, go ahead." Then, they'll come back with a black eye, or they may come back with a punched nose. Then you say, “All right, I'll soothe it down." You soothe it down and then tell them.

So, is the wisdom, the discretion of Yogeshwara Yeshodā. How to deal with people is very important. Why I say Vishwara, because at the Guru stage, you have to give it on a collective level. Individual level finishes and you jump into collective, once you start becoming a Guru.

So, all these methods, which I explained the other day to Modi [an old Sahaja Yogi], you can understand that the

ten of your problems, at the Void, once solved, you solve the sixteen problems of the Viśhuddhi.

And, once sixteen problems are crossed, you come to Āgñyā. And, at the Āgñyā Chakra, there's such a tremendous sacrifice, without feeling the sacrifice, is awaiting. And one has to see what you can sacrifice in that Atīta state, because you don't sacrifice anything. Everything is already sacrificed, what is there to sacrifice? And such a state should be achieved by realizing that you are realised Souls; you are not ordinary people. And you cannot have ordinary, mundane types of rules and regulations. Like Yaman Yamar, *[UNCLEAR* the Nirmals] are for yourself, Yama is for others. Nothing. There should be Absolute Truths with you.

So much so, that you should manifest them and all these truths have powers. By every truth that is within you established. You don't have to do anything, they work out themselves.

So, first of all, you must get your Chakras all right. On the Chakras, you must put your attention. After the Samādhi state, you will start opening them out properly. Clear them out. Know what are the Chakras that are bad. I have seen people who have very bad few Chakras and many good Chakras, but they will be only enjoying the good Chakras and will not worry about the bad ones. Pay attention to your bad Chakras.

Cleanse them, cleanse them. Put all your attention to that. Put the attention of the God, of the Deity whom you worship. And you'll get the complete manifestation of Their power within yourself.

So, clear all the Chakras, all the Pradeshas to be established and after the establishment of the Pradeshas, you have to establish the rapport with others, on the collective level. Then a state when you become a complete Spirit at Āgñyā Chakra.

It's easiest in Sahaja Yoga and I have told you the reason, because you are such fortunate people. The easiest of easiest is Sahaja Yoga. The essence of Sahaja Yoga, that is the easiest thing to do. And that is why you should take full advantage of that easiest method, made easy, absolutely for you. This is the blessing of Guru Pūjā for you, that you all should become Gurus by next year. Just you have to dedicate and say today, in your heart, to promise Me, in your heart, that, `Mother, not we'll try, but we will be.' And twice you should say, `We will be, we will be.' [Long silence.] Now, last of all, I want to tell you that now I have completed My sixtieth year and no more celebrations of My birthday. This is the last, please remember this. I have accepted whatever you sent because of Sixtieth Birthday, is very auspicious. After this, no more celebration of My Sixtieth Birthday. [Sahaja Yogis laugh and applaud.] And you have already thought of giving Me some present from all Europeans, on a Sixtieth Birthday, I have accepted. But no more of this kind of planning should be done any more for the Sixtieth Birthday, which is over now. I am telling you very frankly, all right? So nobody is going to celebrate My Sixtieth Birthday anymore. I hope it's clear to you. [Shri Mataji laughs.] So, the protocol of the Guru and the Mother, is to be understood in Sahaja Yoga, mostly by experiencing.

But that doesn't mean that you go out of the way to experience the other side of it. By being protocolish, more and more, you'll find, you'll receive much more help. Like *[UNCLEAR* Nakum], one day I told him, he'll tell you that, there were two ladies who wanted to go to Belgium. I told them they are going tomorrow. And the ladies said, “No, we are going today." He said that, “Mother has said you are going tomorrow, so you'll go tomorrow, whatever it is." They said, “No, we are going today. How is it Mother..." [MISSING.] “... Mother has said, it doesn't matter. It may go wrong, doesn't matter. Whatever She says, let's obey and see." By experiencing only, you will know. But, in the beginning only, you'll say, “No, we'll not do this and that. It's not good." So, the protocol is the simplest of simple to do.

So that's the essence of Sahaja Yoga: the simplest of the simple is the protocol. If you understand the protocol, you don't have to do anything, you will grow up by it automatically. But you lack in protocol and that's how you do not grow. This is the point is, that to grow, best in Sahaja Yoga is to know the protocol, which you can ask others. With experienced people, you can ask. Or, if you want to have your own experience, you can have.

But some people try the other way round, like answering Me back and saying all kinds of things, that, “Let's experiment what happens." And then they break their necks and come to Me for curing.

So, that should not happen. Experience should be for betterment and that's how, if you can ask others, take their advice, those people who are rising higher than normal, “What is the protocol?" And put your attention to

it. How can you improve your protocol? “What should we do to observe protocol? What wrong are we doing? Where are we going wrong?" Because the essence of Sahaja Yoga today is the protocol, which should be the simplest. Should be the simplest thing to do. And, once you know the protocol, that, if She has said it, if it is meant, then it's all right. But some people are so funny, that they start using Me as a quotation. “Mother has said everybody must fast." I told somebody that, “You'd better fast." So, a thin man comes next day fainting. I said, “What happened?" When I say something to a particular person, they just circulate it, because they think, “Why should I fast alone? Everybody must do it." [Everyone laughs.] Is a big problem, that they always quote Me. Nobody is to quote Me to others, that's one thing is important. Whatever you have to say, you put it on the notice board, maybe with My signature, better.

For general and for particular, whatever I say. You should do it for particular.

At least that much discretion we all should have. And try. You'll be very much helped.

You'll be surprised, you'll be very much helped. Because everything is for your betterment and a special grace, if you understand the essence of protocol.

So, I am taking you to that point where you'll start understanding that nothing is to be surrendered to Mother, as such, because She doesn't take anything. Nothing goes to Her. Is only you're surrendering yourself, by leaving all that is not wanted. It's a very beautifying process, which one should take. You all have come up so much and you have to go very much further. I am sure

you will go ahead and will become great Gurus, as you have promised today, by next year.

So, I don't know what is the procedure of the Pūjā today is. Whatever is the procedure, let's start.

[Shri Mataji speaks in Hindi to organize the Pūjā.] So, the first, the Twenty One Names of Śhrī Viṣhṇu, because it is for the *[UNCLEAR* sustainance/sustenance].

Then is the Gaṇeśh Pūjā, Gaṇeśha's Pūjā. Then, the third thing, then, Sankalpa. Sankalpa is the dedicated vow, for what are you doing this Pūjā; that is to be said by all of you. Then, the Gaṇeśha Pūjā.

After Gaṇeśha's Pūjā, then you do the Guru Pūjā and after the Guru Pūjā, after the Guru Pūjā, we will be doing Devī Pūjā. After the Devī Pūjā, we'll be going out for our Havana and after that, if you are not worried, I'll tell you, is lunch. [Sahaja Yogis laugh.] So, just now, put all your attention to the Pūjā.

***Contents: 1983-07-27*, Public Program, Day 2, Paris, France**

I bow to all the seekers of Reality. At the very outset I have to very humbly apologize for getting late, because of the traffic was very funny today. I hope you understand. *[UNCLEAR]* to reach at the point where one has to reach perhaps.

Yesterday speech I tried to explain to you how we live with our mental projections only. And when we try to go beyond that, we get involved where we are not actually beyond our mind, but our mind gets overshadowed. As I told you yesterday today I will be telling you about the other unknown energies that are within us. Yesterday I

told you about the energy of pure desire, which is the Kuṇḍalinī, which is resting in the triangular bone, called as sacrum. And today I've met a newspaper gentleman from *[UNCLEAR* melos] and he told Me that during twelfth century people used to give awakening by *[UNCLEAR* cleansing/piercing] this sacrum bone, among Christians.

This bone is called as sacrum means sacred. And when I went to Greece I asked the Greeks: “Why do you call it the sacrum bone, sacred bone?" They said that they had a report with India, thousands of years, back where they discovered that this bone is a sacrum bone, having the power by which we get our Self-realisation. They knew a lot about the Primordial Mother, the Primordial Power, the Holy Ghost.

Even the word `ascent' comes from the word `atha', in Sanskrit it means primordial. And even the name Athena means the Primordial Goddess.

But as the time passed they created all the Gods and Goddesses just like human beings and the whole thing became very confusing.

So today I am going to tell you about the other two energies that reside within us. The first energy is that blue one, which is, if you see actually, is on the right side of the brain, starting from here and going backwards. Now this is the energy of our desire, by which we desire. Energy of Kuṇḍalinī is pure desire but this is the energy of our general desire. And when this desire energy finishes off, a person recedes. It becomes passive and habitudes and *[UNCLEAR* recedes].

The right side energy, which is actually the yellow *[UNCLEAR* by] light energy is the energy of our creativity, of our action.

So when we have a desire, we act upon it and that's how we use the action to fulfil our desires. These subtle energies express themselves outside as *[UNCLEAR* closed/gross] energies of the sympathetic nervous system, respectively left and right sympathetic nervous system. Now, with this energy, by one energy we desire and by another energy we act. The left side energy represents our past and the right side our future.

Whatever conditioning comes to us comes through the left side energy and whatever we think and plan comes to us from the right side energy. Now if we do not keep into moderation and we start moving with our attention towards the left side, by becoming subservient to someone who is devilish, or we condition ourselves very much, too much we indulge into promiscuousness and the perversions of life, if we become alcoholic and we take certain drugs which makes us faint or which makes us sleep, or we so-called worship God too much by singing His songs like mad, going mad about it, we start moving away towards the left.

In the left side of our being there is collective subconscious also.

We have also our subconscious, the past subconscious and the collective subconscious so that whatever is there, through from our creation is in that area. Recently I saw a very good film by some doctors who were giving an explanation about the triggering of cancer. And they are very near what I have said long time back. They say

that when a person is vulnerable to cancer, because cancer is built in within us all the time, when we use too much of our sympathetic energy and the parasympathetic gives it the balance.

But in case, if you go beyond the limit, as I showed you yesterday, if the centers break like this or if you move too much away from the center, then this is a vulnerable state of a patient.

That means that there is no connection left with the whole in that part and such a person is in a condition that the, that the cells are about to become arbitrary. According to these doctors that at this time a protein, a kind of a protein, which they call protein 52 and 58, attacks and triggers the cancer.

According to them these proteins come from the area that is built within us since our creation. That means the attack is coming from Collective Subconscious.

So all left-sided movements, like going to wrong Gurus, following dead practices, even maybe that people who go to the funerals too much, or those who are going to churches where there are dead bodies under their feet, or using black magic, spiritualism, charismatic movements, all sorts of these movements in which people get absolutely possessed, all the cults in which the so-called disciples are just possessed, they cannot explain, they don't know how to do, people take to it so easily without even thinking what they are doing.

They don't want, also want to see, those who have been there, how are they, what is their condition, how much they can think for themselves. They just run into it, like a fashion close in. I live in a very elite society of London

and everywhere. I have a double life. They don't know I have Myself known all these things. And they all discuss among themselves: “So which Guru are you going this day?" So that they must get *[UNCLEAR]* going to this Guru. All this has not applied that one as if it is that kind of doctor or some sort of a juggler, juggler's shows. It is very fashionable to talk like this these days, people don't talk of prays or anything, they talk of Gurus.

These Gurus are real parasites, they are not Gurus at all. They put up a show, they are very calm, silent *[UNCLEAR]* people and as if they are really saintly people, they wear dresses like that. But only what they have is that they have, controlling some spirits. They know how to mesmerize and that's how they managed their show, they take all your money and once you are lost they are not concerned about it. All such people can get cancer, specially blood cancer, they may get epilepsy, they may become mad, because all left-sided things affect the brain. The working of the brain is completely out of control.

Now, the right-sided people are, are extremely ambitious people, they go on planning, they are very futuristic. I met some, they are so futuristic, that they have forgotten even their names, they have no memory left. And these people go on planning and wasting their energy on planning. For example today there *[UNCLEAR]* be a *[UNCLEAR* track] and whatever you may plan, whatever timing is that but you will reach at the same time when you have to reach. Most of the things that we plan are absolutely wrong, because future doesn't exist; it is the present that exists. But if I tell you, you be in the present, you cannot

be, it's not possible. Because something has to happen within you by which you become still in the present.

A thought rises from your mind and falls off, another thought rises from your mind and falls off. It may come from the right to the left and left to the right, makes no difference. But in between these two thoughts there is a little gap and that gap is of the present. As you can see in the brain there are two institutions that are created on both the sides. Because of conditionings you create an institution for superego in the head. And on the right hand side, when you use too much of right hand side you create another institution for ego. Now these two, ego and superego, both of them are like balloons and when they cover each other, we develop our `I'-ness.

Now, the right-sided person, who is a very dashing fellow and he tries to dominate everybody else and there are some mesmerizing procedures also by which you can make a person suddenly over ambitious.

Hitler was the one who used these. He had his teaching from the lamas of Tibet. And imagine to what extent the Germans had to go.

So now within us these two systems reside. For example when Freud talked about psychic He said about the left-sided. Like he said that you should not get conditioned at all, what's wrong? Actually he was himself a pathological case, because most of the psychologists get pathologic.

When they are in contact with all kind of mad people, they don't know how to protect themselves and they imbibe all their mental diseases within themselves.

And even he died of cancer. But imagine how he has sold away these Western people. Indians considered him to

be a half-mad man. I mean any wise man can see through, such absurd ideas. He had no sense of holiness, no sense of auspiciousness, no sense of sublimity. He wanted to reduce human beings to the level of a sex point. And those who followed him are today suffering from AIDS. And where is he gone now? Can he save some? Today the press gentleman asked Me if the West is lost and what are the sins, what are the sins according to God. I said that I cannot give the list of sins it's too much. But I'll tell you about the virtues. As long as you have one virtue that you are a seeker and you want to become the Spirit, forget about your past. It doesn't exist for Me.

Like an egg becomes a bird, you'll become completely transformed and who is bothered about the blemishes on the shell of the egg. Now the, both the sides if you start using too much, we develop imbalances within us. A person who is too much ambitious, uses his brain too much, you'll be amazed, to give him a balance his brain doesn't go off but his heart goes out, he gets a heart trouble. On the contrary, the one, like a lady who cries too much, she's always miserable and she's saying: “This is miserable, that is miserable” who suffers from the left side pang of life, who always says: “*[UNCLEAR* I've a big heart], others don't have a heart" loses her head. I don't know if it is a trend *[UNCLEAR]*.

So here we are to understand that we have to be in the center, in moderation. That is how the great prophets came on this earth, to preach that we have to be in moderation. Abraham, Moses, Mohamed, they are all of the same personality. They represent the same person,

the same Divine principle, the principle of a master, Guru Tattwa as they call it. Now, when you have got ten valances within you, which are the Ten Commandments and when, when you try to disobey completely, then you are a person very vulnerable to diseases, either mental or physical. Now in this area, as you see the greenish area, what we call as the void in Sahaja Yoga, resides these ten valances, the religion, the inner religion, not the outer one.

Like there are some people who are very fanatic, say in India we have people called Sikh, Sikh people.

They are told not to drink at all and not to smoke at all. But in England they drink much more than any Scotchman can drink. And they smoke so much that all the empty chimneys of London can be filled with. But they told that they won't bear a helmet while driving a bike because it is against their religion.

And the poor Indian last Home Minister had a problem so I said: “You just tell them the one who doesn't drink and smoke needs not to wear." And you'll be amazed there was not one. This is the condition of fanaticism.

Now, look at the Christians. They go to church regularly, they take their baptism regularly, everything is done outwardly. But Christ has said very clearly that: “It is said in the Ten Commandments that: `Thou shall not commit adultery' but I say, verily say thou shall not have adulterous eyes." Now, where are those Christians who do not have adulterous eyes? It's very nice to dress up nicely, to go to church and have your adulterous eyes moving *[UNCLEAR* everywhere into church]. They are just doing what was told not to be done. Same about Islam.

Same about every religion you'll find out. People are just doing some things out of fear but not out of virtuousness.

Sahaja Yoga is the only way. When people come to Sahaja Yoga they become the true Christians, true Muslims, true Hindus. I don't have to tell them: `*[UNCLEAR* don't do/you do] this, or do that' they just don't do it. Because as your Spirit is enlightened in your attention it is the Guru principle. You become your own masters, you become your own Gurus. You don't need any other Guru. In the car just now one of the very great Sahaja Yogis told Me that: “Mother, this concept of being Yourself the Guru is difficult for people to digest, because now as they are without jobs, they do not want to take the responsibility of their own Guru." But on a very baser level also I would say Sahaja Yoga helps there. Those people who were unemployed and young and they are made to sit without doing anything, idle, it's like imprisonment.

And the idle mind, it doesn't know what to do. That's why they break their legs in different directions.

They tried all these Gurus, these drugs and all that because they are unemployed. Young person has to be busy. Of course they have to have money, no doubt. But they get money all right, money, they have no *[UNCLEAR* moderation/botheration]. But to get some money and don't work, they go frustrated. If you ask some of the politicians to be unemployed we can see what will happen to them. They will break each other's head, I think. But these young people what are they to do, what are they going to do now, how are they to live? Then, we have people now, who have got into Sahaja Yoga.

Some of them came under comas, you won't believe it, absolutely drugged and they got Realisation. As a result of that their self-respect came.

They tried to find out some sort of a work for themselves. They took to education and apart from that, they, what they did really was to come up to Sahaja Yoga to help others. They became active and they said: “Now, we are employed by God." So even the unemployment problem is solved. That is how things can be solved if you find your Spirit.

Now, at a higher level, at the spiritual level, what happens to you? Spirit is the reflection of God Almighty. And when it reflects in our attention, one of its quality is that the Spirit is collectively conscious.

So in our attention also we become collectively conscious. I said yesterday that our central nervous system becomes collectively conscious.

So on physical level also you start feeling others. But it is not physical.

Like a room is dirty and you have to clean it and clean it and clean it. But there won't be any light. You have to enlighten a light there. By cleaning the room you cannot put the light there. But if you enlighten the light then the whole room gets enlightened. That means light is not the room, it's not physical.

Now the Sahaja Yoga that we are doing now, is first enlighten the light. And then let the people see within themselves what's wrong with them. It is much better to talk to such people who can see themselves clearly. Now if you tell somebody that: “You are very ego-oriented” after saying that you must run with such a speed of five

minute mile, because that person must come and really box you. But in Sahaja Yoga when they get Realisation, they come and tell: “Mother my Āgñyā is catching here." That means my ego is growing like a balloon. After Realisation you start feeling the tension of your ego on your head. You just experience it and you want to get rid of that ego. It is very interesting how people start seeing themselves and detaching themselves and telling what's wrong with their ego.

The second quality of the Spirit is that it is the joy, source of joy. You get out of the, get out of the duality of happiness and unhappiness and you start enjoying the joy in a complete space where there's no thought. For example now this Champs Elysees is a beautiful one. But if somebody sees it without Realisation he starts counting all the things and how much it must have thought for cost, what is antiquity and all those things, which you'll think. Even the sense of beauty has become mental projection, men are used to only think. But for a person like Me when I see something beautiful I don't think. The mind becomes just like a ripple less big lake, like a mirror. And the joy that is created in that beautiful thing, completely reflects in it and sometimes you feel a torrential rain of joy flowing down your being. And you get completely drenched. This is what the second quality of the Spirit is.

The third quality of the Spirit is that it is Absolute Truth. It is completely absolute. For example now if you want to know if, say, Michelangelo was a realised Soul or not, how will you find out? Sitting down here if you put your hands like this and ask a question: `Was Michelangelo a

realised Soul?' and immediately you start getting tremendous vibrations. Whatever I'm saying you can get it like that, because like a computer you are and you get connected to the mains. Unless and until you are connected to the mains how can you work out your machinery? Like this instrument has to be connected to the mains, we can say this is the *[UNCLEAR* coil that/coil of] Kuṇḍalinī that is working here. And that [coil] was connected to the plug, which was the Spirit and then the energy, All Pervading Energy started flowing through you.

But one can doubt *[UNCLEAR* that/but] when you receive your answers how are you to determine if this is true or not.

Now for example if you ask: `Is there God?', you'll get a Cool Breeze in the hands, whether you are an atheist or not. But how to make out, I will tell you a story. In India we had arranged a program in a place where there were very fanatic Brahmins. And I'm a Brahmin because I know the Brahma, I know the..., all this All-pervading Power, so I'm a Brahmin in real sense. But I was not born in a Brahmin family.

So they refused, that I can't speak in that hall. But the boy, he said that: “All right we'll announce it in the newspaper." They were frightened of that.

I did not know about this story. But there were some people sitting in the crowd who looked very angry.

So I asked, suddenly I said: “Those who think they are Brahmins please come forward." And all these people you see crawled up to the front.

So then I asked them: “Put your hands towards Me like this." And they started shaking like this and they could not stop their shaking. I said: “What's happening to you?" So they said: “Mother, now we accept you are the Power, that's why we are shaking." But I said: “Nobody's shaking. Why are you only shaking like this?" So they said: “We are Brahmins, we are more sensitive, that's why we are shaking." And there were five six people sitting in the front and they were also shaking.

So they said: “Look at these, are also shaking. They must be Brahmins." I said: “Better ask them." They said: “We are not Brahmins, but we are certified mad people from the lunatic asylum." So this is it, that you see when we have wrong ideas about things, how is related. You can see that those who were not realised were not shaking so much as the mad, fanatic and the other certified mad, you see.

They were not certified but they were mad, certified by the Divine as they were certified by the lunatic asylum.

So one has to understand that when you ask a question relatively you can also find out that whatever is truth shows in the hands as vibrations and whatever is false always shows maybe little burning, maybe little stinging or maybe numbness in the hand. Actually many people feel that: “Why should Mother do all this job? Who is She?" I've always said: “Better if you can do it I'll be very happy." I'm a very happily married woman and My husband would really be so happy somebody to do My job. But one has to understand that if this is so, somebody has to also decode.

Somebody has to tell about the Divine, what is He speaking to you. If I can do that you should not be angry on that point. But I must say that I am just like an enlightened candle, which can enlighten another candle. As Alexander told Me that he is already, so all of them have felt the Realisation. He is a young man who got Realisation and he is giving Realisation to so many. But he is not a half-baked person, he's not a half hearted person. There is one in India who was given Realisation to ten thousands. And they have not even seen My face.

The other quality of the Spirit, that it is the attention of God Almighty that the attention of God starts working in us. That means Divine starts looking after us. Most of the Sahaja Yogis now say that miracle has lost its meaning in Sahaja Yoga.

So miraculously people are helped that they cannot explain.

If you have to write about them, I think I'll have to write ten volumes. You believe it or not but God is really Almighty. He is Ocean of Love and He really wants you to get your Realisation and enter into His kingdom. He is so anxious that I'm Myself surprised how things are working out. And how He keeps you in His attention it is remarkable, how He helps you in every way. Of course spiritually, you feel completely relaxed, you feel very young, you look all very young and you are all the time a magnetic person, so dynamic.

The whole day you will work and you will not feel tired. Suddenly you develop a beautiful voice to sing, suddenly you become a great poet and you feel so blissful all the time. Jealousies and vanities, all disappear. And you

become really a beautiful person. When the Sahaja Yogis come to the airport, you can see the vibrations, but you can see the flowers like this. You forget all the artificial barriers of race, cast, everything, everything you get rid of. And of course the highest thing is that you are absolutely contented in yourself. When I came first to Paris, people told Me: “Don't tell them, Mother, that you are a happy person." Because French people think those who are happy are ignorant. And when the people came, I said: “They are all `les miserables'." Same people today are beautiful flowers, doing the work of God. Entirely you change, all your priorities change and you become a very secure, humble person. Y ou know then when to get angry and when to be humble. As so many Jews who never respected Christ, now know the value of Christ.

So many Christians who never respected Mohamed Sāb now know the value of Mohamed Sāb. They are so knowledgeable. Like in America somebody asked Me: “Are they all, have they some doctorate?" It is so much inside the complete library of real knowledge, that we should not be illusioned by other things, which are unknown to us, as Divine. When you become the Spirit everything is logical, everything can be proved. You can see the movement of the Kuṇḍalinī at different points.

Supposing this center is catching, you have to say Lord's Prayer, that's the mantra.

So... Otherwise the Kuṇḍalinī won't move.

So everything that it is said in Sahaja Yoga can be proved, every word of it. You become the master, you know everything about it and you are so much blessed that you live in the Ocean of Joy. May God bless you! You

all can put your hands towards Me like this. Please put your hands towards Me like this. It's a very simple method as I told you that your fingers have those seven centers within you. Those who do not want to meditate should go away. It is better for us. It will be very fair. Put both of feet on the ground straight and be humble about it. This lady doesn't understand, *[UNCLEAR]*. If she doesn't want to meditate she should go. It is kind of you if you can go. Now please put both the hands straight like this.

And... This lady is not [going off], very obstinate. Should go. Please, please go out that you disturb us very much. It should be fine. This is not proper. If you don't want to meditate then why should you sit here? You better go. Now this is too much. This is too much aggression. Please, please! Madam, please go! Thank you. You should not divert, that's not a good thing. You see, if you have come for the lecture, all right. Then after the lecture, don't want to meditate I'm not forcing you. But that means you should not force Me also, isn't it? We should be fair.

Also I cannot guarantee that you'll get your Realisation; you have to be very humble. You should not have a shopping attitude towards Sahaja Yoga. You have come here to get something for yourself.

It's not for Me and you should not disturb others. Whatever you may feel you keep to yourself because you know Sahaja Yoga, it has thousands of people, all over the world. And you should not be troubling others because that's not a good thing at all. Whatever your ideas keep to yourself. Or you may write to Me about it, but don't force others. You are asking for the highest, but

it is not any other lecture, it is a process of God's grace. And we should be really worthy of His grace. First of all if we don't respect ourselves, we can't respect anybody else.

So first respect yourself and not to feel guilty, not to feel guilty at all about anything. Forget about all the things, everything that you have thought of. Just forget it. At this time nobody is a sinner. Everybody is a temple of God. That's how I respect you and love you. You also, please, respect yourself. Please, have no guilt in your mind. Know that God has created you with very great care and unlimited love. Now close you eyes. Just close your eyes and you'll start feeling the Cool Breeze in the hands.

Forget about your problems; they will be solved and resolved. Everything will be washed off and cleaned and redeemed. I can console you, I can comfort you and Sahaja Yoga redeems you too. But you should be ready for [it]. Just keep your eyes shut. Now, please, put your hands on top of your head about four inches. One hand, one hand, right hand. Left hand towards Me. Little higher and see if there's a Cool Breeze coming in. First a hot breeze will be there. Put the hand parallel to the ground, facing upwards, on your lap. Put the hand on your lap facing upwards, facing upwards. Now please see if there's a Cool Breeze coming in or if hot is coming out.

sākṣhāt Mātājī Nirmalā Devī sākṣhāt Mātājī Nirmalā Devī... [several times].

Now you can turn your hands otherwise: right hand towards Me and left hand in the air.

sākṣhāt Moksha Dāyinī sākṣhāt Moksha Dāyinī sākṣhāt Moksha Dāyinī... [several times].

See if a Cool Breeze is coming out of the head. All right. Are you feeling the Cool Breeze? You put your hand up now and see. Straight like this, towards Me.

Contents: 1983-08-21 **Mother Earth and Śhrī Mahālakṣhmī Pūjā, Surbiton Ashram, London, UK**

Some of you who cannot sit on the ground can bring some chairs from inside. You can get a chair for yourself. If you people cannot sit on the ground, go and get some chairs for yourselves. Sit down. [Hindi.] Today we have to know something about the connection of Sahaja Yoga with this Mother Earth. It is very important, that we must understand the value of the Mother Earth. She has been very kind to all of you. She has been sucking your vibrations. She has been... otherwise also, She has given you everything that you see around.

So today, we have to understand the connection and the symbolic expression of the Mother Earth within ourselves. I've told you before also that Kuṇḍalinī, which is in three and a half coils, is placed within the triangular bone. Now this abode of the Kuṇḍalinī is called as Mūlādhāra and is represented in this universe as this Mother Earth or in the Pūjā it is represented as the Kumbha. I don't know if you you have made the Kumbha or not.

Sahaja Yogis: Have you?

Sahaja Yogi: Yes Shri Mataji.

Shri Mataji: Have you? The Kumbha is sitting here.

So far, in the movement of our consciousness, we have been trying to understand the God Almighty and all other five elements that we call as important.

What is it?

Sahaja Yogi: I think the mic is not working.

Shri Mataji: OK. [Takes the mic in Her hand. Sahaja Yogis laugh.] And also, the consciousness has been moving towards the understanding of all the other four elements but the Mother Earth. That had to be such, because unless and until the understanding of all these four other elements are brought to a certain degree, the Mother Earth cannot express itself. Like if all your Chakras, four Chakras, are caught up, you cannot raise the Kuṇḍalinī, you cannot give Self-realisation. You cannot have a mass evolutionary process done. That's why we had yagñyas, all other methods of exciting the four elements. They worshipped the water and they worshipped air, the sky, the firmament, the light.

And that's how we came up to the time of Christ where light was worshipped.

But today when we are in this modern Sahaja Yoga, we are actually at the level of the Mother Earth, because as they say, it's the age of the Aquarius. And Aquarius is the same as the Kumbha, is the Mother Earth.

So we are at the level of the Mother Earth. We can also see in the consciousness of human beings.

I'm saying not only men, but women also and men. The consciousness is moving more towards the feminine expression of life. But as stupid as human beings are, the feminists also have been very stupid that they are fighting on the level of rationality, of economics, of politics, all useless things. Equality on all these things if they are to be sought, you become men, you become just like men. If you are argumentative, if you are rational, if you talk like a man, it's a masculine

development. But the mother's development, the feminine development, is not equality in the way the men have been stupid. No use competing with men in their stupidity, the amount of stupidity has been created already for us quite sufficiently.

The whole world is today, is expressing that nonsense that they had, the competition, the aggression, the oppression.

So the other side of the woman, which was called as the dominated-one, the dark side, the oppressed and all that, has to express itself in a different way, the whole mode, the style, has to change.

See now in Christianity one should understand why Christianity, even Judaism, any religion, even Hinduism and all that, but it's more in Christianity, surprisingly they just had no place for Mary. And Muslims even crowned it by completely cancelling Fātima. And on top of that, you will see that among Christians, I think that ordination, or what you call that, is not given to the lad[ies], to women, while Christ was not born of a man.

But that does not in any way mean that you compete with men in their foolish enterprises by which they have practically brought this world to such a ruinous state.

So today we have to understand that it is the time for the motherly qualities to develop. Even a man, when he becomes motherly only, becomes a great man. Like Christ, when he had compassion, he was called as a big *[UNCLEAR* saint].

So the quality of a woman as a mother, Goddess is always as a mother and She is the power most important to ignite Sahaja Yoga. Now how She ignites? I'll tell you.

I'll give you an analogy, but analogy should not be carried too far, as wise Sahaja Yogis you should not carry it too far.

Say there is a zero, it has no meaning. In the same way, God Almighty has no meaning till you put some sort of one or two before it. It's a zero. It has an existence but it has no capacity or a power to express itself.

So it's a zero. Like that, we should say the masculine growth is a zero.

Another analogy I'll give you to understand it. That if you should see, a very high power wires, you see, going over your head, they are absolutely harmless, there's no trouble. In Delhi there was a suggestion that there is a very big plot of land available where there are high power wires are going and we can have it for free. But I asked: “What's the problem?" They said: “Only if earth gets connected with that, then you will have problem." So till these this high power thing, whatever it is, is not connected with the earth, it has no meaning at all.

But earth is very different from this dynamic power that is flowing through those wires which are zero, which mean nothing.

In the same way, in a woman, the womb of a woman is the Kuṇḍalinī. Now what is a womb? Now if that is the Kuṇḍalinī, that expresses the Kuṇḍalinī in the gross, that means the Mother Earth is also like the womb. Now what does a womb do? It receives the sperm, which is just a frivolous act of man or you can say just *[UNCLEAR* a digression/an aggression] and She then nourishes and looks after it, corrects it and allows it to grow, not in an aggressive way but in a very compassionate and a

sensible way, till it is expelled out of the womb when it is grown up.

So the idea of womb is that the expression has to be in such a manner that it does not dominate. It does not dominate the embryo. If it dominates, how can it grow? So it nourishes it and makes it grow. This is what today's Sahaja Yoga is. That now the Mother Earth is the one, who is symbolized within you as the Mūlādhāra, as symbolized as the Ādi Shakti here, is sitting down before you to nourish you, to make you grow into new personalities, into mature personality. This concept we must understand.

So the women of the West must understand that the nonsensical ideas they have taken from men must be completely discarded, they have to become women first. Those women, who just are talking like men, can never help in Sahaja Yoga. They have to be like this Mother Earth who allows you to do what you like with Her. I mean you human beings have been so stupid to exploit Her to the maximum. Not only that but also She bears lots of nonsense upon Herself. But then a time reaches where She becomes explosive, then She starts consuming people inside Herself. And when She consume people then you see the earthquakes and the droughts and this and that, all these things start coming in and people get engulfed into these problems which they blame Mother Earth for that. The problems that human beings have created out of aggressive nature, even aggression towards the Mother Earth, they have to pay dividend for that. And they are paying.

Now, to stop this kind of a movement of aggressiveness which brings all kinds of disturbances, one has to recede back and should develop a sense of totality of compassion. Unless and until you understand totality, the total the complete, the whole, that is the womb, that's your Mother. As long as you try to be individualistic you cannot be a good Sahaja Yogi. You have to become one with the whole. Now we have to face ourselves for that, very important it is. Specially in the West, I would say we have to face ourselves very clearly, what are we up to? That's a very important thing. First of all let us see where is our attention. Ask a question. We are Sahaja Yogis and Sahaja Yogis within our fold and I am sometimes surprised that even now the attention can be very funny. Like, simple thing, like we can have attention on material things: `this is mine, this is yours; that I should have my privacy.' Then you are gone to another realm of aggressiveness. If you try to have your own privacy then you are depriving others of their privacy.

It was alright when you were not Sahaja Yogis, to have your privacy, because you have to grow in your privacy at that time. But after Sahaja Yoga you have to become one with everyone else, that is very important. Before Sahaja Yoga, you were different and after Sahaja Yoga you are different people.

The whole concept must change after Sahaja Yoga, that now you have become one with the Whole and to feel that you are One with the Whole, you should try to give up all your individualistic attitudes. That's very common now to hear “Yes, I like this, I like that." It's very common: “I like it." Very common, but doesn't behove a

Sahaja Yogi to say such a thing. You see, how can I say that I like something? Think of a mother who has to bear the child, has to give birth to a child, has to look after the child, the needs of the child, protect the child, train the child. How can she say: “I like this and I like that” where is the time? [Laughs gently.] To think what you like and what you don't like, “I like this food, I like that food." Where is the time? Where is the energy left for that? Where is the attention? The attention is on the upbringing of the child.

Now in the same way, a Sahaja Yogi must know that the child within him is born: the Spirit. Spirit is the child which has been born within him, now he has to nourish it, through the Kuṇḍalinī. He has to water it; he has to look after it. It has to make it grow. Now where is the time for other nonsensical things? You have a child in hand. You are all mothers looking after your child that's your Spirit.

So where do you have time for all these things? What attention should be: “What can I do to make this child happy, to make this child grow, to make this child completely manifest myself." The mother replaces herself as soon as the child becomes a mature child.

So now in you, the motherhood must take over than the fatherhood, motherhood towards yourself. The attitude should be like a mother towards the child, how her attention is towards the child. You can see in every day-to-day life how we behave. I have seen people very much interested even now, in food. Now where is the time? Where is the attention? How can you be so much worried about your food? Worried about your sleep, worried about your health, worried about this, that? I mean, here

you are to worry about your child which you have got now with you. And that's why the child is neglected and sometimes you find the child becomes sick or sometimes goes into a coma or may die away also.

So the situation is very different now for Sahaja Yogis, how to treat themselves. Those who are running after, still food and all these nonsensical things. I mean I've seen Sahaja Yogis, all their attention is on food all the time. How dedication can come in a person who is so much dedicated to food habits? Like, we have seen, you might have also seen, some of you, Ajanta caves were built. In ten generations they built Ajanta caves, ten generations! And they built it in a place where there was not even water available, to begin with. And day in and day out thousands of people, without getting any payment, without getting anything, built it. No food, no question! They used to eat some fruits somewhere here, there. But their dedication gave them power to do it. But this dedication can only be developed if you realise that you have to mother your child. Now, if the mother is ugly, the child will be ugly too, because it is the mother who is expressed in the child. She does not dominate the child alright, but she definitely can corrupt the image of the child. And that's what exactly happens when we, the Sahaja Yogis, are not bothered as to look after our Spirit and our spiritual growth.

Even now, you will be surprised, fifty percent people write letters to Me: “Mother I am still possessed, I've worked through lemons and chillies, I am coming to You for this and that." It is a very low grade business I think, even after so many years, if you are possessed, then I

think you should beat [shoe-beat] yourself every day hundred and eight times. It's a very low grade behaviour, I personally think, that after your Mother has worked so hard with you, still you are just the same, coming back with the horrible idea of bringing all kinds of problems to your Mother. That means you have not looked after your child.

Now in Sahaja Yoga, it's not a child which is an individual child you have to look after. This is, one should understand. This is where we miss very much, especially by the intellectuals. They think it is their own child which should be alright, doesn't matter about other's children. Or, doesn't matter if you have connection with others or not. It's very common. Because, you know, rationality gives them that sense: “Oh! My Spirit is alright; my vibrations are alright, so it is alright if I do not go to Pūjā, or if I do not go to any collective thing or if I do not support in any collective work or if I do not take any responsibility of Sahaja Yoga." Because once you become collective you take responsibility.

So you are oversatisfied with yourself that: “It's good, that I need not take up any responsibility. All the Sahaja Yogis are bad, or some of them are bad. I have nothing to do with them and this is that and that and that." But in Sahaja Yoga, as it is, the motherhood is universal. Because if you are the nose, say, then somebody is the eye; if you are the ears, somebody is the lips.

So, it is essential for you to understand that anybody who is a Sahaja Yogi is in trouble, you are in trouble. It's threat to your growth, it is a threat to your growth, because it's the whole that is growing. Of course, those

who are absolutely useless will be thrown away, gradually. That's what Mother does. They can be thrown away, absolutely, so much far away that they will never return. But you don't have to worry about such people, they will be thrown away. They will be given some chances, some more credits will be given, some graces will be given, but ultimately they will be thrown away.

So you don't have to worry. But you must worry about the whole.

And you have to take up the responsibility. Those who do not take up the responsibility are not the people who are not yet matured their child, that's the Spirit.

Every type of responsibility that you can take, think of what responsibilities you can take up. That is why most of us have bad Viśhuddhis, because we do not take the responsibilities. And whatever responsibility we do take we have to be much, much, much more responsible than ordinary government servants are.

Sometimes we hear from one ear and throw it away from the same, don't even allow it to come into the head.

So, one has to understand that the child is your responsibility, you have to look after the child.

And the whole is also your responsibility.

Now, how to establish the connection between your Spirit or keep the connection on between the Spirit and the womb, or the Kuṇḍalinī, is the biggest problem that we all face: that our connections are very loose and that's why this Kuṇḍalinī cannot look after the Spirit. I wonder if you have noticed one thing in Sahaja Yoga, that you can manoeuvre the Kuṇḍalinī, but not the Spirit. You can

raise your hand, the Kuṇḍalinī will move. You can manoeuvre it. You can give it a bandhan, it will go round and round and round, but what about the Spirit? You cannot manoeuvre it. There is only one mantra to awaken the Spirit, in the sense that to please Him you have to say you are the Spirit. But you cannot manoeuvre it, you have to bring in Kuṇḍalinī to look after it, you have to take Kuṇḍalinī there, to the heart, so that this child which is the little offspring just now, has to be carefully developed and matured.

So on both the sides of men and women, we have to understand that if you are a man and if you are a dominating man, it's alright. But if you are a woman and if you are dominating, then it's a difficult thing for Sahaja Yoga to cure you, because you have lost your quality of being a woman. At least you have to be a woman to begin with. If you are not even a woman, then what can you do with these third persons who are neither man nor woman? Now the men, when they are dominating, they have to understand, that they have to be compassionate. They have to be kind, they have to be considerate, but never subservient, never subservient. This is one should understand, that you should not be subservient. Now the women, what they have to be, is to be great, large, receptive, receiving and nourishing all that.

Now the way husbands are told sometimes in this West, I am shocked! Like say this Mr. X: “X? You haven't done this. X? You haven't done that. How have you put this? Do this, do that, do that!" This is not woman's way to do it, it's absolutely wrong that to do it, to tell him to do something. You are becoming a manly! And then we lose

completely the power of giving that nourishment of a woman's love, which is the power of a woman, which women don't understand. I tell you a simple example: My own granddaughter, she wants to be an air hostess all the time, she wants. She said: “You must also have thought of being an air hostess." I said: “Why? What is so great about air hostess?" She says: “That's the only time you can give food to someone." You see, a natural instinct of a mother that `let me see them eat' you see. They don't eat themselves, they want others to eat. But this is not in the conception of the Western women, I tell you. They can't understand this. “Why? I've done this, so why not he does this, this?" It's your privilege to do these things properly, in a proper way. But supposing somebody is a very good mechanic, the woman will also become a mechanic, “I'll do the mechanical things." She is not there for doing mechanical work. She is there for the mechanics of the emotions. On the contrary she is just this the other way round. Like a man comes home; she goes on ordering him: “You have to put that right, why did you spoil my carpet? Why did you do this? Clean it up, get that thing, do that." All his mechanics of emotions are finished. Once his mechanics of emotions are finished, he is useless and you are useless as it is! And men also should not do their jobs. Let them do their own jobs. I think this is one of the biggest problems of the West today that men are neither men and women are not women. I find the quality so horrid, that I don't know how to deal with the mixtures. You must understand this very simple thing in life that if you are a hybrid stuff, you can't have the quality of a Sahaja Yogi! [Laughs.] If you

mix it up, it's a very funny thing, isn't it? So a woman must try to be a woman and a man must try to be a man.

Now see, what is the situation of a man, as a masculine effect on the development of consciousness? So, as the manliness was expressed, we have developed science. We have developed all this knowledge, all these things which are outside. Now everything is ready. Now the woman has to come up. I mean, I'm just saying in very abstract words, don't think of woman, but you can say the feminine, feminine nature has to rise now. Now everything is ready, it has to just spark. All the Chakras are ready, now awaken the Kuṇḍalinī. Kuṇḍalinī is as important as the other Chakras are.

So now awaken the Kuṇḍalinī. Now Kuṇḍalinī's behaviour and mode of action is very different from the mode of action of the Chakras.

If the Kuṇḍalinī became the Chakras and the Chakras become the Kuṇḍalinī, how will you manage Sahaja Yoga? But we must assume our own nature in all dignity and in all pride; not to feel in any way low down. Because a man sits on a horse, the woman wants to sit on a horse. What is the need for a woman to sit on a horse? I can't understand. Here all the women are sitting on a horse. They'll become like horses! Already I think half of your royal family looks like horses, don't they? [Laughs.] I think so.

Their faces look like horses. See, so there is no need for women to do all the things that men have already done. Say, for example, there's one personality of masculine personality, that has to come and do a certain job. Now you've done it. Alright. Now then other personality has to

do the job. Now see the situation of the Divine also: Now the whole complication comes in that once a kind of a thing has been done, another one that comes wants to do the same.

Do you follow My point? So the whole energy is completely wasted.

The whole preparation has been made for this Aquarius age to come in to bring in the Kuṇḍalinī upward and to make the whole thing work out in such a way that the left and right meet and you all become ignited, enlightened. It was a question of our being, sharing the whole job in a proper understanding.

Now see how Mother Earth herself was created. It's also a very simple thing. First, the movement of the energy started flowing. Now this is a combined energy, alright? Then the combined energy went round and round and round like that and when it consolidated there was this big bang. When big bang took place, now this is the manly work, I should say in a way, manly style, because still the Mother Earth is not produced, so then these little fragments again went round and round. With the momentum, they became roundish. Out of them, the Mother Earth was selected for one job, not to do anything, it kept quiet now, alright. On the Mother Earth out of the water came the life, the carbon came in. Everybody helped there and a human being was created. Then the men went round to improve their societies and whatever they have done to it, whatever was possible with their ego is done, finished now. Now they have done their job, you see. Now they are on dole, you can say.

Now the womb or we can say the Kuṇḍalinī, which has been waiting all these years, was resting, waiting for that time, isn't it? So we call it `the blossom time has come now'. At that time the Kuṇḍalinī has to rise and ignite, in such a way that the completion of the whole work takes place. It's simple, do you understand now? So there's no competition between men or women, but the style of work is different. If you understand that, then only this kind of a revolution will take place and not a rebellion. Actually, women are rebelling against men and a nonsense it is, I mean, it's such a headache that you create something, allow them to grow and the another party comes which has to complete the job starts rebelling.

So the revolution has to take place and the revolution is only possible when we understand that what part is left out now to be done. Are you getting Me alright? So that part is now realisation, our awakening of the Kuṇḍalinī. For that your feminine qualities are going to help you, not your masculine qualities.

So aggressiveness must be given up by men. Also, because they are Sahaja Yogis now, they have to take feminine qualities, not of fighting. If women fight they are not women. You see, women are told that: “You are useless, you are good for nothing” so now they are trying to show: “No, we are also alright. If you have eaten one crow, we will eat three!" [Laughs.] Now, the understanding and the wise perception would be such that, what do we have to do now to change the mode and the style of our lives? What's wrong here? A turning point has come. Now the evolution is not rebellion, at all

by any chance. It's a wrong idea people have. It's not rebellion that you hit me and I hit you, go on hitting each other, like a pendulum you move, you see the movement of a pendulum. It's not like a boom, this thing, that today you are born as a Muslim, tomorrow you are born as a Jew, then you are born as a Jew, then you are born as a Hindu, then you are born as, it's not pendulum. It is spirally movement.

So every time you achieve an evolution you are at a higher level than before, so the movement is spiral, see My point here? Now to achieve the higher position in our whole being, what should we do? Is to understand that from this point to that point we have to rise, we have to rise in a way that we move in such a way that it is not in a pendulum way but in a spiral way. And to move spirally, you have to use another kind of force. Whatever you have used so far has to be endowed with another kind of force and that's the feminine qualities of women.

But where are the feminine women? They'll dress up like women, they'll try to be feminine and all that. That's not the way: from inside, from the heart, a feminine heart. Christ showed that in His life: He forgive. Only a woman can forgive, man cannot, because he is aggressive. How can he forgive? Kṛiṣhṇa never forgave anyone. He used to kill. [Laughs. Moves Her right finger.] Right royal fashion: “So, alright, if you are so? Alright, done." He forgave to such an extent to show that He is now giving a turn to the spiral and now a feminine quality has to be developed among human beings. But that doesn't mean that you start walking like a woman or developing waistlines, because that's another stupidity, you see. but

to be motherly, not to be fatherly, but to be motherly. That kindness, that gentleness should be in your behaviour towards each other.

Of course this force also corrects, sometimes also gets angry also. Mother also has to get angry sometimes, specially with people who never get alright with their behaviour, She has to be shouting, punishing and sometimes She also destroys! It's alright. But that is sometimes, not all the time.

So just now one has to accept that to be like the Mother Earth we have to be forbearing `dhara', “dharaka sadharmand" [having the same nature of a bearer].

She is the sustenance of everything. She takes everything, the vibrations are sucked in, see talk about it. And now for the first time after Realisation, you can give Her back what you have got it, from Her. You can give vibrations to Her trees that are created, you can make them beautiful. You can transform a flower into a more beautiful flower. Now whatever you have got from the Mother Earth, you can give, because your Mother Earth is awakened within you now.

So you return Her back everything that you got from Her and give it to others: generosity, the greatness of heart, nobility, forgiveness, love, affection, bearing, everything for love. And for a Mother, to save her child, she'll starve herself, she'll do everything to save her child, complete dedication, she has for her child. That's a real Mother, I mean the kind of mothers you see these days, neither they are mothers nor women. But what I am saying, that's the real image of a mother and you have an image before you.

So, this is what one has to develop now, whether you are men or women, as Sahaja Yogis you must develop a new consciousness of affection, love and compassion.

Getting angry, getting into a temper, shouting at people, screaming at people, is not going to help us much.

If you have to help the whole, the growth of the whole, try to make yourself a milder person, be angry with yourself that you are losing tempers and you are so unkind to others. All the problems have come out of the overgrowth of the masculinity, overgrowth. It reaches a certain point, you see, it's reached such a wretched point now, that it has to come down.

But also femininity, at a lower level, without Realisation could be very, very small hearted, chicken hearted, could be all the time worried about her own child. That's what one has to change: is to have love and affection for every Sahaja Yogi, for every person. When it comes to fighting others, you are all one.

But among yourselves you can look after each other, tell them, say for example, something is paining in my nose here, I will just try to rub it in the same way. But I won't try to cut my nose, will I? Or bang my nose, I won't.

So the feeling that the other is myself, be kind and gentle, try to improve and help in that manner. I hope you have understood the whole thing. In a nutshell is that: we have to change the whole mode, a radical change has come in the society of Sahaja Yogis.

If there is any question you ask Me before we start the Pūjā.

Now the problem of divorce and all that you can see in this.

Left Nābhī problem can be fought.

Any question?

Sahaja Yogi: Is it alright to hurt people for their own good, Mother?

Shri Mataji: You see, this problem comes in when you are not the whole, alright? Now supposing, as I told you, if you are the whole, who is the other? Then you will, even if you have to hurt, say, for example, if there is blood coming out of my thumb, I press it hard to stop the blood. It will hurt the thing, but the discrimination must be used, that I'm losing my blood which is precious, much more precious than this little hurt. But that discretion must be achieved. You see in Sahaja Yoga, you are all free to develop your sense of discretion. And once you develop your sense of discretion, gradually you will know what to do. In the beginning you will hurt, no doubt, because you are used to that. I've seen people here, just barking at each other, as soon as they see each other they start barking. You go anywhere in the whole country, you go anywhere, they start barking for nothing at all. I was surprised. In a Pune, I went there, there also everybody is barking at each other, you know. Whether they are drunk or not drunk makes no difference, in the same state.

But after Realisation, you do say, because you feel concerned, you're worried. But you say in such a way that you achieve the results. See My point, that is the criteria, that you should achieve the results.

But, supposing a man has come for the first time and you tell him that: “You are a bhoot." Then naturally, he'll be hurt. Very common. [Laughs.] First day, someone walks in and you say: “You are a bhoot." I mean thank God if he does not understand the meaning of the word `bhoot', then it's alright. [Laughs.] But first you think of being gentle, right, embalming, sweet. Let's see, find out ways and methods. Is a very good way, is the evening to write down how many sweet things I've said today. Not like these sweet things we say: “You're looking beautiful" all that. Not the superficial ones that may pamper the ego. But they are so sweet, you know, things are. Let's say, there're some very good words, people say like: “Are you warm enough?" Very sweet way of asking a question. Then, it's very simple but you can say like that.

But it's very difficult for people to say that even, I've seen. Looking after other's comforts, if somebody is sitting, he wants a water, he is awkwardly sitting, you just go rush and give him the water. “Oh! That's too much to expect" that: “Oh God! You gave water!" `I'm not his servant.' Immediately the question comes into the head.

Little bit, trying to do something here and there, or sometimes thinking, going in the market, you find something: “Oh, let me take it for him." Children do. I've seen children, all the time they think of their friends, what they can buy for others: “This is good for my friend, this is good for the, she's very fond of things, she likes this." All these little, little things, you know.

Sometimes, even a small thing like early in the morning you get up, you find the another person is sleeping on

one side, his blanket on the third side and his pillow on the fourth side.

So you just put his head on the pillow and cover him with the blanket.

That's Mothers job.

Not out of fear, but out of sheer love. Like even, if it's cold and buttons are open, you can button up a person, he'll like it. It's little, little things, you know. Women have very little sweet things which they do, which make men very happy. But now women have lost now that sense of it.

Not the fighting, but thinking of what sweet thing you can do for them. And also, sometimes, teasing is alright.

Sometimes tickling is alright. But a kind of a sweet you see, rapport between each other; even the feeling, that we can do that, it's a master's job. It's a master's job you see. The one who is a master can do it, those who are not, will not be able to do like this. They will again come back to hurt. Ultimately, they'll land up hurting or fighting or coming to blows. But those who are masters will be so beautifully doing the all job, that you see, it's kind of a very sweet relationship, it's called `madhurya', without any lust, without any money-business and things, such sweet relationship it is. And the joy would be `bubbling'.

All these perversions and all these things will drop off, but a very sweet relationship.

Alright? Even saying that you are feeling happy.

Contents: 1983-08-23 **Rakshābandhan Ceremony, Tannay, Switzerland**

I said: “No we have to put it down that's all." He said: “How do you do Mother?" I said: “Very simple, three times you have to go round." And I put it aside one, two, three. And then he started seeing you know, storm clouds and big formations. And so we arrive here with the rain, running out in the rain and very cool temperature. All wet. But the thing is, Nature is easy to control...

So today is a very great day, when I arrived here, is the day of Guru, today is the Pūrnimā, is the full moon day of Rakshābandhan, the day when the brother is tied with that *[UNCLEAR]*. You must show them.

So I brought for you all. Tied in the hands of brother, by a sister, for the protection of the brother. And we have a very nice story about it. When Alexander the Great invaded our country, he married an Indian lady and after certain wars he was arrested by a King called Puru in Punjab and his wife got desperate.

So she sent one rakhi like this in a thali like that with the cover *[UNCLEAR]*.

Now when he, that was the day of Rakshābandhan, so, what they did, he lifted the cover and saw a rakhi, which was presented to him. And on that day you cannot refuse.

So he asked the carrier man to give the rakhi to him and he asked somebody to tie it. And he asked: “Now who is my sister, who has sent it?" So they said that it is the wife of Alexander, whom you have arrested.

So he just got out of the arrangement; he got up from his throne and then he rushed to the goal and prostrated himself before Alexander and he couldn't understand what had happened.

So he said: “I didn't know that you are my brother-in-law and I didn't know that you are the son-in-law of our family, so I am sorry for doing this thing for you. It is so disgusting for me to behave like this, so will you please come out?" And he brought him out and put him on his throne.

So he couldn't understand what was the thing; he was so flabbergasted you see and then he said: “Now you can go home." And he sent him with lots of jewelry and lots of sweets and all that, to his house and he himself was there with him, to see him off.

So when he went in, his wife was smiling and he asked her: “I can't understand what has happened. This king, has he gone mad? He has released such a dangerous criminal like me. I can kill the whole country now." She said: “Did you see on his hand something tied?" He said: “I saw on his hand a shining thread being tied, but what does that mean?" So she said: “Today is the day of Rakshābandhan. On this day I sent him this bandhan, this one and he tied it, so he becomes my brother. Now he cannot harm you because you are my *[UNCLEAR* soltargen], you are my husband, my good luck, so he can't harm you and he respected you so much because you are like the son-in-law now, in the family." And Alexander said: “That settles it. I am going home. If these people can release such a dangerous criminal for only one thread, what sort of symbolic people are these, I mean they can do anything like that and how can you rule such sensitive people?" So you see, he took a poet and many other people with him, to Greece and his name was *[UNCLEAR* Chandaverdayi] and he has written lots of poems about

him, about Greece. But so many of his soldiers didn't want to back and they settled down in India with their wives and they are living in some forest in India.

So only a thread has done all this goodness. I hope you people will also respect all your feelings with a delicate thread of love from *[UNCLEAR]*.

And Viṣhṇumāyā, the One which today announced our coming, is the sister of Śhrī Kṛiṣhṇa and you must know... who disappeared in the sky and you know who announced the coming of Śhrī Kṛiṣhṇa later on, Viṣhṇumāyā. And after eight days we have the Birthday of Śhrī Kṛiṣhṇa to be celebrated in Geneva.

That's why it's very suggestive today that I should bring rakhi to you, because a sister will give you this great protection to her brother.

So when are we having the Pūjā now, what is the idea? Thirty-first.

So better do that I think because they have also fetched a sarī for a Kṛiṣhṇa Pūjā, for you and they thought that best is to do the thirty-first Pūjā here. Kṛiṣhṇa Pūjā *[UNCLEAR]* than any other Pūjā. *[UNCLEAR]* doing the Pūjā now is all right. Are you feeling better now all of you? Question: *[UNCLEAR]*.

Shri Mataji: You know this is Kṛiṣhṇa Pūjā and Kṛiṣhṇa resides on Viśhuddhi Chakra and Viśhuddhi Chakra is America, so is even more significant now that in Geneva we should *[UNCLEAR]* from America.

Now can you translate... We had a nice Pūjā for America in London about three days back *[UNCLEAR]* the thirteenth day is the *[UNCLEAR]* day for Pūjā always and we had one

nice Pūjā there and I gave a very good lecture, I don't know if you have got the tapes. I don't know... can ask Paul. Did they give you any tapes Paul?

Sahaja Yogi:... videotapes... it's possible Mother.

Shri Mataji: Just have a look. What a nice ashram you have.

Sahaja Yogi: Your house Shri Mataji.

Shri Mataji: Very good, very nice. It has a nice big room I must say, quite a big room. And the area you have outside also, with garden.

I wore the green because it was all dry. *[UNCLEAR]* Marcus what did you want to bring from there for the Pūjā? *[UNCLEAR]*.

***Contents: 1983-08-25*, Public Program, Day 1, The Love of God, Lausanne, Switzerland**

Shri Mataji: You want to speak through... It's rather hot.

Sahaja Yogini: Should I come to the other side?

Shri Mataji: I think so. Better be here. [Sahaja Yogini translates into French.]

I bow to all the seekers of Truth. I have to ask for [in] your attention, to the understanding that so far whatever we have endured, whatever we have achieved, whatever we think is the development, thinking the whole world as one, we have gone away, deviated from our goal. Now when I have chance of meeting people, I found they even are against God Almighty.

Some people who are not so much blessed in life think that it is the fault of God and some people, who are really blessed, have forgotten Him completely.

Today I am going to talk to you about His Love, what He has done for us. Sahaja Yoga is the blessing of God Almighty, specially made for people who are seeking something higher, something more pure, something greater than *[UNCLEAR* we/they] have had so far. This opportunity is available to everyone, for those who are rich or poor, educated, uneducated, developed, underdeveloped. Everyone has the chance. He has made it possible that people who are really seeking, because you have to knock at the door, will be blessed with something so great that it will fulfil all that is incomplete within them.

So, all that is incomplete will be fulfilled. That all the problems of this human world will be finished, as you will become your absolute Self. All the confusion between the ego and your conditionings will be resolved. For this you cannot pay. Because one must understand that God is a living force of love. In that force He creates this beautiful garden for us. He transforms flowers into fruits. He gives all that is needed to us, all that is needed to us.

So whatever is needed you cannot do it by effort.

For aWestern mind it is very difficult to accept that you get the blessings of God, of your Self-knowledge without doing anything about that. Because this is your right to get it. The whole creation is for this, that you get this, because you deserve it, that you are ready for it, that you are mature for it. You don't have to do anything more for it.

Some people who believe that if you just lead a very good life, then it is done for you, it's not correct. Because

a person may ask, `Why a good life also?' Translator: Why a good life?

Shri Mataji: Why a good life? Why to lead a good life, a religious life, a very saintly life? Why? What's the use? Why should I do it? Or it is another conditioning, that you say that you have to lead a good married life, have children, live very happily but *[UNCLEAR* it's/is] sanctioned with a child? What is the use? Why should I do it? Because you have to ascend. If that good life also makes you absolutely conditioned and solidified, then it is useless. Then you are not doing what you are *[UNCLEAR* suppose/supposed] to achieve. You have to ascend in your consciousness.

So today, I am telling you about the blessings of God out of His Love that He has made it possible that everyone who's seeking a higher life can get it. Now so far people say, “We've done so much and why didn't we get it? How it has become so much easier now?" So I have to explain to you historical, if you know, first it was the work of a man as a `masculine personality', *[UNCLEAR* where/when] he has to build up this science-ness, all those extra world activities. Like a tree grows upwards. And then now is the time for the `feminine consciousness' to rise within you, to nourish like a mother's womb does. You find so many `feminine consciousness' coming up, but they are made to make you deviate again. They are just behaving in the same way as *[UNCLEAR* madman/manly world], [but in the end they will not invading into your] complete *[UNCLEAR* the picture/attention]. That will not achieve the result that we are working it out, the way it has to be worked out, because a new type of nourishing has to come.

As the old *[UNCLEAR* whole/oak/one] tree has to go to its nourishing to *[UNCLEAR* its/the] source, you have to go to your source. But we live in opposites, like if a man is dominating, the woman dominates like man. She competes with him. If the people become very religious, that will make them unreligious, rigid, absolutely again, as you call, the Victorian societies. The movement is pendulum-like. You move suddenly to another side. It won't solve the problem. The problem can only be solved if the movement of consciousness is spiral, when you move higher. And that is only possible when all, whatever we have done, is again nourished through you, like the womb of the mother. And the nourishing nature of motherhood or the nature of the womb doesn't dominate anyone; doesn't dominate the foetus. Because it nourishes that and it makes it grow. It has to look after the growth of it and not the static *[UNCLEAR* point/part].

And unless and until this growth is felt, you should not believe that you are on right path.

Now when you are judging any movement in your consciousness you must understand that there are yet unknown parts in our body of which we are not conscious. Like if you move too much on the left hand side you enter into an area which is called as collective subconscious. Now the left side is the emotional side and if you go too much onto that, then you enter into that area which can be very dangerous. Most of the incurable diseases like cancer are caused by this movement on the physical side. The diseases, major diseases like all schizophrenia, or epilepsy, all these are caused also by the same movement.

The fake people, the fake people who want to make money out of you, can mesmerize you in such a way that you can go into that area where you are just like a cabbage. And they can manoeuvre you. You just become bound by all the conditionings, for they put everything as a mystery before you, as secrets.

Everything will be done in privacy. Very few things will be explained. You have to do everything blindly, with blind faith.

The other side is the right side when you move into collective supraconscious in which you get possessed by your ego. You start seeing lights and you start seeing all sorts of visions, but you are not there, because you can see it. You are away from that, from what you are seeing. You are not experiencing but just seeing it. This is another dangerous zone into which you enter and you could get lost because you don't know what it is.

Now the third dimension into which you have to really rise is your Self, is your Spirit and which is knowledge, complete knowledge. Your soul reigns upon it. Once the Spirit comes into your attention, everything is so logical. You don't have to believe that Christ was the Son of God, but it is a fact which you will see for yourself is proved through the movement of the energies.

You don't have to tell Me you are a twice-born person. But you develop powers of a person who is twice-born of collective consciousness. When these powers are developed, you know what you are actually doing. There are many people I know who say they cure people and they say that, “We don't know how we do it." Some of them are the people who are really possessed of spirits,

dead spirits. And such people if they cure you, they are shifting from one to another spirit. And those people who get treated by such, such, we should say doctors, can suffer from terrible nervous problems and heart suffers, as it's moving.

So all such systems which are opposites, which work in opposite directions, can create a plan which is a personality that cannot have integration.

So to achieve the result of you being the power, you being the person who manoeuvres the power, who is the master of your power, you have to become your Self. Now to become the Self is not some artificial baptism. It's a true baptism. It is true Christianity. For example, when the force that gives you this realisation is awakened, you can see the actual pulsation in the triangular bone. You can actually see it rising. You can see it pulsating on your head. And you can feel the Cool Breeze of the Holy Ghost coming out of your head. That is the true meaning process of baptism.

When Christ said you are to be born again, it is not some mental projection, that you certify yourself, “I'm born again” or “I'm born-again Spirit” and you, you do not feel the Holy Ghost.

Some people who take to such ideas may try to lead a life which is very honourable, noble, but that is just a mental projection.

The religion is not born within you, is not awakened within you, is not enlightened within you.

It has to be in your conscious mind, means on your central nervous [system]. You must feel the religion.

It has to flow from your hands, the energy of yourself, of your Spirit, after your second birth. Mohammed Sahib has said, “At the time of resurrection your hands will speak." The other day I went for a radio interview and the lady felt it and she was amazed. She said, “What's happening? How am I feeling this and what is this I am feeling?" And when she felt this, she, she was so amazed, because she had never felt this before.

Now, this is the love of God. This is the All-pervading Power of God. This is the One that does all the great living works of this universe. But you have to feel it. If you don't feel it, that means something is still wrong in the central nervous system, because it can be felt by thousands.

So one has to correct that and once it is corrected you feel your Spirit flowing through your being.

Now for the first time also that now you can give back to nature, to the Mother Earth, which is the womb of this universe. We are taking it for granted because the Mother Earth as we are exhausting Her morning till evening. And we, we do not know what harm we are doing to Her and to ourselves. But when you feel this Cool Breeze in your hand and then you go, say, near a tree, the tree sucks that. If it is a sick tree, it becomes perfectly all right. If it is not giving any fruits, it starts giving fruits. If you give this energy to certain human being you don't get any troubles. But that person gets his Self-realisation, with no harm gets it. You know where the Kuṇḍalinī is obstructed, where the force it obstructed. You know how to cure it. And you give him this Self-realisation by which he receives this complete peace and

tranquility. Not only that, but if he has [any nuisance or] trouble, he gets over that. If he has any little problem, he gets over that.

So first time you become generous and start giving [to] others. First time you become empowered to really help others, where no money is needed and no effort is needed, no organization needed. It just flows, it emits and the joy of giving is the highest, because now you have become the light. And as Christ has said it, the light is not put under the table. You are not just satisfied by leading a good life with your wife and your children, but you start giving. You become a real noble person, because that becomes your nature, very nature. You become righteous by nature.

[Aside:] In front of Me, just the one who's taking My photographs, who is he? You see. Who's is he? He should have taken the permission. You are taking *[UNCLEAR]*. That is not allowed.

I am sorry for this, but sometimes people have misused the photographs. They have sold them to make money and all that.

So we don't allow to photograph. I hope you don't mind. You cannot sell My photograph. You can at the most paying for the printing; that's all. But you cannot make profit out of it.

So now this is the time, a special time and a great time when such a great happening has to take place and that time if you miss it, you have not been wise. This is the when you will be comforted, you will be redeemed and you'll be consoled. You will know all about it and... Please pay attention this side. This gentleman who is... The
